

1. Questions

Study the following information carefully and answer the following questions.

The given table chart shows the total number of students (male + female) qualified in competitive exams in five different states namely Kerala, TN, AP, Delhi and Bihar respectively and also the ratio of the number of males to females who qualified in competitive exams in these five states.

States	The total number of students who qualified in competitive exam	The ratio of the number of males to females who qualified in competitive exam
Kerala	288	3:1
TN	325	2:3
AP	450	5:4
Delhi	550	6:5
Bihar	650	8:5

@RankZenBanker

The number of female students who qualified in Karnataka is 37.5% more than that in AP and the ratio of the number of male students who qualified in Karnataka to Kerala is 4:3. Find the total number of students who qualified in Karnataka.

- 276
- 563
- 288
- 441
- 435

2. Questions

The number of female students who qualified from UP is 256 more than that in Bihar and the total number of students who qualified in Delhi is 290 less than that in UP. Find the number of males who qualified from UP.

- 456
- 314
- 289
- 334

e. 425

3. Questions

Find the ratio between the number of males who qualified in Bihar to the number of females who qualified in TN.

- a. 80: 39
- b. 27: 31
- c. 29: 39
- d. 11: 29
- e. 39: 43

4. Questions

In Kerala, out of the total number of students who qualified, $\frac{3}{8}$ th are qualified for the UPSC exam and the rest of them are qualified for the SSC exam. Find the number of students who qualified for the SSC exam in Kerala.

- a. 110
- b. 150
- c. 120
- d. 210
- e. 180

@RankZenBanker

5. Questions

Find the total number of females who qualified in all states together.

- a. 567
- b. 425
- c. 967
- d. 1080
- e. 870

6. Questions

Study the following information carefully and answer the following questions.

The given line graph shows the total number of students who use mobile and laptops in five different days namely Monday, Tuesday, Wednesday, Thursday and Friday respectively and also the percentage of the number of students who use mobiles in these five different days.

On Tuesday, the number of students who use tablets is $\frac{2}{9}$ times more than that of mobiles. If the number of students who use computers is 40 less than that of laptops, then find the number of students who use computers and tablets on Tuesday. @RankZenBanker

- a. 280
- b. 400
- c. 360
- d. 300
- e. 240

7. Questions

The number of students who use laptops on Saturday is 20% more than that on Thursday and the number of students who use mobiles on Friday is 88 less than that on Saturday. Find the total number of students who use mobile and laptops on Saturday.

- a. 300
- b. 287
- c. 425
- d. 375
- e. 590

8. Questions

Find the difference between the number of students who use mobiles on Wednesday and Monday together and the number of students who use laptops on Friday.

- a. 18
- b. 11
- c. 9
- d. 15
- e. 3

9. Questions

On Tuesday, the ratio of the number of males to females who use mobiles and laptops together is 5:7. Find the number of female students who use mobiles and laptops.

- a. 210
- b. 90
- c. 150
- d. 180
- e. 240

10. Questions

@RankZenBanker

Find the sum of the number of students who use laptops on Monday, Tuesday and Thursday together.

- a. 445
- b. 489
- c. 532
- d. 610
- e. 388

11. Questions

Study the following information carefully and answer the following questions.

A, B and C entered into a business by investing Rs. 3200, Rs. 2000 and Rs. 4500 respectively. After x months, A increased his investment by Rs. 800 and B decreased his investment by Rs. 500. At the end of the year, the ratio of the profit share of A to C is 22:27.

If D and E invest Rs. 3500 and Rs. 4000 respectively for x months and 2x months respectively, then find the ratio of the profit share of D and E.

- a. 7:16
- b. 11:12

- c. 8:7
- d. 4:5
- e. 11:13

12. Questions

If the total profit share of A is Rs. 8800, then find the difference between the profit share of B and C.

- a. Rs. 6700
- b. Rs. 4500
- c. Rs. 8100
- d. Rs. 12600
- e. Rs. 3500

13. Questions

If the initial investment of A and B is increased by 10x% and 15x%, then find the increased investment of A and B.

- a. Rs. 7700
- b. Rs. 8300
- c. Rs. 6500
- d. Rs. 8900
- e. Rs. 5400

@RankZenBanker

14. Questions

Study the following information carefully and answer the following questions.

The ratio of the milk to water in vessel A to B is 3:2 and 5:6 respectively and the quantity of the milk is 5 liters less than that of the quantity of the water in vessel B. The mixtures in vessels A and B are mixed, the ratio of milk to water becomes 17:14.

Find the difference between the quantity of milk in vessel A and the quantity of water in vessel B.

- a. 32 litres
- b. 45 litres
- c. 28 litres
- d. 30 litres
- e. 55 litres

15. Questions

If the quantity of water in vessel C is 30% more than that in vessel A and the ratio of the quantity of milk to water in vessel C is 7:2, then find the total quantity of mixture in vessel C.

- a. 195 litres
- b. 234 litres
- c. 200 litres
- d. 176 litres
- e. 245 litres

16. Questions

If the quantity of milk in vessel A is increased by 50% and the quantity of water in vessel A is decreased by 25%, then find the new ratio of the quantity of milk to water in vessel A.

- a. 3:4
- b. 2:1
- c. 8:7
- d. 3:1
- e. 4:1

17. Questions

@RankZenBanker

The speed of the boat in still water is 25% more than the speed of the stream and the time taken by the boat to travel 216 km downstream and 6 km upstream is 10 hours. Find the speed of the boat in still water.

- a. 15 km/hr
- b. 22 km/hr
- c. 3 km/hr
- d. 18 km/hr
- e. 9 km/hr

18. Questions

The interest received from Rs. $(x + 2800)$ invested in simple interest at the rate of 18% per annum for 2 years is Rs. 2160. Find the value of x .

- a. Rs. 3500
- b. Rs. 3200
- c. Rs. 2800
- d. Rs. 1800

e. Rs. 2100

19. Questions

Pipe A and B fill a tank in 20 hours and 30 hours respectively while pipe C can empty the full tank in 40 hours. All were opened together, after 10 hours, pipe C closed. Find the time taken to fill the whole tank.

- a. 35 hours
- b. 28 hours
- c. 15 hours
- d. 20 hours
- e. 30 hours

20. Questions

The breadth of the rectangle is 75% of the side of the square and the length of the rectangle is 98 cm less than the perimeter of the square. If the area of the square is 1024 cm^2 , find the perimeter of the rectangle.

- a. 112 cm
- b. 108 cm
- c. 145 cm
- d. 136 cm
- e. 98 cm

@RankZenBanker

21. Questions

A vessel contains milk and water in the ratio 8:3. If 40 liters of milk and water each is added in the mixture, then the quantity of milk becomes twice that of water. Find the initial quantity of milk in the mixture.

- a. 210 litres
- b. 180 litres
- c. 60 litres
- d. 160 litres
- e. 200 litres

22. Questions

A and B entered into a business by investing Rs. $(y + 800)$ and Rs. $(2y - 100)$ respectively for 5 months and 10 months respectively. If the ratio of the profit share of A to B is 9:16. Find the value of y .

- a. 1200
- b. 800
- c. 730
- d. 1900
- e. 2150

23. Questions

The average age of A, B, C and D is 25.5 years and the average age of A and B is 25 years and the age of C is 28 years. Find the present age of D.

- a. 22 years
- b. 24 years
- c. 18 years
- d. 20 years
- e. 19 years

24. Questions

The cost price of the article A is Rs. 2000 and it is sold at a profit of $x\%$ and the selling price of article A is Rs.2600. If the cost price of the article B is Rs.12x and sold for a profit of 20%, then find the selling price of the article B.

- a. Rs. 432
- b. Rs. 288
- c. Rs. 556
- d. Rs. 765
- e. Rs. 890

25. Questions

After 6 years, the ratio of the ages of A to B is 19: 15 and the ratio of the present age of A to B is 4:3. If the present age of C is twice that of B, then find the present age of C.

- a. 25 years
- b. 48 years
- c. 28 years
- d. 36 years
- e. 42 years

26. Questions

What value should come in the place of (?) in the following questions.

$$(23 - 9) * ? - 180 * 4/3 = 11 * 10$$

- a. 18
- b. 22
- c. 19
- d. 25
- e. 30

27. Questions

$$125\% \text{ of } 80 - 15 * 6 = ? * 5 - 125$$

- a. 15
- b. 28
- c. 19
- d. 30
- e. 27

28. Questions

@RankZenBanker

$$\{(11/4 + 7/8)\} - ? = 22/16$$

- a. 1.86
- b. 2.25
- c. 3.75
- d. 9
- e. 4.5

29. Questions

$$40\% \text{ of } 280 - 25\% \text{ of } 600 = ?/3 - 18$$

- a. -56
- b. -60
- c. -90
- d. 88
- e. 45

30. Questions

$$4^2/2^3 * 120 - ? = 160 * 3/4$$

- a. 145
- b. 128
- c. 90
- d. 120
- e. 115

31. Questions

$$(248/8 + 42 * 3) * ? = 942$$

- a. 6
- b. 3
- c. 4
- d. 11
- e. 7

32. Questions

$$(7/9 * 810) - 210 * 3 = ? * 4$$

@RankZenBanker

- a. 2
- b. 9
- c. 0
- d. 6
- e. 4

33. Questions

$$? \% \text{ of } 120 + 80 \% \text{ of } 300 = 25 \% \text{ of } 1200$$

- a. 38
- b. 50
- c. 90
- d. 55
- e. 64

34. Questions

$$?^2 - 2^3 = 17 * 8 + 21 * 2 - 150$$

- a. 11
- b. 8
- c. 4
- d. 6
- e. 2

35. Questions

? * 10 = 42% of 400 - 38% of 100

- a. 13
- b. 21
- c. 19
- d. 17
- e. 9

Explanations:**1. Questions**

@RankZenBanker

In kerala:

The total number of students who qualified = 288

The number of male students who qualified = $288 * \frac{3}{4} = 216$

The number of female students who qualified = $288 * \frac{1}{4} = 72$

In TN:

The total number of students who qualified = 325

The number of male students who qualified = $325 * \frac{2}{5} = 130$

The number of female students who qualified = $325 * \frac{3}{5} = 195$

In AP:

The total number of students who qualified = 450

The number of male students who qualified = $450 * \frac{5}{9} = 250$

The number of female students who qualified = $450 * \frac{4}{9} = 200$

In Delhi:

The total number of students who qualified = 550

The number of male students who qualified = $550 * \frac{6}{11} = 300$

The number of female students who qualified = $550 * \frac{5}{11} = 250$

In Bihar:

The total number of students who qualified = 650

The number of male students who qualified = $650 * \frac{8}{13} = 400$

The number of female students who qualified = $650 * \frac{5}{13} = 250$

States	The total number of students who qualified	The number of male students who qualified	The number of female students who qualified
Kerala	288	216	72
TN	325	130	195
AP	450	250	200
Delhi	550	300	250
Bihar	650	400	250

@RankZenBanker

Answer: B

The number of female students who qualified in Karnataka = $200 * \frac{137.5}{100} = 275$

The number of male students who qualified in Karnataka = $216 * \frac{4}{3} = 288$

Required sum = $(275 + 288) = 563$

Hence, the correct answer is option B

2. Questions

In kerala:

The total number of students who qualified = 288

The number of male students who qualified = $288 * \frac{3}{4} = 216$

The number of female students who qualified = $288 * \frac{1}{4} = 72$

In TN:

The total number of students who qualified = 325

The number of male students who qualified = $325 * \frac{2}{5} = 130$

The number of female students who qualified = $325 * \frac{3}{5} = 195$

In AP:

The total number of students who qualified = 450

The number of male students who qualified = $450 \times \frac{5}{9} = 250$

The number of female students who qualified = $450 \times \frac{4}{9} = 200$

In Delhi:

The total number of students who qualified = 550

The number of male students who qualified = $550 \times \frac{6}{11} = 300$

The number of female students who qualified = $550 \times \frac{5}{11} = 250$

In Bihar:

The total number of students who qualified = 650

The number of male students who qualified = $650 \times \frac{8}{13} = 400$

The number of female students who qualified = $650 \times \frac{5}{13} = 250$

States	The total number of students who qualified	The number of male students who qualified	The number of female students who qualified
Kerala	288	216	72
TN	325	130	195
AP	450	250	200
Delhi	550	300	250
Bihar	650	400	250

@RankZenBanker

Answer: D

The number of females who qualified from UP = $(250 + 256) = 506$

The total number of students who qualified from UP = $(550 + 290) = 840$

The number of males who qualified from UP = $(840 - 506) = 334$

Hence, the correct answer is option D

3. Questions

In kerala:

The total number of students who qualified = 288

The number of male students who qualified = $288 \times \frac{3}{4} = 216$

The number of female students who qualified = $288 * \frac{1}{4} = 72$

In TN:

The total number of students who qualified = 325

The number of male students who qualified = $325 * \frac{2}{5} = 130$

The number of female students who qualified = $325 * \frac{3}{5} = 195$

In AP:

The total number of students who qualified = 450

The number of male students who qualified = $450 * \frac{5}{9} = 250$

The number of female students who qualified = $450 * \frac{4}{9} = 200$

In Delhi:

The total number of students who qualified = 550

The number of male students who qualified = $550 * \frac{6}{11} = 300$

The number of female students who qualified = $550 * \frac{5}{11} = 250$

In Bihar:

The total number of students who qualified = 650

The number of male students who qualified = $650 * \frac{8}{13} = 400$ @RankZenBanker

The number of female students who qualified = $650 * \frac{5}{13} = 250$

States	The total number of students who qualified	The number of male students who qualified	The number of female students who qualified
Kerala	288	216	72
TN	325	130	195
AP	450	250	200
Delhi	550	300	250
Bihar	650	400	250

Answer: A

The number of males who qualified in Bihar = 400

The number of females who qualified in TN = 195

Required ratio = 400: 195 = 80: 39

Hence, the correct answer is option A

4. Questions

In kerala:

The total number of students who qualified = 288

The number of male students who qualified = $288 * \frac{3}{4} = 216$

The number of female students who qualified = $288 * \frac{1}{4} = 72$

In TN:

The total number of students who qualified = 325

The number of male students who qualified = $325 * \frac{2}{5} = 130$

The number of female students who qualified = $325 * \frac{3}{5} = 195$

In AP:

The total number of students who qualified = 450

The number of male students who qualified = $450 * \frac{5}{9} = 250$

The number of female students who qualified = $450 * \frac{4}{9} = 200$

In Delhi:

@RankZenBanker

The total number of students who qualified = 550

The number of male students who qualified = $550 * \frac{6}{11} = 300$

The number of female students who qualified = $550 * \frac{5}{11} = 250$

In Bihar:

The total number of students who qualified = 650

The number of male students who qualified = $650 * \frac{8}{13} = 400$

The number of female students who qualified = $650 * \frac{5}{13} = 250$

States	The total number of students who qualified	The number of male students who qualified	The number of female students who qualified
Kerala	288	216	72
TN	325	130	195
AP	450	250	200
Delhi	550	300	250
Bihar	650	400	250

Answer: E

The number of students who qualified for UPSC exam in Kerala = $288 \times \frac{3}{8} = 108$

The number of students who qualified for SSC exam in Kerala = $288 - 108 = 180$

Hence, the correct answer is option E

5. Questions

@RankZenBanker

In kerala:

The total number of students who qualified = 288

The number of male students who qualified = $288 \times \frac{3}{4} = 216$

The number of female students who qualified = $288 \times \frac{1}{4} = 72$

In TN:

The total number of students who qualified = 325

The number of male students who qualified = $325 \times \frac{2}{5} = 130$

The number of female students who qualified = $325 \times \frac{3}{5} = 195$

In AP:

The total number of students who qualified = 450

The number of male students who qualified = $450 \times \frac{5}{9} = 250$

The number of female students who qualified = $450 \times \frac{4}{9} = 200$

In Delhi:

The total number of students who qualified = 550

The number of male students who qualified = $550 \times \frac{6}{11} = 300$

The number of female students who qualified = $550 \times \frac{5}{11} = 250$

In Bihar:

The total number of students who qualified = 650

The number of male students who qualified = $650 \times \frac{8}{13} = 400$

The number of female students who qualified = $650 \times \frac{5}{13} = 250$

States	The total number of students who qualified	The number of male students who qualified	The number of female students who qualified
Kerala	288	216	72
TN	325	130	195
AP	450	250	200
Delhi	550	300	250
Bihar	650	400	250

@RankZenBanker

Answer: C

The sum of the number of females who qualified in all states together = $(72 + 195 + 200 + 250 + 250) = 967$

Hence, the correct answer is option C

6. Questions

On Monday:

The total number of students who use mobile and laptops = 320

The number of students who use mobiles = $320 \times \frac{40}{100} = 128$

The number of students who use laptops = $320 \times \frac{60}{100} = 192$

On Tuesday:

The total number of students who use mobile and laptops = 360

The number of students who use mobiles = $360 \times \frac{50}{100} = 180$

The number of students who use laptops = $360 \times \frac{50}{100} = 180$

On Wednesday:

The total number of students who use mobile and laptops = 560

The number of students who use mobiles = $560 * 30/100 = 168$

The number of students who use laptops = $560 * 70/100 = 392$

On Thursday:

The total number of students who use mobile and laptops = 400

The number of students who use mobiles = $400 * 60/100 = 240$

The number of students who use laptops = $400 * 40/100 = 160$

On Friday:

The total number of students who use mobile and laptops = 380

The number of students who use mobiles = $380 * 25/100 = 95$

The number of students who use laptops = $380 * 75/100 = 285$

Days	The total number of students who use mobile and laptops	The number of students who use mobiles	The number of students who use laptops
Monday	320	128	192
Tuesday	360	180	180
Wednesday	560	168	392
Thursday	400	240	160
Friday	380	95	285

Answer: C

The number of students who use tablets on Tuesday = $180 + 180 * 2/9 = 220$

The number of students who use computers on Tuesday = $180 - 40 = 140$

Required total = $140 + 220 = 360$

Hence, the correct answer is option C

7. Questions

On Monday:

The total number of students who use mobile and laptops = 320

The number of students who use mobiles = $320 * 40/100 = 128$

The number of students who use laptops = $320 * 60/100 = 192$

On Tuesday:

The total number of students who use mobile and laptops = 360

The number of students who use mobiles = $360 * 50/100 = 180$

The number of students who use laptops = $360 * 50/100 = 180$

On Wednesday:

The total number of students who use mobile and laptops = 560

The number of students who use mobiles = $560 * 30/100 = 168$

The number of students who use laptops = $560 * 70/100 = 392$

On Thursday:

The total number of students who use mobile and laptops = 400

The number of students who use mobiles = $400 * 60/100 = 240$

The number of students who use laptops = $400 * 40/100 = 160$

On Friday:

The total number of students who use mobile and laptops = 380

The number of students who use mobiles = $380 * 25/100 = 95$ @RankZenBanker

The number of students who use laptops = $380 * 75/100 = 285$

Days	The total number of students who use mobile and laptops	The number of students who use mobiles	The number of students who use laptops
Monday	320	128	192
Tuesday	360	180	180
Wednesday	560	168	392
Thursday	400	240	160
Friday	380	95	285

Answer: D

The number of students who use laptops on Saturday = $160 * 120/100 = 192$

The number of students who use mobiles on Saturday = $(95 + 88) = 183$

Required sum = $(192 + 183) = 375$

Hence, the correct answer is option D

8. Questions

On Monday:

The total number of students who use mobile and laptops = 320

The number of students who use mobiles = $320 * 40/100 = 128$

The number of students who use laptops = $320 * 60/100 = 192$

On Tuesday:

The total number of students who use mobile and laptops = 360

The number of students who use mobiles = $360 * 50/100 = 180$

The number of students who use laptops = $360 * 50/100 = 180$

On Wednesday:

The total number of students who use mobile and laptops = 560

The number of students who use mobiles = $560 * 30/100 = 168$

The number of students who use laptops = $560 * 70/100 = 392$

@RankZenBanker

On Thursday:

The total number of students who use mobile and laptops = 400

The number of students who use mobiles = $400 * 60/100 = 240$

The number of students who use laptops = $400 * 40/100 = 160$

On Friday:

The total number of students who use mobile and laptops = 380

The number of students who use mobiles = $380 * 25/100 = 95$

The number of students who use laptops = $380 * 75/100 = 285$

Days	The total number of students who use mobile and laptops	The number of students who use mobiles	The number of students who use laptops
Monday	320	128	192
Tuesday	360	180	180
Wednesday	560	168	392
Thursday	400	240	160
Friday	380	95	285

Answer: B

The number of students who use mobiles on Wednesday and Monday together = $(128 + 168) = 296$

The number of students who use laptops on Friday = 285

Required difference = $(296 - 285) = 11$

@RankZenBanker

Hence, the correct answer is option B

9. Questions

On Monday:

The total number of students who use mobile and laptops = 320

The number of students who use mobiles = $320 * 40/100 = 128$

The number of students who use laptops = $320 * 60/100 = 192$

On Tuesday:

The total number of students who use mobile and laptops = 360

The number of students who use mobiles = $360 * 50/100 = 180$

The number of students who use laptops = $360 * 50/100 = 180$

On Wednesday:

The total number of students who use mobile and laptops = 560

The number of students who use mobiles = $560 * 30/100 = 168$

The number of students who use laptops = $560 * 70/100 = 392$

On Thursday:

The total number of students who use mobile and laptops = 400

The number of students who use mobiles = $400 * 60/100 = 240$

The number of students who use laptops = $400 * 40/100 = 160$

On Friday:

The total number of students who use mobile and laptops = 380

The number of students who use mobiles = $380 * 25/100 = 95$

The number of students who use laptops = $380 * 75/100 = 285$

Days	The total number of students who use mobile and laptops	The number of students who use mobiles	The number of students who use laptops
Monday	320	128	192
Tuesday	360	180	180
Wednesday	560	168	392
Thursday	400	240	160
Friday	380	95	285

Answer: A

The total number of students who use mobiles and laptops on Tuesday = 360

The number of females who use mobiles and laptops on Tuesday = $360 * 7/12 = 210$

Hence, the correct answer is option A

10. Questions

On Monday:

The total number of students who use mobile and laptops = 320

The number of students who use mobiles = $320 * 40/100 = 128$

The number of students who use laptops = $320 * 60/100 = 192$

On Tuesday:

The total number of students who use mobile and laptops = 360

The number of students who use mobiles = $360 * 50/100 = 180$

The number of students who use laptops = $360 * 50/100 = 180$

On Wednesday:

The total number of students who use mobile and laptops = 560

The number of students who use mobiles = $560 * 30/100 = 168$

The number of students who use laptops = $560 * 70/100 = 392$

On Thursday:

The total number of students who use mobile and laptops = 400

The number of students who use mobiles = $400 * 60/100 = 240$

The number of students who use laptops = $400 * 40/100 = 160$

On Friday:

The total number of students who use mobile and laptops = 380

The number of students who use mobiles = $380 * 25/100 = 95$

The number of students who use laptops = $380 * 75/100 = 285$

Days	The total number of students who use mobile and laptops	The number of students who use mobiles	The number of students who use laptops
Monday	320	128	192
Tuesday	360	180	180
Wednesday	560	168	392
Thursday	400	240	160
Friday	380	95	285

Answer: C

The sum of the number of students who use laptops on Monday, Tuesday and Thursday together = $(192 + 180 + 160) = 532$

Hence, the correct answer is option C

11. Questions

The ratio of the profit share of A, B and C = $(3200 * x + 4000 * (12 - x)) : (2000 * x + 1500 * (12 - x)) : (4500 * 12)$

$$= (3200x + 48000 - 4000x) : (2000x + 18000 - 1500x) : 54000$$

$$= (48000 - 800x) : (500x + 18000) : 54000$$

$$= (480 - 8x) : (5x + 180) : 540$$

$$(480 - 8x)/540 = 22/27$$

$$480 - 8x = 440$$

$$40 = 8x$$

$$x = 5$$

Answer: A

The ratio of the profit share of D and E = $(3500 * 5) : (4000 * 10)$

$$= 35 : 80$$

$$= 7 : 16$$

Hence, the correct answer is option A

12. Questions

The ratio of the profit share of A, B and C = $(3200 * x + 4000 * (12 - x)) : (2000 * x + 1500 * (12 - x)) : (4500 * 12)$

$$= (3200x + 48000 - 4000x) : (2000x + 18000 - 1500x) : 54000$$

$$= (48000 - 800x) : (500x + 18000) : 54000$$

$$= (480 - 8x) : (5x + 180) : 540$$

$$(480 - 8x)/540 = 22/27$$

$$480 - 8x = 440$$

$$40 = 8x$$

$$x = 5$$

Answer: A

The ratio of the profit share of A, B and C = $(480 - 8x) : (5x + 180) : 540$

$$= 440 : 205 : 540$$

$$= 88 : 41 : 108$$

The profit share of B = $8800 * 41/88 = \text{Rs. } 4100$

The profit share of C = $8800 * 108/88 = \text{Rs. } 10800$

Required difference = $(10800 - 4100) = \text{Rs. } 6700$

Hence, the correct answer is option A

13. Questions

@RankZenBanker

The ratio of the profit share of A, B and C = $(3200 * x + 4000 * (12 - x)) : (2000 * x + 1500 * (12 - x)) : (4500 * 12)$

$$= (3200x + 48000 - 4000x) : (2000x + 18000 - 1500x) : 54000$$

$$= (48000 - 800x) : (500x + 18000) : 54000$$

$$= (480 - 8x) : (5x + 180) : 540$$

$$(480 - 8x)/540 = 22/27$$

$$480 - 8x = 440$$

$$40 = 8x$$

$$x = 5$$

Answer: B

The investment of A after increased = $3200 * 150/100 = \text{Rs. } 4800$

The investment of B after increased = $2000 * 175/100 = \text{Rs. } 3500$

Required sum = $(4800 + 3500) = \text{Rs. } 8300$

Hence, the correct answer is option B

14. Questions

Let Quantity of milk from vessel A = $3x$

The quantity of the water from vessel A = $2x$

The quantity of milk from vessel B = $5y$

The quantity of water from vessel B = $6y$

Now, The quantity of milk in vessel B = $5 * 5 = 25$ liters

The quantity of water in vessel B = $6 * 5 = 30$ liters

$$(25 + 3x)/(30 + 2x) = 17/14$$

$$350 + 42x = 510 + 34x$$

$$8x = 160$$

$$x = 20$$

Answer: D

The quantity of milk in vessel A = $3 * 20 = 60$ litres

The quantity of water in vessel B = 30 litres

Required difference = $(60 - 30) = 30$ litres

Hence, the correct answer is option D

15. Questions

@RankZenBanker

Let Quantity of milk from vessel A = $3x$

The quantity of the water from vessel A = $2x$

The quantity of milk from vessel B = $5y$

The quantity of water from vessel B = $6y$

Now, The quantity of milk in vessel B = $5 * 5 = 25$ liters

The quantity of water in vessel B = $6 * 5 = 30$ liters

$$(25 + 3x)/(30 + 2x) = 17/14$$

$$350 + 42x = 510 + 34x$$

$$8x = 160$$

$$x = 20$$

Answer: B

The quantity of water in vessel C = $2 * 20 * 130/100 = 40 * 130/100 = 52$ litres

The quantity of milk in vessel C = $52 * 7/2 = 182$ litres

The total quantity of mixture in vessel C = $(182 + 52) = 234$ litres

Hence, the correct answer is option B

16. Questions

@RankZenBanker

Let Quantity of milk from vessel A = $3x$

The quantity of the water from vessel A = $2x$

The quantity of milk from vessel B = $5y$

The quantity of water from vessel B = $6y$

Now, The quantity of milk in vessel B = $5 * 5 = 25$ liters

The quantity of water in vessel B = $6 * 5 = 30$ liters

$$(25 + 3x)/(30 + 2x) = 17/14$$

$$350 + 42x = 510 + 34x$$

$$8x = 160$$

$$x = 20$$

Answer: D

The quantity of milk in vessel A = $60 * 150/100 = 90$ litres

The quantity of water in vessel A = $40 * 75/100 = 30$ litres

Required ratio = $90:30 = 3:1$

Hence, the correct answer is option D

17. Questions

Answer: A

The ratio of the speed of the boat in still water to the speed of the stream = $125:100 = 5:4$

Let, the speed of the boat in still water = $5x$ km/hr

The speed of the stream = $4x$ km/hr

$$(216/9x) + (6/x) = 10$$

$$24/x + 6/x = 10$$

$$30/x = 10$$

$$x = 3$$

The speed of the boat in still water = $3 * 5 = 15$ km/hr

Hence, the correct answer is option A

18. Questions

Answer: B

$$SI = PNR/100$$

$$2160 = (x + 2800) * 18/100 * 2$$

$$2160/0.36 = (x + 2800)$$

$$6000 = x + 2800$$

$$x = 3200$$

Hence, the correct answer is option B

19. Questions

Answer: C

The total work = 120 units (LCM of 20, 30 and 40)

The efficiency of pipe A = $120/20 = 6$ units/hour

The efficiency of pipe B = $120/30 = 4$ units/hour

The efficiency of pipe C = $120/40 = 3$ units/hour

Let, the remaining tank to be filled be x hours

$$10 * (6 + 4 - 3) + (6 + 4) * x = 120$$

$$70 + 10 * x = 120$$

$$10 * x = 50$$

$$x = 5$$

Required time taken = $(5 + 10) = 15$ hours

@RankZenBanker

Hence, the correct answer is option C

20. Questions

Answer: B

Side of the square (a) = $(1024)^{1/2}$

a = 32 cm

The breadth of the rectangle = $32 * 75/100$

= $32 * 3/4 = 24$ cm

The perimeter of the square = $4a = 4 * 32 = 128$ cm

The length of the rectangle = $(128 - 98) = 30$ cm

The perimeter of the rectangle = $2(l + b)$ cm

$2 * (24 + 30) = 2 * 54$

= 108 cm

Hence, the correct answer is option B

21. Questions

Answer: D

Let, the initial quantity of milk and water in the mixture be 8x litre and 3x litre respectively

$(8x + 40)/(3x + 40) = 2/1$

$8x + 40 = 6x + 80$

$2x = 40$

$x = 20$

The initial quantity of milk in the mixture = $8 * 20 = 160$ litres

Hence, the correct answer is option D

22. Questions

Answer: C

The ratio of the profit share of A and B = $(y + 800) * 5 : (2y - 100) * 10$

= $(y + 800) : (4y - 200)$

$(y + 800)/(4y - 200) = 9/16$

$16y + 12800 = 36y - 1800$

$20y = 14600$

$y = 730$

Hence, the correct answer is option C

23. Questions

Answer: B

The sum of age of A, B, C and D = $25.5 * 4 = 102$ years

The sum of present ages of A and B = $25 * 2 = 50$ years

The sum of present age of C and D = $(102 - 50) = 52$ years

The present age of D = $(52 - 28) = 24$ years

Hence, the correct answer is option B

24. Questions

Answer: A

According to the question,

$$2000 * (100 + x)/100 = 2600$$

$$100 + x = 130$$

$$x = 30$$

The cost price of the article B = $12 * 30 = \text{Rs. } 360$

The selling price of the article B = $360 * 120/100 = \text{Rs. } 432$

Hence, the correct answer is option A

@RankZenBanker

25. Questions

Answer: B

Let the ages of A and B after 6 years is $19x$ years and $15x$ years respectively.

$$(19x - 6)/(15x - 6) = 4/3$$

$$57x - 18 = 60x - 24$$

$$3x = 6$$

$$x = 2$$

The present age of B = $(15 * 2 - 6) = 24$ years

The present age of C = $24 * 2 = 48$ years

Hence, the correct answer is option B

26. Questions

Answer: D

$$(23 - 9) * ? - 180 * 4/3 = 11 * 10$$

$$14 * ? - 240 = 110$$

$$14 * ? = 350$$

$$? = 25$$

Hence, the correct answer is option D

27. Questions

Answer: E

$$125\% \text{ of } 80 - 15 * 6 = ? * 5 - 125$$

$$100 - 90 + 125 = ? * 5$$

$$135/5 = ?$$

$$? = 27$$

Hence, the correct answer is option E

28. Questions

Answer: B

$$\{(11/4 + 7/8)\} - ? = 22/16$$

$$(88 + 28)/32 - ? = 22/16$$

$$116/32 - ? = 22/16$$

$$-? = 44/32 - 116/32$$

$$-? = -72/32$$

$$? = 2.25$$

Hence, the correct answer is option B

29. Questions

Answer: B

$$40\% \text{ of } 280 - 25\% \text{ of } 600 = ?/3 - 18$$

$$112 - 150 + 18 = ?/3$$

$$-20 * 3 = ?$$

$$? = -60$$

Hence, the correct answer is option B

30. Questions

Answer: D

$$4^2/2^3 * 120 - ? = 160 * 3/4$$

$$16/8 * 120 - ? = 120$$

$$240 - ? = 120$$

$$? = 120$$

@RankZenBanker

Hence, the correct answer is option D

31. Questions

Answer: A

$$(248/8 + 42 * 3) * ? = 942$$

$$(31 + 126) * ? = 942$$

$$157 * ? = 942$$

$$? = 6$$

Hence, the correct answer is option A

32. Questions

Answer: C

$$(7/9 * 810) - 210 * 3 = ? * 4$$

$$(7 * 90) - 630 = ? * 4$$

$$630 - 630 = ? * 4$$

$$? = 0$$

Hence, the correct answer is option C

33. Questions

Answer: B

$$?\% \text{ of } 120 + 80\% \text{ of } 300 = 25\% \text{ of } 1200$$

$$1.2 * ? + 240 = 300$$

$$1.2 * ? = 60$$

$$? = 50$$

Hence, the correct answer is option B

34. Questions

Answer: D

$$?^2 - 2^3 = 17 * 8 + 21 * 2 - 150$$

$$?^2 - 8 = 136 + 42 - 150$$

$$?^2 - 8 = 28$$

$$?^2 = 36$$

$$? = 6$$

Hence, the correct answer is option D

@RankZenBanker

35. Questions**Answer: A**

$$? * 10 = 42\% \text{ of } 400 - 38\% \text{ of } 100$$

$$? * 10 = 168 - 38$$

$$? * 10 = 130$$

$$? = 13$$

Hence, the correct answer is option A

@RankZenBanker
