

1. Questions

Study the following information carefully and answer the given questions.

Eight persons - A, B, C, D, E, F, G and H are sitting in a linear row and facing the north.

D sits at one of the ends. Three persons sit between D and C. F sits to the immediate left of C. E sits third to the right of F. As many persons sit to the right of E as between H and B. H sits at one of the positions to the left of B. G neither sits at one of the ends nor sits adjacent to F. At most one person sits between A and C.

What is the position of E with respect to G as per the final arrangement?

- a. Second to the left
- b. Seventh to the right
- c. Third to the left
- d. Fifth to the right
- e. Fourth to the right

2. Questions

Four of the following are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. DA
- b. BE
- c. CH
- d. FA
- e. DG

3. Questions

Who among the following persons sits fourth to the left of B as per the final arrangement?

- a. H
- b. F
- c. A
- d. D
- e. G

@RankZen Banker

4. Questions

If we arrange all the persons as per English alphabetical order from right to left then how many persons will remain unchanged in their original positions?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

5. Questions

As many persons sit to the left of __ as to the right of __.

- a. E, H
- b. G, B
- c. F, C
- d. D, F
- e. A, C

6. Questions

Study the following information carefully and answer the given questions.

Eight people – P, Q, R, S, T, U, V and W bought a thing one after another on different occasions. It is assumed that no other persons bought a thing other than the given persons.

Four people bought things between P and U. R bought two people before P. S bought immediately before U. At least one person bought before S. As many people bought before S as after V. W bought before Q but not before T. T does not buy before R.

How many persons have bought a thing before T?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

@RankZen Banker

7. Questions

Which of the following statements is False as per the final arrangement?

- a. No one bought a things before R
- b. As many persons bought a things after P as before Q
- c. More than two persons bought a things between U and V
- d. No one bought a thing between Q and W

- e. P bought a things immediately after T

8. Questions

Four of the following are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. TV
- b. PT
- c. WQ
- d. SU
- e. RV

9. Questions

Who among the following persons bought a thing immediately before S ?

- a. T
- b. Q
- c. V
- d. U
- e. R

10. Questions

The number of persons who bought before P is one less than the number of persons who bought after __

- a. R
- b. P
- c. S
- d. W
- e. Q

@RankZen Banker

11. Questions

Study the following information carefully and answer the given questions.

Eight persons -L, M, N, O, P, Q, R and S attend the seminar on two different dates either 5th or 26th of four different months viz.,January, February, March and April of the same year. Only one person attends the seminar on each date and only two persons attend the seminar in each month.

N attends the seminar in a month which has the least number of days. Three persons attend between N and R. As many persons attend before R as after Q. P attends two persons after Q. M and O attends on an even

numbered date. M doesn't attend after O. The number of persons who attend between L and S is **two more than** the number of persons who attend between M and O. L attends before S.

L attends the seminar in which of the following month and date?

- a. March 26
- b. February 5
- c. April 26
- d. March 5
- e. January 5

12. Questions

How many persons attend the seminar after S?

- a. No one
- b. One
- c. Two
- d. Three
- e. More than three

13. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. Only two persons attend the seminar between N and L
- b. S attends the seminar in January
- c. Only three persons attend the seminar before P
- d. M attends the seminar on March 5th
- e. No one attends the seminar between Q and O

14. Questions

Who among the following person attends the seminar on April 5th?

- a. R
- b. S
- c. N
- d. L
- e. Q

15. Questions

Which among the following pair of persons attends the seminar in January?

- a. M and Q
- b. L and Q
- c. R and O
- d. P and L
- e. S and M

16. Questions

Study the following information carefully and answer the given questions.

Eight persons - A, B, C, D, E, F, G and H are sitting around a circular table facing the centre with equal distance between adjacent persons.

One person sits between F and D. C sits to the immediate right of F. B sits third to the right of C. As many persons sit between B and D as between H and A, when counted from the left of D and right of H. E sits second to the left of H.

What is the position of G with respect to H based on the final arrangement?

- a. Fifth to the right
- b. Third to the right
- c. Third to the left
- d. Second to the left
- e. Both a and c

17. Questions

How many persons sit between C and F, when counted from the right of C?

- a. Four
- b. Three
- c. Six
- d. Five
- e. Two

@RankZen Banker

18. Questions

In which of the following option, the first person sits to the immediate right of the second person?

- a. AF
- b. EG
- c. DA

d. HD

e. BH

19. Questions

Who among the following person sits seventh to the right of B?

a. D

b. G

c. H

d. E

e. F

20. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

a. FB

b. HG

c. AB

d. EF

e. CD

21. Questions

In the given questions, the relationship between different elements is shown in the statements followed by two conclusions. Find the conclusion which is definitely true.

Statements:

$A < B \leq C = D < E > F \geq G > H$

Conclusion I: $A < D$

Conclusion II: $E > G$

a. Only conclusion I is true

b. Either conclusion I or II is true

c. Both conclusions I and II are true

d. Only conclusion II is true

e. Neither conclusion I nor II is true

22. Questions

@RankZen Banker

Statements:

$$M = N \geq O = P \geq Q = R$$

Conclusion I: $M > Q$

Conclusion II: $M = Q$

- a. Only conclusion II is true
- b. Neither conclusion I nor II is true
- c. Either conclusion I or II is true
- d. Only conclusion I is true
- e. Both conclusions I and II are true

23. Questions

Statements:

$$X < Y \leq Z < W = K \leq L$$

Conclusion I: $X \geq K$

Conclusion II: $Z < L$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

24. Questions

Statements:

$$H \geq I > J = K \leq L < M$$

Conclusion I: $H > K$

Conclusion II: $I > M$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Neither conclusion I nor II is true
- e. Either conclusion I or II is true

25. Questions

@RankZen Banker

Statements:

$$A < B \leq C > D = E \leq F$$

Conclusion I: $A < D$

Conclusion II: $C > F$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Neither conclusion I nor II is true
- e. Either conclusion I or II is true

26. Questions

Study the following information carefully and answer the given questions.

L E Y W O S A K G D R W T Q S G O F V M Q P U X Z D R N Y I B

Which among the following letter is thirteenth to the left of the eighth letter from the right end in the given series?

- a. R
- b. K
- c. W
- d. N
- e. Z

27. Questions

How many such letters are there in the given series each of which is immediately followed by a vowel and immediately preceded by a consonant?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

@RankZen Banker

28. Questions

If the first fifteen letters (from the left end) in the given series are reversed, then which of the following letter is the twenty-fifth letter from the right end?

- a. K

- b. R
- c. A
- d. D
- e. G

29. Questions

If all the vowels are dropped from the given series, then which of the following letter is exactly between the ninth letter from the left end and eleventh letter from the right end?

- a. O
- b. F
- c. Q
- d. S
- e. G

30. Questions

If all the vowels are dropped, then what is the sum of the place value of the letters as per the alphabetical series, which are 6th from the right end, 9th from the left end and thirteenth from the left end in the given series?

- a. 66
- b. 56
- c. 46
- d. 36
- e. 26

31. Questions

Study the following information carefully and answer the given questions.

C and G are the sisters of S, who has a child. M is the daughter-in-law of D, who has only three children. D is the father of G. O is the brother-in-law of S and has no siblings. G is an unmarried person. W is the mother-in-law of O, who is married to N's aunt.

How is C related to N?

- a. Maternal aunt
- b. Paternal aunt
- c. Grandmother
- d. Niece

- e. Sister-in-law

32. Questions

If M has only one son, how is M's son related to W?

- a. Grand son
- b. Son-in-law
- c. Son
- d. Brother -in-law
- e. Brother

33. Questions

Which of the following statements is/are true with respect to the final arrangement?

I). N is the grandchild of D

II). D is the husband of W

III). O is the nephew of G

- a. All I, II and III
- b. Only I
- c. Only I and II
- d. Only III
- e. Only II and III

34. Questions

Study the following information carefully and answer the given questions.

A is the sister-in-law of X, who has no siblings. A is the only daughter of G, who is the mother-in-law of C. Z is the son of C, who is the brother-in-law of Y. B is the father of Y, who has only one sibling. C has no siblings.

How is Y related to Z?

- a. Grandfather
- b. Paternal uncle
- c. Maternal uncle
- d. Father-in-law
- e. Brother

@RankZen Banker

35. Questions

Which of the following statements is true with respect to the final arrangement?

- a. A has only one sister
- b. C is the brother of X
- c. B is the grandmother of Z
- d. X is the mother of Z
- e. Z is the grandson of X's mother-in-law

36. Questions

Study the following information carefully and answer the given questions.

Seven persons - A, B, C, D, E, F and G are of different weights.

A is heavier than D and B but lighter than E. F is heavier than B and D, who is not the lightest. G is heavier than E but he is not the heaviest. As many persons heavier than B as lighter than C. A is heavier than F but not as much heavier than E. The heaviest person weighs 120kg, which is 76kg more than the lightest one. A weighs 75kg.

How many persons are not heavier than F as per the final arrangement?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

37. Questions

If the total weight of A and F is 137kg , then what will be the possible weight of D ?

- a. 57kg
- b. 69kg
- c. 42kg
- d. 76kg
- e. 74kg

@RankZen Banker

38. Questions

If the total weight of A, C and E is 275kg then what will be the total weight of E and B as per the above arrangement?

- a. 152kg
- b. 110kg

- c. 135kg
- d. 147kg
- e. 124kg

39. Questions

Study the following information carefully and answer the given questions.

A group of six friends - L, M, N, O, P and Q - having a different number of chocolates with them.

M has more chocolates than L and N. P has more chocolates than M and O. N and Q do not have the least number of chocolates. As many persons have more chocolates than Q as less than O. L have the third least number of chocolates. P has 120 chocolates and O has 55 chocolates.

Who among the following persons has the second least number of chocolates?

- a. Q
- b. P
- c. M
- d. N
- e. O

40. Questions

If the total number of chocolates with P and L is 205, then what will be the possible number of chocolates with M?

- a. 125
- b. 98
- c. 82
- d. 75
- e. 68

@RankZen Banker

Explanations:

1. Questions

Final arrangement:

We have,

- D sits at one of the ends.
- Three persons sit between D and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C.
- E sits third to the right of F.

Again, we have,

- As many persons sit to the right of E as between H and B.
- H sits at one of the positions to the left of B.
- G neither sits at one of the ends nor sits adjacent to F.
- At most one person sits between A and C.

From the above conditions Case 2 gets eliminated because at most one person sits between A and C is not satisfied. Hence, Case 1 is the final arrangement.

Answer: D

2. Questions

Final arrangement:

We have,

- D sits at one of the ends.
- Three persons sit between D and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C.
- E sits third to the right of F.

Again, we have,

- As many persons sit to the right of E as between H and B.
- H sits at one of the positions to the left of B.
- G neither sits at one of the ends nor sits adjacent to F.
- At most one person sits between A and C.

From the above conditions Case 2 gets eliminated because at most one person sits between A and C is not satisfied. Hence, Case 1 is the final arrangement.

Answer: A (In all the other options there is no one sits between first person and second person except in option a)

3. Questions

Final arrangement:

We have,

- D sits at one of the ends.
- Three persons sit between D and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C.
- E sits third to the right of F.

Again, we have,

- As many persons sit to the right of E as between H and B.
- H sits at one of the positions to the left of B.
- G neither sits at one of the ends nor sits adjacent to F.
- At most one person sits between A and C.

From the above conditions Case 2 gets eliminated because at most one person sits between A and C is not satisfied. Hence, Case 1 is the final arrangement.

Answer: B

4. Questions

Final arrangement:

We have,

- D sits at one of the ends.
- Three persons sit between D and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C.
- E sits third to the right of F.

Again, we have,

- As many persons sit to the right of E as between H and B.
- H sits at one of the positions to the left of B.
- G neither sits at one of the ends nor sits adjacent to F.
- At most one person sits between A and C.

From the above conditions Case 2 gets eliminated because at most one person sits between A and C is not satisfied. Hence, Case 1 is the final arrangement.

Answer: B (Only G remain unchanged from the original position)

5. Questions

Final arrangement:

We have,

- D sits at one of the ends.
- Three persons sit between D and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C.
- E sits third to the right of F.

Again, we have,

- As many persons sit to the right of E as between H and B.
- H sits at one of the positions to the left of B.
- G neither sits at one of the ends nor sits adjacent to F.
- At most one person sits between A and C.

From the above conditions Case 2 gets eliminated because at most one person sits between A and C is not satisfied. Hence, Case 1 is the final arrangement.

Answer: C

6. Questions

Final arrangement

Persons
R
V
P
T
W
Q
S
U

We have,

- Four people bought things between P and U.
- R bought two people before P.

From the above conditions there are two possibilities.

@RankZen Banker

Case 1	Case 2
Persons	Persons
R	U
P	
	R
	P
U	

Again we have,

- S bought immediately before U.
- As many people bought before S as after V.
- At least one person bought before S.

Case 1	Case 2
Persons	Persons
R	
V	S
P	U
	R
S	V
U	P

@RankZen Banker

Again we have,

- W bought before Q but not before T.
- T does not buy before R.

From the above conditions Case 2 gets eliminated because T does not buy things before R, which is not satisfied. Hence, Case 1 is the final arrangement.

Case 1	Case 2

- The number of persons who attend between L and S is **two more than** the number of persons who attend between M and O.
- L attends before S.

From the above conditions Case 2 gets eliminated because the number of persons attends the seminar L and S is **two more** than the number of persons attending the seminar between M and O is not satisfied. Hence, Case 1 shows the final arrangement.

@RankZen Banker

Months	Dates	Case 1	Case 2
		Persons	Persons
January	5	L	Q
	26	Q	M
February	5	N	P
	26	P	N
March	5	S	
	26	M	O
April	5	R	
	26	O	R

Answer: C

14. Questions

Final arrangement

Months	Dates	Persons
January	5	L
	26	Q
February	5	N
	26	P
March	5	S
	26	M
April	5	R
	26	O

@RankZen Banker

We have,

- N attends the seminar in a month which has the least number of days.

- Three persons attend between N and R.

From the above conditions there are two possibilities.

Months	Dates	Case 1	Case 2
		Persons	Persons
January	5		
	26		
February	5	N	
	26		N
March	5		
	26		
April	5	R	
	26		R

Again, we have,

- As many persons attend before R as after Q.
- P attends two persons after Q.

@RankZen Banker

Months	Dates	Case 1	Case 2
		Persons	Persons
January	5		Q
	26	Q	
February	5	N	P
	26	P	N
March	5		
	26		
April	5	R	
	26		R

Again, we have,

- M and O attend on an even numbered date .
- M doesn't attend after O.
- The number of persons who attend between L and S is **two more than** the number of persons who attend between M and O.
- L attends before S.

From the above conditions Case 2 gets eliminated because the number of persons attends the seminar L and S is **two more** than the number of persons attending the seminar between M and O is not satisfied. Hence, Case 1 shows the final arrangement.

@RankZen Banker

Months	Dates	Case 1	Case 2

Answer: B

16. Questions

Final arrangement:

We have,

- One person sits between F and D.
- C sits to the immediate right of F.

@RankZen Banker

From the above conditions, there are two possibilities.

Again, we have,

- B sits third to the right of C.

Again, we have,

- As many persons sit between B and D as between H and A, when counted from the left of D and right of H.
- E sits second to the left of H.

From the above conditions Case 1 gets eliminated because E sits second to the left of H, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: E

17. Questions

Final arrangement:

We have,

- One person sits between F and D.
- C sits to the immediate right of F.

From the above conditions, there are two possibilities.

@RankZen Banker

Again, we have,

- B sits third to the right of C.

Again, we have,

- As many persons sit between B and D as between H and A, when counted from the left of D and right of H.
- E sits second to the left of H.

From the above conditions Case 1 gets eliminated because E sits second to the left of H, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: C

18. Questions

Final arrangement:

@RankZen Banker

We have,

- One person sits between F and D.
- C sits to the immediate right of F.

From the above conditions, there are two possibilities.

Again, we have,

- B sits third to the right of C.

Again, we have,

- As many persons sit between B and D as between H and A, when counted from the left of D and right of H.
- E sits second to the left of H.

From the above conditions Case 1 gets eliminated because E sits second to the left of H, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: B

19. Questions

Final arrangement:

We have,

- One person sits between F and D.
- C sits to the immediate right of F.

From the above conditions, there are two possibilities.

Again, we have,

- B sits third to the right of C.

@RankZen Banker

Again, we have,

- As many persons sit between B and D as between H and A, when counted from the left of D and right of H.
- E sits second to the left of H.

From the above conditions Case 1 gets eliminated because E sits second to the left of H, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: D

20. Questions

Final arrangement:

We have,

- One person sits between F and D.
- C sits to the immediate right of F.

From the above conditions, there are two possibilities.

Again, we have,

- B sits third to the right of C.

@RankZen Banker

Again, we have,

- As many persons sit between B and D as between H and A, when counted from the left of D and right of H.
- E sits second to the left of H.

From the above conditions Case 1 gets eliminated because E sits second to the left of H, which is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: A (In all options, the first person sits third to the right of second person, except option a)

21. Questions

Answer: C

Given: $A < B \leq C = D < E > F \geq G > H$

Conclusion I: $A < D$ ($A < B \leq C = D$) $\rightarrow$ True

Conclusion II: $E > G$ ($E > F \geq G$) $\rightarrow$ True

22. Questions

Answer: C

Given: $M = N \geq O = P \geq Q = R$

Conclusion I: $M > Q$ ($M = N \geq O = P \geq Q$) $\rightarrow$ False

Conclusion II: $M = Q$ ($M = N \geq O = P \geq Q$) $\rightarrow$ False

By combining both conclusions, we get either conclusion I or II is true.

23. Questions

Answer: B

Given: $X < Y \leq Z < W = K \leq L$

@RankZen Banker

Conclusion I: $X \geq K$ ($X < Y \leq Z < W = K$)-->False

Conclusion II: $Z < L$ ($Z < W = K \leq L$)-->True

24. Questions

Answer: A

Given: $H \geq I > J = K \leq L < M$

Conclusion I: $H > K$ ($H \geq I > J = K$)-->True

Conclusion II: $I > M$ ($I > J = K \leq L < M$)-->False

25. Questions

Answer: D

Given: $A < B \leq C > D = E \leq F$

Conclusion I: $A < D$ ($A < B \leq C > D$)-->False

Conclusion II: $C > F$ ($C > D = E \leq F$)-->False

26. Questions

Answer: A

Given series: L E Y W O S A K G D R W T Q S G O F V M Q P U X Z D R N Y I B

The eighth letter from the right end is X and the thirteenth to the left of X is R.

27. Questions

Answer: D

Given series: L E Y W O S A K G D R W T Q S G O F V M Q P U X Z D R N Y I B

There are four letters in the given series each of which is immediately followed by a vowel and immediately preceded by a consonant.

28. Questions

Answer: E

Given series: L E Y W O S A K G D R W T Q S G O F V M Q P U X Z D R N Y I B

If the first fifteen letters in the given series are reversed, then, @RankZen Banker

Required series: S Q T W R D G K A S O W Y E L G O F V M Q P U X Z D R N Y I B

G is the twenty-fifth letter from the right end.

29. Questions

Answer: D

Given series: L E Y W O S A K G D R W T Q S G O F V M Q P U X Z D R N Y I B

If all the vowels are dropped from the given series, then,

Required series: L Y W S K G D R W T Q S G F V M Q P X Z D R N Y B

S is exactly between the ninth letter from the left end i.e W, and the eleventh letter from the right end i.e V.

30. Questions

Answer: B

Required series: L Y W S K G D R W T Q S G F V M Q P X Z D R N Y B

Required sum: $23+7+26=56$

31. Questions

Final arrangement:

Answer: B

32. Questions

Final arrangement:

Answer: A

@RankZen Banker

33. Questions

Final arrangement:

Answer: C

34. Questions

Final arrangement:

Answer: C

35. Questions

Final arrangement:

Answer: E

36. Questions

Final arrangement:

C(120kg) > G > E > A(75kg) > F > D > B(44kg)

We have,

- A is heavier than D and B but lighter than E.
- F is heavier than B and D, who is not the lightest.

$A > D/B$ and $F > B/D \geq$ Or $F > D > B$

Again, we have,

@RankZen Banker

- G is heavier than E but he is not the heaviest.
- As many persons heavier than B are the same as the persons lighter than C.
- A is heavier than F but not as much heavier than E.

$C > G > E > A > F > D > B$

Again, we have,

- The heaviest person weighs 120kg, which is 76kg more than the lightest one.
- A weighs 75kg.

From the above conditions we get the final order:

$C(120\text{kg}) > G > E > A(75\text{kg}) > F > D > B(44\text{kg})$

Answer: B

37. Questions

Final arrangement:

$C(120\text{kg}) > G > E > A(75\text{kg}) > F > D > B(44\text{kg})$

We have,

- A is heavier than D and B but lighter than E.
- F is heavier than B and D, who is not the lightest.

$A > D/B$ and $F > B/D > _ \text{ Or } F > D > B$

Again, we have,

- G is heavier than E but he is not the heaviest.
- As many persons heavier than B are the same as the persons lighter than C.
- A is heavier than F but not as much heavier than E.

$C > G > E > A > F > D > B$

Again, we have,

- The heaviest person weighs 120kg, which is 76kg more than the lightest one.
- A weighs 75kg.

From the above conditions we get the final order:

$C(120\text{kg}) > G > E > A(75\text{kg}) > F > D > B(44\text{kg})$

Answer: A

If the total weight of A and F is 137kg, then,

The weight of A = 75kg, then the weight of F = $137 - 75 = 62\text{kg}$.

The possible weight of D will be between 62kg and 44kg, so the possible weight of D is 57kg in the options given.

38. Questions

Final arrangement:

@RankZen Banker

$C(120\text{kg}) > G > E > A(75\text{kg}) > F > D > B(44\text{kg})$

We have,

- A is heavier than D and B but lighter than E.
- F is heavier than B and D, who is not the lightest.

$A > D/B$ and $F > B/D > _$ Or $F > D > B$

Again, we have,

- G is heavier than E but he is not the heaviest.
- As many persons heavier than B are the same as the persons lighter than C.
- A is heavier than F but not as much heavier than E.

$C > G > E > A > F > D > B$

Again, we have,

- The heaviest person weighs 120kg, which is 76kg more than the lightest one.
- A weighs 75kg.

From the above conditions we get the final order:

$C(120\text{kg}) > G > E > A(75\text{kg}) > F > D > B(44\text{kg})$

Answer: E

If the total weight of A, C and E is $275\text{kg} = 75 + 120 + E = 275\text{kg}$

Weight of E = $275 - 195 = 80\text{kg}$.

The possible total weight of E and B = $80 + 44 = 124\text{kg}$.

39. Questions

Final arrangement:

$Q > P(120) > M > L(85) > N > O(55)$

We have,

- M has more chocolates than L and N.
- P has more chocolates than M and O.

$M > L/N$ and $P > M/O$

Again, we have,

- N and Q do not have the least number of chocolates.
- As many persons have more chocolates than Q as less than O.
- L have the third least number of chocolates.
- P has 120 chocolates and O has 55 chocolates.

From the above conditions we get the final order:

$Q > P(120) > M > L(85) > N > O(55)$

Answer: D

@RankZen Banker

40. Questions

Final arrangement:

$$Q > P(120) > M > L(85) > N > O(55)$$

We have,

- M has more chocolates than L and N.
- P has more chocolates than M and O.

$$M > L/N \text{ and } P > M/O$$

Again, we have,

- N and Q do not have the least number of chocolates.
- As many persons have more chocolates than Q as less than O.
- L have the third least number of chocolates.
- P has 120 chocolates and O has 55 chocolates.

From the above conditions we get the final order:

$$Q > P(120) > M > L(85) > N > O(55)$$

Answer: B

The total number of chocolates with P and L is 205 ,

The number of chocolates with P = 120

The number of chocolates with L = $205 - 120 = 85$

So the only possible number of chocolates with M is between 120 and 85 , the only possible option is 98.

@RankZen Banker
