

1. Questions

Study the following information carefully and answer the below questions

Seven people - P, Q, R, S, T, U and V are working in a college in different designations such as Chairman, Principal, Vice Principal, HOD, Professor, Assistant Professor, Librarian. The hierarchy of the designations in increasing order, where Librarian is the junior-most position and Chairman is the senior-most position.

P is senior to at most one person. Only two people are designated between P and R. As many people are junior to S as senior to P. U is designated immediately senior to Q, who is not the Vice Principal. The number of people designated between T and U is **three less** than the number of people designated between V and P.

Who among the following person is senior to R but junior to V as per the above arrangement?

- a. Q
- b. S
- c. V
- d. T
- e. U

2. Questions

@RankZen Banker

If V is related to HOD, and S is related to the Vice Principal in a certain way, then who among the following is related to the Librarian?

- a. U
- b. S
- c. T
- d. V
- e. R

3. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. S and HOD
- b. Vice Principal and R
- c. Q and Professor
- d. Assistant Professor and P
- e. S and Principal

4. Questions

Which of the following statements is/are true as per the designation?

- I). U is the Professor
 - II). Only three people are senior to R
 - III). S is the senior-most designated person
- a. Only I
 - b. Only I and II
 - c. Only II
 - d. All are true
 - e. Only II and III

5. Questions

If all people are arranged in alphabetical order from Librarian to Chairman, then how many people remain unchanged?

- a. Two
- b. One
- c. Three
- d. None
- e. More than three

@RankZen Banker

6. Questions

Study the following information carefully and answer the below questions

Eight persons - H, I, J, K, L, M, N, and O live on four different floors of a four storeyed building where the lowermost floor is numbered, the one above that is numbered two and so on till the topmost floor is numbered four..

Note-I: Each floor has two flats viz., Flat-P and Flat-Q, where Flat P is to the west of Flat Q.

Note-II: Flat Q of floor 2 is immediately above Flat Q of floor 1. Similarly, Flat P of floor 3 is immediately above Flat P of floor 2 and so on.

Note-III: Area of each flat on each floor is equal.

Note-IV: Only two persons live on each floor and only one person lives in each flat.

L lives on an even-numbered floor in Flat-P and immediately above O, where both of them live in different flats. As many floors above L as below M but both do not live in the different flats. Only one floor is between O and K. Both J and N live on the same floor. The number of floors between N and I is **two more** than the number of floors between M and L. N lives above H on the same flat.

Who among the following person lives on Floor number 3?

- a. K
- b. L
- c. M
- d. Both a) and b)
- e. Both a) and c)

7. Questions

If J is related to N, and M is related to K in a certain way, then who among the following person is related to O?

- a. The one who lives immediately below L in the same flat
- b. M
- c. The one who lives immediately below M
- d. H
- e. None of these

8. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. N
- b. K
- c. O
- d. M
- e. H

9. Questions

Which among the following floors and flats does N live?

- a. Floor number 1 and Flat-P
- b. Floor number 2 and Flat-Q
- c. Floor number 4 and Flat-Q
- d. Floor number 3 and Flat-P
- e. Floor number 2 and Flat-P

10. Questions

Which of the following is/are not TRUE as per the given arrangement?

- a. I and O live on the same floor
- b. J lives two floors above H
- c. M lives on an even-numbered floor
- d. All are true
- e. Both a) and b)

11. Questions

Study the following information carefully and answer the below questions

Eight persons - A, B, C, D, E, F, G and H are sitting around a rectangular table in such a way that four persons are sitting in the middle while four persons are sitting at the corners. All persons are facing the centre of the table.

C sits on the longer side of the table and sits opposite to B. Only two persons sit between B and F. As many persons sit between C and D as between D and A, when counted from the left of D and A respectively. E sits second to the right of D but does not sit adjacent to C. The number of persons who sit between E and F is **two more than** the number of persons who sit between F and H. G is not an immediate neighbour of H.

Who among the following persons sits second to the right of H?

- a. A
- b. F
- c. E
- d. G
- e. D

@RankZen Banker

12. Questions

If all persons are made to sit in alphabetical order from A in a clockwise direction (excluding A), then how many persons will remain unchanged in their position?

- a. Two
- b. One
- c. None
- d. Three
- e. More than three

13. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form

a group. Which one of the following does not belong to the group?

- a. H
- b. D
- c. F
- d. E
- e. G

14. Questions

If E is related to F, and G is related to A in a certain way, then who among the following is related to H?

- a. B
- b. C
- c. D
- d. E
- e. F

15. Questions

Which of the following statements is/are TRUE as per the given arrangement?

@RankZen Banker

I). G and A sits at the shorter side of the table

II). B sits second to the right of G

III). C and H are immediate neighbours

- a. Only I
- b. Only I and II
- c. Only III
- d. All I, II, III
- e. None of I, II, III

16. Questions

Study the following information carefully and answer the below questions

Eight persons are sitting in two parallel rows containing four persons each in such a way that there is an equal distance between adjacent persons. In Row 1: W, X, Y, and Z are seated facing south. In row 2: R, S, T and U are seated facing north. Each person in row 1 faces another person in row 2.

R sits at second from the extreme end of the row. As many persons who sit to the right of R as to the right of Y. Only one person sits between Y and W. Z doesn't sit opposite to S. U doesn't sit at the extreme end.

The number of persons sitting between W and X is **one more** than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y.

Who among the following persons sits at the extreme end of the rows?

- a. Both b and c
- b. T
- c. S
- d. Z
- e. Y

17. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. T and Z
- b. U and Y
- c. R and W
- d. X and U
- e. Y and R

@RankZen Banker

18. Questions

If R and Y interchange their position with T and W respectively, then who among the following sits second to the left of the one who sits opposite to W?

- a. U
- b. S
- c. R
- d. X
- e. Z

19. Questions

If R is related to Z and X is related to S in a certain way, then who among the following is related to U?

- a. W
- b. S
- c. T
- d. Y

e. X

20. Questions

Which of the following statements is/are TRUE as per the given arrangement?

- a. T and S sit at the extreme ends
- b. U sits second to the right of T
- c. Only two people sit between W and Y
- d. All are true
- e. Both a) and b)

21. Questions

Study the following information carefully and answer the below questions

H 2 # P F * J K \$ L S Q (3 O 9 J A 1 & R 3 ^ 6 P) E @ D 5 # Z % X ~ 4 + I

Which among the following elements is sixth to the right of the second element from the left end in the given series?

- a. &
- b. K
- c. \$
- d. S
- e. 3

@RankZen Banker

22. Questions

Which of the following elements is exactly between the sixteenth element from the right end and the seventh element from the left end?

- a. 9
- b. Q
- c. 3
- d. A
- e. None of these

23. Questions

How many such numbers are there in the series which are immediately followed by a symbol?

- a. One
- b. Two

- c. Three
- d. None
- e. More than three

24. Questions

If all the symbols are dropped from the given series, then which of the following element will be tenth from the right end as per the new series?

- a. 3
- b. P
- c. 6
- d. R
- e. 5

25. Questions

What is the sum of all numbers in the given series?

- a. 30
- b. 31
- c. 32
- d. 33
- e. 34

@RankZen Banker

26. Questions

Study the following information carefully and answer the below questions

In a certain code language,

“Bank Exam Results Recruitment” is coded as “ak me le it”

“Recruitment Process Registration Bank” is coded as “ak os is it”

“Bank Officer Allotment list” is coded as “ak ir no tr”

“Officer Clerk Results list” is coded as “tr ki ir le”

(Note: All the given codes are two-letter codes only.)

What is the word for the code “tr” in the given coded language ?

- a. Officer
- b. List
- c. Clerk

- d. Either a) or b)
- e. Either a) or c)

27. Questions

How many codes of the words can be definitely determined?

- a. Five
- b. Six
- c. Seven
- d. Eight
- e. Nine

28. Questions

If the phrase “Process Portal List” is coded as “os zd ir”, then what will be the code for the Phrase “Officer Registration Drive” as per the given coded language?

- a. os ki tr
- b. tr is os
- c. xz is tr
- d. fi oi zd
- e. zd os is

@RankZen Banker

29. Questions

What will be the phrase for the code “me ak le” in the given coded language?

- a. Bank Result Process
- b. Registration Bank Clerk
- c. Allotment List Result
- d. Bank Exam Result
- e. Officer Exam Recruitment

30. Questions

What is the code for the word “Allotment” as per the given coded language?

- a. ir
- b. tr
- c. no
- d. ki

e. ak

31. Questions

Study the following information carefully and answer the below questions

A man started walking from his house towards the north, after walking 7 m he reached the temple, then he turned right and walked 6 m to reach the park. From the park, he turns south and walks 7 m to reach the theatre. From the theatre, he turns left and walks 10 m to reach the school. Finally, he walks towards the north to reach Ground, which is east of the Park. Ground is his final destination.

What is the shortest distance between the Park and the School?

- a. 12m
- b. $\sqrt{154}$ m
- c. $\sqrt{149}$ m
- d. 15m
- e. $\sqrt{147}$ m

32. Questions

What is the position of the Ground with respect to his starting point?

- a. North
- b. North-east
- c. South
- d. South-east
- e. East

@RankZen Banker

33. Questions

What is the total distance travelled by the man?

- a. 35 m
- b. 31 m
- c. 33 m
- d. 37 m
- e. 32 m

34. Questions

Study the following information carefully and answer the below questions

Point X is 5m to the west of J, which is 6m north of A. Point A is 7m to the west of G. Point S is north-east of G and east of J. The distance between J and S is twice of the distance between X and J. Point N is

exactly between S and J.

What is the position of Point G with respect to Point N?

- a. South
- b. North-east
- c. South-east
- d. North
- e. South-west

35. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. Point X and Point J
- b. Point J and Point N
- c. Point N and Point S
- d. Point A and Point G
- e. Point J and Point G

@RankZen Banker

36. Questions

Study the following information carefully and answer the below questions

Statements

All Banana are Apple

Some Banana are Cherry

Only a few Apple are Orange

Conclusions

I). Some Apple are Cherry.

II). All Cherry are Orange is a possibility.

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

37. Questions

Statements

Some Exams are tough

Some tough are maths

No maths is easy

Conclusions

I). All exams are maths is a possibility.

II). Some easy are tough.

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

38. Questions

Statements

Only class is Online.

Only a few record are class.

Few Record are offline.

Conclusions

I). All class are offline is a possibility

II). No Record is online.

- a. Only conclusion II follows
- b. Neither conclusion I nor II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follows
- e. Both conclusions I and II follow

39. Questions

Statements

All Hospital are Government.

All Government are Licensed

No Licensed is Private

@RankZen Banker

Conclusions

I). All Private are Government is a possibility.

II). Some hospital are not Private.

- a. Either conclusion I or II follows
- b. Only conclusion I follows
- c. Both conclusions I and II follow
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

40. Questions

Statements

All birds are fly.

Few fly are high

Only a few high are birds

Conclusions

I). No fly is bird

II). All high are birds is a possibility

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

@RankZen Banker

Explanations:

1. Questions

Final Arrangement:

Designation	Persons
Chairman	S
Principal	V
Vice Principal	T
HOD	R
Professor	U
Assistant Professor	Q
Librarian	P

We have,

- P is senior to at most one person.
- Only two people are designated between P and R.

From the above conditions, there are two possibilities.

@RankZen Banker

Designation	Case 1	Case 2
	Persons	Persons
Chairman		
Principal		
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- As many people are junior to S as senior to P.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal		S
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- U is designated as an immediate senior to Q, who is not the Vice Principal.
- The number of people designated between T and U is **three less** than the number of people designated between V and P.

@RankZen Banker

From the above conditions, Case 2 gets eliminated because the number of people between T and U is three less than the number of people between V and P which is not satisfied.

Hence Case 1 shows the final arrangement.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal	V	S
Vice Principal	T	R
HOD	R	U
Professor	U	Q
Assistant Professor	Q	P
Librarian	P	

Answer: D

2. Questions

Final Arrangement:

Designation	Persons
Chairman	S
Principal	V
Vice Principal	T
HOD	R
Professor	U
Assistant Professor	Q
Librarian	P

We have,

- P is senior to at most one person.
- Only two people are designated between P and R.

@RankZen Banker

From the above conditions, there are two possibilities.

Designation	Case 1	Case 2
	Persons	Persons
Chairman		
Principal		
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- As many people are junior to S as senior to P.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal		S
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- U is designated as an immediate senior to Q, who is not the Vice Principal.
- The number of people designated between T and U is **three less** than the number of people designated between V and P.

From the above conditions, Case 2 gets eliminated because the number of people between T and U is three less than the number of people between V and P which is not satisfied.

Hence Case 1 shows the final arrangement.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal	V	S
Vice Principal	T	R
HOD	R	U
Professor	U	Q
Assistant Professor	Q	P
Librarian	P	

Answer: A (Only one designation is between the person and the designation)

3. Questions

Final Arrangement:

@RankZen Banker

Designation	Persons
Chairman	S
Principal	V
Vice Principal	T
HOD	R
Professor	U
Assistant Professor	Q
Librarian	P

We have,

- P is senior to at most one person.
- Only two people are designated between P and R.

From the above conditions, there are two possibilities.

Designation	Case 1	Case 2
	Persons	Persons
Chairman		
Principal		
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- As many people are junior to S as senior to P.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal		S
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

@RankZen Banker

Again, we have,

- U is designated as an immediate senior to Q, who is not the Vice Principal.
- The number of people designated between T and U is **three less** than the number of people designated between V and P.

From the above conditions, Case 2 gets eliminated because the number of people between T and U is three

less than the number of people between V and P which is not satisfied.

Hence Case 1 shows the final arrangement.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal	V	S
Vice Principal	T	R
HOD	R	U
Professor	U	Q
Assistant Professor	Q	P
Librarian	P	

Answer: A (All people are designated adjacent to each other except in option a)

@RankZen Banker

4. Questions

Final Arrangement:

Designation	Persons
Chairman	S
Principal	V
Vice Principal	T
HOD	R
Professor	U
Assistant Professor	Q
Librarian	P

We have,

- P is senior to at most one person.
- Only two people are designated between P and R.

From the above conditions, there are two possibilities.

Designation	Case 1	Case 2
	Persons	Persons
Chairman		
Principal		
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- As many people are junior to S as senior to P.

@RankZen Banker

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal		S
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- U is designated as an immediate senior to Q, who is not the Vice Principal.
- The number of people designated between T and U is **three less** than the number of people designated between V and P.

From the above conditions, Case 2 gets eliminated because the number of people between T and U is three less than the number of people between V and P which is not satisfied.

Hence Case 1 shows the final arrangement.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal	V	S
Vice Principal	T	R
HOD	R	U
Professor	U	Q
Assistant Professor	Q	P
Librarian	P	

Answer: D

@RankZen Banker

5. Questions

Final Arrangement:

Designation	Persons
Chairman	S
Principal	V
Vice Principal	T
HOD	R
Professor	U
Assistant Professor	Q
Librarian	P

We have,

- P is senior to at most one person.

- Only two people are designated between P and R.

From the above conditions, there are two possibilities.

Designation	Case 1	Case 2
	Persons	Persons
Chairman		
Principal		
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- As many people are junior to S as senior to P.

@RankZen Banker

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal		S
Vice Principal		R
HOD	R	
Professor		
Assistant Professor		P
Librarian	P	

Again, we have,

- U is designated as an immediate senior to Q, who is not the Vice Principal.

- The number of people designated between T and U is **three less** than the number of people designated between V and P.

From the above conditions, Case 2 gets eliminated because the number of people between T and U is three less than the number of people between V and P which is not satisfied.

Hence Case 1 shows the final arrangement.

Designation	Case 1	Case 2
	Persons	Persons
Chairman	S	
Principal	V	S
Vice Principal	T	R
HOD	R	U
Professor	U	Q
Assistant Professor	Q	P
Librarian	P	

@RankZen Banker

Answer: C (P, Q and T remain unchanged in their position)

6. Questions

Final Arrangement:

Floors	Flat-P	Flat-Q
4	J	N
3	M	K
2	L	H
1	I	O

we have,

- L lives on an even-numbered floor in Flat-P and immediately above O where both of them live in different flats.
- As many floors live above L as below M but both do not live in the different flats.

From the above conditions, there are two possibilities.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L			
3		O	M	
2			L	
1	M			O

Again, we have,

- Only one floor is between O and K.
- Both J and N live on the same floor.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J/N	J/N
3		O	M	K
2	J/N	J/N	L	
1	M	K		O

@RankZen Banker

Again, we have,

- The number of floors between N and I is **two more** than the number of floors between M and L.
- N lives above H on the same flat.

From the above conditions, Case 1 gets eliminated because the number of persons who live between N and I is **two more** than the number of persons who live between M and L, which is not satisfied.

Hence, Case 2 shows the final arrangement.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J	N
3		O	M	K
2	J/N	J/N	L	H
1	M	K	I	O

Answer: E

7. Questions

Final Arrangement:

Floors	Flat-P	Flat-Q
4	J	N
3	M	K
2	L	H
1	I	O

@RankZen Banker

we have,

- L lives on an even-numbered floor in Flat-P and immediately above O where both of them live in different flats.
- As many floors live above L as below M but both do not live in the different flats.

From the above conditions, there are two possibilities.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L			
3		O	M	
2			L	
1	M			O

Again, we have,

- Only one floor is between O and K.
- Both J and N live on the same floor.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J/N	J/N
3		O	M	K
2	J/N	J/N	L	
1	M	K		O

Again, we have,

- The number of floors between N and I is **two more** than the number of floors between M and L.
- N lives above H on the same flat.

From the above conditions, Case 1 gets eliminated because the number of persons who live between N and I is **two more** than the number of persons who live between M and L, which is not satisfied.

Hence, Case 2 shows the final arrangement.

Floors	Case 1	Case 2		
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J	N
3		O	M	K
2	J/N	J/N	L	H
1	M	K	I	O

Answer: A (The pair of persons are living on the same floor)

8. Questions

Final Arrangement:

Floors	Flat-P	Flat-Q
4	J	N
3	M	K
2	L	H
1	I	O

we have,

- L lives on an even-numbered floor in Flat-P and immediately above O where both of them live in different flats.
- As many floors live above L as below M but both do not live in the different flats.

From the above conditions, there are two possibilities.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L			
3		O	M	
2			L	
1	M			O

@RankZen Banker

Again, we have,

- Only one floor is between O and K.
- Both J and N live on the same floor.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J/N	J/N
3		O	M	K
2	J/N	J/N	L	
1	M	K		O

Again, we have,

- The number of floors between N and I is **two more** than the number of floors between M and L.
- N lives above H on the same flat.

From the above conditions, Case 1 gets eliminated because the number of persons who live between N and I is **two more** than the number of persons who live between M and L, which is not satisfied.

Hence, Case 2 shows the final arrangement.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J	N
3		O	M	K
2	J/N	J/N	L	H
1	M	K	I	O

Answer: D (In all the other options the persons live on Flat-Q except option D)

@RankZen Banker

9. Questions

Final Arrangement:

Floors	Flat-P	Flat-Q
4	J	N
3	M	K
2	L	H
1	I	O

we have,

- L lives on an even-numbered floor in Flat-P and immediately above O where both of them live in different flats.
- As many floors live above L as below M but both do not live in the different flats.

From the above conditions, there are two possibilities.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L			
3		O	M	
2			L	
1	M			O

Again, we have,

- Only one floor is between O and K.
- Both J and N live on the same floor.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J/N	J/N
3		O	M	K
2	J/N	J/N	L	
1	M	K		O

@RankZen Banker

Again, we have,

- The number of floors between N and I is **two more** than the number of floors between M and L.
- N lives above H on the same flat.

From the above conditions, Case 1 gets eliminated because the number of persons who live between N and I is **two more** than the number of persons who live between M and L, which is not satisfied.

Hence, Case 2 shows the final arrangement.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J	N
3		O	M	K
2	J/N	J/N	L	H
1	M	K	I	O

Answer: C

10. Questions

Final Arrangement:

Floors	Flat-P	Flat-Q
4	J	N
3	M	K
2	L	H
1	I	O

@RankZen Banker

we have,

- L lives on an even-numbered floor in Flat-P and immediately above O where both of them live in different flats.
- As many floors live above L as below M but both do not live in the different flats.

From the above conditions, there are two possibilities.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L			
3		O	M	
2			L	
1	M			O

Again, we have,

- Only one floor is between O and K.
- Both J and N live on the same floor.

Floors	Case 1		Case 2	
	Flat-P	Flat-Q	Flat-P	Flat-Q
4	L		J/N	J/N
3		O	M	K
2	J/N	J/N	L	
1	M	K		O

Again, we have,

- The number of floors between N and I is **two more** than the number of floors between M and L.
- N lives above H on the same flat.

From the above conditions, Case 1 gets eliminated because the number of persons who live between N and I is **two more** than the number of persons who live between M and L, which is not satisfied.

Hence, Case 2 shows the final arrangement.

Floors	Case 1	Case 2	
	Flat-P	Flat-Q	Flat-Q
4	L		J N
3		O	M K
2	J/N	J/N	L H
1	M	K	I O

Answer: C

11. Questions

Final Arrangement:

we have,

- C sits on the longer side of the table and sits opposite to B.
- Only two persons sits between B and F.

From the above conditions, there are two possibilities

Again, we have,

- As many persons sit between C and D as between D and A ,when counted from the left of D and A respectively.
- E who sits second to the right of D but does not sit adjacent to C.

From the above conditions there is one more possibility.

Again, we have,

- The number of persons who sit between E and F is **two more than** the number of persons who sit between F and H.
- G is not an immediate neighbour of H.

From the above conditions, Case 2 and Case 2a gets eliminated. Case 2 gets eliminated because the number of persons who sit between E and F is two more than the number of persons who sit between F and H is not satisfied and Case 2a gets eliminated because G is not an immediate neighbour of H is not satisfied.

Hence, Case 1 shows the final arrangement.

Answer: B

12. Questions

Final Arrangement:

we have,

- C sits on the longer side of the table and sits opposite to B.
- Only two persons sits between B and F.

From the above conditions, there are two possibilities

Again, we have,

- As many persons sit between C and D as between D and A ,when counted from the left of D and A respectively.
- E who sits second to the right of D but does not sit adjacent to C.

From the above conditions there is one more possibility.

Again, we have,

- The number of persons who sit between E and F is **two more than** the number of persons who sit between F and H.
- G is not an immediate neighbour of H.

From the above conditions, Case 2 and Case 2a gets eliminated. Case 2 gets eliminated because the number of persons who sit between E and F is two more than the number of persons who sit between F and H is not satisfied and Case 2a gets eliminated because G is not an immediate neighbour of H is not satisfied.

Hence, Case 1 shows the final arrangement.

Answer: D (D, F and H remain unchanged in their position)

13. Questions

Final Arrangement:

we have,

- C sits on the longer side of the table and sits opposite to B.
- Only two persons sit between B and F.

From the above conditions, there are two possibilities

Again, we have,

- As many persons sit between C and D as between D and A ,when counted from the left of D and A respectively.
- E who sits second to the right of D but does not sit adjacent to C.

From the above conditions there is one more possibility.

Again, we have,

- The number of persons who sit between E and F is **two more than** the number of persons who sit between F and H.
- G is not an immediate neighbour of H.

From the above conditions, Case 2 and Case 2a gets eliminated. Case 2 gets eliminated because the number of persons who sit between E and F is two more than the number of persons who sit between F and H is not satisfied and Case 2a gets eliminated because G is not an immediate neighbour of H is not satisfied.

Hence, Case 1 shows the final arrangement.

Answer: E (In all the other options the persons are sit at the corner of the table except in option E)

14. Questions

Final Arrangement:

we have,

- C sits on the longer side of the table and sits opposite to B.
- Only two persons sit between B and F.

From the above conditions, there are two possibilities

Again, we have,

- As many persons sit between C and D as between D and A ,when counted from the left of D and A respectively.
- E who sits second to the right of D but does not sit adjacent to C.

From the above conditions there is one more possibility.

Again, we have,

- The number of persons who sit between E and F is **two more than** the number of persons who sit between F and H.
- G is not an immediate neighbour of H.

From the above conditions, Case 2 and Case 2a gets eliminated. Case 2 gets eliminated because the number of persons who sit between E and F is two more than the number of persons who sit between F and H is not satisfied and Case 2a gets eliminated because G is not an immediate neighbour of H is not satisfied.

Hence, Case 1 shows the final arrangement.

Answer: C (All the persons are sitting opposite to each other)

15. Questions

Final Arrangement:

we have,

- C sits on the longer side of the table and sits opposite to B.
- Only two persons sit between B and F.

From the above conditions, there are two possibilities

Again, we have,

- As many persons sit between C and D as between D and A ,when counted from the left of D and A respectively.
- E who sits second to the right of D but does not sit adjacent to C.

From the above conditions there is one more possibility.

Again, we have,

- The number of persons who sit between E and F is **two more than** the number of persons who sit between F and H.
- G is not an immediate neighbour of H.

From the above conditions, Case 2 and Case 2a gets eliminated. Case 2 gets eliminated because the number of persons who sit between E and F is two more than the number of persons who sit between F and H is not satisfied and Case 2a gets eliminated because G is not an immediate neighbour of H is not satisfied.

Hence, Case 1 shows the final arrangement.

Answer: D

16. Questions

Final Arrangement:

we have,

- R sits at second from the extreme end of the row.
- As many persons who sit to the right of R are the same as to the right of Y.

From the above conditions, there are two possibilities

@RankZen Banker

Again, we have,

- Only one person sits between Y and W.
- Z doesn't sit opposite to S.

Again, we have,

- U doesn't sit at the extreme end.
- The number of persons sitting between W and X is **one more** than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y.

From the above conditions, Case 2 gets eliminated because "The number of persons sitting between W and X is one more than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y" which is not satisfied.

@RankZen Banker

Hence, Case 1 shows the final arrangement.

Answer: A

17. Questions

Final Arrangement:

we have,

- R sits at second from the extreme end of the row.
- As many persons who sit to the right of R are the same as to the right of Y.

From the above conditions, there are two possibilities

@RankZen Banker

Again, we have,

- Only one person sits between Y and W.
- Z doesn't sit opposite to S.

Again, we have,

- U doesn't sit at the extreme end.
- The number of persons sitting between W and X is **one more** than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y.

From the above conditions, Case 2 gets eliminated because "The number of persons sitting between W and X is one more than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y" which is not satisfied.

Hence, Case 1 shows the final arrangement.

Answer: B (Only the persons in option b are facing each other)

@RankZen Banker

18. Questions

Final Arrangement:

we have,

- R sits at second from the extreme end of the row.
- As many persons who sit to the right of R are the same as to the right of Y.

From the above conditions, there are two possibilities

Again, we have,

- Only one person sits between Y and W.
- Z doesn't sit opposite to S.

@RankZen Banker

Again, we have,

- U doesn't sit at the extreme end.
- The number of persons sitting between W and X is **one more** than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y.

From the above conditions, Case 2 gets eliminated because “The number of persons sitting between W and X is one more than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y” which is not satisfied.

Hence, Case 1 shows the final arrangement.

Case 1

~~Case 2~~

Answer: C

19. Questions

Final Arrangement:

@RankZen Banker

we have,

- R sits at second from the extreme end of the row.
- As many persons who sit to the right of R are the same as to the right of Y.

From the above conditions, there are two possibilities

Case 1

Case 2

Again, we have,

- Only one person sits between Y and W.
- Z doesn't sit opposite to S.

Again, we have,

- U doesn't sit at the extreme end.
- The number of persons sitting between W and X is **one more** than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y.

From the above conditions, Case 2 gets eliminated because "The number of persons sitting between W and X is one more than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y" which is not satisfied.

Hence, Case 1 shows the final arrangement.

Answer: D (All the persons sit opposite to each other)

20. Questions

Final Arrangement:

we have,

- R sits at second from the extreme end of the row.
- As many persons who sit to the right of R are the same as to the right of Y.

From the above conditions, there are two possibilities

@RankZen Banker

Again, we have,

- Only one person sits between Y and W.
- Z doesn't sit opposite to S.

Again, we have,

- U doesn't sit at the extreme end.
- The number of persons sitting between W and X is **one more** than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y.

From the above conditions, Case 2 gets eliminated because "The number of persons sitting between W and X is one more than the number of persons sitting between U and T, who sits second to the left of the one who sits opposite to Y" which is not satisfied.

Hence, Case 1 shows the final arrangement.

@RankZen Banker

Answer: E

21. Questions

Answer: B

Given series: H 2 # P F * J K \$ L S Q (3 O 9 J A 1 & R 3 ^ 6 P) E @ D 5 # Z % X ~ 4 + I

The element which is sixth to the right of second element from the left end is K

22. Questions

Answer: E

Given series: H 2 # P F * J K \$ L S Q (3 O 9 J A 1 & R 3 ^ 6 P) E @ D 5 # Z % X ~ 4 + I

The element which is sixteenth from the right end is ^.

The element which is seventh from the left end is J .

Required series: J K \$ L S Q (3 O 9 J A 1 & R 3 ^

The element is exactly between the sixteenth element from the right end and the seventh element from the left end is O.

23. Questions

Answer: E

Given series: H 2 # P F * J K \$ L S Q (3 O 9 J A 1 & R 3 ^ 6 P) E @ D 5 # Z % X ~ 4 + I

There are 5 numbers which are immediately followed by the symbols in the given series,

Required series: H 2 # P F * J K \$ L S Q (3 O 9 J A 1 & R 3 ^ 6 P) E @ D 5 # Z % X ~ 4 + I

24. Questions

Answer: A

Given series: H 2 # P F * J K \$ L S Q (3 O 9 J A 1 & R 3 ^ 6 P) E @ D 5 # Z % X ~ 4 + I

All the symbols are dropped from the given series,

Required series: H 2 P F J K L S Q 3 O 9 J A 1 R 3 6 P E D 5 Z X 4 I

The element which is tenth from the right end is 3

25. Questions

Answer: D

Given series: H 2 # P F * J K \$ L S Q (3 O 9 J A 1 & R 3 ^ 6 P) E @ D 5 # Z % X ~ 4 + I

The sum of all numbers in the given series = (2 + 3 + 9 + 1 + 3 + 6 + 5 + 4) = 33

Answer: C

@RankZen Banker

31. Questions

Final Arrangement:

Answer: C

By applying Pythagoras theorem,

$$\text{Distance} = \sqrt{(10^2 + 7^2)} = \sqrt{(100 + 49)} = \sqrt{149}$$

32. Questions

Final Arrangement:

Answer: B

33. Questions

Final Arrangement:

@RankZen Banker

Answer: D

The total distance travelled by the man = $(7 + 6 + 7 + 10 + 7) = 37$ m

34. Questions

Final Arrangement:

Answer: C

35. Questions

Final Arrangement:

Answer: E (First point is to the west of second point, except in option e)

36. Questions

Answer: C

@RankZen Banker

I). Some Apple are Cherry: Here, there is a relation between Apple and Cherry through Banana. Some parts of Cherry are inside the Apple. So, The conclusion follows.

II). All Cherry are Orange is a possibility: Here, there is no direct relation between Cherry and Orange. So, the possible of condition follows because there is no negative connection between them. Hence, the conclusion follows.

37. Questions

Answer: A

I). All exams are maths is a possibility: Here, there is no direct relation between maths and exams. So, the possible condition between them is true. Hence, the conclusion follows.

II). Some easy are tough: Here, there is no relation between Tough and Easy. So, the definite conclusion does not follow.

38. Questions

Answer: A

@RankZen Banker

I). All class are offline is a possibility: Here, there is no direct relation between Class and Offline. The possible condition doesn't follow because all parts of online only inside the class. So, the conclusion does not follow.

II). No Record is online: Here, there is no direct relation between record and online. All parts of Online only in Class. So, there is no connection to any record. Hence, the conclusion follows.

39. Questions

Answer: E

I). All Private are Government is a possibility: Here, there is negative relation between Government and Private through Licensed. So, the possible condition doesn't follow. Hence, the conclusion doesn't follow.

II). Some hospital are not Private: Here, there is a negative relation between Private and hospital through licensed. So, the conclusion follows.

40. Questions

Answer: E

@RankZen Banker

I). No fly is bird: Here, there is direction between Birds and fly. All parts of birds are associated with Fly. So, there is no negative relation between them. Hence, the conclusion doesn't follow.

II). All high are birds is a possibility: Here, there is direct relation between birds and High. There are some parts of high are not birds. So, the possible condition of all high are birds is false. Hence, the conclusion doesn't follow.
