

1. Questions

Study the following information carefully and answer the given questions.

Eight persons - P, Q, R, S, T, U, V, and W were born on two different dates, either the 11th or 26th of four different months, viz., March, April, May, and June of the same year. Only one person was born on each date, and only two persons were born in each month.

(Note: Zero is not an even number)

Only three persons were born between W and T, who was born on the 11th of a month having an odd number of days. V and W were born in the same month. U was born immediately before P but not in the same month. The number of persons who were born after P is **one less than** the number of persons who were born before Q. An even number of persons were born between Q and R. R was not born in April.

How many persons were born between W and P as per the final arrangement?

- a. One
- b. Two
- c. Three
- d. Four
- e. More than four

2. Questions

@RankZen Banker

P was born in which of the following months and dates?

- a. June 11
- b. April 26
- c. April 11
- d. March 11
- e. March 26

3. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. V was born immediately before R
- b. U was born on March 26
- c. Only one person was born between W and R
- d. P was born after S
- e. More than one option is correct

4. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. V
- b. P
- c. S
- d. U
- e. R

5. Questions

The number of persons who were born between W and T is the same as between ____ and ____?

- a. P and R
- b. V and P
- c. S and R
- d. S and T
- e. Q and S

6. Questions

@RankZen Banker

Study the following information carefully and answer the given questions.

Eight persons—K, L, M, N, O, P, Q, and R—join three different companies: Google, Microsoft, and Apple. At least two persons, but not more than three persons, join the same company.

K and P join different companies, but neither of them joins Microsoft. Q does not join the same company as K. L joins the same company as Q. N joins neither with Q nor with K. M joins neither Google nor Apple. The number of persons who join Google is **equal** to the number of persons who join Apple. R neither joins the same company as M nor joins Apple.

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. K and O join the same company
- b. M joins Apple
- c. Only two people join Apple
- d. Three people join Google
- e. More than one option is true

7. Questions

Who among the following persons joins with Q as per the final arrangement?

- a. K

- b. R
- c. The one who works with N
- d. The one who works with L
- e. All of the above

8. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. P
- b. M
- c. Q
- d. L
- e. The one who works with L

9. Questions

Who among the following persons joins Microsoft as per the final arrangement?

- a. P
- b. Q
- c. The one who works with M
- d. L
- e. The one who works with O

@RankZen Banker

10. Questions

Who among the following persons joins with N as per the final arrangement?

I). R

II). O

III). P

IV). M

- a. Only IV
- b. Only II and III
- c. Only I and II
- d. Only II
- e. Only III

11. Questions

Study the following information carefully and answer the given questions.

An uncertain number of persons are sitting around a circular table facing towards the centre. The distance between any two adjacent persons is the same. Not less than 12 people sit around the table.

G sits second to the left of E. Only six people sit between G and C when counted from the left of G. Only four people sit between B and F, who sits third to the right of C. D sits seventh to the left of F but doesn't sit adjacent to E. Only two persons sit between D and E, when counted from the right of E. An equal number of persons sit between A and D when counted from both sides. B does not sit sixth to the left of A.

How many persons are sitting at the table as per the final arrangement?

- a. Ten
- b. Twelve
- c. Fifteen
- d. Twenty
- e. Sixteen

12. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

@RankZen Banker

- a. C sits to the immediate left of G
- b. More than one option is correct
- c. D sits second to the left of E
- d. B faces towards C
- e. A sits to the immediate right of F

13. Questions

What is the position of G with respect to D as per the final arrangement?

- a. Third to the right
- b. Third to the left
- c. Immediate right
- d. Immediate left
- e. Fifth to the left

14. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. A-C
- b. B-D
- c. D-G
- d. F-A
- e. F-B

15. Questions

If all the persons are made to sit in alphabetical order in anticlockwise direction only in the known positions that were already occupied, starting from A, then how many persons remain unchanged in their position, excluding A?

- a. None
- b. Three
- c. One
- d. More than three
- e. Two

16. Questions

Study the following information carefully and answer the given questions.

@RankZen Banker

Seven persons - M, N, O, P, Q, R, and S are sitting in a linear row in such a way that some of them are facing north while some of them are facing south. Not more than two adjacent persons face the same direction.

M sits fifth to the right of S, who has only one neighbour. Only two persons sit between M and R.

Immediate neighbors of R face the same direction but opposite to S. As many persons sit to the left of R as to the right of N, who face the same direction as S. P does not sit adjacent to R. O sits third to the left of P. Q does not face the north direction.

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. N
- b. P
- c. O
- d. S
- e. R

17. Questions

If N and P interchange their positions, then S and R do the same, with respect to the new positions. Who among the following persons sits third to the right of O?

- a. N
- b. M
- c. P
- d. S
- e. R

18. Questions

Who among the following persons sits to the left of O as per the final arrangement?

- a. The one who sits fourth to the left of P
- b. The one who sits to the immediate right of N
- c. N
- d. Q
- e. both b) and c)

19. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. M sits second to the right of O
- b. P sits at one of the ends of the row
- c. No one sits between Q and O
- d. R sits third to the left of S
- e. All the statements are true

@RankZen Banker

20. Questions

Fill in the blanks

SQ, QO, ____

- a. OP
- b. QR
- c. NM
- d. PO
- e. SP

21. Questions

Study the following information carefully and answer the given questions.

Seven persons—A, B, C, D, E, F, and G—have different heights.

Only two persons have heights between C and B. B is just taller than E. A is taller than D but shorter than F. D is taller than B. Only one person is taller than F. The height of E is 162cm. The tallest person is 185cm.

If the height of C is 13 cm less than that of G, then what may be the height of A?

- a. 180 cm
- b. 170 cm
- c. 175 cm
- d. 182 cm
- e. None of these

22. Questions

If the sum of the heights of both B and E is 326 cm and the difference between the heights of both D and G is 20 cm, then what is the total height of both B and D?

- a. 300 cm
- b. 350 cm
- c. 250 cm
- d. 329 cm
- e. None of these

@RankZen Banker

23. Questions

Study the following information carefully and answer the given questions.

In a study group of six students—A, B, C, D, E, and F—each student has a different number of pens.

E has more pens than only three students. B has more pens than A but less pens than D. F has more pens than C, who has a prime number of pens. B has exactly 18 pens. D has less pens than E. C has more pens than E. B has 15 pens less than F.

If the difference in the number of pens between F and E is 3, then which of the following can be the number of pens with C?

- a. 34
- b. 32
- c. 29
- d. 31
- e. 35

24. Questions

If the average of the number of pens F and D is 27, and the ratio of the number of pens of D and A is 3:2, respectively, then what is the sum of the number of pens that A and D have?

- a. 30
- b. 32
- c. 35
- d. 42
- e. 43

25. Questions

If E has 9 pens more than B and the ratio of the number of E and D is 9:8 respectively, then what is the difference between the number of pens that D and B have?

- a. 1
- b. 2
- c. 3
- d. 6
- e. 5

26. Questions

@RankZen Banker

Study the following information carefully and answer the given questions.

Point Q is 15m north of Point P, which is 10m east of Point W. Point S is 10m north of Point R, which is 20m west of Point Q. Point U is 25m south of Point T, which is 14m east of Point S.

If point X is 10m north of point Q, then the distance between points P and X is equal to which of the following points?

- a. ST
- b. QP
- c. TU
- d. WP
- e. RT

27. Questions

The shortest distance between the points R and P is 11m more than the distance between ___ and ___?

- a. ST
- b. WQ

- c. PW
- d. PQ
- e. None of these

28. Questions

Study the following information carefully and answer the given questions.

Deepak started walking from Point P in the north direction for 12m and reached Point Q. From Point Q, he turned right and walked for 15m to reach Point R. From Point R, he turned left and walked for 6m and reached Point S. From Point S, he turned right and walked for 4m to reach Point T.

What is the direction of T with respect to P?

- a. South-west
- b. South
- c. East
- d. North-east
- e. None of these

29. Questions

If point Z is 6 m north of point Q, then what is the distance between points Z and T?

- a. 19 m
- b. 14 m
- c. 15 m
- d. 20 m
- e. 25 m

30. Questions

What is the total distance covered if a person walks from point P to point T ?

- a. 32 m
- b. 24 m
- c. 37 m
- d. 15 m
- e. 20 m

31. Questions

Study the following statements and then decide which of the given conclusions logically follow from

the given statements, disregarding the commonly known fact.

Statements:

Some Waters are Soils

Few Soils are Trees

All Trees are Mountains

Conclusions:

I). Some Trees are Waters

II). At least some Mountains are Soils

- a. Only conclusion I follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

32. Questions

Statements:

Only a few Pens are Pencils

No Pencil is Marker

Only a few Erasers are Markers

Conclusions:

I). All Pens are Erasers

II). Some Erasers are not Pencils

- a. Only conclusion I follows
- b. Both conclusions I and II follow
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

33. Questions

Statements:

Some HP are Asus

All Asus are Apple

@RankZen Banker

No Apple is Dell

Conclusions:

I). No Dell is being HP is a possibility

II). Some Asus are not Dell

- a. Only conclusion I follows
- b. Either conclusion I or II follows
- c. Both conclusions I and II follow
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

34. Questions

Statements:

All One is Two.

All Two is Three.

Some Three is not Four.

Conclusions:

I). Some Two is not Four.

II). Some Three is One.

- a. Only conclusion II follows
- b. Both conclusions I and II follow
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Only conclusion I follows

35. Questions

Statements:

Only a few Red are Blue.

All Blue are Green.

No Grey is Green.

Conclusions:

I). Some Red is not Grey

II). No Blue is Grey

@RankZen Banker

- a. Only conclusion I follows
- b. Neither conclusion I nor II follows
- c. Either conclusion I or II follows
- d. Both conclusions I and II follow
- e. Only conclusion II follows

36. Questions

Study the following information carefully and answer the given questions

Z 7 5 P W 3 K C 1 Y I 9 N X G J 2 O U 8 S H 4 Q V 6 T M F

How many numbers are there which are immediately preceded by a letter and immediately followed by a letter?

- a. Two
- b. Four
- c. Five
- d. Seven
- e. Ten

@RankZen Banker

37. Questions

What is the sum of the 4th number from the left end and 5th number from the right end?

- a. 10
- b. 15
- c. 20
- d. 25
- e. 30

38. Questions

If all the numbers are removed, then which element will be tenth from the left end as per the given alphanumeric series?

- a. C
- b. K
- c. G
- d. S
- e. H

39. Questions

How many such letters are there in the above arrangement, each of which is immediately preceded by a consonant and immediately followed by a prime number?

- a. One
- b. Two
- c. Three
- d. Four
- e. More than four

40. Questions

Which of the following elements is sixth to the left of the fourth element from the right end of the given series?

- a. C
- b. 3
- c. K
- d. W
- e. 8

@RankZen Banker

Explanations:

1. Questions

Final Arrangement:

Months	Dates	Persons
March	11	W
	26	V
April	11	Q
	26	S
May	11	T
	26	U
June	11	P
	26	R

We have,

- Only three persons were born between W and T, who was born on the 11th of a month having an odd number of days.
- V and W were born in the same month.
- U was born immediately before P but not in the same month.

@RankZen Banker

From the above conditions, we have two possibilities:

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	
	26		
May	11	W	T
	26	V	U
June	11		P
	26		

Again, we have,

- The number of persons who were born after P is **one less than** the number of persons who were born before Q.
- An even number of persons were born between Q and R.
- R was not born in April.

From the above conditions, Case-1 gets eliminated because R was not born in April, which is not satisfied.

Hence, Case-2 shows the final arrangement.

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	Q
	26	R	S
May	11	W	T
	26	V	U
June	11	Q	P
	26	S	R

Answer: E

2. Questions

@RankZen Banker

Final Arrangement:

Months	Dates	Persons
March	11	W
	26	V
April	11	Q
	26	S
May	11	T
	26	U
June	11	P
	26	R

We have,

- Only three persons were born between W and T, who was born on the 11th of a month having an odd number of days.
- V and W were born in the same month.
- U was born immediately before P but not in the same month.

From the above conditions, we have two possibilities:

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	
	26		
May	11	W	T
	26	V	U
June	11		P
	26		

@RankZen Banker

Again, we have,

- The number of persons who were born after P is **one less than** the number of persons who were born before Q.
- An even number of persons were born between Q and R.
- R was not born in April.

From the above conditions, Case-1 gets eliminated because R was not born in April, which is not satisfied.

Hence, Case-2 shows the final arrangement.

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	Q
	26	R	S
May	11	W	T
	26	V	U
June	11	Q	P
	26	S	R

Answer: A

3. Questions

@RankZen Banker

Final Arrangement:

Months	Dates	Persons
March	11	W
	26	V
April	11	Q
	26	S
May	11	T
	26	U
June	11	P
	26	R

We have,

- Only three persons were born between W and T, who was born on the 11th of a month having an odd number of days.
- V and W were born in the same month.
- U was born immediately before P but not in the same month.

From the above conditions, we have two possibilities:

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	
	26		
May	11	W	T
	26	V	U
June	11		P
	26		

@RankZen Banker

Again, we have,

- The number of persons who were born after P is **one less than** the number of persons who were born before Q.
- An even number of persons were born between Q and R.
- R was not born in April.

From the above conditions, Case-1 gets eliminated because R was not born in April, which is not satisfied.

Hence, Case-2 shows the final arrangement.

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	Q
	26	R	S
May	11	W	T
	26	V	U
June	11	Q	P
	26	S	R

Answer: D

4. Questions

@RankZen Banker

Final Arrangement:

Months	Dates	Persons
March	11	W
	26	V
April	11	Q
	26	S
May	11	T
	26	U
June	11	P
	26	R

We have,

- Only three persons were born between W and T, who was born on the 11th of a month having an odd number of days.
- V and W were born in the same month.
- U was born immediately before P but not in the same month.

From the above conditions, we have two possibilities:

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	
	26		
May	11	W	T
	26	V	U
June	11		P
	26		

@RankZen Banker

Again, we have,

- The number of persons who were born after P is **one less than** the number of persons who were born before Q.
- An even number of persons were born between Q and R.
- R was not born in April.

From the above conditions, Case-1 gets eliminated because R was not born in April, which is not satisfied.

Hence, Case-2 shows the final arrangement.

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	Q
	26	R	S
May	11	W	T
	26	V	U
June	11	Q	P
	26	S	R

Answer: B (In all the other options, all the persons were born on an even-numbered date except option B)

5. Questions

@RankZen Banker

Final Arrangement:

Months	Dates	Persons
March	11	W
	26	V
April	11	Q
	26	S
May	11	T
	26	U
June	11	P
	26	R

We have,

- Only three persons were born between W and T, who was born on the 11th of a month having an odd number of days.
- V and W were born in the same month.
- U was born immediately before P but not in the same month.

From the above conditions, we have two possibilities:

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	
	26		
May	11	W	T
	26	V	U
June	11		P
	26		

@RankZen Banker

Again, we have,

- The number of persons who were born after P is **one less than** the number of persons who were born before Q.
- An even number of persons were born between Q and R.
- R was not born in April.

From the above conditions, Case-1 gets eliminated because R was not born in April, which is not satisfied.

Hence, Case-2 shows the final arrangement.

		Case-1	Case-2
Months	Dates	Persons	Persons
March	11	T	W
	26	U	V
April	11	P	Q
	26	R	S
May	11	W	T
	26	V	U
June	11	Q	P
	26	S	R

Answer: C

6. Questions

@RankZen Banker

Final Arrangement:

Google	Microsoft	Apple
K	N	P
O	M	Q
R		L

We have,

- K and P join different companies, but neither of them joins Microsoft.
- Q does not join the same company as K.
- L joins the same company as Q.

From the above conditions, we have two possibilities:

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	Q/	P	P	Q/	K
	L/	Q/	Q/	L/	
		L/	L/		

Again, we have,

- N joins neither with Q nor with
- M joins neither Google nor Apple.
- The number of persons who join Google is **equal** to the number of persons who join Apple.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

@RankZen Banker

Again, we have,

- R neither joins the same company as M nor joins Apple.

From the above conditions, Case-2 gets eliminated because R neither joins the same company as M nor joins Apple, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

Answer: E

7. Questions

Final Arrangement:

Google	Microsoft	Apple
K	N	P
O	M	Q
R		L

We have,

- K and P join different companies, but neither of them joins Microsoft.
- Q does not join the same company as K.
- L joins the same company as Q.

From the above conditions, we have two possibilities:

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	Q/	P	P	Q/	K
	L/	Q/	Q/	L/	
		L/	L/		

@RankZen Banker

Again, we have,

- N joins neither with Q nor with
- M joins neither Google nor Apple.
- The number of persons who join Google is **equal** to the number of persons who join Apple.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

Again, we have,

- R neither joins the same company as M nor joins Apple.

From the above conditions, Case-2 gets eliminated because R neither joins the same company as M nor joins Apple, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

Answer: D

8. Questions

Final Arrangement:

Google	Microsoft	Apple
K	N	P
O	M	Q
R		L

@RankZen Banker

We have,

- K and P join different companies, but neither of them joins Microsoft.
- Q does not join the same company as K.
- L joins the same company as Q.

From the above conditions, we have two possibilities:

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	Q/	P	P	Q/	K
	L/	Q/	Q/	L/	
		L/	L/		

Again, we have,

- N joins neither with Q nor with
- M joins neither Google nor Apple.
- The number of persons who join Google is **equal** to the number of persons who join Apple.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

Again, we have,

- R neither joins the same company as M nor joins Apple.

From the above conditions, Case-2 gets eliminated because R neither joins the same company as M nor joins Apple, which is not satisfied.

Hence, Case-1 shows the final arrangement.

@RankZen Banker

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

Answer: B (In all the other options, people work in the same company except option B)

9. Questions

Final Arrangement:

Google	Microsoft	Apple
K	N	P
O	M	Q
R		L

We have,

- K and P join different companies, but neither of them joins Microsoft.
- Q does not join the same company as K.
- L joins the same company as Q.

From the above conditions, we have two possibilities:

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	Q/	P	P	Q/	K
	L/	Q/	Q/	L/	
		L/	L/		

Again, we have,

- N joins neither with Q nor with
- M joins neither Google nor Apple.
- The number of persons who join Google is **equal** to the number of persons who join Apple.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

@RankZen Banker

Again, we have,

- R neither joins the same company as M nor joins Apple.

From the above conditions, Case-2 gets eliminated because R neither joins the same company as M nor joins Apple, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

Answer: C

10. Questions

Final Arrangement:

Google	Microsoft	Apple
K	N	P
O	M	Q
R		L

@RankZen Banker

We have,

- K and P join different companies, but neither of them joins Microsoft.
- Q does not join the same company as K.
- L joins the same company as Q.

From the above conditions, we have two possibilities:

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	Q/	P	P	Q/	K
	L/	Q/	Q/	L/	
		L/	L/		

Again, we have,

- N joins neither with Q nor with
- M joins neither Google nor Apple.
- The number of persons who join Google is **equal** to the number of persons who join Apple.

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

Again, we have,

- R neither joins the same company as M nor joins Apple.

From the above conditions, Case-2 gets eliminated because R neither joins the same company as M nor joins Apple, which is not satisfied.

Hence, Case-1 shows the final arrangement.

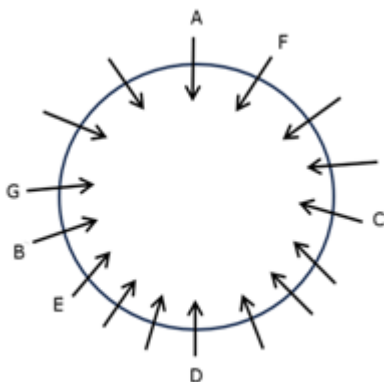

Case-1			Case-2		
Google	Microsoft	Apple	Google	Microsoft	Apple
K	N	P	P	N	K
O	M	Q	Q	M	O
R		L	L		R

@RankZen Banker

Answer: A

11. Questions

Final Arrangement:

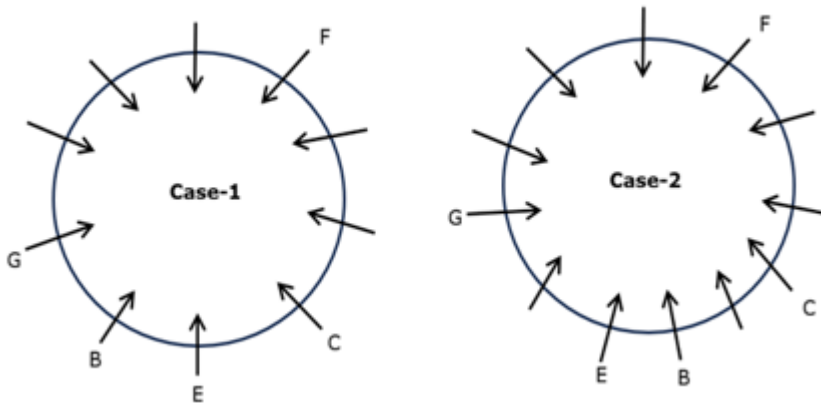

We have,

- G sits second to the left of E.
- Only six people sit between G and C when counted from the left of G.

- Four people sit between B and F when counted from right of B.
- F sits third to the right of C.

From the above conditions, we have two possibilities:

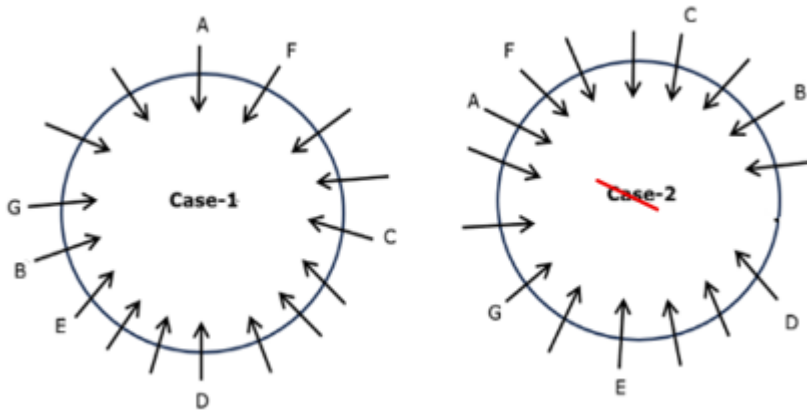

Again, we have,

- D sits seventh to the left of F but doesn't sit adjacent to E.
- Only two persons sit between D and E, when counted from the right of E.
- An equal number of persons sit between A and D when counted from both sides.
- B does not sit sixth to the left of A.

From the above conditions, Case-2 gets eliminated because B does not sit sixth to the left of A, which is not satisfied.

@RankZen Banker

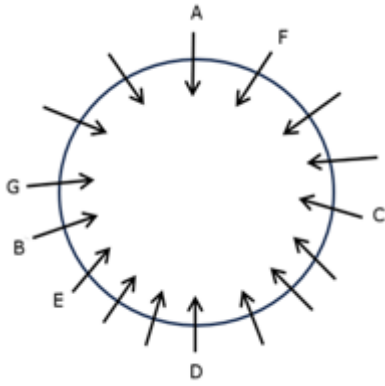

Hence, Case-1 shows the final arrangement.

Answer: E

12. Questions

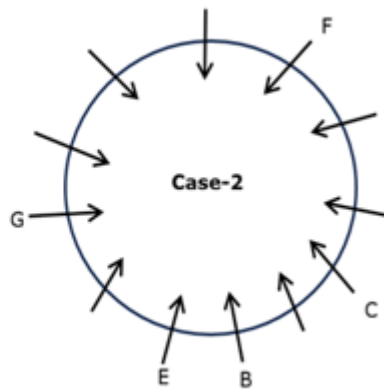

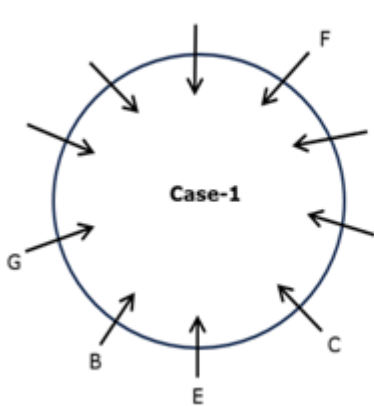

Final Arrangement:

We have,

- G sits second to the left of E.
- Only six people sit between G and C when counted from the left of G.
- Four people sit between B and F when counted from right of B.
- F sits third to the right of C.

From the above conditions, we have two possibilities:

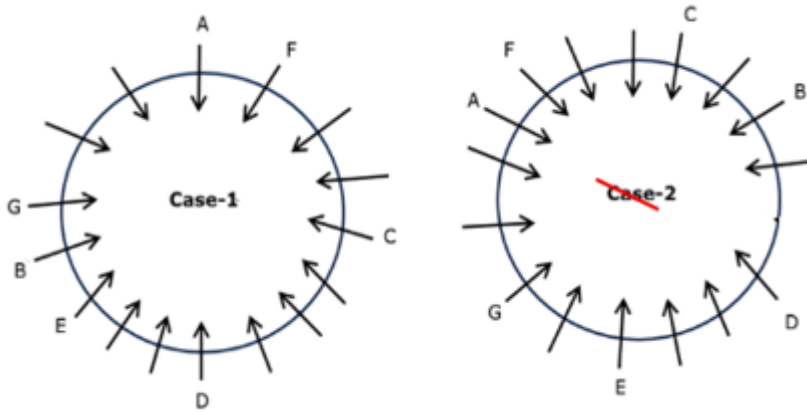

@RankZen Banker

Again, we have,

- D sits seventh to the left of F but doesn't sit adjacent to E.
- Only two persons sit between D and E, when counted from the right of E.
- An equal number of persons sit between A and D when counted from both sides.
- B does not sit sixth to the left of A.

From the above conditions, Case-2 gets eliminated because B does not sit sixth to the left of A, which is not satisfied.

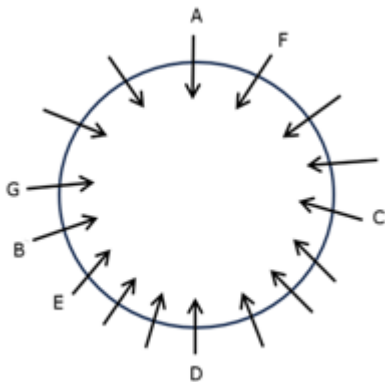

Hence, Case-1 shows the final arrangement.

Answer: B

13. Questions

Final Arrangement:

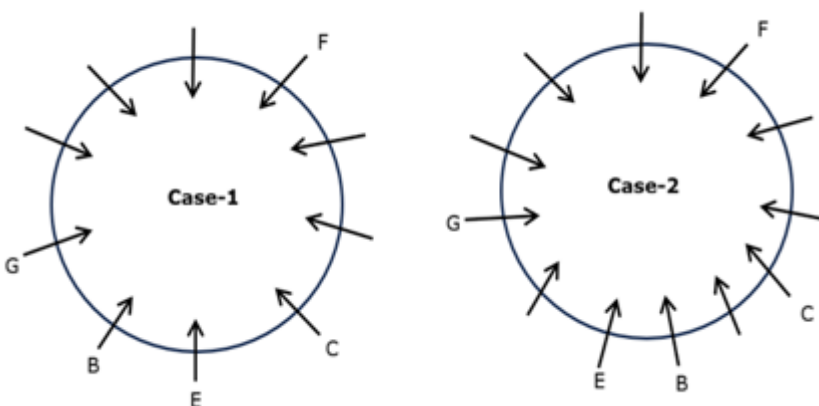

@RankZen Banker

We have,

- G sits second to the left of E.
- Only six people sit between G and C when counted from the left of G.
- Four people sit between B and F when counted from right of B.
- F sits third to the right of C.

From the above conditions, we have two possibilities:

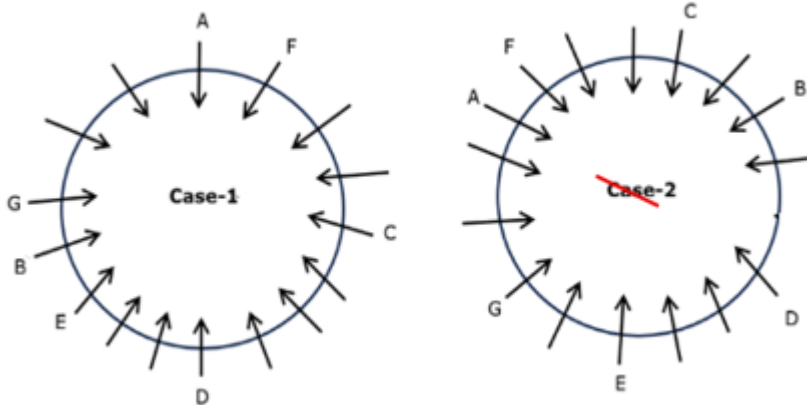

Again, we have,

- D sits seventh to the left of F but doesn't sit adjacent to E.

- Only two persons sit between D and E, when counted from the right of E.
- An equal number of persons sit between A and D when counted from both sides.
- B does not sit sixth to the left of A.

From the above conditions, Case-2 gets eliminated because B does not sit sixth to the left of A, which is not satisfied.

Hence, Case-1 shows the final arrangement.

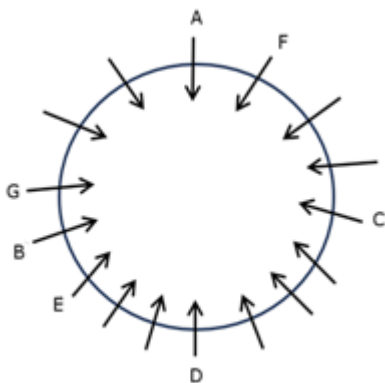

Answer: E

14. Questions

Final Arrangement:

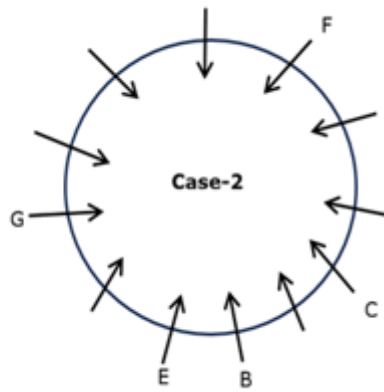

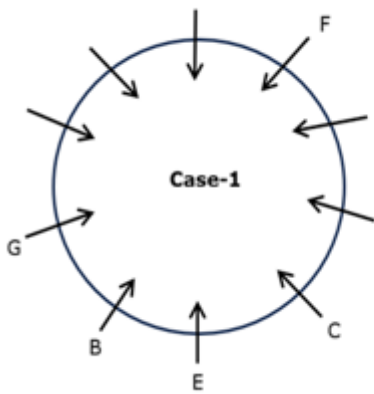

@RankZen Banker

We have,

- G sits second to the left of E.
- Only six people sit between G and C when counted from the left of G.
- Four people sit between B and F when counted from right of B.
- F sits third to the right of C.

From the above conditions, we have two possibilities:

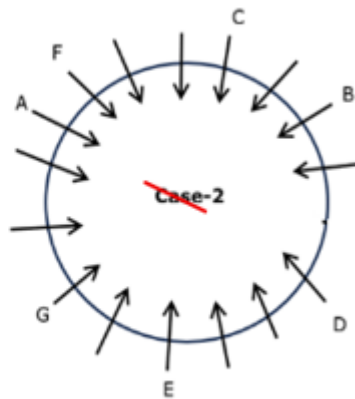

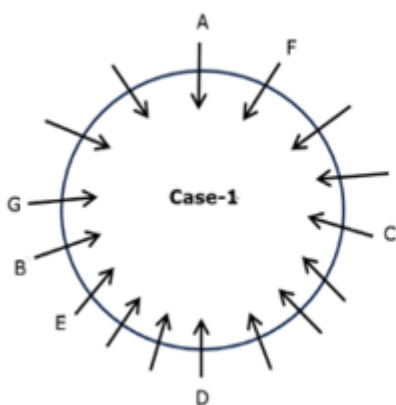

Again, we have,

- D sits seventh to the left of F but doesn't sit adjacent to E.
- Only two persons sit between D and E, when counted from the right of E.
- An equal number of persons sit between A and D when counted from both sides.
- B does not sit sixth to the left of A.

From the above conditions, Case-2 gets eliminated because B does not sit sixth to the left of A, which is not satisfied.

Hence, Case-1 shows the final arrangement.

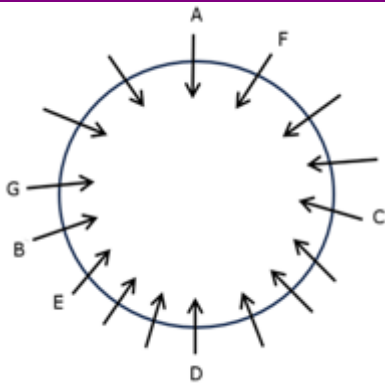

@RankZen Banker

Answer: D (In all the other options, the first person does not sit adjacent to the second person, except in option D)

15. Questions

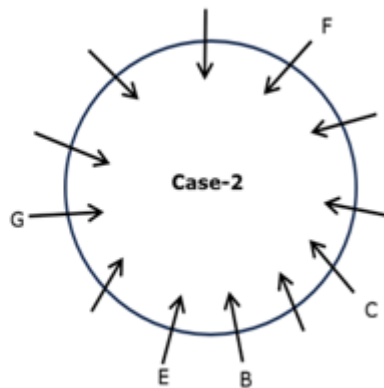

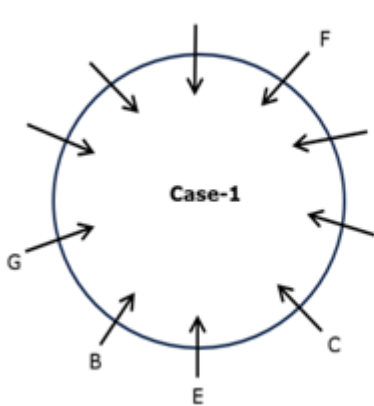

Final Arrangement:

We have,

- G sits second to the left of E.
- Only six people sit between G and C when counted from the left of G.
- Four people sit between B and F when counted from right of B.
- F sits third to the right of C.

From the above conditions, we have two possibilities:

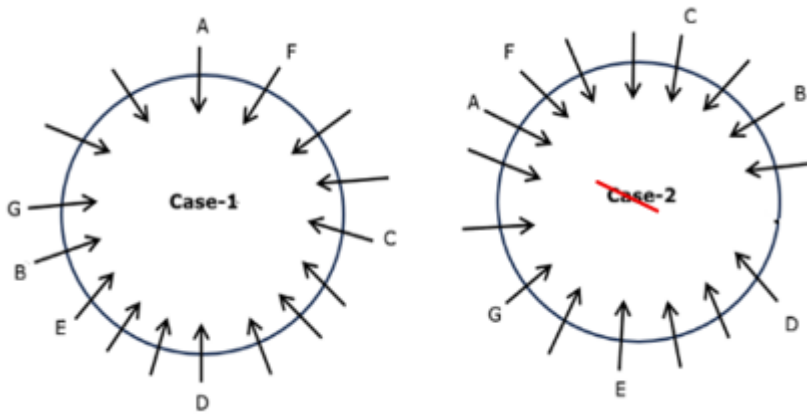

@RankZen Banker

Again, we have,

- D sits seventh to the left of F but doesn't sit adjacent to E.
- Only two persons sit between D and E, when counted from the right of E.
- An equal number of persons sit between A and D when counted from both sides.
- B does not sit sixth to the left of A.

From the above conditions, Case-2 gets eliminated because B does not sit sixth to the left of A, which is not satisfied.

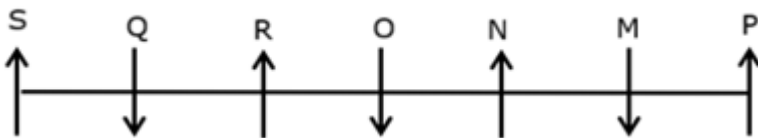

Hence, Case-1 shows the final arrangement.

Answer: A

16. Questions

Final Arrangement:

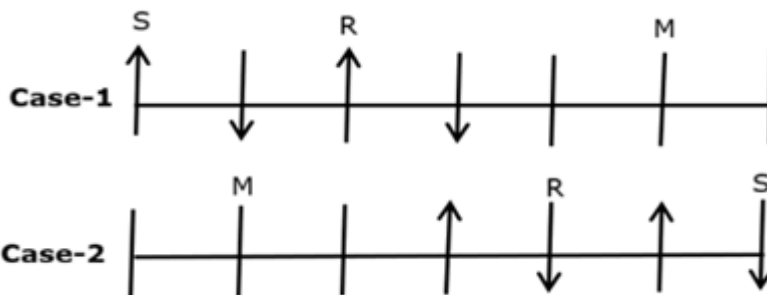

We have,

- M sits fifth to the right of S, who has only one neighbour.
- Only two persons sit between M and R.
- Immediate neighbors of R face the same direction but opposite to S.

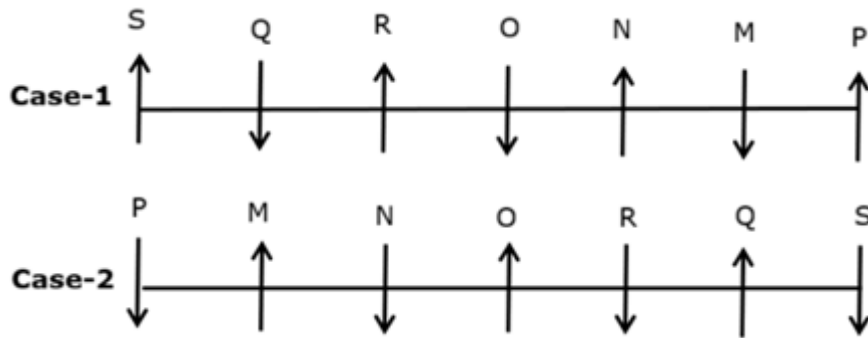

@RankZen Banker

From the above conditions, we have two possibilities:

Again, we have,

- As many persons sit to the left of R as to the right of N, who face the same direction as S.
- P does not sit adjacent to R.
- O sits third to the left of P.

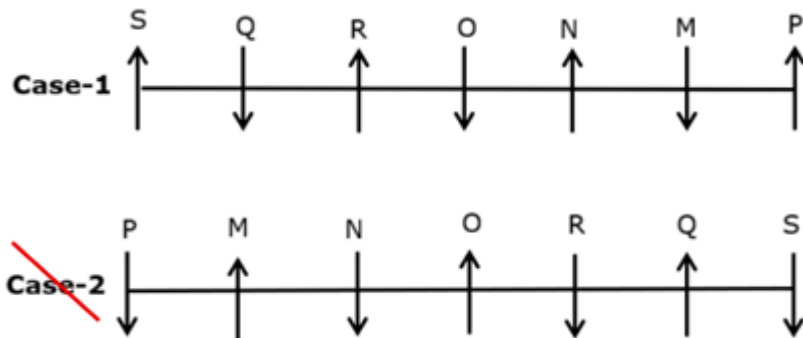

Again, we have,

- Q does not face the north direction.

From the above condition, Case-2 gets eliminated because Q does not face the north direction, which is not satisfied.

Hence, case-1 shows the final arrangement.

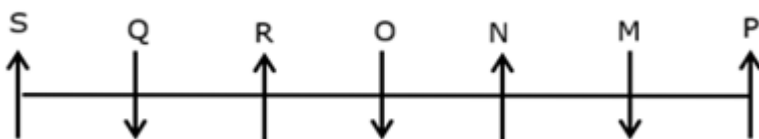

@RankZen Banker

Answer: C (In all the other options, people are facing the north direction except option C)

17. Questions

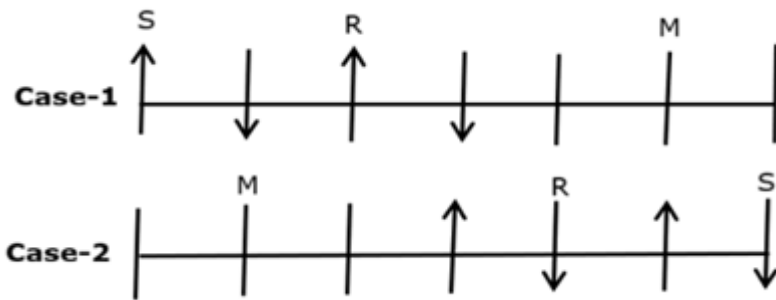

Final Arrangement:

We have,

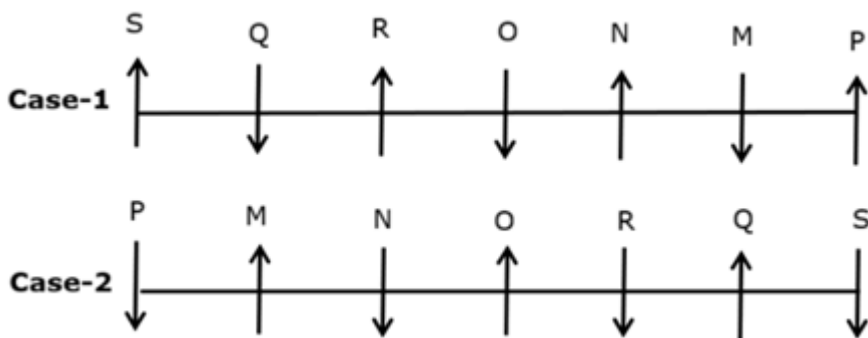

- M sits fifth to the right of S, who has only one neighbour.
- Only two persons sit between M and R.
- Immediate neighbors of R face the same direction but opposite to S.

From the above conditions, we have two possibilities:

Again, we have,

- As many persons sit to the left of R as to the right of N, who face the same direction as S.
- P does not sit adjacent to R.
- O sits third to the left of P.

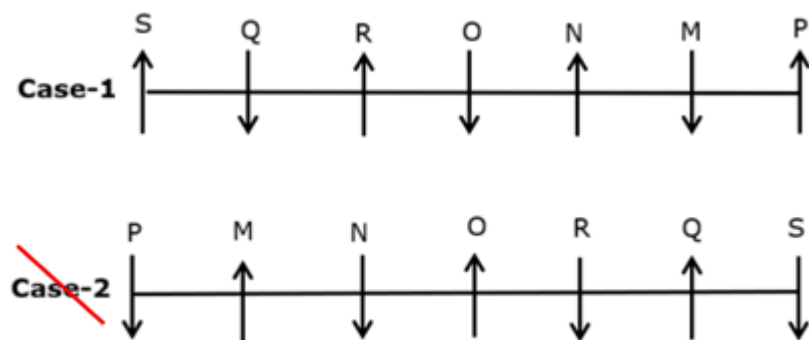

Again, we have,

@RankZen Banker

- Q does not face the north direction.

From the above condition, Case-2 gets eliminated because Q does not face the north direction, which is not satisfied.

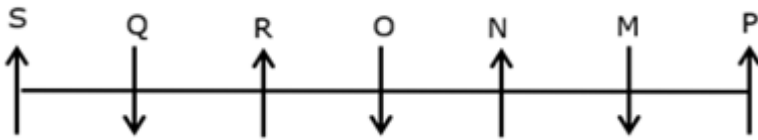

Hence, case-1 shows the final arrangement.

Answer: E

18. Questions

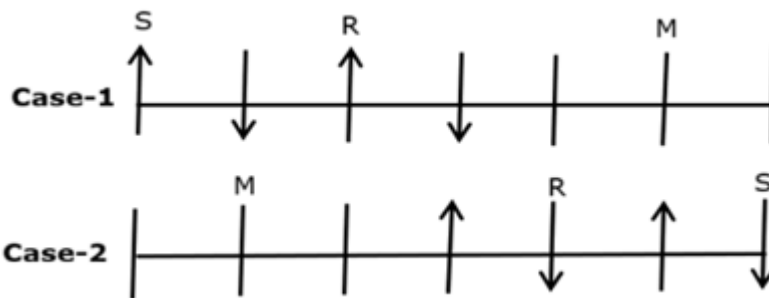

Final Arrangement:

We have,

- M sits fifth to the right of S, who has only one neighbour.
- Only two persons sit between M and R.
- Immediate neighbors of R face the same direction but opposite to S.

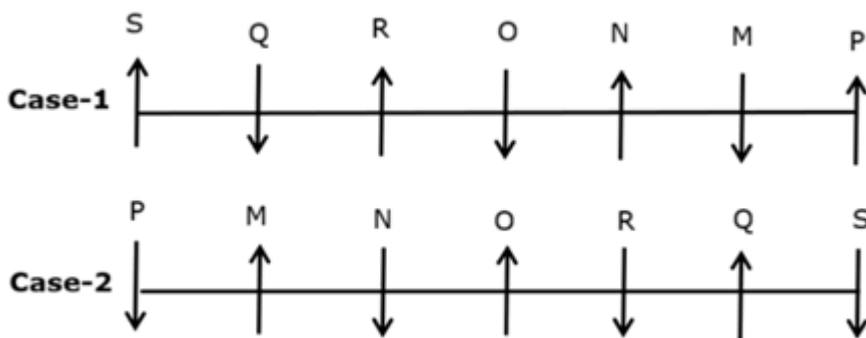

From the above conditions, we have two possibilities:

Again, we have,

- As many persons sit to the left of R as to the right of N, who face the same direction as S.
- P does not sit adjacent to R.
- O sits third to the left of P.

@RankZen Banker

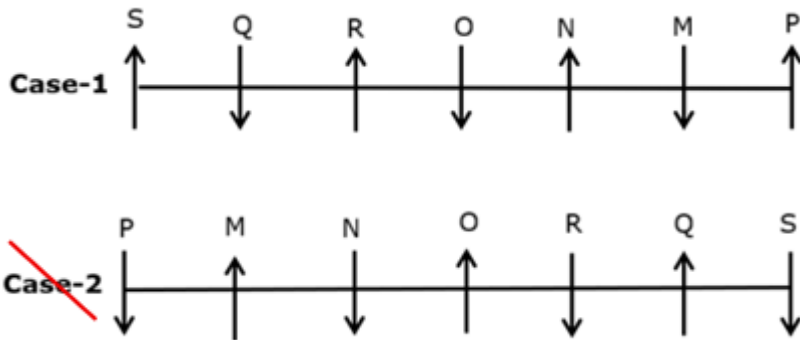

Again, we have,

- Q does not face the north direction.

From the above condition, Case-2 gets eliminated because Q does not face the north direction, which is not satisfied.

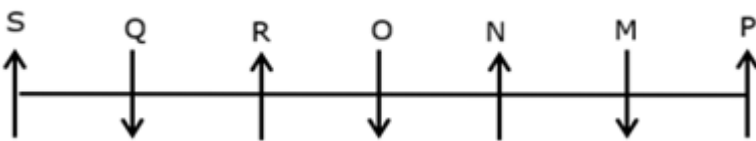

Hence, case-1 shows the final arrangement.

Answer: E

19. Questions

Final Arrangement:

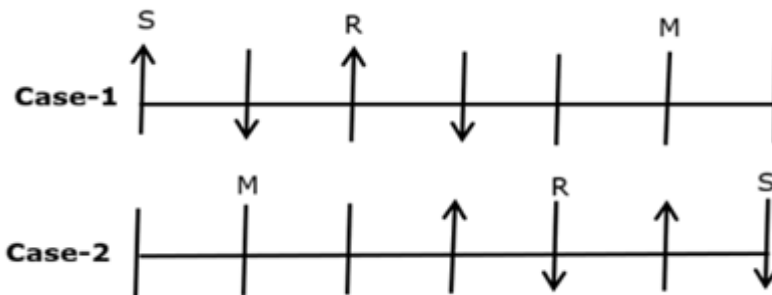

We have,

- M sits fifth to the right of S, who has only one neighbour.
- Only two persons sit between M and R.
- Immediate neighbors of R face the same direction but opposite to S.

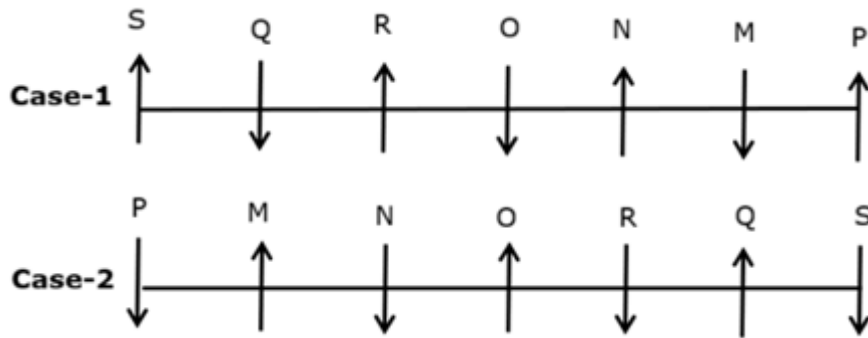

@RankZen Banker

From the above conditions, we have two possibilities:

Again, we have,

- As many persons sit to the left of R as to the right of N, who face the same direction as S.
- P does not sit adjacent to R.
- O sits third to the left of P.

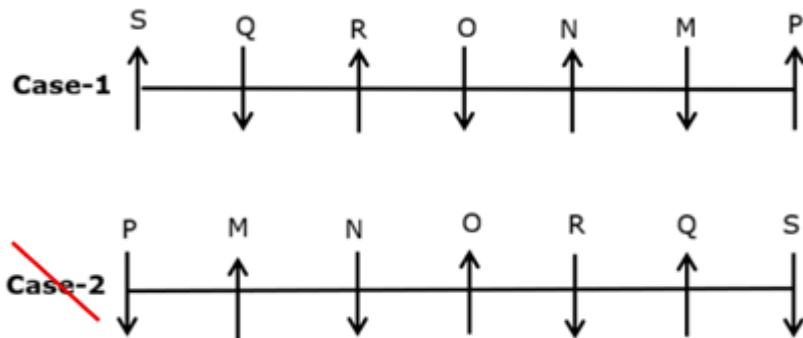

Again, we have,

- Q does not face the north direction.

From the above condition, Case-2 gets eliminated because Q does not face the north direction, which is not satisfied.

Hence, case-1 shows the final arrangement.

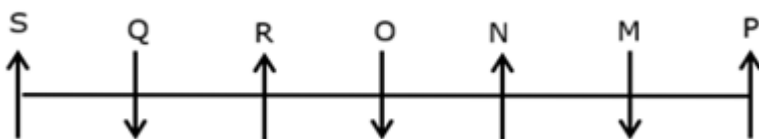

@RankZen Banker

Answer: B

20. Questions

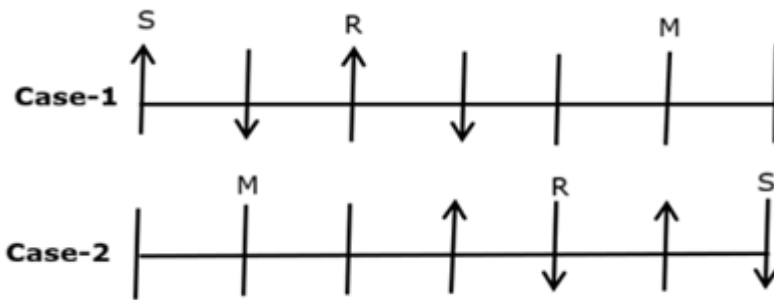

Final Arrangement:

We have,

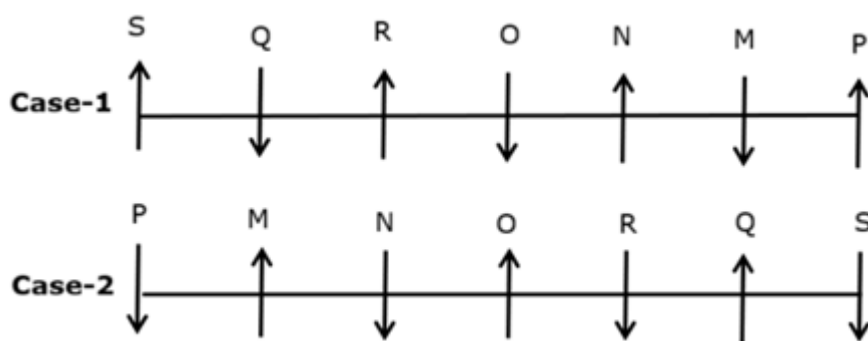

- M sits fifth to the right of S, who has only one neighbour.
- Only two persons sit between M and R.
- Immediate neighbors of R face the same direction but opposite to S.

From the above conditions, we have two possibilities:

Again, we have,

- As many persons sit to the left of R as to the right of N, who face the same direction as S.
- P does not sit adjacent to R.
- O sits third to the left of P.

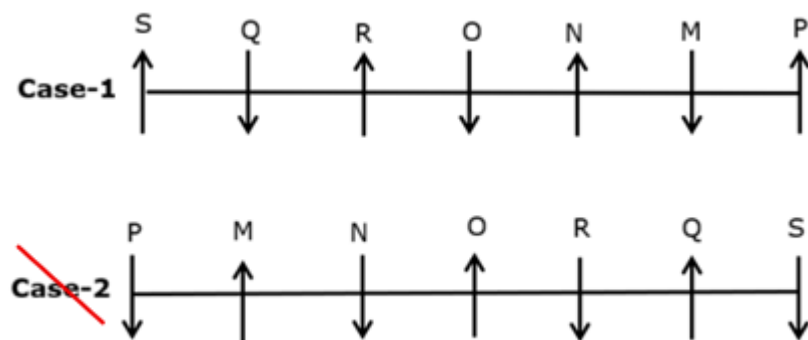

Again, we have,

- Q does not face the north direction.

@RankZen Banker

From the above condition, Case-2 gets eliminated because Q does not face the north direction, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A (The sequence follows the pattern in which no person sits between S and Q, one person sits between Q and O, and two persons sit between O and P.)

21. Questions

Final Arrangement:

G (185 cm) > F > C > A > D > B > E (162 cm)

We have,

- Only two persons have heights between C and B.
- B is just taller than E.

Case-1 $C > ___ > ___ > B > E$

Case-2 $B > E > ___ > C$

- A is taller than D but shorter than F.

$F > A > D$

- D is taller than B. ($D > B$)
- Only one person is taller than F.

From the above conditions, Case-2 gets eliminated because only one person is taller than F, which is not satisfied.

Hence, case-1 shows the final arrangement.

Case-1 $G > F > C > A > D > B > E$

~~Case-2 $F > A > D > B > E > G > C$~~

Answer: B

$G - 13 \text{ cm} = C$

$185 \text{ cm} - 13 \text{ cm} = 172 \text{ cm}$

$C = 172 \text{ cm}$

Since A is shorter than C but taller than D, A may be **170 cm**.

22. Questions

Final Arrangement:

$G (185 \text{ cm}) > F > C > A > D > B > E (162 \text{ cm})$

We have,

- Only two persons have heights between C and B.
- B is just taller than E.

Case-1 $C > ___ > ___ > B > E$

Case-2 $B > E > ___ > C$

- A is taller than D but shorter than F.

$F > A > D$

- D is taller than B. ($D > B$)
- Only one person is taller than F.

@RankZen Banker

From the above conditions, Case-2 gets eliminated because only one person is taller than F, which is not satisfied.

Hence, case-1 shows the final arrangement.

Case-1 $G > F > C > A > D > B > E$

~~Case-2 $F > A > D > B > E > G > C$~~

Answer: D

$$B + 162 \text{ cm} = 326 \text{ cm}$$

$$B = 326 \text{ cm} - 162 \text{ cm}$$

$$B = 164 \text{ cm}$$

$$185 \text{ cm} - D = 20 \text{ cm}$$

$$185 \text{ cm} - 20 \text{ cm} = D$$

$$D = 165 \text{ cm}$$

$$B + D = 164 \text{ cm} + 165 \text{ cm} = 329 \text{ cm}$$

23. Questions

Final Arrangement:

$$F (33) > C > E > D > B (18) > A$$

We have,

- E has more pens than only three students.

$$E > ___ > ___ > ___$$

- B has more pens than A but less pens than D.

$$D > B > A$$

- F has more pens than C, who has a prime number of pens.

$$F > C$$

- B has exactly 18 pens.
- D has less pens than E.
- C has more pens than E.
- B has 15 pens less than F.

$$F (33) > C > E > D > B (18) > A$$

Answer: D

$$F - E = 3$$

$$33 - E = 3$$

@RankZen Banker

$$E = 30$$

Since C has a prime number of pens, the only possible value is 31.

24. Questions

Final Arrangement:

$$F (33) > C > E > D > B (18) > A$$

We have,

- E has more pens than only three students.

$$E > ___ > ___ > ___$$

- B has more pens than A but less pens than D.

$$D > B > A$$

- F has more pens than C, who has a prime number of pens.

$$F > C$$

- B has exactly 18 pens.
- D has less pens than E.
- C has more pens than E.
- B has 15 pens less than F.

$$F (33) > C > E > D > B (18) > A$$

Answer: C

@RankZen Banker

$$\frac{F + D}{2} = 27$$

$$F + D = 54$$

$$33 + D = 54$$

$$D = 54 - 33$$

$$D = 21$$

$$A = 14$$

$$\text{Sum} = 21 + 14 = 35$$

25. Questions

Final Arrangement:

$$F (33) > C > E > D > B (18) > A$$

We have,

- E has more pens than only three students.

$$E > ___ > ___ > ___$$

- B has more pens than A but less pens than D.

$$D > B > A$$

- F has more pens than C, who has a prime number of pens.

$$F > C$$

- B has exactly 18 pens.
- D has less pens than E.
- C has more pens than E.
- B has 15 pens less than F.

$$F (33) > C > E > D > B (18) > A$$

Answer: D

B has 18 pens. Then E has 9 more pens than B. So,

$$E = 9 + 18$$

$$E = 27 \text{ pens}$$

The ratio of the number of E and D is 9:8,

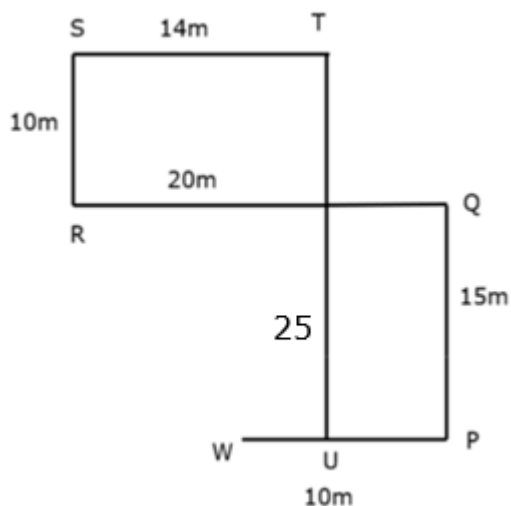

From this we get, $D = 24$ Pens

The difference between the number of pens that D and B = $24 - 18 = 6$

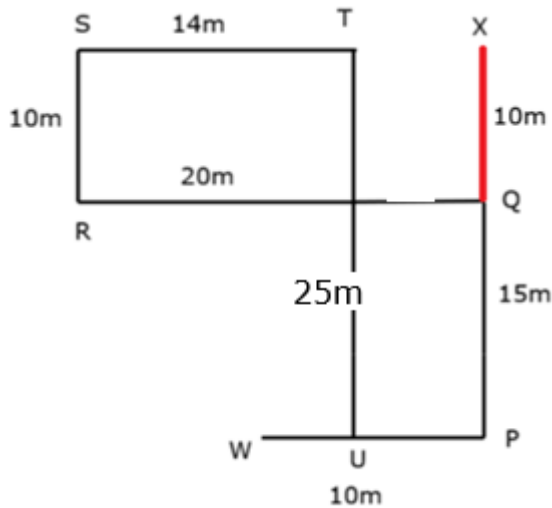

26. Questions

@RankZen Banker

Final Arrangement:

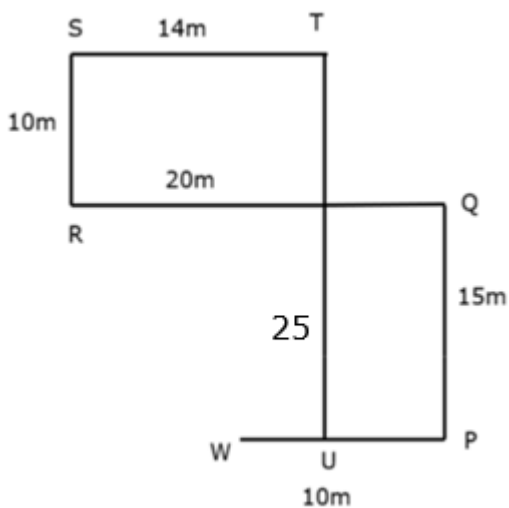

Answer: C

27. Questions

Final Arrangement:

@RankZen Banker

Answer: A

Distance between R and T

$$RP^2 = RQ^2 + QP^2$$

$$\Rightarrow 400 + 225$$

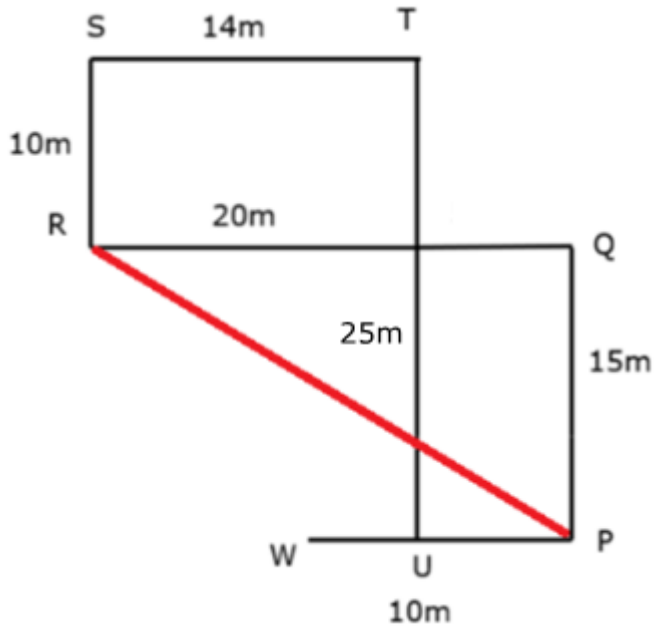

$$\Rightarrow 625$$

$$RP = \sqrt{625}$$

$$RP = 25 \text{ m}$$

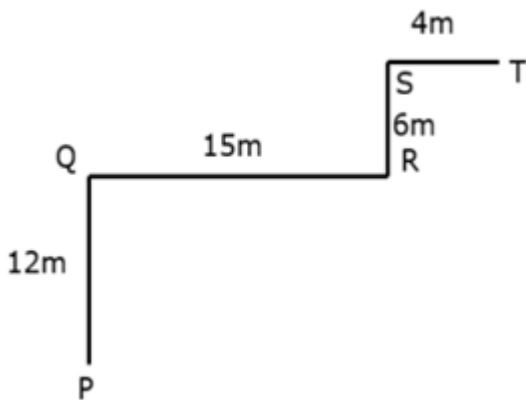

$$RP = 11 + ?$$

$$? = 25 - 11 = 14 \text{ which is equal to ST}(14\text{m})$$

28. Questions

Final Arrangement:

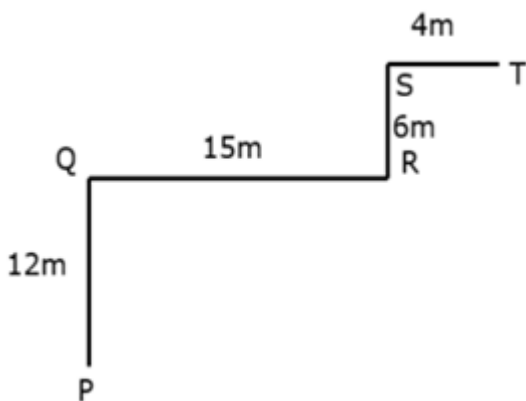

@RankZen Banker

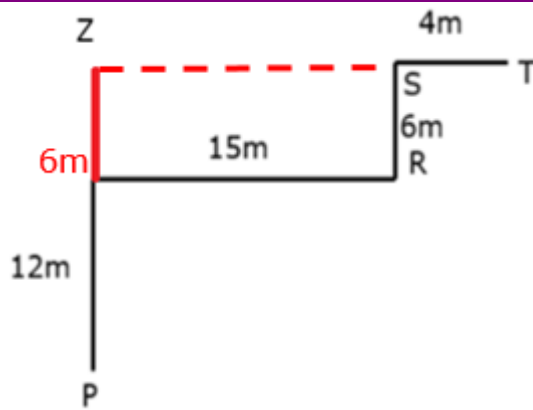

Answer: D

29. Questions

Final Arrangement:

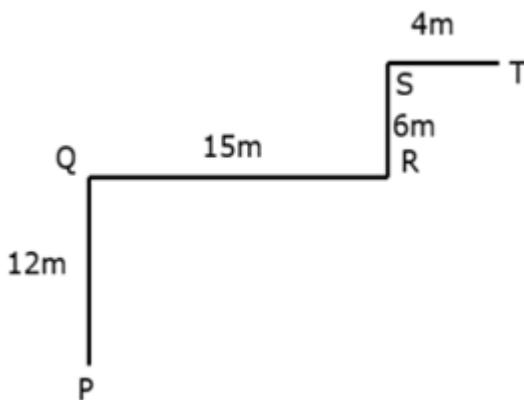

Answer: A

$$ZS + ST = 15\text{m} + 4\text{m} = 19\text{ m}$$

30. Questions

Final Arrangement:

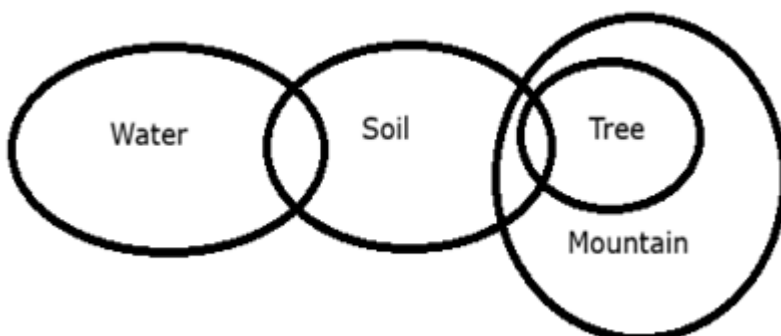

@RankZen Banker

Answer: C

$$PQ + QR + RS + ST = 12\text{m} + 15\text{m} + 6\text{m} + 4\text{m} = 37\text{m}$$

31. Questions

Answer: B

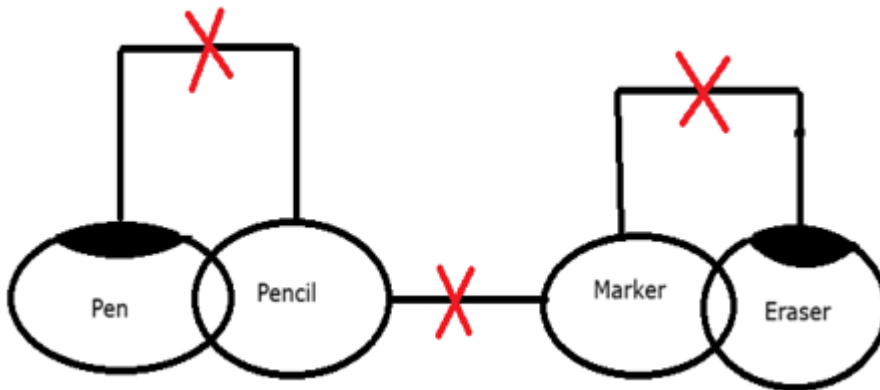

I). Some Trees are Waters. → False (Here, the tree is not directly connected to water. So, all the definite conclusions between them are false. Hence, the conclusion I does not follow.)

II). At least some Mountains are Soils. → True (Here, some part of the mountain is associated with soil. So, at least some Mountains are Soils is true. Hence, conclusion II follows.)

32. Questions

Answer: E

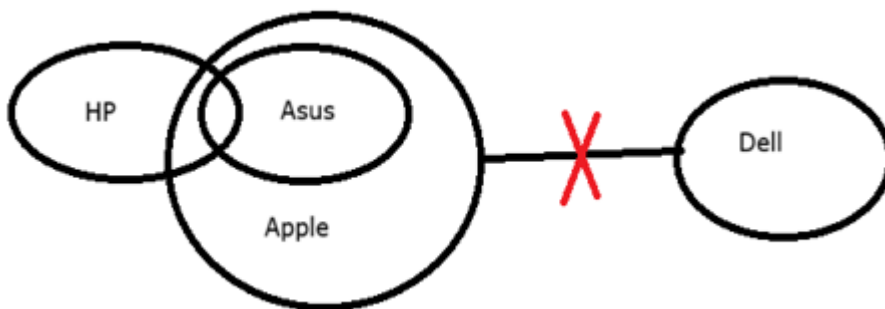

I). All Pens are Erasers. → False (Here, the pen is not directly associated with erasers. So, all definite conclusions between them are false. Hence, conclusion I does not follow)

II). Some Erasers are not Pencils. → True (Here, the part of the eraser that is a marker can never be a pencil. So, some Erasers are not Pencils is true. Hence, the conclusion II follows)

33. Questions

Answer: C

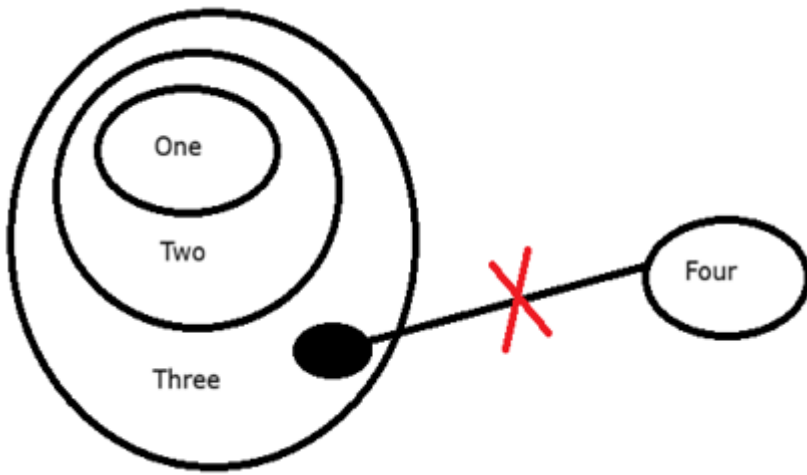

@RankZen Banker

I). No Dell is being HP is a possibility. → True (Here, the Dell is not directly connected to HP. So, all the possible conclusions between them are true. Hence, the conclusion I follows)

II). Some Asus are not Dell. → True (Here, the whole Asus is associated with Apple, which can never be Dell. So, some Asus are not Dell is true. Hence, the conclusion II follows)

34. Questions

Answer: A

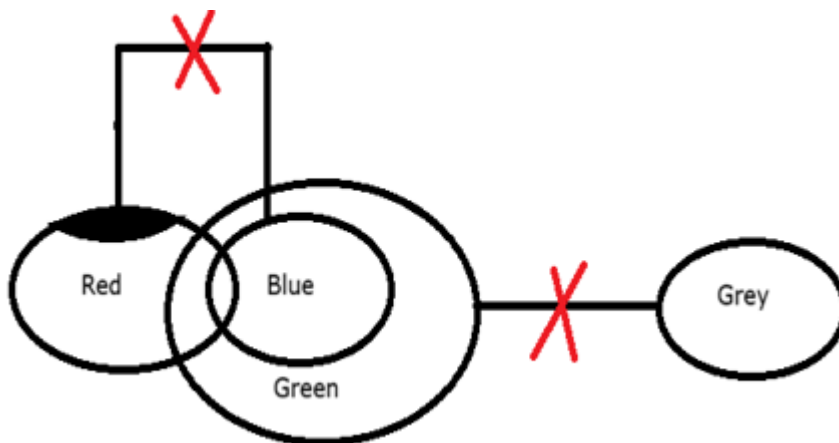

I). Some Two is not Four. → False (Here, two is not directly connected to four. So, all the definite conclusions between them are false. Hence, the conclusion I does not follow)

II). Some Three is One. → True (Here, some part of three is directly associated with one. So, some three is one is true. Hence, the conclusion II follows)

35. Questions

Answer: D

@RankZen Banker

I). Some Red is not Grey. → True (Here, the part of red which is green can not be grey. So, some Red is not Grey is true. Hence, the conclusion I follows)

II). No Blue is Grey. → True (Here, the whole part of blue is green which can never be grey. So, No blue is grey is true. Hence, the conclusion II follows)

36. Questions

Answer: D

Given Series: Z 7 5 P W 3 K C 1 Y I 9 N X G J 2 O U 8 S H 4 Q V 6 T M F

The number which are immediately preceded by a letter and immediately followed by a letter are seven.

37. Questions

Answer: A

Given Series: Z 7 5 P W 3 K C 1 Y I 9 N X G J 2 O U 8 S H 4 Q V 6 T M F

$1+9 = 10$.

38. Questions

Answer: C

Given Series: Z P W K C Y I N X G J O U S H Q V T M F

After removing all the number, the 10th element from the left end is G.

39. Questions

Answer: B

Given Series: Z 7 5 P W 3 K C 1 Y I 9 N X G J 2 O U 8 S H 4 Q V 6 T M F

There are two letters (W, J) that are immediately preceded by a consonant and immediately followed by a prime number.

40. Questions

Answer: E

Given Series: Z 7 5 P W 3 K C 1 Y I 9 N X G J 2 O U 8 S H 4 Q V 6 T M F

The element that is sixth to the left of the fourth element from the right end of the given series is 8.

@RankZen Banker
