

1. Questions

Study the following information carefully and answer the given questions.

Eight persons – L, M, N, O, P, Q, R and S live on eight different floors of an eight-storey building where the lowermost floor is numbered as one, the one just above it is numbered as two and so on till the topmost floor is numbered as eight. Only one person lives on each floor.

R lives two floors below S. S lives neither on an odd-numbered floor nor on the topmost floor. The number of floors above S is equal to the number of floors below L. Two persons live between Q and P, who live on the adjacent floor of S. The number of persons who live between Q and R is **one more than** the number of persons who live between L and M. N lives on one of the floors above O.

On which of the following floors does Q live as per the final arrangement?

- a. First
- b. Second
- c. Third
- d. Sixth
- e. Fifth

2. Questions

How many persons live between L and O as per the final arrangement?

@RankZen Banker

- a. Two
- b. Three
- c. One
- d. Four
- e. None

3. Questions

If all the persons are arranged in alphabetical order from top to bottom, then how many persons are unchanged in their position?

- a. None
- b. Four
- c. Three
- d. Two
- e. One

4. Questions

As many persons live between N and S as between O and ____.

- a. The one who lives on fourth floor
- b. The one who lives immediately above R
- c. M
- d. Q
- e. N

5. Questions

Who among the following person lives on the second floor?

- a. The one who lives immediately below M
- b. The one who lives immediately above L
- c. P
- d. O
- e. R

6. Questions

Study the following information carefully and answer the given questions

@RankZen Banker

Eight persons viz., A, B, C, D, E, F, G and H are sitting around a square table in such a way that four of them are sitting at the corners and four of them are sitting in the middle of the sides, and all of them are facing the centre.

F sits third to the left of H, who doesn't sit in the middle of the table. Only one person sits between F and G. A and H are immediate neighbours. Only one person sits between A and E. B sits second to the right of C. B sits neither adjacent to G nor A. D does not sit opposite to B.

Who among the following person sits opposite to A?

- a. The one who sits to the immediate right of B
- b. The one who sits to the immediate left of G
- c. C
- d. E
- e. H

7. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one does not belong to the group?

- a. BE

- b. CA
- c. HA
- d. GH
- e. FC

8. Questions

How many persons sit between C and D as per the final arrangement?

- a. Three
- b. One
- c. Two
- d. None
- e. Four

9. Questions

What is the position of F with respect to D?

- a. Third to the left
- b. Second to the right
- c. Second to the left
- d. Immediate left
- e. Immediate right

@RankZen Banker

10. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

I). H sits to the immediate left of A

II). No one sits between F and B

III). E sits second to the right of A

- a. Only I and II
- b. Only III
- c. All I, II, and III
- d. Only II
- e. None of these

11. Questions

Study the following information carefully and answer the given questions

Eight persons - P, Q, R, S, T, U, V and W are standing one after another in the petrol bunk to fill their vehicles. It is assumed that no other persons stand other than the given persons.

U stands three persons before T. Only one person stands between U and P. V stands immediately before P. The number of persons who stand between V and U is **one less than** the number of persons who stand between Q and U. U stands after Q. S stands three persons after Q. The number of persons who stand between P and S is equal to the number of persons who stand between T and W.

Who among the following person stands in the third position from the first?

- a. V
- b. Q
- c. The one who stands immediately after R
- d. The one who stands immediately before S
- e. U

12. Questions

If all the persons are arranged in alphabetical order from position first to last, then how many persons are unchanged in their position?

- a. Three
- b. Two
- c. One
- d. Four
- e. None

@RankZen Banker

13. Questions

What is the position of R from the last?

- a. Third
- b. Second
- c. Fourth
- d. Fifth
- e. Sixth

14. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. No one stands before Q

- b. Only one person stands between U and W
- c. U stands immediately before R
- d. R stands immediately before W
- e. All the statements are true

15. Questions

The number of persons who stand between Q and P is equal to the number of persons who stand before ____.

- a. R
- b. S
- c. V
- d. W
- e. T

16. Questions

Study the following information carefully and answer the given questions

A certain number of persons are sitting around the circular table facing the centre.

G sits second to the left of T. Only two persons sit between S and G. Three persons sit between T and M. M and S are not immediate neighbours. R sits second to the left of M. The number of persons who sit between M and R when counted from the right of R is **one less than** the number of persons who sit between U and M when counted from the right of M. No one sits between U and S. More than two persons sit between G and U when counted from the left of G.

How many persons are sitting at the circular table as per the final arrangement?

- a. 14
- b. 10
- c. 13
- d. 12
- e. 11

17. Questions

How many persons sit between R and S, when counted from the left of R?

- a. Eight
- b. Seven
- c. Six

d. Five

e. Four

18. Questions

Who among the following person sits third to the right of R?

a. U

b. G

c. S

d. Unknown person

e. T

19. Questions

What is the position of G with respect to M?

a. Third to the right

b. Sixth to the left

c. Fourth to the left

d. Sixth to the right

e. Fourth to the right

@RankZen Banker

20. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

a. R sits third to the right of G

b. No one sits between G and T

c. Two persons sit between M and U, when counted from left of U

d. U sits second to the left of S

e. All the statements are true

21. Questions

In each of the following questions, the relationship between different elements is shown in the statements followed by two conclusions. Find the conclusion which is definitely true.

Statements:

$M \geq V = Z > L; O < Q \leq N < Z$

Conclusions:

I). $M \geq Q$

II). $V > O$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

22. Questions

Statements:

$N \geq T \geq V \geq R$; $G < L \leq Q = P = R$

Conclusions:

I). $T > P$

II). $R = T$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

@RankZen Banker

23. Questions

Statements:

$R \leq M < L \leq T$; $Q > S = T > I$

Conclusions:

I). $Q > M$

II). $M > I$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

24. Questions

Statements:

$G < R < L = N; A \geq I < J < L$

Conclusions:

I). $L < I$

II). $R \leq A$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

25. Questions

Statements:

$M > P \geq N = V; S < J = T \leq V$

Conclusions:

I). $V \geq J$

II). $M > T$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Either conclusion I or II is true
- d. Neither conclusion I nor II is true
- e. Both conclusions I and II are true

@RankZen Banker

26. Questions

Study the following information carefully and answer the given questions

In a certain code language

“Indian Small Business Growth” is coded as “ztv rgm irz lgs”

“Indian Digital Adoption Strong” is coded as “ztv mvl opt qns”

“Small Adoption Trade Target” is coded as “rgm opt rde gtm”

“Digital Growth Demand More” is coded as “mvl lgs nde rel”

(Note: All the given codes are three-letter codes only.)

Which of the following represents the code for the word “Adoption” in the given coded language?

- a. rde

- b. opt
- c. gtm
- d. rgm
- e. mvl

27. Questions

What is the phrase for the codes “ztl lgs” in the given coded language?

- a. Indian Digital
- b. Small Demand
- c. Digital Demand
- d. Small Growth
- e. Indian Growth

28. Questions

If the code for the phrase “Small Trade” is coded as “rgm rde”, then what will be the code for the phrase “Business Target” in the given coded language?

- a. ztl opt
- b. rgm gtm
- c. irz gtm
- d. lgs opt
- e. mvl gtm

@RankZen Banker

29. Questions

What may be the codes for the phrase “Indian strong demand” in the given coded language?

- a. rgm mvl nde
- b. ztl rgm rel
- c. ztl qns nde
- d. irz mvl nde
- e. qns opt lgs

30. Questions

What is the word for the code “rel” in the given coded language?

- a. More
- b. Demand

- c. Growth
- d. Digital
- e. Can't be determined

31. Questions

Study the following information carefully and answer the given questions

Q is the father of the one who is the only sister of K. L is the sister-in-law of S, who has no siblings. J is the daughter of T, who is the son of M. R is the daughter of K. S is the daughter-in-law of M. S is not a spouse of T. N is the mother of J. Q is the father-in-law of N. M has only three children.

How is S related to Q?

- a. Mother
- b. Daughter-in-law
- c. Sister
- d. Daughter
- e. Can't be determined

32. Questions

How many male members are in the family?

@RankZen Banker

- a. Three
- b. Four
- c. Five
- d. Six
- e. Two

33. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. Q is the father of R
- b. L is the mother of R
- c. K is the father of J
- d. N is the spouse of K
- e. K and L are siblings

34. Questions

Study the following information carefully and answer the given questions

S is the father of L. U is the sister-in-law of T, who has no siblings. V is the only son of L. J is the daughter of the one who is the only sibling of U. M is the mother of the one who is the husband of T. V is the son of the mother of J.

How many members are in the family?

- a. Six
- b. Seven
- c. Eight
- d. Five
- e. Can't be determined

35. Questions

Who among the following persons is the spouse of T?

- a. L
- b. U
- c. S
- d. M
- e. V

@RankZen Banker

36. Questions

Study the following information carefully and answer the given questions

H @ & E + W ? T G D M \$ A = F N > < R * L K ^ U # Y I ! O C % B

Which among the following elements is eighth to the right of the fifth element from the left end in the given series?

- a. D
- b. M
- c. \$
- d. A
- e. =

37. Questions

How many such symbols are there in the given series which are immediately preceded as well as immediately followed by the alphabet?

- a. Three
- b. Two

- c. None
- d. More than three
- e. One

38. Questions

How many symbols are there between the element which is fifth from the right end and the element third from the left end?

- a. Seven
- b. Six
- c. Eight
- d. Nine
- e. Ten

39. Questions

What is the position of “A” with respect to “^”?

- a. Ninth to the left
- b. Tenth to the right
- c. Tenth to the left
- d. Ninth to the right
- e. Eighth to the left

@RankZen Banker

40. Questions

Fill in the blank

&+, TD, AF, _____

- a. <*
- b. RL
- c. L^
- d. UY
- e. N>

Explanations:

1. Questions

Final Arrangement:

Floors	Persons
8	M
7	N
6	Q
5	L
4	S
3	P
2	R
1	O

We have,

- R lives two floors below S.
- S lives neither on an odd-numbered floor nor on the topmost floor.
- The number of floors above S is equal to the number of floors below L.

@RankZen Banker

From the above conditions, there are two possibilities:

Floors	Case-1	Case-2
8		
7		
6	S	
5		L
4	R	S
3	L	
2		R
1		

Again, we have

- Two persons live between Q and P who live on the adjacent floor of S.
- The number of persons who live between Q and R is **one more than** the number of persons who live between L and M.
- N lives on one of the floors above O.

From the above conditions, Case-1 gets eliminated because the number of persons who live between Q and R is **one more than** the number of persons who live between L and M, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floors	Case-1	Case-2
8	Q	M
7		N
6	S	Q
5	P	L
4	R	S
3	L	P
2		R
1		O

@RankZen Banker

Answer: D

2. Questions

Final Arrangement:

Floors	Persons
8	M
7	N
6	Q
5	L
4	S
3	P
2	R
1	O

We have,

- R lives two floors below S.
- S lives neither on an odd-numbered floor nor on the topmost floor.
- The number of floors above S is equal to the number of floors below L.

@RankZen Banker

From the above conditions, there are two possibilities:

Floors	Case-1	Case-2
8		
7		
6	S	
5		L
4	R	S
3	L	
2		R
1		

Again, we have

- Two persons live between Q and P who live on the adjacent floor of S.

- The number of persons who live between Q and R is **one more than** the number of persons who live between L and M.
- N lives on one of the floors above O.

From the above conditions, Case-1 gets eliminated because the number of persons who live between Q and R is **one more than** the number of persons who live between L and M, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floors	Case-1	Case-2
8	Q	M
7		N
6	S	Q
5	P	L
4	R	S
3	L	P
2		R
1		O

@RankZen Banker

Answer: B

3. Questions

Final Arrangement:

Floors	Persons
8	M
7	N
6	Q
5	L
4	S
3	P
2	R
1	O

We have,

- R lives two floors below S.
- S lives neither on an odd-numbered floor nor on the topmost floor.
- The number of floors above S is equal to the number of floors below L.

@RankZen Banker

From the above conditions, there are two possibilities:

Floors	Case-1	Case-2
8		
7		
6	S	
5		L
4	R	S
3	L	
2		R
1		

Again, we have

- Two persons live between Q and P who live on the adjacent floor of S.

- The number of persons who live between Q and R is **one more than** the number of persons who live between L and M.
- N lives on one of the floors above O.

From the above conditions, Case-1 gets eliminated because the number of persons who live between Q and R is **one more than** the number of persons who live between L and M, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floors	Case-1	Case-2
8	Q	M
7		N
6	S	Q
5	P	L
4	R	S
3	L	P
2		R
1		O

@RankZen Banker

Answer: E (Only R remains unchanged in its position.)

4. Questions

Final Arrangement:

Floors	Persons
8	M
7	N
6	Q
5	L
4	S
3	P
2	R
1	O

We have,

- R lives two floors below S.
- S lives neither on an odd-numbered floor nor on the topmost floor.
- The number of floors above S is equal to the number of floors below L.

@RankZen Banker

From the above conditions, there are two possibilities:

Floors	Case-1	Case-2
8		
7		
6	S	
5		L
4	R	S
3	L	
2		R
1		

Again, we have

- Two persons live between Q and P who live on the adjacent floor of S.

- The number of persons who live between Q and R is **one more than** the number of persons who live between L and M.
- N lives on one of the floors above O.

From the above conditions, Case-1 gets eliminated because the number of persons who live between Q and R is **one more than** the number of persons who live between L and M, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floors	Case-1	Case-2
8	Q	M
7		N
6	S	Q
5	P	L
4	R	S
3	L	P
2		R
1		O

@RankZen Banker

Answer: A

5. Questions

Final Arrangement:

Floors	Persons
8	M
7	N
6	Q
5	L
4	S
3	P
2	R
1	O

We have,

- R lives two floors below S.
- S lives neither on an odd-numbered floor nor on the topmost floor.
- The number of floors above S is equal to the number of floors below L.

@RankZen Banker

From the above conditions, there are two possibilities:

Floors	Case-1	Case-2
8		
7		
6	S	
5		L
4	R	S
3	L	
2		R
1		

Again, we have

- Two persons live between Q and P who live on the adjacent floor of S.

- The number of persons who live between Q and R is **one more than** the number of persons who live between L and M.
- N lives on one of the floors above O.

From the above conditions, Case-1 gets eliminated because the number of persons who live between Q and R is **one more than** the number of persons who live between L and M, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floors	Case-1	Case-2
8	Q	M
7		N
6	S	Q
5	P	L
4	R	S
3	L	P
2		R
1		O

@RankZen Banker

Answer: E

6. Questions

Final Arrangement:

We have,

- F sits third to the left of H, who doesn't sit in the middle of the table.
- Only one person sits between F and G.

From the above conditions, there are two possibilities:

Again, we have

- A and H are immediate neighbours.
- Only one person sits between A and E.

From the above conditions, case 2 splits into case 2a:

@RankZen Banker

Again, we have

- B sits second to the right of C.
- B sits neither adjacent to G nor A.

From the above conditions Case-2a gets eliminated, because the B sits neither adjacent to G nor A, which is not satisfied.

Again, we have

- D does not sit opposite to B.

From the above condition, Case-2 gets eliminated because D does not sit opposite to B, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: A

7. Questions

Final Arrangement:

@RankZen Banker

We have,

- F sits third to the left of H, who doesn't sit in the middle of the table.
- Only one person sits between F and G.

From the above conditions, there are two possibilities:

Again, we have

- A and H are immediate neighbours.
- Only one person sits between A and E.

From the above conditions, case 2 splits into case 2a:

Again, we have

- B sits second to the right of C.
- B sits neither adjacent to G nor A.

From the above conditions Case-2a gets eliminated, because the B sits neither adjacent to G nor A, which is not satisfied.

Again, we have

- D does not sit opposite to B.

From the above condition, Case-2 gets eliminated because D does not sit opposite to B, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: E [In all other options, the given persons sit adjacent to each other, except in option e]

8. Questions

Final Arrangement:

We have,

- F sits third to the left of H, who doesn't sit in the middle of the table.
- Only one person sits between F and G.

From the above conditions, there are two possibilities:

@RankZen Banker

Again, we have

- A and H are immediate neighbours.
- Only one person sits between A and E.

From the above conditions, case 2 splits into case 2a:

Again, we have

- B sits second to the right of C.
- B sits neither adjacent to G nor A.

From the above conditions Case-2a gets eliminated, because the B sits neither adjacent to G nor A, which is not satisfied.

Again, we have

- D does not sit opposite to B.

From the above condition, Case-2 gets eliminated because D does not sit opposite to B, which is not satisfied.

Hence, Case-1 shows the final arrangement.

@RankZen Banker

Answer: A

9. Questions

Final Arrangement:

We have,

- F sits third to the left of H, who doesn't sit in the middle of the table.
- Only one person sits between F and G.

From the above conditions, there are two possibilities:

Again, we have

- A and H are immediate neighbours.
- Only one person sits between A and E.

From the above conditions, case 2 splits into case 2a:

Again, we have

- B sits second to the right of C.
- B sits neither adjacent to G nor A.

From the above conditions Case-2a gets eliminated, because the B sits neither adjacent to G nor A, which is not satisfied.

Again, we have

- D does not sit opposite to B.

From the above condition, Case-2 gets eliminated because D does not sit opposite to B, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: D

10. Questions

Final Arrangement:

@RankZen Banker

We have,

- F sits third to the left of H, who doesn't sit in the middle of the table.
- Only one person sits between F and G.

From the above conditions, there are two possibilities:

Again, we have

- A and H are immediate neighbours.
- Only one person sits between A and E.

From the above conditions, case 2 splits into case 2a:

Again, we have

- B sits second to the right of C.
- B sits neither adjacent to G nor A.

From the above conditions Case-2a gets eliminated, because the B sits neither adjacent to G nor A, which is not satisfied.

Again, we have

- D does not sit opposite to B.

From the above condition, Case-2 gets eliminated because D does not sit opposite to B, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: C

11. Questions

Final Arrangement:

Positions	Persons
1	Q
2	V
3	P
4	S
5	U
6	R
7	W
8	T

We have,

- U stands three persons before T.
- Only one person stands between U and P.
- V stands immediately before P.
- The number of persons who stand between V and U is **one less than** the number of persons who stand between Q and U.
- U stands after Q.

From the above conditions, there are two possibilities:

Case-1	Case-2
Q	Q
V	
P	U
	V
U	P
	T
T	

@RankZen Banker

Again, we have

- S stands three persons after Q.
- The number of persons who stand between P and S is equal to the number of persons who stand between T and W.

From the above conditions, case-2 gets eliminated, because S stands three persons after Q, which is not satisfied.

Hence, case-1 is the final arrangement.

Case-1	Case-2
Q	Q
V	
P	U
S	V
U	P
R	T
W	
T	

Answer: D

12. Questions

Final Arrangement:

Positions	Persons
1	Q
2	V
3	P
4	S
5	U
6	R
7	W
8	T

@RankZen Banker

We have,

- U stands three persons before T.
- Only one person stands between U and P.
- V stands immediately before P.
- The number of persons who stand between V and U is **one less than** the number of persons who stand between Q and U.
- U stands after Q.

From the above conditions, there are two possibilities:

Case-1	Case-2
Q	Q
V	
P	U
	V
U	P
	T
T	

Again, we have

- S stands three persons after Q.
- The number of persons who stand between P and S is equal to the number of persons who stand between T and W.

From the above conditions, case-2 gets eliminated, because S stands three persons after Q, which is not satisfied.

Hence, case-1 is the final arrangement.

Case-1	Case-2
Q	Q
V	
P	U
S	V
U	P
R	T
W	
T	

@RankZen Banker

Answer: C (Only S remains unchanged in its position.)

13. Questions

Final Arrangement:

Positions	Persons
1	Q
2	V
3	P
4	S
5	U
6	R
7	W
8	T

We have,

- U stands three persons before T.
- Only one person stands between U and P.
- V stands immediately before P.
- The number of persons who stand between V and U is **one less than** the number of persons who stand between Q and U.
- U stands after Q.

From the above conditions, there are two possibilities:

Case-1	Case-2
Q	Q
V	
P	U
	V
U	P
	T
T	

@RankZen Banker

Again, we have

- S stands three persons after Q.
- The number of persons who stand between P and S is equal to the number of persons who stand between T and W.

From the above conditions, case-2 gets eliminated, because S stands three persons after Q, which is not satisfied.

Hence, case-1 is the final arrangement.

Case-1	Case-2
Q	Q
V	
P	U
S	V
U	P
R	T
W	
T	

Answer: A

14. Questions

Final Arrangement:

Positions	Persons
1	Q
2	V
3	P
4	S
5	U
6	R
7	W
8	T

@RankZen Banker

We have,

- U stands three persons before T.
- Only one person stands between U and P.
- V stands immediately before P.
- The number of persons who stand between V and U is **one less than** the number of persons who stand between Q and U.
- U stands after Q.

From the above conditions, there are two possibilities:

Case-1	Case-2
Q	Q
V	
P	U
	V
U	P
	T
T	

Again, we have

- S stands three persons after Q.
- The number of persons who stand between P and S is equal to the number of persons who stand between T and W.

From the above conditions, case-2 gets eliminated, because S stands three persons after Q, which is not satisfied.

Hence, case-1 is the final arrangement.

Case-1	Case-2
Q	Q
V	
P	U
S	V
U	P
R	T
W	
T	

@RankZen Banker

Answer: E

15. Questions

Final Arrangement:

Positions	Persons
1	Q
2	V
3	P
4	S
5	U
6	R
7	W
8	T

We have,

- U stands three persons before T.
- Only one person stands between U and P.
- V stands immediately before P.
- The number of persons who stand between V and U is **one less than** the number of persons who stand between Q and U.
- U stands after Q.

From the above conditions, there are two possibilities:

Case-1	Case-2
Q	Q
V	
P	U
	V
U	P
	T
T	

@RankZen Banker

Again, we have

- S stands three persons after Q.
- The number of persons who stand between P and S is equal to the number of persons who stand between T and W.

From the above conditions, case-2 gets eliminated, because S stands three persons after Q, which is not satisfied.

Hence, case-1 is the final arrangement.

Case-1	Case-2
Q	Q
V	
P	U
S	V
U	P
R	T
W	
T	

Answer: C

16. Questions

Final Arrangement:

@RankZen Banker

We have,

- G sits second to the left of T.
- Only two persons sit between S and G.

From the above conditions, there are two possibilities:

Again, we have

- Three persons sit between T and M.
- M and S are not immediate neighbours.
- R sits second to the left of M.

From the above conditions, there is one more possibility:

Again, we have

- The number of persons who sit between M and R when counted from the right of R is **one less than** the number of persons who sit between U and M when counted from the right of M.
- No one sits between U and S.
- More than two persons sit between G and U when counted from the left of G.

From the above conditions, Case-1 and 1a get eliminated because no one sits between U and S, which is not satisfied. which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: C

17. Questions

Final Arrangement:

We have,

- G sits second to the left of T.
- Only two persons sit between S and G.

From the above conditions, there are two possibilities:

Again, we have

- Three persons sit between T and M.
- M and S are not immediate neighbours.
- R sits second to the left of M.

From the above conditions, there is one more possibility:

@RankZen Banker

Again, we have

- The number of persons who sit between M and R when counted from the right of R is **one less than** the number of persons who sit between U and M when counted from the right of M.
- No one sits between U and S.
- More than two persons sit between G and U when counted from the left of G.

From the above conditions, Case-1 and 1a get eliminated because no one sits between U and S, which is not satisfied. which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: C

18. Questions

Final Arrangement:

We have,

- G sits second to the left of T.
- Only two persons sit between S and G.

From the above conditions, there are two possibilities:

@RankZen Banker

Again, we have

- Three persons sit between T and M.
- M and S are not immediate neighbours.
- R sits second to the left of M.

From the above conditions, there is one more possibility:

Again, we have

- The number of persons who sit between M and R when counted from the right of R is **one less than** the number of persons who sit between U and M when counted from the right of M.
- No one sits between U and S.
- More than two persons sit between G and U when counted from the left of G.

From the above conditions, Case-1 and 1a get eliminated because no one sits between U and S, which is not satisfied. which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: D

19. Questions

Final Arrangement:

@RankZen Banker

We have,

- G sits second to the left of T.
- Only two persons sit between S and G.

From the above conditions, there are two possibilities:

Again, we have

- Three persons sit between T and M.
- M and S are not immediate neighbours.
- R sits second to the left of M.

From the above conditions, there is one more possibility:

Again, we have

- The number of persons who sit between M and R when counted from the right of R is **one less than** the number of persons who sit between U and M when counted from the right of M.
- No one sits between U and S.
- More than two persons sit between G and U when counted from the left of G.

From the above conditions, Case-1 and 1a get eliminated because no one sits between U and S, which is not satisfied. which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: B

20. Questions

Final Arrangement:

We have,

- G sits second to the left of T.
- Only two persons sit between S and G.

From the above conditions, there are two possibilities:

Again, we have

- Three persons sit between T and M.
- M and S are not immediate neighbours.
- R sits second to the left of M.

From the above conditions, there is one more possibility:

@RankZen Banker

Again, we have

- The number of persons who sit between M and R when counted from the right of R is **one less than** the number of persons who sit between U and M when counted from the right of M.
- No one sits between U and S.
- More than two persons sit between G and U when counted from the left of G.

From the above conditions, Case-1 and 1a get eliminated because no one sits between U and S, which is not satisfied. which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: C

21. Questions

Answer: B

$M \geq V = Z > L; O < Q \leq N < Z$

Conclusions:

I). $M \geq Q \rightarrow \text{False}$ ($M \geq V = Z > N \geq Q$)

II). $V > O \rightarrow \text{True}$ ($V = Z > N \geq Q > O$)

Only conclusion II is true.

22. Questions

Answer: C

$N \geq T \geq V \geq R; G < L \leq Q = P = R$

Conclusions:

I). $T > P \rightarrow \text{False}$ ($T \geq V \geq R = P$)

II). $R = T \rightarrow \text{False}$ ($R \leq V \leq T$)

Combining both I and II, **either conclusion I or II is true.**

23. Questions

Answer: A

$R \leq M < L \leq T; Q > S = T > I$

Conclusions:

I). $Q > M \rightarrow \text{True}$ ($Q > S = T \geq L > M$)

II). $M > I \rightarrow \text{False}$ ($M < L \leq T > I$)

Only conclusion I is true

24. Questions

Answer: D

$G < R < L = N; A \geq I < J < L$

Conclusions:

I). $L < I \rightarrow \text{False}$ ($L > J > I$)

II). $R \leq A \rightarrow \text{False}$ ($R < L > J > I \leq A$)

Neither conclusion I nor II is true

25. Questions

Answer: E

$M > P \geq N = V; S < J = T \leq V$

Conclusions:

@RankZen Banker

I). $V \geq J \rightarrow \text{True}$ ($V \geq T = J$)

II). $M > T \rightarrow \text{True}$ ($M > P \geq N = V \geq T$)

Both conclusions I and II are true

@RankZen Banker

Answer: A

36. Questions

Answer: D

Given Series

H @ & E + W ? T G D M \$ A = F N > < R * L K ^ U # Y I ! O C % B

The element which is eighth to the right of the fifth element from the left end is A.

37. Questions

Answer: D

Given Series

H @ & E + W ? T G D M \$ A = F N > < R * L K ^ U # Y I ! O C % B

Required Order Alphabet-Symbol-Alphabet

H @ & E + W ? T G D M \$ A = F N > < R * L K ^ U # Y I ! O C % B

38. Questions

Answer: D

Given Series

H @ & E ± W ? T G D M \$ A = F N ≥ < R * L K ^ U # Y I ! O C % B

The element which is fifth from the right end is !.

The element which is third from the left end is &.

39. Questions

Answer: C

Given Series

H @ & E + W ? T G D M \$ A = F N > < R * L K ^ U # Y I ! O C % B

40. Questions

Answer: A

Given Series

H @ & E + W ? T G D M \$ A = F N > < R * L K ^ U # Y I ! O C % B

In the above series, only one element is between first element and second element, then two elements between first set of element and second set of elements and so on.,
