

1. Questions

Study the following information carefully and answer the given questions.

Nine persons – A, M, J, L, O, P, Q, R, and S – play different games, viz., Football, Cricket, and Basketball. At least two persons but not more than four persons play the same game.

P plays with J but does not play cricket. M plays with only R, who does not play cricket. The number of persons who play cricket is **one more than** the number of persons who play football. O plays with L but not with S. S plays with J. A does not play cricket.

Which of the following games did A play?

- a. Football
- b. Cricket
- c. Basketball
- d. Either a or b
- e. Either b or c

2. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

@RankZen Banker

- a. P
- b. O
- c. S
- d. J
- e. A

3. Questions

Who among the following persons plays the same game as Q?

- a. M
- b. O
- c. L
- d. P
- e. Both b and c

4. Questions

How many persons play basketball?

- a. Two

- b. Three
- c. Four
- d. Either a or b
- e. Either b or c

5. Questions

If U plays football, then who among the following person plays with U?

- a. P
- b. Q
- c. A
- d. S
- e. R

6. Questions

Study the following information carefully and answer the given questions.

Eight persons – A, B, C, D, E, F, G, and H were born in two different months either January or June of four different years- 2012, 2015, 2017, and 2019. A was born in a leap year. Only two persons were born between A and G. D was born exactly two persons after G. The number of persons who were born after D is **two less than** the number of persons who were born before F. B was born before H but after E. C was born in a month having an even number of days but not in the last year. At least two persons were born before C.

Who among the following persons was born in June 2017?

- a. H
- b. F
- c. A
- d. E
- e. C

7. Questions

How many persons were born before C?

- a. Six
- b. Four
- c. Three
- d. Five

e. Seven

8. Questions

E was born in which of the following months and years?

- a. June 2012
- b. January 2012
- c. January 2015
- d. January 2017
- e. None of these

9. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. A
- b. H
- c. C
- d. B
- e. G

@RankZen Banker

10. Questions

How many persons were born between D and the one who was born immediately before B?

- a. Three
- b. Five
- c. Four
- d. Two
- e. One

11. Questions

Study the following information carefully and answer the given questions.

Six persons – A, B, C, D, E, and F are sitting on a triangular table such that all of them are facing towards the centre. One person sits on each side while one person sits at each corner of the table.

A sits second to the left of C. Only one person sits between D and A. The number of persons who sit between D and B is equal to the number of persons who sit between C and E. B and F do not sit opposite to C. F does not sit at a corner of the table.

Who among the following person sits second to the left of D?

- a. A
- b. F
- c. C
- d. E
- e. None of these

12. Questions

How many persons sit between F and B when counted from the right of B?

- a. Four
- b. Two
- c. One
- d. Three
- e. None

13. Questions

If all the persons are made to sit in alphabetical order from A in a clockwise direction, then how many persons remain unchanged in their position excluding A?

@RankZen Banker

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

14. Questions

Who among the following person sits at the corner of the table?

- a. E
- b. A
- c. C
- d. Both a and b
- e. Both b and c

15. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following persons does not belong to the group?

- a. AB
- b. CD
- c. FE
- d. DA
- e. BF

16. Questions

Study the following information carefully and answer the given questions.

Seven persons – L, M, N, P, Q, R, and S are sitting in a linear row and facing the north.

Q sits at an extreme end of the row. Only two persons sit between Q and S. P sits second to the left of S.

As many persons sit to the left of P as to the right of R. L sits third from an extreme end and second to the left of M. The number of persons who sit to the left of M is **two more than** the number of persons who sit to the right of N, who does not sit at the extreme end.

Who sits third to the left of L as per the final arrangement?

- a. N
- b. P
- c. Q
- d. S
- e. None of these

@RankZen Banker

17. Questions

How many persons sit to the left of N as per the final arrangement?

- a. Five
- b. Six
- c. One
- d. Two
- e. None of these

18. Questions

If all the persons are made to sit in an alphabetical order from left to right, then how many persons remain unchanged in their positions?

- a. One
- b. Two
- c. Three

- d. More than three
- e. None

19. Questions

What is the position of M with respect to S?

- a. Immediate right
- b. Second to the left
- c. Third to the right
- d. Second to the right
- e. None of these

20. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following doesn't belong to the group?

- a. QP
- b. MR
- c. LS
- d. SN
- e. NQ

@RankZen Banker

21. Questions

Study the following information carefully and answer the given questions.

TIN CAN WAR FUR ICE

If "M" is added at the end of each word, then how many meaningful words can be formed in the new series?

- a. One
- b. Two
- c. Three
- d. Four
- e. Five

22. Questions

If the words are arranged in the dictionary order from left to right, then the position of how many words remain unchanged in their position?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

23. Questions

If all the consonants in each word are changed to the next letter and all the vowels are changed to the previous letter in the alphabetical series, then how many words have no vowel? (consider immediate previous letter of A as Z)

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

24. Questions

If the first and the second letters (from the left) of each word are interchanged and then all the words are arranged in the dictionary order from left to right, then which of the following is the first word from the right end?

- a. TIN
- b. CAN
- c. WAR
- d. FUR
- e. ICE

25. Questions

If all the letters in the given words are arranged in the alphabetical order from left to right without any gap to form a new series, then which of the following letters is third from the right end?

- a. R
- b. T
- c. W
- d. U
- e. None of these

26. Questions

Study the following information carefully and answer the given questions.

M is the spouse of J, who has only two children and a niece. N is the mother-in-law of M. O is the daughter-in-law of A, who has three grandchildren. B is the only daughter of M. Q is the uncle of Y and brother-in-law of M. M and O do not have siblings. Z is the cousin of B. The genders of Y and M are opposite. J has only one sibling. O is the mother of Z.

How is Y related to A?

- a. Granddaughter
- b. Son
- c. Father
- d. Grandson
- e. Brother

27. Questions

How many female members are there in the family?

- a. Six
- b. Five
- c. Two
- d. Three
- e. Four

@RankZen Banker

28. Questions

If H is married to Z, then how is H related to Q?

- a. Son-in-law
- b. Son
- c. Brother
- d. Brother-in-law
- e. None of these

29. Questions

Study the following information carefully and answer the below questions.

Q is the mother of S, who is the mother of only W. W is the son of T who is the only brother-in-law of R. T has no siblings. R is the son of P who is the grandfather of V. V is the daughter of U. P has only two children.

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. WQ
- b. QS
- c. QR
- d. PS
- e. UV

30. Questions

If W is married to A, then how is A related to S?

- a. Sister-in-law
- b. Daughter-in-law
- c. Daughter
- d. Sister
- e. Niece

31. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusion which is definitely true.

Statements:

$$A < Q \geq M = Z; T < V = Z > C$$

Conclusions:

I). $Q > C$

II). $M \geq T$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

32. Questions

Statements:

$$Q = B > H < S; J > K = T < H$$

@RankZen Banker

Conclusions:

I). $J > B$

II). $S = K$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

33. Questions

Statements:

$V \geq R = N \geq T; R \geq S = U \leq P$

Conclusions:

I). $N \geq P$

II). $U \leq V$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

@RankZen Banker

34. Questions

Statements:

$B > J \geq I > V; V = P \leq Y = A$

Conclusions:

I). $A \geq I$

II). $A < I$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

35. Questions**Statements:**

$$J \geq T > U \leq R; K \leq U \geq L = S$$

Conclusions:**I). $J > K$** **II). $S \leq R$**

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

36. Questions

Study the following information carefully and answer the given questions.

Six students- A, B, C, D, E, and F are writing the bank exam and scored different marks in the multiples of 5. F scored less than only B. A scored more than D and C but less than F. The second lowest mark is 15. Neither C nor D scored 15 marks. E scored 15 marks less than D.

@RankZen Banker

If the mark of A is 20 marks more than D, then what is the mark of A?

- a. 50
- b. 45
- c. 30
- d. 35
- e. 40

37. Questions

If the sum of the marks of B and D is 80 and the sum of the marks of E and A is 55, then what is the sum of the marks of A and B?

- a. 100
- b. 90
- c. 95
- d. 80
- e. Cannot be determined

38. Questions

Study the following information carefully and answer the given questions.

Six trees - U, V, W, X, Y and Z are of different weights. Z is heavier than W and V. U is lighter than V. X is heavier than Y, which is lighter than W. Y and Z are not the lightest and heaviest trees respectively. As many trees are heavier than W as lighter than V. The weight of the second heaviest and the second lightest trees are 1400kg and 900kg respectively.

Which of the following tree weight is the third heaviest?

- a. Z
- b. Y
- c. V
- d. W
- e. Cannot be determined

39. Questions

If W is heavier than V and the average weight of Z and V is 1200kg, then what is the weight of W?

- a. 1000 kg
- b. 1500 kg
- c. 950 kg
- d. 1100 kg
- e. 1600 kg

@RankZen Banker

40. Questions

What may be the possible weight of the tree U?

- a. 1000 kg
- b. 920 kg
- c. 880 kg
- d. 1150 kg
- e. 950 kg

Explanations:

1. Questions

Final arrangement:

Games	Football	Cricket	Basketball
Persons	M, R	O, L, Q	P, J, S, A

We have,

- P plays with J but does not play cricket.
- M plays with only R who does not play cricket.

From the above conditions, there are two possibilities:

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J		M, R	M, R		P, J

Again, we have

- The number of persons who play cricket is **one more than** the number of persons who play football.
- O plays with L but not with S.
- S plays with J.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Again, we have

- A does not play cricket.

From the above condition, Case-1 gets eliminated because A does not play cricket, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Answer: C

2. Questions

Final arrangement:

Games	Football	Cricket	Basketball
Persons	M, R	O, L, Q	P, J, S, A

We have,

- P plays with J but does not play cricket.
- M plays with only R who does not play cricket.

From the above conditions, there are two possibilities:

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J		M, R	M, R		P, J

Again, we have

- The number of persons who play cricket is **one more than** the number of persons who play football.
- O plays with L but not with S.
- S plays with J.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Again, we have

- A does not play cricket.

From the above condition, Case-1 gets eliminated because A does not play cricket, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Answer: B (In all the options, the given persons are playing basketball Except option b)

3. Questions

Final arrangement:

Games	Football	Cricket	Basketball
Persons	M, R	O, L, Q	P, J, S, A

We have,

- P plays with J but does not play cricket.
- M plays with only R who does not play cricket.

From the above conditions, there are two possibilities:

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J		M, R	M, R		P, J

Again, we have

- The number of persons who play cricket is **one more than** the number of persons who play football.
- O plays with L but not with S.
- S plays with J.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Again, we have

- A does not play cricket.

From the above condition, Case-1 gets eliminated because A does not play cricket, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Answer: E

4. Questions

Final arrangement:

Games	Football	Cricket	Basketball
Persons	M, R	O, L, Q	P, J, S, A

We have,

- P plays with J but does not play cricket.
- M plays with only R who does not play cricket.

From the above conditions, there are two possibilities:

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J		M, R	M, R		P, J

Again, we have

- The number of persons who play cricket is **one more than** the number of persons who play football.
- O plays with L but not with S.
- S plays with J.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Again, we have

- A does not play cricket.

From the above condition, Case-1 gets eliminated because A does not play cricket, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Answer: C

5. Questions

Final arrangement:

Games	Football	Cricket	Basketball
Persons	M, R	O, L, Q	P, J, S, A

We have,

- P plays with J but does not play cricket.
- M plays with only R who does not play cricket.

From the above conditions, there are two possibilities:

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J		M, R	M, R		P, J

Again, we have

- The number of persons who play cricket is **one more than** the number of persons who play football.
- O plays with L but not with S.
- S plays with J.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Again, we have

- A does not play cricket.

From the above condition, Case-1 gets eliminated because A does not play cricket, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case 1			Case 2		
Games	Football	Cricket	Basketball	Football	Cricket	Basketball
Persons	P, J, S	O, L, Q, A	M, R	M, R	O, L, Q	P, J, S, A

Answer: E

6. Questions

Final arrangement:

Years	Months	Persons
2012	January	E
	June	A
2015	January	B
	June	F
2017	January	G
	June	C
2019	January	D
	June	H

We have,

- A was born in a leap year.
- Only two persons were born between A and G.

@RankZen Banker

From the above conditions, there are two possibilities

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	
	June		A
2015	January		
	June	G	
2017	January		G
	June		
2019	January		
	June		

Again, we have

- D was born exactly two persons after G.
- The number of persons who were born after D is **two less than** the number of persons who were born before F.
- B was born before H but after E.
- C was born in a month having an even number of days but not in the last year.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

@RankZen Banker

Again, we have

- At least two persons were born before C.

From the above condition, Case-1 gets eliminated because at least two persons were born before C, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Answer: E

7. Questions

@RankZen Banker

Final arrangement:

Years	Months	Persons
2012	January	E
	June	A
2015	January	B
	June	F
2017	January	G
	June	C
2019	January	D
	June	H

We have,

- A was born in a leap year.
- Only two persons were born between A and G.

From the above conditions, there are two possibilities

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	
	June		A
2015	January		
	June	G	
2017	January		G
	June		
2019	January		
	June		

@RankZen Banker

Again, we have

- D was born exactly two persons after G.
- The number of persons who were born after D is **two less than** the number of persons who were born before F.
- B was born before H but after E.
- C was born in a month having an even number of days but not in the last year.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Again, we have

- At least two persons were born before C.

@RankZen Banker

From the above condition, Case-1 gets eliminated because at least two persons were born before C, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Answer: D

8. Questions

@RankZen Banker

Final arrangement:

Years	Months	Persons
2012	January	E
	June	A
2015	January	B
	June	F
2017	January	G
	June	C
2019	January	D
	June	H

We have,

- A was born in a leap year.
- Only two persons were born between A and G.

From the above conditions, there are two possibilities

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	
	June		A
2015	January		
	June	G	
2017	January		G
	June		
2019	January		
	June		

@RankZen Banker

Again, we have

- D was born exactly two persons after G.
- The number of persons who were born after D is **two less than** the number of persons who were born before F.
- B was born before H but after E.
- C was born in a month having an even number of days but not in the last year.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Again, we have

- At least two persons were born before C.

@RankZen Banker

From the above condition, Case-1 gets eliminated because at least two persons were born before C, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Answer: B

2012	January	E
	June	A
2015	January	B
	June	F
2017	January	G
	June	C
2019	January	D
	June	H

We have,

- A was born in a leap year.
- Only two persons were born between A and G.

From the above conditions, there are two possibilities

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	
	June		A
2015	January		
	June	G	
2017	January		G
	June		
2019	January		
	June		

@RankZen Banker

Again, we have

- D was born exactly two persons after G.
- The number of persons who were born after D is **two less than** the number of persons who were born before F.
- B was born before H but after E.
- C was born in a month having an even number of days but not in the last year.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Again, we have

- At least two persons were born before C.

@RankZen Banker

From the above condition, Case-1 gets eliminated because at least two persons were born before C, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Answer: A (In all other options, the given persons were born in odd numbered year except Option A, who was born in leap year.)

@RankZen Banker

Final arrangement:

Years	Months	Persons
2012	January	E
	June	A
2015	January	B
	June	F
2017	January	G
	June	C
2019	January	D
	June	H

We have,

- A was born in a leap year.
- Only two persons were born between A and G.

From the above conditions, there are two possibilities

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	
	June		A
2015	January		
	June	G	
2017	January		G
	June		
2019	January		
	June		

@RankZen Banker

Again, we have

- D was born exactly two persons after G.
- The number of persons who were born after D is **two less than** the number of persons who were born before F.
- B was born before H but after E.
- C was born in a month having an even number of days but not in the last year.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Again, we have

- At least two persons were born before C.

@RankZen Banker

From the above condition, Case-1 gets eliminated because at least two persons were born before C, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Months	Persons	
		Case 1	Case 2
2012	January	A	E
	June	C	A
2015	January	E	B
	June	G	F
2017	January	F	G
	June	D	C
2019	January	B	D
	June	H	H

Answer: C

11. Questions

@RankZen Banker

Final arrangement:

We have,

- A sits second to the left of C.

From the above condition, there are two possibilities

Again, we have,

- Only one person sits between D and A.
- The number of persons who sit between D and B is equal to the number of persons who sit between C and E.
- B and F do not sit opposite to C.

@RankZen Banker

Again, we have

- F does not sit at the corner of the table.

From the above condition, Case-1 gets eliminated because F does not sit at the corner of the table, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: C

12. Questions

Final arrangement:

We have,

- A sits second to the left of C.

From the above condition, there are two possibilities

@RankZen Banker

Again, we have,

- Only one person sits between D and A.
- The number of persons who sit between D and B is equal to the number of persons who sit between C and E.
- B and F do not sit opposite to C.

Again, we have

- F does not sit at the corner of the table.

From the above condition, Case-1 gets eliminated because F does not sit at the corner of the table, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@RankZen Banker

Answer: C

13. Questions

Final arrangement:

We have,

- A sits second to the left of C.

From the above condition, there are two possibilities

Again, we have,

- Only one person sits between D and A.
- The number of persons who sit between D and B is equal to the number of persons who sit between C and E.
- B and F do not sit opposite to C.

@RankZen Banker

Again, we have

- F does not sit at the corner of the table.

From the above condition, Case-1 gets eliminated because F does not sit at the corner of the table, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: E (No one will remain unchanged in its position)

14. Questions

Final arrangement:

@RankZen Banker

We have,

- A sits second to the left of C.

From the above condition, there are two possibilities

Again, we have,

- Only one person sits between D and A.
- The number of persons who sit between D and B is equal to the number of persons who sit between C and E.
- B and F do not sit opposite to C.

Again, we have

- F does not sit at the corner of the table.

From the above condition, Case-1 gets eliminated because F does not sit at the corner of the table, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@RankZen Banker

Answer: E

15. Questions

Final arrangement:

We have,

- A sits second to the left of C.

From the above condition, there are two possibilities

Again, we have,

- Only one person sits between D and A.
- The number of persons who sit between D and B is equal to the number of persons who sit between C and E.
- B and F do not sit opposite to C.

@RankZen Banker

Again, we have

- F does not sit at the corner of the table.

From the above condition, Case-1 gets eliminated because F does not sit at the corner of the table, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: A (In all the options, the second person sits second to the right of first person except option a)

16. Questions

Final arrangement:

We have,

- Q sits at an extreme end of the row.
- Only two persons sit between Q and S.

@RankZen Banker

From the above conditions, there are two possibilities

Again, we have

- P sits second to the left of S.
- As many persons sit to the left of P as to the right of R.
- L sits third from an extreme end and second to the left of M.
- The number of persons who sit to the left of M is **two more than** the number of persons who sit to the right of N who does not sit at the extreme end.

From the above conditions Case-1 gets eliminated because the number of persons to the left of M is **two more than** the number of persons to the right of N, who does not sit at the extreme end, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: B

17. Questions

Final arrangement:

We have,

- Q sits at an extreme end of the row.
- Only two persons sit between Q and S.

@RankZen Banker

From the above conditions, there are two possibilities

Again, we have

- P sits second to the left of S.
- As many persons sit to the left of P as to the right of R.
- L sits third from an extreme end and second to the left of M.
- The number of persons who sit to the left of M is **two more than** the number of persons who sit to the right of N who does not sit at the extreme end.

From the above conditions Case-1 gets eliminated because the number of persons to the left of M is **two more than** the number of persons to the right of N, who does not sit at the extreme end, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: D

18. Questions

Final arrangement:

@RankZen Banker

We have,

- Q sits at an extreme end of the row.
- Only two persons sit between Q and S.

From the above conditions, there are two possibilities

Again, we have

- P sits second to the left of S.
- As many persons sit to the left of P as to the right of R.
- L sits third from an extreme end and second to the left of M.

- The number of persons who sit to the left of M is **two more than** the number of persons who sit to the right of N who does not sit at the extreme end.

From the above conditions Case-1 gets eliminated because the number of persons to the left of M is **two more than** the number of persons to the right of N, who does not sit at the extreme end, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: B (Only N and R remain unchanged in their positions)

@RankZen Banker

19. Questions

Final arrangement:

We have,

- Q sits at an extreme end of the row.
- Only two persons sit between Q and S.

From the above conditions, there are two possibilities

Again, we have

- P sits second to the left of S.

- As many persons sit to the left of P as to the right of R.
- L sits third from an extreme end and second to the left of M.
- The number of persons who sit to the left of M is **two more than** the number of persons who sit to the right of N who does not sit at the extreme end.

From the above conditions Case-1 gets eliminated because the number of persons to the left of M is **two more than** the number of persons to the right of N, who does not sit at the extreme end, which is not satisfied.

Hence, case-2 shows the final arrangement.

@RankZen Banker

Answer: C

20. Questions

Final arrangement:

We have,

- Q sits at an extreme end of the row.
- Only two persons sit between Q and S.

From the above conditions, there are two possibilities

Again, we have

- P sits second to the left of S.
- As many persons sit to the left of P as to the right of R.
- L sits third from an extreme end and second to the left of M.
- The number of persons who sit to the left of M is **two more than** the number of persons who sit to the right of N who does not sit at the extreme end.

From the above conditions Case-1 gets eliminated because the number of persons to the left of M is **two more than** the number of persons to the right of N, who does not sit at the extreme end, which is not satisfied.

Hence, case-2 shows the final arrangement.

@RankZen Banker

Answer: E (In all the options, the given persons are immediate neighbours except option e)

21. Questions

Answer: A

Given Series: TIN CAN WAR FUR ICE

If "M" is added at the end of each word, we get

TINM CANM WARM FURM ICEM

Only one meaningful word is formed - WARM

22. Questions

Answer: E

Given Series: TIN CAN WAR FUR ICE

If the words are arranged in the dictionary order from left to right, new series: CAN FUR ICE TIN WAR

No words remain unchanged.

23. Questions

Answer: C

Given Series: TIN CAN WAR FUR ICE

If all the consonants in each word are changed to the next letter and all the vowels are changed to the previous letter , we get new series:

UHO DZO XZS GTS HDD

In this new series, three words have no vowel UHO DZO **XZS GTS HDD**

24. Questions

Answer: D

Given Series: TIN CAN WAR FUR ICE

If the first and the second letters of each word are interchanged and then all the words are arranged in the dictionary order from left to right, we get a series: ACN AWR CIE ITN UFR

UFR is the first word from the right end.

25. Questions

Answer: B

Given Series: TIN CAN WAR FUR ICE

If all the letters in the given words are arranged in the alphabetical order from left to right without any gap to form a new series, we get AACCEFFINNRRRTUW- T

@RankZen Banker

T is the third letter from the right end.

26. Questions

Final Arrangement:

Answer: D

27. Questions

Final Arrangement:

Answer: B

28. Questions

Final Arrangement:

Answer: A

If H is married to Z,

@RankZen Banker

Then H is the son-in-law of Q.

29. Questions

Answer: A (All of them are the combination of parent and child, except in option a)

30. Questions

Answer: B

31. Questions

Answer: D

Statements: $A < Q \geq M = Z; T < V = Z > C$

Conclusions:

I). $Q > C$ ($Q \geq M = Z > C$) $\rightarrow$ True

II). $M \geq T$ ($M = Z = V > T$) $\rightarrow$ False

32. Questions

Answer: E

Statements: $Q = B > H < S; J > K = T < H$

Conclusions:

I). $J > B$ ($J > K = T < H < B$) $\rightarrow$ False

II). $S = K$ ($S > H > T = K$) $\rightarrow$ False

33. Questions

Answer: A

Statements: $V \geq R = N \geq T; R \geq S = U \leq P$

Conclusions:

I). $N \geq P$ ($N = R \geq S = U \leq P$) $\rightarrow$ False

II). $U \leq V$ ($U = S \leq R \leq V$) $\rightarrow$ True

34. Questions

Answer: B

Statements: $B > J \geq I > V; V = P \leq Y = A$

Conclusions:

I). $A \geq I$ ($A = Y \geq P = V < I$) $\rightarrow$ False

II). $A < I$ ($A = Y \geq P = V < I$) $\rightarrow$ False

By combining I and II, either I or II is true.

35. Questions

@RankZen Banker

Answer: C

Statements: $J \geq T > U \leq R$; $K \leq U \geq L = S$

Conclusions

I). $J > K$ ($J \geq T > U \geq K$) $\rightarrow$ True

II). $S \leq R$ ($S = L \leq U \leq R$) $\rightarrow$ True

36. Questions

Final arrangement:

$B > F > A > D(30) > E(15) > C$

We have,

- F scored less than only B.
- A scored more than D and C but less than F.

From the above conditions, there are four possibilities

Case 1: $B > F > A > D/C > D/C > E$

Case 1a: $B > F > A > D/C > E > D/C$

Case 1b: $B > F > A > E > D/C > D/C$

Case 2: $B > F > E > A > D/C > D/C$

Again, we have

- The second lowest mark is 15.
- Neither C nor D scored 15 marks.
- E scored 15 marks less than D.

From the above conditions Case-1, Case 1b and Case-2 get eliminated because neither C nor D scored 15 marks and E scored 15 marks less than D which are not satisfied.

Hence, Case-1a shows the final arrangement.

~~Case 1: $B > F > A > D/C > D/C > E$~~

Case 1a: $B > F > A > D(30) > E(15) > C$

~~Case 1b: $B > F > A > E > D/C > D/C$~~

~~Case 2: $B > F > E > A > D/C > D/C$~~

Answer: A

$A - D = 20$; $A - 30 = 20$

@RankZen Banker

A = 50.

37. Questions

Final arrangement:

$B > F > A > D(30) > E(15) > C$

We have,

- F scored less than only B.
- A scored more than D and C but less than F.

From the above conditions, there are four possibilities

Case 1: $B > F > A > D/C > D/C > E$

Case 1a: $B > F > A > D/C > E > D/C$

Case 1b: $B > F > A > E > D/C > D/C$

Case 2: $B > F > E > A > D/C > D/C$

Again, we have

- The second lowest mark is 15.
- Neither C nor D scored 15 marks.
- E scored 15 marks less than D.

From the above conditions Case-1, Case 1b and Case-2 get eliminated because neither C nor D scored 15 marks and E scored 15 marks less than D which are not satisfied.

Hence, Case-1a shows the final arrangement.

~~Case 1: $B > F > A > D/C > D/C > E$~~

Case 1a: $B > F > A > D(30) > E(15) > C$

~~Case 1b: $B > F > A > E > D/C > D/C$~~

~~Case 2: $B > F > E > A > D/C > D/C$~~

Answer: B

$B + D = 80$; given $D = 30$; $B + 30 = 80$; $B = 50$

$E + A = 55$

$15 + A = 55$; $A = 40$

$B + A = 50 + 40 = 90$

38. Questions

Final arrangement:

$X > Z (1400) > W/V > W/V > Y (900) > U$

We have,

- Z is heavier than W and V.
- U is lighter than V.
- X is heavier than Y, which is lighter than W.
- Y and Z are not the lightest and heaviest trees respectively.

$_ > Z > W/V$

$V > U$

$X/W > Y > _$

Again, we have

- As many trees are heavier than W as lighter than V.
- The weight of the second heaviest and the second lightest trees are 1400kg and 900kg respectively.

$X > Z (1400) > W/V > W/V > Y (900) > U$

Answer: E

39. Questions

Final arrangement:

$X > Z (1400) > W/V > W/V > Y (900) > U$

We have,

- Z is heavier than W and V.
- U is lighter than V.
- X is heavier than Y, which is lighter than W.
- Y and Z are not the lightest and heaviest trees respectively.

$_ > Z > W/V$

$V > U$

$X/W > Y > _$

Again, we have

- As many trees are heavier than W as lighter than V.
- The weight of the second heaviest and the second lightest trees are 1400kg and 900kg respectively.

$X > Z (1400) > W/V > W/V > Y (900) > U$

Answer: D

Average weight of Z and V is 1200kg

$Z + V = 2400$

@RankZen Banker

$$1400 + V = 2400$$

$$V = 1000$$

40. Questions

Final arrangement:

$$X > Z (1400) > W/V > W/V > Y (900) > U$$

We have,

- Z is heavier than W and V.
- U is lighter than V.
- X is heavier than Y, which is lighter than W.
- Y and Z are not the lightest and heaviest trees respectively.

$$_ > Z > W/V$$

$$V > U$$

$$X/W > Y > _$$

Again, we have

- As many trees are heavier than W as lighter than V.
- The weight of the second heaviest and the second lightest trees are 1400kg and 900kg respectively.

$$X > Z (1400) > W/V > W/V > Y (900) > U$$

Answer: C

@RankZen Banker
