

1. Questions

Study the following information carefully and answer the given questions.

Seven persons – P, Q, R, S, T, U and V were born in seven different years, viz., 1962, 1973, 1997, 2002, 2008, 2010 and 2017. Assume that all the persons were born on the same date and month. Consider 2026 as the base year for calculating the age.

S was born in an even-numbered year but after 2002. P was born two persons before S. T was born either just before or just after P. The difference between the age of T and Q is **two more than** the age of R. Q is older than T. As many persons born before U as after T.

Who among the following person was born in 1997?

- a. Q
- b. R
- c. P
- d. U
- e. T

2. Questions

How many persons are older than U as per the final arrangement?

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

3. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. T
- b. Q
- c. V
- d. S
- e. U

@RankZen Banker

4. Questions

Q was born in which of the following years?

- a. 2010
- b. 1973
- c. 1997
- d. 2002
- e. 1962

5. Questions

U was born ___ years ___ R.

- a. 20, before
- b. 6, after
- c. 7, before
- d. 5, after
- e. 8, before

6. Questions

Study the following information carefully and answer the given questions.

Eight persons – A, B, C, D, E, F, G and H live on eight different floors of an eight-storeyed building where the lowermost floor is numbered as one, the one just above it is numbered as two and so on till the topmost floor is numbered as eight. Only one person lives on each floor.

Four persons live between G and H, neither of them lives on the topmost floor or lowermost floor. One person lives between G and A. As many persons live above A as below F. C lives adjacent to F. Only two persons live between C and D. B doesn't live on an odd-numbered floor. At most one person lives between B and D.

Who among the following person lives on floor number 5?

- a. A
- b. F
- c. E
- d. D
- e. H

@RankZen Banker

7. Questions

Who among the following persons lives between D and C?

- a. Only B
- b. Only H, E and B

- c. Only A and F
- d. Only F
- e. No one

8. Questions

If all the persons are made to live in the alphabetical order from topmost to bottom most floors, then how many persons will remain unchanged in their position?

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

9. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. G
- b. B
- c. E
- d. C
- e. A

10. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

- a. G lives on the bottommost floor
- b. Only two persons live between F and H
- c. F lives immediately above A
- d. B lives on the topmost floor
- e. C lives on an even-numbered floor

@RankZen Banker

11. Questions

Study the following information carefully and answer the given questions.

Eight boxes, viz., L, M, N, O, P, Q, R and S are placed one above another in a stack. It is assumed that no other boxes are kept in the stack other than the given boxes.

Two boxes are placed between box L and box N. Box M is placed two boxes above box L. At most one box is placed above M. As many boxes are placed above box M as below box P. Box P is placed below box M. Box S is placed immediately above box P. Box O is placed above box Q but not above box R. Box Q is not placed at the bottommost position.

How many boxes are not placed above box O as per the final arrangement?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

12. Questions

As many boxes are placed between box N and box S as between box __ and box __.

- a. L and Q
- b. N and R
- c. M and P
- d. M and R
- e. R and S

13. Questions

If we arrange all the boxes as per English alphabetical order from top to bottom, then how many boxes will remain unchanged in their position?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

@RankZen Banker

14. Questions

If we interchange the position of box S with box L, then which of the following statement(s) will be true as per the new arrangement?

- a. As many boxes placed above box S as below box L
- b. No box is placed between box L and Box O
- c. Box M is placed two boxes above box L

- d. Two boxes are placed between box S and box O
- e. Box Q is placed two boxes below box S

15. Questions

What is the position of box R from the bottom of the stack as per the final arrangement?

- a. Fifth
- b. Seventh
- c. Eighth
- d. Sixth
- e. Second

16. Questions

Study the following information carefully and answer the given questions.

A certain number of persons are sitting in a linear row facing north.

J sits second from one of the ends. Six persons sit between J and V. The number of persons who sit between T and V is **one more** than the number of persons who sit between J and T. O sits second to the right of V. As many persons sit between V and T as between O and Z who sits at one of the ends. W sits adjacent to Z. The number of persons who sit to the left of W is a prime number.

How many persons sit in the linear row as per the final arrangement?

- a. Thirteen
- b. Twelve
- c. Fifteen
- d. Ten
- e. Fourteen

17. Questions

What is the position of W with respect to V as per the final arrangement?

- a. Fifth to the right
- b. Immediate left
- c. Second to the right
- d. Fourth to the right
- e. Sixth to the left

18. Questions

As many persons sit to the left of T as to the right of ____.

- a. W
- b. O
- c. Z
- d. V
- e. J

19. Questions

Which of the following statement(s) is true with respect to the final arrangement?

- a. Two persons sit between T and V
- b. The number of persons who sit to the right of V is two more than the persons who sit to the left of V
- c. T sits fifth from the right end
- d. No one sits between J and V
- e. An odd number of persons sit to the right of W

20. Questions

Who among the following persons sits ninth to the right of T?

- a. O
- b. J
- c. V
- d. W
- e. Z

21. Questions

Study the following information carefully and answer the given questions.

Mr. X walks starts walking from point A in the south direction for 12m to reach point B. From point B he takes a left turn and walks for 8m to reach point C. From point C he takes a left turn to reach point D, which is 8m away from C. After reaching point D he takes two consecutive right turns and walks 7m and 13m to reach point E and point F respectively. Point F is his final destination.

What is the direction of Mr. X's initial point with respect to his final destination?

- a. North
- b. Northwest
- c. Southeast
- d. South

e. West

22. Questions

What is the shortest distance between point C and point E?

- a. 9m
- b. 15m
- c. $\sqrt{99}$ m
- d. $\sqrt{113}$ m
- e. 10m

23. Questions

Study the following information carefully and answer the given questions.

Point B is 5m south of point A. Point C is 10m east of point B and 8m north of point D. Point E is 6m east of point D. Point F is 20m north of point E. Point G is 15m east of point F.

What is the direction of point F with respect to point A?

- a. East
- b. Northeast
- c. Northwest
- d. West
- e. Southeast

24. Questions

What is the shortest distance between point C and point E?

- a. $\sqrt{95}$ m
- b. 11m
- c. $\sqrt{110}$ m
- d. 10m
- e. 20m

@RankZen Banker

25. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. GE
- b. AC

- c. BD
- d. AE
- e. CE

26. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements:

Only a few good are bad

No bad is clever

All clever are smart

Conclusions:

I). Some smart are not good

II). All good can be clever

- a. Only conclusion I follows
- b. Either conclusion I or II follows
- c. Both conclusions I and II follow
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

27. Questions

Statements:

Only a few papers are books

Some books are not blackboards

Few blackboards are white

Conclusions:

I). Some papers are not blackboards

II). All papers are blackboards

- a. Neither conclusion I nor II follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follows
- e. Both conclusions I and II follow

@RankZen Banker

28. Questions

Statements:

Some red are orange

No orange are purple

Some violet are purple

Conclusions:

I). Some red is not purple

II). All violet can be purple

- a. Only conclusion II follows
- b. Neither conclusion I nor II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follows
- e. Both conclusions I and II follow

29. Questions

Statements:

No tabs are phones

All laptops are phones

Some laptops are computers

Conclusions:

I). Some phones being computer is a possibility

II). Some computer can never be tabs

- a. Only conclusion II follows
- b. Neither conclusion I nor II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follows
- e. Both conclusions I and II follow

@RankZen Banker

30. Questions

Statements:

Some pens are pencils

All pencils are black

Only a few black are red

Conclusions:

I). Some red can be pencils

II). Some red are not black

- a. Only conclusion II follows
- b. Neither conclusion I nor II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follows
- e. Both conclusions I and II follow

31. Questions

Study the following information carefully and answer the given questions.

In a certain code language,

"Mountains attract many tourists" is coded as " lm rt pq xf"

"Tourists enjoy local cuisine" is coded as "bn lm kd ws"

"Artists enjoy beautiful mountains" is coded as "hj pq kd zy"

"Cuisine and artists perform" is coded as "ws hj mx gv"

(Note: All the given codes are two-letters code only.)

Which of the following is the code for the word “Artists” in the given coded language?

- a. pq
- b. zy
- c. can't be determined
- d. hj
- e. kd

32. Questions

@RankZen Banker

If the phrase “Many and beautiful ” is coded as “rt mx zy”, then what is the code for the phrase “Perform attract enjoy” in the given coded language?

- a. lm pq xf
- b. ws kd hj
- c. mx gv kd
- d. xf rt gv

e. gv kd xf

33. Questions

Which of the following words is coded as “pq” in the given coded language?

- a. Mountains
- b. Many
- c. Attracts
- d. Tourists
- e. And

34. Questions

What may be the code for the phrase “Many tourists” in the given coded language?

- a. mx rt
- b. rt xf
- c. rt lm
- d. zy lm
- e. bn lm

35. Questions

Which of the following word is coded as “xf” in the given coded language?

- a. Attract
- b. Many
- c. Tourists
- d. Either Attract or Many
- e. Either Tourists or Mountains

36. Questions

@RankZen Banker

Study the following information carefully and answer the given questions.

\$ F 5 8 @ N * 2 A ? 7 K ! D 0 % P 4 # T 9 & C + 1 M = R 6 H

Which of the following elements is the thirteenth to the right of the eleventh element from the left end in the given series?

- a. C
- b. A
- c. +

d. M

e. %

37. Questions

How many numbers are there in the given series which are immediately preceded by an alphabet and immediately followed by a number?

a. One

b. Two

c. Three

d. More than three

e. None

38. Questions

If all the numbers are dropped from the given series, then which of the following elements is ninth from the left end?

a. !

b. D

c. A

d. *

e. N

39. Questions

How many symbols are there between the fifth element from the right end and the eleventh element from the left end in the given series?

a. None

b. Two

c. Three

d. Four

e. More than four

@RankZen Banker

40. Questions

If the first fifteen elements (from the left end) are arranged in reverse order, then which of the following elements is the twenty-fifth element from the right end in the given series?

a. 0

b. N

- c. *
- d. ?
- e. %

Explanations:

1. Questions

Final arrangement:

Years	Age as on 2026	Persons
1962	64	Q
1973	53	T
1997	29	P
2002	24	V
2008	18	S
2010	16	U
2017	9	R

We have,

- S was born in an even-numbered year but after 2002.
- P was born two persons before S.

@RankZen Banker

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons
1962	64		
1973	53		
1997	29	P	
2002	24		P
2008	18	S	
2010	16		S
2017	9		

Again, we have,

- T was born either just before or just after P.
- The difference between the age of T and Q is **two more than** the age of R.
- Q is older than T.

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons
1962	64	Q	
1973	53	T	
1997	29	P	Q
2002	24		P
2008	18	S	T
2010	16		S
2017	9	R	R

Again, we have,

- As many persons born before U as after T.

@RankZen Banker

From the above condition, Case 2 gets eliminated because as many persons born before U as after T is not satisfied. Hence, Case 1 is the final arrangement.

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons
1962	64	Q	
1973	53	T	
1997	29	P	Q
2002	24	V	P
2008	18	S	T
2010	16	U	S
2017	9	R	R

Answer: C

2. Questions

Final arrangement:

Years	Age as on 2026	Persons
1962	64	Q
1973	53	T
1997	29	P
2002	24	V
2008	18	S
2010	16	U
2017	9	R

@RankZen Banker

We have,

- S was born in an even-numbered year but after 2002.
- P was born two persons before S.

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons
1962	64		
1973	53		
1997	29	P	
2002	24		P
2008	18	S	
2010	16		S
2017	9		

Again, we have,

- T was born either just before or just after P.
- The difference between the age of T and Q is **two more than** the age of R.
- Q is older than T.

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons
1962	64	Q	
1973	53	T	
1997	29	P	Q
2002	24		P
2008	18	S	T
2010	16		S
2017	9	R	R

Again, we have,

- As many persons born before U as after T.

@RankZen Banker

From the above condition, Case 2 gets eliminated because as many persons born before U as after T is not satisfied. Hence, Case 1 is the final arrangement.

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons
1962	64	Q	
1973	53	T	
1997	29	P	Q
2002	24	V	P
2008	18	S	T
2010	16	U	S
2017	9	R	R

Answer: D

3. Questions

Final arrangement:

Years	Age as on 2026	Persons
1962	64	Q
1973	53	T
1997	29	P
2002	24	V
2008	18	S
2010	16	U
2017	9	R

@RankZen Banker

We have,

- S was born in an even-numbered year but after 2002.
- P was born two persons before S.

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons
1962	64		
1973	53		
1997	29	P	
2002	24		P
2008	18	S	
2010	16		S
2017	9		

Again, we have,

- T was born either just before or just after P.
- The difference between the age of T and Q is **two more than** the age of R.
- Q is older than T.

Years	Age as on 2026	Case 1	Case 2
		Persons	Persons

Answer: C

6. Questions

Final arrangement:

Floors	Persons
8	B
7	G
6	D
5	A
4	F
3	C
2	H
1	E

@RankZen Banker

We have,

- Four persons live between G and H.
- Neither G nor H lives on the topmost floor or lowermost floor.

From the above conditions, there are two possibilities.

Floors	Case 1	Case 2
	Persons	Persons
8		
7	G	H
6		
5		
4		
3		
2	H	G
1		

Again, we have,

- One person lives between G and A.
- As many persons live above A as below F.
- C lives adjacent to F.

@RankZen Banker

Floors	Case 1	Case 2
	Persons	Persons
8		
7	G	H
6		C
5	A	F
4	F	A
3	C	
2	H	G
1		

Again, we have,

- Only two persons live between C and D.
- B doesn't live on an odd-numbered floor.
- At most one person lives between B and D.

From the above conditions, Case 2 gets eliminated because at most one person lives between B and D, which is not satisfied. Hence, Case 1 is the final arrangement.

@RankZen Banker

Floors	Case 1	Case 2
	Persons	Persons
8	B	B
7	G	H
6	D	C
5	A	F
4	F	A
3	C	D
2	H	G
1	E	E

Answer: A

- One person lives between G and A.
- As many persons live above A as below F.
- C lives adjacent to F.

@RankZen Banker

Floors	Case 1	Case 2
	Persons	Persons
8		
7	G	H
6		C
5	A	F
4	F	A
3	C	
2	H	G
1		

Again, we have,

- Only two persons live between C and D.
- B doesn't live on an odd-numbered floor.
- At most one person lives between B and D.

From the above conditions, Case 2 gets eliminated because at most one person lives between B and D, which is not satisfied. Hence, Case 1 is the final arrangement.

@RankZen Banker

Floors	Case 1	Case 2
	Persons	Persons
8	B	B
7	G	H
6	D	C
5	A	F
4	F	A
3	C	D
2	H	G
1	E	E

Answer: E (The position of no one will remain unchanged)

9. Questions

Final arrangement:

Floors	Persons
8	B
7	G
6	D
5	A
4	F
3	C
2	H
1	E

@RankZen Banker

We have,

- Four persons live between G and H.

- Neither G nor H lives on the topmost floor or lowermost floor.

From the above conditions, there are two possibilities.

Floors	Case 1	Case 2
	Persons	Persons
8		
7	G	H
6		
5		
4		
3		
2	H	G
1		

Again, we have,

- One person lives between G and A.
- As many persons live above A as below F.
- C lives adjacent to F.

@RankZen Banker

Floors	Case 1	Case 2
	Persons	Persons

Answer: D

11. Questions

Final arrangement:

Boxes
M
R
L
O
Q
N
S
P

@RankZen Banker

We have,

- Two boxes are placed between box L and box N.

- Box M is placed two boxes above box L.

From the above conditions, there are two possibilities.

Case 1	Case 2
Boxes	Boxes
M	N
	M
L	
	L
N	

Again, we have,

- As many boxes are placed above box M as below box P.
- At most one box is placed above M.
- Box P is placed below box M.
- Box S is placed immediately above box P.

Case 1	Case 2
Boxes	Boxes
M	N
	M
L	
	L
N	S
S	P
P	

@RankZen Banker

Again, we have,

- Box O is placed above box Q but not above box R.
- Box Q is not placed at the bottommost position.

From the above conditions, Case 2 gets eliminated because the condition that box Q is not placed at the bottommost position is not satisfied. Hence, Case 1 is the final arrangement.

Answer: B

16. Questions

Final arrangement:

@RankZen Banker

We have,

- J sits second from one of the ends.
- Six persons sit between J and V.

From the above conditions, there are two possibilities.

Again, we have,

- The number of persons who sit between T and V is **one more** than the number of persons who sit between J and T.
- O sits second to the right of V.

Again, we have,

- As many persons sit between V and T as sit between O and Z who sits at one of the ends.
- W sits adjacent to Z.
- The number of persons who sit to the left of W is a prime number.

From the above conditions, Case 2 gets eliminated because the number of persons who sit to the left of W is a prime number is not satisfied. Hence, Case 1 shows the final arrangement.

Answer: C

17. Questions

Final arrangement:

We have,

- J sits second from one of the ends.
- Six persons sit between J and V.

From the above conditions, there are two possibilities.

Again, we have,

- The number of persons who sit between T and V is **one more** than the number of persons who sit between J and T.
- O sits second to the right of V.

Again, we have,

- As many persons sit between V and T as sit between O and Z who sits at one of the ends.
- W sits adjacent to Z.
- The number of persons who sit to the left of W is a prime number.

From the above conditions, Case 2 gets eliminated because the number of persons who sit to the left of W is a prime number is not satisfied. Hence, Case 1 shows the final arrangement.

Answer: A

18. Questions

Final arrangement:

We have,

- J sits second from one of the ends.
- Six persons sit between J and V.

From the above conditions, there are two possibilities.

Again, we have,

- The number of persons who sit between T and V is **one more** than the number of persons who sit between J and T.
- O sits second to the right of V.

Again, we have,

- As many persons sit between V and T as sit between O and Z who sits at one of the ends.
- W sits adjacent to Z.
- The number of persons who sit to the left of W is a prime number.

From the above conditions, Case 2 gets eliminated because the number of persons who sit to the left of W is a prime number is not satisfied. Hence, Case 1 shows the final arrangement.

@RankZen Banker

Answer: B

19. Questions

Final arrangement:

We have,

- J sits second from one of the ends.
- Six persons sit between J and V.

From the above conditions, there are two possibilities.

Again, we have,

- The number of persons who sit between T and V is **one more** than the number of persons who sit between J and T.
- O sits second to the right of V.

Again, we have,

- As many persons sit between V and T as sit between O and Z who sits at one of the ends.

@RankZen Banker

- W sits adjacent to Z.
- The number of persons who sit to the left of W is a prime number.

From the above conditions, Case 2 gets eliminated because the number of persons who sit to the left of W is a prime number is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: E

20. Questions

Final arrangement:

We have,

- J sits second from one of the ends.
- Six persons sit between J and V.

From the above conditions, there are two possibilities.

Again, we have,

- The number of persons who sit between T and V is **one more** than the number of persons who sit between J and T.
- O sits second to the right of V.

@RankZen Banker

Again, we have,

- As many persons sit between V and T as sit between O and Z who sits at one of the ends.
- W sits adjacent to Z.
- The number of persons who sit to the left of W is a prime number.

From the above conditions, Case 2 gets eliminated because the number of persons who sit to the left of W is a prime number is not satisfied. Hence, Case 2 shows the final arrangement.

Answer: D

21. Questions

Final arrangement:

@RankZen Banker

Answer: B

22. Questions

Final arrangement:

Answer: D

The shortest distance between point C and point E = $\sqrt{DE + DC} = \sqrt{7 + 8} = \sqrt{49 + 64} = \sqrt{113}$ m.

23. Questions

Final arrangement:

@RankZen Banker

Answer: B

24. Questions

Final arrangement:

Answer: D

@RankZen Banker

The shortest distance between point C and point E = $CD + DE = 8 + 6 = \sqrt{64 + 36} = \sqrt{100} \text{ m} = 10 \text{ m}$.

25. Questions

Final arrangement:

Answer: A (In all the other options the first point is northwest to the second point except in option a)

26. Questions

Answer: D

@RankZen Banker

I). Some smart are not good: Here, all clever are smart and no bad is clever. But there is no direct relation between smart and good. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). All good can be clever: Here, only a few good are bad means some good are bad. Also, 'no bad' is clever. Therefore, that part of good which is associated with bad can never be clever. Hence, all good being clever is not possible. Therefore, the conclusion does not follow.

27. Questions

Answer: C

I). Some papers are not blackboards: Here, only a few papers are books means some papers are books and some papers are not books. Also, some books are not blackboards. But it is not definite that the papers are connected with that part of books which are not blackboards. Hence, the conclusion does not follow.

II). All papers are blackboards: Here, some books are not blackboards and only a few papers are books. Therefore, those papers which are associated with books can be outside blackboards. So, all papers being blackboards is not definite. Hence, the conclusion does not follow.

But, by combining both conclusions I and II, we can say either I or II follows.

28. Questions

Answer: E

I). Some red is not purple: Here, some red are orange and no orange are purple. So, that part of red which is associated with orange is definitely not purple. Hence, some red is not purple. Therefore, the conclusion follows.

II). All violet can be purple : Here, some violet are purple. There is no restriction that the remaining violet cannot be purple. So, all violet can be purple. Hence, the conclusion follows.

29. Questions

Answer: A

I). Some phones being computer is a possibility: Here, all laptops are phones and some laptops are computers. So, that part of computers which is associated with laptops is definitely phones. Therefore, some phones are computers is a definite conclusion. We cannot say a definite conclusion in a possible case. Hence, the conclusion does not follow.

II). Some computer can never be tabs: Here, all laptops are phones, some laptops are computers and no tabs are phones. So, that part of computers which is associated with laptops is definitely phones and therefore can never be tabs. Hence, some computers can never be tabs. Therefore, the conclusion follows.

30. Questions

Answer: D

I). Some red can be pencils: Here, some pens are pencils and all pencils are black. Also, only a few black are red means some black are red and some black are not red. There is no restriction between pencils and red. So, some red can be pencils. Hence, the conclusion follows.

II). Some red are not black: Here, only a few black are red means some black are red and some black are not red. It does not mean that some red are outside black. So, we cannot say some red are not black. Hence, the conclusion does not follow.

Answer: D

36. Questions

Answer: C

Given series: \$ F 5 8 @ N * 2 A ? 7 K ! D 0 % P 4 # T 9 & C ± 1 M = R 6 H

+ is the thirteenth element to the right of the eleventh element from the left end.

37. Questions

Answer: A

Given series: \$ F 5 8 @ N * 2 A ? 7 K ! D 0 % P 4 # T 9 & C + 1 M = R 6 H

There is only one number which is immediately preceded by an alphabet and immediately followed by a number.

38. Questions

Answer: A

Given series: \$ F 5 8 @ N * 2 A ? 7 K ! D 0 % P 4 # T 9 & C + 1 M = R 6 H

If all the numbers are dropped from the given series then,

Required series: \$ F @ N * A ? K ! D % P # T & C + M = R H

! is the element which is ninth from the left end.

39. Questions

Answer: E

Given series: \$ F 5 8 @ N * 2 A ? 7 K ! D 0 % P 4 # T 9 & C + 1 M = R 6 H

There are five symbols between the fifth element, i.e., M from the right end and the eleventh element, i.e., 7 from the left end, in the given series.

40. Questions

Answer: D

Given series: \$ F 5 8 @ N * 2 A ? 7 K ! D 0 % P 4 # T 9 & C + 1 M = R 6 H

If the first fifteen elements are arranged in reverse order, then

Required series: 0 D ! K 7 ? A 2 * N @ 8 5 F \$ % P 4 # T 9 & C + 1 M = R 6 H

? is the twenty-fifth element from the right end in the given series.

@RankZen Banker
