

1. Questions

Study the following information carefully and answer the given questions.

Eight persons are sitting in two parallel rows containing four persons each in such a way that there is an equal distance between adjacent persons. In row 1: A, B, C and D are seated and all of them are facing north. In row 2: P, Q, R and S are seated and all of them are facing south. Each person in row 1 faces another person in row 2.

D faces the one who sits second to the left of Q. One person sits between Q and P. As many persons sit to the right of P as to the right of C. R does not sit at any extreme ends. A neither faces S nor sits adjacent to B.

Who among the following person sits diagonally opposite to Q as per the final arrangement?

- a. Either A or C
- b. C
- c. A
- d. D
- e. B

2. Questions

Which of the following statement(s) is/are TRUE regarding B as per the final arrangement?

I). B sits at one of the extreme ends

II). B faces the one who sits second to the left of R

III). P faces B

- a. Only I
- b. Only I and II
- c. Only II and III
- d. All I, II and III
- e. None of these

@RankZen Banker

3. Questions

Which of the following pairs of persons sit adjacent to the one who faces D?

- a. P and Q
- b. Q and R
- c. R and S
- d. Q and S
- e. None of these

4. Questions

How many persons sit to the right of S as per the final arrangement?

- a. None
- b. One
- c. Three
- d. Can't be determined
- e. Two

5. Questions

If all the persons are made to sit in the English alphabetical order from left to right in row 1, then who among the following persons faces B?

- a. R
- b. Q
- c. The one who sits second to the left of P
- d. S
- e. P

6. Questions

Study the following information carefully and answer the given questions.

Seven people – P, Q, R, S, T, U and V went to the movie on seven different days of the same week, starting from Monday to Sunday. Only one person went to the movie each day.

R went to the movie on one of the days after Friday. As many persons went before R as after U. P went to the movie immediately after U. Three persons went to the movie between P and T. S went to the movie on one of the days after Q but before V. Q does not go to the movie on Wednesday.

Who among the following persons went to the movie on Saturday as per the final arrangement?

- a. P
- b. T
- c. R
- d. V
- e. U

@RankZen Banker

7. Questions

Four of the following are alike in a certain way based on the final arrangement and thus form a group, then which one of the following does not belong to the group?

- a. RT
- b. QR
- c. UP
- d. PS
- e. VR

8. Questions

How many persons went to the movie after U?

- a. None
- b. More than three
- c. Two
- d. Three
- e. One

9. Questions

Who among the following persons went to the movie between P and R as per the final arrangement?

- a. Only Q
- b. Only U and S
- c. Only, T
- d. Only S and V
- e. Only U, V and S

10. Questions

P went to the movie on which of the following day?

- a. Wednesday
- b. Thursday
- c. Friday
- d. Saturday
- e. Sunday

@RankZen Banker

11. Questions

Study the following information carefully and answer the given questions.

Eight persons – L, M, N, O, P, Q, R and S are sitting in a linear row and facing the north.

O sits at one of the ends. Two persons sit between O and P. R sits to the immediate right of P. M sits third to the left of R. The number of persons who sit between O and M is equal to the number of persons who sit between R and L. One person sits between L and Q. N doesn't sit to the left of S.

Who among the following person sits fifth to the left of Q?

- a. O
- b. S
- c. M
- d. L
- e. P

12. Questions

If all the persons are made to sit in alphabetical order from the left end, then how many persons will remain unchanged in their position?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

13. Questions

What is the position of O with respect to R with respect to the final arrangement?

- a. Fifth to the left
- b. Sixth to the right
- c. Fourth to the left
- d. Third to the left
- e. Fifth to the right

@RankZen Banker

14. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. SO
- b. RN
- c. QN
- d. MP

e. LP

15. Questions

Who among the following persons sits between M and R?

- a. Only N
- b. Only O, S and Q
- c. Only P
- d. Only S and Q
- e. Only S and P

16. Questions

Study the following information carefully and answer the given questions.

Eight persons - A, B, C, D, E, F, G and H live on eight different floors of an eight-storeyed building where the bottommost floor is numbered as one, the one just above it is numbered as two and so on till the topmost floor is numbered as eight. Only one person lives on each floor.

A lives on an even-numbered floor but below the 5th floor. Three persons live between A and B. As many persons live above B as below C. D lives two floors above C. H lives immediately above E, who doesn't live on an odd-numbered floor. G lives on one of the floors above F.

Who among the following person lives on the topmost floor?

- a. B
- b. D
- c. F
- d. C
- e. G

17. Questions

How many persons live between A and D as per the final arrangement?

- a. One
- b. Three
- c. None
- d. More than three
- e. Two

18. Questions

If all the persons are made to live in alphabetical order from the topmost to bottommost floor, then

how many persons will remain unchanged in their position?

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

19. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. H
- b. B
- c. G
- d. D
- e. C

20. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

- a. E lives on the second floor
- b. Only two persons live between F and C
- c. G lives immediately above B
- d. H lives on the topmost floor
- e. F lives on an even-numbered floor

21. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements:

Only a few laptops are computers

All computers are desktops

Some desktops are LED

Conclusions:

I). Some laptops can be desktops

II). All computers can be LED

- a. Only conclusion I follows
- b. Either conclusion I or II follows
- c. Both conclusions I and II follow
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

22. Questions

Statements:

Some days are hard

Some hard are good

Only a few good are soft

Conclusions:

I). All days are good

II). Some days are not good

- a. Only conclusion I follows
- b. Either conclusion I or II follows
- c. Both conclusions I and II follow
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

23. Questions

Statements:

Only a few pens are pencils

Some pencils are crayons

All crayons are colourful

Conclusions:

I). All pens can never be crayons

II). Some pencils are not pens

- a. Only conclusion I follows
- b. Either conclusion I or II follows
- c. Both conclusions I and II follow

@RankZen Banker

- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

24. Questions

Statements:

Only a few solids are shapes

Only shapes are rigid

Few solids are liquids

Conclusions:

I). All shapes can be solids

II). Few shapes are liquids

- a. Only conclusion I follows
- b. Either conclusion I or II follows
- c. Both conclusions I and II follow
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

25. Questions

Statements:

Some pens are pencils

All pencils are black

Only a few black are red

Conclusions:

I). Some red can be pencils

II). Some red are not black

- a. Only conclusion I follows
- b. Either conclusion I or II follows
- c. Both conclusions I and II follow
- d. Neither conclusion I nor II follows
- e. Only conclusion II follows

@RankZen Banker

26. Questions

Study the following information carefully and answer the given questions.

A 7 D 2 G 9 J 4 M 1 P 8 S 5 V Y 3 6 B 8 E H K N 4 F L 9 A 2 Y

Which of the following elements is sixth to the right of the thirteenth element from the left end in the given series?

- a. 8
- b. B
- c. Y
- d. 3
- e. 6

27. Questions

How many consonants are there in the given series which are immediately followed by a number and immediately preceded by a consonant?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

28. Questions

If all the odd numbers are dropped from the given series, then which of the following elements is fifteenth from the right end?

- a. S
- b. 6
- c. E
- d. V
- e. 8

@RankZen Banker

29. Questions

How many such vowels are there in the given series which are immediately preceded as well as immediately followed by a number?

- a. One
- b. Two
- c. Three
- d. More than three

e. None

30. Questions

What is the sum of the even numbers which are immediately followed by a consonant in the given series?

- a. 26
- b. 16
- c. 22
- d. 18
- e. 28

31. Questions

Study the following information carefully and answer the given questions.

Jaanu starts walking from point P in the north direction and walks for 10m to reach Point Q. After reaching point Q, she turns right and walks for another 15m to reach point R. From there she takes two consecutive right turns and walks for 8m and 5m to reach point S and point T respectively. From point T she takes left turns and walks for 12m to reach point U. Now from there she takes a right turn and walks for 14m to reach point V. Point V is her final destination.

What is the direction of her final destination from her starting point?

- a. South
- b. Northwest
- c. Southwest
- d. North
- e. Northeast

32. Questions

What is the shortest distance between point Q and point S?

- a. $\sqrt{288}$ m
- b. 17m
- c. $18\sqrt{2}$ m
- d. 15m
- e. $\sqrt{225}$ m

@RankZen Banker

33. Questions

Study the following information carefully and answer the given questions.

Point A is 8m east of point B. Point C is 12m south of point B and 12m west of point D. Point E is 9m north of point D. Point F is 8m west of point E and 10m south of point G.

What is the direction of point G with respect to point A?

- a. South
- b. Northwest
- c. Southwest
- d. North
- e. Southeast

34. Questions

If Z is south of point A and west of point E, then what is the distance between point F and point Z?

- a. 6m
- b. 3m
- c. 5m
- d. 4m
- e. 7m

35. Questions

What is the shortest distance between point D and point F?

- a. 12m
- b. $\sqrt{145}$ m
- c. $\sqrt{136}$ m
- d. 13m
- e. $\sqrt{225}$ m

36. Questions

Study the following information carefully and answer the given questions.

Seven persons M, N, O, P, Q, R and S have different weights.

S is heavier than P but not heavier than N, who is not the heaviest person. R is heavier than O. M is heavier than R but not heavier than P. As many persons are lighter than R as heavier than N. The one who is second heaviest weighs 98 kg and the one who is fifth heaviest weighs 68kg.

If the sum of the weights of M and S is 164 kg and the sum of the weights of S and P is 173 kg, then what will be the weight of P?

- a. 79 kg

@RankZen Banker

- b. 81 kg
- c. 75 kg
- d. 77 kg
- e. 84 kg

37. Questions

Who among the following person is the heaviest?

- a. M
- b. Q
- c. O
- d. S
- e. None of these

38. Questions

If the sum of the weights of N and P is 180kg, then what may be the weight of S?

- a. 74 kg
- b. 88 kg
- c. Either a or b
- d. 92 kg
- e. Either b or d

39. Questions

Study the following information carefully and answer the given questions.

Six persons A, B, C, D, E, and F have different number of coins.

B has more coins than F but not more than D, who does not have the highest number of coins. A has more coins than F, who has more coins than C. E has more coins than B. A has 54 coins, which is 12 coins less than the coins with B. The person who has the highest number of coins has 75 coins.

How many persons do not have more coins than D?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

40. Questions

Which of the following statement(s) is/are TRUE regarding F?

- More than two persons has less coins than F
- As many persons has less coins than D as more coins than F
- F may have 69 coins
- B has immediately more coins than F
- Two persons have coins between E and F

Explanations:

1. Questions

Final arrangement:

We have,

- D faces the one who sits second to the left of Q.
- One person sits between Q and P.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the right of P as to the right of C.
- R does not sit at any extreme ends.

Again, we have,

- A neither faces S nor sits adjacent to B.

@RankZen Banker

From the above condition, Case 2 gets eliminated because A neither faces S nor sits adjacent to B, which is not satisfied. Hence, Case 1 is the final arrangement.

Answer: E

2. Questions

Final arrangement:

We have,

- D faces the one who sits second to the left of Q.
- One person sits between Q and P.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the right of P as to the right of C.
- R does not sit at any extreme ends.

Again, we have,

- A neither faces S nor sits adjacent to B.

From the above condition, Case 2 gets eliminated because A neither faces S nor sits adjacent to B, which is not satisfied. Hence, Case 1 is the final arrangement.

Answer: B

3. Questions

Final arrangement:

We have,

- D faces the one who sits second to the left of Q.
- One person sits between Q and P.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the right of P as to the right of C.
- R does not sit at any extreme ends.

Again, we have,

- A neither faces S nor sits adjacent to B.

From the above condition, Case 2 gets eliminated because A neither faces S nor sits adjacent to B, which is not satisfied. Hence, Case 1 is the final arrangement.

Answer: C

4. Questions

Final arrangement:

We have,

- D faces the one who sits second to the left of Q.
- One person sits between Q and P.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the right of P as to the right of C.
- R does not sit at any extreme ends.

Again, we have,

- A neither faces S nor sits adjacent to B.

From the above condition, Case 2 gets eliminated because A neither faces S nor sits adjacent to B, which is not satisfied. Hence, Case 1 is the final arrangement.

@RankZen Banker

Answer: C

5. Questions

Final arrangement:

We have,

- D faces the one who sits second to the left of Q.
- One person sits between Q and P.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the right of P as to the right of C.
- R does not sit at any extreme ends.

Again, we have,

- A neither faces S nor sits adjacent to B.

From the above condition, Case 2 gets eliminated because A neither faces S nor sits adjacent to B, which is not satisfied. Hence, Case 1 is the final arrangement.

Answer: A

6. Questions

Final arrangement:

Days	Persons
Monday	Q
Tuesday	U
Wednesday	P
Thursday	S
Friday	V
Saturday	R
Sunday	T

We have,

- R went to the movie on one of the days after Friday.
- As many persons went before R as after U.

From the above conditions, there are two possibilities.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	
Wednesday		
Thursday		
Friday		
Saturday	R	
Sunday		R

Again, we have,

- P went to the movie immediately after U.
- Three persons went to the movie between P and T.

@RankZen Banker

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	P
Wednesday	P	
Thursday		
Friday		
Saturday	R	T
Sunday	T	R

Again, we have,

- S went to the movie on one of the days after Q but before V.
- Q does not go to the movie on Wednesday.

From the above conditions, Case 2 gets eliminated because Q does not go for the movie on Wednesday, which is not satisfied. Hence, Case 1 is the final arrangement.

Days	Case 1	Case 2
	Persons	Persons
Monday	Q	U
Tuesday	U	P
Wednesday	P	Q
Thursday	S	S
Friday	V	V
Saturday	R	T
Sunday	T	R

@RankZen Banker

Answer: C

7. Questions

Final arrangement:

Days	Persons
Monday	Q
Tuesday	U
Wednesday	P
Thursday	S
Friday	V
Saturday	R
Sunday	T

We have,

- R went to the movie on one of the days after Friday.
- As many persons went before R as after U.

From the above conditions, there are two possibilities.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	
Wednesday		
Thursday		
Friday		
Saturday	R	
Sunday		R

Again, we have,

- P went to the movie immediately after U.
- Three persons went to the movie between P and T.

@RankZen Banker

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	P
Wednesday	P	
Thursday		
Friday		
Saturday	R	T
Sunday	T	R

Again, we have,

- S went to the movie on one of the days after Q but before V.
- Q does not go to the movie on Wednesday.

From the above conditions, Case 2 gets eliminated because Q does not go for the movie on Wednesday, which is not satisfied. Hence, Case 1 is the final arrangement.

Days	Case 1	Case 2
	Persons	Persons
Monday	Q	U
Tuesday	U	P
Wednesday	P	Q
Thursday	S	S
Friday	V	V
Saturday	R	T
Sunday	T	R

@RankZen Banker

Answer: B (In all the other options, the first person went to the movie immediately before the second person, except in option b)

8. Questions

Final arrangement:

Days	Persons
Monday	Q
Tuesday	U
Wednesday	P
Thursday	S
Friday	V
Saturday	R
Sunday	T

We have,

- R went to the movie on one of the days after Friday.
- As many persons went before R as after U.

From the above conditions, there are two possibilities.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	
Wednesday		
Thursday		
Friday		
Saturday	R	
Sunday		R

Again, we have,

- P went to the movie immediately after U.

@RankZen Banker

- Three persons went to the movie between P and T.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	P
Wednesday	P	
Thursday		
Friday		
Saturday	R	T
Sunday	T	R

Again, we have,

- S went to the movie on one of the days after Q but before V.
- Q does not go to the movie on Wednesday.

From the above conditions, Case 2 gets eliminated because Q does not go for the movie on Wednesday, which is not satisfied. Hence, Case 1 is the final arrangement.

Days	Case 1	Case 2
	Persons	Persons
Monday	Q	U
Tuesday	U	P
Wednesday	P	Q
Thursday	S	S
Friday	V	V
Saturday	R	T
Sunday	T	R

@RankZen Banker

Answer: B

9. Questions

Final arrangement:

Days	Persons
Monday	Q
Tuesday	U
Wednesday	P
Thursday	S
Friday	V
Saturday	R
Sunday	T

We have,

- R went to the movie on one of the days after Friday.
- As many persons went before R as after U.

From the above conditions, there are two possibilities.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	
Wednesday		
Thursday		
Friday		
Saturday	R	
Sunday		R

Again, we have,

- P went to the movie immediately after U.

@RankZen Banker

- Three persons went to the movie between P and T.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	P
Wednesday	P	
Thursday		
Friday		
Saturday	R	T
Sunday	T	R

Again, we have,

- S went to the movie on one of the days after Q but before V.
- Q does not go to the movie on Wednesday.

From the above conditions, Case 2 gets eliminated because Q does not go for the movie on Wednesday, which is not satisfied. Hence, Case 1 is the final arrangement.

Days	Case 1	Case 2
	Persons	Persons
Monday	Q	U
Tuesday	U	P
Wednesday	P	Q
Thursday	S	S
Friday	V	V
Saturday	R	T
Sunday	T	R

@RankZen Banker

Answer: D

10. Questions

Final arrangement:

Days	Persons
Monday	Q
Tuesday	U
Wednesday	P
Thursday	S
Friday	V
Saturday	R
Sunday	T

We have,

- R went to the movie on one of the days after Friday.
- As many persons went before R as after U.

From the above conditions, there are two possibilities.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	
Wednesday		
Thursday		
Friday		
Saturday	R	
Sunday		R

Again, we have,

- P went to the movie immediately after U.

@RankZen Banker

- Three persons went to the movie between P and T.

Days	Case 1	Case 2
	Persons	Persons
Monday		U
Tuesday	U	P
Wednesday	P	
Thursday		
Friday		
Saturday	R	T
Sunday	T	R

Again, we have,

- S went to the movie on one of the days after Q but before V.
- Q does not go to the movie on Wednesday.

From the above conditions, Case 2 gets eliminated because Q does not go for the movie on Wednesday, which is not satisfied. Hence, Case 1 is the final arrangement.

Days	Case 1	Case 2
	Persons	Persons
Monday	Q	U
Tuesday	U	P
Wednesday	P	Q
Thursday	S	S
Friday	V	V
Saturday	R	T
Sunday	T	R

@RankZen Banker

Answer: A

11. Questions

Final arrangement:

We have,

- O sits at one of the ends.
- Two persons sit between O and P.

From the above conditions, there are two possibilities:

Again, we have,

- R sits to the immediate right of P.
- M sits third to the left of R.

Again, we have,

- The number of persons who sit between O and M is **equal to** the number of persons who sit between R and L.
- One person sits between L and Q.
- N doesn't sit to the left of S.

From the above conditions, Case 2 gets eliminated because the condition that "one person sits between L and Q" is not satisfied. Hence, Case 1 is the final arrangement.

Answer: B

12. Questions

Final arrangement:

We have,

- O sits at one of the ends.
- Two persons sit between O and P.

From the above conditions, there are two possibilities:

Again, we have,

- R sits to the immediate right of P.
- M sits third to the left of R.

Again, we have,

- The number of persons who sit between O and M is **equal to** the number of persons who sit between R and L.
- One person sits between L and Q.
- N doesn't sit to the left of S.

From the above conditions, Case 2 gets eliminated because the condition that "one person sits between L and Q" is not satisfied. Hence, Case 1 is the final arrangement.

Answer: A (Only the position of M remains unchanged.)

13. Questions

Final arrangement:

We have,

- O sits at one of the ends.
- Two persons sit between O and P.

From the above conditions, there are two possibilities:

Again, we have,

- R sits to the immediate right of P.
- M sits third to the left of R.

Again, we have,

- The number of persons who sit between O and M **is equal to** the number of persons who sit between R and L.
- One person sits between L and Q.
- N doesn't sit to the left of S.

From the above conditions, Case 2 gets eliminated because the condition that "one person sits between L and Q" is not satisfied. Hence, Case 1 is the final arrangement.

Answer: C

14. Questions

Final arrangement:

We have,

- O sits at one of the ends.
- Two persons sit between O and P.

From the above conditions, there are two possibilities:

Again, we have,

- R sits to the immediate right of P.
- M sits third to the left of R.

Again, we have,

- The number of persons who sit between O and M **is equal to** the number of persons who sit between R and L.
- One person sits between L and Q.
- N doesn't sit to the left of S.

From the above conditions, Case 2 gets eliminated because the condition that "one person sits between L and Q" is not satisfied. Hence, Case 1 is the final arrangement.

Answer: C (In all the other options, one person sits between the given pairs of persons except in option c)

15. Questions

Final arrangement:

We have,

- O sits at one of the ends.
- Two persons sit between O and P.

From the above conditions, there are two possibilities:

Again, we have,

- R sits to the immediate right of P.
- M sits third to the left of R.

Again, we have,

- The number of persons who sit between O and M **is equal to** the number of persons who sit between R and L.
- One person sits between L and Q.
- N doesn't sit to the left of S.

From the above conditions, Case 2 gets eliminated because the condition that "one person sits between L and Q" is not satisfied. Hence, Case 1 is the final arrangement.

Answer: E

16. Questions

Final arrangement:

Floors	Persons
8	B
7	H
6	E
5	G
4	A
3	D
2	F
1	C

We have,

- A lives on an even-numbered floor but below the 5th floor.
- Three persons live between A and B.

From the above conditions, there are two possibilities.

Floors	Case 1	Case 2
	Persons	Persons
8	B	
7		
6		B
5		
4	A	
3		
2		A
1		

Again, we have ,

@RankZen Banker

- As many persons live above B as below C.
- D lives two floors above C.

Floors	Case 1	Case 2
	Persons	Persons
8	B	
7		
6		B
5		D
4	A	
3	D	C
2		A
1	C	

Again, we have ,

- H lives immediately above E who doesn't live on an odd-numbered floor.
- G lives on one of the floors above F.

From the above conditions Case 2 gets eliminated because “H lives immediately above E who doesn't live on an odd-numbered floor” is not satisfied. Hence, Case 1 is the final arrangement.

@RankZen Banker

Floors	Case 1	Case 2
	Persons	Persons
8	B	
7	H	
6	E	B
5	G	D
4	A	
3	D	C
2	F	A
1	C	

Answer: A

17. Questions

Final arrangement:

Floors	Persons
8	B
7	H
6	E
5	G
4	A
3	D
2	F
1	C

@RankZen Banker

We have,

- A lives on an even-numbered floor but below the 5th floor.

- Three persons live between A and B.

From the above conditions, there are two possibilities.

Floors	Case 1	Case 2
	Persons	Persons
8	B	
7		
6		B
5		
4	A	
3		
2		A
1		

Again, we have ,

- As many persons live above B as below C.
- D lives two floors above C.

@RankZen Banker

Floors	Case 1	Case 2
	Persons	Persons
8	B	
7		
6		B
5		D
4	A	
3	D	C
2		A
1	C	

Again, we have ,

- H lives immediately above E who doesn't live on an odd-numbered floor.
- G lives on one of the floors above F.

From the above conditions Case 2 gets eliminated because “H lives immediately above E who doesn't live on an odd-numbered floor” is not satisfied. Hence, Case 1 is the final arrangement.

@RankZen Banker

3	D	C
2	F	A
1	C	

Answer: E

21. Questions

Answer: E

I). Some laptops can be desktops: Here, only a few laptops are computers means some laptops are definitely computers, and all computers are desktops. Therefore, some laptops are definitely desktops. Since the conclusion is framed as a possibility ("can be"), whereas the relationship is already definite, such a possibility conclusion is not accepted. Hence, the conclusion does not follow.

II). All computers can be LED: Here, all computers are desktops and some desktops are LED. There is no negative relation between computers and LED. It is possible to place all computers within the LED portion of desktops without violating any statement. Hence, the conclusion follows.

22. Questions

Answer: B

I). All days are good: Here, some days are hard and some hard are good. The two "some" statements need not refer to the same hard elements. Therefore, we cannot conclude that all days are good. Hence, the conclusion does not follow.

II). Some days are not good: Here, some days are hard, but there is no definite relation between days and good. The days that are hard may or may not be good. Hence, we cannot conclude that some days are not good. Therefore, the conclusion does not follow.

But, by combining both conclusions I and II, we can say either I or II follows.

23. Questions

Answer: D

I). All pens can never be crayons: Here, only a few pens are pencils means some pens are pencils. Also, some pencils are crayons. There is no negative relation between pens and crayons. It is possible that the pens which are pencils are also crayons. Therefore, all pens being crayons is also possible. Hence, we cannot say that all pens can never be crayons. Therefore, the conclusion does not follow.

II). Some pencils are not pens : Here, only a few pens are pencils means some pens are pencils and some pens are not pencils. It does not imply that some pencils are not pens. The statement gives information about pens, not about all pencils. Also, "some pencils are crayons" does not help establish any relation with pens. Hence, the conclusion does not follow.

24. Questions

Answer: D

@RankZen Banker

I). All shapes can be solids: Here, only a few solids are shapes means some solids are shapes and some solids are not shapes. Also, only shapes are rigid which implies that all rigid are shapes and rigid is only related to shapes. So, the part of shapes which are rigid can never be solids (neither in definite case nor in

possibility). Therefore, the conclusion does not follow.

II). Few shapes are liquids: Here, few solids are liquids and only a few solids are shapes. There is no definite relation between the solids that are shapes and the solids that are liquids. They may or may not overlap. Hence, we cannot conclude that few shapes are liquids. Therefore, the conclusion does not follow.

25. Questions

Answer: A

I). Some red can be pencils: Here, some pens are pencils and all pencils are black. Also, only a few black are red means some black are red and some black are not red. There is no negative relation between pencils and red. Therefore, pencils can be placed in the common part of black and red. Hence, some red can be pencils. Therefore, the conclusion follows.

II). Some red are not black: Here, only a few black are red means some black are red and some black are not red. It does not mean that some red are outside black. The statement gives information only about black, not about all red. Therefore, we cannot conclude that some red are not black. Hence, the conclusion does not follow.

26. Questions

Answer: B

Given: A 7 D 2 G 9 J 4 M 1 P 8 S 5 V Y 3 6 B 8 E H K N 4 F L 9 A 2 Y

B is sixth to the right of the thirteenth element from the left end.

27. Questions

Answer: C

Given: A 7 D 2 G 9 J 4 M 1 P 8 S 5 V Y 3 6 B 8 E H K N 4 F L 9 A 2 Y

There are three consonants in the given series which are immediately followed by a number and immediately preceded by a consonant.

28. Questions

Answer: D

Given: A 7 D 2 G 9 J 4 M 1 P 8 S 5 V Y 3 6 B 8 E H K N 4 F L 9 A 2 Y

If all the odd numbers are dropped from the given series, then,

Required series: A D 2 G J 4 M P 8 S V Y 6 B 8 E H K N 4 F L A 2 Y

V is fifteenth from the right end.

29. Questions

Answer: A

Given: A 7 D 2 G 9 J 4 M 1 P 8 S 5 V Y 3 6 B 8 E H K N 4 F L 9 A 2 Y

There is only one vowel in the given series which is immediately preceded as well as immediately followed by a number.

30. Questions

Answer: A

Given: A 7 D **2** G 9 J **4** M 1 P **8** S 5 V Y 3 **6** B 8 E H K N **4** F L 9 A **2** Y

Required sum – $2 + 4 + 8 + 6 + 4 + 2 = 26$

31. Questions

Final arrangement:

Answer: C

32. Questions

Final arrangement:

@RankZen Banker

Answer: B

$$(QS = \sqrt{15^2 + 8^2} = \sqrt{225 + 64} = \sqrt{289} = 17\text{m})$$

33. Questions

Final arrangement:

@RankZen Banker

Answer: B

34. Questions

Final arrangement:

Answer: D

@RankZen Banker

35. Questions

Final arrangement:

Answer: B

@RankZen Banker

$$(DF = \sqrt{8^2 + 9^2} = \sqrt{64 + 81} = \sqrt{145}m)$$

36. Questions

Final arrangement

Q > N (98 kg) > S > P > M (68 kg) > R > O

- S is heavier than P but not heavier than N, who is not the heaviest person.
- R is heavier than O.

From the above conditions we get the following:

Q > N > S > P and R > O

Again, we have,

- M is heavier than R but not heavier than P.
- As many persons are lighter than R as heavier than N.
- The one who is second heaviest weighs 98 kg and the one who is fifth heaviest weighs 68 kg.

From the above conditions finally, we get:

Q > N (98kg) > S > P > M (68 kg) > R > O

Answer: D

$$(M (68 \text{ kg}) + S = 164 \text{ kg}; 164 \text{ kg} - 68 \text{ kg} = S (96 \text{ kg}))$$

$$S (96 \text{ kg}) + P = 173 \text{ kg}; 173 \text{ kg} - 96 \text{ kg} = P (77 \text{ kg})$$

37. Questions

Final arrangement

Q > N (98 kg) > S > P > M (68 kg) > R > O

- S is heavier than P but not heavier than N, who is not the heaviest person.
- R is heavier than O.

@RankZen Banker

From the above conditions we get the following:

$Q > N > S > P$ and $R > O$

Again, we have,

- M is heavier than R but not heavier than P.
- As many persons are lighter than R as heavier than N.
- The one who is second heaviest weighs 98 kg and the one who is fifth heaviest weighs 68kg.

From the above conditions finally, we get:

$Q > N (98\text{kg}) > S > P > M (68 \text{ kg}) > R > O$

Answer: B

38. Questions

Final arrangement

$Q > N (98 \text{ kg}) > S > P > M (68 \text{ kg}) > R > O$

- S is heavier than P but not heavier than N, who is not the heaviest person.
- R is heavier than O.

From the above conditions we get the following:

$Q > N > S > P$ and $R > O$

Again, we have,

- M is heavier than R but not heavier than P.
- As many persons are lighter than R as heavier than N.
- The one who is second heaviest weighs 98 kg and the one who is fifth heaviest weighs 68kg.

From the above conditions finally, we get:

$Q > N (98\text{kg}) > S > P > M (68 \text{ kg}) > R > O$

Answer: E

$(N (98 \text{ kg}) + P = 180 \text{ kg}; 180 \text{ kg} - 98 \text{ kg} = P (82\text{kg})$

$Q > N (98 \text{ kg}) > S > P (82 \text{ kg}) > M (68 \text{ kg}) > R > O$

The weight of S is between 98 kg and 82 kg.

39. Questions

Final arrangement

$E (75) > D > B (66) > A (54) > F > C$

- B has more coins than F but not more than D, who does not have the highest number of coins.

From the above conditions, we get the following:

$E > D > B > F$

Again, we have,

@RankZen Banker

- A has more coins than F, who has more coins than C.

$A > F > C$

Again, we have,

- E has more coins than B.
- A has 54 coins, which is 12 coins less than the coins with B.
- The person who has the highest number of coins has 75 coins.

$E (75) > D > B (66) > A (54) > F > C$

Answer: D

40. Questions

Final arrangement

$E (75) > D > B (66) > A (54) > F > C$

- B has more coins than F but not more than D, who does not have the highest number of coins.

From the above conditions, we get the following:

$_ > D > B > F$

Again, we have,

- A has more coins than F, who has more coins than C.

$A > F > C$

Again, we have,

- E has more coins than B.
- A has 54 coins, which is 12 coins less than the coins with B.
- The person who has the highest number of coins has 75 coins.

$E (75) > D > B (66) > A (54) > F > C$

Answer: B

@RankZen Banker
