

1. Questions

Study the following information carefully and answer the given questions.

Ten persons are sitting in two parallel rows containing five persons each in such a way that there is an equal distance between adjacent persons. In row 1: A, B, C, D, and E are seated, and all of them are facing north. In row 2: P, Q, R, S, and T are seated, and all of them are facing south. Each person in row 1 faces another person in row 2.

One person sits between A and the one who faces R. The number of persons who sit to the left of A is equal to the number of persons who sit to the right of A. R sits adjacent to the one who faces E. T faces the one who sits third to the right of C. P sits third to the right of Q. B does not sit at any end of the row.

What is the position of C with respect to E as per the final arrangement?

- a. Third to the right
- b. Second to the right
- c. Third to the left
- d. Immediate right
- e. Immediate left

2. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. E sits opposite to P
- b. E sits third to the right of C
- c. B is an immediate neighbour of the one who sits opposite to S
- d. Both a) and c)
- e. None is true

3. Questions

How many persons sit to the right of T as per the final arrangement?

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

@RankZen Banker

4. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form

a group. Which one of the following does not belong to the group?

- a. R
- b. A
- c. Q
- d. C
- e. D

5. Questions

_____ sits to the immediate left of the one who faces Q as per the final arrangement.

- a. The one who sits to the immediate right of A
- b. C
- c. E
- d. The one who sits opposite to S
- e. D

6. Questions

Study the following information carefully and answer the given questions.

Eight people – A, B, C, D, E, F, G, and H buy a movie ticket one after another on different occasions. It is assumed that no other people buy a ticket other than the given people.

Only two people buy tickets between A and F. The number of people who buy tickets before A is **one less than** the number of people who buy tickets after A. Only three people buy tickets between F and E. G buys a ticket four people before D, but neither of them buys a ticket at the first or the last position. Only two people buy tickets between B and H, who does not buy the tickets after F.

Which of the following statement is TRUE with respect to the final arrangement?

- a. Only three people buy tickets between B and C
- b. Both E and F bought their tickets consecutively
- c. C is not the last person to buy the tickets
- d. More than one person buys tickets between G and E
- e. None of these

@RankZen Banker

7. Questions

If all the persons are arranged in alphabetical order starting from first to last, then how many persons remain at the same position?

- a. Two

- b. More than three
- c. Three
- d. No one
- e. One

8. Questions

How many people buy tickets between C and E as per the final arrangement?

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

9. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. C-G
- b. H-D
- c. F-B
- d. A-H
- e. D-E

10. Questions

A buys the ticket ____ B as per the final arrangement.

- a. Three persons after
- b. Four persons before
- c. Two persons after
- d. Four persons after
- e. None of these

@RankZen Banker

11. Questions

Study the following information carefully and answer the questions below

Eight boxes, viz., M, N, O, P, Q, R, S, and T, are kept one above another in a stack. It is assumed that no other boxes are kept in the stack other than the given boxes.

Only three boxes are placed between box Q and box M. Box Q is neither placed at the bottom nor above box M. Box S is placed two boxes below box Q. Box O is placed immediately above box S. The number of boxes placed above box O is **one less than** the number of boxes placed below box P. One box is placed between box P and box N. Box R is placed below box N but above box T.

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. P-N
- b. Q-S
- c. T-O
- d. T-Q
- e. M-R

12. Questions

Which of the following boxes is kept fourth from the bottom of the stack as per the final arrangement?

- a. Box M
- b. The box which is kept immediately above box Q
- c. Box S
- d. The box which is kept two boxes above box N
- e. None of these

13. Questions

As many boxes kept below box T as above ____.

- a. The box which is kept two boxes below box M
- b. Box N
- c. The box which is kept immediately above box O
- d. Box R
- e. Both a and d

@RankZen Banker

14. Questions

Which of the following boxes is kept exactly in the middle of R and S as per the final arrangement?

- a. Box P
- b. Box N
- c. Box Q

- d. Box S
- e. None of these

15. Questions

How many boxes are kept between box P and box R as per the final arrangement?

- a. As many boxes are kept between box T and box S
- b. None
- c. As many boxes as are kept below box T
- d. One
- e. Four

16. Questions

Study the following information carefully and answer the questions below

Seven persons - A, B, C, D, E, F and G are sitting around a circular table in such a way that some of them are facing the centre while some of them are facing outside (**opposite to the centre**). Not more than two adjacent persons face the same direction. The number of persons who face outside the centre is **more than** the number of persons who face inside the centre.

A sits third to the right of B. As many persons sit between A and B as between B and C, when counted from right of B and left of C respectively. D sits second to the right of C. E and F sit to the immediate right of each other. The immediate neighbours of C face the opposite direction to C. G does not face outside. E and D do not face the same direction as G.

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. B
- b. D
- c. A
- d. F
- e. E

@RankZen Banker

17. Questions

What is the position of C with respect to A as per the final arrangement?

- a. Immediate left
- b. Immediate right
- c. Third to the left
- d. Third to the right

e. Second to the left

18. Questions

_____ sits fourth to the right of B as per the final arrangement.

- a. F
- b. B
- c. C
- d. E
- e. None of these

19. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- I). G faces the same direction as the one who sits second to the left of C
 - II). G sits exactly between B and D
 - III). Only three persons sit between B and F, when counted from the left of F.
- a. Only I and II
 - b. Only II and III
 - c. Only I
 - d. Only II
 - e. Only III

20. Questions

Who sits third to the left of the one who sits second to the left of D as per the final arrangement?

- a. The Person who sits second to the right of G
- b. The Person who sits third to the right of A
- c. The Person who sits fourth to the right of E
- d. The Person who sits second to the left of G
- e. None of these

@RankZen Banker

21. Questions

Study the following information carefully and answer the given questions.

D I & U V # \$ * H B H J * G % S C B G H B D H A @ B R B Y W M A E

How many such letters are in the given series, each of which is immediately preceded by a symbol and immediately followed by a vowel?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

22. Questions

Which of the following is the seventeenth letter to the right of the fifth symbol from the right end as per the given series?

- a. G
- b. B
- c. Y
- d. R
- e. H

23. Questions

If we remove all the vowels from the given series, then how many symbols are immediately followed by a letter and immediately preceded by a symbol as per the given series?

- a. One
- b. Two
- c. Three
- d. Four
- e. More than four

24. Questions

If we remove all the consonants, then which among the following element is third to the right of the element, which is third from the left end, as per the given series?

- a. %
- b. #
- c. *
- d. U
- e. A

25. Questions

If all the symbols are removed from the series, then which of the following element is 14th from the right end of the series as per the given series?

- a. D
- b. U
- c. V
- d. G
- e. R

26. Questions

Study the following information carefully and answer the given questions.

534 827 196 473 682

If 1 is added to the first digit of each number (from the left end) and 1 is subtracted from the last digit of each number (from the left end), then which will be the second-highest number after the rearrangement?

- a. 827
- b. 534
- c. 196
- d. 682
- e. 473

27. Questions

If all the digits in each of the numbers are added together, which number will have the lowest sum?

- a. 534
- b. 196
- c. 827
- d. 473
- e. 682

@RankZen Banker

28. Questions

If the first and the third digits of each number (from the left) are interchanged, then all the numbers are arranged in ascending order from the left end. Then which of the following will be the third number from the right end?

- a. 827
- b. 534

- c. 196
- d. 682
- e. 473

29. Questions

What is the difference between the product of the first and last digit of the highest number and the product of the first and last digit of the lowest number?

- a. 18
- b. 40
- c. 50
- d. 41
- e. 35

30. Questions

If each even digit in each number is increased by 1, then how many numbers will be divisible by 3?

- a. None
- b. Two
- c. Three
- d. Four
- e. One

31. Questions

In the given questions, the relationship between different elements is shown in the statements, followed by some conclusions. Find the conclusion that is definitely true.

Statements:

$$Z = Y > K < J \geq N, A < D = C \leq I \leq N$$

Conclusions:

I). $J \geq D$

II). $Z > I$

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Neither conclusion I nor II is true
- d. Only conclusion II is true

@RankZen Banker

e. Both conclusions I and II are true

32. Questions

Statements:

$K < Z \leq U < V$; $W \geq K > Y = A$

Conclusions:

I). $Y < V$

II). $W > U$

- a. Both conclusions I and II are true
- b. Either conclusion I or II is true
- c. Neither conclusion I nor II is true
- d. Only conclusion II is true
- e. Only conclusion I is true

33. Questions

Statements:

$Z \leq U < F = V$; $T \geq P > F \leq M$

Conclusions:

I). $T > U$

II). $Z < P$

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Neither conclusion I nor II is true
- d. Both conclusions I and II are true
- e. Only conclusion II is true

@RankZen Banker

34. Questions

Statements:

$H < Z \leq U < R$; $W \geq H > Y = A$

Conclusions:

I). $Y > R$

II). $A < R$

- a. Both conclusions I and II are true

- b. Either conclusion I or II is true
- c. Only conclusion II is true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

35. Questions

Statements:

$Q = L > J \geq H < G, I = G \leq F > D \geq E$

Conclusions:

I). $H > E$

II). $L > D$

- a. Both conclusions I and II are true
- b. Neither conclusion I nor II is true
- c. Either conclusion I or II is true
- d. Only conclusion I is true
- e. Only conclusion II is true

36. Questions

If it is possible to make a four-letter meaningful English word with the 1st, 4th, 5th, and 7th letters (from left) of the word 'DOWNLOAD', what would be the fourth letter of that word from the right? If more than one such meaningful word can be formed, give 'X' as your answer. If no such meaningful word can be formed, give 'Z' as your answer.

- a. X
- b. Z
- c. D
- d. L
- e. A

@RankZen Banker

37. Questions

If in the 10-digit number "7294635184", the positions of the first and the tenth digits are interchanged, the positions of the second and ninth digits are interchanged, and so on until the positions of the fifth and sixth digits are interchanged. After making these rearrangements, all the odd digits are completely removed. Then which of the following digit will be third from the left end in the newly formed number?

- a. 6

- b. 4
- c. 2
- d. 1
- e. 8

38. Questions

How many pairs of letters are there in the word 'THOUSAND' that have as many letters between them (both forward and backward direction) in the word as in the English alphabetical series?

- a. One
- b. Two
- c. Three
- d. Four
- e. None

39. Questions

If we add 2 to all the even digits and subtract 1 from all the odd digits in the number '3945926374', then what is the sum of all the digits that are immediately followed by a square number (from left to right) after the rearrangement?

- a. 10
- b. 14
- c. 13
- d. 16
- e. 20

40. Questions

Find the odd one out

- a. CEHL
- b. PSUM
- c. IKNR
- d. FHKO
- e. TVYC

@RankZen Banker

Explanations:

1. Questions

Final Arrangement:

We have,

- One person sits between A and the one who faces R.
- The number of persons who sit to the left of A is equal to the number of persons who sit to the right of A.
- R sits adjacent to the one who faces E.

From the above conditions , there are two possibilities:

@RankZen Banker

Again, we have,

- T faces the one who sits third to the right of C.
- P sits third to the right of Q.
- B does not sit at any end of the row.

From the above conditions, Case-1 gets eliminated because P sits third to the right of Q, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: E

2. Questions

Final Arrangement:

We have,

- One person sits between A and the one who faces R.
- The number of persons who sit to the left of A is equal to the number of persons who sit to the right of A.
- R sits adjacent to the one who faces E.

From the above conditions , there are two possibilities:

@RankZen Banker

Again, we have,

- T faces the one who sits third to the right of C.
- P sits third to the right of Q.
- B does not sit at any end of the row.

From the above conditions, Case-1 gets eliminated because P sits third to the right of Q, which is not satisfied.

Hence, case-2 shows the final arrangement.

@RankZen Banker

Answer: D

3. Questions

Final Arrangement:

We have,

- One person sits between A and the one who faces R.
- The number of persons who sit to the left of A is equal to the number of persons who sit to the right of A.
- R sits adjacent to the one who faces E.

From the above conditions , there are two possibilities:

Again, we have,

- T faces the one who sits third to the right of C.
- P sits third to the right of Q.
- B does not sit at any end of the row.

@RankZen Banker

From the above conditions, Case-1 gets eliminated because P sits third to the right of Q, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: C

4. Questions

Final Arrangement:

We have,

- One person sits between A and the one who faces R.
- The number of persons who sit to the left of A is equal to the number of persons who sit to the right of A.
- R sits adjacent to the one who faces E.

From the above conditions , there are two possibilities:

@RankZen Banker

Again, we have,

- T faces the one who sits third to the right of C.
- P sits third to the right of Q.
- B does not sit at any end of the row.

From the above conditions, Case-1 gets eliminated because P sits third to the right of Q, which is not satisfied.

Hence, case-2 shows the final arrangement.

@RankZen Banker

Answer: B (In all the other options, all the persons sit at the extreme ends except option B)

5. Questions

Final Arrangement:

We have,

- One person sits between A and the one who faces R.
- The number of persons who sit to the left of A is equal to the number of persons who sit to the right of A.
- R sits adjacent to the one who faces E.

From the above conditions , there are two possibilities:

Again, we have,

- T faces the one who sits third to the right of C.
- P sits third to the right of Q.
- B does not sit at any end of the row.

@RankZen Banker

From the above conditions, Case-1 gets eliminated because P sits third to the right of Q, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: A

6. Questions

Final Arrangement:

Persons
C
G
E
A
H
D
F
B

@RankZen Banker

We have,

- Only two people buy tickets between A and F.
- The number of people who buy tickets before A is **one less than** the number of people who buy tickets after A.
- Only three people buy tickets between F and E.

From the above conditions, there are two possibilities:

Case-1	Case-2
Persons	Persons
F	
	E
A	A
E	
	F

Again, we have,

- G buys a ticket four people before D, but neither of them buys a ticket at the first or the last position.
- Only two people buy tickets between B and H, who does not buy the tickets after F.

From the above conditions, there is one more possibility.

From the above conditions, Case-1 and Case-1a gets eliminated because only two people buy tickets between B and H, who does not buy the tickets after F, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@RankZen Banker

Case-1	Case-2	Case-1a
Persons	Persons	Persons
F	C	F
G	G	
	E	G
A	A	A
E	H	E
D	D	
	F	D
	B	

Answer: C

7. Questions

Final Arrangement:

Persons
C
G
E
A
H
D
F
B

@RankZen Banker

We have,

- Only two people buy tickets between A and F.

- The number of people who buy tickets before A is **one less than** the number of people who buy tickets after A.
- Only three people buy tickets between F and E.

From the above conditions, there are two possibilities:

Case-1	Case-2
Persons	Persons
F	
	E
A	A
E	
	F

Again, we have,

- G buys a ticket four people before D, but neither of them buys a ticket at the first or the last position.
- Only two people buy tickets between B and H, who does not buy the tickets after F.

From the above conditions, there is one more possibility.

From the above conditions, Case-1 and Case-1a gets eliminated because only two people buy tickets between B and H, who does not buy the tickets after F, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@RankZen Banker

Case-1	Case-2	Case-1a

11. Questions

Final Arrangement:

Boxes
P
M
N
R
T
Q
O
S

@RankZen Banker

We have,

- Only three boxes are placed between box Q and box M.

- Box Q is neither placed at the bottom nor above box M.
- Box S is placed two boxes below box Q.
- Box O is placed immediately above box S.

From the above conditions, there are two possibilities:

Case-1	Case-2
Boxes	Boxes
M	
	M
Q	
O	Q
S	O
	S

Again, we have,

- The number of boxes placed above box O is **one less than** the number of boxes placed below box P.
- One box is placed between box P and box N.
- Box R is placed below box N but above box T.

From the above conditions, Case-1 gets eliminated because box R is placed below box N but above box T, which is not satisfied.

Hence, case-2 shows the final arrangement.

@RankZen Banker

Case-1	Case-2
Boxes	Boxes
M	P
P	M
	N
N	R
Q	T
O	Q
S	O
	S

Answer: D (In all the other options, the first box is two boxes above the second box, except option D)

12. Questions

Final Arrangement:

Boxes
P
M

	S

Again, we have,

- The number of boxes placed above box O is **one less than** the number of boxes placed below box P.
- One box is placed between box P and box N.
- Box R is placed below box N but above box T.

From the above conditions, Case-1 gets eliminated because box R is placed below box N but above box T, which is not satisfied.

Hence, case-2 shows the final arrangement.

@RankZen Banker

Answer: C

15. Questions

Final Arrangement:

Boxes
P
M
N
R
T
Q
O
S

@RankZen Banker

We have,

- Only three boxes are placed between box Q and box M.

- Box Q is neither placed at the bottom nor above box M.
- Box S is placed two boxes below box Q.
- Box O is placed immediately above box S.

From the above conditions, there are two possibilities:

Case-1	Case-2
Boxes	Boxes
M	
	M
Q	
O	Q
S	O
	S

Again, we have,

- The number of boxes placed above box O is **one less than** the number of boxes placed below box P.
- One box is placed between box P and box N.
- Box R is placed below box N but above box T.

From the above conditions, Case-1 gets eliminated because box R is placed below box N but above box T, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: A

16. Questions

Final Arrangement:

We have,

- A sits third to the right of B.
- The number of persons who sit between A and B is equal to the number of persons who sit between B and C (counted from right of B and left of C respectively)
- D sits second to the right of C.

From the above conditions, there are two possibilities:

@RankZen Banker

Again, we have,

- E and F sit to the immediate right of each other.
- The immediate neighbours of C face the opposite direction to C.
- G does not face outside.

Again, we have,

- The number of persons who face outside the centre is **more than** the number of persons who face inside the centre.
- E and D do not face the same direction as G.

From the above conditions, Case-2 gets eliminated because the number of persons who face outside the centre is **more than** the number of persons who face inside the centre, which is not satisfied.

Hence, Case-1 shows the final arrangement.

@RankZen Banker

Answer: D (In all the other options, people are facing outside the centre except option D)

17. Questions

Final Arrangement:

We have,

- A sits third to the right of B.
- The number of persons who sit between A and B is equal to the number of persons who sit between B and C (counted from right of B and left of C respectively)
- D sits second to the right of C.

From the above conditions, there are two possibilities:

Again, we have,

- E and F sit to the immediate right of each other.
- The immediate neighbours of C face the opposite direction to C.
- G does not face outside.

@RankZen Banker

Again, we have,

- The number of persons who face outside the centre is **more than** the number of persons who face inside the centre.
- E and D do not face the same direction as G.

From the above conditions, Case-2 gets eliminated because the number of persons who face outside the centre is **more than** the number of persons who face inside the centre, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: B

18. Questions

Final Arrangement:

We have,

- A sits third to the right of B.
- The number of persons who sit between A and B is equal to the number of persons who sit between B and C (counted from right of B and left of C respectively)
- D sits second to the right of C.

From the above conditions, there are two possibilities:

Again, we have,

- E and F sit to the immediate right of each other.
- The immediate neighbours of C face the opposite direction to C.
- G does not face outside.

Again, we have,

- The number of persons who face outside the centre is **more than** the number of persons who face inside the centre.
- E and D do not face the same direction as G.

From the above conditions, Case-2 gets eliminated because the number of persons who face outside the centre is **more than** the number of persons who face inside the centre, which is not satisfied.

Hence, Case-1 shows the final arrangement.

@RankZen Banker

Answer: C

19. Questions

Final Arrangement:

We have,

- A sits third to the right of B.
- The number of persons who sit between A and B is equal to the number of persons who sit between B and C (counted from right of B and left of C respectively)
- D sits second to the right of C.

From the above conditions, there are two possibilities:

Again, we have,

- E and F sit to the immediate right of each other.
- The immediate neighbours of C face the opposite direction to C.
- G does not face outside.

@RankZen Banker

Again, we have,

- The number of persons who face outside the centre is **more than** the number of persons who face inside the centre.
- E and D do not face the same direction as G.

From the above conditions, Case-2 gets eliminated because the number of persons who face outside the centre is **more than** the number of persons who face inside the centre, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: A

20. Questions

Final Arrangement:

We have,

- A sits third to the right of B.
- The number of persons who sit between A and B is equal to the number of persons who sit between B and C (counted from right of B and left of C respectively)
- D sits second to the right of C.

From the above conditions, there are two possibilities:

Again, we have,

- E and F sit to the immediate right of each other.
- The immediate neighbours of C face the opposite direction to C.
- G does not face outside.

Again, we have,

- The number of persons who face outside the centre is **more than** the number of persons who face inside the centre.
- E and D do not face the same direction as G.

From the above conditions, Case-2 gets eliminated because the number of persons who face outside the centre is **more than** the number of persons who face inside the centre, which is not satisfied.

Hence, Case-1 shows the final arrangement.

@RankZen Banker

Answer: E

21. Questions**Answer: E****Given Series:** D I & U V # \$ * H B H J * G % S C B G H B D H A @ B R B Y W M A E

There are no such letters in the given series, each of which is immediately preceded by a symbol and immediately followed by a vowel.

22. Questions**Answer: B****Given Series:** D I & U V # \$ * H B H J * G % S C B G H B D H A @ B R B Y W M A E

The seventeenth letter to the right of the fifth symbol from the right end is B.

23. Questions**Answer: A****Given Series:** D I & U V # \$ * H B H J * G % S C B G H B D H A @ B R B Y W M A E**Required series:** D & V # \$ * **H** B H J * G % S C B G H B D H @ B R B Y W M

If we remove all the vowels from the given series, then only one symbol is immediately followed by a letter and immediately preceded by a symbol as per the given alphabetical series.

24. Questions**Answer: C****Given Series:** D I & U V # \$ * H B H J * G % S C B G H B D H A @ B R B Y W M A E**Required series:** I & U # \$ * * % A @ A E

If we remove all the consonants, then the element which is third to the right of the element, which is third from the left end, as per the given alphabetical series, is *.

25. Questions**Answer: D****Given Series:** D I & U V # \$ * H B H J * G % S C B G H B D H A @ B R B Y W M A E**Required series :** D I U V H B H J G S C B G H B D H A B R B Y W M A E

If all the symbols are eliminated from the series, then 14th from the right end of the series is G.

26. Questions**Answer: D****Given Series:** 534 827 196 473 682**Required Series:** 633 926 295 572 781

If 1 is added to the first digit of each number (**from the left end**) and 1 is subtracted from the last digit of each number (**from the left end**), 682 will be the second-highest number after the rearrangement.

27. Questions**Answer: A****Given Series:** 534 827 196 473 682**Required Series:** 12 17 16 14 16

If all the digits in each of the numbers are added together, the number that yields the lowest sum is 534.

28. Questions**Answer: B****Given Series:** 534 827 196 473 682**Required Series:** 435 728 691 374 286**Arranged in ascending order:** 286 374 **435** 691 728

If the first and the third digits of each number (**from the left**) are interchanged, the number will be the third number from the right end when arranged in ascending order is 435.

29. Questions**Answer: C****Given Series:** 534 827 196 473 682

The product of the first and last digit of the highest number = $828 \rightarrow 8 \times 7 = 56$

The product of the first and last digit of the lowest number = $196 \rightarrow 1 \times 6 = 6$

The difference between them $\rightarrow 56 - 6 = 50$

30. Questions**Answer: E****Given Series:** 534 827 196 473 682**Required Series:** 535 937 197 573 793

If all the even numbers are increased by 1, then only one number is divisible by 3.

31. Questions**Answer: A** $Z = Y > K < J \geq N, A < D = C \leq I \leq N$ **Conclusions:****I).** $J \geq D \rightarrow \text{True}$ ($J \geq N \geq I \geq C = D$)**II).** $Z > I \rightarrow \text{False}$ ($Z = Y > K < J \geq N \geq I$)**32. Questions****Answer: E**

@RankZen Banker

$K < Z \leq U < V; W \geq K > Y = A$

Conclusions:

I). $Y < V \rightarrow \text{True} (Y < K < Z \leq U < V)$

II). $W > U \rightarrow \text{False} (W \geq K < Z \leq U)$

33. Questions

Answer: D

$Z \leq U < F = V; T \geq P > F \leq M$

Conclusions:

I). $T > U \rightarrow \text{True} (T \geq P > F > U)$

II). $Z < P \rightarrow \text{True} (Z \leq U < F < P)$

34. Questions

Answer: C

$H < Z \leq U < R; W \geq H > Y = A$

Conclusions:

I). $Y > R \rightarrow \text{False} (R > U \geq Z > H > Y)$

II). $A < R \rightarrow \text{True} (A = Y < H < Z \leq U < R)$

35. Questions

Answer: B

$Q = L > J \geq H < G, I = G \leq F > D \geq E$

Conclusions:

I). $H > E \rightarrow \text{False} (H < G \leq F > D \geq E)$

II). $L > D \rightarrow \text{False} (L > J \geq H < G \leq F > D)$

36. Questions

Answer: D

Given Word: DOWNLOAD

1st, 4th, 5th, and 7th letters (from left) of the word are D, N, L and A.

The meaningful word formed is 'Land'.

The fourth letter of that word from the right is L.

37. Questions

Answer: A

Given Number: 7294635184

@RankZen Banker

After interchanging the digits, we get: 4815364927

After removing all the odd numbers, we get: 48642

The digit which is third from the left end is 6.

38. Questions

Answer: A

Given Word: THOUSAND

THOUSAND

39. Questions

Answer: B

Given Number: 3945926374

Required Number: 2864848266

The sum of the digits that are followed by the square number is $6+8 = 14$.

40. Questions

Answer: B

CEHL $\rightarrow C (3) + 2 = E (5) + 3 = H (8) + 4 = L (12)$

PSUM $\rightarrow P (16) + 3 = S (18) + 2 = U (21) + 4 = Y (25)$

IKNR $\rightarrow I (9) + 2 = K (11) + 3 = N (14) + 4 = R (18)$

FHKO $\rightarrow F (6) + 2 = H (8) + 3 = K (11) + 4 = O (15)$

TVYC $\rightarrow T (20) + 2 = V (22) + 3 = Y (25) + 4 = C (29)$
