

1. Questions

Study the following information carefully and answer the given questions.

Nine boxes, viz., A, B, C, D, E, F, G, H, and I, are kept one above another in a stack. It is assumed that no other boxes are kept in the stack other than the given boxes.

Box C is kept two boxes above box A. Only three boxes are kept between box A and box D. Box F is kept immediately above box D. The number of boxes kept between box F and box C is the same as the number of boxes kept below box I. Box I is kept adjacent to box B. Neither G nor H is kept at the top or bottommost position. Box H is kept above box G, which is not kept immediately above box E.

Which of the following boxes is kept fourth from the top?

- a. A
- b. The box which is kept two boxes above box G
- c. F
- d. The box which is kept immediately below box H
- e. I

2. Questions

How many boxes are kept between box H and box I?

- a. One
- b. Same as between box D and box A
- c. Two
- d. None
- e. More than three

3. Questions

If box E is related to box B in the same way as box G is related to box C, then which of the following boxes is related to box F?

- a. A
- b. The box which is kept immediately below box I
- c. H
- d. The box which is kept three boxes above box E
- e. D

4. Questions

Which of the following pairs of boxes has exactly two boxes between them?

- a. Box C and Box G
- b. Box A and Box I
- c. Box F and Box C
- d. Box F and Box I
- e. Box G and Box E

5. Questions

If all the boxes are arranged in alphabetical order from bottom to top, which of the following boxes will remain unchanged in its position?

- a. B
- b. D
- c. G
- d. H
- e. I

6. Questions

Study the following information carefully and answer the given questions.

Ten persons P, Q, R, S, T, U, V, W, X and Y are sitting around a rectangular table in such a way that three persons sit on each longer side, and two persons sit on each smaller side of the table. The persons sit on the longer side of the table facing outside, and the persons sit on the shorter side of the table facing inside the table.

T sits to the immediate right of W, who sits at a smaller side of the table. P sits opposite T and sits second to the left of X. Only three persons sit between X and R, when counted to the left of R. V sits third to the right of Y. Neither Y nor Q sits at the smaller side of the table. Less than two persons sit between Q and S, when counted in the anticlockwise direction from S.

Who among the following persons sits to the immediate right of Q?

- a. P
- b. The person who sits opposite to V
- c. T
- d. R
- e. The person who sits third to the right of X

7. Questions

Which of the following persons sits opposite to R?

- a. P

- b. The person who sits second to the left of V
- c. The person who sits to the immediate right of Y
- d. X
- e. U

8. Questions

How many persons sit between Q and P, when counted clockwise from Q?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

9. Questions

Which of the following statements is/are true as per the final arrangement?

- I).** S sits opposite to W.
 - II).** W sits third to the right of X.
 - III).** V sits at a smaller side of the table.
- a. Only I
 - b. Only II
 - c. Only III
 - d. Only I and II
 - e. All I, II and III

10. Questions

Four of the following five persons form a group based on their respective positions in the arrangement. Which of the following does not belong to that group?

- a. X
- b. T
- c. The person who sits to the immediate left of V
- d. W
- e. The person who sits second to the right of Q

11. Questions

Read the following information carefully and answer the given questions.

Eight persons - J, K, L, M, N, O, P and Q were born in different years, i.e., 1965, 1968, 1973, 1979, 1988, 2000, 2003 and 2012.

Note I: The age of each person is calculated with respect to the year 2026.

Note II: All the persons were born on the same date and month.

Note III: The age of the person is only in years.

P was born three persons after K, who was born in a leap year. Only three persons were born between K and Q. The difference in the ages of Q and L is $\frac{1}{3}$ of the difference in the ages of P and M. Neither J nor N was born in an even-numbered year. J was born before N but was not the eldest.

Who among the following persons was born in 1973?

- a. N
- b. K
- c. The person who was born immediately after K
- d. The person who was born two persons before P
- e. J

12. Questions

Who among the following persons was born immediately after K?

- a. J
- b. L
- c. The person who is 26 years old
- d. The person who is 14 years old
- e. N

13. Questions

What is the present age of M?

- a. 23 years
- b. 26 years
- c. 47 years
- d. 53 years
- e. 38 years

14. Questions

How many persons were born between P and L?

- a. None
- b. One
- c. As many persons born before K
- d. As many persons born between Q and M
- e. Four

15. Questions

Four of the following five are alike in a certain way based on the given arrangement. Which one does NOT belong to that group?

- a. Q – 1968
- b. K – 1988
- c. O – 2003
- d. M – 2012
- e. N – 1988

16. Questions

Study the following information carefully and answer the given questions.

Eight persons — A, B, C, D, P, Q, R and S — belong to three different states, namely Punjab, Haryana and Gujarat. At least two but not more than three persons belong to the same state. Each person likes a different game among Basketball, Volleyball, Cricket, Football, Tennis, Rugby, Hockey and Badminton.

Only P belongs to the same state as the one who likes Volleyball; neither of them is from Punjab. D and B belong to the same state but are not from Punjab. R and the one who likes Football belong to the same state as A. R and A do not like food ball. S likes Basketball and belongs to the same state as the one who likes Rugby. Neither B nor R likes Cricket or Rugby. The one who likes Cricket and the one who likes Badminton belong to the same state. P does not like Tennis but belongs to Haryana. Q does not like volleyball.

Which of the following persons belongs to the same state as B?

- a. S
- b. P
- c. Both a and d
- d. D
- e. The person who likes Football

17. Questions

If A is related to Cricket and P is related to Hockey, then in the same manner, S is related to which of the following?

- a. Basketball
- b. Rugby
- c. Tennis
- d. Football
- e. Badminton

18. Questions

Which of the following persons belongs to Gujarat?

- a. P
- b. C
- c. The person who likes Volleyball
- d. S
- e. The person who likes Hockey

19. Questions

Which of the following games is liked by Q?

- a. Cricket
- b. Football
- c. Badminton
- d. Hockey
- e. Tennis

20. Questions

Four of the following five are alike in a certain way. Which one does NOT belong to that group?

- a. R – Hockey
- b. Q – Tennis
- c. A – Volleyball
- d. P – Basketball
- e. C – Hockey

21. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements

Only a few Canvas are Frames.

All Frames are Boards.

No Board is a Panel.

Some Panels are Sheets.

Conclusions:

I). All sheets being frame is a possibility

II). No panels are canvas

III). Some boards are not sheets is a possibility

- a. Only Conclusion I follows
- b. Only Conclusion I and III follow
- c. Only Conclusions II and III follow
- d. Only Conclusion III follow
- e. All the conclusions follow

22. Questions

Statements

All Rivers are Streams.

Only a few Streams are Canals.

Some Canals are Lakes.

No Lakes are Ponds.

Conclusions:

I). Some rivers are not ponds is a possibility

II). All rivers can be lakes

III). No streams are ponds is a possibility

- a. All the conclusions follow
- b. Only Conclusion II follows
- c. Only Conclusions II and III follow
- d. Only Conclusion I follows
- e. Only Conclusions I and III follow

23. Questions

Statements

Only Poets are Writers.

No Poets are Editors.

Some Editors are Critics.

All Critics are Reviewers.

Conclusions:

I). All writers can be Critics

II). Some poets are not reviewers

III). No writers being reviewers is a possibility

- a. Only Conclusion I follows
- b. All the conclusions follow
- c. Only Conclusion II follows
- d. Only Conclusions II and III follow
- e. Only Conclusion III follows

24. Questions

Statements

All Doctors are Researchers.

No Researchers are Scientists.

Only Scientists are Artists.

Some Scientists are not Designers.

Conclusions:

I). Some doctors are designers

II). All researchers are designers

III). Some artists being designers is a possibility

- a. Only Conclusion I follows
- b. All the conclusions follow
- c. Only Conclusion II follows
- d. Only Conclusions I and III follow
- e. Neither I, II and III follows

25. Questions

Statements

Some Tables are Desks.

Only a few Desks are Chairs.

No Chair is a Bench.

All Benches are Stools.

Conclusions:

I). Some tables are benches is not a possibility

II). All stools can never be desks

III). Some chairs being tables is a possibility

- a. Only Conclusion I follows
- b. Only Conclusion III follows
- c. Only Conclusion II follows
- d. Only Conclusions I and III follow
- e. All the conclusions follow

26. Questions

Study the following information carefully and answer the given questions.

K is the daughter-in-law of D, who has two children — J and L. Q is the maternal uncle of P, who is the only son of J. Neither K nor M have any siblings. M is the granddaughter of G, who is married to D. G is the female member of the family.

How is K related to P?

- a. Mother
- b. Aunt
- c. Sister
- d. Grandmother
- e. Mother-in-law

27. Questions

How is Q related to J?

- a. Brother
- b. Maternal uncle
- c. Father-in-law
- d. Cousin
- e. Brother-in-law

28. Questions

If Z is the mother of P, then how is Z related to G?

- a. Maternal aunt
- b. Daughter
- c. Daughter-in-law
- d. Sister-in-law
- e. Can not be determined

29. Questions

Study the following information carefully and answer the given questions.

D is the father of K, who is married to M. K has two children — P and R. P is a male member. S is the sister of M and is married to T. V is the grandmother of R, who is the cousin of U. Q is the grandfather of U and has only one daughter, S. V is not married to D. R and K are of the same gender as S. D is a married person.

How is U related to M?

- a. Niece
- b. Paternal uncle
- c. Nephew
- d. Father
- e. Can not be determined

30. Questions

If G is the mother-in-law of M, then how is G related to P?

- a. Mother
- b. Grandmother
- c. Mother-in-law
- d. Aunt
- e. Great-grandmother

31. Questions

Study the following information carefully and answer the given questions.

Which of the following words has no pair of letters from both forward and backward directions as in the English alphabetical series?

- a. ARCHITECTURE

- b. CELEBRATION
- c. CONSIDERATION
- d. ADVANTAGE
- e. SIGNIFICANT

32. Questions

If all the digits of the number “746931582” are arranged in ascending order from the left end, then what is the sum of the first three even digits from the left end?

- a. 12
- b. 14
- c. 16
- d. 18
- e. 20

33. Questions

If all the letters of the word “BACKGROUND” are arranged in alphabetical order from the right end, then which of the following letters will be fifth from the left end?

- a. A
- b. B
- c. K
- d. G
- e. N

34. Questions

If in the number “5739246815”, the digits at odd positions (from the left end) are dropped and the remaining digits are arranged in descending order from the left end, then which of the following digits is third from the right end?

- a. 9
- b. 5
- c. 4
- d. 8
- e. 7

35. Questions

If it is possible to make a six letter meaningful word with the third, fourth, sixth, ninth, tenth and

thirteenth letters from the left end of the word “REPRESENTATION”, which would be the second letter of the meaningful word? If more than one such word can be formed, give X as the answer. If no such word can be formed, give Y as the answer.

- a. P
- b. A
- c. S
- d. X
- e. Y

36. Questions

Read the following information carefully and answer the questions given below.

Eight candidates — A, B, C, D, E, F, G and H — obtained different scores in a selection test.

D secured 64 marks, and exactly three candidates scored more than D. A scored more than F but less than G. B scored less than E but more than H. C scored more than A but less than G. E scored 52 marks. H scored more than only F.

How many candidates scored between D and H?

- a. One
- b. Two
- c. Three
- d. Four
- e. Five

37. Questions

Who among the following secured the fifth-highest score?

- a. A
- b. B
- c. C
- d. E
- e. H

38. Questions

If G scored 30 marks more than D and E scored 15 marks more than H, what is the sum of the scores obtained by G and H?

- a. 131

- b. 113
- c. 117
- d. 121
- e. 125

39. Questions

Read the following information carefully and answer the questions given below.

Seven players — H, J, K, L, M, N and O — participated in a tournament and secured different scores.

K secured 56 points, and only two players scored more points than K. H scored more points than J and M but fewer points than O. N scored fewer points than J but more points than M. L scored more points than K. O secured the highest score. M secured 32 points.

How many players scored more points than N?

- a. One
- b. Two
- c. Three
- d. Four
- e. Five

40. Questions

If H scored 16 points more than M and O scored 12 points more than K, what is the difference between the scores of H and O?

- a. 18
- b. 22
- c. 20
- d. 30
- e. 32

Explanations:

1. Questions

Final arrangement:

Boxes
F
D
H
C
G
A
I
B
E

We have,

- Box C is kept two boxes above box A.
- Only three boxes are kept between box A and box D.

From the above conditions, there are two possibilities.

Case-1	Case-2
Boxes	Boxes
D	C
C	A
A	
	D

Again, we have,

- Box F is kept immediately above box D.
- The number of boxes kept between box F and box C is the same as the number of boxes kept below box I.
- Box I is kept adjacent to box B.

Here, case-2 is split into case-2a

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F		C
D	C	
		A
C	A	B
	I	I
A	B	F
I	F	D
B	D	

Again, we have,

- Neither G nor H is kept at the top or bottommost position.
- Box H is kept above box G, which is not kept immediately above box E.

From the above conditions, Case-2 and case-2a get eliminated because neither G nor H is kept at the top or bottommost position, and Box H is kept above Box G, which is not kept immediately above Box E, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F	H	C
D	C	H
H	G	A
C	A	B
G	I	I
A	B	F
I	F	D
B	D	G
E	E	E

Answer: D

2. Questions

Final arrangement:

Boxes
F
D
H
C
G
A
I
B
E

We have,

- Box C is kept two boxes above box A.
- Only three boxes are kept between box A and box D.

From the above conditions, there are two possibilities.

Case-1	Case-2
Boxes	Boxes
D	C
C	A
A	
	D

Again, we have,

- Box F is kept immediately above box D.
- The number of boxes kept between box F and box C is the same as the number of boxes kept below box I.
- Box I is kept adjacent to box B.

Here, case-2 is split into case-2a

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F		C
D	C	
		A
C	A	B
	I	I
A	B	F
I	F	D
B	D	

Again, we have,

- Neither G nor H is kept at the top or bottommost position.
- Box H is kept above box G, which is not kept immediately above box E.

From the above conditions, Case-2 and case-2a get eliminated because neither G nor H is kept at the top or bottommost position, and Box H is kept above Box G, which is not kept immediately above Box E, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F	H	C
D	C	H
H	G	A
C	A	B
G	I	I
A	B	F
I	F	D
B	D	G
E	E	E

Answer: B

3. Questions

Final arrangement:

Boxes
F
D
H
C
G
A
I
B
E

We have,

- Box C is kept two boxes above box A.
- Only three boxes are kept between box A and box D.

From the above conditions, there are two possibilities.

Case-1	Case-2
Boxes	Boxes
D	C
C	A
A	
	D

Again, we have,

- Box F is kept immediately above box D.
- The number of boxes kept between box F and box C is the same as the number of boxes kept below box I.
- Box I is kept adjacent to box B.

Here, case-2 is split into case-2a

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F		C
D	C	
		A
C	A	B
	I	I
A	B	F
I	F	D
B	D	

Again, we have,

- Neither G nor H is kept at the top or bottommost position.
- Box H is kept above box G, which is not kept immediately above box E.

From the above conditions, Case-2 and case-2a get eliminated because neither G nor H is kept at the top or bottommost position, and Box H is kept above Box G, which is not kept immediately above Box E, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F	H	C
D	C	H
H	G	A
C	A	B
G	I	I
A	B	F
I	F	D
B	D	G
E	E	E

Answer: E

4. Questions

Final arrangement:

Boxes
F
D
H
C
G
A
I
B
E

We have,

- Box C is kept two boxes above box A.
- Only three boxes are kept between box A and box D.

From the above conditions, there are two possibilities.

Case-1	Case-2
Boxes	Boxes
D	C
C	A
A	
	D

Again, we have,

- Box F is kept immediately above box D.
- The number of boxes kept between box F and box C is the same as the number of boxes kept below box I.
- Box I is kept adjacent to box B.

Here, case-2 is split into case-2a

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F		C
D	C	
		A
C	A	B
	I	I
A	B	F
I	F	D
B	D	

Again, we have,

- Neither G nor H is kept at the top or bottommost position.
- Box H is kept above box G, which is not kept immediately above box E.

From the above conditions, Case-2 and case-2a get eliminated because neither G nor H is kept at the top or bottommost position, and Box H is kept above Box G, which is not kept immediately above Box E, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F	H	C
D	C	H
H	G	A
C	A	B
G	I	I
A	B	F
I	F	D
B	D	G
E	E	E

Answer: C

5. Questions

Final arrangement:

Boxes
F
D
H
C
G
A
I
B
E

We have,

- Box C is kept two boxes above box A.
- Only three boxes are kept between box A and box D.

From the above conditions, there are two possibilities.

Case-1	Case-2
Boxes	Boxes
D	C
C	A
A	
	D

Again, we have,

- Box F is kept immediately above box D.
- The number of boxes kept between box F and box C is the same as the number of boxes kept below box I.
- Box I is kept adjacent to box B.

Here, case-2 is split into case-2a

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F		C
D	C	
		A
C	A	B
	I	I
A	B	F
I	F	D
B	D	

Again, we have,

- Neither G nor H is kept at the top or bottommost position.
- Box H is kept above box G, which is not kept immediately above box E.

From the above conditions, Case-2 and case-2a get eliminated because neither G nor H is kept at the top or bottommost position, and Box H is kept above Box G, which is not kept immediately above Box E, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Case-1	Case-2	Case-2a
Boxes	Boxes	Boxes
F	H	C
D	C	H
H	G	A
C	A	B
G	I	I
A	B	F
I	F	D
B	D	G
E	E	E

Answer: A (After rearranging the boxes in alphabetical order from bottom to top, only 'B' remains unchanged.)

6. Questions

Final arrangement:

We have,

- T sits to the immediate right of W, who sits at a smaller side of the table.
- P sits opposite T and sits second to the left of X.

From the above conditions, there are two possibilities.

Again, we have,

- Only three persons sit between X and R, when counted to the left of R.
- V sits third to the right of Y.
- Neither Y nor Q sits at the smaller side of the table.

Again, we have,

- Less than two persons sit between Q and S, when counted in the anticlockwise direction from S.

From the above conditions, case-2 gets eliminated because Less than two persons sit between Q and S when counted in the anticlockwise direction from S, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: B

7. Questions

Final arrangement:

We have,

- T sits to the immediate right of W, who sits at a smaller side of the table.
- P sits opposite T and sits second to the left of X.

From the above conditions, there are two possibilities.

Again, we have,

- Only three persons sit between X and R, when counted to the left of R.
- V sits third to the right of Y.
- Neither Y nor Q sits at the smaller side of the table.

Again, we have,

- Less than two persons sit between Q and S, when counted in the anticlockwise direction from S.

From the above conditions, case-2 gets eliminated because Less than two persons sit between Q and S when counted in the anticlockwise direction from S, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E

8. Questions

Final arrangement:

We have,

- T sits to the immediate right of W, who sits at a smaller side of the table.
- P sits opposite T and sits second to the left of X.

From the above conditions, there are two possibilities.

Again, we have,

- Only three persons sit between X and R, when counted to the left of R.
- V sits third to the right of Y.
- Neither Y nor Q sits at the smaller side of the table.

Again, we have,

- Less than two persons sit between Q and S, when counted in the anticlockwise direction from S.

From the above conditions, case-2 gets eliminated because Less than two persons sit between Q and S when counted in the anticlockwise direction from S, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

9. Questions

Final arrangement:

We have,

- T sits to the immediate right of W, who sits at a smaller side of the table.
- P sits opposite T and sits second to the left of X.

From the above conditions, there are two possibilities.

Again, we have,

- Only three persons sit between X and R, when counted to the left of R.
- V sits third to the right of Y.
- Neither Y nor Q sits at the smaller side of the table.

Again, we have,

- Less than two persons sit between Q and S, when counted in the anticlockwise direction from S.

From the above conditions, case-2 gets eliminated because Less than two persons sit between Q and S when counted in the anticlockwise direction from S, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D

10. Questions

Final arrangement:

We have,

- T sits to the immediate right of W, who sits at a smaller side of the table.
- P sits opposite T and sits second to the left of X.

From the above conditions, there are two possibilities.

Again, we have,

- Only three persons sit between X and R, when counted to the left of R.
- V sits third to the right of Y.
- Neither Y nor Q sits at the smaller side of the table.

Again, we have,

- Less than two persons sit between Q and S, when counted in the anticlockwise direction from S.

From the above conditions, case-2 gets eliminated because Less than two persons sit between Q and S when counted in the anticlockwise direction from S, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A (Except X, all other persons sit at the shorter side of the table)

11. Questions

Final Arrangement:

Years	Ages	Persons
1965	61	Q
1968	58	L
1973	53	J
1979	47	N
1988	38	K
2000	26	O
2003	23	M
2012	14	P

We have,

- P was born three persons after K, who was born in a leap year.
- Only three persons were born between K and Q.

From the above conditions, there are two possibilities

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	
1973	53		
1979	47		
1988	38	P	K
2000	26	Q	
2003	23		
2012	14		P

Again, we have,

- The difference in the ages of Q and L is $\frac{1}{3}$ of the difference in the ages of P and M.
- Neither J nor N was born in an even-numbered year.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	L
1973	53		
1979	47	M	
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Again, we have,

- J was born before N but was not the eldest.

From the above conditions, case-1 gets eliminated because J was born before N but was not the eldest, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61	J	Q
1968	58	K	L
1973	53	N	J
1979	47	M	N
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Answer: E

12. Questions

Final Arrangement:

Years	Ages	Persons
1965	61	Q
1968	58	L
1973	53	J
1979	47	N
1988	38	K
2000	26	O
2003	23	M
2012	14	P

We have,

- P was born three persons after K, who was born in a leap year.
- Only three persons were born between K and Q.

From the above conditions, there are two possibilities

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	
1973	53		
1979	47		
1988	38	P	K
2000	26	Q	
2003	23		
2012	14		P

Again, we have,

- The difference in the ages of Q and L is $\frac{1}{3}$ of the difference in the ages of P and M.
- Neither J nor N was born in an even-numbered year.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	L
1973	53		
1979	47	M	
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Again, we have,

- J was born before N but was not the eldest.

From the above conditions, case-1 gets eliminated because J was born before N but was not the eldest, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61	J	Q
1968	58	K	L
1973	53	N	J
1979	47	M	N
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Answer: C

13. Questions

Final Arrangement:

Years	Ages	Persons
1965	61	Q
1968	58	L
1973	53	J
1979	47	N
1988	38	K
2000	26	O
2003	23	M
2012	14	P

We have,

- P was born three persons after K, who was born in a leap year.

- Only three persons were born between K and Q.

From the above conditions, there are two possibilities

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	
1973	53		
1979	47		
1988	38	P	K
2000	26	Q	
2003	23		
2012	14		P

Again, we have,

- The difference in the ages of Q and L is $\frac{1}{3}$ of the difference in the ages of P and M.
- Neither J nor N was born in an even-numbered year.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	L
1973	53		
1979	47	M	
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Again, we have,

- J was born before N but was not the eldest.

From the above conditions, case-1 gets eliminated because J was born before N but was not the eldest, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61	J	Q
1968	58	K	L
1973	53	N	J
1979	47	M	N
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Answer: A

14. Questions

Final Arrangement:

Years	Ages	Persons
1965	61	Q
1968	58	L
1973	53	J
1979	47	N
1988	38	K
2000	26	O
2003	23	M
2012	14	P

We have,

- P was born three persons after K, who was born in a leap year.

- Only three persons were born between K and Q.

From the above conditions, there are two possibilities

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	
1973	53		
1979	47		
1988	38	P	K
2000	26	Q	
2003	23		
2012	14		P

Again, we have,

- The difference in the ages of Q and L is $\frac{1}{3}$ of the difference in the ages of P and M.
- Neither J nor N was born in an even-numbered year.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	L
1973	53		
1979	47	M	
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Again, we have,

- J was born before N but was not the eldest.

From the above conditions, case-1 gets eliminated because J was born before N but was not the eldest, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61	J	Q
1968	58	K	L
1973	53	N	J
1979	47	M	N
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Answer: D

15. Questions

Final Arrangement:

Years	Ages	Persons
1965	61	Q
1968	58	L
1973	53	J
1979	47	N
1988	38	K
2000	26	O
2003	23	M
2012	14	P

We have,

- P was born three persons after K, who was born in a leap year.

- Only three persons were born between K and Q.

From the above conditions, there are two possibilities

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	
1973	53		
1979	47		
1988	38	P	K
2000	26	Q	
2003	23		
2012	14		P

Again, we have,

- The difference in the ages of Q and L is $\frac{1}{3}$ of the difference in the ages of P and M.
- Neither J nor N was born in an even-numbered year.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61		Q
1968	58	K	L
1973	53		
1979	47	M	
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Again, we have,

- J was born before N but was not the eldest.

From the above conditions, case-1 gets eliminated because J was born before N but was not the eldest, which is not satisfied.

Hence, case-2 shows the final arrangement.

Years	Ages	Case-1	Case-2
		Persons	Persons
1965	61	J	Q
1968	58	K	L
1973	53	N	J
1979	47	M	N
1988	38	P	K
2000	26	Q	O
2003	23	L	M
2012	14	O	P

Answer: B (Except B, all the persons were born immediately before the year)

16. Questions

Final arrangement:

States	Persons	Games
Punjab	R	Badminton
	Q	Football
	A	Cricket
Haryana	P	Hockey
	C	Volleyball
Gujarat	D	Rugby
	B	Tennis
	S	Basketball

We have,

- Only P belongs to the same state as the one who likes Volleyball; neither of them is from Punjab.
- D and B belong to the same state but not from Punjab.

From the above conditions, there are two possibilities.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab				
Haryana	P		D	
		Volleyball	B	
Gujarat	D		P	
	B			Volleyball

Again, we have,

- R and the one who likes Football belong to the same state as A.
- R and A do not like food ball.
- S likes Basketball and belongs to the same state as the one who likes Rugby.
- Neither B nor R likes Cricket or Rugby.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R		R	
		Football		Football
	A		A	
Haryana	P		D	Rugby
		Volleyball	B	
			S	Basketball
Gujarat	D	Rugby	P	
	B			Volleyball
	S	Basketball		

Again, we have,

- The one who likes Cricket and the one who likes Badminton belong to the same state.
- P does not like Tennis but belongs to Haryana.
- Q does not like volleyball.

From the above conditions, case-2 gets eliminated because B does not like Tennis but belongs to Haryana, which is not satisfied.

Hence, case-1 shows the final arrangement.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R	Badminton	R	Badminton
	Q	Football	Q	Football
	A	Cricket	A	Cricket
Haryana	P	Hockey	D	Rugby
	C	Volleyball	B	Tennis
			S	Basketball
Gujarat	D	Rugby	P	Hockey
	B	Tennis	C	Volleyball
	S	Basketball		

Answer: C

17. Questions

Final arrangement:

States	Persons	Games
Punjab	R	Badminton
	Q	Football
	A	Cricket
Haryana	P	Hockey
	C	Volleyball
Gujarat	D	Rugby
	B	Tennis
	S	Basketball

We have,

- Only P belongs to the same state as the one who likes Volleyball; neither of the is from Punjab.
- D and B belong to the same state but not from Punjab.

From the above conditions, there are two possibilities.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab				
Haryana	P		D	
		Volleyball	B	
Gujarat	D		P	
	B			Volleyball

Again, we have,

- R and the one who likes Football belong to the same state as A.
- R and A do not like food ball.
- S likes Basketball and belongs to the same state as the one who likes Rugby.
- Neither B nor R likes Cricket or Rugby.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R		R	
		Football		Football
	A		A	
Haryana	P		D	Rugby
		Volleyball	B	
			S	Basketball
Gujarat	D	Rugby	P	
	B			Volleyball
	S	Basketball		

Again, we have,

- The one who likes Cricket and the one who likes Badminton belong to the same state.
- P does not like Tennis but belongs to Haryana.
- Q does not like volleyball.

From the above conditions, case-2 gets eliminated because B does not like Tennis but belongs to Haryana, which is not satisfied.

Hence, case-1 shows the final arrangement.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R	Badminton	R	Badminton
	Q	Football	Q	Football
	A	Cricket	A	Cricket
Haryana	P	Hockey	D	Rugby
	C	Volleyball	B	Tennis
			S	Basketball
Gujarat	D	Rugby	P	Hockey
	B	Tennis	C	Volleyball
	S	Basketball		

Answer: A

18. Questions

Final arrangement:

States	Persons	Games
Punjab	R	Badminton
	Q	Football
	A	Cricket
Haryana	P	Hockey
	C	Volleyball
Gujarat	D	Rugby
	B	Tennis
	S	Basketball

We have,

- Only P belongs to the same state as the one who likes Volleyball; neither of the is from Punjab.
- D and B belong to the same state but not from Punjab.

From the above conditions, there are two possibilities.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab				
Haryana	P		D	
		Volleyball	B	
Gujarat	D		P	
	B			Volleyball

Again, we have,

- R and the one who likes Football belong to the same state as A.
- R and A do not like food ball.
- S likes Basketball and belongs to the same state as the one who likes Rugby.
- Neither B nor R likes Cricket or Rugby.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R		R	
		Football		Football
	A		A	
Haryana	P		D	Rugby
		Volleyball	B	
			S	Basketball
Gujarat	D	Rugby	P	
	B			Volleyball
	S	Basketball		

Again, we have,

- The one who likes Cricket and the one who likes Badminton belong to the same state.
- P does not like Tennis but belongs to Haryana.
- Q does not like volleyball.

From the above conditions, case-2 gets eliminated because B does not like Tennis but belongs to Haryana, which is not satisfied.

Hence, case-1 shows the final arrangement.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R	Badminton	R	Badminton
	Q	Football	Q	Football
	A	Cricket	A	Cricket
Haryana	P	Hockey	D	Rugby
	C	Volleyball	B	Tennis
			S	Basketball
Gujarat	D	Rugby	P	Hockey
	B	Tennis	C	Volleyball
	S	Basketball		

Answer: D

19. Questions

Final arrangement:

States	Persons	Games
Punjab	R	Badminton
	Q	Football
	A	Cricket
Haryana	P	Hockey
	C	Volleyball
Gujarat	D	Rugby
	B	Tennis
	S	Basketball

We have,

- Only P belongs to the same state as the one who likes Volleyball; neither of the is from Punjab.
- D and B belong to the same state but not from Punjab.

From the above conditions, there are two possibilities.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab				
Haryana	P		D	
		Volleyball	B	
Gujarat	D		P	
	B			Volleyball

Again, we have,

- R and the one who likes Football belong to the same state as A.
- R and A do not like food ball.
- S likes Basketball and belongs to the same state as the one who likes Rugby.
- Neither B nor R likes Cricket or Rugby.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R		R	
		Football		Football
	A		A	
Haryana	P		D	Rugby
		Volleyball	B	
			S	Basketball
Gujarat	D	Rugby	P	
	B			Volleyball
	S	Basketball		

Again, we have,

- The one who likes Cricket and the one who likes Badminton belong to the same state.
- P does not like Tennis but belongs to Haryana.
- Q does not like volleyball.

From the above conditions, case-2 gets eliminated because B does not like Tennis but belongs to Haryana, which is not satisfied.

Hence, case-1 shows the final arrangement.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R	Badminton	R	Badminton
	Q	Football	Q	Football
	A	Cricket	A	Cricket
Haryana	P	Hockey	D	Rugby
	C	Volleyball	B	Tennis
			S	Basketball
Gujarat	D	Rugby	P	Hockey
	B	Tennis	C	Volleyball
	S	Basketball		

Answer: B

20. Questions

Final arrangement:

States	Persons	Games
Punjab	R	Badminton
	Q	Football
	A	Cricket
Haryana	P	Hockey
	C	Volleyball
Gujarat	D	Rugby
	B	Tennis
	S	Basketball

We have,

- Only P belongs to the same state as the one who likes Volleyball; neither of the is from Punjab.
- D and B belong to the same state but not from Punjab.

From the above conditions, there are two possibilities.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab				
Haryana	P		D	
		Volleyball	B	
Gujarat	D		P	
	B			Volleyball

Again, we have,

- R and the one who likes Football belong to the same state as A.
- R and A do not like food ball.
- S likes Basketball and belongs to the same state as the one who likes Rugby.
- Neither B nor R likes Cricket or Rugby.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R		R	
		Football		Football
	A		A	
Haryana	P		D	Rugby
		Volleyball	B	
			S	Basketball
Gujarat	D	Rugby	P	
	B			Volleyball
	S	Basketball		

Again, we have,

- The one who likes Cricket and the one who likes Badminton belong to the same state.
- P does not like Tennis but belongs to Haryana.
- Q does not like volleyball.

From the above conditions, case-2 gets eliminated because B does not like Tennis but belongs to Haryana, which is not satisfied.

Hence, case-1 shows the final arrangement.

States	Case-1		Case-2	
	Persons	Games	Persons	Games
Punjab	R	Badminton	R	Badminton
	Q	Football	Q	Football
	A	Cricket	A	Cricket
Haryana	P	Hockey	D	Rugby
	C	Volleyball	B	Tennis
			S	Basketball
Gujarat	D	Rugby	P	Hockey
	B	Tennis	C	Volleyball
	S	Basketball		

Answer: E (Except E, all person and games belongs to different states)

21. Questions

Answer: D

I). All sheets being frame is a possibility - Here, no direct relation between sheets and frames. But some sheets are panels, and no boards are panels; also, all frames are boards, so there are some sheets which are not frames. Hence, the conclusion does not follow.

II). No panels are canvas - Here, no direct relation between panels and canvas. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

III). Some boards are not sheets is a possibility - Here, no board is a panel. All sheets which are associated with panels are definitely not connected with boards. Hence, the conclusion follows.

22. Questions

Answer: A

I). Some rivers are not ponds is a possibility - Here, no direct relation between rivers and ponds. So, all the possible conclusions between them are true. Hence, the conclusion follows.

II). All rivers can be lakes - Here, no direct relation between rivers and lakes. So, all the possible conclusions between them are true. Hence, the conclusion follows.

III). No streams are ponds is a possibility - Here, no direct relation between streams and ponds. So, all the possible conclusions between them are true. Hence, the conclusion follows.

23. Questions

Answer: C

I). All writers can never be Critics - Here, writers are only associated with poets. So, All writers can never be critics is a definite conclusion. We can say a definite conclusion in such cases. Hence, the conclusion follows.

II). Some poets are not reviewers - Here, poets are only associated with writers. So, some poets are not reviewers is a definite conclusion. We can say a definite conclusion in such cases. Hence, the conclusion follows.

III). No writers being reviewers is a possibility - Here, writers are only associated with reviewers. So, no writers being reviewers is a possibility is a possible conclusion. We cannot say a possible conclusion in a definite case. Hence, the conclusion does not follow.

24. Questions

Answer: E

I). Some doctors are designers - Here, no direct relation between doctors and designers. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). All researchers are designers - Here, no direct relation between researchers and designers. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

III). Some artists being designers is a possibility - Here, artists are only associated with scientists. So, some artists being designers is a possibility is a possible conclusion. We cannot say a possible conclusion in a definite case. Hence, the conclusion does not follow.

25. Questions

Answer: B

I). Some tables are benches is not a possibility - Here, no direct relation between tables and benches. So, all the possible conclusions between them are true. Hence, the conclusion does not follow.

II). All stools can never be desks - Here, no direct relation between stools and desks. So, all the possible conclusions between them are true. Hence, the conclusion does not follow.

III). Some chairs are tables is a possibility - Here, no direct relation between chairs and tables. So, all the possible conclusions between them are true. Hence, the conclusion follows.

26. Questions

Answer: B

27. Questions

Answer: E

28. Questions

Answer: C

29. Questions

Answer: E

30. Questions

Answer: B

31. Questions

Answer: D

We have,

ADVANTAGE

No pairs are formed.

32. Questions

Answer: A

We have,

746931582

After rearranging, we get

123456789

$2+4+6 = 12$

33. Questions

Answer: C

We have,

BACKGROUND

After arranging in alphabetical order from the right end, we get

URONKKGDCBA

K is the fifth letter from the left end.

34. Questions

Answer: E

We have,

5739246815

After removing odd-positioned digits, we get

79485

After arranging in descending order, we get

98754

7 is the third digit from the right end.

35. Questions

Answer: B

We have,

REPRESENTATION

The third, fourth, sixth, ninth, tenth and thirteenth letters of the word are P, R, S, T, A and O

Only one meaningful word is formed: "PASTOR".

36. Questions

Final arrangement:

$G > C > A > D(64) > E(52) > B > H > F$

We have

- D secured 64 marks, and exactly three candidates scored more than D.
- A scored more than F but less than G.

$G > A > F$

- B scored less than E but more than H.

$H > B > E$

- C scored more than A but less than G.
- E scored 52 marks.
- H scored more than only F.

$G > C > A > D(64) > E(52) > B > H > F$

Answer: B

37. Questions

Final arrangement:

$G > C > A > D(64) > E(52) > B > H > F$

We have

- D secured 64 marks, and exactly three candidates scored more than D.
- A scored more than F but less than G.

$G > A > F$

- B scored less than E but more than H.

$H > B > E$

- C scored more than A but less than G.
- E scored 52 marks.
- H scored more than only F.

$G > C > A > D(64) > E(52) > B > H > F$

Answer: D

38. Questions

Final arrangement:

$G > C > A > D(64) > E(52) > B > H > F$

We have

- D secured 64 marks, and exactly three candidates scored more than D.
- A scored more than F but less than G.

$G > A > F$

- B scored less than E but more than H.

$H > B > E$

- C scored more than A but less than G.
- E scored 52 marks.
- H scored more than only F.

$G > C > A > D(64) > E(52) > B > H > F$

Answer: A

$$G = 30 + D$$

$$G = 30 + 64 = 94$$

$$H = E - 15$$

$$H = 52 - 15 = 37$$

$$G + H = 131$$

39. Questions

Final arrangement:

$O > L > K(56) > H > J > N > M(32)$

We have

- K secured 56 points, and only two players scored more points than K.

$_ > _ > K(56) > _ > _ > _ > _$

- H scored more points than J and M but fewer points than O.

$O > H > J/M$

- N scored fewer points than J but more points than M.
- L scored more points than K.
- O secured the highest score.
- M secured 32 points.

$O > L > K(56) > H > J > N > M(32)$

Answer: E

40. Questions

Final arrangement:

$O > L > K(56) > H > J > N > M(32)$

We have

- K secured 56 points, and only two players scored more points than K.

$_ > _ > K(56) > _ > _ > _ > _$

- H scored more points than J and M but fewer points than O.

$O > H > J/M$

- N scored fewer points than J but more points than M.
- L scored more points than K.
- O secured the highest score.
- M secured 32 points.

$O > L > K(56) > H > J > N > M(32)$

Answer: C

$$H = 16 + M$$

$$H = 16 + 32$$

$$H = 48$$

$$O = 12 + K$$

$$O = 12 + 56$$

$$O = 68$$

$$H - O = 20$$
