

1. Questions

Study the following information carefully and answer the given questions.

Six persons – A, B, C, D, E and F bought different things Viz., Laptop, Watch, Camera, Mobile, Headphone and Tablet one after another on different occasions. It is assumed that no other persons bought a thing other than the given persons. One person bought only one thing.

Only two persons bought things between A and the one who bought the Watch, where neither of them bought the things at first and last. A bought immediately after the one who bought the Mobile. As many persons bought the things before the one who bought the Mobile as after E. F bought neither a Headphone nor a mobile. E bought a Laptop. Only one person bought the things between D and the one who bought headphones, who bought before D. The number of persons who bought between F and the one who bought a laptop is the same as the number of persons who bought between F and the one who bought a camera. B neither buys first nor adjacent to F.

Who among the following persons bought things two persons before the one who bought a Laptop?

- a. The one who bought a headphone
- b. F
- c. C
- d. The one who bought a Camera
- e. None of these

2. Questions

If all the persons are arranged in alphabetical order from top to bottom, how many persons positions will remain unchanged?

- a. Two
- b. Three
- c. More than three
- d. No one
- e. One

3. Questions

How many persons bought things between E and the one who bought the Tablet?

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

4. Questions

Which of the following combinations is/are correct as per the final arrangement?

- a. F- Camera
- b. A- Mobile
- c. B-Tablet
- d. C-Tablet
- e. None is correct

5. Questions

If the price of things is in ascending order starting from top to bottom, then who among the following persons bought things for the highest price?

- a. E
- b. B
- c. C
- d. D
- e. F

6. Questions

Study the following information carefully and answer the given questions.

Eight persons -P, Q, R, S, T, U, V and W are sitting around a circular table facing the centre with equal distance between adjacent persons.

Only one person sits between P and T, who sits third to the left of V. Q sits to the immediate right of V. Q sits adjacent to neither W nor R. W sits third to the right of U, who is not an immediate neighbour of S.

What will be the position of W with respect to the person who sits to the immediate left of R?

- a. Second to the right
- b. Third to the left
- c. Sixth to the left
- d. Second to the left
- e. Both (a) and (c)

7. Questions

If all persons are made to sit in alphabetical order in clockwise direction starting from P, how many persons positions will remain unchanged (excluding P)?

- a. Two

- b. Three
- c. None
- d. More than three
- e. One

8. Questions

If S is related to R and T is related to Q in a certain way, then who among the following persons is related to V?

- a. S
- b. U
- c. R
- d. P
- e. T

9. Questions

Which of the following statements is/are NOT true regarding T as per the final arrangement?

- a. T sits exactly opposite to the one who sits to the immediate right of V
- b. No one sits between T and U when counted from the left of T
- c. T sits third to the right of S
- d. T sits to the immediate left of W
- e. All the given statements are true

10. Questions

How many persons are sitting between P and V (when counted from the left of P)?

- a. Two
- b. Three
- c. More than three
- d. No one
- e. One

11. Questions

Study the following information carefully and answer the given questions.

Seven persons – P, Q, R, S, T, U and V went to yoga class on seven different days of the same week, starting from Sunday to Saturday. Only one person went to yoga class on each day.

Only two persons went to the class between P and T. Either P or T went to class on Saturday. The number of persons who went before P is **one more than** the number of persons who went after R. More than two persons went to the class between V and Q. V neither went after Q nor went first. S went to class after V.

How many persons went to the yoga class between Q and the one who went on Saturday?

- a. One
- b. Three
- c. Two
- d. More than three
- e. No one

12. Questions

Who among the following persons went to the yoga class immediately before the one who went to the class two days before Q?

- a. The one who went to the class on Sunday
- b. U
- c. The one who went to the class on Friday
- d. The one who went to the class on Tuesday
- e. V

13. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. P and T
- b. V and R
- c. U and P
- d. S and Q
- e. P and R

14. Questions

As many persons went to the yoga class before U as after _____.

- a. V
- b. R
- c. T
- d. S

e. Q

15. Questions

If V and R interchange their class days, then who among the following persons went immediately before V?

- a. U
- b. P
- c. T
- d. S
- e. Q

16. Questions

Study the following information carefully and answer the given questions.

Eight persons, viz., A, B, C, D, E, F, G and H are sitting around a square table in such a way that four of them are sitting at the corners and facing the centre, while four of them are sitting in the middle of the sides and facing outside(**opposite to the centre**).

B and D sit to the immediate right of each other. A sits four persons away from D. As many persons sit between B and A (when counted from the left of B) as sit between A and C (when counted from the right of A). G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner.

Which among the following pairs of persons sit to the immediate right of each other?

- a. G and A
- b. H and A
- c. E and H
- d. B and H
- e. C and B

17. Questions

How many persons sit between F and H (when counted from the right of H)?

- a. One
- b. Three
- c. Two
- d. More than three
- e. No one

18. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. A
- b. D
- c. F
- d. G
- e. E

19. Questions

If all the persons are made to sit in alphabetical order from A in the clockwise direction, then how many persons do not change their previous position with respect to the new arrangement (excluding A)?

- a. One
- b. Three
- c. Two
- d. More than three
- e. No one

20. Questions

What is the position of E with respect to G when counted from the left of G?

- a. None of these
- b. Second to the left
- c. Immediate left
- d. Fourth to the left
- e. Third to the left

21. Questions

In the given questions, the relationship between different elements is shown in the statements followed by two conclusions. Find the conclusion which is definitely true.

Statement:

$$Q \geq R > A ; R < P < T ; A = S \leq H$$

Conclusions

D). $Q > S$

II). $P > Q$

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

22. Questions

Statement:

$F \leq S > U ; H > S ; L < S$

Conclusions

I). $L > U$

II). $H > U$

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

23. Questions

Statement:

$K = F < N < P \leq R > M ; W \geq K ; R \geq X$

Conclusions

I). $N < X$

II). $M > F$

- a. Both conclusions I and II are true
- b. Either conclusion I or II is true
- c. Only conclusion II is true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

24. Questions

Statement:

$P \geq W \leq Z ; W > K ; Q > O < Z$

Conclusions

I). $W > Q$

II). $W \leq Q$

- a. Both conclusions I and II are true
- b. Either conclusion I or II is true
- c. Only conclusion II is true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

25. Questions

Statement:

$A > G < J ; I < E ; J < O = K > E$

Conclusions

I). $G < O$

II). $O > I$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

26. Questions

Study the following information carefully and answer the given questions.

A person starts from point A and walks 8 km in the north direction to reach point G. Then, he takes a left turn and walks 5 km to reach point C. He then takes a right turn and walks 4 km to reach point E. He then takes two consecutive left turns of 5km and 4km to reach point F and point H, respectively. Finally, he takes a right turn and walks for 5 km to reach point I.

Four of the following five points are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. A and C
- b. G and E
- c. H and E

d. C and F

e. G and F

27. Questions

What is the direction of H with respect to G?

a. North

b. West

c. North-East

d. South-West

e. None of these

28. Questions

What is the shortest distance between F and I?

a. $\sqrt{41}$ m

b. 15 m

c. $\sqrt{28}$ m

d. 11 m

e. 10 m

29. Questions

Study the following information carefully and answer the given questions.

A person starts walking from point A and walks 8m towards the north. Then he turns right and walks 6m again; he turns right and walks 8m. Finally, he turns left and walks for 4m and stops.

If the speed of the person is 2m/s , then how long will it take to cover the total distance by him?

a. 10 sec

b. 15 sec

c. 12 sec

d. 13 sec

e. None of these

30. Questions

What is the direction of the starting point with respect to the stop point?

a. South

b. North

- c. North-west
- d. East
- e. West

31. Questions

Study the following information carefully and answer the given questions.

In a certain code language,

“Book budget page ruler” is coded as “sx vt fa ba”

“Study online book network” is coded as “fa lm mp qa”

“Online practice page worth” is coded as “ca mp za vt”

“Budget ruler network officer” is coded as “ba ta lm sx”

(Note: All the given codes are two-letter codes only)

Which of the following is the word for the code “qa” represented in the given coded language?

- a. Study
- b. Page
- c. Network
- d. Book
- e. Ruler

32. Questions

Which of the following is the code for the word ‘Officer’ represented in the given coded language?

- a. ca
- b. ba
- c. ta
- d. lm
- e. sx

33. Questions

If the code for the phrase “Practice Online” is “ca mp” in the given coded language, then what is the code for the phrase “Worth Book”?

- a. vt mp
- b. za qa
- c. fa ta

d. ca ba

e. za fa

34. Questions

Which of the following is the code for the word 'Ruler' in the given coded language?

a. sx

b. Either (a) or (d)

c. za

d. ba

e. Either (a) or (c)

35. Questions

Which of the following is the code for the word 'Network' represented in the given coded language?

a. qa

b. vt

c. mp

d. lm

e. ta

36. Questions

Study the following information carefully and answer the given questions.

C is the mother of B. E is the daughter of A, who is the sister of F. C is the only sister of G. H is the maternal grandfather of B and has only two children. D is the mother of G and a mother-in-law of A.

How is E related to F?

a. Uncle

b. Daughter

c. Niece

d. Son

e. Cannot be determined

37. Questions

If C is married to I, then how is H related to I?

a. Brother

b. Father-in-law

- c. Mother-in-law
- d. Mother
- e. Father

38. Questions

How many male members are in the family?

- a. One
- b. Three
- c. Two
- d. More than three
- e. Cannot be determined

39. Questions

Study the following information carefully and answer the given questions.

M is the only daughter of P, who is the paternal grandfather of T. R is the son of Q. T is the daughter of S. R is the father of W, who is the sister of T.

How is Q related to W?

- a. Cousin
- b. Grandfather
- c. Grandmother
- d. Uncle
- e. Cannot be determined

40. Questions

How is M related to S?

- a. Daughter-in-law
- b. Sister-in-law
- c. Sister
- d. Brother-in-law
- e. Grand daughter

Explanations:

1. Questions

Final arrangement:

Person	Things
C	Mobile
A	Head phone
B	Tablet
D	Camera
F	Watch
E	Laptop

We have,

- Only two persons bought things between A and the one who bought the Watch, where neither of them bought the things at first and last.
- A bought immediately after the one who bought the mobile.

From the above conditions, there are two possibilities.

Case 1		Case 2	
Person	Things	Person	Things
	Mobile		
A			Watch
			Mobile
	Watch	A	

Again, we have,

- As many persons bought the things before the one who bought the mobile as after E.

- Only one person bought the things between D and the one who bought headphones, who bought before D.

From the above conditions, one more possibility, Case 1(a), is added, and Case-2 gets eliminated because only one person bought the things between D and the one who bought headphones, who bought before D, which is not satisfied.

Case 1		Case 1(a)		Case 2	
Person	Things	Person	Things	Person	Things
	Mobile		Mobile		
A		A	Head phone		Watch
	Head phone			E	
		D			Mobile
D	Watch		Watch	A	
E		E			

Again, we have,

- F bought neither a headphone nor a Mobile.
- E bought a Laptop.
- The number of persons who bought between F and the one who bought a laptop is the same as the number of persons who bought between F and the one who bought a camera.
- B neither buys first nor adjacent to F.

From the above condition, Case-1 gets eliminated because B neither buys first nor is adjacent to F, which is not satisfied.

Hence, Case-1(a) shows the final arrangement.

Case 1		Case 1(a)	
Person	Things	Person	Things
	Mobile	C	Mobile
A	Camera	A	Head phone
	Head phone	B	Tablet
F		D	Camera
D	Watch	F	Watch
E	Laptop	E	Laptop

Answer: D

2. Questions

Final arrangement:

Person	Things
C	Mobile
A	Head phone
B	Tablet
D	Camera
F	Watch
E	Laptop

We have,

- Only two persons bought things between A and the one who bought the Watch, where neither of them bought the things at first and last.
- A bought immediately after the one who bought the mobile.

From the above conditions, there are two possibilities.

Case 1		Case 2	
Person	Things	Person	Things
	Mobile		
A			Watch
			Mobile
	Watch	A	

Again, we have,

- As many persons bought the things before the one who bought the mobile as after E.
- Only one person bought the things between D and the one who bought headphones, who bought before D.

From the above conditions, one more possibility, Case 1(a), is added, and Case-2 gets eliminated because only one person bought the things between D and the one who bought headphones, who bought before D, which is not satisfied.

Case 1		Case 1(a)		Case 2	
Person	Things	Person	Things	Person	Things
	Mobile		Mobile		
A		A	Head phone		Watch
	Head phone			E	
		D			Mobile
D	Watch		Watch	A	
E		E			

Again, we have,

- F bought neither a headphone nor a Mobile.
- E bought a Laptop.
- The number of persons who bought between F and the one who bought a laptop is the same as

the number of persons who bought between F and the one who bought a camera.

- B neither buys first nor adjacent to F.

From the above condition, Case-1 gets eliminated because B neither buys first nor is adjacent to F, which is not satisfied.

Hence, Case-1(a) shows the final arrangement.

Case 1		Case 1(a)	
Person	Things	Person	Things
	Mobile	C	Mobile
A	Camera	A	Head phone
	Head phone	B	Tablet
F		D	Camera
D	Watch	F	Watch
E	Laptop	E	Laptop

Answer: E (After rearranging all the persons in alphabetical order from top to bottom, only one person remains unchanged: 'D')

3. Questions

Final arrangement:

Person	Things
C	Mobile
A	Head phone
B	Tablet
D	Camera
F	Watch
E	Laptop

We have,

- Only two persons bought things between A and the one who bought the Watch, where neither of them bought the things at first and last.
- A bought immediately after the one who bought the mobile.

From the above conditions, there are two possibilities.

Case 1		Case 2	
Person	Things	Person	Things
	Mobile		
A			Watch
			Mobile
	Watch	A	

Again, we have,

- As many persons bought the things before the one who bought the mobile as after E.
- Only one person bought the things between D and the one who bought headphones, who bought before D.

From the above conditions, one more possibility, Case 1(a), is added, and Case-2 gets eliminated because only one person bought the things between D and the one who bought headphones, who bought before D, which is not satisfied.

Case 1		Case 1(a)		Case 2	
Person	Things	Person	Things	Person	Things
	Mobile		Mobile		
A		A	Head phone		Watch
	Head phone			E	
		D			Mobile
D	Watch		Watch	A	
E		E			

Again, we have,

- F bought neither a headphone nor a Mobile.

- E bought a Laptop.
- The number of persons who bought between F and the one who bought a laptop is the same as the number of persons who bought between F and the one who bought a camera.
- B neither buys first nor adjacent to F.

From the above condition, Case-1 gets eliminated because B neither buys first nor is adjacent to F, which is not satisfied.

Hence, Case-1(a) shows the final arrangement.

Case 1		Case 1(a)	
Person	Things	Person	Things
	Mobile	C	Mobile
A	Camera	A	Head phone
	Head phone	B	Tablet
F		D	Camera
D	Watch	F	Watch
E	Laptop	E	Laptop

Answer: B

4. Questions

Final arrangement:

Person	Things
C	Mobile
A	Head phone
B	Tablet
D	Camera
F	Watch
E	Laptop

We have,

- Only two persons bought things between A and the one who bought the Watch, where neither of them bought the things at first and last.

- A bought immediately after the one who bought the mobile.

From the above conditions, there are two possibilities.

Case 1		Case 2	
Person	Things	Person	Things
	Mobile		
A			Watch
			Mobile
	Watch	A	

Again, we have,

- As many persons bought the things before the one who bought the mobile as after E.
- Only one person bought the things between D and the one who bought headphones, who bought before D.

From the above conditions, one more possibility, Case 1(a), is added, and Case-2 gets eliminated because only one person bought the things between D and the one who bought headphones, who bought before D, which is not satisfied.

Case 1		Case 1(a)		Case 2	
Person	Things	Person	Things	Person	Things
	Mobile		Mobile		
A		A	Head phone		Watch
	Head phone			E	
		D			Mobile
D	Watch		Watch	A	
E		E			

Again, we have,

- F bought neither a headphone nor a Mobile.
- E bought a Laptop.
- The number of persons who bought between F and the one who bought a laptop is the same as the number of persons who bought between F and the one who bought a camera.
- B neither buys first nor adjacent to F.

From the above condition, Case-1 gets eliminated because B neither buys first nor is adjacent to F, which is not satisfied.

Hence, Case-1(a) shows the final arrangement.

Case 1		Case 1(a)	
Person	Things	Person	Things
	Mobile	C	Mobile
A	Camera	A	Head phone
	Head phone	B	Tablet
F		D	Camera
D	Watch	F	Watch
E	Laptop	E	Laptop

Answer: C

5. Questions

Final arrangement:

Person	Things
C	Mobile
A	Head phone
B	Tablet
D	Camera
F	Watch
E	Laptop

We have,

- Only two persons bought things between A and the one who bought the Watch, where neither

of them bought the things at first and last.

- A bought immediately after the one who bought the mobile.

From the above conditions, there are two possibilities.

Case 1		Case 2	
Person	Things	Person	Things
	Mobile		
A			Watch
			Mobile
	Watch	A	

Again, we have,

- As many persons bought the things before the one who bought the mobile as after E.
- Only one person bought the things between D and the one who bought headphones, who bought before D.

From the above conditions, one more possibility, Case 1(a), is added, and Case-2 gets eliminated because only one person bought the things between D and the one who bought headphones, who bought before D, which is not satisfied.

Case 1		Case 1(a)		Case 2	
Person	Things	Person	Things	Person	Things
	Mobile		Mobile		
A		A	Head phone		Watch
	Head phone			E	
		D			Mobile
D	Watch		Watch	A	
E		E			

Again, we have,

- F bought neither a headphone nor a Mobile.
- E bought a Laptop.
- The number of persons who bought between F and the one who bought a laptop is the same as the number of persons who bought between F and the one who bought a camera.
- B neither buys first nor adjacent to F.

From the above condition, Case-1 gets eliminated because B neither buys first nor is adjacent to F, which is not satisfied.

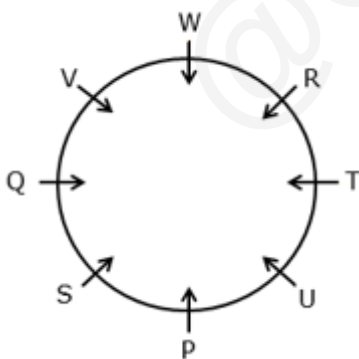

Hence, Case-1(a) shows the final arrangement.

Case 1		Case 1(a)	
Person	Things	Person	Things
	Mobile	C	Mobile
A	Camera	A	Head phone
	Head phone	B	Tablet
F		D	Camera
D	Watch	F	Watch
E	Laptop	E	Laptop

Answer: A

6. Questions

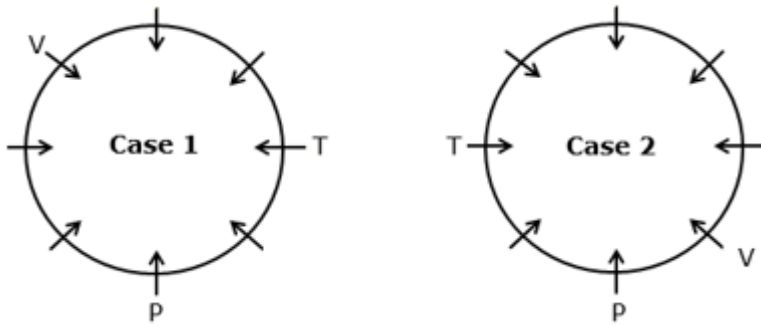

Final arrangement:

We have,

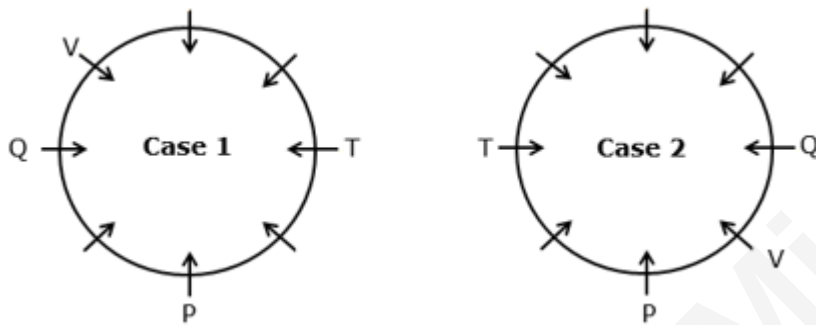

- Only one person sits between P and T, who sits third to the left of V.

From the above conditions, there are two possibilities.

Again, we have,

- Q sits to the immediate right of V.
- Q sits adjacent to neither W nor R.

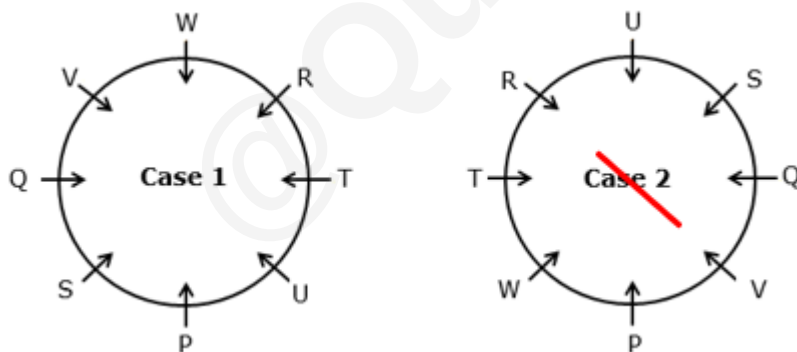

Again, we have,

- W sits third to the right of U, who is not an immediate neighbour of S.

From the above condition, Case-2 **gets eliminated** because W sits third to the right of U, who is not an immediate neighbour of S, which is not satisfied.

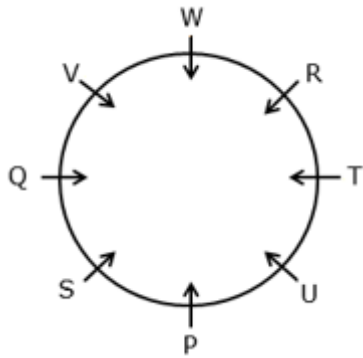

Hence, Case-1 shows the final arrangement.

Answer: E

7. Questions

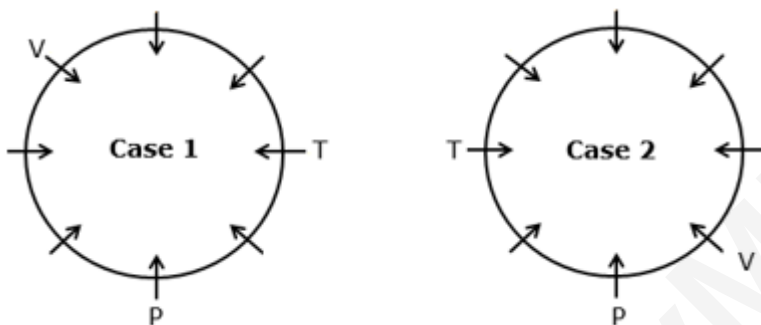

Final arrangement:

We have,

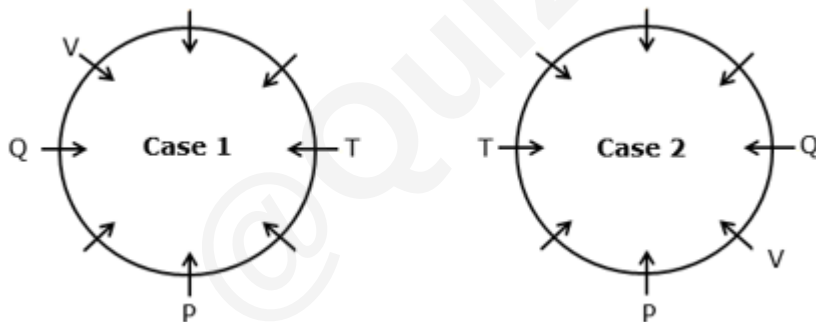

- Only one person sits between P and T, who sits third to the left of V.

From the above conditions, there are two possibilities.

Again, we have,

- Q sits to the immediate right of V.
- Q sits adjacent to neither W nor R.

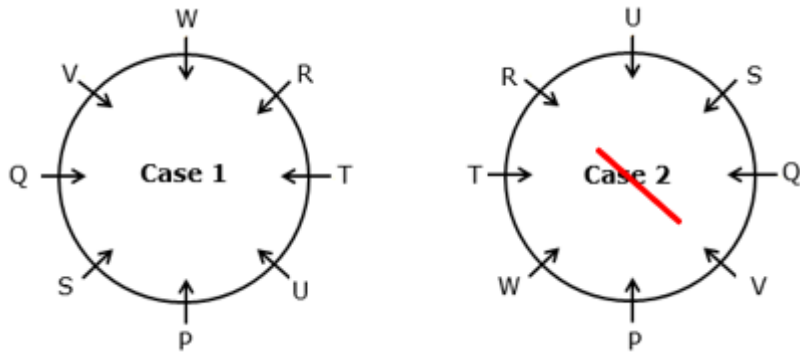

Again, we have,

- W sits third to the right of U, who is not an immediate neighbour of S.

From the above condition, Case-2 **gets eliminated** because W sits third to the right of U, who is not an immediate neighbour of S, which is not satisfied.

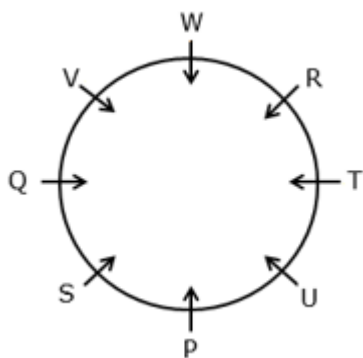

Hence, Case-1 shows the final arrangement.

Answer: C (No one remains unchanged)

8. Questions

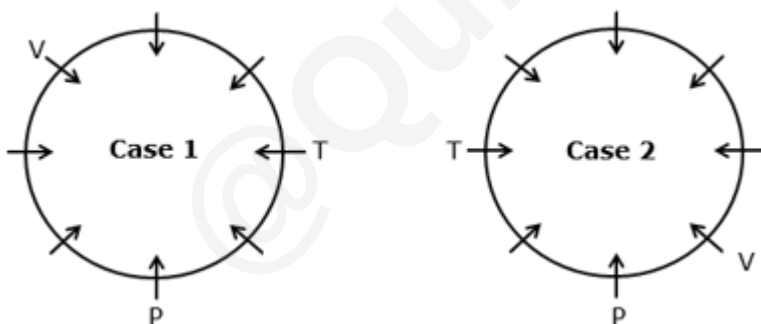

Final arrangement:

We have,

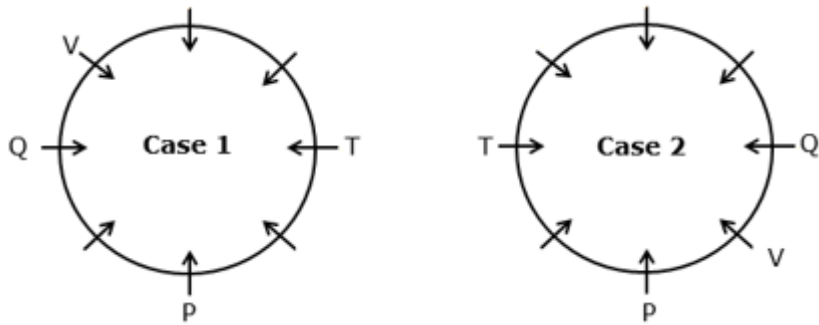

- Only one person sits between P and T, who sits third to the left of V.

From the above conditions, there are two possibilities.

Again, we have,

- Q sits to the immediate right of V.
- Q sits adjacent to neither W nor R.

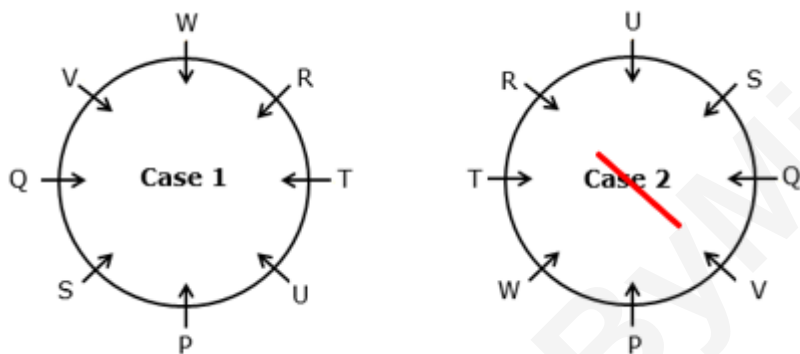

Again, we have,

- W sits third to the right of U, who is not an immediate neighbour of S.

From the above condition, Case-2 **gets eliminated** because W sits third to the right of U, who is not an immediate neighbour of S, which is not satisfied.

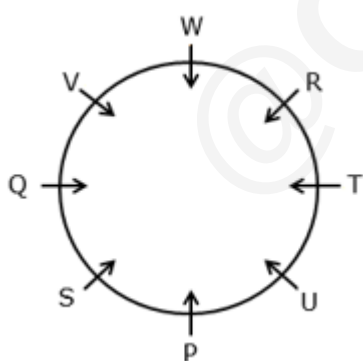

Hence, Case-1 shows the final arrangement.

Answer: B (The first person sits exactly opposite to the second person except option b)

9. Questions

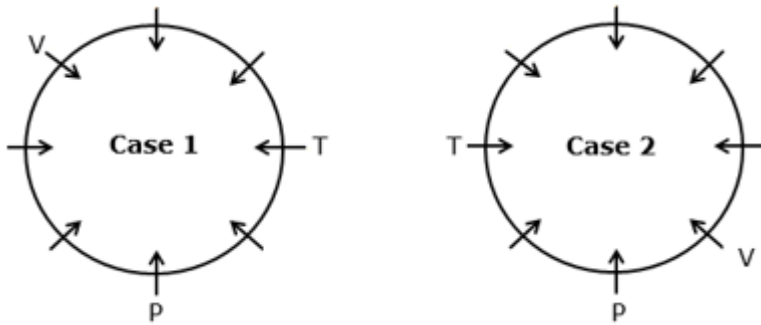

Final arrangement:

We have,

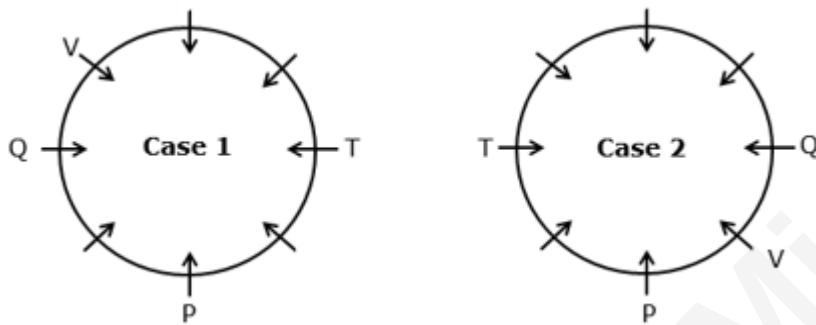

- Only one person sits between P and T, who sits third to the left of V.

From the above conditions, there are two possibilities.

Again, we have,

- Q sits to the immediate right of V.
- Q sits adjacent to neither W nor R.

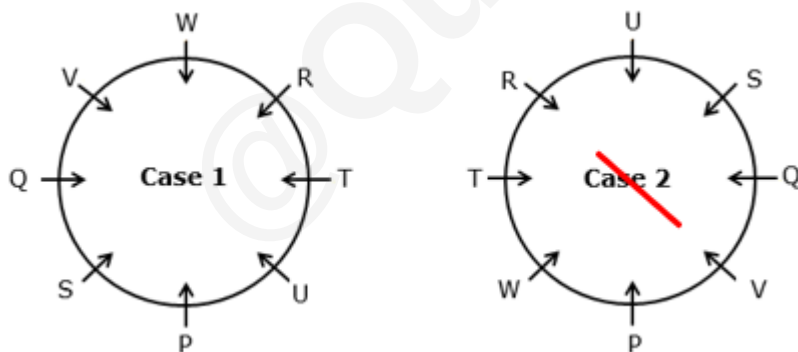

Again, we have,

- W sits third to the right of U, who is not an immediate neighbour of S.

From the above condition, Case-2 **gets eliminated** because W sits third to the right of U, who is not an immediate neighbour of S, which is not satisfied.

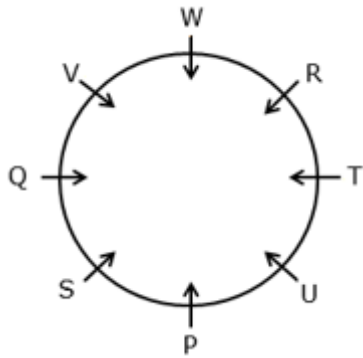

Hence, Case-1 shows the final arrangement.

Answer: D

10. Questions

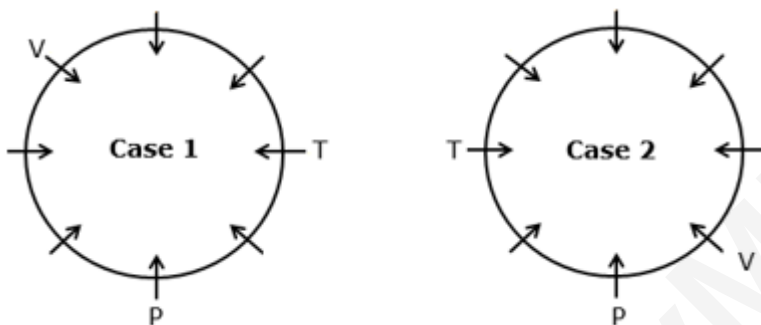

Final arrangement:

We have,

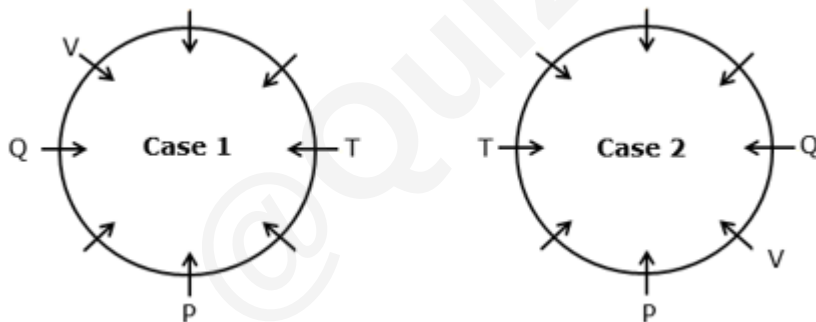

- Only one person sits between P and T, who sits third to the left of V.

From the above conditions, there are two possibilities.

Again, we have,

- Q sits to the immediate right of V.
- Q sits adjacent to neither W nor R.

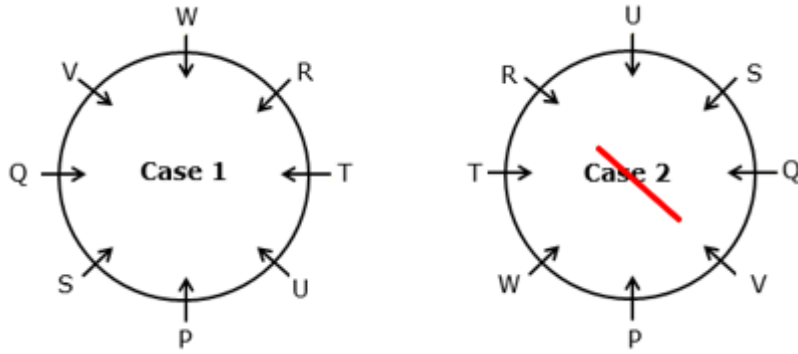

Again, we have,

- W sits third to the right of U, who is not an immediate neighbour of S.

From the above condition, Case-2 **gets eliminated** because W sits third to the right of U, who is not an immediate neighbour of S, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: A

11. Questions

Final arrangement:

Day	Person
Sunday	U
Monday	V
Tuesday	S
Wednesday	P
Thursday	R
Friday	Q
Saturday	T

We have,

- Only two persons went to class between P and T.
- Either P or T went to class on Saturday.

From the above conditions, there are two possibilities.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		
Tuesday		
Wednesday	P	T
Thursday		
Friday		
Saturday	T	P

Again, we have,

- The number of persons who went before P is **one more than** the number of persons who went after R.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		R
Tuesday		
Wednesday	P	T
Thursday	R	
Friday		
Saturday	T	P

Again, we have,

- More than two persons went to the class between V and Q.
- V neither went after Q nor went at first.
- S went to class after V.

From the above conditions, Case-2 gets eliminated because V neither went after Q nor went at first is not satisfied.

Hence, Case-1 shows the final arrangement.

Day	Case 1	Case 2
	Person	Person
Sunday	U	V
Monday	V	R
Tuesday	S	
Wednesday	P	T
Thursday	R	
Friday	Q	Q
Saturday	T	P

Answer: E

12. Questions

Final arrangement:

Day	Person
Sunday	U
Monday	V
Tuesday	S
Wednesday	P
Thursday	R
Friday	Q
Saturday	T

We have,

- Only two persons went to class between P and T.
- Either P or T went to class on Saturday.

From the above conditions, there are two possibilities.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		
Tuesday		
Wednesday	P	T
Thursday		
Friday		
Saturday	T	P

Again, we have,

- The number of persons who went before P **is one more than** the number of persons who went after R.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		R
Tuesday		
Wednesday	P	T
Thursday	R	
Friday		
Saturday	T	P

Again, we have,

- More than two persons went to the class between V and Q.
- V neither went after Q nor went at first.
- S went to class after V.

From the above conditions, Case-2 gets eliminated because V neither went after Q nor went at first is not satisfied.

Hence, Case-1 shows the final arrangement.

Day	Case 1	Case 2
	Person	Person
Sunday	U	V
Monday	V	R
Tuesday	S	
Wednesday	P	T
Thursday	R	
Friday	Q	Q
Saturday	T	P

Answer: D

13. Questions

Final arrangement:

Day	Person
Sunday	U
Monday	V
Tuesday	S
Wednesday	P
Thursday	R
Friday	Q
Saturday	T

We have,

- Only two persons went to class between P and T.
- Either P or T went to class on Saturday.

From the above conditions, there are two possibilities.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		
Tuesday		
Wednesday	P	T
Thursday		
Friday		
Saturday	T	P

Again, we have,

- The number of persons who went before P **is one more than** the number of persons who went after R.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		R
Tuesday		
Wednesday	P	T
Thursday	R	
Friday		
Saturday	T	P

Again, we have,

- More than two persons went to the class between V and Q.
- V neither went after Q nor went at first.
- S went to class after V.

From the above conditions, Case-2 gets eliminated because V neither went after Q nor went at first is not satisfied.

Hence, Case-1 shows the final arrangement.

Day	Case 1	Case 2
	Person	Person
Sunday	U	V
Monday	V	R
Tuesday	S	
Wednesday	P	T
Thursday	R	
Friday	Q	Q
Saturday	T	P

Answer: E (In all other options, only two persons went to the yoga class between the first person and the second person, except option D)

14. Questions

Final arrangement:

Day	Person
Sunday	U
Monday	V
Tuesday	S
Wednesday	P
Thursday	R
Friday	Q
Saturday	T

We have,

- Only two persons went to class between P and T.
- Either P or T went to class on Saturday.

From the above conditions, there are two possibilities.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		
Tuesday		
Wednesday	P	T
Thursday		
Friday		
Saturday	T	P

Again, we have,

- The number of persons who went before P **is one more than** the number of persons who went after R.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		R
Tuesday		
Wednesday	P	T
Thursday	R	
Friday		
Saturday	T	P

Again, we have,

- More than two persons went to the class between V and Q.
- V neither went after Q nor went at first.
- S went to class after V.

From the above conditions, Case-2 gets eliminated because V neither went after Q nor went at first is not satisfied.

Hence, Case-1 shows the final arrangement.

Day	Case 1	Case 2
	Person	Person
Sunday	U	V
Monday	V	R
Tuesday	S	
Wednesday	P	T
Thursday	R	
Friday	Q	Q
Saturday	T	P

Answer: C

15. Questions

Final arrangement:

Day	Person
Sunday	U
Monday	V
Tuesday	S
Wednesday	P
Thursday	R
Friday	Q
Saturday	T

We have,

- Only two persons went to class between P and T.
- Either P or T went to class on Saturday.

From the above conditions, there are two possibilities.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		
Tuesday		
Wednesday	P	T
Thursday		
Friday		
Saturday	T	P

Again, we have,

- The number of persons who went before P is **one more than** the number of persons who went after R.

Day	Case 1	Case 2
	Person	Person
Sunday		
Monday		R
Tuesday		
Wednesday	P	T
Thursday	R	
Friday		
Saturday	T	P

Again, we have,

- More than two persons went to the class between V and Q.
- V neither went after Q nor went at first.
- S went to class after V.

From the above conditions, Case-2 gets eliminated because V neither went after Q nor went at first is not satisfied.

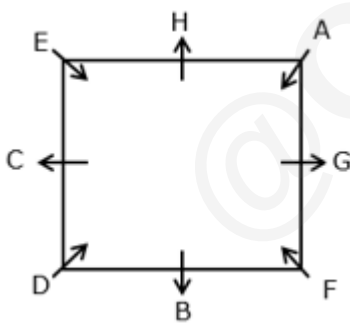

Hence, Case-1 shows the final arrangement.

Day	Case 1	Case 2
	Person	Person
Sunday	U	V
Monday	V	R
Tuesday	S	
Wednesday	P	T
Thursday	R	
Friday	Q	Q
Saturday	T	P

Answer: B

16. Questions

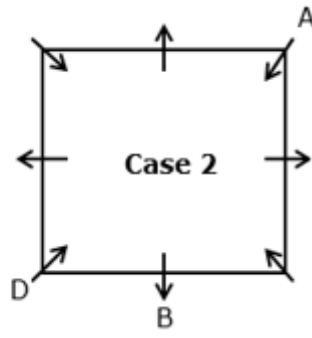

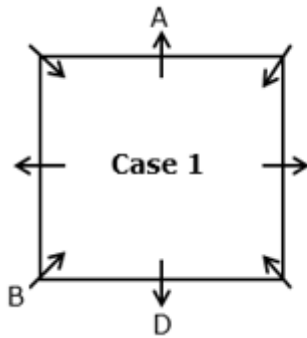

Final arrangement:

We have,

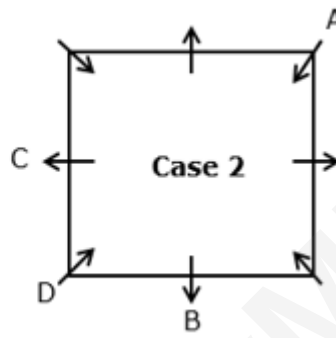

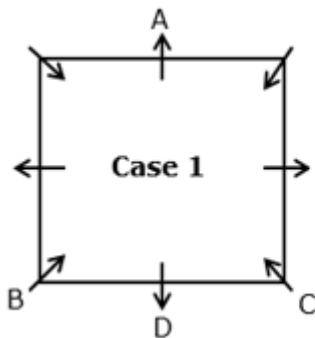

- B and D sit to the immediate right of each other.
- A sits four persons away from D.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and A (when counted from the left of B) as sit between A and C (when counted from the right of A).

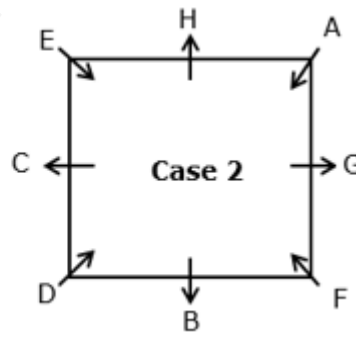

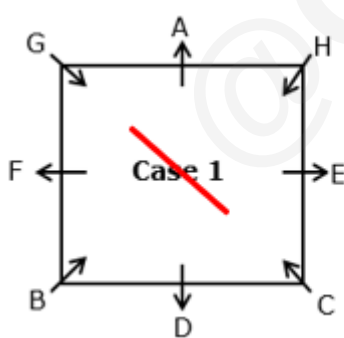

Again, we have,

- G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner.

From the above conditions, Case-1 gets eliminated because G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner, which is not satisfied.

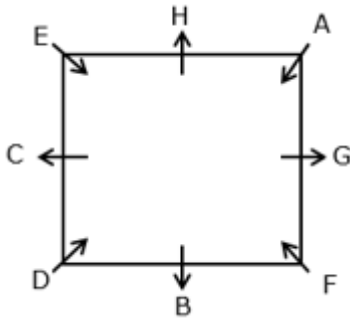

Hence, Case-2 shows the final arrangement.

Answer: B

17. Questions

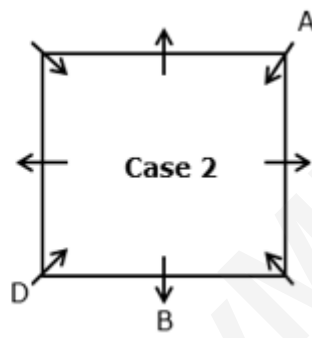

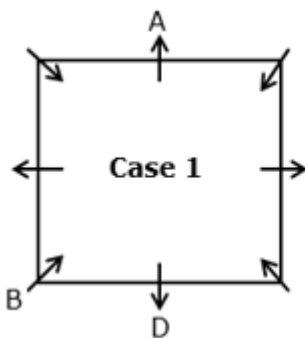

Final arrangement:

We have,

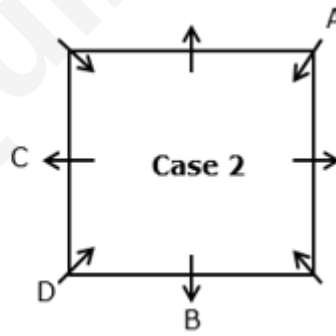

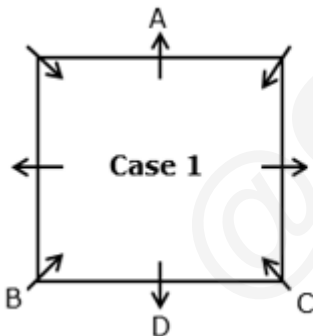

- B and D sit to the immediate right of each other.
- A sits four persons away from D.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and A (when counted from the left of B) as sit between A and C (when counted from the right of A).

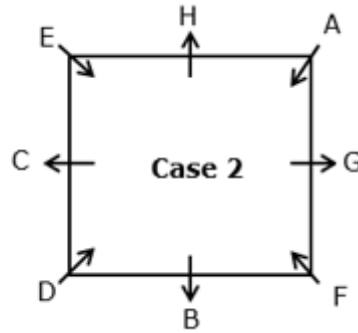

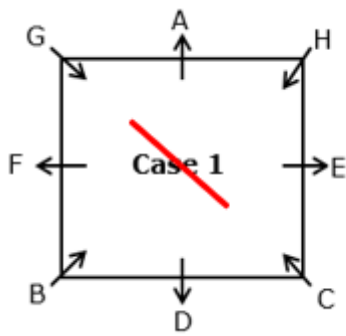

Again, we have,

- G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner.

From the above conditions, Case-1 gets eliminated because G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner, which is not satisfied.

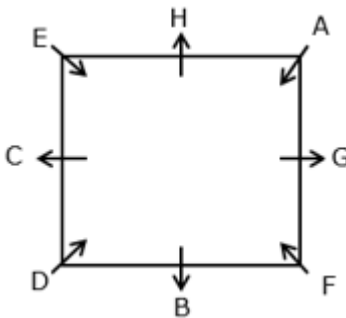

Hence, Case-2 shows the final arrangement.

Answer: C

18. Questions

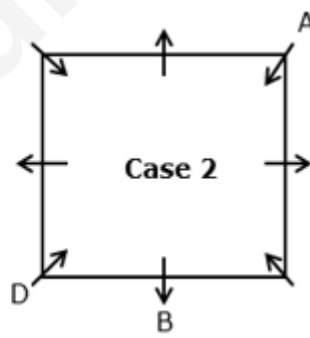

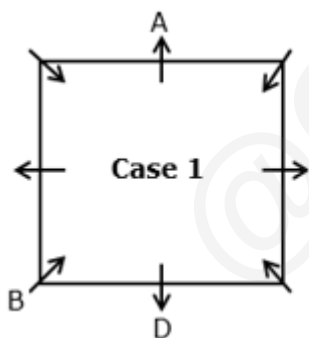

Final arrangement:

We have,

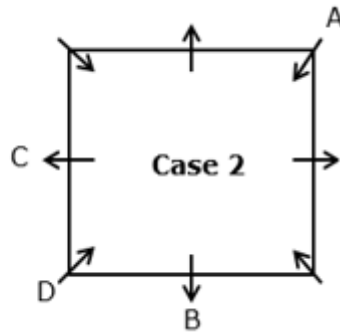

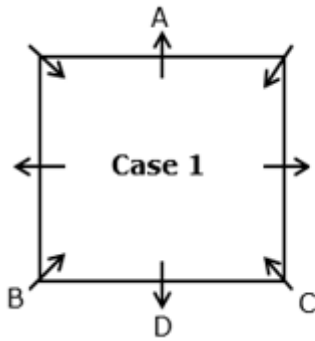

- B and D sit to the immediate right of each other.
- A sits four persons away from D.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and A (when counted from the left of B) as sit between A and C (when counted from the right of A).

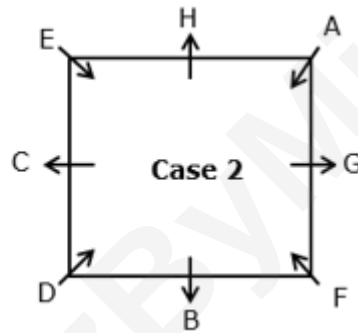

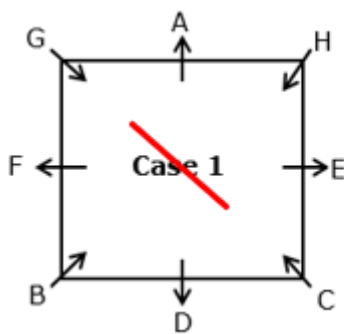

Again, we have,

- G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner.

From the above conditions, Case-1 gets eliminated because G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner, which is not satisfied.

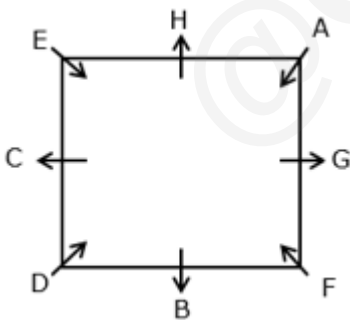

Hence, Case-2 shows the final arrangement.

Answer: D (All other persons sit in the corner while option C sits in the middle of the side)

19. Questions

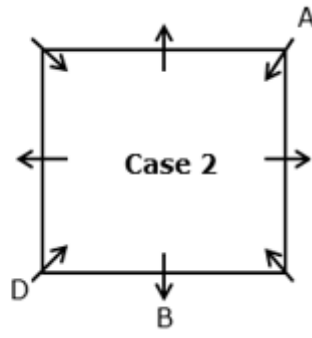

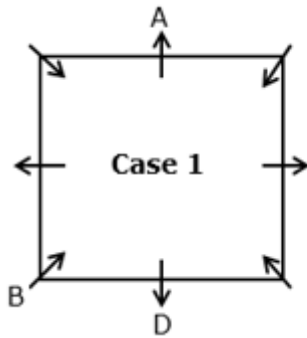

Final arrangement:

We have,

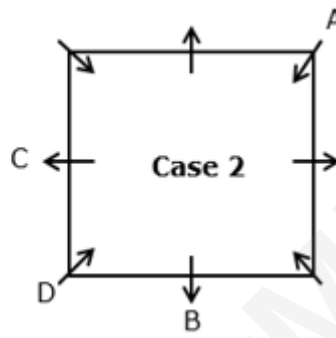

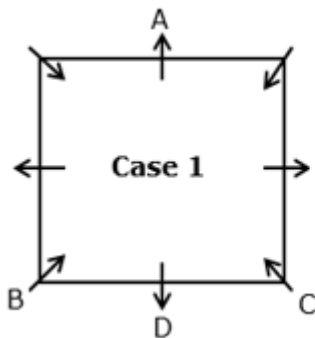

- B and D sit to the immediate right of each other.
- A sits four persons away from D.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and A (when counted from the left of B) as sit between A and C (when counted from the right of A).

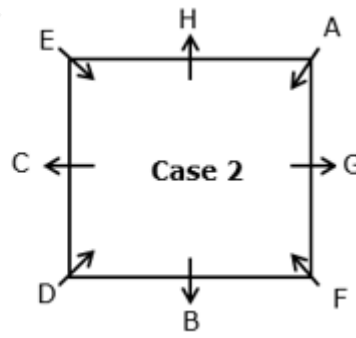

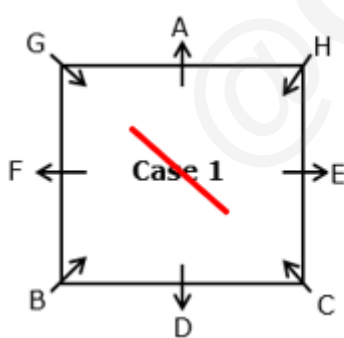

Again, we have,

- G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner.

From the above conditions, Case-1 gets eliminated because G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner, which is not satisfied.

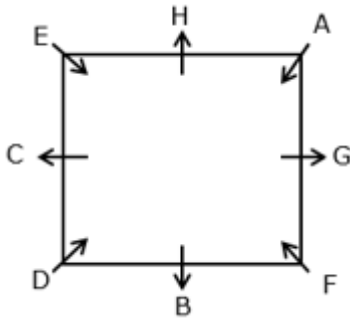

Hence, Case-2 shows the final arrangement.

Answer: A

20. Questions

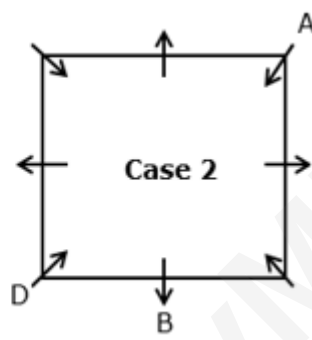

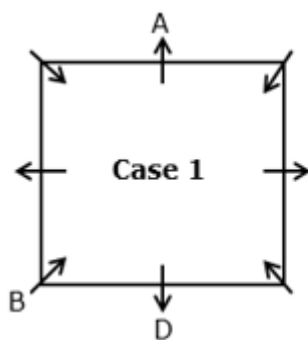

Final arrangement:

We have,

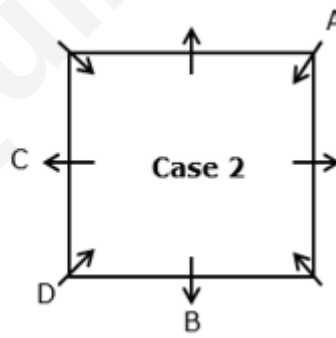

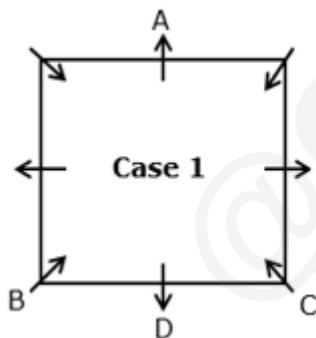

- B and D sit to the immediate right of each other.
- A sits four persons away from D.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and A (when counted from the left of B) as sit between A and C (when counted from the right of A).

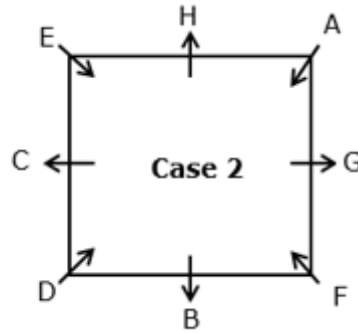

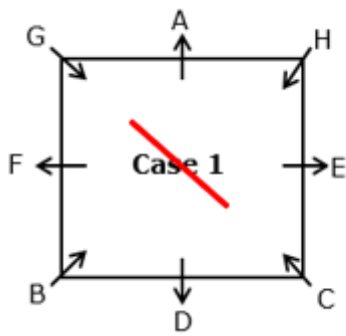

Again, we have,

- G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner.

From the above conditions, Case-1 gets eliminated because G faces the same direction as B and sits second to the right of H, who is neither an immediate neighbour of F nor sits at the corner, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: E

21. Questions

Answer: A

Statement: $Q \geq R > A$; $R < P < T$; $A = S \leq H$

I). $Q > S$ ($Q \geq R > A = S$) --> True

II). $P < Q$ ($P > R \leq Q$) --> False

22. Questions

Answer: D

Statement: $F \leq S > U$; $H > S$; $L < S$

I). $L > U$ ($L < S > U$) --> False

II). $H > U$ ($H > S > U$) --> True

23. Questions

Answer: E

Statement: $K = F < N < P \leq R > M$; $W \geq K$; $R \geq X$

I). $N < X$ ($N < P \leq R \geq X$) --> False

II). $M > F$ ($M < R \geq P > N > F$) --> False

24. Questions

Answer: B

Statement: $P \geq W \leq Z$; $W > K$; $Q > O < Z$

I). $W > Q$ ($W \leq Z > O < Q$) --> False

II). $W \leq Q$ ($W \leq Z > O < Q$) --> False

25. Questions

Answer: C

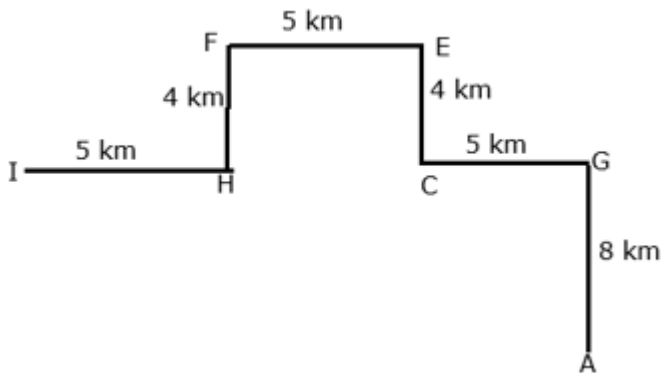

Statement: $A > G < J$; $I < E$; $J < O = K > E$

I). $G < O$ ($G < J < O$) --> True

II). $O > I$ ($O = K > E \geq I$) $\rightarrow$ True

26. Questions

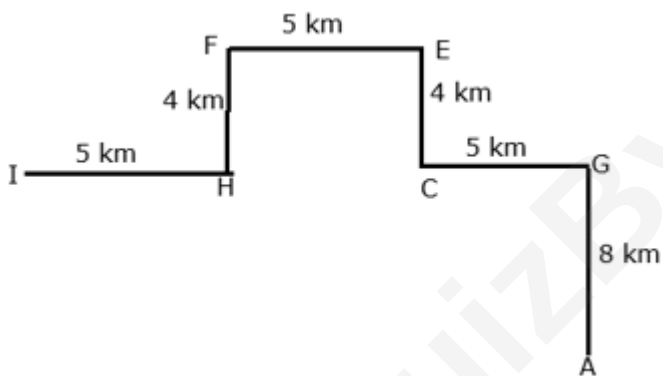

Final arrangement:

Answer: C (In all the other options, the second point is North-West of the first point except option C)

27. Questions

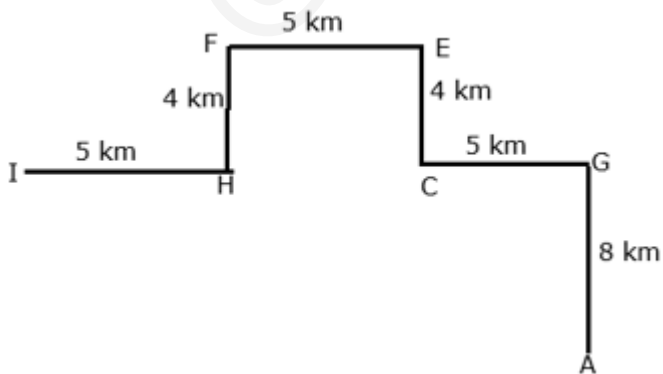

Final arrangement:

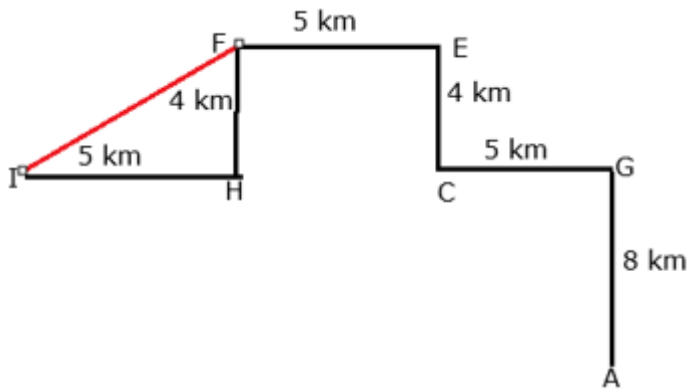

Answer: B

28. Questions

Final arrangement:

Answer: A

As per Pythagoras ' theorem:

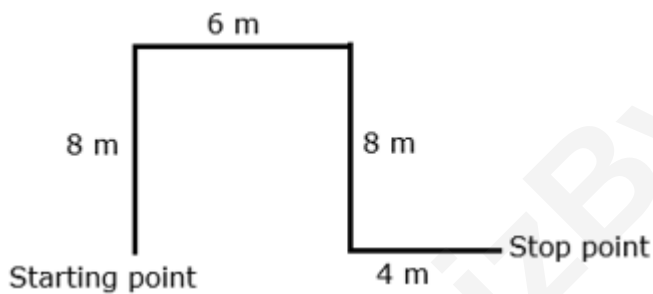

$$FI = \sqrt{5^2 + 4^2}$$

$$= \sqrt{25 + 16}$$

$$= \sqrt{41} \text{ m}$$

29. Questions

Final arrangement:

Answer: D

Speed of the person = 2m/sec

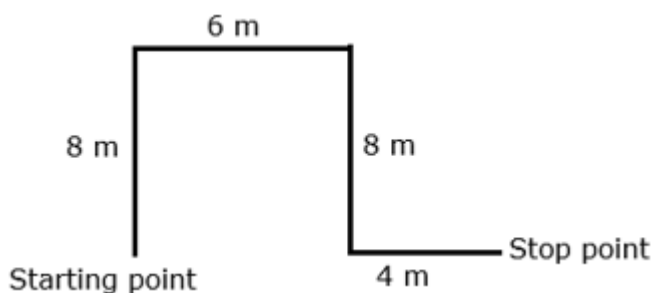

Total distance = 26m

Time taken = 26 / 2

= 13 Sec

30. Questions

Final arrangement:

Answer: E
