

1. Questions

Study the following information carefully and answer the given questions

Eight people - A, B, C, D, E, F, G, and H are working in the bank at different designations such as Executive Director (ED), General Manager (GM), Deputy General Manager (DGM), Assistant General Manager (AGM), Chief Manager (CM), Senior Manager (SM), Manager and PO. The hierarchy of the designations is given in decreasing order such as Executive Director is the seniormost designation and PO is the juniormost designation.

A is designated junior to the Chief Manager. Only two people are designated between A and D. As many people are designated senior to B as junior to C, who is designated immediately junior to E. E was neither designated as Executive Director nor as Senior Manager. The number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director.

Four of the following five are alike in a certain way and hence form a group as per the final arrangement. Who among the following does not belong to the group?

- a. GE
- b. ED
- c. CF
- d. DB
- e. HA

2. Questions

If all the people are arranged in alphabetical order from the Executive Director, then how many people remain unchanged in their position?

- a. Two
- b. Three
- c. None
- d. More than three
- e. One

3. Questions

Which of the following statement(s) is/are true with respect to the final arrangement?

- a. No one is designated between F and D
- b. Only two people are designated between C and H
- c. G is designated as Senior Manager
- d. C is designated as PO

e. None of the above

4. Questions

How many people are designated between A and the one who is designated as General Manager?

- a. Two
- b. Three
- c. Five
- d. One
- e. Four

5. Questions

Who among the following people is designated as Deputy General Manager?

- a. D
- b. B
- c. A
- d. C
- e. E

6. Questions

Study the following information carefully and answer the given questions

Nine persons- P, Q, R, S, T, U, V, W, and X are sitting in a linear row. Some of them are facing north, and some of them are facing south. Not more than two adjacent persons are facing the same direction.

P sits sixth to the left of Q, who faces south. Only two persons sit between Q and S. T sits second to the right of S but not adjacent to P. R sits immediate right of T. As many persons sit to the left of U as to the right of W, who does not sit adjacent to Q. The number of persons who sit to the left of V is **two more than** the number of persons who sit to the left of X. The number of persons who face north is more than five.

Four of the following five are alike in a certain way and hence form a group as per the final arrangement. Who among the following does not belong to the group?

- a. S
- b. X
- c. U
- d. T
- e. R

7. Questions

If all the persons are arranged in alphabetical order from west to east, then how many persons remain unchanged in their position?

- a. None
- b. Two
- c. Three
- d. Four
- e. More than four

8. Questions

Which of the following statement(s) is/are true with respect to the final arrangement?

- a. No one sits to the right of X
- b. Only four persons are facing south
- c. Only two persons sit between W and U
- d. No one sits to the right of V
- e. None of the above

9. Questions

What is the position of W with respect to T?

- a. Third to the right
- b. Second to the left
- c. Third to the left
- d. Fourth to the right
- e. Second to the right

10. Questions

How many persons are sitting between R and V?

- a. One
- b. Three
- c. Both a and e
- d. Two
- e. As many persons sit to the left of U

11. Questions

Study the following information carefully and answer the given questions

Nine Boxes - A, B, C, D, E, F, G, H and I are kept one above the other on a single stack. The lowermost shelf is numbered as one, and the topmost box is numbered as Nine.

Box A is kept on an odd-numbered shelf but above the fourth shelf. Box D is kept three boxes below box A. As many boxes are kept above box D as below box B. Box E is kept immediately below box B. Only three boxes are kept between box H and box C, which is kept immediately below box F. The number of boxes kept between box C and box F is **two less than** the number of boxes kept between box G and box H.

Which of the following statement(s) is/are true with respect to the final arrangement?

- a. Box G is kept immediately above box E
- b. No boxes are kept below box C
- c. Only two boxes are kept between box F and box I
- d. Only four boxes are kept above box A
- e. None of the above

12. Questions**What is the position of box F with respect to box D?**

- a. Immediately above
- b. Two boxes above
- c. Three boxes above
- d. Four boxes below
- e. None of the above

13. Questions

Four of the following five are alike in a certain way and hence form a group as per the final arrangement. Which of the following does not belong to that group?

- a. IH
- b. GA
- c. DI
- d. BH
- e. FE

14. Questions

If all the boxes are arranged in alphabetical order from the topmost shelf, then how many boxes remain unchanged in their position?

- a. Three
- b. One
- c. Two
- d. Four
- e. None

15. Questions

How many boxes are kept between box B and box E?

- a. More than three
- b. One
- c. Two
- d. Three
- e. None

16. Questions

Study the following information carefully and answer the given questions.

A certain number of persons are sitting in a linear row such that all of them are facing towards the north. Not more than 16 persons sit in the linear row.

A sits second to the right of B. Only three persons sit between A and D. As many persons sit to the right of B as to the left of Z, who sits seventh to the left of D. Only two persons sit between Z and G, who neither sits at the extreme end nor sits fifth from any of the ends. The number of persons who sit between G and R is **two more than** the number of persons who sit between B and W, who sits immediate to the left of A. R does not sit at the extreme end of the row.

How many persons are there in the linear row?

- a. 14
- b. 15
- c. 16
- d. 12
- e. 13

17. Questions

Who among the following person sits third to the left of D?

- a. The one who sits second to the right of B
- b. G

- c. The one who sits immediate right of G
- d. B
- e. Z

18. Questions

How many persons sit to the left of G?

- a. Four
- b. None
- c. One
- d. Two
- e. Five

19. Questions

Which of the following statements are TRUE based on the final arrangement?

- a. Only two persons sit to the left of B
- b. No one sits between R and D
- c. Only three persons sit between R and G
- d. Both a and d
- e. None of the above

20. Questions

What is the position of R with respect to A?

- a. Immediate right
- b. Fourth to the right
- c. Third to the left
- d. Fifth to the left
- e. Second to the right

21. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements:

Some People are watches

Only a few watches are pens

Some pens are not lamps

Some lamps are phones

Only a few phones are black

Conclusions:

I). Some black are people

II). All pens can be watches.

- a. Neither conclusion I nor II follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follow
- e. Both conclusions I and II follow

22. Questions

Statements:

Only a few mobiles are laptops

Some laptops are gold

All gold is black

Some black is silver

Conclusions:

I). Some silver is mobile

II). All gold is mobile

- a. Neither conclusion I nor II follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follow
- e. Both conclusions I and II follow

23. Questions

Statements:

No Time is Money

All Money are Red

Some Red is silver

Some silver is not blue

Only a few apples are time

Conclusions:

I). All Time can be Silver

II). All apples can be blue

- a. Neither conclusion I nor II follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follow
- e. Both conclusions I and II follow

24. Questions

Statements:

Only a few Blue are lamps

Some lamps are phones

Only a few phones are watches

No watch is pens

Some Books are blue

Conclusions:

I). All pens can be books

II). Some watches are blue

- a. Neither conclusion I nor II follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follow
- e. Both conclusions I and II follow

25. Questions

Statements:

Some Glass is gold

All gold are water

Only a few books are water

Some time is not Glass

Conclusions:

I). Some Glass are Books

II). No Glass is Books

- a. Neither conclusion I nor II follows
- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follow
- e. Both conclusions I and II follow

26. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusion which is definitely true.

Statements:

$A > B > Z \geq R; T < Y > U = R; E < Q > W$

Conclusions:

I: $A > T$

II: $U > B$

- a. Only conclusion I is true
- b. Both conclusions I and II are true
- c. Only conclusion II is true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

27. Questions

Statements:

$G = H > L \geq Y < Q; S > R < W > Q; E > A < V > G$

Conclusions:

I: $W \geq Y$

II: $V > Y$

- a. Only conclusion I is true
- b. Both conclusions I and II are true

- c. Only conclusion II is true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

28. Questions**Statements:**

$Y > R > W < U < I; Q < W \leq Z \leq G; B < N > H > I$

Conclusions:

I: $N > Q$

II: $G \geq H$

- a. Only conclusion I is true
- b. Both conclusions I and II are true
- c. Only conclusion II is true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

29. Questions**Statements:**

$A \geq T \geq F > Y < Q; E \leq Q = R < Z; F > M > V < O$

Conclusions:

I: $Z > Y$

II: $A > V$

- a. Only conclusion I is true
- b. Both conclusions I and II are true
- c. Only conclusion II is true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

30. Questions**Statements:**

$A > G > T < H; R > C \geq N > H; R > W > Q$

Conclusions:

I: $G \geq Q$

II). $G < Q$

- a. Only conclusion I is true
- b. Both conclusions I and II are true
- c. Only conclusion II is true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

31. Questions

Study the following information carefully and answer the given questions.

A is the brother of C, who is the sister-in-law of D, who is the son of N.

G is the mother-in-law of H, who is the mother of P, who is the daughter of D. X has three children. Y is the mother of A, who is the only son of X. C is unmarried.

How many female members are in the family?

- a. Three
- b. None
- c. Five
- d. One
- e. Two

32. Questions

How is D related to A?

- a. Uncle
- b. Father
- c. Father-in-law
- d. Brother
- e. Brother-in-law

33. Questions

If S is married to C, then how is S related to Y?

- a. Son-in-law
- b. Uncle
- c. Brother-in-law
- d. Son

e. None of the above

34. Questions

Study the following information carefully and answer the given questions.

B is the daughter of T and has only one sibling. P is the sister-in-law of B. D is the father of three children and one of the children is married. P's mother is the paternal grandmother of C. E is the mother-in-law of S, who has two sisters. S is the father of C. D is the paternal grandfather of C and is not married to E.

If Y is the mother of S, then which of the following statements is true with respect to Y?

- a. Y is the mother of B
- b. E is the sister-in-law of Y
- c. Y has one daughter and one son
- d. Only one child of Y is married
- e. None of the statements is true

35. Questions

If X is the brother of B, then how is C related to X?

- a. Brother
- b. Nephew
- c. Niece
- d. Daughter
- e. Cannot be determined

36. Questions

If all the digits of the given number “756846359643454753” are arranged in ascending order from the left end, then how many digits remain unchanged in their positions?

- a. Two
- b. One
- c. More than three
- d. None
- e. Three

37. Questions

If in the given number “564364754673647” two is subtracted from all the odd digits and one is added to all the even digits, then what is the sum of the digits which are third from the right end and sixth from the left end in the newly formed number?

- a. 15
- b. 12
- c. 11
- d. 13
- e. 16

38. Questions

If in the given number “36467523545675457” one is subtracted from all the odd digits and two is added to all the even digits, then how many digits appear more than twice in the newly formed number?

- a. Two
- b. More than three
- c. None
- d. Three
- e. One

39. Questions

If a five letter meaningful word can be formed by using the 1st, 3rd, 7th, 9th, and 11th letters only once of the word “MISCOMMUNICATION” from the left end of the word, then which is the second letter from the left of the meaningful word? If no such word can be formed, then give ‘X’ as the answer. If more than one word can be formed, then give ‘Y’ as the answer.

- a. X
- b. M
- c. Y
- d. C
- e. I

40. Questions

If all the vowels of the word “FUTURE” are changed to the immediate next letter and all the consonants are changed to the immediate preceding letter in the alphabetical series, then arrange all the letters in alphabetical order from left to right, then which of the following letter is third from the left end?

- a. E
- b. F
- c. Q

d. S

e. V

Explanations:

1. Questions

Final Arrangement:

Designation	People
Executive Director	G
General Manager	E
Deputy General Manager	C
Assistant General Manager	F
Chief Manager	D
Senior Manager	B
Manager	H
PO	A

We have,

- A is designated junior to the Chief Manager.
- Only two people are designated between A and D.

From the above conditions, there are three possibilities.

Designation	Case-1	Case-2	Case-3
	People	People	People
Executive Director			
General Manager			
Deputy General Manager	D		
Assistant General Manager		D	
Chief Manager			D
Senior Manager	A		
Manager		A	
PO			A

Again, we have,

- As many people are designated senior to B as junior to C, who is designated immediately junior to E.
- E was neither designated as Executive Director nor as Senior Manager.

From the above conditions case 2 splits into case 2a

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	
PO	C			A

Again, we have,

- The number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director.

From the above conditions, Case-1, case -2a and Case-2 get eliminated because the number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			G
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	F
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	H
PO	C			A

Answer: B (In all other options, the first person is immediately senior to the second person except option B)

2. Questions

Final Arrangement:

Designation	People
Executive Director	G
General Manager	E
Deputy General Manager	C
Assistant General Manager	F
Chief Manager	D
Senior Manager	B
Manager	H
PO	A

We have,

- A is designated junior to the Chief Manager.
- Only two people are designated between A and D.

From the above conditions, there are three possibilities.

Designation	Case-1	Case-2	Case-3
	People	People	People
Executive Director			
General Manager			
Deputy General Manager	D		
Assistant General Manager		D	
Chief Manager			D
Senior Manager	A		
Manager		A	
PO			A

Again, we have,

- As many people are designated senior to B as junior to C, who is designated immediately junior to E.
- E was neither designated as Executive Director nor as Senior Manager.

From the above conditions case 2 splits into case 2a

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	
PO	C			A

Again, we have,

- The number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director.

From the above conditions, Case-1, case -2a and Case-2 get eliminated because the number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			G
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	F
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	H
PO	C			A

Answer: E (After rearranging all the people in alphabetical order, only 'C' remains unchanged)

3. Questions

Final Arrangement:

Designation	People
Executive Director	G
General Manager	E
Deputy General Manager	C
Assistant General Manager	F
Chief Manager	D
Senior Manager	B
Manager	H
PO	A

We have,

- A is designated junior to the Chief Manager.

- Only two people are designated between A and D.

From the above conditions, there are three possibilities.

Designation	Case-1	Case-2	Case-3
	People	People	People
Executive Director			
General Manager			
Deputy General Manager	D		
Assistant General Manager		D	
Chief Manager			D
Senior Manager	A		
Manager		A	
PO			A

Again, we have,

- As many people are designated senior to B as junior to C, who is designated immediately junior to E.
- E was neither designated as Executive Director nor as Senior Manager.

From the above conditions case 2 splits into case 2a

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	
PO	C			A

Again, we have,

- The number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director.

From the above conditions, Case-1, case -2a and Case-2 get eliminated because the number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			G
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	F
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	H
PO	C			A

Answer: A

4. Questions

Final Arrangement:

Designation	People
Executive Director	G
General Manager	E
Deputy General Manager	C
Assistant General Manager	F
Chief Manager	D
Senior Manager	B
Manager	H
PO	A

We have,

- A is designated junior to the Chief Manager.

- Only two people are designated between A and D.

From the above conditions, there are three possibilities.

Designation	Case-1	Case-2	Case-3
	People	People	People
Executive Director			
General Manager			
Deputy General Manager	D		
Assistant General Manager		D	
Chief Manager			D
Senior Manager	A		
Manager		A	
PO			A

Again, we have,

- As many people are designated senior to B as junior to C, who is designated immediately junior to E.
- E was neither designated as Executive Director nor as Senior Manager.

From the above conditions case 2 splits into case 2a

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	
PO	C			A

Again, we have,

- The number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director.

From the above conditions, Case-1, case -2a and Case-2 get eliminated because the number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			G
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	F
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	H
PO	C			A

Answer: C

5. Questions

Final Arrangement:

Designation	People
Executive Director	G
General Manager	E
Deputy General Manager	C
Assistant General Manager	F
Chief Manager	D
Senior Manager	B
Manager	H
PO	A

We have,

- A is designated junior to the Chief Manager.

- Only two people are designated between A and D.

From the above conditions, there are three possibilities.

Designation	Case-1	Case-2	Case-3
	People	People	People
Executive Director			
General Manager			
Deputy General Manager	D		
Assistant General Manager		D	
Chief Manager			D
Senior Manager	A		
Manager		A	
PO			A

Again, we have,

- As many people are designated senior to B as junior to C, who is designated immediately junior to E.
- E was neither designated as Executive Director nor as Senior Manager.

From the above conditions case 2 splits into case 2a

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	
PO	C			A

Again, we have,

- The number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director.

From the above conditions, Case-1, case -2a and Case-2 get eliminated because the number of people who are designated between G and H is **three more than** the number of people who are designated between F and H, who is not designated as Executive Director, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Designation	Case-1	Case-2	Case-2a	Case-3
	People	People	People	People
Executive Director	B			G
General Manager		E		E
Deputy General Manager	D	C	B	C
Assistant General Manager		D	D	F
Chief Manager			E	D
Senior Manager	A	B	C	B
Manager	E	A	A	H
PO	C			A

Answer: D

6. Questions

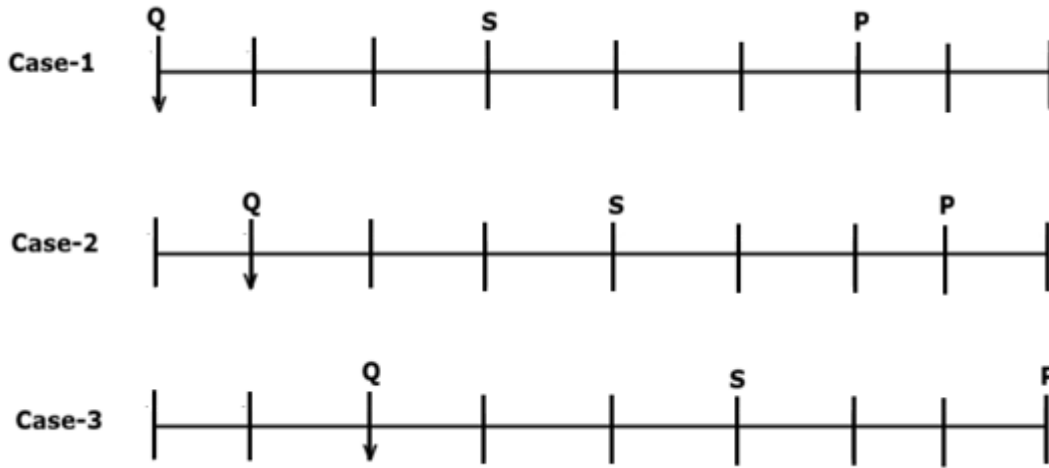

Final Arrangement:

We have,

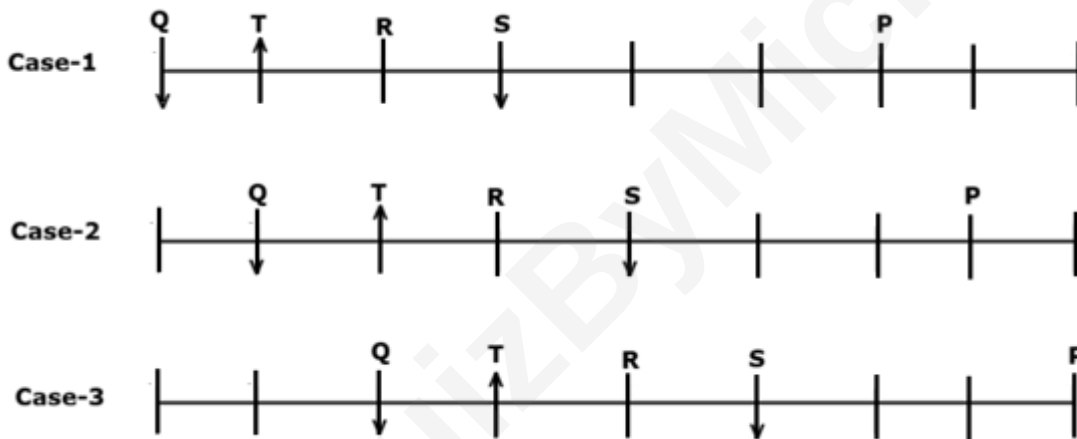

- P sits sixth to the left of Q, who faces south.
- Only two persons sit between Q and S.

From the above conditions, we have only three possibilities.

Again, we have,

- T sits second to the right of S but not adjacent to P.
- R sits immediate to the right of T.

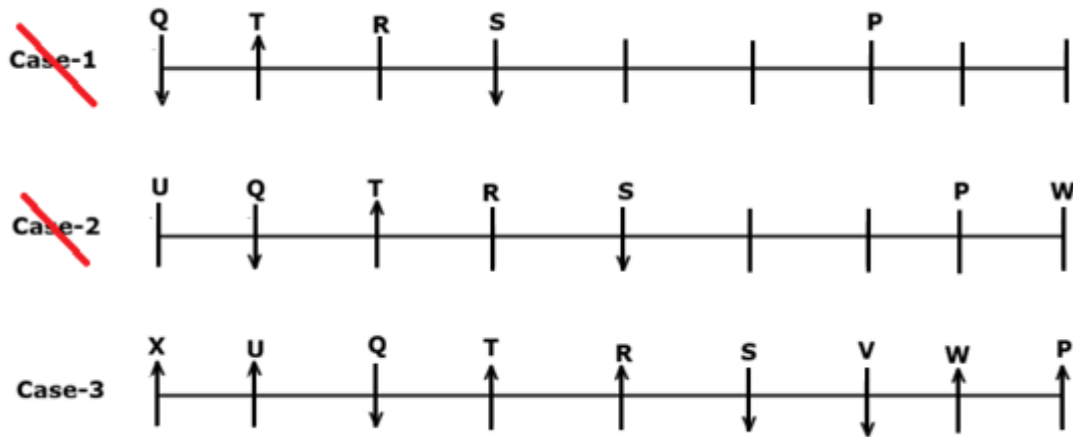

Again, we have,

- As many persons sit to the left of U as to the right of W, who doesn't sit adjacent to Q.
- The number of persons who sit to the left of V is **two more than** the number of persons who sit to the left of X.
- The number of persons who face north is more than five.

From the above conditions, Case-1 gets eliminated because as many persons sit to the left of V as to the right of W, who does not sit adjacent to Q.

From the above conditions Case-2 gets eliminated because the number of persons who sit to the right of V is **two more than** the number of persons who sit to the left of X, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: A (In all other options, all the persons are facing the north direction except option A)

7. Questions

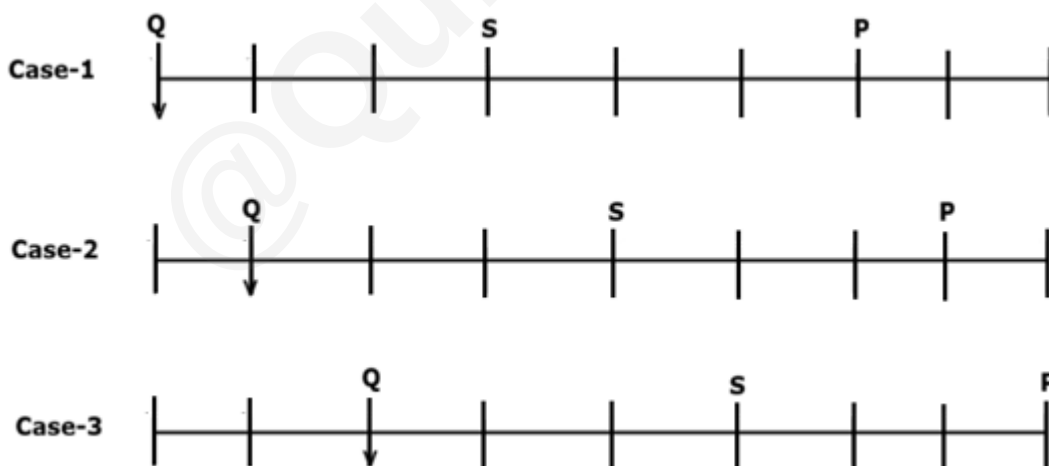

Final Arrangement:

We have,

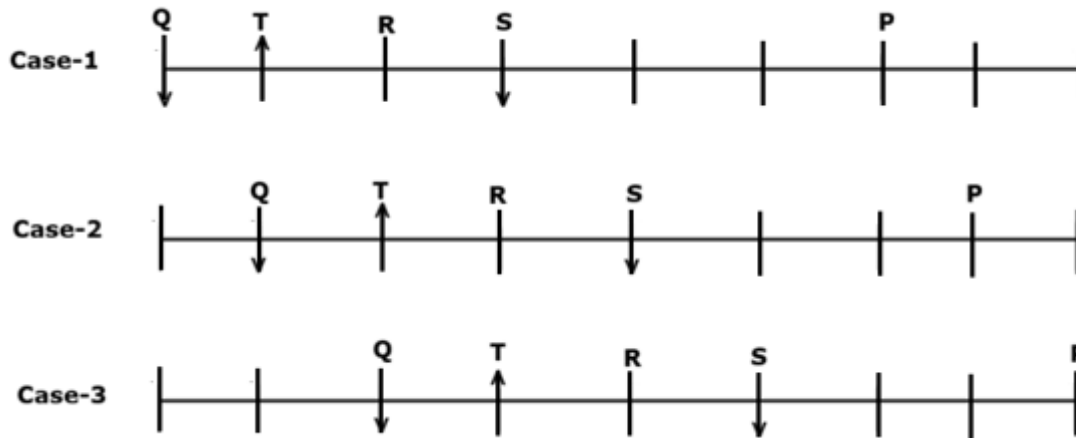

- P sits sixth to the left of Q, who faces south.
- Only two persons sit between Q and S.

From the above conditions, we have only three possibilities.

Again, we have,

- T sits second to the right of S but not adjacent to P.
- R sits immediate to the right of T.

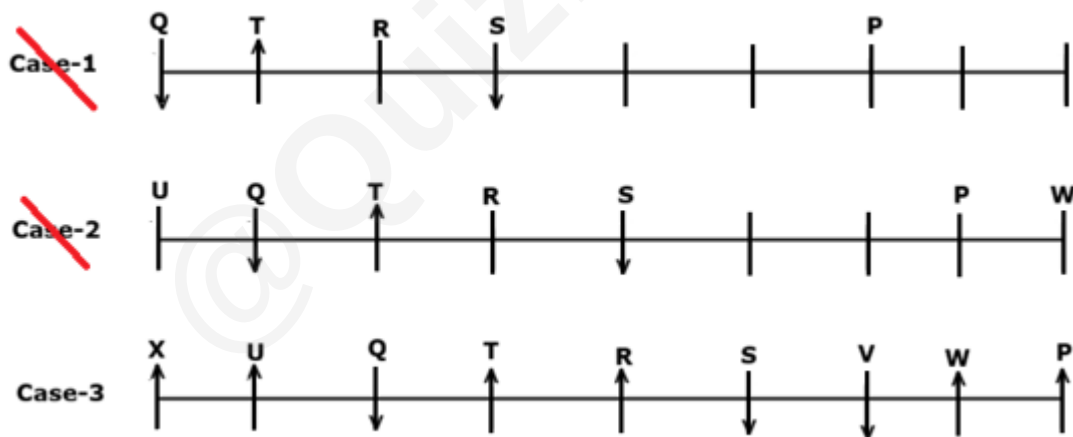

Again, we have,

- As many persons sit to the left of U as to the right of W, who doesn't sit adjacent to Q.
- The number of persons who sit to the left of V is **two more than** the number of persons who sit to the left of X.
- The number of persons who face north is more than five.

From the above conditions, Case-1 gets eliminated because as many persons sit to the left of V as to the right of W, who does not sit adjacent to Q.

From the above conditions Case-2 gets eliminated because the number of persons who sit to the right of V is **two more than** the number of persons who sit to the left of X, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: B (After rearranging all the persons in alphabetical order from West to east, only 'V', 'W' remain unchanged)

8. Questions

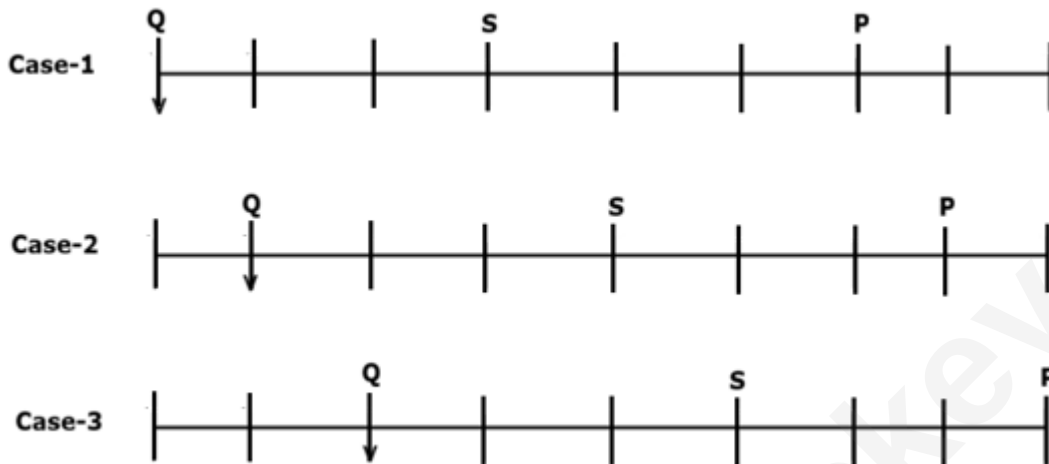

Final Arrangement:

We have,

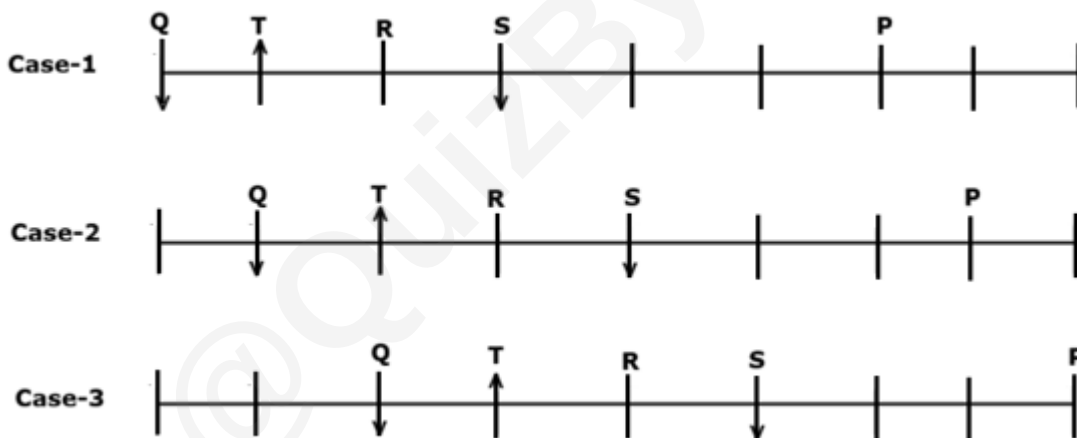

- P sits sixth to the left of Q, who faces south.
- Only two persons sit between Q and S.

From the above conditions, we have only three possibilities.

Again, we have,

- T sits second to the right of S but not adjacent to P.
- R sits immediate to the right of T.

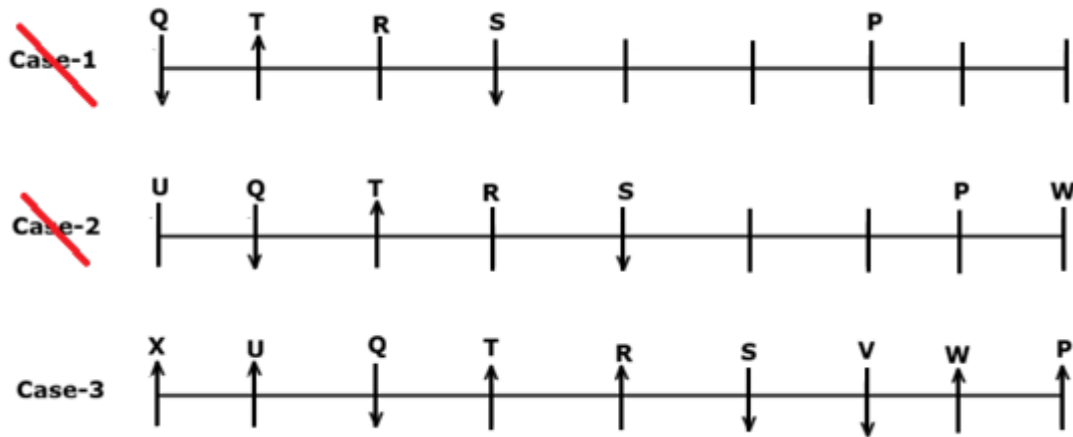

Again, we have,

- As many persons sit to the left of U as to the right of W, who doesn't sit adjacent to Q.
- The number of persons who sit to the left of V is **two more than** the number of persons who sit to the left of X.
- The number of persons who face north is more than five.

From the above conditions, Case-1 gets eliminated because as many persons sit to the left of V as to the right of W, who does not sit adjacent to Q.

From the above conditions Case-2 gets eliminated because the number of persons who sit to the right of V is **two more than** the number of persons who sit to the left of X, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: E

9. Questions

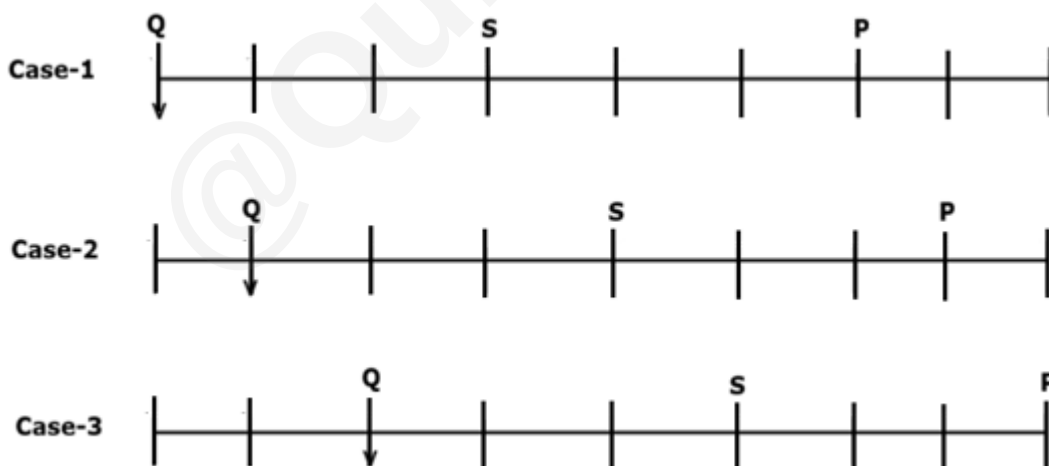

Final Arrangement:

We have,

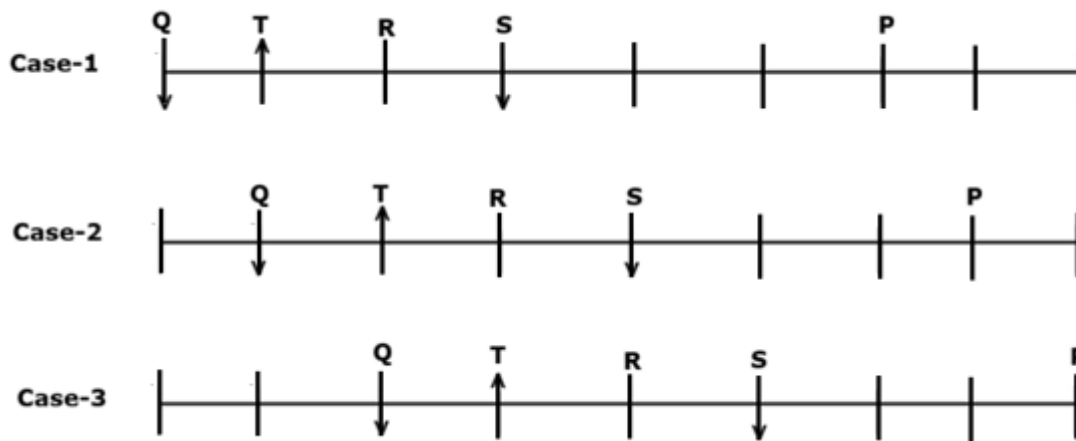

- P sits sixth to the left of Q, who faces south.
- Only two persons sit between Q and S.

From the above conditions, we have only three possibilities.

Again, we have,

- T sits second to the right of S but not adjacent to P.
- R sits immediate to the right of T.

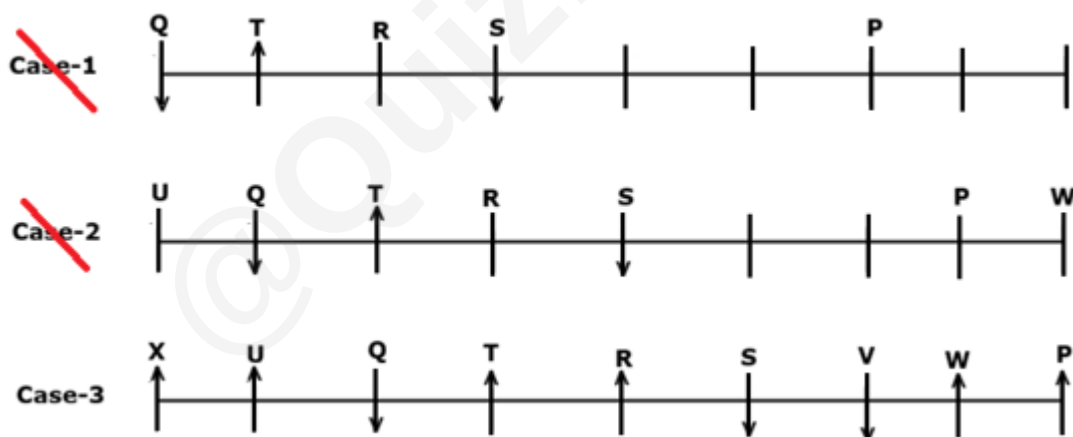

Again, we have,

- As many persons sit to the left of U as to the right of W, who doesn't sit adjacent to Q.
- The number of persons who sit to the left of V is **two more than** the number of persons who sit to the left of X.
- The number of persons who face north is more than five.

From the above conditions, Case-1 gets eliminated because as many persons sit to the left of V as to the right of W, who does not sit adjacent to Q.

From the above conditions Case-2 gets eliminated because the number of persons who sit to the right of V is **two more than** the number of persons who sit to the left of X, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: D

10. Questions

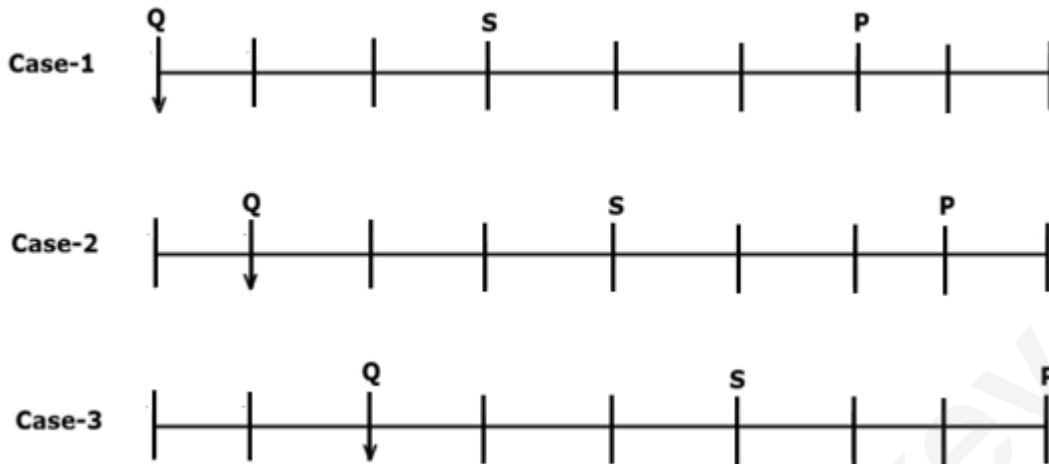

Final Arrangement:

We have,

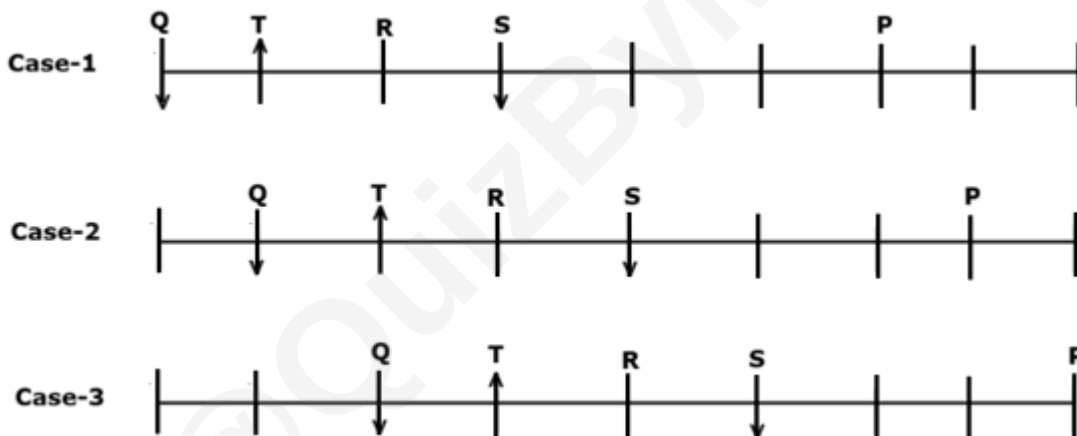

- P sits sixth to the left of Q, who faces south.
- Only two persons sit between Q and S.

From the above conditions, we have only three possibilities.

Again, we have,

- T sits second to the right of S but not adjacent to P.
- R sits immediate to the right of T.

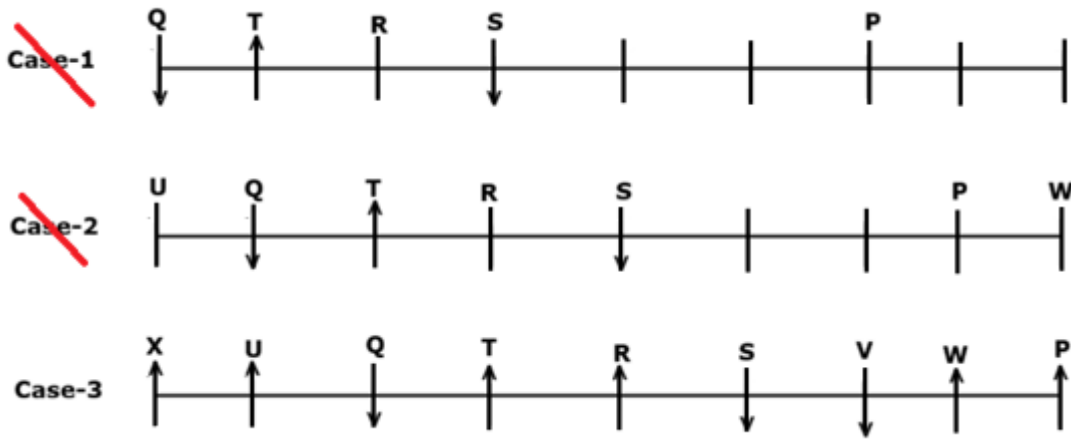

Again, we have,

- As many persons sit to the left of U as to the right of W, who doesn't sit adjacent to Q.
- The number of persons who sit to the left of V is **two more than** the number of persons who sit to the left of X.
- The number of persons who face north is more than five.

From the above conditions, Case-1 gets eliminated because as many persons sit to the left of V as to the right of W, who does not sit adjacent to Q.

From the above conditions Case-2 gets eliminated because the number of persons who sit to the right of V is **two more than** the number of persons who sit to the left of X, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Answer: C

11. Questions

Final Arrangement:

Shelf	Boxes
9	A
8	G
7	I
6	D
5	H
4	B
3	E
2	F
1	C

We have,

- Box A is kept on an odd-number shelf but above the fourth shelf.
- Box D is kept three boxes below box A.

From the above conditions, we have only three possibilities.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			
7		A	
6	D		
5			A
4		D	
3			
2			D
1			

Again, we have,

- As many boxes are kept above box D as below box B.
- Box E is kept immediately below box B.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			B
7		A	E
6	D	B	
5		E	A
4	B	D	
3	E		
2			D
1			

Again, we have,

- Only three boxes are kept between Box H and Box C, which is kept immediately below box F.
- The number of boxes kept between box C and box F is **two less than** the number of boxes kept between box G and box H.

From the above conditions, Case-2 and Case-3 get eliminated because Only three boxes are kept between Box H and Box C, which is kept immediately below box F, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8	G		B
7	I	A	E
6	D	B	
5	H	E	A
4	B	D	
3	E		
2	F		D
1	C		

Answer: B

12. Questions

Final Arrangement:

Shelf	Boxes
9	A
8	G
7	I
6	D
5	H
4	B
3	E
2	F
1	C

We have,

- Box A is kept on an odd-number shelf but above the fourth shelf.
- Box D is kept three boxes below box A.

From the above conditions, we have only three possibilities.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			
7		A	
6	D		
5			A
4		D	
3			
2			D
1			

Again, we have,

- As many boxes are kept above box D as below box B.
- Box E is kept immediately below box B.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			B
7		A	E
6	D	B	
5		E	A
4	B	D	
3	E		
2			D
1			

Again, we have,

- Only three boxes are kept between Box H and Box C, which is kept immediately below box F.
- The number of boxes kept between box C and box F is **two less than** the number of boxes kept between box G and box H.

From the above conditions, Case-2 and Case-3 get eliminated because Only three boxes are kept between Box H and Box C, which is kept immediately below box F, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8	G		B
7	I	A	E
6	D	B	
5	H	E	A
4	B	D	
3	E		
2	F		D
1	C		

Answer: D

13. Questions

Final Arrangement:

Shelf	Boxes
9	A
8	G
7	I
6	D
5	H
4	B
3	E
2	F
1	C

We have,

- Box A is kept on an odd-number shelf but above the fourth shelf.
- Box D is kept three boxes below box A.

From the above conditions, we have only three possibilities.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			
7		A	
6	D		
5			A
4		D	
3			
2			D
1			

Again, we have,

- As many boxes are kept above box D as below box B.
- Box E is kept immediately below box B.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			B
7		A	E
6	D	B	
5		E	A
4	B	D	
3	E		
2			D
1			

Again, we have,

- Only three boxes are kept between Box H and Box C, which is kept immediately below box F.
- The number of boxes kept between box C and box F is **two less than** the number of boxes kept between box G and box H.

From the above conditions, Case-2 and Case-3 get eliminated because Only three boxes are kept between Box H and Box C, which is kept immediately below box F, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8	G		B
7	I	A	E
6	D	B	
5	H	E	A
4	B	D	
3	E		
2	F		D
1	C		

Answer: A (In all other options, the first box is kept immediately below the second box except option A)

14. Questions

Final Arrangement:

Shelf	Boxes
9	A
8	G
7	I
6	D
5	H
4	B
3	E
2	F
1	C

We have,

- Box A is kept on an odd-number shelf but above the fourth shelf.
- Box D is kept three boxes below box A.

From the above conditions, we have only three possibilities.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			
7		A	
6	D		
5			A
4		D	
3			
2			D
1			

Again, we have,

- As many boxes are kept above box D as below box B.
- Box E is kept immediately below box B.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			B
7		A	E
6	D	B	
5		E	A
4	B	D	
3	E		
2			D
1			

Again, we have,

- Only three boxes are kept between Box H and Box C, which is kept immediately below box F.
- The number of boxes kept between box C and box F is **two less than** the number of boxes kept between box G and box H.

From the above conditions, Case-2 and Case-3 get eliminated because Only three boxes are kept between Box H and Box C, which is kept immediately below box F, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8	G		B
7	I	A	E
6	D	B	
5	H	E	A
4	B	D	
3	E		
2	F		D
1	C		

Answer: C (After rearranging all boxes in alphabetical order, only two remain unchanged: 'A', 'D')

15. Questions

Final Arrangement:

Shelf	Boxes
9	A
8	G
7	I
6	D
5	H
4	B
3	E
2	F
1	C

We have,

- Box A is kept on an odd-number shelf but above the fourth shelf.
- Box D is kept three boxes below box A.

From the above conditions, we have only three possibilities.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			
7		A	
6	D		
5			A
4		D	
3			
2			D
1			

Again, we have,

- As many boxes are kept above box D as below box B.
- Box E is kept immediately below box B.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8			B
7		A	E
6	D	B	
5		E	A
4	B	D	
3	E		
2			D
1			

Again, we have,

- Only three boxes are kept between Box H and Box C, which is kept immediately below box F.
- The number of boxes kept between box C and box F is **two less than** the number of boxes kept between box G and box H.

From the above conditions, Case-2 and Case-3 get eliminated because Only three boxes are kept between Box H and Box C, which is kept immediately below box F, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Shelf	Case-1	Case-2	Case-3
	Box	Box	Box
9	A		
8	G		B
7	I	A	E
6	D	B	
5	H	E	A
4	B	D	
3	E		
2	F		D
1	C		

Answer: E

16. Questions

Final Arrangement:

We have,

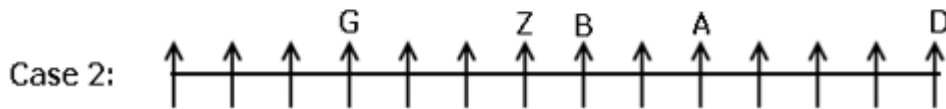

- A sits second to the right of B.
- Only three persons sit between A and D.

From the above conditions, we have only two possibilities.

Again, we have,

- As many persons sit to the right of B as to the left of Z, who sits seventh to the left of D.
- Only two persons sit between Z and G, who neither sits at the extreme end nor sits fifth from any of the ends.

Again, we have,

- The number of persons who sit between G and R is **two more than** the number of persons who sit between B and W, who sits immediate left of A.
- R does not sit at the extreme end of the row.

From the above conditions, Case-2 gets eliminated because R does not sit at the extreme end of the row, which is not satisfied.

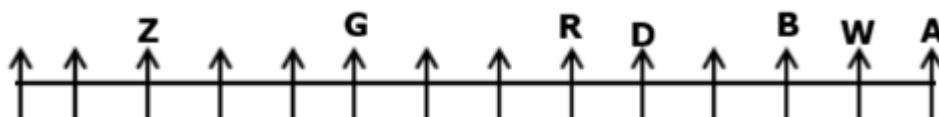

Hence, Case-1 shows the final arrangement.

Answer: A

17. Questions

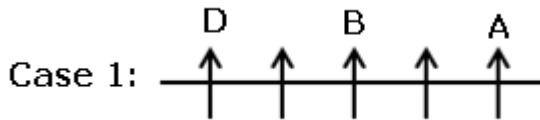

Final Arrangement:

We have,

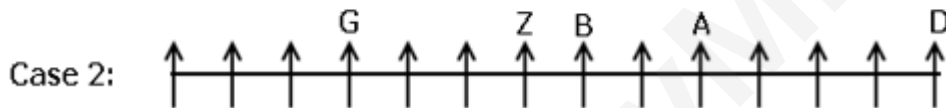

- A sits second to the right of B.
- Only three persons sit between A and D.

From the above conditions, we have only two possibilities.

Again, we have,

- As many persons sit to the right of B as to the left of Z, who sits seventh to the left of D.
- Only two persons sit between Z and G, who neither sits at the extreme end nor sits fifth from any of the ends.

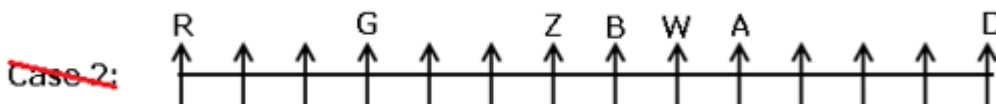

Again, we have,

- The number of persons who sit between G and R is **two more than** the number of persons who sit between B and W, who sits immediate left of A.
- R does not sit at the extreme end of the row.

From the above conditions, Case-2 gets eliminated because R does not sit at the extreme end of the row, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: C

18. Questions

Final Arrangement:

We have,

- A sits second to the right of B.
- Only three persons sit between A and D.

From the above conditions, we have only two possibilities.

Again, we have,

- As many persons sit to the right of B as to the left of Z, who sits seventh to the left of D.
- Only two persons sit between Z and G, who neither sits at the extreme end nor sits fifth from any of the ends.

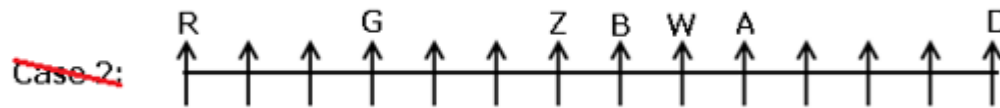

Again, we have,

- The number of persons who sit between G and R is **two more than** the number of persons who sit between B and W, who sits immediate left of A.
- R does not sit at the extreme end of the row.

From the above conditions, Case-2 gets eliminated because R does not sit at the extreme end of the row, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: E

19. Questions

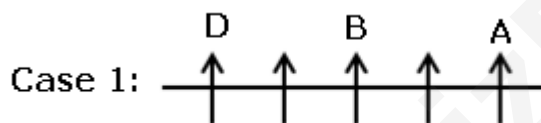

Final Arrangement:

We have,

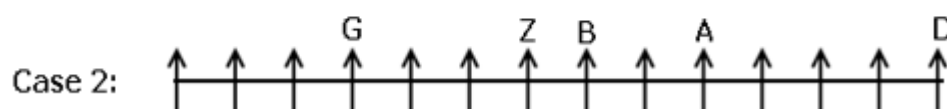

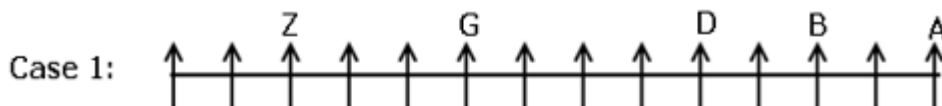

- A sits second to the right of B.
- Only three persons sit between A and D.

From the above conditions, we have only two possibilities.

Again, we have,

- As many persons sit to the right of B as to the left of Z, who sits seventh to the left of D.
- Only two persons sit between Z and G, who neither sits at the extreme end nor sits fifth from any of the ends.

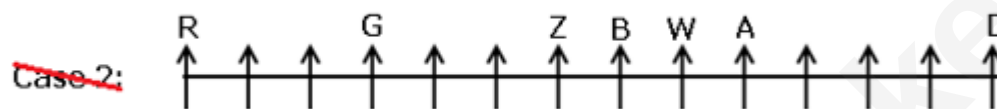

Again, we have,

- The number of persons who sit between G and R is **two more than** the number of persons who sit between B and W, who sits immediate left of A.
- R does not sit at the extreme end of the row.

From the above conditions, Case-2 gets eliminated because R does not sit at the extreme end of the row, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: B

20. Questions

Final Arrangement:

We have,

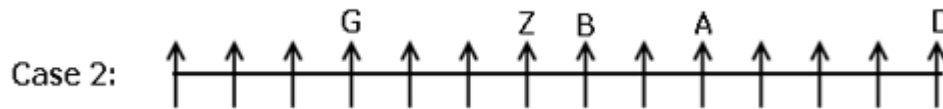

- A sits second to the right of B.
- Only three persons sit between A and D.

From the above conditions, we have only two possibilities.

Again, we have,

- As many persons sit to the right of B as to the left of Z, who sits seventh to the left of D.
- Only two persons sit between Z and G, who neither sits at the extreme end nor sits fifth from any of the ends.

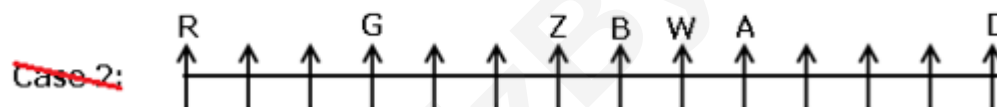

Again, we have,

- The number of persons who sit between G and R is **two more than** the number of persons who sit between B and W, who sits immediate left of A.
- R does not sit at the extreme end of the row.

From the above conditions, Case-2 gets eliminated because R does not sit at the extreme end of the row, which is not satisfied.

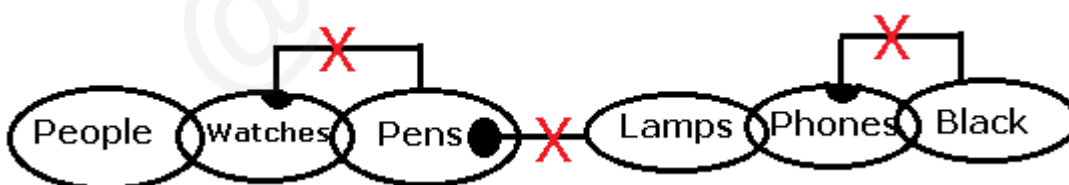

Hence, Case-1 shows the final arrangement.

Answer: D

21. Questions

Answer: B

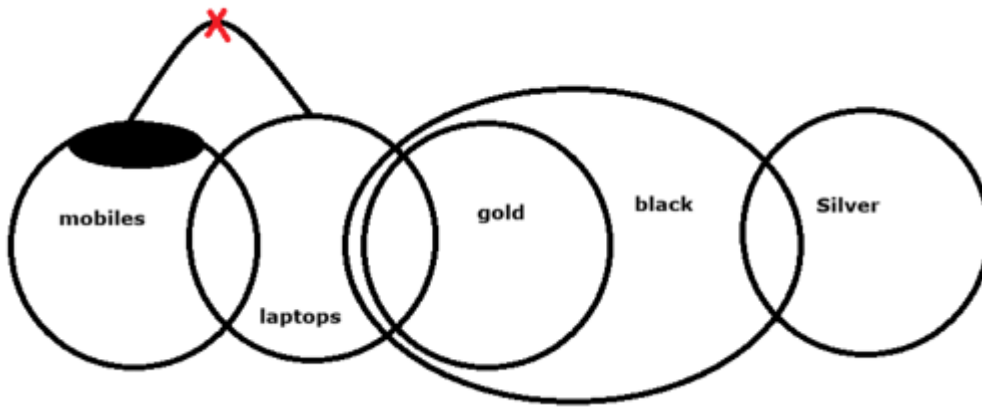

I: Some black are people - Here there is no direct relation between people and Black. So, all the definite conclusions between them are not true. Hence, Conclusion I do not follow.

II: All pens can be watches - Here, only a few watches are pens, which means some watches are pens and some watches are not pens. This does not prevent all pens from being included within the group of watches. Hence, Conclusion II follows.

22. Questions

Answer: A

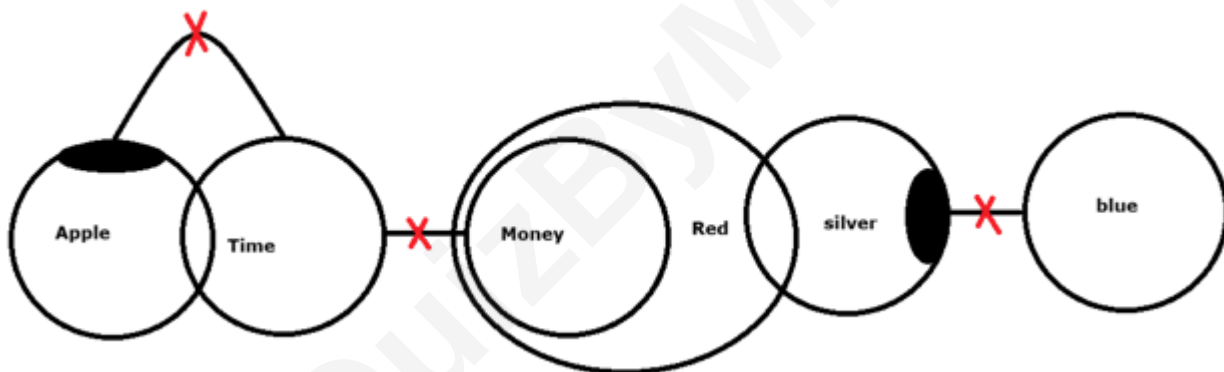

I: Some silver is mobile- Here, there is no direct relation between silver and mobile. So, all the definite conclusions between them are not true. Therefore, Conclusion I does not follow.

II: All gold are mobile- Here, no direct relation between Gold and Mobile. So, all the definite conclusions between them are not true. Hence, Conclusion II does not follow.

23. Questions

Answer: E

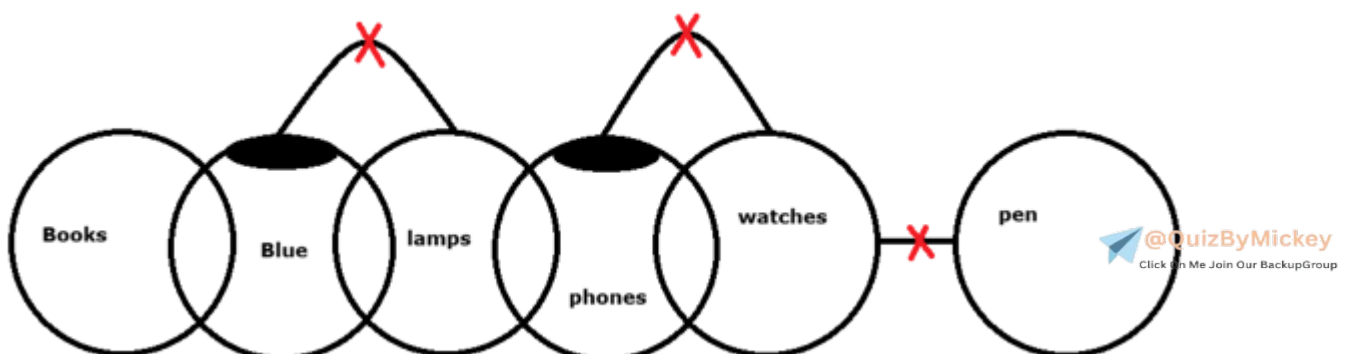

I: All Time can be Silver - Here, there is no direct relation between time and silver. So, all the possible conclusions between them are true. Hence, the conclusion I follows.

II: All Apples can be Blue- Here, there is no direct relation between Apple and Blue. So, all the possible conclusions between them are true. Hence, the conclusion II follows.

24. Questions

Answer: D

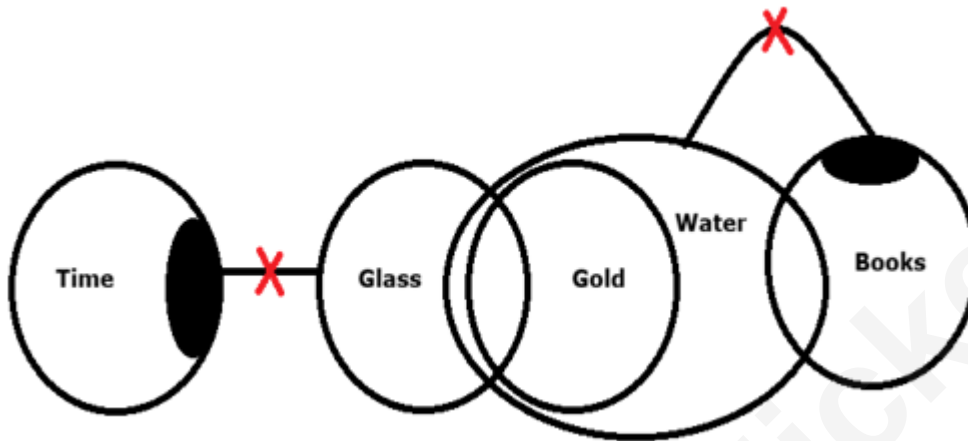

I: All pens can be books - Here, there is no direct relation between Books and Pens. So, all the possible conclusions between them are true. Hence, Conclusion I follows

II: Some watches are blue - Here, there is no direct relation between watches and blue. So, all the definite conclusions between them are not true. Hence, conclusion II does not follow

25. Questions

Answer: C

I: Some Glass are Books - Here, there is no definite connection between Glass and Books. So, all the definite conclusions between them are not true. Hence, the conclusion I does not follow.

II: No Glass is Books - Here, there is no definite connection between Glass and Books. So, all the definite conclusions between them are not true. Hence, the conclusion I does not follow.

By combining the conclusion I and conclusion II, we get a complementary pair. so, either conclusion I or II follows.

26. Questions

Answer: E

Statements:

$A > B > Z \geq R$; $T < Y > U = R$; $E < Q > W$

Conclusions:

I: $A > T$ $\rightarrow$ False ($A > B > Z \geq R = U < Y > T$)

II: $U > B$ $\rightarrow$ False ($U = R \leq Z < B$)

27. Questions

Answer: C

Statements:

$G = H > L \geq Y < Q$; $S > R < W > Q$; $E > A < V > G$

Conclusions:

I: $W \geq Y$ $\rightarrow$ False ($W > Q > Y$)

II: $V > Y \rightarrow \text{True}(V > G = H > L \geq Y)$

28. Questions

Answer: A

Statements:

$Y > R > W < U < I; Q < W \leq Z \leq G; B < N > H > I$

Conclusions:

I: $N > Q \rightarrow \text{True}(N > H > I > U > W > Q)$

II: $G \geq H \rightarrow \text{False}(G \geq Z \geq W < U < I < H)$

29. Questions

Answer: B

Statements:

$A \geq T \geq F > Y < Q; E \leq Q = R < Z; F > M > V < O$

Conclusions:

I: $Z > Y \rightarrow \text{True}(Z > R = Q > Y)$

II: $A > V \rightarrow \text{True}(A \geq T \geq F > M > V)$

30. Questions

Answer: D

Statements:

$A > G > T < H; R > C \geq N > H; R > W > Q$

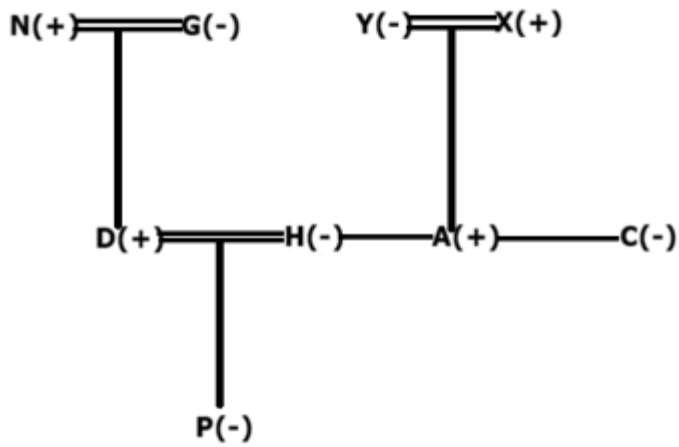

Conclusions:

I. $G \geq Q \rightarrow \text{False}(G > T < H < N \leq C < R > W > Q)$

II. $G < Q \rightarrow \text{False}(G > T < H < N \leq C < R > W > Q)$

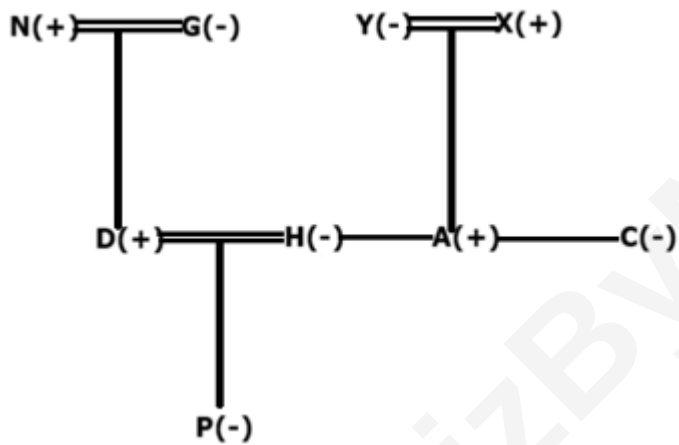

By combining the conclusion I and conclusion II, we get a complementary pair. Hence, either conclusion I or II is true.

31. Questions

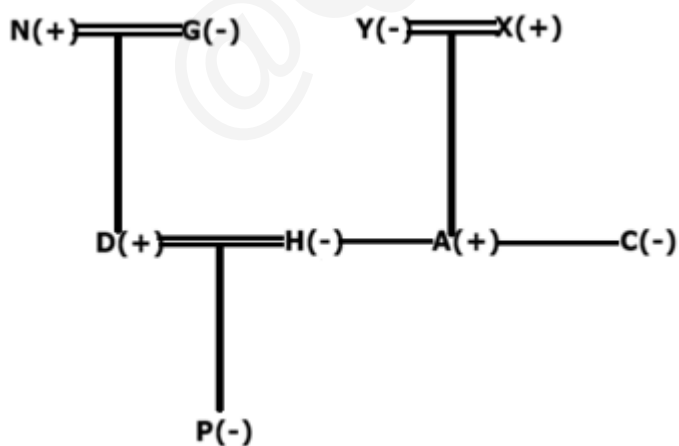

Answer: C

32. Questions

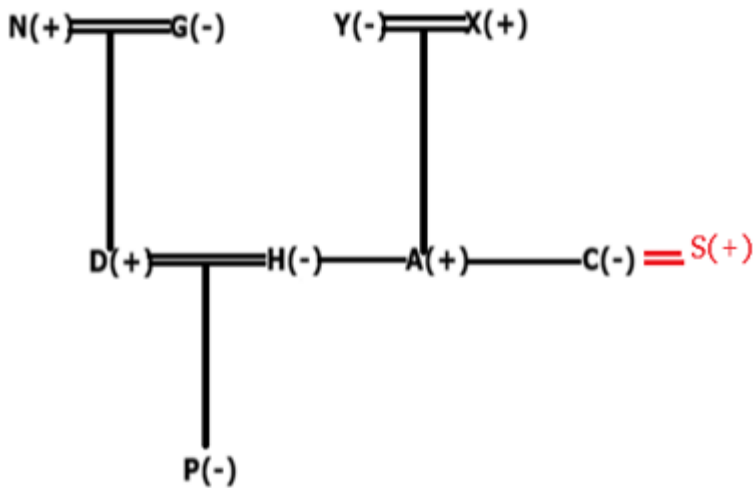

Answer: E

33. Questions

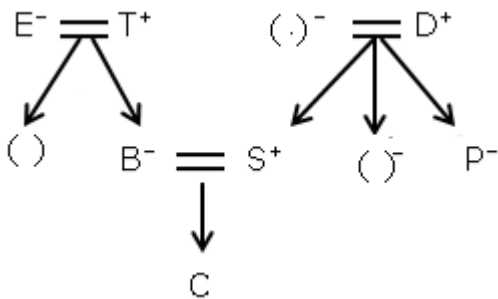

Answer: A

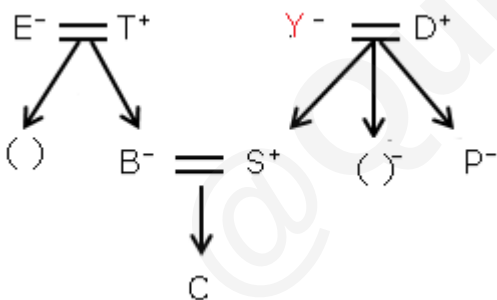

34. Questions

Final arrangement:

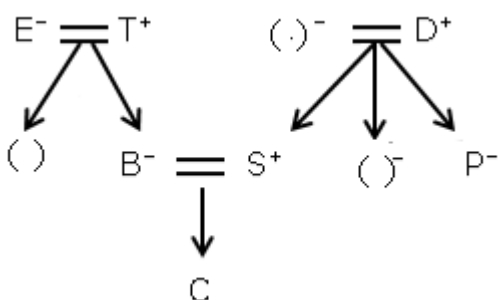

Answer: D

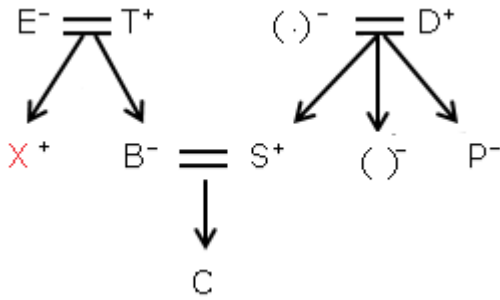

35. Questions

Final arrangement:

Answer: E

36. Questions

Answer: E

The given number: 756846359643454753

Arranging the number in ascending order from left: 333444455556667789

Only three numbers remain unchanged.

37. Questions

Answer: B

The given number: 564364754673647

Two is subtracted from all the odd digits, and one is added to all the even digits: 375175535751755

5+7=12

38. Questions

Answer: D

The given number: 36467523545675457

One is subtracted from all the odd digits, and two is added to all the even digits: 28686442464864646

Three digits '4', '6' and '8' appear more than twice.

39. Questions

Answer: A

The given word: MISCOMMUNICATION

The 1st, 3rd, 7th, 9th and 11th letters are: M, S, M, N and C

From the combination of these letters, no meaningful word can be formed.

40. Questions

Answer: C

The given word: FUTURE

Vowels are changed to the immediate next letter, and consonants are changed to the immediate preceding letter: EVSVQF

Arrange all letters in alphabetical order from left to right: EFQSVV

‘Q’ is the third letter from the left in the final arrangement.
