

1. Questions

Study the following information carefully and answer the given questions.

Eight Persons —A, B, C, D, E, F, G and H— went to a hill station for vacation in different months, viz., January, February, March, April, June, July, August and September of 2025.

G went immediately before F, who went in a month which has less than 31 days. C did not go immediately after A. Only three persons went between B and D. As many persons went before D as after E. B went in a month which has a prime number of days but went before April. C went before H and after A.

Who among the following persons went to the hill station three months before the one who went in the month of July?

- a. G
- b. A
- c. H
- d. D
- e. B

2. Questions

How many persons went to the hill station between F and H?

- a. One
- b. Three
- c. No one
- d. Two
- e. More than three

3. Questions

If the person spent money equal to 1000 times the number of days in the month they went to the hill station, then what is the sum of the amounts that D and C spent together?

- a. 58000
- b. 62000
- c. 60000
- d. 59000
- e. 61000

4. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form

a group. Which one of the following does not belong to the group?

- a. D
- b. C
- c. B
- d. A
- e. H

5. Questions

Which of the following statement(s) is/are true regarding E?

- a. E went to the hill station before A
- b. Only two persons went to the hill station between E and D
- c. E went to the hill station in the month which has less than 31 days
- d. As many persons went before E as after F
- e. None of the statements are true

6. Questions

Study the following information carefully and answer the given questions.

Ten persons are sitting in two parallel rows containing five persons each in such a way that there is an equal distance between adjacent persons. In row 1: P, Q, R, S and T are seated, and all of them are facing north. In row 2: A, B, C, D and E are seated, and all of them are facing south. Each person in row 1 faces another person in row 2.

Q sits at one of the ends of the row and sits opposite to the one who sits adjacent to B. Only two persons sit between B and the one who sits opposite to R. C sits to the immediate right of D. Neither C nor D does not face R. D neither faces P nor S. E sits diagonally opposite to Q and sits adjacent to the one who faces P.

If E is related to R and D is related to T in a certain way, then which of the following persons is related to S?

- a. A
- b. C
- c. D
- d. B
- e. Q

7. Questions

Who among the following persons sits to the immediate right of the one who sits opposite to P?

- a. B

- b. A
- c. The one who sits opposite to R
- d. Q
- e. The one who sits opposite to D

8. Questions

How many persons sit between A and D?

- a. One
- b. Two
- c. Three
- d. No one
- e. Four

9. Questions

What is the position of Q with respect to T?

- a. Second to the left
- b. Second to the right
- c. Immediate right
- d. Immediate left
- e. Third to the left

10. Questions

Which of the following statement(s) is/are true regarding R as per the final arrangement?

- a. R sits opposite to B
- b. R sits third to the right of S
- c. R is sitting in the middle of the row
- d. R sits immediate right of P
- e. R is an immediate neighbour of the one who sits opposite to C

11. Questions

Study the following information carefully and answer the given questions.

Seven persons - A, B, C, D, E, F and G live on seven different floors of a seven-storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered seven. Only one person lives on each floor. Each person likes different colours, viz., Red, Green,

Yellow, Pink, White, Blue and Orange.

B lives on an odd-numbered floor above the fourth floor. Only three persons live between B and the one who likes Pink. As many persons live above the one who likes Pink as below D, who does not like Pink. The one who likes Green lives three floors below D. Neither D nor B likes Yellow or Blue. G lives two floors above the one who likes Blue. C likes Red and lives below D and above G. E lives on a floor which is two times the floor number of A. The person who likes orange lives above the person who likes Red but below the one who likes white.

How many people live between B and the person who likes Red?

- a. Two
- b. One
- c. Three
- d. No one
- e. More than three

12. Questions

If all the persons are arranged in alphabetical order from the topmost floor to the bottommost floor, then the positions of how many persons will remain unchanged?

- a. One
- b. Two
- c. Three
- d. More than three
- e. No one

13. Questions

Which of the following combinations of persons and the colours they like is correct as per the final arrangement?

- a. D - Green
- b. F - Pink
- c. G - White
- d. A - Blue
- e. E - Yellow

14. Questions

How many people live above the one who likes Blue?

- a. As many persons live between B and A

- b. As many persons live below C
- c. As many persons live below the one who likes White
- d. As many persons live above D
- e. None of these

15. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. A
- b. F
- c. G
- d. D
- e. B

16. Questions

Study the following information carefully and answer the given questions.

A certain number of people are sitting in a linear row, and all of them are facing north.

S sits at the extreme end of the row. Only five persons sit between F and E, who sits exactly in the middle of the row. F sits third to the right of G. H sits four persons away from E but neither adjacent to D nor G. D sits sixth to the right of G, where either of them sits at the extreme end. I sit exactly between G and S.

How many people are sitting in the row?

- a. 17
- b. 13
- c. 16
- d. 19
- e. 15

17. Questions

Who among the following persons sits to the immediate left of I?

- a. H
- b. G
- c. D
- d. F
- e. E

18. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. DF
- b. FG
- c. HS
- d. GE
- e. EI

19. Questions

How many persons are sitting between H and G?

- a. Five
- b. Three
- c. One
- d. No one
- e. Six

20. Questions

As many persons sit to the left of I as to the right of ____.

- a. F
- b. G
- c. E
- d. D
- e. H

21. Questions

In the given questions, the relationship between different elements is shown in the statements followed by two conclusions. Find the conclusion which is definitely true.

Statement:

$$P \geq R > A ; R < T < Q ; A = S \leq H$$

Conclusions

I). $H \geq R$

II). $R < Q$

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

22. Questions

Statement:

$J \geq K > S > F ; Y < O ; F > Z$

Conclusions

I). $J > F$

II). $K < Z$

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

23. Questions

Statement:

$K = F < N < P \leq R > M ; W \geq K ; R \geq X$

Conclusions

I). $N < X$

II). $M > F$

- a. Both conclusions I and II are true
- b. Either conclusion I or II is true
- c. Only conclusion II is true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

24. Questions

Statement:

$F \leq S > U ; H > S ; L < S$

Conclusions

I). $L > U$

II). $L \leq U$

- a. Both conclusions I and II are true
- b. Either conclusion I or II is true
- c. Only conclusion II is true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

25. Questions

Statement:

$X > Y \geq Z$; $O \geq X < E$; $R < O > K$

Conclusions

I). $Z < E$

II). $O > Y$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

26. Questions

Study the following information carefully and answer the given questions.

Point C is 6m west of point A. Point B is 14m north of point A. Point E is 9m south of point D. Point F is 12 m west of point E. Point D is 20m east of point B. Point F is 13m south of point G.

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. CB
- b. AD
- c. FB
- d. AE
- e. BG

27. Questions

What is the direction of G with respect to E?

- a. North
- b. North-West
- c. North-East
- d. South-West
- e. None of these

28. Questions

What is the shortest distance between F and D?

- a. 15m
- b. 10m
- c. 8m
- d. 12m
- e. 13m

29. Questions

Study the following information carefully and answer the given questions.

A person walks 8 km towards the south from his office to reach the market. Then he takes a left turn and walks 8 km to reach the restaurant. From the restaurant, he takes a right turn and walks 8 km to reach home.

What is the Direction of the office with respect to his home?

- a. South-East
- b. North
- c. South
- d. North-West
- e. South-West

30. Questions

If the person's speed is 3 km/ hr and he leaves the office at 3.30 pm., at what time should he reach his home?

- a. 10.00 pm
- b. 9.30 pm
- c. 10.30 pm

d. 11.20 pm

e. 11.30 pm

31. Questions

Study the following information carefully and answer the given questions.

In a certain code language,

“Smart boys solve puzzles” is coded as “qa rt lm px”

“Solve puzzles gives crack” is coded as “lm jk nv px”

“Smart crack tricks games” is coded as “qa nv xy tu”

“Experience gives quick games” is coded as “tu jk zx vp”

(Note: All the given codes are two-letter codes only)

Which of the following is the word for the code “lm” represented in the given coded language?

- a. Solve
- b. Puzzles
- c. Boys
- d. Either (a) or (c)
- e. Either (a) or (b)

32. Questions

Which of the following is the code for the word ‘ Gives ’ represented in the given coded language?

- a. rt
- b. nv
- c. tu
- d. jk
- e. xy

33. Questions

If the code for the phrase “Experience Tricks” is “vp xy” in the given coded language, then what is the code for the phrase “Quick Response”?

- a. tv vp
- b. zx yr
- c. zx vp
- d. zx jk

e. vp yr

34. Questions

Which of the following words is represented by the code 'tu' in the given coded language?

- a. Tricks
- b. Smart
- c. Games
- d. Crack
- e. Experience

35. Questions

Which of the following is the code for the word 'Crack boys' represented in the given coded language?

- a. nv rt
- b. tu rt
- c. xy rt
- d. zx rt
- e. vp rt

36. Questions

Study the following information carefully and answer the given questions.

Six friends, viz., P, Q, R, S, T and V have different heights. P is taller than Q and shorter than T. P is the third shortest person. R is shorter than V and taller than S. T is not taller than R. S is not the shortest. The height of the second tallest person is 155 cm.

Who among the following persons is taller than T?

- a. V
- b. R
- c. T
- d. Both (a) and (b)
- e. Both (b) and (c)

37. Questions

If the sum of the heights of R and S is 295 cm, then what may be the height of P?

- a. 170 cm

- b. 145 cm
- c. 139 cm
- d. 135 cm
- e. None of these

38. Questions

As many persons taller than V as shorter than ____ .

- a. Q
- b. S
- c. R
- d. T
- e. P

39. Questions

Study the following information carefully and answer the given questions.

Seven kids - J, K, L, M, N, O, and P bought different numbers of stationery items.

K bought more than M but less than P. O bought less than K but did not buy the least items. J bought more than K but less than L. P bought more than L but did not buy the most items. The one who bought the second-most and second-least items bought 18 and 6, respectively.

If the sum of the items bought by P and J is 30 and the sum of the items bought by O and M is 9, then what is the difference between the items bought by J and M?

- a. 9
- b. 12
- c. 15
- d. 6
- e. 18

40. Questions

As many kids bought more items than P as less than _?

- a. M
- b. N
- c. O
- d. P
- e. J

Explanations:

1. Questions

Final arrangement:

Month	Person
January	A
February	E
March	B
April	G
June	F
July	C
August	D
September	H

We have,

- B went in a month which has a prime number of days but went before April.
- Only three persons went between B and D.
- As many persons went before D as after E.

From the above conditions, we have only two possibilities

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April		E
June		D
July		
August	D	
September		

Again, we have,

- G went immediately before F, who went in a month which has less than 31 days.

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April	G	E
June	F	D
July		
August	D	G
September		F

Again, we have,

- C did not go immediately after A.

From the above conditions, Case-2 gets eliminated because C did not go immediately after A , which is not satisfied.

Hence, Case-1 shows the final arrangement.

Month	Case 1	Case 2
	Person	Person
January	A	B
February	E	A
March	B	C
April	G	E
June	F	D
July	C	H
August	D	G
September	H	F

Answer: A

2. Questions

Final arrangement:

Month	Person
January	A
February	E
March	B
April	G
June	F
July	C
August	D
September	H

We have,

- B went in a month which has a prime number of days but went before April.
- Only three persons went between B and D.
- As many persons went before D as after E.

From the above conditions, we have only two possibilities

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April		E
June		D
July		
August	D	
September		

Again, we have,

- G went immediately before F, who went in a month which has less than 31 days.

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April	G	E
June	F	D
July		
August	D	G
September		F

Again, we have,

- C did not go immediately after A.

From the above conditions, Case-2 gets eliminated because C did not go immediately after A , which is not satisfied.

Hence, Case-1 shows the final arrangement.

Month	Case 1	Case 2
	Person	Person
January	A	B
February	E	A
March	B	C
April	G	E
June	F	D
July	C	H
August	D	G
September	H	F

Answer: D

3. Questions

Final arrangement:

Month	Person
January	A
February	E
March	B
April	G
June	F
July	C
August	D
September	H

We have,

- B went in a month which has a prime number of days but went before April.

- Only three persons went between B and D.
- As many persons went before D as after E.

From the above conditions, we have only two possibilities

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April		E
June		D
July		
August	D	
September		

Again, we have,

- G went immediately before F, who went in a month which has less than 31 days.

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April	G	E
June	F	D
July		
August	D	G
September		F

Again, we have,

- C did not go immediately after A.

From the above conditions, Case-2 gets eliminated because C did not go immediately after A , which is not satisfied.

Hence, Case-1 shows the final arrangement.

Month	Case 1	Case 2
	Person	Person
January	A	B
February	E	A
March	B	C
April	G	E
June	F	D
July	C	H
August	D	G
September	H	F

Answer: B

(Amount spent by D = Rs.31000 , Amount spent by C = Rs.31000, Sum of amounts spent by D and C = 31000+31000 = Rs.62000)

4. Questions

Final arrangement:

Month	Person
January	A
February	E
March	B
April	G
June	F
July	C
August	D
September	H

We have,

- B went in a month which has a prime number of days but went before April.
- Only three persons went between B and D.
- As many persons went before D as after E.

From the above conditions, we have only two possibilities

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April		E
June		D
July		
August	D	
September		

Again, we have,

- G went immediately before F, who went in a month which has less than 31 days.

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April	G	E
June	F	D
July		
August	D	G
September		F

Again, we have,

- C did not go immediately after A.

From the above conditions, Case-2 gets eliminated because C did not go immediately after A , which is not satisfied.

Hence, Case-1 shows the final arrangement.

Month	Case 1	Case 2
	Person	Person
January	A	B
February	E	A
March	B	C
April	G	E
June	F	D
July	C	H
August	D	G
September	H	F

Answer: E (In all other options, all the persons went to the hill station in an odd number of days except option E)

5. Questions

Final arrangement:

Month	Person
January	A
February	E
March	B
April	G
June	F
July	C
August	D
September	H

We have,

- B went in a month which has a prime number of days but went before April.
- Only three persons went between B and D.
- As many persons went before D as after E.

From the above conditions, we have only two possibilities

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April		E
June		D
July		
August	D	
September		

Again, we have,

- G went immediately before F, who went in a month which has less than 31 days.

Month	Case 1	Case 2
	Person	Person
January		B
February	E	
March	B	
April	G	E
June	F	D
July		
August	D	G
September		F

Again, we have,

- C did not go immediately after A.

From the above conditions, Case-2 gets eliminated because C did not go immediately after A , which is not satisfied.

Hence, Case-1 shows the final arrangement.

Month	Case 1	Case 2
	Person	Person
January	A	B
February	E	A
March	B	C
April	G	E
June	F	D
July	C	H
August	D	G
September	H	F

Answer: C

6. Questions

Final arrangement:

We have,

- Q sits at one of the ends of the row and sits opposite to the one who sits adjacent to B.
- Only two persons sit between B and the one who sits opposite to R.

From the above conditions, we have only two possibilities

Again, we have,

- C sits to the immediate right of D.
- Neither C nor D does not face R.

again we have,

- D neither faces P nor S.
- E sits diagonally opposite to Q and sits adjacent to the one who faces R.

From the above conditions, Case-1 gets eliminated because D neither faces P nor S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: D (First mentioned person facing the second mentioned person)

7. Questions

Final arrangement:

We have,

- Q sits at one of the ends of the row and sits opposite to the one who sits adjacent to B.
- Only two persons sit between B and the one who sits opposite to R.

From the above conditions, we have only two possibilities

Again, we have,

- C sits to the immediate right of D.
- Neither C nor D does not face R.

gain we have,

- D neither faces P nor S.
- E sits diagonally opposite to Q and sits adjacent to the one who faces R.

From the above conditions, Case-1 gets eliminated because D neither faces P nor S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: C

8. Questions

Final arrangement:

We have,

- Q sits at one of the ends of the row and sits opposite to the one who sits adjacent to B.
- Only two persons sit between B and the one who sits opposite to R.

From the above conditions, we have only two possibilities

Again, we have,

- C sits to the immediate right of D.
- Neither C nor D does not face R.

gain we have,

- D neither faces P nor S.
- E sits diagonally opposite to Q and sits adjacent to the one who faces R.

From the above conditions, Case-1 gets eliminated because D neither faces P nor S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: A

9. Questions

Final arrangement:

We have,

- Q sits at one of the ends of the row and sits opposite to the one who sits adjacent to B.
- Only two persons sit between B and the one who sits opposite to R.

From the above conditions, we have only two possibilities

Again, we have,

- C sits to the immediate right of D.
- Neither C nor D does not face R.

again we have,

- D neither faces P nor S.
- E sits diagonally opposite to Q and sits adjacent to the one who faces R.

From the above conditions, Case-1 gets eliminated because D neither faces P nor S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: B

10. Questions

Final arrangement:

We have,

- Q sits at one of the ends of the row and sits opposite to the one who sits adjacent to B.
- Only two persons sit between B and the one who sits opposite to R.

From the above conditions, we have only two possibilities

Again, we have,

- C sits to the immediate right of D.
- Neither C nor D does not face R.

again we have,

- D neither faces P nor S.
- E sits diagonally opposite to Q and sits adjacent to the one who faces R.

From the above conditions, Case-1 gets eliminated because D neither faces P nor S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: E

11. Questions

Final arrangement:

Floor	Person	Colour
7	B	White
6	F	Yellow
5	D	Orange
4	C	Red
3	G	Pink
2	E	Green
1	A	Blue

We have,

- B lives on an odd-numbered floor above the fourth floor.
- Only three persons live between B and the one who likes Pink.
- As many persons live above the one who likes Pink as below D, who does not like Pink.

From the above conditions, there are two possibilities.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6				
5	B		D	
4				
3				Pink
2				
1		Pink		

Again, we have,

- The one who likes Green lives three floors below D.
- Neither D nor B likes Yellow or Blue.
- G lives two floors above the one who likes Blue.

- C likes Red and lives below D and above G.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6	C	Red		
5	B		D	
4	G	Green	C	Red
3			G	Pink
2		Blue		Green
1		Pink		Blue

Again, we have,

- E lives on a floor which is two times the floor number of A.
- The person who likes orange lives above the person who likes Red but below the one who likes white.

From the above condition, Case-1 gets eliminated because the person who likes orange lives above the person who likes Red but below the one who likes white, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floor	Case 1		Case 2	
	Person	Color	Person	Color
7	D	Orange	B	White
6	C	Red	F	Yellow
5	B		D	Orange
4	G	Green	C	Red
3	F	Yellow	G	Pink
2	E	Blue	E	Green
1	A	Pink	A	Blue

Answer: A

12. Questions

Final arrangement:

Floor	Person	Colour
7	B	White
6	F	Yellow
5	D	Orange
4	C	Red
3	G	Pink
2	E	Green
1	A	Blue

We have,

- B lives on an odd-numbered floor above the fourth floor.
- Only three persons live between B and the one who likes Pink.
- As many persons live above the one who likes Pink as below D, who does not like Pink.

From the above conditions, there are two possibilities.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6				
5	B		D	
4				
3				Pink
2				
1		Pink		

Again, we have,

- The one who likes Green lives three floors below D.
- Neither D nor B likes Yellow or Blue.
- G lives two floors above the one who likes Blue.
- C likes Red and lives below D and above G.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6	C	Red		
5	B		D	
4	G	Green	C	Red
3			G	Pink
2		Blue		Green
1		Pink		Blue

Again, we have,

- E lives on a floor which is two times the floor number of A.
- The person who likes orange lives above the person who likes Red but below the one who likes white.

From the above condition, Case-1 gets eliminated because the person who likes orange lives above the person who likes Red but below the one who likes white, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floor	Case 1		Case 2	
	Person	Color	Person	Color
7	D	Orange	B	White
6	C	Red	F	Yellow
5	B		D	Orange
4	G	Green	C	Red
3	F	Yellow	G	Pink
2	E	Blue	E	Green
1	A	Pink	A	Blue

Answer: E

13. Questions

Final arrangement:

Floor	Person	Colour
7	B	White
6	F	Yellow
5	D	Orange
4	C	Red
3	G	Pink
2	E	Green
1	A	Blue

We have,

- B lives on an odd-numbered floor above the fourth floor.
- Only three persons live between B and the one who likes Pink.
- As many persons live above the one who likes Pink as below D, who does not like Pink.

From the above conditions, there are two possibilities.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6				
5	B		D	
4				
3				Pink
2				
1		Pink		

Again, we have,

- The one who likes Green lives three floors below D.
- Neither D nor B likes Yellow or Blue.
- G lives two floors above the one who likes Blue.
- C likes Red and lives below D and above G.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6	C	Red		
5	B		D	
4	G	Green	C	Red
3			G	Pink
2		Blue		Green
1		Pink		Blue

Again, we have,

- E lives on a floor which is two times the floor number of A.
- The person who likes orange lives above the person who likes Red but below the one who likes

white.

From the above condition, Case-1 gets eliminated because the person who likes orange lives above the person who likes Red but below the one who likes white, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floor	Case 1		Case 2	
	Person	Color	Person	Color
7	D	Orange	B	White
6	C	Red	F	Yellow
5	B		D	Orange
4	G	Green	C	Red
3	F	Yellow	G	Pink
2	E	Blue	E	Green
1	A	Pink	A	Blue

Answer: D

14. Questions

Final arrangement:

Floor	Person	Colour
7	B	White
6	F	Yellow
5	D	Orange
4	C	Red
3	G	Pink
2	E	Green
1	A	Blue

We have,

- B lives on an odd-numbered floor above the fourth floor.
- Only three persons live between B and the one who likes Pink.

- As many persons live above the one who likes Pink as below D, who does not like Pink.

From the above conditions, there are two possibilities.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6				
5	B		D	
4				
3				Pink
2				
1		Pink		

Again, we have,

- The one who likes Green lives three floors below D.
- Neither D nor B likes Yellow or Blue.
- G lives two floors above the one who likes Blue.
- C likes Red and lives below D and above G.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6	C	Red		
5	B		D	
4	G	Green	C	Red
3			G	Pink
2		Blue		Green
1		Pink		Blue

Again, we have,

- E lives on a floor which is two times the floor number of A.
- The person who likes orange lives above the person who likes Red but below the one who likes white.

From the above condition, Case-1 gets eliminated because the person who likes orange lives above the person who likes Red but below the one who likes white, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floor	Case 1		Case 2	
	Person	Color	Person	Color
7	D	Orange	B	White
6	C	Red	F	Yellow
5	B		D	Orange
4	G	Green	C	Red
3	F	Yellow	G	Pink
2	E	Blue	E	Green
1	A	Pink	A	Blue

Answer: C

15. Questions

Final arrangement:

Floor	Person	Colour
7	B	White
6	F	Yellow
5	D	Orange
4	C	Red
3	G	Pink
2	E	Green
1	A	Blue

We have,

- B lives on an odd-numbered floor above the fourth floor.
- Only three persons live between B and the one who likes Pink.
- As many persons live above the one who likes Pink as below D, who does not like Pink.

From the above conditions, there are two possibilities.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6				
5	B		D	
4				
3				Pink
2				
1		Pink		

Again, we have,

- The one who likes Green lives three floors below D.
- Neither D nor B likes Yellow or Blue.
- G lives two floors above the one who likes Blue.
- C likes Red and lives below D and above G.

Floor	Case 1		Case 2	
	Person	Colour	Person	Colour
7	D		B	
6	C	Red		
5	B		D	
4	G	Green	C	Red
3			G	Pink
2		Blue		Green
1		Pink		Blue

Again, we have,

- E lives on a floor which is two times the floor number of A.
- The person who likes orange lives above the person who likes Red but below the one who likes white.

From the above condition, Case-1 gets eliminated because the person who likes orange lives above the person who likes Red but below the one who likes white, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Floor	Case 1		Case 2	
	Person	Color	Person	Color
7	D	Orange	B	White
6	C	Red	F	Yellow
5	B		D	Orange
4	G	Green	C	Red
3	F	Yellow	G	Pink
2	E	Blue	E	Green
1	A	Pink	A	Blue

Answer: B (In all other options, All the persons live on the odd numbered floor, except option B)

16. Questions

Final arrangement:

We have,

- D sits sixth to the right of G.
- Either of them sits at the extreme end.
- F sits third to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- Only five persons sit between F and E, who sit exactly in the middle of the row.
- H sits four persons away from E but neither adjacent to D nor G.

Again, we have,

- S sits at the extreme end of the row.
- I sit exactly between G and S.

From the above conditions, Case-1 gets eliminated because I sit exactly between G and S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: D

17. Questions

Final arrangement:

We have,

- D sits sixth to the right of G.
- Either of them sits at the extreme end.
- F sits third to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- Only five persons sit between F and E, who sit exactly in the middle of the row.
- H sits four persons away from E but neither adjacent to D nor G.

Again, we have,

- S sits at the extreme end of the row.
- I sit exactly between G and S.

From the above conditions, Case-1 gets eliminated because I sit exactly between G and S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: A

18. Questions

Final arrangement:

We have,

- D sits sixth to the right of G.
- Either of them sits at the extreme end.
- F sits third to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- Only five persons sit between F and E, who sit exactly in the middle of the row.
- H sits four persons away from E but neither adjacent to D nor G.

Again, we have,

- S sits at the extreme end of the row.
- I sit exactly between G and S.

From the above conditions, Case-1 gets eliminated because I sit exactly between G and S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: C (In all other options the first person sits third to the right of second persons except option C)

19. Questions

Final arrangement:

We have,

- D sits sixth to the right of G.
- Either of them sits at the extreme end.
- F sits third to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- Only five persons sit between F and E, who sit exactly in the middle of the row.
- H sits four persons away from E but neither adjacent to D nor G.

Again, we have,

- S sits at the extreme end of the row.
- I sit exactly between G and S.

From the above conditions, Case-1 gets eliminated because I sit exactly between G and S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: E

20. Questions

Final arrangement:

We have,

- D sits sixth to the right of G.
- Either of them sits at the extreme end.
- F sits third to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- Only five persons sit between F and E, who sit exactly in the middle of the row.
- H sits four persons away from E but neither adjacent to D nor G.

Again, we have,

- S sits at the extreme end of the row.
- I sit exactly between G and S.

From the above conditions, Case-1 gets eliminated because I sit exactly between G and S is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: B

21. Questions

Answer: D

$P \geq R > A$; $R < T < Q$; $A = S \leq H$

I). $H \geq R$ ($H \geq A < R$) --> False

II). $R < Q$ ($R < T < Q$) --> True

22. Questions

Answer: A

$J \geq K > S > F$; $Y < O$; $F > Z$

I). $J > F$ ($J \geq K > S > F$) --> True

II). $K < Z$ ($K > F > Z$) --> False

23. Questions

Answer: E

$K = F < N < P \leq R > M$; $W \geq K$; $R \geq X$

I). $N < X$ ($N < P \leq R \geq X$) --> False

II). $M > F$ ($F < N < P \leq R > M$) --> False

24. Questions

Answer: B

$$F \leq S > U ; H > S ; L < S$$

I). $L > U (L < S > U) \rightarrow$ False

II). $L \leq U (L < S > U) \rightarrow$ False

From the statement $F < S > U ; H > S ; L < S$, we know that both L and U are smaller than S, but there is no direct relationship given between L and U. Therefore, $L > U$ is possible, but $L \leq U$ is also possible. If L is greater than U, Conclusion I is true; if L is not greater than U, then it must be less than or equal to U, making Conclusion II true. Since these two conclusions cover all possible relationships between L and U and cannot be true simultaneously, either Conclusion I or Conclusion II follows.

25. Questions

Answer: C

$$X > Y \geq Z ; O \geq X < E ; R < O > K$$

I). $Z < E (Z \leq Y < X < E) \rightarrow$ True

II). $O > Y (O \geq X > Y) \rightarrow$ True

26. Questions

Final arrangement:

Answer: C (In all other options, the second point is North- East of the first mentioned point, except option c)

27. Questions

Final arrangement:

Answer: B

28. Questions

Final arrangement:

Answer: A

per Pythagoras ' theorem

$$FD = \sqrt{FE^2 + ED^2}$$

$$= \sqrt{12^2 + 9^2}$$

$$= \sqrt{144 + 81}$$

$$= \sqrt{225} \text{ m}$$

$$= 15 \text{ m}$$

29. Questions

Final arrangement:

Answer: D

30. Questions

Final arrangement:

Answer: E

Speed of the person = 3 km / hr

Total distance travelled by him = $8+8+8 = 24$ km

Time taken to reach home = $24 / 3 = 8$ hours

Leaves the office at 3.30 pm; then he should reach home at $3.30 + 8.00 = 11.30$ pm.

Answer: A

36. Questions

Final Arrangement:

$V > R (155 \text{ cm}) > T > P > S > Q$

We have,

- P is taller than Q and shorter than T.

$T > P > Q$

- P is the third shortest person.

$_ > _ > _ > P > _ > _$

- R is shorter than V and taller than S.

$V > R > S$

- T is not taller than R. ($R > T$)
- S is not the shortest.
- The height of the second tallest person is 155 cm.

Hence, the final arrangement is

$V > R (155 \text{ cm}) > T > P > S > Q$

Answer: D

37. Questions

Final Arrangement:

$V > R (155 \text{ cm}) > T > P > S > Q$

We have,

- P is taller than Q and shorter than T.

$T > P > Q$

- P is the third shortest person.

$_ > _ > _ > P > _ > _$

- R is shorter than V and taller than S.

$V > R > S$

- T is not taller than R. ($R > T$)
- S is not the shortest.
- The height of the second tallest person is 155 cm.

Hence, the final arrangement is

$V > R (155 \text{ cm}) > T > P > S > Q$

Answer: B

Sum of heights of R and S = 295 cm

Height of R = 155 cm

$R + S = 295 \text{ cm}$

$155 + S = 295 \text{ cm}$

$S = 295 - 155 = 140 \text{ cm}$

Then the height of P may be between 140 cm to 155 cm.

38. Questions

Final Arrangement:

$V > R (155 \text{ cm}) > T > P > S > Q$

We have,

- P is taller than Q and shorter than T.

$T > P > Q$

- P is the third shortest person.

$_ > _ > _ > P > _ > _$

- R is shorter than V and taller than S.

$V > R > S$

- T is not taller than R. ($R > T$)
- S is not the shortest.

- The height of the second tallest person is 155 cm.

Hence, the final arrangement is

$$V > R (155 \text{ cm}) > T > P > S > Q$$

Answer: A

39. Questions

Final arrangement:

$$N > P (18) > L > J > K > O (6) > M$$

- K bought more than M but less than P.

$$P > K > M$$

- O bought less than K but did not buy the fewest items.
- J bought more than K but less than L.

$$L > J > K$$

- P bought more than L but did not buy the most items.
- The one who bought the second-most and second-least items bought 18 and 6, respectively.

$$N > P (18) > L > J > K > O (6) > M$$

Answer: A

$$P+J = 30$$

$$18+J = 30$$

$$J=12$$

$$O+M = 9$$

$$6+M = 9$$

$$M=3$$

$$J-M=9$$

40. Questions

Final arrangement:

$$N > P (18) > L > J > K > O (6) > M$$

- K bought more than M but less than P.

$$P > K > M$$

- O bought less than K but did not buy the fewest items.
- J bought more than K but less than L.

$$L > J > K$$

- P bought more than L but did not buy the most items.

- The one who bought the second-most and second-least items bought 18 and 6, respectively.

$N > P (18) > L > J > K > O (6) > M$

Answer: C
