

1. Questions

Study the following information carefully and answer the below questions.

Six persons - A, B, C, D, E, and F went on vacation in different months viz., March, April, May, June, July, August of the same year. Each of them likes different fruits viz., banana, kiwi, orange, mango, apple, grapes.

An odd number persons went on vacation before D. D went on vacation three persons after the one who likes apple. One person went between the one who likes apple and B. As many persons went between A, who likes grapes and the one who likes kiwi as after B. A went immediately after C, who went two persons before the one who likes mango. Two persons went between E and the one who likes mango. F doesn't like banana. At least one person went between the one who likes orange and the one who likes banana.

If all the persons are arranged in reverse alphabetical order starting from March, then how many persons remain unchanged in their position?

- a. None
- b. Three
- c. Two
- d. One
- e. More than three

2. Questions

Who among the following person went on vacation three persons after F?

- a. C
- b. The one who likes kiwi
- c. B
- d. The one who likes grapes
- e. D

3. Questions

Which of the following combination(s) is/are TRUE as per the final arrangement?

I). March - E - Orange

II). July - B - Mango

III). August - D - Grapes

- a. Only I
- b. Only III
- c. Only II

- d. Only I & II
- e. Only I & III

4. Questions

F, E, C, ____

- a. D
- b. B
- c. E
- d. None of these
- e. A

5. Questions

If P went on the vacation immediately after F, then in which of the following month does P go to the vacation?

- a. April
- b. June
- c. March
- d. May
- e. July

6. Questions

Study the following information carefully and answer the below questions.

Eight persons - R, S, T, U, V, W, X and Y are sitting in a linear row in such a way that some of them are facing north while some of them are facing south. Not more than two adjacent persons facing the same direction.

Only three persons sit to the left of Y. R sits second to the right of Y and doesn't face the same direction as Y. One person sits between R and T. As many persons sit to the left of T as to the right of V. V sits fourth to the right of S. The number of persons sitting to the right of S is **one less than** the number of persons sitting to the right of U. Three persons sit between U and X. Immediate neighbours of W face the opposite direction and W doesn't face south.

Who among the following person sits second to the left of X?

- a. Y
- b. The one who sits to the immediate right of R
- c. W
- d. The one who sits three persons away from U

e. V

7. Questions

How many persons sit between U and R?

- a. None
- b. Three
- c. Two
- d. One
- e. More than three

8. Questions

Which of the following statement(s) is/are FALSE as per the final arrangement?

- I). X sits second to the left of S
- II). Two persons sit between Y and T
- III). W sits at one of the extreme ends.

- a. Only I
- b. Only II
- c. Only III
- d. Only II & III
- e. Only I & III

9. Questions

What is the position of V with respect to W as per the final linear arrangement?

- a. Immediate right
- b. Second to the left
- c. Third to the right
- d. Third to the left
- e. Fourth to the right

10. Questions

T, V, X, W, R, ____

- a. S
- b. Y

- c. T
- d. X
- e. U

11. Questions

Study the following information carefully and answer the below questions.

Eight boxes, viz., A, B, C, D, E, F, G and H are kept one above another in a stack. It is assumed that no other boxes are kept in the stack other than the given boxes.

More than four boxes are kept below box F. Only three boxes were kept between box F and box B. As many boxes kept above box E as below box A. Box E is kept four boxes above box G. Box A doesn't kept adjacent to box B. The number of boxes kept between the boxes C and G is **two less than** the number of boxes kept below box D. An odd number of boxes are kept between box D and box H.

Which of the following box is kept immediately below box G?

- a. Box E
- b. The box, which is kept immediately above box H
- c. Box D
- d. The box, which is kept two boxes below box F
- e. Box C

12. Questions

Which of the following box is kept exactly between box A and box C as per the final arrangement?

- a. Box G
- b. The box, which is kept immediately below box C
- c. Box F
- d. The box, which is kept three boxes below E
- e. Box D

13. Questions

If all the boxes are kept in the alphabetical order from top to bottom, then how many boxes will remain unchanged in their position?

- a. Three
- b. One
- c. Two
- d. None

- e. More than three

14. Questions

F, C, B, ____

- a. Box C
- b. Box H
- c. Box A
- d. Box D
- e. None of the above

15. Questions

Which of the following box(es) is/are kept below box B as per the final arrangement?

- I). Box A
 - II). The box, which is kept three boxes below box C
 - III). The box, which is kept two boxes below box E
- a. Only I
 - b. Only II
 - c. Only III
 - d. Only II and III
 - e. Only I and II

16. Questions

Study the following information carefully and answer the below questions.

Nine persons - A, B, C, D, E, F, G, H, and I- are sitting around a circular table, facing the centre, with equal distance between adjacent persons.

Only three persons sit between B and G. D sits second to the right of G. F sits to the immediate left of C and doesn't sit adjacent to B. C doesn't sit adjacent to G. As many persons sit between C and G as between C and H. The number of persons sitting between H and F is **one less than** the number of persons sitting between E and I when counted from the left of F and E respectively. A sits neither adjacent to E nor second to the left of I.

How many persons are sitting between E and H when counted to the right of H?

- a. Four
- b. Three
- c. Two

- d. One
- e. More than four

17. Questions

Who among the following sits third to the left of A?

- a. D
- b. The one who sits to the immediate left of E
- c. I
- d. The one who sits three persons away from H
- e. C

18. Questions

Who among the following person is an immediate neighbor of I?

I). C

II). The one who sits to the immediate left of E

III). D

- a. Only I
- b. Only III
- c. Only II
- d. Only I & II
- e. Only I & III

19. Questions

Who among the following person sits exactly between E and H, when counted from the left of H?

- a. The one who sits third to the left of F
- b. B
- c. G
- d. D
- e. None of the above

20. Questions

If B is related to F and C is related to G in a certain way. Then, who among the following is related to I?

- a. The one who sits immediate left of D

- b. A
- c. E
- d. H
- e. The one who sits second to the right of B

21. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements:

Only a few buses are cars.

No cars are taxis.

Some taxis are trains

Conclusions:

- I). Some buses are not taxis.
- II). No cars being trains is a possibility.
- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

22. Questions

Statements:

Only a few black is navy.

Some navy is not blue.

No blue is indigo.

Conclusions:

- I). All indigo can be black.
- II). Some black is not blue.
- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows

e. Both conclusions I and II follow

23. Questions

Statements:

Only a few parks are hotels.

Only hotels are the beach.

Some hotels are theatres.

Conclusions:

I). Some parks are theatres.

II). No theatre is a beach.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

24. Questions

Statements:

Only a few mogra is daisy.

All mogra is sunflowers.

No mogra is aster.

Conclusions:

I). No daisy is a sunflower.

II). All sunflowers can be aster.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

25. Questions

Statements:

Only a few beetroots are pink.

No pink is beans.

Only a few beans are peas.

Conclusions:

I). Some beetroots are not peas.

II). All beetroots are peas.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

26. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusion which is definitely true.

Statements:

$A > I = T \geq H < W$; $G < F > A \geq B = N$;

Conclusions:

I). $F > H$

II). $T \geq N$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

27. Questions

Statements:

$P \leq K = F < X \leq Z$; $D > Z = H \geq W \geq A$;

Conclusions:

I). $P < H$

II). $D > K$

- a. Only conclusion II is true

- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

28. Questions**Statements:**

$Q \geq H = K > E = S; X > V > S = N \leq R;$

Conclusions:

I). $Q \geq N$

II). $X > E$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

29. Questions**Statements:**

$Y > C \geq F = U > B; P \geq M \geq J = C < G;$

Conclusions:

I). $P > U$

II). $P = F$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

30. Questions**Statements:**

$V > O < L \leq M = P; E < S \leq L \geq X > K;$

Conclusions:

I). $P \geq E$

II). $S < V$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

31. Questions

Study the following information carefully and answer the below questions.

L is the sister-in-law of Q, who is the only daughter R. L is the daughter-in-law of R. N is the son of S, who is the nephew of P. P is the brother-in-law of T, who has no siblings. K is the granddaughter of T, who has only two children. P and Q are unmarried and both have only one sibling. R is the mother of S.

How is Q related to P based on the final arrangement?

- a. Mother
- b. Sister
- c. Niece
- d. Grandmother
- e. Daughter

32. Questions

Who among the following person addresses L's father-in-law as their father?

I). K

II). S

III). Q

- a. Only I
- b. Only II
- c. Only III
- d. Only I and III
- e. Only II and III

33. Questions

Study the following information carefully and answer the given questions.

D is the mother-in-law of T and mother of P. H is the daughter of P, who is the only son of V. M is the maternal aunt of H and she is unmarried. M's only sister-in-law is the daughter-in-law of X, who has only three children. H is the niece of Y, who is not the child of V. C is the sister of Y.

If L is the sister-in-law of C, then how is P related to L?

- a. Brother-in-law
- b. Father
- c. Wife's sister-in-law
- d. Brother
- e. Cannot be determined

34. Questions

The relationship between P and C is the same as the relationship between __ and __.

- a. Y and M
- b. T and D
- c. M and H
- d. X and M
- e. D and V

35. Questions

If X and Y are of the same gender and J is the spouse of Y, then how is X related to J?

- a. Mother-in-law
- b. Father-in-law
- c. Mother
- d. Father
- e. Grandfather

36. Questions

Study the following information carefully and answer the below questions.

How many such pairs of digits are there in the number "41825936" each of which has as many digits between them as there are in the number series (both forward and backward)?

- a. Two
- b. One
- c. None
- d. Three

e. More than three

37. Questions

If all the letters of the given word “APPRECIATE” are arranged in the reverse alphabetical order from left to right, then what is the sum of the place value (as per the English alphabetical series) of the letters which are in odd positions from the right end?

- a. 40
- b. 43
- c. 42
- d. 38
- e. 35

38. Questions

If in the number “9316478256”, 1 is subtracted from all the digits, then all the digits are arranged in descending order from the left end, then which of the following digit will be sixth from the right end?

- a. 8
- b. 7
- c. 5
- d. 6
- e. 4

39. Questions

If all the vowels in the word “DICTIONARY” are changed to the immediate previous letter and all the consonants are changed to the immediate next letter as per the English alphabetical series, then which of the following letters are repeated in the newly formed word? (Consider Z as the immediate previous letter for A)

- a. Z
- b. U, O
- c. H
- d. H, U, Z
- e. H, Z

40. Questions

If all the digits of the number “137452869586” are arranged in ascending order from left to right, then how many digits will remain unchanged in its position?

- a. Two
- b. Four
- c. Five
- d. Three
- e. More than five

Explanations:

1. Questions

Final arrangement:

Month	Persons
March	F(orange)
April	E(kiwi)
May	C(apple)
June	A(grapes)
July	B(mango)
August	D(banana)

We have,

- An odd number persons went on vacation before D.
- D went on vacation three persons after the one who likes apple.
- One person went between the one who likes apple and B.

From the above conditions, there are two possibilities.

Month	Case-1	Case-2
	Persons	Persons
March	(apple)	\B
April		
May	B	(apple)
June	D	
July		\B
August		D

Again, we have,

- As many persons went between A, who likes grapes and the one who likes kiwi as after B.
- A went immediately after C, who went two persons before the one who likes mango.

From the above conditions there is one more possibility.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)		
April	A(grapes)	(kiwi)	
May	B(mango)	C(apple)	C(apple)
June	D	A(grapes)	A(grapes)
July		B(mango)	B(mango)
August	(kiwi)	D	D(kiwi)

Again, we have,

- Two persons went between E and the one who likes mango.
- F doesn't like banana.
- At least one person went between the one who likes orange and the one who likes banana.

From the above conditions, Case-1 and Case 2a gets eliminated because at least one person went between the one who likes orange and the one who likes banana which is not satisfied.

Hence, case-2 shows the final arrangement.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)	F(Orange)	F(Orange)
April	A(grapes)	E(kiwi)	E(Banana)
May	B(mango)	C(apple)	C(apple)
June	D(Banana)	A(grapes)	A(grapes)
July	F(Orange)	B(mango)	B(mango)
August	E(kiwi)	D(Banana)	D(kiwi)

Answer: B

2. Questions

Final arrangement:

Month	Persons
March	F(orange)
April	E(kiwi)
May	C(apple)
June	A(grapes)
July	B(mango)
August	D(banana)

We have,

- An odd number persons went on vacation before D.
- D went on vacation three persons after the one who likes apple.
- One person went between the one who likes apple and B.

From the above conditions, there are two possibilities.

Month	Case-1	Case-2
	Persons	Persons
March	(apple)	\B
April		
May	B	(apple)
June	D	
July		\B
August		D

Again, we have,

- As many persons went between A, who likes grapes and the one who likes kiwi as after B.
- A went immediately after C, who went two persons before the one who likes mango.

From the above conditions there is one more possibility.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)		
April	A(grapes)	(kiwi)	
May	B(mango)	C(apple)	C(apple)
June	D	A(grapes)	A(grapes)
July		B(mango)	B(mango)
August	(kiwi)	D	D(kiwi)

Again, we have,

- Two persons went between E and the one who likes mango.
- F doesn't like banana.
- At least one person went between the one who likes orange and the one who likes banana.

From the above conditions, Case-1 and Case 2a gets eliminated because at least one person went between the one who likes orange and the one who likes banana which is not satisfied.

Hence, case-2 shows the final arrangement.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)	F(Orange)	F(Orange)
April	A(grapes)	E(kiwi)	E(Banana)
May	B(mango)	C(apple)	C(apple)
June	D(Banana)	A(grapes)	A(grapes)
July	F(Orange)	B(mango)	B(mango)
August	E(kiwi)	D(Banana)	D(kiwi)

Answer: D

3. Questions

Final arrangement:

Month	Persons
March	F(orange)
April	E(kiwi)
May	C(apple)
June	A(grapes)
July	B(mango)
August	D(banana)

We have,

- An odd number persons went on vacation before D.
- D went on vacation three persons after the one who likes apple.
- One person went between the one who likes apple and B.

From the above conditions, there are two possibilities.

Month	Case-1	Case-2
	Persons	Persons
March	(apple)	\B
April		
May	B	(apple)
June	D	
July		\B
August		D

Again, we have,

- As many persons went between A, who likes grapes and the one who likes kiwi as after B.
- A went immediately after C, who went two persons before the one who likes mango.

From the above conditions there is one more possibility.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)		
April	A(grapes)	(kiwi)	
May	B(mango)	C(apple)	C(apple)
June	D	A(grapes)	A(grapes)
July		B(mango)	B(mango)
August	(kiwi)	D	D(kiwi)

Again, we have,

- Two persons went between E and the one who likes mango.
- F doesn't like banana.
- At least one person went between the one who likes orange and the one who likes banana.

From the above conditions, Case-1 and Case 2a gets eliminated because at least one person went between the one who likes orange and the one who likes banana which is not satisfied.

Hence, case-2 shows the final arrangement.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)	F(Orange)	F(Orange)
April	A(grapes)	E(kiwi)	E(Banana)
May	B(mango)	C(apple)	C(apple)
June	D(Banana)	A(grapes)	A(grapes)
July	F(Orange)	B(mango)	B(mango)
August	E(kiwi)	D(Banana)	D(kiwi)

Answer: C

4. Questions

Final arrangement:

Month	Persons
March	F(orange)
April	E(kiwi)
May	C(apple)
June	A(grapes)
July	B(mango)
August	D(banana)

We have,

- An odd number persons went on vacation before D.
- D went on vacation three persons after the one who likes apple.
- One person went between the one who likes apple and B.

From the above conditions, there are two possibilities.

Month	Case-1	Case-2
	Persons	Persons
March	(apple)	\B
April		
May	B	(apple)
June	D	
July		\B
August		D

Again, we have,

- As many persons went between A, who likes grapes and the one who likes kiwi as after B.
- A went immediately after C, who went two persons before the one who likes mango.

From the above conditions there is one more possibility.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)		
April	A(grapes)	(kiwi)	
May	B(mango)	C(apple)	C(apple)
June	D	A(grapes)	A(grapes)
July		B(mango)	B(mango)
August	(kiwi)	D	D(kiwi)

Again, we have,

- Two persons went between E and the one who likes mango.
- F doesn't like banana.
- At least one person went between the one who likes orange and the one who likes banana.

From the above conditions, Case-1 and Case 2a gets eliminated because at least one person went between the one who likes orange and the one who likes banana which is not satisfied.

Hence, case-2 shows the final arrangement.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)	F(Orange)	F(Orange)
April	A(grapes)	E(kiwi)	E(Banana)
May	B(mango)	C(apple)	C(apple)
June	D(Banana)	A(grapes)	A(grapes)
July	F(Orange)	B(mango)	B(mango)
August	E(kiwi)	D(Banana)	D(kiwi)

Answer: E (F went immediately before E and E went immediately before C similarly C went immediately before A)

5. Questions

Final arrangement:

Month	Persons
March	F(orange)
April	E(kiwi)
May	C(apple)
June	A(grapes)
July	B(mango)
August	D(banana)

We have,

- An odd number persons went on vacation before D.
- D went on vacation three persons after the one who likes apple.
- One person went between the one who likes apple and B.

From the above conditions, there are two possibilities.

Month	Case-1	Case-2
	Persons	Persons
March	(apple)	\B
April		
May	B	(apple)
June	D	
July		\B
August		D

Again, we have,

- As many persons went between A, who likes grapes and the one who likes kiwi as after B.
- A went immediately after C, who went two persons before the one who likes mango.

From the above conditions there is one more possibility.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)		
April	A(grapes)	(kiwi)	
May	B(mango)	C(apple)	C(apple)
June	D	A(grapes)	A(grapes)
July		B(mango)	B(mango)
August	(kiwi)	D	D(kiwi)

Again, we have,

- Two persons went between E and the one who likes mango.
- F doesn't like banana.
- At least one person went between the one who likes orange and the one who likes banana.

From the above conditions, Case-1 and Case 2a gets eliminated because at least one person went between the one who likes orange and the one who likes banana which is not satisfied.

Hence, case-2 shows the final arrangement.

Month	Case-1	Case-2	Case-2a
	Persons	Persons	Persons
March	C(apple)	F(Orange)	F(Orange)
April	A(grapes)	E(kiwi)	E(Banana)
May	B(mango)	C(apple)	C(apple)
June	D(Banana)	A(grapes)	A(grapes)
July	F(Orange)	B(mango)	B(mango)
August	E(kiwi)	D(Banana)	D(kiwi)

Answer: A

6. Questions

Final arrangement:

We have,

- Only three persons sit to the left of Y.
- R sits second to the right of Y and doesn't face the same direction.
- One person is sitting between R and T.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the left of T as to the right of V.
- V sits fourth to the right of S.

Again, We have,

- The number of persons sitting to the right of S is **one less than** the number of persons sitting to the right of U.
- Three persons are sitting between U and X.
- Immediate neighbours of W face the opposite direction and W doesn't face south.

From the above conditions, case-2 gets eliminated because W doesn't face south, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: B

7. Questions

Final arrangement:

We have,

- Only three persons sit to the left of Y.
- R sits second to the right of Y and doesn't face the same direction.

- One person is sitting between R and T.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the left of T as to the right of V.
- V sits fourth to the right of S.

Again, We have,

- The number of persons sitting to the right of S is **one less than** the number of persons sitting to the right of U.
- Three persons are sitting between U and X.
- Immediate neighbours of W face the opposite direction and W doesn't face south.

From the above conditions, case-2 gets eliminated because W doesn't face south, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

8. Questions

Final arrangement:

We have,

- Only three persons sit to the left of Y.
- R sits second to the right of Y and doesn't face the same direction.
- One person is sitting between R and T.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the left of T as to the right of V.
- V sits fourth to the right of S.

Again, We have,

- The number of persons sitting to the right of S is **one less than** the number of persons sitting to the right of U.
- Three persons are sitting between U and X.
- Immediate neighbours of W face the opposite direction and W doesn't face south.

From the above conditions, case-2 gets eliminated because W doesn't face south, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D

9. Questions

Final arrangement:

We have,

- Only three persons sit to the left of Y.
- R sits second to the right of Y and doesn't face the same direction.
- One person is sitting between R and T.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the left of T as to the right of V.
- V sits fourth to the right of S.

Again, We have,

- The number of persons sitting to the right of S is **one less than** the number of persons sitting to the right of U.
- Three persons are sitting between U and X.
- Immediate neighbours of W face the opposite direction and W doesn't face south.

From the above conditions, case-2 gets eliminated because W doesn't face south, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A

10. Questions

Final arrangement:

We have,

- Only three persons sit to the left of Y.
- R sits second to the right of Y and doesn't face the same direction.
- One person is sitting between R and T.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit to the left of T as to the right of V.
- V sits fourth to the right of S.

Again, We have,

- The number of persons sitting to the right of S is **one less than** the number of persons sitting to the right of U.
- Three persons are sitting between U and X.
- Immediate neighbours of W face the opposite direction and W doesn't face south.

From the above conditions, case-2 gets eliminated because W doesn't face south, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E (As many persons sit to the left of T as to the right of V and as many persons sit to the left of X as to the left of W similarly as many persons sit to the left of R as to the right of U)

11. Questions

Final arrangement:

Boxes
F
E
C
D
B
G
A
H

We have,

- More than four boxes are kept below box F.
- Only three boxes were kept between box F and box B.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
		F
	F	
F		
		B
	B	
B		

Again, we have,

- As many boxes kept above box E as below box A.
- Box E is kept four boxes above box G.
- Box A doesn't keep adjacent to box B.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
	E	F
	F	E
F		
E		
A	G	B
	B	G
B		A
G	A	

Again, we have,

- The number of boxes kept between the boxes C and G is **two less than** the number of boxes kept below box D.
- An odd number of boxes are kept between box D and box H.

From the above conditions, case-2 gets eliminated because the number of boxes kept between boxes C and G is **two less than** the number of boxes kept below box D, which is not satisfied and case-1 gets eliminated because an odd number of boxes are kept between box D and box H, which is not satisfied.

Hence, case-3 shows the final arrangement.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
D	E	F
C	F	E
F		C
E		D
A	G	B
H	B	G
B		A
G	A	H

Answer: B

12. Questions

Final arrangement:

Boxes
F
E
C
D
B
G
A
H

We have,

- More than four boxes are kept below box F.
- Only three boxes were kept between box F and box B.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
		F
	F	
F		
		B
	B	
B		

Again, we have,

- As many boxes kept above box E as below box A.
- Box E is kept four boxes above box G.
- Box A doesn't keep adjacent to box B.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
	E	F
	F	E
F		
E		
A	G	B
	B	G
B		A
G	A	

Again, we have,

- The number of boxes kept between the boxes C and G is **two less than** the number of boxes kept below box D.
- An odd number of boxes are kept between box D and box H.

From the above conditions, case-2 gets eliminated because the number of boxes kept between boxes C and G is **two less than** the number of boxes kept below box D, which is not satisfied and case-1 gets eliminated because an odd number of boxes are kept between box D and box H, which is not satisfied.

Hence, case-3 shows the final arrangement.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
D	E	F
C	F	E
F		C
E		D
A	G	B
H	B	G
B		A
G	A	H

Answer: D

13. Questions

Final arrangement:

Boxes
F
E
C
D
B
G
A
H

We have,

- More than four boxes are kept below box F.
- Only three boxes were kept between box F and box B.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
		F
	F	
F		
		B
	B	
B		

Again, we have,

- As many boxes kept above box E as below box A.
- Box E is kept four boxes above box G.
- Box A doesn't keep adjacent to box B.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
	E	F
	F	E
F		
E		
A	G	B
	B	G
B		A
G	A	

Again, we have,

- The number of boxes kept between the boxes C and G is **two less than** the number of boxes kept below box D.
- An odd number of boxes are kept between box D and box H.

From the above conditions, case-2 gets eliminated because the number of boxes kept between boxes C and G is **two less than** the number of boxes kept below box D, which is not satisfied and case-1 gets eliminated because an odd number of boxes are kept between box D and box H, which is not satisfied.

Hence, case-3 shows the final arrangement.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
D	E	F
C	F	E
F		C
E		D
A	G	B
H	B	G
B		A
G	A	H

Answer: A

14. Questions

Final arrangement:

Boxes
F
E
C
D
B
G
A
H

We have,

- More than four boxes are kept below box F.
- Only three boxes were kept between box F and box B.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
		F
	F	
F		
		B
	B	
B		

Again, we have,

- As many boxes kept above box E as below box A.
- Box E is kept four boxes above box G.
- Box A doesn't keep adjacent to box B.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
	E	F
	F	E
F		
E		
A	G	B
	B	G
B		A
G	A	

Again, we have,

- The number of boxes kept between the boxes C and G is **two less than** the number of boxes kept below box D.
- An odd number of boxes are kept between box D and box H.

From the above conditions, case-2 gets eliminated because the number of boxes kept between boxes C and G is **two less than** the number of boxes kept below box D, which is not satisfied and case-1 gets eliminated because an odd number of boxes are kept between box D and box H, which is not satisfied.

Hence, case-3 shows the final arrangement.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
D	E	F
C	F	E
F		C
E		D
A	G	B
H	B	G
B		A
G	A	H

Answer: C (One box is kept between F and C and one box is kept between C and B similarly one box is kept between B and A)

15. Questions

Final arrangement:

Boxes
F
E
C
D
B
G
A
H

We have,

- More than four boxes are kept below box F.
- Only three boxes were kept between box F and box B.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
		F
	F	
F		
		B
	B	
B		

Again, we have,

- As many boxes kept above box E as below box A.
- Box E is kept four boxes above box G.
- Box A doesn't keep adjacent to box B.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
	E	F
	F	E
F		
E		
A	G	B
	B	G
B		A
G	A	

Again, we have,

- The number of boxes kept between the boxes C and G is **two less than** the number of boxes kept below box D.
- An odd number of boxes are kept between box D and box H.

From the above conditions, case-2 gets eliminated because the number of boxes kept between boxes C and G is **two less than** the number of boxes kept below box D, which is not satisfied and case-1 gets eliminated because an odd number of boxes are kept between box D and box H, which is not satisfied.

Hence, case-3 shows the final arrangement.

Case-1	Case-2	Case-3
Boxes	Boxes	Boxes
D	E	F
C	F	E
F		C
E		D
A	G	B
H	B	G
B		A
G	A	H

Answer: E

16. Questions

Final arrangement:

We have,

- Only three persons sit between B and G.
- D sits second to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C and doesn't sit adjacent to B.
- C doesn't sit adjacent to G.
- As many persons sit between C and G as between C and H.

Again, We have,

- The number of persons sitting between H and F is **one less than** the number of persons sitting between E and I when counted from the left of F and E respectively.
- A sits neither adjacent to E nor second to the left of I.

From the above conditions, case-1 gets eliminated because A isn't adjacent to E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: A

17. Questions

Final arrangement:

We have,

- Only three persons sit between B and G.
- D sits second to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C and doesn't sit adjacent to B.
- C doesn't sit adjacent to G.
- As many persons sit between C and G as between C and H.

Again, We have,

- The number of persons sitting between H and F is **one less than** the number of persons sitting between E and I when counted from the left of F and E respectively.
- A sits neither adjacent to E nor second to the left of I.

From the above conditions, case-1 gets eliminated because A isn't adjacent to E , which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: B

18. Questions

Final arrangement:

We have,

- Only three persons sit between B and G.
- D sits second to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C and doesn't sit adjacent to B.
- C doesn't sit adjacent to G.
- As many persons sit between C and G as between C and H.

Again, We have,

- The number of persons sitting between H and F is **one less than** the number of persons sitting between E and I when counted from the left of F and E respectively.
- A sits neither adjacent to E nor second to the left of I.

From the above conditions, case-1 gets eliminated because A isn't adjacent to E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: D

19. Questions

Final arrangement:

We have,

- Only three persons sit between B and G.
- D sits second to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C and doesn't sit adjacent to B.
- C doesn't sit adjacent to G.
- As many persons sit between C and G as between C and H.

Again, We have,

- The number of persons sitting between H and F is **one less than** the number of persons sitting between E and I when counted from the left of F and E respectively.
- A sits neither adjacent to E nor second to the left of I.

From the above conditions, case-1 gets eliminated because A isn't adjacent to E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: A

20. Questions

Final arrangement:

We have,

- Only three persons sit between B and G.
- D sits second to the right of G.

From the above conditions, there are two possibilities.

Again, we have,

- F sits to the immediate left of C and doesn't sit adjacent to B.
- C doesn't sit adjacent to G.
- As many persons sit between C and G as between C and H.

Again, We have,

- The number of persons sitting between H and F is **one less than** the number of persons sitting between E and I when counted from the left of F and E respectively.
- A sits neither adjacent to E nor second to the left of I.

From the above conditions, case-1 gets eliminated because A isn't adjacent to E , which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: E (B sits second to the left of F and C sits second to the left of G similarly F sits second to the left of I)

21. Questions

Answer: E

I). Some buses are not taxis - Here, there is no direct relation between buses and taxis. But some parts of buses, which are associated with cars, are definitely not connected with taxis. Hence, the conclusion follows.

II). No cars being trains is a possibility - Here, there is no direct relation between cars and trains. So, all the possible conclusions between them are true. Hence, the conclusion follows.

22. Questions

Answer: B

I). All indigo can be black - Here, there is no direct relation between indigo and black. So, all the possible conclusions between them are true. Hence, the conclusion follows.

II). Some black is not blue - Here, there is no direct relation between black and blue. So, all the definite

conclusions between them are not true. Hence, the conclusion does not follow.

23. Questions

Answer: A

I). Some parks are theatres - Here, there is no direct relation between parks and theatre. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). No theatre is a beach - Here, there is no direct relation between theatre and beach but the beach doesn't connect with anyone other than hotels. Hence, the conclusion follows.

24. Questions

Answer: D

I). No daisy is a sunflower - Here, there is no direct relation between daisy and sunflower. But some parts of mogra, which are associated with sunflowers, are definitely connected with daisy. Hence, the conclusion does not follow.

II). All sunflowers can be aster - Here, there is no direct relation between sunflower and aster. But some parts of sunflower, which are associated with mogra, are definitely not connected with aster. Hence, the conclusion does not follow.

25. Questions

Answer: C

I). Some beetroots are not peas - Here, there is no direct relation between beetroots and peas. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). All beetroots are peas - Here, there is no direct relation between beetroots and peas. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

But, by combining both conclusions I and II, we can say either I or II follows.

26. Questions

Answer: D

$A > I = T \geq H < W$; $G < F > A \geq B = N$;

I). $F > H$ ($F > A > I = T \geq H$) -> True

II). $T \geq N$ ($T = I < A \geq B = N$) -> False

27. Questions

Answer: C

$P \leq K = F < X \leq Z$; $D > Z = H \geq W \geq A$;

I). $P < H$ ($P \leq K = F < X \leq Z = H$) -> True

II). $D > K$ ($D > Z \geq X > F = K$) -> True

28. Questions

Answer: A

$Q \geq H = K > E = S$; $X > V > S = N \leq R$;

I). $Q \geq N$ ($Q \geq H = K > E = S = N$) -> False

II). $X > E$ ($X > V > S = E$) -> True

29. Questions

Answer: B

$Y > C \geq F = U > B$; $P \geq M \geq J = C < G$;

I). $P > U$ ($P \geq M \geq J = C \geq F = U$) -> False

II). $P = F$ ($P \geq M \geq J = C \geq F = U$) -> False

But on combining both I and II, either conclusion I or II is true.

30. Questions

Answer: E

$$V > O < L \leq M = P; E < S \leq L \geq X > K;$$

I). $P \geq E$ ($P \geq L \geq S > E$) $\rightarrow$ False

II). $S < V$ ($S \leq L > O < V$) $\rightarrow$ False

31. Questions

Answer: C

32. Questions

Answer: E

Answer: E

34. Questions

Answer: E

OR

35. Questions

Answer: B

36. Questions

Answer: D

Three pairs of numbers are obtained.

37. Questions

Answer: B

Given word: APPRECIATE

Letters are arranged in the reverse alphabetical order from left to right, then: **TRPPIEECAA**

The sum of the place value (as per the English alphabetical series) of the letters which are in odd positions from the right end = A-1, C-3, E-5, P-16, R-18

Sum = $1+3+5+16+18 = 43$

38. Questions

Answer: C

Given word: 9316478256

1 is subtracted from all the digits, then : 8205367145

All the digits are arranged in descending order from the left end, then: 8765543210

5 is the sixth digit from the right end.

39. Questions

Answer: E

Given word: DICTIONARY

If all the vowels are changed to the previous letter and all the consonants are changed to the next letter as per the English alphabetical series, then: **EHDUHNOSZ**

H and Z will repeat twice.

40. Questions

Answer: C

Given number : 137452869586

The digits are arranged in ascending order from left to right: **123455667889**

Five numbers will remain unchanged.
