

1. Questions

Study the following information carefully and answer the given questions.

Eight persons viz., P, Q, R, S, T, U, V and W live on eight different floors of an eight-storey building where the lowermost floor is numbered one, the one above that is numbered two, and so on till the topmost floor is numbered eight. Only one person lives on each floor.

V lives on a prime numbered floor but lives two floors below W, who does not live on the fifth floor. Only three persons live between W and P. T lives four floors above S, who doesn't live on the bottommost floor. U and R live on the adjacent floors. The number of floors below U is **one less than** the number of floors above Q. Q lives above R.

Who among the following person lives on the fourth floor?

- a. T
- b. S
- c. R
- d. P
- e. U

2. Questions

Q lives on which of the following floors?

- a. Seventh
- b. Third
- c. Eighth
- d. Sixth
- e. Second

3. Questions

If all the persons live in alphabetical order from the top most to the bottom most floor, then the positions of how many persons remain unchanged?

- a. No one
- b. Two
- c. One
- d. Three
- e. More than three

4. Questions

What is the position of T with respect to W?

- a. Three floors below
- b. Four floors above
- c. Immediately above
- d. Five floors below
- e. Two floors below

5. Questions

Four of the following five are alike in a certain way and thus form a group as per the final arrangement. Which of the following does not belong to that group?

- a. TR
- b. QP
- c. WU
- d. VS
- e. UV

6. Questions

Study the following information carefully and answer the given questions.

Ten persons are sitting in two parallel rows containing five persons each in such a way that there is an equal distance between adjacent persons. In row 1 - I, J, K, L and M are seated and all of them facing south. In row 2 - A, B, C, D and E are seated and all of them facing north. Each person in row 1 faces the other person in row 2.

I sits third to the left of J, who faces the one who sits adjacent to B. Only one person sits between B and E. A sits second to the right of D. As many persons sit to the right of A as to the left of M. The one who faces C sits third to the left of L.

Who among the following person sits third to the right of the one who faces E?

- a. M
- b. K
- c. J
- d. I
- e. L

7. Questions

How many persons sit to the left of the one who faces K as per the final arrangement?

- a. Three

- b. None
- c. One
- d. Four
- e. Two

8. Questions

Who among the following person faces L as per the final arrangement?

- a. D
- b. B
- c. E
- d. C
- e. A

9. Questions

If J is related to B and A is related to L in a certain way, then which of the following person is related to I?

- a. C
- b. A
- c. E
- d. B
- e. None of these

10. Questions

Which of the following statement(s) is/are True based on the final arrangement?

I). L sits to the immediate right of M

II). K faces C and sits second to the left of I

III). Only two persons sit between D and E

- a. Only II
- b. Only I and II
- c. Only III
- d. All I, II and III
- e. Only I and III

11. Questions

Study the following information carefully and answer the given questions.

Six persons – P, Q, R, S, T and U buy a toy one after another on different occasions. It is assumed that no other person buys a toy other than the given person. Each person likes different toys viz., Teddy, Barbie, JCB, Truck, Car and Bat.

The one who likes JCB buys three persons before R and immediately after Q. Only one person buys between the one who likes JCB and Bat. P buys adjacent to the one who buys the bat. P buys two persons after the one who likes Car. As many persons buy between the one who likes Car and Bat as before the one who likes Barbie. Only three persons buy between S and T. The one who likes Teddy buys adjacent to T. Neither R nor Q likes Truck.

Who among the following person buys a toy before U as per the final arrangement?

I). The one who likes Truck

II). The one who likes JCB

III). R

- a. Only I
- b. Only II and III
- c. Only II
- d. Only I and II
- e. All I, II and III

12. Questions

S likes which of the following toy as per the final arrangement?

- a. Barbie
- b. Truck
- c. Car
- d. JCB
- e. Teddy

13. Questions

How many persons buy a toy between the one who likes Car and R as per the final arrangement?

- a. One
- b. Three
- c. More than three
- d. Two
- e. None

14. Questions

The number of persons who buy a toy before Q is _____ the number of persons who buy after the one who likes Bat.

- a. One more than
- b. the same as
- c. Two more than
- d. One less than
- e. Two less than

15. Questions

If all the persons buy a toy in alphabetical order from first to last while the toys remain unchanged, then who among the following person likes Barbie?

- a. R
- b. Q
- c. T
- d. P
- e. S

16. Questions

Study the following information carefully and answer the given questions.

A certain number of people are sitting in a linear row and facing north. An even number of people sit in a row.

E sits third to the left of Z. Only five people sit between Z and A. L sits fifth to the right of E. Only two people sit between L and O. As many people sit between O and E as between O and P. S sits third to the left of P. T sits immediate to the left of S. G sits exactly between T and P, who sits at the extreme end.

How many people sit between E and T?

- a. 20
- b. 13
- c. 25
- d. 15
- e. 11

17. Questions

In which of the following options, less than two people are sitting between them?

- a. EZ
- b. LO
- c. TP
- d. SG
- e. ZA

18. Questions

Who among the following people does not sit to the left of O?

- a. L
- b. P
- c. A
- d. E
- e. Z

19. Questions

Four of the following five are alike in a certain way and thus form a group as per the final arrangement. Which of the following does not belong to that group?

- a. G,the person who sits at the extreme right end
- b. OS
- c. ZO
- d. EL
- e. The person who sits to the immediate right of A,Z

20. Questions

What is the position of L with respect to A?

- a. Fourth to the left
- b. Second to the right
- c. Third to the left
- d. Eighth to the right
- e. Fifth to the right

21. Questions

In the given questions, the relationship between different elements is shown in the statements, followed by some conclusions. Find the conclusion which is definitely true.

Statements: $W \geq H > V < D \leq A; X \leq Z \geq J < R; V > J \geq U$ **Conclusions:****I). $H > X$** **II). $U < A$**

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

22. Questions**Statements:** $C > K \geq O \leq F < B; S \leq Q < G < M = T; Y \leq O > D \geq G$ **Conclusions:****I). $S \leq B$** **II). $T > C$**

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

23. Questions**Statements:** $Q = R < Z \leq J > N; H \geq D = J; U > O \leq P < Q$ **Conclusions:****I). $H > P$** **II). $O < Z$**

- a. Only conclusion I is true
- b. Neither conclusion I nor II is true
- c. Both conclusions I and II are true

- d. Either conclusion I or II is true
- e. Only conclusion II is true

24. Questions

Statements:

$M < W \leq F \leq T$; $Z > K = V \leq W < J$; $I > E = O < K$

Conclusions:

I). $V < T$

II). $K = T$

- a. Neither conclusion I nor II is true
- b. Both conclusions I and II are true
- c. Only conclusion II is true
- d. Either conclusion I or II is true
- e. Only conclusion I is true

25. Questions

Statements:

$G \geq I \geq N < C$; $S > Z \leq N = H \geq U$; $L = D \leq Z$

Conclusions:

I). $U < D$

II). $G < L$

- a. Either conclusion I or II is true
- b. Both conclusions I and II are true
- c. Only conclusion II is true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

26. Questions

Study the following information carefully and answer the given questions.

A person starts walking towards west from point W and walks for 4m to reach point D. He turns 90° anticlockwise and walks for 20m to reach point B and then he turns right and walks for 15m to reach point S. From point S, he turns right and walks for 10m to reach point E. From point E he turns left and walks for 8m to reach point L. From point L he walks 7m to north to reach point M and then he walks for 27m to east to reach point P.

In which direction is point P with respect to point B?

- a. Northeast
- b. Southeast
- c. Northwest
- d. Southwest
- e. North

27. Questions

What is the shortest distance between point M and point B?

- a. $\sqrt{358}$ m
- b. $\sqrt{853}$ m
- c. $\sqrt{437}$ m
- d. $\sqrt{818}$ m
- e. $\sqrt{732}$ m

28. Questions

Which of the following points is to the south-east of point L based on the final arrangement?

I). Point E

II). Point B

III). Point S

- a. Only II
- b. Only I and III
- c. Only II and III
- d. Only III
- e. All I, II and III

29. Questions

Study the following information carefully and answer the given questions.

Eight friends built their home at a certain distance in the same area. E's home is 23m to the north of F's home, which is 17m to the west of G's home. O's home is 26m to the east of J's home, which is 33m to the north of N's home. L's home is 20m to the west of N's home and 23m to the north of K's home. G's home is to the south of O's home and east of K's home.

 @QuizByMickey
Click On Me Join Our BackupGroup

What is the shortest distance between N's home and O's home?

- a. $\sqrt{1675}$ m

- b. $\sqrt{1765}$ m
- c. $\sqrt{1567}$ m
- d. $\sqrt{1657}$ m
- e. $\sqrt{1756}$ m

30. Questions

What is the distance between O's home and G's home and in which direction is E's home with respect to G's home?

- a. 53m, Northeast
- b. 49m, South
- c. 60m, Southwest
- d. 56m, Northwest
- e. 66m, Southeast

31. Questions

Study the following information carefully and answer the below questions.

In a certain code language,

“four one six five” is coded as “ip iy ij it”

“six two three four” is coded as “iq ip it ib”

“nine three four ten” is coded as “iv ib iz ip”

“seven eight ten three” is coded as “ib is iz if”

(Note: All the given codes are two letters codes only)

What is the word for the code “iy” in the given coded language?

- a. Four
- b. One
- c. Five
- d. Either b or c
- e. Either a or c

32. Questions

What may be the phrase for the code “ij iv ib” in the given code language?

- a. Three one nine
- b. Four Five Nine

- c. Nine Ten One
- d. One Ten Three
- e. Five Two one

33. Questions

What may be the code for the phrase “Two Four Eleven” in the given coded language?

- a. ip ib ik
- b. ik iq ip
- c. ib ik iq
- d. iq ip iz
- e. None of these

34. Questions

If the phrase “Six Eight Twenty” is coded as “it if ix”, then what is the code for the phrase “Twenty Seven Ten” in the given coded language?

- a. it ix is
- b. iq ix if
- c. ix is iz
- d. iv ix iz
- e. iz ip ix

35. Questions

What is the phrase for the code “iv ib” in the given coded language?

- a. Ten Nine
- b. Six Four
- c. Two Nine
- d. Ten Three
- e. Nine Three

36. Questions

Study the following information carefully and answer the given questions.

Seven persons viz., G, H, I, J, K, L and M are of different weights. I is lighter than G but heavier than K, who is not the lightest person. M is heavier than H but lighter than both L and J. As many persons are lighter than K as heavier than J. G is lighter than M, whose weight is 78kg. The weight of the second lightest person is 33kg.

How many persons are heavier than G?

- a. One
- b. Two
- c. Three
- d. No one
- e. Can't be determined

37. Questions

If the sum of the weights of M and H is 105kg and the difference between the weights of J and K is 48kg, then what is the sum of the weights of J and H?

- a. 108kg
- b. 101kg
- c. 124kg
- d. 98kg
- e. 121kg

38. Questions

Study the following information carefully and answer the given questions.

Eight persons P, Q, R, S, T, U, V and W have different numbers of shoes. Even number of persons have more shoes than Q. The number of persons who have more shoes than Q is **one less than** the number of persons who have less shoes than R. Only two persons have shoes between R and V, who have just more shoes than W. P has more shoes than T but less shoes than S. T has more shoes than W.

If the average number of shoes of Q, who has 19 shoes and W is 17 shoes and U has four shoes less than W, then what is the difference between the number of shoes of P and W, where P has thrice the number of shoes as U?

- a. 15
- b. 21
- c. 18
- d. 20
- e. 23

39. Questions

Which of the following statement(s) is/are TRUE with respect to V?

- I). Only one person has shoes between V and P
- II). As many persons have more shoes than V as less shoes than R.

III). V has more shoes than W but less than T

- a. Only I
- b. Only II and III
- c. All I, II and III
- d. Only III
- e. Only I and II

40. Questions

Who among the following person has the highest and the lowest number of shoes respectively?

- a. S, U
- b. P, W
- c. S, V
- d. R, U
- e. Q, T

Explanations:

1. Questions

Final arrangement:

Floors	Persons
8	T
7	W
6	Q
5	V
4	S
3	P
2	U
1	R

We have,

- V lives on a prime numbered floor but lives two floors below W, who does not live on the fifth floor.
- Only three persons live between W and P.

From the above conditions, there are two possibilities

Floors	Case 1	Case 2
	Persons	Persons
8	P	
7		W
6		
5		V
4	W	
3		P
2	V	
1		

Again, we have,

- T lives four floors above S, who doesn't live on the bottommost floor.
- U and R live on the adjacent floors.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	
5	U/R	V
4	W	S
3	S	P
2	V	U/R
1		U/R

Again, we have,

- The number of floors below U is **one less than** the number of floors above Q.
- Q lives above R.

From the above conditions case-1 gets eliminated because the number floors below U is **one less than** the number of floors above Q, which is not satisfied.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	Q
5	U/R	V
4	W	S
3	S	P
2	V	U
1		R

Answer: B

2. Questions

Final arrangement:

Floors	Persons
8	T
7	W
6	Q
5	V
4	S
3	P
2	U
1	R

We have,

- V lives on a prime numbered floor but lives two floors below W, who does not live on the fifth

floor.

- Only three persons live between W and P.

From the above conditions, there are two possibilities

Floors	Case 1	Case 2
	Persons	Persons
8	P	
7		W
6		
5		V
4	W	
3		P
2	V	
1		

Again, we have,

- T lives four floors above S, who doesn't live on the bottommost floor.
- U and R live on the adjacent floors.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	
5	U/R	V
4	W	S
3	S	P
2	V	U/R
1		U/R

Again, we have,

- The number of floors below U is **one less than** the number of floors above Q.
- Q lives above R.

From the above conditions case-1 gets eliminated because the number floors below U is **one less than** the number of floors above Q, which is not satisfied.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	Q
5	U/R	V
4	W	S
3	S	P
2	V	U
1		R

Answer: D

3. Questions

Final arrangement:

Floors	Persons
8	T
7	W
6	Q
5	V
4	S
3	P
2	U
1	R

We have,

- V lives on a prime numbered floor but lives two floors below W, who does not live on the fifth

floor.

- Only three persons live between W and P.

From the above conditions, there are two possibilities

Floors	Case 1	Case 2
	Persons	Persons
8	P	
7		W
6		
5		V
4	W	
3		P
2	V	
1		

Again, we have,

- T lives four floors above S, who doesn't live on the bottommost floor.
- U and R live on the adjacent floors.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	
5	U/R	V
4	W	S
3	S	P
2	V	U/R
1		U/R

Again, we have,

- The number of floors below U is **one less than** the number of floors above Q.
- Q lives above R.

From the above conditions case-1 gets eliminated because the number floors below U is **one less than** the number of floors above Q, which is not satisfied.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	Q
5	U/R	V
4	W	S
3	S	P
2	V	U
1		R

Answer: A

4. Questions

Final arrangement:

Floors	Persons
8	T
7	W
6	Q
5	V
4	S
3	P
2	U
1	R

We have,

- V lives on a prime numbered floor but lives two floors below W, who does not live on the fifth

floor.

- Only three persons live between W and P.

From the above conditions, there are two possibilities

Floors	Case 1	Case 2
	Persons	Persons
8	P	
7		W
6		
5		V
4	W	
3		P
2	V	
1		

Again, we have,

- T lives four floors above S, who doesn't live on the bottommost floor.
- U and R live on the adjacent floors.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	
5	U/R	V
4	W	S
3	S	P
2	V	U/R
1		U/R

Again, we have,

- The number of floors below U is **one less than** the number of floors above Q.
- Q lives above R.

From the above conditions case-1 gets eliminated because the number floors below U is **one less than** the number of floors above Q, which is not satisfied.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	Q
5	U/R	V
4	W	S
3	S	P
2	V	U
1		R

Answer: C

5. Questions

Final arrangement:

Floors	Persons
8	T
7	W
6	Q
5	V
4	S
3	P
2	U
1	R

We have,

- V lives on a prime numbered floor but lives two floors below W, who does not live on the fifth

floor.

- Only three persons live between W and P.

From the above conditions, there are two possibilities

Floors	Case 1	Case 2
	Persons	Persons
8	P	
7		W
6		
5		V
4	W	
3		P
2	V	
1		

Again, we have,

- T lives four floors above S, who doesn't live on the bottommost floor.
- U and R live on the adjacent floors.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	
5	U/R	V
4	W	S
3	S	P
2	V	U/R
1		U/R

Again, we have,

- The number of floors below U is **one less than** the number of floors above Q.
- Q lives above R.

From the above conditions case-1 gets eliminated because the number floors below U is **one less than** the number of floors above Q, which is not satisfied.

Floors	Case 1	Case 2
	Persons	Persons
8	P	T
7	T	W
6	U/R	Q
5	U/R	V
4	W	S
3	S	P
2	V	U
1		R

Answer: E (In all other options, as many persons live above the first person as below the second person, except option E)

6. Questions

Final arrangement:

We have,

- I sits third to the left of J, who faces the one who sits adjacent to B.
- Only one person sits between B and E.

From the above conditions, there are three possibilities

Again, we have,

- A sits second to the right of D.
- As many persons sit to the right of A as to the left of M.

From the above conditions case-1 splits into case-1a

Again, we have,

- The one who faces C sits third to the left of L.

From the above conditions case -1a, case-2 and case-3 get eliminated because the one who faces C sits third to the left of L, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: C

7. Questions

Final arrangement:

We have,

- I sits third to the left of J, who faces the one who sits adjacent to B.
- Only one person sits between B and E.

From the above conditions, there are three possibilities

Again, we have,

- A sits second to the right of D.
- As many persons sit to the right of A as to the left of M.

From the above conditions case-1 splits into case-1a

Again, we have,

- The one who faces C sits third to the left of L.

From the above conditions case -1a, case-2 and case-3 get eliminated because the one who faces C sits third to the left of L, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: D

8. Questions

Final arrangement:

We have,

- I sits third to the left of J, who faces the one who sits adjacent to B.
- Only one person sits between B and E.

From the above conditions, there are three possibilities

Again, we have,

- A sits second to the right of D.

- As many persons sit to the right of A as to the left of M.

From the above conditions case-1 splits into case-1a

Again, we have,

- The one who faces C sits third to the left of L.

From the above conditions case -1a, case-2 and case-3 get eliminated because the one who faces C sits third to the left of L, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: B

9. Questions

Final arrangement:

We have,

- I sits third to the left of J, who faces the one who sits adjacent to B.
- Only one person sits between B and E.

From the above conditions, there are three possibilities

Again, we have,

- A sits second to the right of D.
- As many persons sit to the right of A as to the left of M.

From the above conditions case-1 splits into case-1a

Again, we have,

- The one who faces C sits third to the left of L.

From the above conditions case -1a, case-2 and case-3 get eliminated because the one who faces C sits third to the left of L, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: A (The first person faces the one who sits immediate left of the second person)

10. Questions

Final arrangement:

We have,

- I sits third to the left of J, who faces the one who sits adjacent to B.
- Only one person sits between B and E.

From the above conditions, there are three possibilities

Again, we have,

- A sits second to the right of D.
- As many persons sit to the right of A as to the left of M.

From the above conditions case-1 splits into case-1a

Again, we have,

- The one who faces C sits third to the left of L.

From the above conditions case -1a, case-2 and case-3 get eliminated because the one who faces C sits third to the left of L, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: E

11. Questions

Final arrangement:

Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

We have,

- The one who likes JCB buys three persons before R and immediately after Q.
- Only one person buys between the one who likes JCB and Bat.

From the above conditions, there are three possibilities

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q					Bat
	JCB	Q		Q	
			JCB		JCB
	Bat				
R			Bat		
		R		R	

Again, we have,

- P buys adjacent to the one who buys the bat.
- P buys two persons after the one who likes Car.
- As many persons buy between the one who likes Car and Bat as before the one who likes Barbie.

From the above conditions case-2a gets eliminated because P buys adjacent to the one who buys the bat and case-2 get eliminated because As many persons buy between the one who likes Car and Bat as before the one who likes Barbie, which is not satisfied.

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q	Car				Bat
	JCB	Q	Car	Q	Car
P	Barbie		JCB		JCB
	Bat	P		P	
R			Bat		
		R		R	

Again, we have,

- Only three persons buys between S and T
- The one who likes Teddy buys adjacent to T.
- Neither R nor Q likes trucks.

Case 1	
Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

Answer: C

12. Questions

Final arrangement:

Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

We have,

- The one who likes JCB buys three persons before R and immediately after Q.
- Only one person buys between the one who likes JCB and Bat.

From the above conditions, there are three possibilities

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q					Bat
	JCB	Q		Q	
			JCB		JCB
	Bat				
R			Bat		
		R		R	

Again, we have,

- P buys adjacent to the one who buys the bat.
- P buys two persons after the one who likes Car.
- As many persons buy between the one who likes Car and Bat as before the one who likes Barbie.

From the above conditions case-2a gets eliminated because P buys adjacent to the one who buys the bat and case-2 get eliminated because As many persons buy between the one who likes Car and Bat as before the one who likes Barbie, which is not satisfied.

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q	Car				Bat
	JCB	Q	Car	Q	Car
P	Barbie		JCB		JCB
	Bat	P		P	
R			Bat		
		R		R	

Again, we have,

- Only three persons buys between S and T
- The one who likes Teddy buys adjacent to T.
- Neither R nor Q likes trucks.

Case 1	
Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

Answer: D

13. Questions

Final arrangement:

Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

We have,

- The one who likes JCB buys three persons before R and immediately after Q.
- Only one person buys between the one who likes JCB and Bat.

From the above conditions, there are three possibilities

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q					Bat
	JCB	Q		Q	
			JCB		JCB
	Bat				
R			Bat		
		R		R	

Again, we have,

- P buys adjacent to the one who buys the bat.
- P buys two persons after the one who likes Car.
- As many persons buy between the one who likes Car and Bat as before the one who likes Barbie.

From the above conditions case-2a gets eliminated because P buys adjacent to the one who buys the bat and case-2 get eliminated because As many persons buy between the one who likes Car and Bat as before the one who likes Barbie, which is not satisfied.

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q	Car				Bat
	JCB	Q	Car	Q	Car
P	Barbie		JCB		JCB
	Bat	P		P	
R			Bat		
		R		R	

Again, we have,

- Only three persons buys between S and T
- The one who likes Teddy buys adjacent to T.
- Neither R nor Q likes trucks.

Case 1	
Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

Answer: B

14. Questions

Final arrangement:

Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

We have,

- The one who likes JCB buys three persons before R and immediately after Q.
- Only one person buys between the one who likes JCB and Bat.

From the above conditions, there are three possibilities

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q					Bat
	JCB	Q		Q	
			JCB		JCB
	Bat				
R			Bat		
		R		R	

Again, we have,

- P buys adjacent to the one who buys the bat.
- P buys two persons after the one who likes Car.
- As many persons buy between the one who likes Car and Bat as before the one who likes Barbie.

From the above conditions case-2a gets eliminated because P buys adjacent to the one who buys the bat and case-2 get eliminated because As many persons buy between the one who likes Car and Bat as before the one who likes Barbie, which is not satisfied.

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q	Car				Bat
	JCB	Q	Car	Q	Car
P	Barbie		JCB		JCB
	Bat	P		P	
R			Bat		
		R		R	

Again, we have,

- Only three persons buys between S and T
- The one who likes Teddy buys adjacent to T.
- Neither R nor Q likes trucks.

Case 1	
Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

Answer: E

15. Questions

Final arrangement:

Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

We have,

- The one who likes JCB buys three persons before R and immediately after Q.
- Only one person buys between the one who likes JCB and Bat.

From the above conditions, there are three possibilities

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q					Bat
	JCB	Q		Q	
			JCB		JCB
	Bat				
R			Bat		
		R		R	

Again, we have,

- P buys adjacent to the one who buys the bat.
- P buys two persons after the one who likes Car.
- As many persons buy between the one who likes Car and Bat as before the one who likes Barbie.

From the above conditions case-2a gets eliminated because P buys adjacent to the one who buys the bat and case-2 get eliminated because As many persons buy between the one who likes Car and Bat as before the one who likes Barbie, which is not satisfied.

Case 1		Case 2		Case 2a	
Persons	Toys	Persons	Toys	Persons	Toys
Q	Car				Bat
	JCB	Q	Car	Q	Car
P	Barbie		JCB		JCB
	Bat	P		P	
R			Bat		
		R		R	

Again, we have,

- Only three persons buys between S and T
- The one who likes Teddy buys adjacent to T.
- Neither R nor Q likes trucks.

Case 1	
Persons	Toys
Q	Car
S	JCB
P	Barbie
U	Bat
R	Teddy
T	Truck

Answer: A

Persons	Toys
P	Car
Q	JCB
R	Barbie
S	Bat
T	Teddy
U	Truck

16. Questions

Final arrangement:

We have,

- E sits third to the left of Z.
- Only five people sit between Z and A.
- L sits fifth to the right of E.

From the above conditions, there are two possibilities

Again, we have,

- Only two people sit between L and O.
- As many people sit between O and E as between O and P.
- S sits third to the left of P.

From the above conditions case-1 and case-2 splits into case-1a and case-2a

Again, we have,

- T sits immediate to the left of S.
- G sits exactly between T and P, who sits at the extreme end.

From the above conditions case-1a and case-2a get eliminated because T sits immediately to the right of S, which is not satisfied.

From the above conditions case-2 gets eliminated because an even number of people sit in a row, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E

17. Questions

Final arrangement:

We have,

- E sits third to the left of Z.

- Only five people sit between Z and A.
- L sits fifth to the right of E.

From the above conditions, there are two possibilities

Again, we have,

- Only two people sit between L and O.
- As many people sit between O and E as between O and P.
- S sits third to the left of P.

From the above conditions case-1 and case-2 splits into case-1a and case-2a

Again, we have,

- T sits immediate to the left of S.
- G sits exactly between T and P, who sits at the extreme end.

From the above conditions case-1a and case-2a get eliminated because T sits immediately to the right of S, which is not satisfied.

From the above conditions case-2 gets eliminated because an even number of people sit in a row, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D

18. Questions

Final arrangement:

We have,

- E sits third to the left of Z.
- Only five people sit between Z and A.
- L sits fifth to the right of E.

From the above conditions, there are two possibilities

Again, we have,

- Only two people sit between L and O.
- As many people sit between O and E as between O and P.
- S sits third to the left of P.

From the above conditions case-1 and case-2 splits into case-1a and case-2a

Again, we have,

- T sits immediate to the left of S.
- G sits exactly between T and P, who sits at the extreme end.

From the above conditions case-1a and case-2a get eliminated because T sits immediately to the right of S, which is not satisfied.

From the above conditions case-2 gets eliminated because an even number of people sit in a row, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: B

19. Questions

Final arrangement:

We have,

- E sits third to the left of Z.

- Only five people sit between Z and A.
- L sits fifth to the right of E.

From the above conditions, there are two possibilities

Again, we have,

- Only two people sit between L and O.
- As many people sit between O and E as between O and P.
- S sits third to the left of P.

From the above conditions case-1 and case-2 splits into case-1a and case-2a

Again, we have,

- T sits immediate to the left of S.
- G sits exactly between T and P, who sits at the extreme end.

From the above conditions case-1a and case-2a get eliminated because T sits immediately to the right of S, which is not satisfied.

From the above conditions case-2 gets eliminated because an even number of people sit in a row, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A (In all other options the second person sits fifth to the right of the first person except option A)

20. Questions

Final arrangement:

We have,

- E sits third to the left of Z.
- Only five people sit between Z and A.
- L sits fifth to the right of E.

From the above conditions, there are two possibilities

Again, we have,

- Only two people sit between L and O.
- As many people sit between O and E as between O and P.
- S sits third to the left of P.

From the above conditions case-1 and case-2 splits into case-1a and case-2a

Again, we have,

- T sits immediate to the left of S.
- G sits exactly between T and P, who sits at the extreme end.

From the above conditions case-1a and case-2a get eliminated because T sits immediately to the right of S, which is not satisfied.

From the above conditions case-2 gets eliminated because an even number of people sit in a row, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D

21. Questions

Answer: B

$W \geq H > V < D \leq A$; $X \leq Z \geq J < R$; $V > J \geq U$

I). $H > X$ ($H > V > J \leq Z \geq X$) False

II). $U < A$ ($U \leq J < V < D \leq A$) True

22. Questions

Answer: E

$C > K \geq O \leq F < B$; $S \leq Q < G < M = T$; $Y \leq O > D \geq G$

I). $S \leq B$ ($S \leq Q < G \leq D < O \leq F < B$) False

II). $T > C$ ($T = M > G \leq D < O \leq K < C$) False

23. Questions

Answer: C

$Q = R < Z \leq J > N$; $H \geq D = J$; $U > O \leq P < Q$

I). $H > P$ ($H \geq D = J \geq Z > R = Q > P$) True

II). $O < Z$ ($O \leq P < Q = R < Z$) True

24. Questions

Answer: D

$M < W \leq F \leq T$; $Z > K = V \leq W < J$; $I > E = O < K$

I). $V < T$ ($V \leq W \leq F \leq T$) False

II). $K = T$ ($K = V \leq W \leq F \leq T$) False

Here, $K = V \leq T$, and by combining both conclusions I and II we get $K/V \leq T$. Hence, either conclusion I or II is true.

25. Questions

Answer: E

$G \geq I \geq N < C$; $S > Z \leq N = H \geq U$; $L = D \leq Z$

I). $U < D$ ($U \leq H = N \geq Z \geq D$) False

II). $G < L$ ($G \geq I \geq N \geq Z \geq D = L$) False

26. Questions

Final arrangement:

Answer: A

27. Questions

Final arrangement:

Answer: D

The shortest distance between point M and point B = $\sqrt{(23^2) + (17^2)} = \sqrt{818}\text{m}$

28. Questions

Final arrangement:

Answer: C

29. Questions

Final arrangement:

Answer: B

The shortest distance between N's home and O's home = $\sqrt{(26^2) + (33^2)} = \sqrt{1765}m$

30. Questions

Final arrangement:

Answer: D

The distance between O's home and G's home is 56m

E's home is northwest of G's home

31. Questions

Words	Codes
Six	it
Four	ip
Two	iq
Three	ib
Nine	iv
Ten	iz
One/Five	iy/ij
Seven/Eight	is/if

Answer: D

32. Questions

Words	Codes
Six	it
Four	ip
Two	iq
Three	ib
Nine	iv
Ten	iz
One/Five	iy/ij
Seven/Eight	is/if

Answer: A

33. Questions

Words	Codes
Six	it
Four	ip
Two	iq
Three	ib
Nine	iv
Ten	iz
One/Five	iy/ij
Seven/Eight	is/if

Answer: B

34. Questions

Words	Codes
Six	it
Four	ip
Two	iq
Three	ib
Nine	iv
Ten	iz
One/Five	iy/ij
Seven/Eight	is/if

Answer: C

35. Questions

Words	Codes
Six	it
Four	ip
Two	iq
Three	ib
Nine	iv
Ten	iz
One/Five	iy/ij
Seven/Eight	is/if

Answer: E

36. Questions

Final arrangement:

$L > J > M (78\text{kg}) > G > I > K(33\text{kg}) > H$

We have,

- I is lighter than G but heavier than K, who is not the lightest.

$G > I > K > _$

- M is heavier than H but lighter than L and J.

$L/J > L/J > M > H$

- As many persons are lighter than K as heavier than J.
- G is lighter than M, whose weight is 78kg.

$L > J > M (78\text{kg}) > G > I > K > H$

- The weight of the second lightest person is 33kg.

$L > J > M (78\text{kg}) > G > I > K(33\text{kg}) > H$

Answer: C

37. Questions

Final arrangement:

$L > J > M (78\text{kg}) > G > I > K(33\text{kg}) > H$

We have,

- I is lighter than G but heavier than K, who is not the lightest.

$G > I > K > _$

- M is heavier than H but lighter than L and J.

$L/J > L/J > M > H$

- As many persons are lighter than K as heavier than J.
- G is lighter than M, whose weight is 78kg.

$L > J > M (78\text{kg}) > G > I > K > H$

- The weight of the second lightest person is 33kg.

$L > J > M (78\text{kg}) > G > I > K (33\text{kg}) > H$

Answer: A

The sum of the weights of M and H is 105kg

$$M+H = 105$$

$$H = 105-78$$

$$H = 27\text{kg}$$

The difference between the weights of J and K is 48kg

$$J-K = 48$$

$$J = 48+33$$

$$J = 81\text{kg}$$

The sum of the weights of J and H

$$J+H = 81+27 = 108\text{kg}$$

38. Questions

Final arrangement:

$S > P > R > T > Q > V > W > U$

We have,

- Even number of persons have more number of shoes than Q.

Case 1: $_ > _ > Q > _ > _ > _ > _ > _$

Case 2: $_ > _ > _ > _ > Q > _ > _ > _$

Case 3: $_ > _ > _ > _ > _ > _ > Q > _$

Case 4: $Q > _ > _ > _ > _ > _ > _ > _$

- The number of persons who have more shoes than Q is **one less than** the number of persons who have less shoes than R.

Case 1: $_ > _ > Q > _ > R > _ > _ > _$

Case 2: $_ > _ > R > _ > Q > _ > _ > _$

Case 3: $R > _ > _ > _ > _ > _ > Q > _$

Case 4: $Q > _ > _ > _ > _ > _ > R > _$

- Only two persons have shoes between R and V, who have just more shoes than W.

From the above conditions case-1 gets eliminated because Only two persons have shoes between R and V, who has immediately more shoes than W, which is not satisfied.

~~Case 1~~ : $_ > _ > Q > _ > R > _ > _ > _$

Case 2: $_ > _ > R > _ > Q > V > W > _$

Case 3: $R > _ > _ > V > W > _ > Q > _$

Case 4: $Q > _ > _ > V > W > _ > R > _$

- P has more shoes than T but less shoes than S.
- T has more shoes than W.

From the above conditions Case 3 and Case 4 gets eliminated.

Case 2 shows the final order:

Case 2: $S > P > R > T > Q > V > W > U$

~~Case 3~~ : $R > _ > _ > V > W > _ > Q > _$

~~Case 4~~ : $Q > _ > _ > V > W > _ > R > _$

Answer: C

$$(Q+W)/2 = 17$$

$$W+19 = 34$$

$$W = 15 \text{ pairs}$$

$$U = W-4$$

$$U = 15-4$$

$$U = 11 \text{ pairs}$$

$$P = 3U$$

$$P = 33 \text{ pairs}$$

$$\text{Difference} = P-W = 33-15 = 18 \text{ Pairs}$$

39. Questions

Final arrangement:

$$S > P > R > T > Q > V > W > U$$

We have,

- Even number of persons have more number of shoes than Q.

Case 1: $_ > _ > Q > _ > _ > _ > _ > _$

Case 2: $_ > _ > _ > _ > Q > _ > _ > _$

Case 3: $_ > _ > _ > _ > _ > _ > Q > _$

Case 4: $Q > _ > _ > _ > _ > _ > _ > _$

- The number of persons who have more shoes than Q is **one less than** the number of persons who have less shoes than R.

Case 1: $_ > _ > Q > _ > R > _ > _ > _$

Case 2: $_ > _ > R > _ > Q > _ > _ > _$

Case 3: $R > _ > _ > _ > _ > _ > Q > _$

Case 4: $Q > _ > _ > _ > _ > _ > R > _$

- Only two persons have shoes between R and V, who have just more shoes than W.

From the above conditions case-1 gets eliminated because Only two persons have shoes between R and V, who has immediately more shoes than W, which is not satisfied.

~~Case 1~~ : $_ > _ > Q > _ > R > _ > _ > _$

Case 2: $_ > _ > R > _ > Q > V > W > _$

Case 3: $R > _ > _ > V > W > _ > Q > _$

Case 4: $Q > _ > _ > V > W > _ > R > _$

- P has more shoes than T but less shoes than S.
- T has more shoes than W.

From the above conditions Case 3 and Case 4 gets eliminated.

Case 2 shows the final order:

Case 2: $S > P > R > T > Q > V > W > U$

~~Case 3~~ : $R > _ > _ > V > W > _ > Q > _$

~~Case 4~~ : $Q > _ > _ > V > W > _ > R > _$

Answer: B

40. Questions

Final arrangement:

$S > P > R > T > Q > V > W > U$

We have,

- Even number of persons have more number of shoes than Q.

Case 1: $_ > _ > Q > _ > _ > _ > _ > _$

Case 2: $_ > _ > _ > _ > Q > _ > _ > _$

Case 3: $_ > _ > _ > _ > _ > _ > Q > _$

Case 4: $Q > _ > _ > _ > _ > _ > _ > _$

- The number of persons who have more shoes than Q is **one less than** the number of persons who have less shoes than R.

Case 1: $_ > _ > Q > _ > R > _ > _ > _$

Case 2: $_ > _ > R > _ > Q > _ > _ > _$

Case 3: $R > _ > _ > _ > _ > _ > Q > _$

Case 4: $Q > _ > _ > _ > _ > _ > R > _$

- Only two persons have shoes between R and V, who have just more shoes than W.

From the above conditions case-1 gets eliminated because Only two persons have shoes between R and V, who has immediately more shoes than W, which is not satisfied.

~~Case 1~~ : $_ > _ > Q > _ > R > _ > _ > _$

Case 2: $_ > _ > R > _ > Q > V > W > _$

Case 3: $R > _ > _ > V > W > _ > Q > _$

Case 4: $Q > _ > _ > V > W > _ > R > _$

- P has more shoes than T but less shoes than S.
- T has more shoes than W.

From the above conditions Case 3 and Case 4 gets eliminated.

Case 2 shows the final order:

Case 2: $S > P > R > T > Q > V > W > U$

~~Case 3~~ : $R > _ > _ > V > W > _ > Q > _$

~~Case 4~~ : $Q > _ > _ > V > W > _ > R > _$

Answer: A
