

1. Questions

Study the following information carefully and answer the below questions.

Eight persons viz., A, B, C, D, E, F, G, and H are sitting around a square table in such a way that four of them are sitting in the middle of the sides and facing the centre while four of them are sitting at the corners and facing outside (**opposite to the centre**).

G sits at the corner of the table. B sits adjacent to G. D sits third to the left of B. Two persons sit between D and A. A sits to the immediate right of C. As many persons sit between C and E as between A and H when counted from the right of C and A, respectively. F sits two places away from H. E is not an immediate neighbour of H.

Who among the following person sits second to the right of E?

- a. F
- b. The one who sits to the immediate right of H
- c. C
- d. The one who sits third to the left of A
- e. D

2. Questions

How many persons are sitting between H and G, when counted from the right of H?

- a. Two
- b. One
- c. Four
- d. Three
- e. More than four

3. Questions

Who among the following person sit adjacent to each other?

- a. C and the one who sits to the immediate right of D
- b. D and G
- c. E and H
- d. The one who sits to the immediate left of G and E
- e. Both option a and d

4. Questions

DE, HB, CG, ____

- a. AG
- b. BH
- c. AF
- d. EH
- e. None of the above

5. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. A
- b. E
- c. The one who sits to the immediate left of D
- d. The one who sits third to the right of G
- e. B

6. Questions

Study the following information carefully and answer the below questions.

Eight persons – P, Q, R, S, T, U, V, and W are attending the meeting on two different dates, either 7th or 20th of four different months viz., August, September, October, and November of the same year. Only one person attends the meeting on each date, and only two persons attend the meeting in each month.

(Note: consider 0 is not an even number.)

An even number of persons attend the meeting before T. Three persons attend the meeting between T and P. As many persons attend the meeting before P as after V. W attends the meeting immediately before V. Two persons attend the meeting between W and Q. The number of persons who attend the meeting before Q is **one more than** the number of persons who attend the meeting after R. U attends the meeting neither before S nor on an even-numbered date.

On which of the following month and date does S attend the meeting?

- a. November 7
- b. September 7
- c. August 20
- d. November 20
- e. October 7

7. Questions

As many persons attend the meeting between ____ and ____ as after U.

- a. P and T

- b. R and V
- c. Q and the one who attends two persons before W
- d. U and T
- e. S and the one who attends immediately after W

8. Questions

Which of the following statement(s) is/are FALSE as per the final arrangement?

I). Two persons attend the meeting between U and the one who attends immediately after W.

II). R attends the meeting on an odd numbered date.

III). Q attends the meeting three persons before V.

- a. Only I
- b. All I, II, and III
- c. Only III
- d. Only I and II
- e. Only II and III

9. Questions

If the persons are attending the meeting in alphabetical order from November 20, then how many persons are unchanged in their position?

- a. Two
- b. Three
- c. None
- d. One
- e. More than three

10. Questions

S, Q, R, ____

- a. T
- b. U
- c. P
- d. V
- e. R

11. Questions

Study the following information carefully and answer the below questions.

Eight persons -G, H, I, J, K, L, M and N were born in different years viz., 1977, 1982, 1991, 1995, 1999, 2000, 2004, and 2013. Their ages were calculated based on the year 2025.

L was born in the leap year. The difference between the ages of L and G is a cube number. J was born three persons after G. The sum of the ages of J and K is a multiple of 11. K was born two persons before I. As many persons were born between K and H as after I. The age of M is a prime number.

Who among the following person was born in 1982?

- a. M
- b. J
- c. H
- d. K
- e. L

12. Questions

K was born how many years before I?

- a. 9 years
- b. 14 years
- c. 18 years
- d. 13 years
- e. 22 years

13. Questions

The age of ____ is ____ times the difference between the ages of H and L.

- a. G and six
- b. J and four
- c. K and five
- d. N and two
- e. None of the above

14. Questions

The number of persons born before M is _____ the number of persons born after K.

- a. One more than
- b. One less than
- c. Two more than

- d. Three less than
- e. Three more than

15. Questions

Which of the following persons were born in odd-numbered years?

- I). G
 - II). N
 - III). I
- a. Only I
 - b. Only III
 - c. Only I and III
 - d. Only I and II
 - e. All I, II, and III

16. Questions

Study the following information carefully and answer the below questions.

Seven persons – A, B, C, D, E, F, and G are working in three different departments: HR, Marketing, and Accounts. At least two persons but not more than three persons working in each department. Each person likes different colours: red, pink, blue, grey, white, violet, and yellow.

F, who likes red, works with B but not in the Accounts. C either works with the one who likes violet or in Marketing but not both. Neither G nor B likes both violet and yellow. B doesn't work with C. The one who likes violet does not work in HR department. G doesn't work with C but works with only one person. Both A and the one who likes yellow don't work in the HR department. G doesn't work with A, who likes blue. D works in Marketing but does not like both grey and yellow. The number of persons working with the one who likes pink is **one less than** the number of persons working with A. The one who likes grey neither works in HR nor with D.

Who among the following person works with G based on the final arrangement?

- a. The one who likes blue
- b. B
- c. F
- d. The one who likes violet
- e. D

17. Questions

Who among the following person works in Marketing based on the final arrangement?

- a. F

- b. B
- c. The one who likes yellow
- d. E
- e. The one who likes grey

18. Questions

In which of the following departments does E work for?

- a. The department which is worked by G
- b. HR department
- c. Marketing department
- d. The department which is worked by D
- e. None of the above

19. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which of the following persons does not belong to the group?

- a. E
- b. D
- c. G
- d. F
- e. B

20. Questions

Which of the following combination(s) is/are NOT TRUE based on the final arrangement?

I). C-yellow

II). D-HR department

III). E-pink

- a. Only I
- b. Only III
- c. Only I and III
- d. Only I and II
- e. Only II and III

21. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements:

- Only a few dahlias are lotus.
Some lotuses are marigold.
Some dahlias are not hibiscus.

Conclusions:

I). Some dahlias are marigold.

II). All lotus can be hibiscus.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

22. Questions

Statements:

- Only a few blueberries are apricots.
Some apricots are cranberry.
All cranberries are dragonfruit.

Conclusions:

I). No blueberry is cranberry.

II). Some blueberries are cranberry.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

23. Questions

Statements:

- Only a few golds are stud.
Only a few studs are stone.

No stud is a ring.

Conclusions:

I). Some golds are not stud.

II). All rings being stone is a possibility.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

24. Questions

Statements:

Only a few yellows are grey.

No grey is maroon.

All maroons are brown.

Conclusions:

I). No yellow is maroon.

II). All grey can be brown.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

25. Questions

Statements:

Only a few traditionals are imperial.

Only imperial is cluster.

No imperial is floral.

Conclusions:

I). Some traditional is not cluster.

II). No floral is traditional.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

26. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusion which is definitely true.

Statements:

$R > B = N \leq P < K; L < C \geq O = R \geq E > Q$

Conclusions:

I). $C > P$

II). $Q < N$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

27. Questions

Statements:

$L < Q \leq F = D \geq I > G; C < R \geq B > K = F$

Conclusions:

I). $R > G$

II). $Q \leq B$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

28. Questions

Statements: $E < A \geq L < D; U \leq L \leq T = Q > G;$ **Conclusions:****I). $A \geq G$** **II). $U < D$**

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

29. Questions**Statements:** $W \leq V > B > T = S < P; E > Y < X < T = O > C$ **Conclusions:****I). $V > Y$** **II). $C < P$**

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

30. Questions**Statements:** $J = H < M \leq P > I; V = Z \leq N > P > O;$ **Conclusions:****I). $H < V$** **II). $H \geq Z$**

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true

- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

31. Questions

Study the following information carefully and answer the below questions.

E is the maternal uncle of G, who is the only grandson of H. R is the brother-in-law of V and father of W. G is the nephew of V, who is the sibling of M. P is the mother-in-law of R, who has no siblings. H is the father of E, who is unmarried. P doesn't have more than three children. Only one of the children of P is married.

How is M related to R based on the final arrangement?

- a. Niece
- b. Sister
- c. Wife
- d. Sister-in-law
- e. Mother

32. Questions

If V is married to O, then how is O related to P?

- a. Son-in-law
- b. Daughter-in-law
- c. Uncle
- d. Aunt
- e. Either a) or b)

33. Questions

Which of the following pairs of persons shows that the first person is the parent of the second person?

- a. PV
- b. HR
- c. RG
- d. Both a) and c)
- e. Both a) and b)

34. Questions

Study the following information carefully and answer the below questions.

J is the mother-in-law of D, who is the only child of S. A is the grandfather of O, who is the son of F. Q is the sister-in-law of D, who is the mother of O. A is not the spouse of S and has two children. S is not the grandfather of O.

How many male members are there in the family?

- a. Two
- b. Three
- c. Four
- d. Five
- e. Cannot be determined

35. Questions

How is S related to F based on the final arrangement?

- a. Mother-in-law
- b. Uncle
- c. Father-in-law
- d. Brother-in-law
- e. Cannot be determined

36. Questions

Study the following information carefully and answer the below questions.

If all the digits of the number “6194827395” are arranged in ascending order from the left end, then what is the sum of the square value of the fifth digit from the left end and the second digit from the right end?

- a. 89
- b. 100
- c. 106
- d. 74
- e. 127

37. Questions

If in the given number “3814572619” 2 is added to the odd-positioned digits from the left end and 1 is subtracted from the even-positioned digits from the left end, then what is the sum of all the repeated digits in the newly formed number (take one digit only among the repeated ones)?

- a. 17
- b. 8

- c. 10
- d. 15
- e. 12

38. Questions

If it is possible to form a four-letter meaningful word by using the first, fourth, fifth, and sixth from the left end of the word “GENERATION”, then find the third letter from the right end of the newly formed word. If no such word is formed, then mark X as the answer, if more than one such word is formed, then mark Y as the answer.

- a. X
- b. Y
- c. G
- d. R
- e. E

39. Questions

If in the given number “582437628” all the composite digits are changed to the next digit and all the remaining digits are changed to the previous digit as per the number series, then how many odd numbers are present in the newly formed number?

- a. Five
- b. Six
- c. Two
- d. Three
- e. More than six

40. Questions

How many pairs of letters are there in the word "ADDICTION", each of which has as many letters between them as in the English alphabetical series in both forward and backward directions?

- a. Two
- b. One
- c. None
- d. Three
- e. More than three

Explanations:

1. Questions

Final arrangement:

We have,

- G sits at the corner of the table.
- B sits adjacent to G.

From the above conditions, there are two possibilities.

Again, we have,

- D sits third to the left of B.
- Two persons sit between D and A.

Again, we have,

- A sits to the immediate right of C.
- As many persons sit between C and E as between A and H when counted from the right of C and A, respectively.
- F sits two places away from H.
- E is not an immediate neighbour of H.

From the above conditions, case-1 gets eliminated because E is not an immediate neighbour of H, which is not satisfied.

Hence, case 2 shows the final arrangement.

Answer: D

2. Questions

Final arrangement:

We have,

- G sits at the corner of the table.
- B sits adjacent to G.

From the above conditions, there are two possibilities.

Again, we have,

- D sits third to the left of B.
- Two persons sit between D and A.

Again, we have,

- A sits to the immediate right of C.
- As many persons sit between C and E as between A and H when counted from the right of C and A, respectively.
- F sits two places away from H.
- E is not an immediate neighbour of H.

From the above conditions, case-1 gets eliminated because E is not an immediate neighbour of H, which is not satisfied.

Hence, case 2 shows the final arrangement.

Answer: A

3. Questions

Final arrangement:

We have,

- G sits at the corner of the table.
- B sits adjacent to G.

From the above conditions, there are two possibilities.

Again, we have,

- D sits third to the left of B.
- Two persons sit between D and A.

Again, we have,

- A sits to the immediate right of C.
- As many persons sit between C and E as between A and H when counted from the right of C and A, respectively.
- F sits two places away from H.
- E is not an immediate neighbour of H.

From the above conditions, case-1 gets eliminated because E is not an immediate neighbour of H, which is not satisfied.

Hence, case 2 shows the final arrangement.

Answer: E

4. Questions

Final arrangement:

We have,

- G sits at the corner of the table.
- B sits adjacent to G.

From the above conditions, there are two possibilities.

Again, we have,

- D sits third to the left of B.
- Two persons sit between D and A.

Again, we have,

- A sits to the immediate right of C.
- As many persons sit between C and E as between A and H when counted from the right of C and A, respectively.
- F sits two places away from H.
- E is not an immediate neighbour of H.

From the above conditions, case-1 gets eliminated because E is not an immediate neighbour of H, which is not satisfied.

Hence, case 2 shows the final arrangement.

Answer: C (Both persons sit exactly opposite to each other)

5. Questions

Final arrangement:

We have,

- G sits at the corner of the table.
- B sits adjacent to G.

From the above conditions, there are two possibilities.

Again, we have,

- D sits third to the left of B.
- Two persons sit between D and A.

Again, we have,

- A sits to the immediate right of C.
- As many persons sit between C and E as between A and H when counted from the right of C and A, respectively.
- F sits two places away from H.
- E is not an immediate neighbour of H.

From the above conditions, case-1 gets eliminated because E is not an immediate neighbour of H, which is not satisfied.

Hence, case 2 shows the final arrangement.

Answer: B (All persons are sitting in the middle of the side of the table, except option b)

6. Questions

Final arrangement:

Month & Date	Persons
August 7	P
August 20	S
September 7	U
September 20	Q
October 7	T
October 20	R
November 7	W
November 20	V

We have,

- An even number of persons attend the meeting before T.
- Three persons attend the meeting between T and P.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7		P	
August 20			
September 7	T		P
September 20			
October 7		T	
October 20			
November 7	P		T
November 20			

Again, we have,

- As many persons attend the meeting before P as after V.
- W attends the meeting immediately before V.
- Two persons attend the meeting between W and Q.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	
August 20	V		Q/
September 7	T		P
September 20	Q	Q	
October 7		T	W
October 20			V
November 7	P	W	T
November 20		V	Q/

Again, we have,

- The number of persons who attend the meeting before Q is **one more than** the number of persons who attend the meeting after R.
- U attends the meeting neither before S nor on an even-numbered date.

From the above conditions, case-1 and case-3 get eliminated because U attends the meeting neither before S nor on an even-numbered date., which is not satisfied.

Hence, case 2 shows the final arrangement.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	S
August 20	V	S	Q/R
September 7	T	U	P
September 20	Q	Q	U
October 7	S	T	W
October 20	R	R	V
November 7	P	W	T
November 20	U	V	Q/R

Answer: C

7. Questions

Final arrangement:

Month & Date	Persons
August 7	P
August 20	S
September 7	U
September 20	Q
October 7	T
October 20	R
November 7	W
November 20	V

We have,

- An even number of persons attend the meeting before T.
- Three persons attend the meeting between T and P.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7		P	
August 20			
September 7	T		P
September 20			
October 7		T	
October 20			
November 7	P		T
November 20			

Again, we have,

- As many persons attend the meeting before P as after V.
- W attends the meeting immediately before V.
- Two persons attend the meeting between W and Q.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	
August 20	V		Q/
September 7	T		P
September 20	Q	Q	
October 7		T	W
October 20			V
November 7	P	W	T
November 20		V	Q/

Again, we have,

- The number of persons who attend the meeting before Q is **one more than** the number of persons who attend the meeting after R.
- U attends the meeting neither before S nor on an even-numbered date.

From the above conditions, case-1 and case-3 get eliminated because U attends the meeting neither before S nor on an even-numbered date., which is not satisfied.

Hence, case 2 shows the final arrangement.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	S
August 20	V	S	Q/R
September 7	T	U	P
September 20	Q	Q	U
October 7	S	T	W
October 20	R	R	V
November 7	P	W	T
November 20	U	V	Q/R

Answer: E

8. Questions

Final arrangement:

Month & Date	Persons
August 7	P
August 20	S
September 7	U
September 20	Q
October 7	T
October 20	R
November 7	W
November 20	V

We have,

- An even number of persons attend the meeting before T.
- Three persons attend the meeting between T and P.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7		P	
August 20			
September 7	T		P
September 20			
October 7		T	
October 20			
November 7	P		T
November 20			

Again, we have,

- As many persons attend the meeting before P as after V.
- W attends the meeting immediately before V.
- Two persons attend the meeting between W and Q.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	
August 20	V		Q/
September 7	T		P
September 20	Q	Q	
October 7		T	W
October 20			V
November 7	P	W	T
November 20		V	Q/

Again, we have,

- The number of persons who attend the meeting before Q is **one more than** the number of persons who attend the meeting after R.
- U attends the meeting neither before S nor on an even-numbered date.

From the above conditions, case-1 and case-3 get eliminated because U attends the meeting neither before S nor on an even-numbered date., which is not satisfied.

Hence, case 2 shows the final arrangement.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	S
August 20	V	S	Q/R
September 7	T	U	P
September 20	Q	Q	U
October 7	S	T	W
October 20	R	R	V
November 7	P	W	T
November 20	U	V	Q/R

Answer: B

9. Questions

Final arrangement:

Month & Date	Persons
August 7	P
August 20	S
September 7	U
September 20	Q
October 7	T
October 20	R
November 7	W
November 20	V

We have,

- An even number of persons attend the meeting before T.
- Three persons attend the meeting between T and P.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7		P	
August 20			
September 7	T		P
September 20			
October 7		T	
October 20			
November 7	P		T
November 20			

Again, we have,

- As many persons attend the meeting before P as after V.
- W attends the meeting immediately before V.
- Two persons attend the meeting between W and Q.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	
August 20	V		Q/
September 7	T		P
September 20	Q	Q	
October 7		T	W
October 20			V
November 7	P	W	T
November 20		V	Q/

Again, we have,

- The number of persons who attend the meeting before Q is **one more than** the number of persons who attend the meeting after R.
- U attends the meeting neither before S nor on an even-numbered date.

From the above conditions, case-1 and case-3 get eliminated because U attends the meeting neither before S nor on an even-numbered date., which is not satisfied.

Hence, case 2 shows the final arrangement.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	S
August 20	V	S	Q/R
September 7	T	U	P
September 20	Q	Q	U
October 7	S	T	W
October 20	R	R	V
November 7	P	W	T
November 20	U	V	Q/R

Answer: A (Only R and U remain unchanged in their position)

10. Questions

Final arrangement:

Month & Date	Persons
August 7	P
August 20	S
September 7	U
September 20	Q
October 7	T
October 20	R
November 7	W
November 20	V

We have,

- An even number of persons attend the meeting before T.
- Three persons attend the meeting between T and P.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7		P	
August 20			
September 7	T		P
September 20			
October 7		T	
October 20			
November 7	P		T
November 20			

Again, we have,

- As many persons attend the meeting before P as after V.
- W attends the meeting immediately before V.
- Two persons attend the meeting between W and Q.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	
August 20	V		Q/
September 7	T		P
September 20	Q	Q	
October 7		T	W
October 20			V
November 7	P	W	T
November 20		V	Q/

Again, we have,

- The number of persons who attend the meeting before Q is **one more than** the number of persons who attend the meeting after R.
- U attends the meeting neither before S nor on an even-numbered date.

From the above conditions, case-1 and case-3 get eliminated because U attends the meeting neither before S nor on an even-numbered date., which is not satisfied.

Hence, case 2 shows the final arrangement.

	Case-1	Case-2	Case-3
Month & Date	Persons	Persons	Persons
August 7	W	P	S
August 20	V	S	Q/R
September 7	T	U	P
September 20	Q	Q	U
October 7	S	T	W
October 20	R	R	V
November 7	P	W	T
November 20	U	V	Q/R

Answer: D (All persons attend the meeting on an even numbered date)

11. Questions

Final arrangement:

Years	Age	Persons
1977	48	G
1982	43	M
1991	34	N
1995	30	J
1999	26	H
2000	25	K
2004	21	L
2013	12	I

We have,

- L was born in the leap year.
- The difference between the ages of L and G is a cube number.

From the above conditions, there are two possibilities.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43		
1991	34		
1995	30		
1999	26	G	
2000	25	L	
2004	21		L
2013	12		

Again, we have,

- J was born three persons after G.
- The sum of the ages of J and K is a multiple of 11.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K/	
1991	34		
1995	30		J
1999	26	G	
2000	25	L	K
2004	21	K/	L
2013	12	J	

Again, we have,

- K was born two persons before I.
- As many persons were born between K and H as after I.
- The age of M is a prime number.

From the above conditions, case-1 gets eliminated because the age of M is a prime number, which is not satisfied.

Hence, case 2 shows the final arrangement.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K	M
1991	34		N
1995	30	I	J
1999	26	G	H
2000	25	L	K
2004	21	H	L
2013	12	J	I

Answer: A

12. Questions

Final arrangement:

Years	Age	Persons
1977	48	G
1982	43	M
1991	34	N
1995	30	J
1999	26	H
2000	25	K
2004	21	L
2013	12	I

We have,

- L was born in the leap year.
- The difference between the ages of L and G is a cube number.

From the above conditions, there are two possibilities.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43		
1991	34		
1995	30		
1999	26	G	
2000	25	L	
2004	21		L
2013	12		

Again, we have,

- J was born three persons after G.
- The sum of the ages of J and K is a multiple of 11.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K/	
1991	34		
1995	30		J
1999	26	G	
2000	25	L	K
2004	21	K/	L
2013	12	J	

Again, we have,

- K was born two persons before I.
- As many persons were born between K and H as after I.
- The age of M is a prime number.

From the above conditions, case-1 gets eliminated because the age of M is a prime number, which is not satisfied.

Hence, case 2 shows the final arrangement.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K	M
1991	34		N
1995	30	I	J
1999	26	G	H
2000	25	L	K
2004	21	H	L
2013	12	J	I

Answer: D

13. Questions

Final arrangement:

Years	Age	Persons
1977	48	G
1982	43	M
1991	34	N
1995	30	J
1999	26	H
2000	25	K
2004	21	L
2013	12	I

We have,

- L was born in the leap year.
- The difference between the ages of L and G is a cube number.

From the above conditions, there are two possibilities.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43		
1991	34		
1995	30		
1999	26	G	
2000	25	L	
2004	21		L
2013	12		

Again, we have,

- J was born three persons after G.
- The sum of the ages of J and K is a multiple of 11.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K/	
1991	34		
1995	30		J
1999	26	G	
2000	25	L	K
2004	21	K/	L
2013	12	J	

Again, we have,

- K was born two persons before I.
- As many persons were born between K and H as after I.
- The age of M is a prime number.

From the above conditions, case-1 gets eliminated because the age of M is a prime number, which is not satisfied.

Hence, case 2 shows the final arrangement.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K	M
1991	34		N
1995	30	I	J
1999	26	G	H
2000	25	L	K
2004	21	H	L
2013	12	J	I

Answer: C

14. Questions

Final arrangement:

Years	Age	Persons
1977	48	G
1982	43	M
1991	34	N
1995	30	J
1999	26	H
2000	25	K
2004	21	L
2013	12	I

We have,

- L was born in the leap year.
- The difference between the ages of L and G is a cube number.

From the above conditions, there are two possibilities.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43		
1991	34		
1995	30		
1999	26	G	
2000	25	L	
2004	21		L
2013	12		

Again, we have,

- J was born three persons after G.
- The sum of the ages of J and K is a multiple of 11.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K/	
1991	34		
1995	30		J
1999	26	G	
2000	25	L	K
2004	21	K/	L
2013	12	J	

Again, we have,

- K was born two persons before I.
- As many persons were born between K and H as after I.
- The age of M is a prime number.

From the above conditions, case-1 gets eliminated because the age of M is a prime number, which is not satisfied.

Hence, case 2 shows the final arrangement.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K	M
1991	34		N
1995	30	I	J
1999	26	G	H
2000	25	L	K
2004	21	H	L
2013	12	J	I

Answer: B

15. Questions

Final arrangement:

Years	Age	Persons
1977	48	G
1982	43	M
1991	34	N
1995	30	J
1999	26	H
2000	25	K
2004	21	L
2013	12	I

We have,

- L was born in the leap year.
- The difference between the ages of L and G is a cube number.

From the above conditions, there are two possibilities.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43		
1991	34		
1995	30		
1999	26	G	
2000	25	L	
2004	21		L
2013	12		

Again, we have,

- J was born three persons after G.
- The sum of the ages of J and K is a multiple of 11.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K/	
1991	34		
1995	30		J
1999	26	G	
2000	25	L	K
2004	21	K/	L
2013	12	J	

Again, we have,

- K was born two persons before I.
- As many persons were born between K and H as after I.
- The age of M is a prime number.

From the above conditions, case-1 gets eliminated because the age of M is a prime number, which is not satisfied.

Hence, case 2 shows the final arrangement.

		Case-1	Case-2
Years	Age	Persons	Persons
1977	48		G
1982	43	K	M
1991	34		N
1995	30	I	J
1999	26	G	H
2000	25	L	K
2004	21	H	L
2013	12	J	I

Answer: E

16. Questions

Final arrangement:

Department/Colors	HR	Marketing	Accounts
Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)

We have,

- F likes red works with B but not in the Accounts.
- C either works with the one who likes violet or in Marketing but not both.
- Neither G nor B likes both violet and yellow. B doesn't work with C.
- The one who likes violet does not work in HR department.

From the above conditions, there are three possibilities.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C	Violet
Case-2	Persons	F(red), B		C, (violet)
Case-3	Persons		F(red), B	C, (violet)

Again, we have,

- G doesn't work with C but works with only one person.
- Both A and the one who likes yellow don't work in the HR department.
- G doesn't work with A, who likes blue.
- D works in Marketing but does not like grey and yellow.

From the above conditions, case-3 gets eliminated because three persons are working in Marketing.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C(yellow), A(blue), D(white/pink)	G, E(violet)
Case-2	Persons	F(red), B	G, D(white/pink)	C(yellow), E(violet), A(blue)
Case-3	Persons	G	F(red), B, D	C(yellow), (violet), A(blue)

Again, we have,

- The number of persons working with the one who likes pink is **one less than** the number of persons working with A.
- The one who likes grey neither works in HR nor with D.

From the above conditions, case-2 gets eliminated because the one who likes grey doesn't work with D, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)
Case-2	Persons	F(red), B	G(grey), D(white/pink)	C(yellow), E(violet), A(blue)

Answer: D

17. Questions

Final arrangement:

Department/Colors	HR	Marketing	Accounts
Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)

We have,

- F likes red works with B but not in the Accounts.
- C either works with the one who likes violet or in Marketing but not both.
- Neither G nor B likes both violet and yellow. B doesn't work with C.
- The one who likes violet does not work in HR department.

From the above conditions, there are three possibilities.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C	Violet
Case-2	Persons	F(red), B		C, (violet)
Case-3	Persons		F(red), B	C, (violet)

Again, we have,

- G doesn't work with C but works with only one person.
- Both A and the one who likes yellow don't work in the HR department.
- G doesn't work with A, who likes blue.
- D works in Marketing but does not like grey and yellow.

From the above conditions, case-3 gets eliminated because three persons are working in Marketing.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C(yellow), A(blue), D(white/pink)	G, E(violet)
Case-2	Persons	F(red), B	G, D(white/pink)	C(yellow), E(violet), A(blue)
Case-3	Persons	G	F(red), B, D	C(yellow), (violet), A(blue)

Again, we have,

- The number of persons working with the one who likes pink is **one less than** the number of persons working with A.
- The one who likes grey neither works in HR nor with D.

From the above conditions, case-2 gets eliminated because the one who likes grey doesn't work with D, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)
Case-2	Persons	F(red), B	G(grey), D(white/pink)	C(yellow), E(violet), A(blue)

Answer: C

18. Questions

Final arrangement:

Department/Colors	HR	Marketing	Accounts
Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)

We have,

- F likes red works with B but not in the Accounts.
- C either works with the one who likes violet or in Marketing but not both.
- Neither G nor B likes both violet and yellow. B doesn't work with C.
- The one who likes violet does not work in HR department.

From the above conditions, there are three possibilities.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C	Violet
Case-2	Persons	F(red), B		C, (violet)
Case-3	Persons		F(red), B	C, (violet)

Again, we have,

- G doesn't work with C but works with only one person.
- Both A and the one who likes yellow don't work in the HR department.
- G doesn't work with A, who likes blue.
- D works in Marketing but does not like grey and yellow.

From the above conditions, case-3 gets eliminated because three persons are working in Marketing.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C(yellow), A(blue), D(white/pink)	G, E(violet)
Case-2	Persons	F(red), B	G, D(white/pink)	C(yellow), E(violet), A(blue)
Case-3	Persons	G	F(red), B, D	C(yellow), (violet), A(blue)

Again, we have,

- The number of persons working with the one who likes pink is **one less than** the number of persons working with A.
- The one who likes grey neither works in HR nor with D.

From the above conditions, case-2 gets eliminated because the one who likes grey doesn't work with D, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)
Case-2	Persons	F(red), B	G(grey), D(white/pink)	C(yellow), E(violet), A(blue)

Answer: A

19. Questions

Final arrangement:

Department/Colors	HR	Marketing	Accounts
Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)

We have,

- F likes red works with B but not in the Accounts.
- C either works with the one who likes violet or in Marketing but not both.
- Neither G nor B likes both violet and yellow. B doesn't work with C.
- The one who likes violet does not work in HR department.

From the above conditions, there are three possibilities.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C	Violet
Case-2	Persons	F(red), B		C, (violet)
Case-3	Persons		F(red), B	C, (violet)

Again, we have,

- G doesn't work with C but works with only one person.
- Both A and the one who likes yellow don't work in the HR department.
- G doesn't work with A, who likes blue.
- D works in Marketing but does not like grey and yellow.

From the above conditions, case-3 gets eliminated because three persons are working in Marketing.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C(yellow), A(blue), D(white/pink)	G, E(violet)
Case-2	Persons	F(red), B	G, D(white/pink)	C(yellow), E(violet), A(blue)
Case-3	Persons	G	F(red), B, D	C(yellow), (violet), A(blue)

Again, we have,

- The number of persons working with the one who likes pink is **one less than** the number of persons working with A.
- The one who likes grey neither works in HR nor with D.

From the above conditions, case-2 gets eliminated because the one who likes grey doesn't work with D, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)
Case-2	Persons	F(red), B	G(grey), D(white/pink)	C(yellow), E(violet), A(blue)

Answer: B (In all the other options, odd number of persons work with the given person in the same department, except b)

20. Questions

Final arrangement:

Department/Colors	HR	Marketing	Accounts
Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)

We have,

- F likes red works with B but not in the Accounts.
- C either works with the one who likes violet or in Marketing but not both.
- Neither G nor B likes both violet and yellow. B doesn't work with C.
- The one who likes violet does not work in HR department.

From the above conditions, there are three possibilities.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C	Violet
Case-2	Persons	F(red), B		C, (violet)
Case-3	Persons		F(red), B	C, (violet)

Again, we have,

- G doesn't work with C but works with only one person.
- Both A and the one who likes yellow don't work in the HR department.
- G doesn't work with A, who likes blue.
- D works in Marketing but does not like grey and yellow.

From the above conditions, case-3 gets eliminated because three persons are working in Marketing.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B	C(yellow), A(blue), D(white/pink)	G, E(violet)
Case-2	Persons	F(red), B	G, D(white/pink)	C(yellow), E(violet), A(blue)
Case-3	Persons	G	F(red), B, D	C(yellow), (violet), A(blue)

Again, we have,

- The number of persons working with the one who likes pink is **one less than** the number of persons working with A.
- The one who likes grey neither works in HR nor with D.

From the above conditions, case-2 gets eliminated because the one who likes grey doesn't work with D, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Department/Colors	HR	Marketing	Accounts
Case-1	Persons	F(red), B(pink)	C(yellow), A(blue), D(white)	G(grey), E(violet)
Case-2	Persons	F(red), B	G(grey), D(white/pink)	C(yellow), E(violet), A(blue)

Answer: E

21. Questions

Answer: A

I). Some dahlia is marigold - Here, there is no direct relation between dahlia and marigold. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). All lotus can be hibiscus - Here, there is no direct relation between lotus and hibiscus. So, all the possible conclusions between them are true. Hence, the conclusion follows.

22. Questions

Answer: C

I). No blueberry is cranberry - Here, there is no direct relation between blueberry and cranberry. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). Some blueberries are cranberry - Here, there is no direct relation between blueberry and cranberry. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

By combining both conclusions, we get a complementary pair. so either I or II follow.

23. Questions

Answer: E

I). Some gold is not stud - Here, the direct relation between gold and stud is that some parts of gold are definitely connected with stud and some parts of gold are definitely not connected with stud. Hence, the conclusion follows.

II). All rings are stones is a possibility - Here, there is no direct relation between ring and stone. So, all the possible conclusions between them are true. Hence, the conclusion follows.

24. Questions

Answer: A

I). No yellow is maroon - Here, there is no direct relation between yellow and maroon. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). All grey can be brown - Here, there is no direct relation between grey and brown. So, all the possible conclusions between them are true. Hence, the conclusion follows.

25. Questions

Answer: B

I). Some traditional is not cluster - Here, there is no direct relation between traditional and cluster but cluster doesn't connect with anyone other than imperial. Hence, the conclusion follows.

II). No floral is traditional - Here, there is no direct relation between floral and traditional. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

26. Questions

Answer: E

$R > B = N \leq P < O; L < C \geq O = R \geq E > Q$

I). $C > P$ ($C \geq O = R > B = N \leq P$) -> False

II). $Q < N$ ($Q < E \leq R > B = N$) -> False

27. Questions

Answer: D

$L < Q \leq F = D \geq I > G$; $C < R \geq B > K = F$

I). $R > G$ ($R \geq B > K = F = D \geq I > G$) $\rightarrow$ True

II). $Q \leq B$ ($Q \leq F = K < B$) $\rightarrow$ False

28. Questions

Answer: A

$E < A \geq L < D$; $U \leq L \leq T = Q > G$;

I). $A \geq G$ ($A \geq L \leq T = Q > G$) $\rightarrow$ False

II). $U < D$ ($U \leq L < D$) $\rightarrow$ True

29. Questions

Answer: C

$W \leq V > B > T = S < P$; $E > Y < X < T = O > C$;

I). $V > Y$ ($V > B > T > X > Y$) $\rightarrow$ True

II). $C < P$ ($C < O = T = S < P$) $\rightarrow$ True

30. Questions

Answer: B

$J = H < M \leq P > I$; $V = Z \leq N > P > O$;

I). $H < V$ ($H < M \leq P < N \geq Z = V$) $\rightarrow$ False

II). $H \geq Z$ ($H < M \leq P < N \geq Z = V$) $\rightarrow$ False

But on combining both I and II, either conclusion I or II is true.

31. Questions

Answer: C

32. Questions

Answer: E

33. Questions

Answer: D

34. Questions

Answer: B

35. Questions

Answer: A

36. Questions

Answer: C

6194827395

1234567899

$$5^2 = 25$$

$$9^2 = 81$$

$$25 + 81 = 106$$

37. Questions

Answer: D

3814572619

5733764538

$$3 + 7 + 5 = 15$$

38. Questions

Answer: B

GENERATION

GENERATION

Gear, rage

39. Questions

Answer: B

582437628

491526719

40. Questions

Answer: D

@QuizByMickey
