

1. Questions

Study the following information carefully and answer the below questions.

Six persons – R, S, T, U, V, and W are attending the meeting on six different days of the week, starting from Saturday to Thursday. Only one person attends the meeting on each day. Each of them like different colors, viz., red, pink, grey, white, violet, and yellow.

S attends the meeting after Tuesday. Only three persons attend the meeting between S and the one who likes pink. V, who likes red attends the meeting two persons after the one who likes pink. R attends the meeting exactly between V and the one who likes yellow. T attends the meeting immediately before the one who likes grey. As many persons attend the meeting before T as after the one who likes white. W doesn't attend the meeting after Sunday. U doesn't like grey.

If all the persons attend the meeting in reverse alphabetical order from Saturday to Thursday, then how many persons remains unchanged in their position?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

2. Questions

Who among the following person attends the meeting two persons after W?

- a. S
- b. The one who likes violet
- c. U
- d. The one who attends on Monday
- e. T

3. Questions

U attends the meeting on which of the following days?

- a. Sunday
- b. Saturday
- c. Monday
- d. Thursday
- e. Wednesday

4. Questions

Which of the following combinations is/are TRUE based on the final arrangement?

- I). Saturday - T - grey
 - II). Wednesday - R - yellow
 - III). Thursday - U - White
- a. Only I
 - b. Only III
 - c. Only II
 - d. Only I and III
 - e. Only II and III

5. Questions

T, W, V, R ____

- a. The one who likes red
- b. U
- c. The one who likes white
- d. The one who likes Grey
- e. S

6. Questions

Study the following information carefully and answer the below questions.

Eight persons, viz. A, B, C, D, E, F, G, and H are seated on a rectangular table such that three persons are sitting on each longer side while one person is sitting on each shorter side, and all of them are facing outside (**opposite to the centre**).

A sits to the immediate right of D but not on the same side. Three persons sit between A and G. G sits exactly between D and B. B sits second to the left of E. As many persons sit between E and C as between F and H when counted from the left of both E and F, respectively. F doesn't sit adjacent to H. The one who sits to the immediate right of C doesn't sit on the shorter side of the table.

Who among the following person sits fourth to the left of C?

- a. F
- b. D
- c. G
- d. The one who sits to the immediate left of B
- e. E

7. Questions

What is the position of E with respect to H?

- a. Immediate right
- b. Second to the right
- c. Second to the left
- d. Immediate left
- e. Third to the left

8. Questions

In which of the following options, the first person sits second to the right of the second person?

I). DE

II). CA

III). DH

- a. Only I
- b. Only II
- c. Only III
- d. Only I & II
- e. Only I & III

9. Questions

If all the persons are arranged in alphabetical order from A in a clockwise direction, then how many persons remain unchanged in their position (excluding A)?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

10. Questions

B, D, F, C, A, ____

- a. B
- b. F
- c. H

d. E

e. G

11. Questions

Study the following information carefully and answer the below questions.

Ten persons—K, L, M, N, O, P, Q, R, S, and T—live on five different floors of a five-storey building, where the lower most floor is numbered one, the one above that is numbered two, and so on until the topmost floor, which is numbered five.

Note-I: Each floor has two flats, viz., Flat-A and Flat-B, where Flat A is to the west of Flat B.

Note-II: Flat B of floor 2 is immediately above Flat B of floor 1. Similarly, Flat A of floor 3 is immediately above Flat A of floor 2, and so on.

Note-III: The area of each flat on each floor is equal.

Note-IV: Only two persons live on each floor, and only one person lives in each flat.

L lives on an even-numbered floor. N lives three floors above L but not in the same flat. K lives immediately below the flat of P, who does not live above L. Two floors are between K and M. As many floors above L as below Q. O lives three floors below the flat of M. The number of floors between R and T is **one less than** the number of floors above S. S doesn't live on the same floor as T. R neither lives in the same flat as T nor lives in flat B.

Who among the following person lives to the west of T?

a. N

b. Q

c. S

d. P

e. K

12. Questions

How many floors are there above R?

a. One

b. As many floors above L

c. None

d. Two

e. As many floors below N

13. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a

group. Which among the following does not belong to the group?

- a. P
- b. L
- c. Q
- d. M
- e. K

14. Questions

N, T, Q, M, R, _____

- a. K
- b. L
- c. S
- d. O
- e. P

15. Questions

What is the sum of the floor numbers of Q and O?

- a. 6
- b. 5
- c. 7
- d. 4
- e. 3

16. Questions

Study the following information carefully and answer the below questions.

Eight persons – A, B, C, D, E, F, G, and H are sitting around a circular table in such a way that some of them are facing the centre while some of them are facing outside (**opposite to the centre**).

A sits third to the right of D and both of them face opposite directions. Two persons sit between A and C. F sits second to the left of A and sits to the immediate left of G. As many persons sit between G and B (when counted from the right of G) as between B and E (when counted from the right of B). Immediate neighbours of E face the same direction but opposite to E, who sits third to the left of F. B and C face the same direction. The one who sits second to the right of H doesn't face outside.

How many persons are sitting between B and E when counted to the right of E?

- a. None

- b. Three
- c. Two
- d. One
- e. More than three

17. Questions

Who among the following sits to the immediate right of C?

- a. G
- b. D
- c. The one who sits opposite to H
- d. A
- e. None of the above

18. Questions

If C is related to D and H is related to B in a certain way. Then, who among the following is related to F?

- a. C
- b. H
- c. E
- d. The one who sits to the immediate right of E
- e. The one who sits opposite to D

19. Questions

A, G, C, B, ____

- a. D
- b. H
- c. E
- d. F
- e. The one who faces A

20. Questions

Which of the following pairs are immediate neighbours?

- I). BF**
- II). HE**

III). AD

- a. Only II
- b. Only II and III
- c. Only III
- d. Only I and III
- e. Only I

21. Questions

Study the following information carefully and answer the below questions.

D is the brother-in-law of L, who is the son-in-law of A. B is the only granddaughter of F, who has only two children. D is the unmarried uncle of G, who is the child of K. A is the father of K, who has one sibling. F is the spouse of A. L has no sibling.

How many male members are there in the family?

- a. Two
- b. Three
- c. Four
- d. Five
- e. Cannot be determined

22. Questions

How is L related to K based on the final arrangement?

- a. Brother
- b. Uncle
- c. Son
- d. Husband
- e. Brother-in-law

23. Questions

Which of the following pairs of persons shows that the first person is the sibling of the second person?

- a. DL
- b. BA
- c. KL

d. FG

e. GB

24. Questions

Study the following information carefully and answer the below questions.

A is the maternal aunt of V, who is the sister-in-law of M. X is the son of B, who is the grandmother of U. H is the brother-in-law of A and father of X. A has only one sibling. V is an unmarried person in the family. The gender of U and V is the same. H and M have no sibling. B has only two children.

How is U related to V based on the final arrangement?

- a. Niece
- b. Sister
- c. Mother
- d. Sister-in-law
- e. Cannot be determined

25. Questions

If A is married to C, then how is C related to X?

- a. Aunt
- b. Uncle
- c. Sister-in-law
- d. Brother-in-law
- e. Cousin

26. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusion which is definitely true.

Statements:

$M = S \geq P > Y < A; X < I = O \geq S > F$

Conclusions:

I). $I > P$

II). $O = P$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true

- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

27. Questions**Statements:**

$B \leq K < U > L = N; E \geq T > Q > K = G$

Conclusions:

I). $B < T$

II). $E \geq N$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

28. Questions**Statements:**

$C \geq R = N \leq V \geq K; J > F \geq Z = X \geq R$

Conclusions:

I). $J > K$

II). $F \geq N$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

29. Questions**Statements:**

$H \leq W > D \geq E \leq B; V > B \geq T > U \leq J$

Conclusions:

I). $D \geq T$

II). $U < D$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

30. Questions

Statements:

$O > G \geq Y \geq I \leq R$; $S \leq L \leq I = W \leq Z$

Conclusions:

I). $S \leq R$

II). $O > L$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

31. Questions

Study the following information carefully and answer the below questions.

Pooja walks from home towards the east for 3m to reach the hotel, then she takes a right turn and walks 2m to reach the school. Then, from the school she turns right and walks 12m to reach the park, then she again takes a right turn and walks 9m to reach the beach. Then, from the beach she turns east and walks for 5m to reach the museum. Then she turns towards the left and walks for 7m to reach the theatre, then she takes a right turn and walks 11m to reach the hospital. Then finally she turns towards the right and walks for 4m to reach the mall.

What is the direction of the museum with respect to home?

- a. Southwest
- b. West
- c. South
- d. Northwest
- e. Northeast

32. Questions

What is the shortest distance between the beach and the school?

- a. 12m
- b. 5m
- c. 15m
- d. 17m
- e. 10m

33. Questions

Four of the following five are alike in a certain way based on the directions with respect to the hospital in the given arrangement and thus form a group. Which among the following does not belong to the group?

- a. Theatre
- b. museum
- c. Park
- d. Hotel
- e. School

34. Questions

Study the following information carefully and answer the below questions.

Point B is 11m to the north of point C, which is 4m to the west of point G. Point D is 8m to the east of point B. Point A is 5m to the north of point D, which is midpoint of point of A and H. Point F is 6m to the west of point H. Point E is 3m south of point F.

What is the direction of point F with respect to point G?

- a. West
- b. Southeast
- c. North
- d. Northwest
- e. South

35. Questions

What is the shortest distance between point E and point H?

- a. $\sqrt{47}$ m
- b. $3\sqrt{5}$ m
- c. $5\sqrt{5}$ m

d. $4\sqrt{5}m$ e. $\sqrt{43}m$ **36. Questions**

Study the following information carefully and answer the below questions.

In a certain code language,

“Tour franchise hold decision” is coded as “lt de os br”

“Historic conclude excel tour” is coded as “br vx gm cd”

“Crisis decision report historic” is coded as “de cd nf ip”

“Excel report despite embark” is coded as “ab ip uk gm”

(Note: All the given codes are two-letter codes only.)

Which of the following codes represents the word “Decision” in the given coded language?

- a. br
- b. lt
- c. os
- d. de
- e. cd

37. Questions

Which of the following words represents the code “vx” in the given code language?

- a. Historic
- b. Conclude
- c. Excel
- d. Tour
- e. Crisis

38. Questions

Which of the following codes represents the phrase “Hold report” in the given coded language?

- a. lt os
- b. ip it
- c. os ip
- d. de lt
- e. Cannot be determined

39. Questions

If the phrase “value franchise” is coded as “os cn” and “despite king” is coded as “ab sf,” then which of the following is the code for the phrase “king value empark” in the given coded language?

- a. os cn sf
- b. ab lt cn
- c. cn sf uk
- d. sf lt os
- e. uk ab os

40. Questions

Which of the following combinations is definitely TRUE as per the given coded language?

- a. Tour - br
- b. Historic - gm
- c. Excel - cd
- d. Crisis - ip
- e. Report - nf

Explanations:

1. Questions

Final arrangement:

Days	Persons/Colors
Saturday	T(pink)
Sunday	W(grey)
Monday	V(red)
Tuesday	R(violet)
Wednesday	S(yellow)
Thursday	U(white)

We have,

- S attends the meeting after Tuesday.
- Only three persons attend the meeting between S and the one who likes pink.
- V, who likes red attends the meeting two persons after the one who likes pink.

From the above conditions, there are two possibilities.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	(pink)	
Sunday		(pink)
Monday	V(red)	
Tuesday		V(red)
Wednesday	S	
Thursday		S

Again, we have

- R attends the meeting exactly between V and the one who likes yellow.
- T attends the meeting immediately before the one who likes grey.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	
Sunday	(grey)	T(pink)
Monday	V(red)	(grey)
Tuesday	R	V(red)
Wednesday	S(yellow)	R
Thursday		S(yellow)

Again, We have,

- As many persons attend the meeting before T as after the one who likes white.
- W doesn't attend the meeting after Sunday.
- U doesn't like grey.

From the above conditions, case-2 gets eliminated because U doesn't like grey, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	W (Violet)
Sunday	W (grey)	T(pink)
Monday	V(red)	U (grey)
Tuesday	R (Violet)	V(red)
Wednesday	S(yellow)	R (White)
Thursday	U (White)	S(yellow)

Answer: B (Only S remains unchanged in his position)

2. Questions

Final arrangement:

Days	Persons/Colors
Saturday	T(pink)
Sunday	W(grey)
Monday	V(red)
Tuesday	R(violet)
Wednesday	S(yellow)
Thursday	U(white)

We have,

- S attends the meeting after Tuesday.
- Only three persons attend the meeting between S and the one who likes pink.
- V, who likes red attends the meeting two persons after the one who likes pink.

From the above conditions, there are two possibilities.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	(pink)	
Sunday		(pink)
Monday	V(red)	
Tuesday		V(red)
Wednesday	S	
Thursday		S

Again, we have

- R attends the meeting exactly between V and the one who likes yellow.
- T attends the meeting immediately before the one who likes grey.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	
Sunday	(grey)	T(pink)
Monday	V(red)	(grey)
Tuesday	R	V(red)
Wednesday	S(yellow)	R
Thursday		S(yellow)

Again, We have,

- As many persons attend the meeting before T as after the one who likes white.
- W doesn't attend the meeting after Sunday.
- U doesn't like grey.

From the above conditions, case-2 gets eliminated because U doesn't like grey, which is not satisfied. 

Hence, case-1 shows the final arrangement.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	W (Violet)
Sunday	W (grey)	T(pink)
Monday	V(red)	U (grey)
Tuesday	R (Violet)	V(red)
Wednesday	S(yellow)	R (White)
Thursday	U (White)	S(yellow)

Answer: B

3. Questions

Final arrangement:

Days	Persons/Colors
Saturday	T(pink)
Sunday	W(grey)
Monday	V(red)
Tuesday	R(violet)
Wednesday	S(yellow)
Thursday	U(white)

We have,

- S attends the meeting after Tuesday.
- Only three persons attend the meeting between S and the one who likes pink.
- V, who likes red attends the meeting two persons after the one who likes pink.

From the above conditions, there are two possibilities.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	(pink)	
Sunday		(pink)
Monday	V(red)	
Tuesday		V(red)
Wednesday	S	
Thursday		S

Again, we have

- R attends the meeting exactly between V and the one who likes yellow.
- T attends the meeting immediately before the one who likes grey.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	
Sunday	(grey)	T(pink)
Monday	V(red)	(grey)
Tuesday	R	V(red)
Wednesday	S(yellow)	R
Thursday		S(yellow)

Again, We have,

- As many persons attend the meeting before T as after the one who likes white.
- W doesn't attend the meeting after Sunday.
- U doesn't like grey.

From the above conditions, case-2 gets eliminated because U doesn't like grey, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	W (Violet)
Sunday	W (grey)	T(pink)
Monday	V(red)	U (grey)
Tuesday	R (Violet)	V(red)
Wednesday	S(yellow)	R (White)
Thursday	U (White)	S(yellow)

Answer: D

4. Questions

Final arrangement:

Days	Persons/Colors
Saturday	T(pink)
Sunday	W(grey)
Monday	V(red)
Tuesday	R(violet)
Wednesday	S(yellow)
Thursday	U(white)

We have,

- S attends the meeting after Tuesday.
- Only three persons attend the meeting between S and the one who likes pink.
- V, who likes red attends the meeting two persons after the one who likes pink.

From the above conditions, there are two possibilities.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	(pink)	
Sunday		(pink)
Monday	V(red)	
Tuesday		V(red)
Wednesday	S	
Thursday		S

Again, we have

- R attends the meeting exactly between V and the one who likes yellow.
- T attends the meeting immediately before the one who likes grey.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	
Sunday	(grey)	T(pink)
Monday	V(red)	(grey)
Tuesday	R	V(red)
Wednesday	S(yellow)	R
Thursday		S(yellow)

Again, We have,

- As many persons attend the meeting before T as after the one who likes white.
- W doesn't attend the meeting after Sunday.
- U doesn't like grey.

From the above conditions, case-2 gets eliminated because U doesn't like grey, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	W (Violet)
Sunday	W (grey)	T(pink)
Monday	V(red)	U (grey)
Tuesday	R (Violet)	V(red)
Wednesday	S(yellow)	R (White)
Thursday	U (White)	S(yellow)

Answer: B

5. Questions

Final arrangement:

Days	Persons/Colors
Saturday	T(pink)
Sunday	W(grey)
Monday	V(red)
Tuesday	R(violet)
Wednesday	S(yellow)
Thursday	U(white)

We have,

- S attends the meeting after Tuesday.
- Only three persons attend the meeting between S and the one who likes pink.
- V, who likes red attends the meeting two persons after the one who likes pink.

From the above conditions, there are two possibilities.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	(pink)	
Sunday		(pink)
Monday	V(red)	
Tuesday		V(red)
Wednesday	S	
Thursday		S

Again, we have

- R attends the meeting exactly between V and the one who likes yellow.
- T attends the meeting immediately before the one who likes grey.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	
Sunday	(grey)	T(pink)
Monday	V(red)	(grey)
Tuesday	R	V(red)
Wednesday	S(yellow)	R
Thursday		S(yellow)

Again, We have,

- As many persons attend the meeting before T as after the one who likes white.
- W doesn't attend the meeting after Sunday.
- U doesn't like grey.

From the above conditions, case-2 gets eliminated because U doesn't like grey, which is not satisfied. 

Hence, case-1 shows the final arrangement.

	Case-1	Case-2
Days	Persons/Colors	Persons /Colors
Saturday	T(pink)	W (Violet)
Sunday	W (grey)	T(pink)
Monday	V(red)	U (grey)
Tuesday	R (Violet)	V(red)
Wednesday	S(yellow)	R (White)
Thursday	U (White)	S(yellow)

Answer: E (All persons attend the meeting on the adjacent days)

6. Questions

Final arrangement:

We have,

- A sits to the immediate right of D but not on the same side.
- Three persons sit between A and G.

From the above conditions, there are two possibilities.

Again, we have,

- G sits exactly between D and B.
- B sits second to the left of E.

Again, We have,

- As many persons sit between E and C as between F and H when counted from the left of both E and F, respectively.
- F doesn't sit adjacent to H.
- The one who sits to the immediate right of C doesn't sit on the shorter side of the table.

From the above conditions, case-2 gets eliminated because the one who sits to the immediate right of C doesn't sit on the shorter side of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A

7. Questions

Final arrangement:

We have,

- A sits to the immediate right of D but not on the same side.
- Three persons sit between A and G.

From the above conditions, there are two possibilities.

Again, we have,

- G sits exactly between D and B.
- B sits second to the left of E.

Again, We have,

- As many persons sit between E and C as between F and H when counted from the left of both E and F, respectively.
- F doesn't sit adjacent to H.
- The one who sits to the immediate right of C doesn't sit on the shorter side of the table.

From the above conditions, case-2 gets eliminated because the one who sits to the immediate right of C doesn't sit on the shorter side of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

8. Questions

Final arrangement:

We have,

- A sits to the immediate right of D but not on the same side.
- Three persons sit between A and G.

From the above conditions, there are two possibilities.

Again, we have,

- G sits exactly between D and B.
- B sits second to the left of E.

Again, We have,

- As many persons sit between E and C as between F and H when counted from the left of both E and F, respectively.
- F doesn't sit adjacent to H.

- The one who sits to the immediate right of C doesn't sit on the shorter side of the table.

From the above conditions, case-2 gets eliminated because the one who sits to the immediate right of C doesn't sit on the shorter side of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

9. Questions

Final arrangement:

We have,

- A sits to the immediate right of D but not on the same side.
- Three persons sit between A and G.

From the above conditions, there are two possibilities.

Again, we have,

- G sits exactly between D and B.

- B sits second to the left of E.

Again, We have,

- As many persons sit between E and C as between F and H when counted from the left of both E and F, respectively.
- F doesn't sit adjacent to H.
- The one who sits to the immediate right of C doesn't sit on the shorter side of the table.

From the above conditions, case-2 gets eliminated because the one who sits to the immediate right of C doesn't sit on the shorter side of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: B (Only B remains unchanged in his position, excluding A)

10. Questions

Final arrangement:

We have,

- A sits to the immediate right of D but not on the same side.

- Three persons sit between A and G.

From the above conditions, there are two possibilities.

Again, we have,

- G sits exactly between D and B.
- B sits second to the left of E.

Again, We have,

- As many persons sit between E and C as between F and H when counted from the left of both E and F, respectively.
- F doesn't sit adjacent to H.
- The one who sits to the immediate right of C doesn't sit on the shorter side of the table.

From the above conditions, case-2 gets eliminated because the one who sits to the immediate right of C doesn't sit on the shorter side of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E (B sits opposite to D and F sits opposite to C; similarly, A sits opposite to G)

11. Questions

Final arrangement:

Floors	Flat A	Flat B
5	N	T
4	Q	M
3	R	S
2	P	L
1	K	O

We have,

- L lives on an even-numbered floor.
- N lives three floors above L but not in the same flat.
- K lives immediately below the flat of P, who does not live above L.

From the above conditions, there are two possibilities.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4				
3				
2	L	P	P	L
1		K	K	

Again, we have,

- Two floors are between K and M.
- As many floors above L as below Q.
- O lives three floors below the flat of M

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4	M	Q	Q	M
3				
2	L	P	P	L
1	O	K	K	O

Again, we have,

- The number of floors between R and T is **one less than** the number of floors above S.
- S doesn't live on the same floor as T.
- R neither lives in the same flat as T nor lives in flat B.

From the above conditions, case-1 gets eliminated because R doesn't live in flat B, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5	T	N	N	T
4	M	Q	Q	M
3	S	R	R	S
2	L	P	P	L
1	O	K	K	O

Answer: A

12. Questions

Final arrangement:

Floors	Flat A	Flat B
5	N	T
4	Q	M
3	R	S
2	P	L
1	K	O

We have,

- L lives on an even-numbered floor.
- N lives three floors above L but not in the same flat.
- K lives immediately below the flat of P, who does not live above L.

From the above conditions, there are two possibilities.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4				
3				
2	L	P	P	L
1		K	K	

Again, we have,

- Two floors are between K and M.
- As many floors above L as below Q.
- O lives three floors below the flat of M

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4	M	Q	Q	M
3				
2	L	P	P	L
1	O	K	K	O

Again, we have,

- The number of floors between R and T is **one less than** the number of floors above S.
- S doesn't live on the same floor as T.
- R neither lives in the same flat as T nor lives in flat B.

From the above conditions, case-1 gets eliminated because R doesn't live in flat B, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5	T	N	N	T
4	M	Q	Q	M
3	S	R	R	S
2	L	P	P	L
1	O	K	K	O

Answer: D

13. Questions

Final arrangement:

Floors	Flat A	Flat B
5	N	T
4	Q	M
3	R	S
2	P	L
1	K	O

We have,

- L lives on an even-numbered floor.
- N lives three floors above L but not in the same flat.
- K lives immediately below the flat of P, who does not live above L.

From the above conditions, there are two possibilities.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4				
3				
2	L	P	P	L
1		K	K	

Again, we have,

- Two floors are between K and M.
- As many floors above L as below Q.
- O lives three floors below the flat of M

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4	M	Q	Q	M
3				
2	L	P	P	L
1	O	K	K	O

Again, we have,

- The number of floors between R and T is **one less than** the number of floors above S.
- S doesn't live on the same floor as T.
- R neither lives in the same flat as T nor lives in flat B.

From the above conditions, case-1 gets eliminated because R doesn't live in flat B, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5	T	N	N	T
4	M	Q	Q	M
3	S	R	R	S
2	L	P	P	L
1	O	K	K	O

Answer: E (All other persons live on an even-numbered floor except option E)

14. Questions

Final arrangement:

Floors	Flat A	Flat B
5	N	T
4	Q	M
3	R	S
2	P	L
1	K	O

We have,

- L lives on an even-numbered floor.
- N lives three floors above L but not in the same flat.
- K lives immediately below the flat of P, who does not live above L.

From the above conditions, there are two possibilities.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4				
3				
2	L	P	P	L
1		K	K	

Again, we have,

- Two floors are between K and M.
- As many floors above L as below Q.
- O lives three floors below the flat of M

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4	M	Q	Q	M
3				
2	L	P	P	L
1	O	K	K	O

Again, we have,

- The number of floors between R and T is **one less than** the number of floors above S.
- S doesn't live on the same floor as T.
- R neither lives in the same flat as T nor lives in flat B.

From the above conditions, case-1 gets eliminated because R doesn't live in flat B, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5	T	N	N	T
4	M	Q	Q	M
3	S	R	R	S
2	L	P	P	L
1	O	K	K	O

Answer: C (N lives with T on the same floor and Q lives with M on the same floor similarly R lives with S on the same floor)

15. Questions

Final arrangement:

Floors	Flat A	Flat B
5	N	T
4	Q	M
3	R	S
2	P	L
1	K	O

We have,

- L lives on an even-numbered floor.
- N lives three floors above L but not in the same flat.
- K lives immediately below the flat of P, who does not live above L.

From the above conditions, there are two possibilities.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4				
3				
2	L	P	P	L
1		K	K	

Again, we have,

- Two floors are between K and M.
- As many floors above L as below Q.
- O lives three floors below the flat of M

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5		N	N	
4	M	Q	Q	M
3				
2	L	P	P	L
1	O	K	K	O

Again, we have,

- The number of floors between R and T is **one less than** the number of floors above S.
- S doesn't live on the same floor as T.
- R neither lives in the same flat as T nor lives in flat B.

From the above conditions, case-1 gets eliminated because R doesn't live in flat B, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case-1		Case-2	
Floors	Flat A	Flat B	Flat A	Flat B
5	T	N	N	T
4	M	Q	Q	M
3	S	R	R	S
2	L	P	P	L
1	O	K	K	O

Answer: B

16. Questions

Final arrangement:

We have,

- A sits third to the right of D and both of them face opposite directions.
- Two persons sit between A and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits second to the left of A and sits to the immediate left of G.
- As many persons sit between G and B (when counted from the right of G) as between B and E (when counted from the right of B).

Again, We have,

- Immediate neighbours of E face the same direction but opposite to E, who sits third to the left of F.
- B and C face the same direction.
- The one who sits second to the right of H doesn't face outside.

From the above conditions, case-2 gets eliminated because the one who sits second to the right of H doesn't face outside, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E

17. Questions

Final arrangement:

We have,

- A sits third to the right of D and both of them face opposite directions.
- Two persons sit between A and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits second to the left of A and sits to the immediate left of G.
- As many persons sit between G and B (when counted from the right of G) as between B and E (when counted from the right of B).

Again, We have,

- Immediate neighbours of E face the same direction but opposite to E, who sits third to the left of F.
- B and C face the same direction.
- The one who sits second to the right of H doesn't face outside.

From the above conditions, case-2 gets eliminated because the one who sits second to the right of H doesn't face outside, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

18. Questions

Final arrangement:

We have,

- A sits third to the right of D and both of them face opposite directions.
- Two persons sit between A and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits second to the left of A and sits to the immediate left of G.
- As many persons sit between G and B (when counted from the right of G) as between B and E (when counted from the right of B).

Again, We have,

- Immediate neighbours of E face the same direction but opposite to E, who sits third to the left of F.
- B and C face the same direction.
- The one who sits second to the right of H doesn't face outside.

From the above conditions, case-2 gets eliminated because the one who sits second to the right of H doesn't face outside, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D (The given first person sits 2nd to the left of the given second person)

19. Questions

Final arrangement:

We have,

- A sits third to the right of D and both of them face opposite directions.
- Two persons sit between A and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits second to the left of A and sits to the immediate left of G.
- As many persons sit between G and B (when counted from the right of G) as between B and E (when counted from the right of B).

Again, We have,

- Immediate neighbours of E face the same direction but opposite to E, who sits third to the left of F.
- B and C face the same direction.

- The one who sits second to the right of H doesn't face outside.

From the above conditions, case-2 gets eliminated because the one who sits second to the right of H doesn't face outside, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: B (The persons facing inside the table arranged in the clockwise direction)

20. Questions

Final arrangement:

We have,

- A sits third to the right of D and both of them face opposite directions.
- Two persons sit between A and C.

From the above conditions, there are two possibilities.

Again, we have,

- F sits second to the left of A and sits to the immediate left of G.

- As many persons sit between G and B (when counted from the right of G) as between B and E (when counted from the right of B).

Again, We have,

- Immediate neighbours of E face the same direction but opposite to E, who sits third to the left of F.
- B and C face the same direction.
- The one who sits second to the right of H doesn't face outside.

From the above conditions, case-2 gets eliminated because the one who sits second to the right of H doesn't face outside, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A

21. Questions

Answer: C

22. Questions

Answer: D

23. Questions

Answer: E

24. Questions

Answer: A

25. Questions

Answer: B

26. Questions

Answer: B

$M = S \geq P > Y < A; X < I = O \geq S > F$

I). $I > P$ ($I = O \geq S \geq P$) -> False

II). $O = P$ ($I = O \geq S \geq P$) -> False

But on combining both I and II, either conclusion I or II is true.

27. Questions

Answer: D

$B \leq K < U > L = N; E \geq T > Q > K = G$

I). $B < T$ ($B \leq K < Q < T$) -> True

II). $E \geq N$ ($E \geq T > Q > K < U > L = N$) -> False

28. Questions

Answer: A

$C \geq R = N \leq V \geq K; J > F \geq Z = X \geq R$

I). $J > K$ ($J > F \geq Z = X \geq R = N \leq V \geq K$) -> False

II). $F \geq N$ ($F \geq Z = X \geq R = N$) -> True

29. Questions

Answer: E

$H \leq W > D \geq E \leq B; V > B \geq T > U \leq J$

I). $D \geq T$ ($D \geq E \leq B \geq T$) -> False

II). $U < D$ ($U < T \leq B \geq E \leq D$) -> False

30. Questions

Answer: C

$O > G \geq Y \geq I \leq R; S \leq L \leq I = W \leq Z$

I). $S \leq R$ ($S \leq L \leq I \leq R$) $\rightarrow$ True

II). $O > L$ ($O > G \geq Y \geq I \geq L$) $\rightarrow$ True

31. Questions

Answer: D

32. Questions

Answer: C

The shortest distance between the beach and the school

Let us take the points of the beach, park, and school as A, B, and C respectively, forming a right-angled triangle.

Therefore, by the Pythagoras' theorem,

$$AC^2 = AB^2 + BC^2 = (9)^2 + (12)^2$$

$$AC = \sqrt{(81 + 144)} = \sqrt{225}$$

$$AC = 15m$$

33. Questions

Answer: A (All other places are southwest of the hospital except option A)

34. Questions

Answer: D

35. Questions

Answer: B

The shortest distance between E and H

The points E, F, and H form a right-angled triangle.

Therefore, by the Pythagoras' theorem,

$$(EH)^2 = (EF)^2 + (FH)^2 = (3)^2 + (6)^2$$

$$EH = \sqrt{(9 + 36)}m$$

$$= \sqrt{45}m$$

$$EH = 3\sqrt{5}m$$
