

1. Questions

Study the following information carefully and answer the questions below.

Nine persons L, M, N, O, P, Q, R, S, and T attend an interview one after another on the same day. It is assumed that no other persons attend the interview other than the given persons.

More than five persons attend the interview after P. Four persons attend between P and M. As many persons attending before M is the same as persons attending after L. N attends exactly between L and R. R attends three persons before S. The number of persons attending between Q and T is **three more than** the number of persons attending after S. T attends immediately after N.

If all the persons are arranged in the alphabetical order from last to first, then which of the following persons remain unchanged in their position?

I). L

II). M

III). N

- a. Only III
- b. Only II and I
- c. Only II
- d. Only I and III
- e. Only I

2. Questions

Who among the following person attends immediately before T?

- a. P
- b. The one who attends two persons after L
- c. R
- d. O
- e. Either a) or b)

3. Questions

As many persons attending between N and S is the same as the persons attending between Q and ____.

- a. M
- b. L
- c. The one who attends two persons after P
- d. N

- e. The one who attends immediately before O

4. Questions

If L is related to N in a certain way, similarly O is related to S, then who among the following person is related to M?

- a. Q
- b. S
- c. The one who attends three persons before T
- d. R
- e. None of the above

5. Questions

Q, P, T, O, _____

- a. S
- b. N
- c. M
- d. L
- e. R

6. Questions

Study the following information carefully and answer the questions below.

A certain number of persons are sitting in a linear row and facing north with equal distance between the adjacent persons.

P sits to the immediate right of F, who sits third to the left of M. Four persons sit between P and J, who sits fifth from the extreme end of the row. As many persons sitting between J and F as between O and F. S sits second to the left of O. The number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, who sit at the extreme end of the row. S sits fourth to the left of E.

How many persons are sitting in the row based on the final arrangement?

- a. 20
- b. 13
- c. 19
- d. 16
- e. 15

7. Questions

Who among the following person sits second to the right of O?

- a. V
- b. E
- c. The one who sits to the immediate left of V
- d. F
- e. P

8. Questions

What is the position of M with respect to V, based on the final arrangement?

- a. Sixth to the left
- b. Fifth to the right
- c. Fourth to the left
- d. Third to the right
- e. Seventh to the left

9. Questions

Who among the following person does not sit to the left of O?

I). The one who sits third to the right of M

II). The one who sits to the immediate left of P

III). V

- a. Only II
- b. Only II and I
- c. Only III
- d. Only I and III
- e. Only I

10. Questions

Who among the following person sits exactly in the middle of the row?

- a. The one who sits to the immediate right of F
- b. S
- c. M
- d. O
- e. V

11. Questions

Study the following information carefully and answer the questions below.

Six persons A, B, C, D, E, and F are attending the meeting on two different dates either 11th or 14th of three different months viz., January, March, and April of the same year. Only one person attends the meeting on each date, and only two persons attend the meeting in each month. Each person likes different colors red, brown, white, pink, green and violet.

F attends the meeting in the month having 30 days. Three persons attended the meeting between the one who likes brown and F. Two persons attended the meeting between C and the one who likes brown. A attends the meeting immediately before the one who likes red but not in the same month. The one who likes green attends the meeting immediately after the one who likes red. The number of persons attending the meeting between B and the one who likes pink is the same number of persons attending the meeting after C. The one who likes white attends the meeting before B, who doesn't like green. D neither likes pink nor attends the meeting on the odd numbered date of the month.

On which of the following month and date does B attend the meeting?

- a. January 11
- b. April 14
- c. March 11
- d. April 11
- e. March 14

12. Questions

How many persons attend the meeting after the one who likes violet as per the final arrangement?

- a. More than three
- b. One
- c. Two
- d. Three
- e. None

13. Questions

E, A, B, ____

- a. C
- b. D
- c. F
- d. None of these
- e. Either a) or b)

14. Questions

Which of the following combination(s) is/are TRUE as per the final arrangement?

- I). F-violet
- II). E-brown
- III). C-green
- a. Only I
- b. Only II and I
- c. Only III
- d. Only I and III
- e. Only II

15. Questions

The number of persons attending the meeting before E is _____ the number of persons attending the meeting after the one who likes red.

- a. One more than
- b. One less than
- c. Two more than
- d. Three less than
- e. Three more than

16. Questions

Study the following information carefully and answer the questions below.

Ten persons are sitting in two parallel rows, each containing five persons, such that there is an equal distance between adjacent persons. In row 1: A, B, C, D, and E are seated and all of them are facing north. In row 2: P, Q, R, S, and T are seated and all of them are facing south. Persons sitting in the row 1 and row 2 are facing each other.

A sits to the third to the left of the one who faces R. An odd number of persons sit between P and R. P sits third to the right of S. As many persons sit between A and D is the same as persons sits to the left of S. C faces the one who sits second to the left of Q. Q does not sit to the right of T. B sits exactly between C and E. B is not an immediate neighbour of E.

If all the persons are made to sit in the alphabetical order from left to right in row-1, then how many persons remain unchanged in their position?

- a. None
- b. One
- c. Two

- d. Three
- e. More than three

17. Questions

Who among the following person sits diagonally opposite to E?

- a. S
- b. Q
- c. The one who faces C
- d. T
- e. The one who sits second to the left of P

18. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which among the following does not belong to the group?

- a. R
- b. C
- c. The one who faces E
- d. Q
- e. The one who sits to the immediate left of A

19. Questions

PE, TA, QB, __

- a. SD
- b. ER
- c. CS
- d. DT
- e. None of the above

20. Questions

Who among the following person sits exactly between C and the one who faces P?

- a. The one who faces T
- b. D
- c. B
- d. The one who sits second to the left of B

e. E

21. Questions

Study the following information carefully and answer the questions below.

Seven persons P, Q, R, S, T, U and V are of different weights .

V is heavier than R but lighter than P. S is lighter than Q. T is heavier than both V and U. Q is lighter than R but heavier than U. As many persons heavier than T is the same as lighter than U. The weights of the one who is the second heaviest and the second lightest persons are 85kg and 59 kg respectively. T is not the second heaviest.

How many persons are heavier than T as per the final arrangement?

- a. More than three
- b. No one
- c. Two
- d. Three
- e. Cannot be determined

22. Questions

If the difference between the weights of Q and P is 12kg, then what is the possible weight of V?

- a. 72 kg
- b. 87 kg
- c. 54 kg
- d. 78 kg
- e. 86 kg

23. Questions

If U is 23kg lighter than S, then what is the resultant if the sum of the weights of P and S is divided by the weight of the lightest person?

- a. 6
- b. 8
- c. 4
- d. 3
- e. Cannot be determined

24. Questions

Study the following information carefully and answer the questions below.

Seven persons-D, E, F, G, H, I, and J buy a different number of pens.

F buys less pens than J but more pens than E. D buys more pens than only two persons. G buys 5 more pens than E but less than J. H buys more pens than D, who buys 10 pens. The number of persons buying more pens than H is **three more than** the number of persons buying less than I.

How many persons buy less pens than G?

- a. Two
- b. Three
- c. Four
- d. Five
- e. Cannot be determined

25. Questions

If G buys 4 pens more than D and E buys 7 pens less than F then what is the average number of pens buy by G, F, and E?

- a. 16
- b. 15
- c. 13
- d. 17
- e. Cannot be determined

26. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusion which is definitely true.

Statements:

$R \leq M \geq J \geq I > D; P \leq H \leq X \geq T = J$

Conclusions:

I). $X > D$

II). $P \leq M$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

27. Questions**Statements:** $L > O \geq N = K \leq Y; C = T \geq L \leq A \leq X$ **Conclusions:****I). $C \geq N$** **II). $K < X$**

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

28. Questions**Statements:** $G \geq J > E \leq F = I; A \leq V \geq E > M \leq Q$ **Conclusions:****I). $V > I$** **II). $G > Q$**

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

29. Questions**Statements:** $H \geq Z = P \geq V > D; G \leq H \leq Q = B > Y$ **Conclusions:****I). $P < Q$** **II). $Z = B$**

- a. Only conclusion II is true
- b. Either conclusion I or II is true

- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

30. Questions

Statements:

$W \leq A = K \leq O > U; S = J > D \geq A > N$

Conclusions:

I). $N < O$

II). $S > W$

- a. Only conclusion II is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

31. Questions

Study the following information carefully and answer the questions below.

Mathi walks from home towards the east for 8m to reach school. Then she turns right and walks for 7m to reach the playground. Then she turns towards the west and walks for 6m to reach the canteen and walks for 3m north to reach the library. Then from the library she turns left and walks for 3m to reach the park and walks for 12m south to reach the temple. Then finally she turns towards the east and walks for 5m to reach the hostel.

What is the direction of the park with respect to the home?

- a. Southwest
- b. Southeast
- c. South
- d. Northwest
- e. Northeast

32. Questions

What is the shortest distance between the hostel and the park?

- a. 12m
- b. 15m

- c. 17m
- d. 13m
- e. 10m

33. Questions

Four of the following five are alike in a certain way based on the directions with respect to the home in the given arrangement and thus form a group. Which among the following does not belong to the group?

- a. Library
- b. Playground
- c. Temple
- d. Canteen
- e. Hostel

34. Questions

Study the following information carefully and answer the questions below.

A person starts running for 8m in the north direction. Then, he turns to the right and runs for 3m. Then he turns to the south and runs for 4m. Again, he turns east and runs for 6m. Then he turns to the south and runs for 1m. Then he turns west and runs for 5m. Then, he turns consecutive left and right for 4m and 7m respectively. Finally, he turns to the right and runs for 6m to end his journey.

What is the direction of the ending point with respect to the third turning point?

- a. Southwest
- b. Southeast
- c. West
- d. Northwest
- e. Northeast

35. Questions

If he runs at a speed of 4m/s, then how long will he take to complete the journey?

- a. 10 sec
- b. 11 sec
- c. 13 sec
- d. 12 sec
- e. 15 sec

36. Questions

Study the following information carefully and answer the questions below.

In a certain code language,

“Private sector already interact” is coded as “at am as aj”

“Workload pressure in report analysis” is coded as “ad ag ap ar al”

“Decision private must reduce in” is coded as “al as ak an ax”

“Already report decision threat” is coded as “am ag ax ah”

(Note: All the given codes are two letter codes only)

Which of the following word represents the code “ah” in the given code language?

- a. Already
- b. Report
- c. Decision
- d. Threat
- e. In

37. Questions

Which of the following combination is definitely TRUE as per the given coded language?

- a. Private - aj
- b. Report - ag
- c. Analysis - ad
- d. Workload - ap
- e. Must - ak

38. Questions

Which of the following code is possible code for the word “Must” in the given coded language?

- a. al
- b. as
- c. ak
- d. ax
- e. av

39. Questions

Which of the following code is for the phrase “Sector in” in the given coded language?

- a. at al
- b. as at
- c. al aj
- d. Either a) or b)
- e. Either a) or c)

40. Questions

If the phrase “Good analysis” is coded as “aw ap” and “Must sector workload” is coded as “an ad at,” then which of the following is the code for the phrase “Interact good reduce” in the given coded language?

- a. ap at an
- b. aw ap at
- c. aj aw ak
- d. ak an aj
- e. Cannot be determined

Explanations:

1. Questions

Final arrangement:

Persons
Q
L
P
N
T
R
O
M
S

We have,

- More than five persons attend the interview after P.
- Four persons attend between P and M.

From the above conditions, there are three possibilities:

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
	P	
P		
		M
	M	
M		

Again, we have,

- As many persons attending before M is the same as persons attending after L.
- N attends exactly between L and R.
- R attends three persons before S.

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
L	P	R
P	L	N
N	N	L
	R	S
R		M
	M	
M	S	
S		

Again, we have,

- The number of persons attending between Q and T is **three more than** the number of persons attending after S.
- T attends immediately after N.

From the above conditions, Case-2 and Case-3 get eliminated because T attends immediately after N, which is not satisfied.

Hence, case-1 shows the final arrangement.

Case - 1	Case - 2	Case - 3
Persons	Persons	Persons
Q		P
L	P	R
P	L	N
N	N	L
T	R	S
R		M
O	M	
M	S	
S		

Answer: C

2. Questions

Final arrangement:

Persons
Q
L
P
N
T
R
O
M
S

We have,

- More than five persons attend the interview after P.
- Four persons attend between P and M.

From the above conditions, there are three possibilities:

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
	P	
P		
		M
	M	
M		

Again, we have,

- As many persons attending before M is the same as persons attending after L.
- N attends exactly between L and R.
- R attends three persons before S.

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
L	P	R
P	L	N
N	N	L
	R	S
R		M
	M	
M	S	
S		

Again, we have,

- The number of persons attending between Q and T is **three more than** the number of persons attending after S.
- T attends immediately after N.

From the above conditions, Case-2 and Case-3 get eliminated because T attends immediately after N, which is not satisfied.

Hence, case-1 shows the final arrangement.

Case - 1	Case - 2	Case - 3
Persons	Persons	Persons
Q		P
L	P	R
P	L	N
N	N	L
T	R	S
R		M
O	M	
M	S	
S		

Answer: B

3. Questions

Final arrangement:

Persons
Q
L
P
N
T
R
O
M
S

We have,

- More than five persons attend the interview after P.
- Four persons attend between P and M.

From the above conditions, there are three possibilities:

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
	P	
P		
		M
	M	
M		

Again, we have,

- As many persons attending before M is the same as persons attending after L.
- N attends exactly between L and R.
- R attends three persons before S.

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
L	P	R
P	L	N
N	N	L
	R	S
R		M
	M	
M	S	
S		

Again, we have,

- The number of persons attending between Q and T is **three more than** the number of persons attending after S.
- T attends immediately after N.

From the above conditions, Case-2 and Case-3 get eliminated because T attends immediately after N, which is not satisfied.

Hence, case-1 shows the final arrangement.

Case - 1	Case - 2	Case - 3
Persons	Persons	Persons
Q		P
L	P	R
P	L	N
N	N	L
T	R	S
R		M
O	M	
M	S	
S		

Answer: E (L attends two persons before N and O attends two persons before S, similarly R attends two persons before M)

4. Questions

Final arrangement:

Persons
Q
L
P
N
T
R
O
M
S

We have,

- More than five persons attend the interview after P.
- Four persons attend between P and M.

From the above conditions, there are three possibilities:

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
	P	
P		
		M
	M	
M		

Again, we have,

- As many persons attending before M is the same as persons attending after L.
- N attends exactly between L and R.
- R attends three persons before S.

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
L	P	R
P	L	N
N	N	L
	R	S
R		M
	M	
M	S	
S		

Again, we have,

- The number of persons attending between Q and T is **three more than** the number of persons attending after S.
- T attends immediately after N.

From the above conditions, Case-2 and Case-3 get eliminated because T attends immediately after N, which is not satisfied.

Hence, case-1 shows the final arrangement.

Case - 1	Case - 2	Case - 3
Persons	Persons	Persons
Q		P
L	P	R
P	L	N
N	N	L
T	R	S
R		M
O	M	
M	S	
S		

Answer: D

5. Questions

Final arrangement:

Persons
Q
L
P
N
T
R
O
M
S

We have,

- More than five persons attend the interview after P.
- Four persons attend between P and M.

From the above conditions, there are three possibilities:

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
	P	
P		
		M
	M	
M		

Again, we have,

- As many persons attending before M is the same as persons attending after L.
- N attends exactly between L and R.
- R attends three persons before S.

Case-1	Case-2	Case-3
Persons	Persons	Persons
		P
L	P	R
P	L	N
N	N	L
	R	S
R		M
	M	
M	S	
S		

Again, we have,

- The number of persons attending between Q and T is **three more than** the number of persons attending after S.
- T attends immediately after N.

From the above conditions, Case-2 and Case-3 get eliminated because T attends immediately after N, which is not satisfied.

Hence, case-1 shows the final arrangement.

Case - 1	Case - 2	Case - 3
Persons	Persons	Persons
Q		P
L	P	R
P	L	N
N	N	L
T	R	S
R		M
O	M	
M	S	
S		

Answer: A (The pattern follows the persons attends on the odd positions starting from the first person)

6. Questions

Final arrangement:

We have,

- P sits to the immediate right of F, who sits third to the left of M.
- Four persons sit between P and J, who sits fifth from the extreme end of the row.

From the above conditions, there are two possibilities:

Again, we have,

- As many persons sitting between J and F is the same as the persons sitting between O and F.
- S sits second to the left of O.

Again, we have,

- The number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, who sit at the extreme end of the row.
- S sits fourth to the left of E.

From the above conditions, case-2 gets eliminated because the number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

7. Questions

Final arrangement:

We have,

- P sits to the immediate right of F, who sits third to the left of M.
- Four persons sit between P and J, who sits fifth from the extreme end of the row.

From the above conditions, there are two possibilities:

Again, we have,

- As many persons sitting between J and F is the same as the persons sitting between O and F.
- S sits second to the left of O.

Again, we have,

- The number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, who sit at the extreme end of the row.
- S sits fourth to the left of E.

From the above conditions, case-2 gets eliminated because the number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: B

8. Questions

Final arrangement:

We have,

- P sits to the immediate right of F, who sits third to the left of M.
- Four persons sit between P and J, who sits fifth from the extreme end of the row.

From the above conditions, there are two possibilities:

Again, we have,

- As many persons sitting between J and F is the same as the persons sitting between O and F.
- S sits second to the left of O.

Again, we have,

- The number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, who sit at the extreme end of the row.
- S sits fourth to the left of E.

From the above conditions, case-2 gets eliminated because the number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E

9. Questions

Final arrangement:

We have,

- P sits to the immediate right of F, who sits third to the left of M.
- Four persons sit between P and J, who sits fifth from the extreme end of the row.

From the above conditions, there are two possibilities:

Again, we have,

- As many persons sitting between J and F is the same as the persons sitting between O and F.
- S sits second to the left of O.

Again, we have,

- The number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, who sit at the extreme end of the row.
- S sits fourth to the left of E.

From the above conditions, case-2 gets eliminated because the number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D

10. Questions

Final arrangement:

We have,

- P sits to the immediate right of F, who sits third to the left of M.
- Four persons sit between P and J, who sits fifth from the extreme end of the row.

From the above conditions, there are two possibilities:

Again, we have,

- As many persons sitting between J and F is the same as the persons sitting between O and F.
- S sits second to the left of O.

Again, we have,

- The number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, who sit at the extreme end of the row.
- S sits fourth to the left of E.

From the above conditions, case-2 gets eliminated because the number of persons sitting between O and S is **two less than** the number of persons sitting between E and V, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A

11. Questions

Final arrangement:

Month & Date	Persons/Colors
January 11	E(white)
January 14	A(brown)
March 11	B(red)
March 14	D(green)
April 11	C(pink)
April 14	F(violet)

We have,

- F attends the meeting in the month having 30 days.
- Three persons attended the meeting between the one who likes brown and F.

From the above conditions, there are two possibilities:

Month & Date	Case-1	Case-2
	Persons/Colors	Persons/Colors
January 11	(brown)	
January 14		(brown)
March 11		
March 14		
April 11	F	
April 14		F

Again, we have,

- Two persons attended the meeting between C and the one who likes brown.
- A attends the meeting immediately before the one who likes red but not in the same month.
- The one who likes green attends the meeting immediately after the one who likes red.

From the above conditions there is one more possibility.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)		
January 14	A	A(brown)	(brown)
March 11	(red)	(red)	
March 14	C(green)	(green)	A
April 11	F	C	C(red)
April 14		F	F(green)

Again, we have,

- The number of persons attending the meeting between B and the one who likes pink is the same number of persons attending the meeting after C.
- The one who likes white attends the meeting before B, who doesn't like green.
- D neither likes pink nor attends the meeting on the odd numbered date of the month.

From the above conditions, Case-1 and Case2a get eliminated . Case 1 gets eliminated because D neither likes pink nor attends the meeting on the odd numbered date of the month, which is not satisfied and Case 2a gets eliminated because the one who likes white attends the meeting before B, who doesn't like green which is not satisfied.

Hence, case-2 shows the final arrangement.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)	E(white)	(pink)
January 14	A(white)	A(brown)	(brown)
March 11	B(red)	B(red)	B
March 14	C(green)	D(green)	A
April 11	F	C(pink)	C(red)
April 14	(pink)	F(violet)	F(green)

Answer: C

12. Questions

Final arrangement:

Month & Date	Persons/Colors
January 11	E(white)
January 14	A(brown)
March 11	B(red)
March 14	D(green)
April 11	C(pink)
April 14	F(violet)

We have,

- F attends the meeting in the month having 30 days.
- Three persons attended the meeting between the one who likes brown and F.

From the above conditions, there are two possibilities:

Month & Date	Case-1	Case-2
	Persons/Colors	Persons/Colors
January 11	(brown)	
January 14		(brown)
March 11		
March 14		
April 11	F	
April 14		F

Again, we have,

- Two persons attended the meeting between C and the one who likes brown.
- A attends the meeting immediately before the one who likes red but not in the same month.
- The one who likes green attends the meeting immediately after the one who likes red.

From the above conditions there is one more possibility.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)		
January 14	A	A(brown)	(brown)
March 11	(red)	(red)	
March 14	C(green)	(green)	A
April 11	F	C	C(red)
April 14		F	F(green)

Again, we have,

- The number of persons attending the meeting between B and the one who likes pink is the same number of persons attending the meeting after C.
- The one who likes white attends the meeting before B, who doesn't like green.

- D neither likes pink nor attends the meeting on the odd numbered date of the month.

From the above conditions, Case-1 and Case2a get eliminated . Case 1 gets eliminated because D neither likes pink nor attends the meeting on the odd numbered date of the month, which is not satisfied and Case 2a gets eliminated because the one who likes white attends the meeting before B, who doesn't like green which is not satisfied.

Hence, case-2 shows the final arrangement.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)	E(white)	(pink)
January 14	A(white)	A(brown)	(brown)
March 11	B(red)	B(red)	B
March 14	C(green)	D(green)	A
April 11	F	C(pink)	C(red)
April 14	(pink)	F(violet)	F(green)

Answer: E

13. Questions

Final arrangement:

Month & Date	Persons/Colors
January 11	E(white)
January 14	A(brown)
March 11	B(red)
March 14	D(green)
April 11	C(pink)
April 14	F(violet)

We have,

- F attends the meeting in the month having 30 days.

- Three persons attended the meeting between the one who likes brown and F.

From the above conditions, there are two possibilities:

Month & Date	Case-1	Case-2
	Persons/Colors	Persons/Colors
January 11	(brown)	
January 14		(brown)
March 11		
March 14		
April 11	F	
April 14		F

Again, we have,

- Two persons attended the meeting between C and the one who likes brown.
- A attends the meeting immediately before the one who likes red but not in the same month.
- The one who likes green attends the meeting immediately after the one who likes red.

From the above conditions there is one more possibility.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)		
January 14	A	A(brown)	(brown)
March 11	(red)	(red)	
March 14	C(green)	(green)	A
April 11	F	C	C(red)
April 14		F	F(green)

Again, we have,

- The number of persons attending the meeting between B and the one who likes pink is the same number of persons attending the meeting after C.

- The one who likes white attends the meeting before B, who doesn't like green.
- D neither likes pink nor attends the meeting on the odd numbered date of the month.

From the above conditions, Case-1 and Case2a get eliminated . Case 1 gets eliminated because D neither likes pink nor attends the meeting on the odd numbered date of the month, which is not satisfied and Case 2a gets eliminated because the one who likes white attends the meeting before B, who doesn't like green which is not satisfied.

Hence, case-2 shows the final arrangement.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)	E(white)	(pink)
January 14	A(white)	A(brown)	(brown)
March 11	B(red)	B(red)	B
March 14	C(green)	D(green)	A
April 11	F	C(pink)	C(red)
April 14	(pink)	F(violet)	F(green)

Answer: B (The pattern follows that all persons attends consecutively as per the final arrangement)

14. Questions

Final arrangement:

Month & Date	Persons/Colors
January 11	E(white)
January 14	A(brown)
March 11	B(red)
March 14	D(green)
April 11	C(pink)
April 14	F(violet)

We have,

- F attends the meeting in the month having 30 days.
- Three persons attended the meeting between the one who likes brown and F.

From the above conditions, there are two possibilities:

Month & Date	Case-1	Case-2
	Persons/Colors	Persons/Colors
January 11	(brown)	
January 14		(brown)
March 11		
March 14		
April 11	F	
April 14		F

Again, we have,

- Two persons attended the meeting between C and the one who likes brown.
- A attends the meeting immediately before the one who likes red but not in the same month.
- The one who likes green attends the meeting immediately after the one who likes red.

From the above conditions there is one more possibility.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)		
January 14	A	A(brown)	(brown)
March 11	(red)	(red)	
March 14	C(green)	(green)	A
April 11	F	C	C(red)
April 14		F	F(green)

Again, we have,

- The number of persons attending the meeting between B and the one who likes pink is the

same number of persons attending the meeting after C.

- The one who likes white attends the meeting before B, who doesn't like green.
- D neither likes pink nor attends the meeting on the odd numbered date of the month.

From the above conditions, Case-1 and Case2a get eliminated . Case 1 gets eliminated because D neither likes pink nor attends the meeting on the odd numbered date of the month, which is not satisfied and Case 2a gets eliminated because the one who likes white attends the meeting before B, who doesn't like green which is not satisfied.

Hence, case-2 shows the final arrangement.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)	E(white)	(pink)
January 14	A(white)	A(brown)	(brown)
March 11	B(red)	B(red)	B
March 14	C(green)	D(green)	A
April 11	F	C(pink)	C(red)
April 14	(pink)	F(violet)	F(green)

Answer: A

15. Questions

Final arrangement:

Month & Date	Persons/Colors
January 11	E(white)
January 14	A(brown)
March 11	B(red)
March 14	D(green)
April 11	C(pink)
April 14	F(violet)

We have,

- F attends the meeting in the month having 30 days.
- Three persons attended the meeting between the one who likes brown and F.

From the above conditions, there are two possibilities:

Month & Date	Case-1	Case-2
	Persons/Colors	Persons/Colors
January 11	(brown)	
January 14		(brown)
March 11		
March 14		
April 11	F	
April 14		F

Again, we have,

- Two persons attended the meeting between C and the one who likes brown.
- A attends the meeting immediately before the one who likes red but not in the same month.
- The one who likes green attends the meeting immediately after the one who likes red.

From the above conditions there is one more possibility.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)		
January 14	A	A(brown)	(brown)
March 11	(red)	(red)	
March 14	C(green)	(green)	A
April 11	F	C	C(red)
April 14		F	F(green)

Again, we have,

- The number of persons attending the meeting between B and the one who likes pink is the same number of persons attending the meeting after C.
- The one who likes white attends the meeting before B, who doesn't like green.
- D neither likes pink nor attends the meeting on the odd numbered date of the month.

From the above conditions, Case-1 and Case2a get eliminated . Case 1 gets eliminated because D neither likes pink nor attends the meeting on the odd numbered date of the month, which is not satisfied and Case 2a gets eliminated because the one who likes white attends the meeting before B, who doesn't like green which is not satisfied.

Hence, case-2 shows the final arrangement.

Month & Date	Case-1	Case-2	Case-2a
	Persons/Colours	Persons/Colours	Persons/Colours
January 11	(brown)	E(white)	(pink)
January 14	A(white)	A(brown)	(brown)
March 11	B(red)	B(red)	B
March 14	C(green)	D(green)	A
April 11	F	C(pink)	C(red)
April 14	(pink)	F(violet)	F(green)

Answer: D

16. Questions

Final arrangement:

We have,

- A sits to the third to the left of the one who faces R.
- An odd number of persons sit between P and R.
- P sits third to the right of S.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between A and D is the same persons sits to the left of S.
- C faces the one who sits second to the left of Q.
- Q does not sit to the right of T.

Again, we have,

- B sits exactly between C and E.
- B is not an immediate neighbour of E.

From the above conditions, case-1 gets eliminated because B is not an immediate neighbour of E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: B

17. Questions

Final arrangement:

We have,

- A sits to the third to the left of the one who faces R.
- An odd number of persons sit between P and R.
- P sits third to the right of S.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between A and D is the same persons sits to the left of S.
- C faces the one who sits second to the left of Q.
- Q does not sit to the right of T.

Again, we have,

- B sits exactly between C and E.
- B is not an immediate neighbour of E.

From the above conditions, case-1 gets eliminated because B is not an immediate neighbour of E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: C

18. Questions

Final arrangement:

We have,

- A sits to the third to the left of the one who faces R.
- An odd number of persons sit between P and R.
- P sits third to the right of S.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between A and D is the same persons sits to the left of S.
- C faces the one who sits second to the left of Q.
- Q does not sit to the right of T.

Again, we have,

- B sits exactly between C and E.
- B is not an immediate neighbour of E.

From the above conditions, case-1 gets eliminated because B is not an immediate neighbour of E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: D (Except option d, the rest of the persons are sitting at the extreme end of row)

19. Questions

Final arrangement:

We have,

- A sits to the third to the left of the one who faces R.
- An odd number of persons sit between P and R.
- P sits third to the right of S.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between A and D is the same persons sits to the left of S.
- C faces the one who sits second to the left of Q.
- Q does not sit to the right of T.

Again, we have,

- B sits exactly between C and E.
- B is not an immediate neighbour of E.

From the above conditions, case-1 gets eliminated because B is not an immediate neighbour of E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: A (P faces E and T faces A similarly Q faces B and S faces D)

20. Questions

Final arrangement:

We have,

- A sits to the third to the left of the one who faces R.
- An odd number of persons sit between P and R.
- P sits third to the right of S.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between A and D is the same persons sits to the left of S.
- C faces the one who sits second to the left of Q.
- Q does not sit to the right of T.

Again, we have,

- B sits exactly between C and E.
- B is not an immediate neighbour of E.

From the above conditions, case-1 gets eliminated because B is not an immediate neighbour of E, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: C

21. Questions

Final arrangement:

$T > P(85\text{kg}) > V > R > Q > S(59\text{kg}) > U$

- V is heavier than R but lighter than P. ($P > V > R$)
- S is lighter than Q. ($S < Q$)
- T is heavier than both V and U. ($T > V, U$)
- Q is lighter than R but heavier than U. ($U < Q < R$)
- As many persons heavier than T is the same as lighter than U.
- The weights of the one who is the second heaviest and the second lightest persons are 85kg and 59kg respectively.
- T is not the second heaviest.

By combining these statements, we get the order.

$T > P(85\text{kg}) > V > R > Q > S(59\text{kg}) > U$

Answer: B

22. Questions

Final arrangement:

$T > P(85\text{kg}) > V > R > Q > S(59\text{kg}) > U$

- V is heavier than R but lighter than P. ($P > V > R$)
- S is lighter than Q. ($S < Q$)
- T is heavier than both V and U. ($T > V, U$)
- Q is lighter than R but heavier than U. ($U < Q < R$)
- As many persons heavier than T is the same as lighter than U.
- The weights of the one who is the second heaviest and the second lightest persons are 85kg and 59kg respectively.
- T is not the second heaviest.

By combining these statements, we get the order.

$$T > P(85\text{kg}) > V > R > Q > S(59\text{kg}) > U$$

Answer: D

The different between the weights of Q and P is 12kg,

$$P=85\text{kg}$$

$$Q=73\text{kg}$$

The possible weight of V($85 > V > 73$) is 78kg

23. Questions

Final arrangement:

$$T > P(85\text{kg}) > V > R > Q > S(59\text{kg}) > U$$

- V is heavier than R but lighter than P. ($P > V > R$)
- S is lighter than Q. ($S < Q$)
- T is heavier than both V and U. ($T > V, U$)
- Q is lighter than R but heavier than U. ($U < Q < R$)
- As many persons heavier than T is the same as lighter than U.
- The weights of the one who is the second heaviest and the second lightest persons are 85kg and 59kg respectively.
- T is not the second heaviest.

By combining these statements, we get the order.

$$T > P(85\text{kg}) > V > R > Q > S(59\text{kg}) > U$$

Answer: C

U is 23kg lighter than S,

$$S=59$$

$$U=36$$

The sum of the weights of P and S

$$P=85$$

$$P+S=85+59=144\text{kg}$$

The sum of the weights of P and S is divided by the the weight of the lightest person

$$U=36$$

$$144/36=4$$

24. Questions

Final arrangement:

$$J > F/G > F/G > H > D(10) > E > I$$

- F buys less pens than J but more pens than E. ($E < F < J$)

- D buys more pens than only two persons. ($_ > _ > _ > _ > D > _ > _$)
- G buys 5 more pens than E but less than J. ($J > G > E$)
- H buys more pens than D, who buys 10 pens. ($H > D$)
- The number of persons buying more pens than H is **three more than** the number of persons buying less than I.

By combining these statements, we get the order.

$$J > F/G > F/G > H > D(10) > E > I$$

Answer: E

25. Questions

Final arrangement:

$$J > F/G > F/G > H > D(10) > E > I$$

- F buys less pens than J but more pens than E. ($E < F < J$)
- D buys more pens than only two persons. ($_ > _ > _ > _ > D > _ > _$)
- G buys 5 more pens than E but less than J. ($J > G > E$)
- H buys more pens than D, who buys 10 pens. ($H > D$)
- The number of persons buying more pens than H is **three more than** the number of persons buying less than I.

By combining these statements, we get the order.

$$J > F/G > F/G > H > D(10) > E > I$$

Answer: C

G buys 4 pens more than D

$$D=10$$

$$G=14$$

G buys 5 more pens than E

$$E=9$$

E buys 7 pens less than F

$$F=16$$

$$\text{Total} = G + F + E = 14 + 16 + 9 = 39$$

$$39/3 = 13$$

The average number of pens buy by G, F, and E is 13

26. Questions

Answer: D

$$R \leq M \geq J \geq I > D; P \leq H \leq X \geq T = J$$

I). $X > D$ ($X \geq T = J \geq I > D$) -> True

II). $P \leq M$ ($P \leq H \leq X \geq T = J \leq M$) -> False

27. Questions**Answer: A** $L > O \geq N = K \leq Y; C = T \geq L \leq A \leq X$ **I). $C \geq N$ ($C = T \geq L > O \geq N$) -> False****II). $K < X$ ($K = N \leq O < L \leq A \leq X$) -> True****28. Questions****Answer: E** $G \geq J > E \leq F = I; A \leq V \geq E > M \leq Q$ **I). $V > I$ ($V \geq E \leq F = I$) -> False****II). $G > Q$ ($G \geq J > E > M \leq Q$) -> False****29. Questions****Answer: B** $H \geq Z = P \geq V > D; G \leq H \leq Q = B > Y$ **I). $P < Q$ ($P = Z \leq H \leq Q = B$) -> False****II). $Z = B$ ($P = Z \leq H \leq Q = B$) -> False**

But on combining both I and II, both form a complimentary pair

So, either conclusion I or II is true.

30. Questions**Answer: C** $W \leq A = K \leq O > U; S = J > D \geq A > N$ **I). $N < O$ ($N < A = K \leq O$) -> True****II). $S > W$ ($S = J > D \geq A \geq W$) -> True****31. Questions**

Answer: A

32. Questions

Answer: D

The shortest distance between the hostel and the park

Let us take the points of the park, the temple, and the hostel as A, B, and C respectively, forming a right-angled triangle.

Therefore, by the Pythagoras theorem,

$$(AC)^2 = (AB)^2 + (BC)^2 \rightarrow (12)^2 + (5)^2$$

$$AC = \sqrt{(144 + 25)}$$

$$= \sqrt{169}$$

$$AC = 13m$$

33. Questions

Answer: C (Except option c, the rest of the options are at the southeast direction of the home)

34. Questions

Answer: D

35. Questions

Answer: B

$$8+3+4+6+1+5+4+7+6=44$$

Speed=Distance/Time

$$=44/4$$

$$=11 \text{ sec}$$
