

1. Questions

Study the following information carefully and answer the below questions.

Eight persons- R, S, T, U, V, W, X, and Y were born in different years- 1965, 1974, 1976, 1981, 1983, 1988, 1997 and 2002.

Note I: The age of each person is calculated with respect to the year 2025.

Note II: All the persons were born on the same date and same month.

Note III: The age of the person is only in years.

The difference between the age of T and W is 9, where T was born in 1974. An odd number of persons were born between T and Y. The age of Y is a prime number and was born immediately after S. As many persons born between S and T as between Y and R. The sum of the age of W and U is twice the age of any one of the person. X was born after U. The age of V is not an even number.

In which of the following year V was born based on the final arrangement?

- a. 1965
- b. 1988
- c. 1974
- d. 2002
- e. 1983

2. Questions

What is the sum of the age of Y and W based on the final arrangement?

- a. 65 years
- b. 66 years
- c. 79 years
- d. 52 years
- e. 80 years

3. Questions

Which of the following person was not born in an odd-numbered year?

I). R

II). V

III). S

- a. Only II
- b. Only II and III

- c. Only III
- d. Only I and II
- e. Only I

4. Questions

Who among the following person was born in 1965 based on the final arrangement?

- a. T
- b. The one who was born immediately before S
- c. U
- d. W
- e. None of the above

5. Questions

How many persons were born between R and X based on the final arrangement?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

6. Questions

Study the following information carefully and answer the below questions.

Eight persons viz., J, K, L, M, N, O, P and Q are sitting around a rectangular table in such a way that four of them are sitting at the corners and facing the centre while four of them are sitting in the middle of the sides and facing outside(**opposite to the centre**).

K sits second to the right of Q. Two persons sit between K and N, who don't sit adjacent to Q. J sits opposite to M. As many persons sit between J and N as between L and O, when counted from the left of both L and J respectively. O doesn't sit two places away from Q. The one who sits to the immediate left of P doesn't face the centre of the table.

If all the persons are made to sit in alphabetical order from J in an anti-clockwise direction, then how many persons are unchanged in their position (excluding J)?

- a. None
- b. Two
- c. One
- d. Three

e. More than three

7. Questions

Who among the following person sits third to the right of the one who sits to the immediate left of J?

- a. M
- b. The one who sits to the immediate right of Q
- c. P
- d. K
- e. None of the above

8. Questions

Which of the following pair of persons are immediate neighbours?

- a. N and Q
- b. P and K
- c. J and O
- d. Both a) and b)
- e. Both option b) and c)

9. Questions

K, O, L, ____

- a. J
- b. P
- c. N
- d. Q
- e. M

10. Questions

Which of the following statement(s) is/are NOT TRUE with respect to the final arrangement?

I). Q faces K.

II). M sits exactly between P and N.

III). P sits to the immediate right of Q.

- a. Only III
- b. Only I

- c. Only II
- d. Only I and III
- e. Only II and III

11. Questions

Study the following information carefully and answer the below questions.

Nine persons – A, B, C, D, E, F, G, H, and I bought different things viz., TV, AC and Fridge. At least two persons but not more than four persons bought each thing.

A and G bought different things but did not buy a TV. F and I neither bought a TV nor with G. B bought a thing with only one person, but did not buy a TV. C bought with E. The number of persons who bought with E is **one more than** the number of persons bought with G. H didn't buy with F. D bought either Fridge or TV.

How many persons bought TV based on the final arrangement?

- a. Three
- b. Four
- c. Two
- d. Either a) or b)
- e. Either a) or c)

12. Questions

Who among the following person bought with H based on the final arrangement?

- a. The one who bought AC
- b. D
- c. I
- d. B
- e. The one who bought with E

13. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which among the following does not belong to the group?

- a. A
- b. F
- c. G
- d. I

e. D

14. Questions

Which of the following things E bought based on the final arrangement?

- a. Fridge
- b. The one who bought with B
- c. AC
- d. The one that H bought
- e. Both b) and c)

15. Questions

Which of the following combination(s) is/are TRUE based on the final arrangement?

I). C-TV

II). B-AC

III). G-Fridge

- a. Only II
- b. Only II and I
- c. Only III
- d. Only I and III
- e. Only I

16. Questions

Study the following information carefully and answer the below questions.

Six persons - A, B, C, D, E and F—live on three different floors of a three-storey building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered three. Each person likes different fruits—kiwi, apple, grapes, pear, mango, plum.

Note-I: Each floor has two flats, viz., Flat-A and Flat-B, where Flat A is to the west of Flat B.

Note-II: Flat B of floor 2 is immediately above Flat B of floor 1. Similarly, Flat A of floor 3 is immediately above Flat A of floor 2, and so on.

Note-III: The area of each flat on each floor is equal.

Note-IV: Only two persons live on each floor, and only one person lives in each flat.

The one who likes pear lives in flat A of the odd numbered floor. A lives two floors above the one who likes pear and doesn't like grapes. One floor is between C and the one who likes kiwi. The one who likes kiwi lives immediately to the south of the one who likes apple. As many floors between B and the one who likes grapes as between C and the one who likes kiwi, where both B and C live in different flats. The one

who likes mango lives above the one who likes kiwi but on a different flat as C. D lives below E, who doesn't like apple. F doesn't live with the same floor as the one who likes plum.

On which of the following floors and flats does F live?

- a. Floor 1 flat A
- b. Floor 3 flat B
- c. Floor 3 flat A
- d. Floor 1 flat B
- e. Floor 2 flat B

17. Questions

What is the position of A with respect to the one who likes kiwi?

- a. Two floors below
- b. Two floors above
- c. One floors above
- d. One floors below
- e. Either a) or c)

18. Questions

No one lives to the east of ____.

- a. A
- b. E
- c. The one who likes kiwi
- d. The one who likes mango
- e. None of the above

19. Questions

Which of the following pairs of persons are living on the same floor?

I). F and the one who likes grapes.

II). E and F.

III). The one who likes pear and D.

- a. Only II
- b. Only II and I
- c. Only III

- d. Only II and III
- e. Only I

20. Questions

How many floors are there above the one who likes mango?

- a. Two
- b. One
- c. As many floors are above C
- d. As many floors are below F
- e. Both option b) and d)

21. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements:

No history is science.

Only a few mathematics is history.

Only a few sciences are biology.

Conclusions:

I). Some mathematics is not science.

II). At least some history is biology.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

22. Questions

Statements:

Only a few clouds are blue.

Some gardens are green.

No blue is green.

Conclusions:

I). All green may be clouds.

II). Some gardens are not blue.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

23. Questions

Statements:

All variables are definite.

Only a few variables are numbers.

All numbers are constant.

Conclusions:

I). No constant being variable is a possibility.

II). Some numbers are definite.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

24. Questions

Statements:

Only a few snakes are dogs.

No tigers are cats.

Only a few cats are dogs.

Conclusions:

I). No tigers are snakes.

II). Some snakes are tigers.

- a. Only conclusion II follows
- b. Only conclusion I follows

- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

25. Questions

Statements:

Only a few ice creams are chocolate.

Only black currant is black berry.

Some ice creams are black currant.

Conclusions:

I). Some black berries can be ice cream.

II). No black currant is chocolate.

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Either conclusion I or II follows
- d. Neither conclusion I nor II follows
- e. Both conclusions I and II follow

26. Questions

Study the following information carefully and answer the below questions.

If all the digits of the number “57816954329” are arranged in descending order from left to right, then how many digits will remain unchanged in its position?

- a. Three
- b. Four
- c. Six
- d. Five
- e. More than six

27. Questions

How many pairs of letters are there in the word “CHALLENGE” each of which has as many letters between them as in the English alphabetical series in both forward and backward directions?

- a. None
- b. One

- c. Two
- d. Three
- e. More than three

28. Questions

If all the digits of the number “251748361” are arranged in ascending order from the left end, then what is the cube value of the fourth digit from the left end?

- a. 64
- b. 27
- c. 125
- d. 216
- e. 8

29. Questions

If all the consonants in the word “RESPONSIBILITY” are changed to the immediate next letter and the vowels remain unchanged in the alphabetical series, then how many vowels are there after the changes?

- a. Four
- b. Seven
- c. Six
- d. Five
- e. More than seven

30. Questions

If in the number “72913864593”, 1 is subtracted from all the digits, then all the digits are arranged in descending order from the left end, then which of the following digit will be fifth from the right end?

- a. 3
- b. 2
- c. 5
- d. 6
- e. None of the above

31. Questions

Study the following information carefully and answer the below questions.

K is the paternal uncle of H, who is the aunt of P. J is the brother-in-law of A, who is the son-in-law of C. H is the only daughter of V, who is the grandfather of B. C is the sister-in-law of K, who is unmarried. A is the father of B and has no siblings. V has only two children. P is the son of J. H has only one child, who is not the male member of the family. K has only one sibling.

How many male members are there in the family?

- a. Four
- b. Two
- c. Five
- d. Three
- e. More than five

32. Questions

How is J related to V based on the final arrangement?

- a. Son
- b. Brother
- c. Son-in-law
- d. Uncle
- e. Cannot be determined

33. Questions

In which of the following options the first person is the spouse of the second person?

I). VK

II). AH

III). HJ

- a. Only I
- b. Only II
- c. Only III
- d. Only I and III
- e. Only II and III

34. Questions

Study the following information carefully and answer the below questions.

Y is the only daughter K and is an unmarried person. R is the son of W. T is the paternal grandmother of R, who is the nephew of Y. W has only one sibling and is the father-in-law of M. Q is the daughter-in-law

of K and has only one child.

How is Q related to W based on the final arrangement?

- a. Mother
- b. Sister
- c. Wife
- d. Grandmother
- e. Aunt

35. Questions

If G is married to Y, then how is G related to K?

- a. Son-in-law
- b. Cousin
- c. Brother-in-law
- d. Brother
- e. Cannot be determined

36. Questions

Study the following information carefully and answer the below questions.

Seven persons-L, M, N, O, P, Q and R are of different heights.

N is taller than R but shorter than L, who is not the tallest person. P is taller than both Q and M. O is shorter than N but taller than Q. The number of persons taller than P is **two less than** the number of persons shorter than M. The height of M is 7cm more than R, who is the second shortest. The height of the tallest person is 176cm.

How many persons are shorter than O?

- a. One
- b. Two
- c. Three
- d. More than three
- e. Cannot be determined

37. Questions

If the height of R is 157cm, then what is the possible height of O?

- a. 169 cm
- b. 164 cm

- c. 158 cm
- d. 161 cm
- e. 148 cm

38. Questions

If the difference between the heights of M and P is 15cm, then what is the ratio of the heights of P and R respectively?

- a. 11:10
- b. 7:8
- c. 16:15
- d. 8:7
- e. Cannot be determined

39. Questions

Study the following information carefully and answer the below questions.

Seven persons-A, B, C, D, E, F and G bought a different number of pencils.

Only two persons bought more pencils than G. D bought more pencils than F but less than C. A bought less pencils than both D and E. B bought more pencils than G but did not buy the highest number of pencils. As many persons bought more pencils than B as less than A. D bought 2 pencils more than E.

How many persons bought more pencils than E?

- a. Two
- b. Three
- c. Four
- d. Five
- e. Cannot be determined

40. Questions

If F bought 6 pencils and the average number of pencils bought by E, D, and F is 10. Then what is the possible number of pencils bought by B?

- a. 11
- b. 17
- c. 13
- d. 14
- e. 12

Explanations:

1. Questions

Final arrangement:

Years	Age	Persons
1965	60	U
1974	51	T
1976	49	R
1981	44	X
1983	42	W
1988	37	V
1997	28	S
2002	23	Y

We have,

- The difference between the age of T and W is 9, where T was born in 1974.
- An odd number of persons were born between T and Y.
- The age of Y is a prime number and was born immediately after S.

From the above conditions, there are three possibilities.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	
1974	51	T	T	T
1976	49			
1981	44			
1983	42	S		W
1988	37	Y		
1997	28		S	S
2002	23		Y	Y

Again, we have,

- As many persons born between S and T as between Y and R.
- The sum of the age of W and U is twice the age of any one of the person.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44			
1983	42	S	U	W
1988	37	Y		
1997	28	U	S	S
2002	23		Y	Y

Again, we have,

- X was born after U.
- The age of V is not an even number.

From the above conditions, case-1 and case-1a gets eliminated because, “the age of V is not an even number”, which is not satisfied.

Hence, case-2 shows the final arrangement.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44	V	V	X
1983	42	S	U	W
1988	37	Y	X	V
1997	28	U	S	S
2002	23	X	Y	Y

Answer: B

2. Questions

Final arrangement:

Years	Age	Persons
1965	60	U
1974	51	T
1976	49	R
1981	44	X
1983	42	W
1988	37	V
1997	28	S
2002	23	Y

We have,

- The difference between the age of T and W is 9, where T was born in 1974.
- An odd number of persons were born between T and Y.
- The age of Y is a prime number and was born immediately after S.

From the above conditions, there are three possibilities.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	
1974	51	T	T	T
1976	49			
1981	44			
1983	42	S		W
1988	37	Y		
1997	28		S	S
2002	23		Y	Y

Again, we have,

- As many persons born between S and T as between Y and R.
- The sum of the age of W and U is twice the age of any one of the person.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44			
1983	42	S	U	W
1988	37	Y		
1997	28	U	S	S
2002	23		Y	Y

Again, we have,

- X was born after U.
- The age of V is not an even number.

From the above conditions, case-1 and case-1a gets eliminated because, “the age of V is not an even number”, which is not satisfied.

Hence, case-2 shows the final arrangement.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44	V	V	X
1983	42	S	U	W
1988	37	Y	X	V
1997	28	U	S	S
2002	23	X	Y	Y

Answer: A

3. Questions

Final arrangement:

Years	Age	Persons
1965	60	U
1974	51	T
1976	49	R
1981	44	X
1983	42	W
1988	37	V
1997	28	S
2002	23	Y

We have,

- The difference between the age of T and W is 9, where T was born in 1974.

- An odd number of persons were born between T and Y.
- The age of Y is a prime number and was born immediately after S.

From the above conditions, there are three possibilities.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	
1974	51	T	T	T
1976	49			
1981	44			
1983	42	S		W
1988	37	Y		
1997	28		S	S
2002	23		Y	Y

Again, we have,

- As many persons born between S and T as between Y and R.
- The sum of the age of W and U is twice the age of any one of the person.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44			
1983	42	S	U	W
1988	37	Y		
1997	28	U	S	S
2002	23		Y	Y

Again, we have,

- X was born after U.
- The age of V is not an even number.

From the above conditions, case-1 and case-1a gets eliminated because, “the age of V is not an even number”, which is not satisfied.

Hence, case-2 shows the final arrangement.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44	V	V	X
1983	42	S	U	W
1988	37	Y	X	V
1997	28	U	S	S
2002	23	X	Y	Y

Answer: D

4. Questions

Final arrangement:

Years	Age	Persons
1965	60	U
1974	51	T
1976	49	R
1981	44	X
1983	42	W
1988	37	V
1997	28	S
2002	23	Y

We have,

- The difference between the age of T and W is 9, where T was born in 1974.

- An odd number of persons were born between T and Y.
- The age of Y is a prime number and was born immediately after S.

From the above conditions, there are three possibilities.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	
1974	51	T	T	T
1976	49			
1981	44			
1983	42	S		W
1988	37	Y		
1997	28		S	S
2002	23		Y	Y

Again, we have,

- As many persons born between S and T as between Y and R.
- The sum of the age of W and U is twice the age of any one of the person.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44			
1983	42	S	U	W
1988	37	Y		
1997	28	U	S	S
2002	23		Y	Y

Again, we have,

- X was born after U.
- The age of V is not an even number.

From the above conditions, case-1 and case-1a gets eliminated because, “the age of V is not an even number”, which is not satisfied.

Hence, case-2 shows the final arrangement.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44	V	V	X
1983	42	S	U	W
1988	37	Y	X	V
1997	28	U	S	S
2002	23	X	Y	Y

Answer: C

5. Questions

Final arrangement:

Years	Age	Persons
1965	60	U
1974	51	T
1976	49	R
1981	44	X
1983	42	W
1988	37	V
1997	28	S
2002	23	Y

We have,

- The difference between the age of T and W is 9, where T was born in 1974.

- An odd number of persons were born between T and Y.
- The age of Y is a prime number and was born immediately after S.

From the above conditions, there are three possibilities.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	
1974	51	T	T	T
1976	49			
1981	44			
1983	42	S		W
1988	37	Y		
1997	28		S	S
2002	23		Y	Y

Again, we have,

- As many persons born between S and T as between Y and R.
- The sum of the age of W and U is twice the age of any one of the person.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44			
1983	42	S	U	W
1988	37	Y		
1997	28	U	S	S
2002	23		Y	Y

Again, we have,

- X was born after U.
- The age of V is not an even number.

From the above conditions, case-1 and case-1a gets eliminated because, “the age of V is not an even number”, which is not satisfied.

Hence, case-2 shows the final arrangement.

		Case-1	Case-1a	Case-2
Years	Age	Persons	Persons	Persons
1965	60	W	W	U
1974	51	T	T	T
1976	49	R	R	R
1981	44	V	V	X
1983	42	S	U	W
1988	37	Y	X	V
1997	28	U	S	S
2002	23	X	Y	Y

Answer: A

6. Questions

Final arrangement:

We have,

- K sits second to the right of Q.
- Two persons sit between K and N, who don't sit adjacent to Q.

From the above conditions, there are two possibilities.

Again, we have,

- J sits opposite to M.
- As many persons sit between J and N as between L and O when counted from the left of both L and J respectively.
- O doesn't sit two places away from Q.

Again, we have,

- The one who sits to the immediate left of P doesn't face the centre of the table.

From the above conditions, case-1 gets eliminated because "the one who sits to the immediate left of P doesn't face the centre of the table", which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: C (After arrangement, only one person remain unchanged : K)

7. Questions

Final arrangement:

We have,

- K sits second to the right of Q.
- Two persons sit between K and N, who don't sit adjacent to Q.

From the above conditions, there are two possibilities.

Again, we have,

- J sits opposite to M.
- As many persons sit between J and N as between L and O when counted from the left of both L and J respectively.
- O doesn't sit two places away from Q.

Again, we have,

- The one who sits to the immediate left of P doesn't face the centre of the table.

From the above conditions, case-1 gets eliminated because “the one who sits to the immediate left of P doesn't face the centre of the table”, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: A

8. Questions

Final arrangement:

We have,

- K sits second to the right of Q.
- Two persons sit between K and N, who don't sit adjacent to Q.

From the above conditions, there are two possibilities.

Again, we have,

- J sits opposite to M.
- As many persons sit between J and N as between L and O when counted from the left of both L and J respectively.
- O doesn't sit two places away from Q.

Again, we have,

- The one who sits to the immediate left of P doesn't face the centre of the table.

From the above conditions, case-1 gets eliminated because "the one who sits to the immediate left of P doesn't face the centre of the table", which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: E

9. Questions

Final arrangement:

We have,

- K sits second to the right of Q.
- Two persons sit between K and N, who don't sit adjacent to Q.

From the above conditions, there are two possibilities.

Again, we have,

- J sits opposite to M.
- As many persons sit between J and N as between L and O when counted from the left of both L and J respectively.
- O doesn't sit two places away from Q.

Again, we have,

- The one who sits to the immediate left of P doesn't face the centre of the table.

From the above conditions, case-1 gets eliminated because "the one who sits to the immediate left of P doesn't face the centre of the table", which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: D (All persons sit in the middle of the table)

10. Questions

Final arrangement:

We have,

- K sits second to the right of Q.
- Two persons sit between K and N, who don't sit adjacent to Q.

From the above conditions, there are two possibilities.

Again, we have,

- J sits opposite to M.
- As many persons sit between J and N as between L and O when counted from the left of both L and J respectively.
- O doesn't sit two places away from Q.

Again, we have,

- The one who sits to the immediate left of P doesn't face the centre of the table.

From the above conditions, case-1 gets eliminated because “the one who sits to the immediate left of P doesn't face the centre of the table”, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: B

11. Questions

Final arrangement:

Things	TV	AC	Fridge
Persons	C, E, H	G, B	A, F, I, D

We have,

- A and G bought different things but did not buy a TV.
- F and I neither bought a TV nor with G.

From the above conditions, there are two possibilities.

	Things	TV	AC	Fridge
Case-1	Persons		A, F, I	G
Case-2	Persons		G	A, F, I

Again, we have,

- B bought a thing with only one person, but did not buy a TV.
- C bought with E.
- The number of persons bought with E is **one more than** the number of persons bought with G.

	Things	TV	AC	Fridge
Case-1	Persons	C, E	A, F, I	G, B
Case-2	Persons	C, E	G, B	A, F, I

Again, we have,

- H didn't buy with F.
- D bought either Fridge or TV.

From the above conditions, case-1 gets eliminated because “D bought either Fridge or TV”, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Things	TV	AC	Fridge
Case-1	Persons	C, E, H	A, F, I, D	G, B
Case-2	Persons	C, E, H	G, B	A, F, I, D

Answer: A

12. Questions

Final arrangement:

Things	TV	AC	Fridge
Persons	C, E, H	G, B	A, F, I, D

We have,

- A and G bought different things but did not buy a TV.
- F and I neither bought a TV nor with G.

From the above conditions, there are two possibilities.

	Things	TV	AC	Fridge
Case-1	Persons		A, F, I	G
Case-2	Persons		G	A, F, I

Again, we have,

- B bought a thing with only one person, but did not buy a TV.
- C bought with E.
- The number of persons bought with E is **one more than** the number of persons bought with G.

	Things	TV	AC	Fridge
Case-1	Persons	C, E	A, F, I	G, B
Case-2	Persons	C, E	G, B	A, F, I

Again, we have,

- H didn't buy with F.
- D bought either Fridge or TV.

From the above conditions, case-1 gets eliminated because "D bought either Fridge or TV", which is not satisfied.

Hence, case-2 shows the final arrangement.

	Things	TV	AC	Fridge
Case-1	Persons	C, E, H	A, F, I, D	G, B
Case-2	Persons	C, E, H	G, B	A, F, I, D

Answer: E

13. Questions

Final arrangement:

Things	TV	AC	Fridge
Persons	C, E, H	G, B	A, F, I, D

We have,

- A and G bought different things but did not buy a TV.
- F and I neither bought a TV nor with G.

From the above conditions, there are two possibilities.

	Things	TV	AC	Fridge
Case-1	Persons		A, F, I	G
Case-2	Persons		G	A, F, I

Again, we have,

- B bought a thing with only one person, but did not buy a TV.
- C bought with E.
- The number of persons bought with E is **one more than** the number of persons bought with G.

	Things	TV	AC	Fridge
Case-1	Persons	C, E	A, F, I	G, B
Case-2	Persons	C, E	G, B	A, F, I

Again, we have,

- H didn't buy with F.
- D bought either Fridge or TV.

From the above conditions, case-1 gets eliminated because "D bought either Fridge or TV", which is not satisfied.

Hence, case-2 shows the final arrangement.

	Things	TV	AC	Fridge
Case-1	Persons	C, E, H	A, F, I, D	G, B
Case-2	Persons	C, E, H	G, B	A, F, I, D

Answer: C (All persons bought Fridge except option C)

14. Questions

Final arrangement:

Things	TV	AC	Fridge
Persons	C, E, H	G, B	A, F, I, D

We have,

- A and G bought different things but did not buy a TV.
- F and I neither bought a TV nor with G.

From the above conditions, there are two possibilities.

	Things	TV	AC	Fridge
Case-1	Persons		A, F, I	G
Case-2	Persons		G	A, F, I

Again, we have,

- B bought a thing with only one person, but did not buy a TV.
- C bought with E.
- The number of persons bought with E is **one more than** the number of persons bought with G.

	Things	TV	AC	Fridge
Case-1	Persons	C, E	A, F, I	G, B
Case-2	Persons	C, E	G, B	A, F, I

Again, we have,

- H didn't buy with F.
- D bought either Fridge or TV.

From the above conditions, case-1 gets eliminated because "D bought either Fridge or TV", which is not satisfied.

Hence, case-2 shows the final arrangement.

	Things	TV	AC	Fridge
Case-1	Persons	C, E, H	A, F, I, D	G, B
Case-2	Persons	C, E, H	G, B	A, F, I, D

Answer: D

15. Questions

Final arrangement:

Things	TV	AC	Fridge
Persons	C, E, H	G, B	A, F, I, D

We have,

- A and G bought different things but did not buy a TV.
- F and I neither bought a TV nor with G.

From the above conditions, there are two possibilities.

	Things	TV	AC	Fridge
Case-1	Persons		A, F, I	G
Case-2	Persons		G	A, F, I

Again, we have,

- B bought a thing with only one person, but did not buy a TV.
- C bought with E.

- The number of persons bought with E is **one more than** the number of persons bought with G.

	Things	TV	AC	Fridge
Case-1	Persons	C, E	A, F, I	G, B
Case-2	Persons	C, E	G, B	A, F, I

Again, we have,

- H didn't buy with F.
- D bought either Fridge or TV.

From the above conditions, case-1 gets eliminated because "D bought either Fridge or TV", which is not satisfied.

Hence, case-2 shows the final arrangement.

	Things	TV	AC	Fridge
Case-1	Persons	C, E, H	A, F, I, D	G, B
Case-2	Persons	C, E, H	G, B	A, F, I, D

Answer: B

16. Questions

Final arrangement:

Floors	Flat A	Flat B
3	A(plum)	C(grapes)
2	E(mango)	F(apple)
1	B(pear)	D(kiwi)

We have,

- The one who likes pear lives in flat A of the odd numbered floor.
- A lives two floors above the one who likes pear and doesn't like grapes.

From the above conditions, there are two possibilities.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A			A
2				
1	(pear)		(pear)	

Again, we have,

- One floor gap between C and the one who likes kiwi.
- The one who likes kiwi lives immediately to the south of the one who likes apple.
- As many floors between B and the one who likes grapes as between C and the one who likes kiwi, where both B and C live in different flats.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A	C(grapes)	C(grapes)	A
2		(apple)		(apple)
1	B(pear)	(kiwi)	(pear)	B(kiwi)

Again, we have,

- The one who likes mango lives above the one who likes kiwi but on a different flat as C.
- D lives below E who doesn't like apple.
- F doesn't live with the one who likes plum.

From the above conditions, case-2 gets eliminated because "F doesn't live with the one who likes plum", which is not satisfied.

Hence, case-1 shows the final arrangement.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A(plum)	C(grapes)	C(grapes)	A(mango)
2	E(mango)	F(apple)	E(plum)	F(apple)
1	B(pear)	D(kiwi)	B(pear)	D(kiwi)

Answer: E

17. Questions

Final arrangement:

Floors	Flat A	Flat B
3	A(plum)	C(grapes)
2	E(mango)	F(apple)
1	B(pear)	D(kiwi)

We have,

- The one who likes pear lives in flat A of the odd numbered floor.
- A lives two floors above the one who likes pear and doesn't like grapes.

From the above conditions, there are two possibilities.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A			A
2				
1	(pear)		(pear)	

Again, we have,

- One floor gap between C and the one who likes kiwi.
- The one who likes kiwi lives immediately to the south of the one who likes apple.
- As many floors between B and the one who likes grapes as between C and the one who likes kiwi, where both B and C live in different flats.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A	C(grapes)	C(grapes)	A
2		(apple)		(apple)
1	B(pear)	(kiwi)	(pear)	B(kiwi)

Again, we have,

- The one who likes mango lives above the one who likes kiwi but on a different flat as C.
- D lives below E who doesn't like apple.
- F doesn't live with the one who likes plum.

From the above conditions, case-2 gets eliminated because "F doesn't live with the one who likes plum", which is not satisfied.

Hence, case-1 shows the final arrangement.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A(plum)	C(grapes)	C(grapes)	A(mango)
2	E(mango)	F(apple)	E(plum)	F(apple)
1	B(pear)	D(kiwi)	B(pear)	D(kiwi)

Answer: B

18. Questions

Final arrangement:

Floors	Flat A	Flat B
3	A(plum)	C(grapes)
2	E(mango)	F(apple)
1	B(pear)	D(kiwi)

We have,

- The one who likes pear lives in flat A of the odd numbered floor.
- A lives two floors above the one who likes pear and doesn't like grapes.

From the above conditions, there are two possibilities.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A			A
2				
1	(pear)		(pear)	

Again, we have,

- One floor gap between C and the one who likes kiwi.
- The one who likes kiwi lives immediately to the south of the one who likes apple.
- As many floors between B and the one who likes grapes as between C and the one who likes kiwi, where both B and C live in different flats.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A	C(grapes)	C(grapes)	A
2		(apple)		(apple)
1	B(pear)	(kiwi)	(pear)	B(kiwi)

Again, we have,

- The one who likes mango lives above the one who likes kiwi but on a different flat as C.
- D lives below E who doesn't like apple.
- F doesn't live with the one who likes plum.

From the above conditions, case-2 gets eliminated because "F doesn't live with the one who likes plum", which is not satisfied.

Hence, case-1 shows the final arrangement.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A(plum)	C(grapes)	C(grapes)	A(mango)
2	E(mango)	F(apple)	E(plum)	F(apple)
1	B(pear)	D(kiwi)	B(pear)	D(kiwi)

Answer: C (All persons live on the odd numbered floor)

19. Questions

Final arrangement:

Floors	Flat A	Flat B
3	A(plum)	C(grapes)
2	E(mango)	F(apple)
1	B(pear)	D(kiwi)

We have,

- The one who likes pear lives in flat A of the odd numbered floor.
- A lives two floors above the one who likes pear and doesn't like grapes.

From the above conditions, there are two possibilities.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A			A
2				
1	(pear)		(pear)	

Again, we have,

- One floor gap between C and the one who likes kiwi.
- The one who likes kiwi lives immediately to the south of the one who likes apple.
- As many floors between B and the one who likes grapes as between C and the one who likes kiwi, where both B and C live in different flats.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A	C(grapes)	C(grapes)	A
2		(apple)		(apple)
1	B(pear)	(kiwi)	(pear)	B(kiwi)

Again, we have,

- The one who likes mango lives above the one who likes kiwi but on a different flat as C.
- D lives below E who doesn't like apple.
- F doesn't live with the one who likes plum.

From the above conditions, case-2 gets eliminated because "F doesn't live with the one who likes plum", which is not satisfied.

Hence, case-1 shows the final arrangement.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A(plum)	C(grapes)	C(grapes)	A(mango)
2	E(mango)	F(apple)	E(plum)	F(apple)
1	B(pear)	D(kiwi)	B(pear)	D(kiwi)

Answer: D

20. Questions

Final arrangement:

Floors	Flat A	Flat B
3	A(plum)	C(grapes)
2	E(mango)	F(apple)
1	B(pear)	D(kiwi)

We have,

- The one who likes pear lives in flat A of the odd numbered floor.
- A lives two floors above the one who likes pear and doesn't like grapes.

From the above conditions, there are two possibilities.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A			A
2				
1	(pear)		(pear)	

Again, we have,

- One floor gap between C and the one who likes kiwi.
- The one who likes kiwi lives immediately to the south of the one who likes apple.
- As many floors between B and the one who likes grapes as between C and the one who likes kiwi, where both B and C live in different flats.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A	C(grapes)	C(grapes)	A
2		(apple)		(apple)
1	B(pear)	(kiwi)	(pear)	B(kiwi)

Again, we have,

- The one who likes mango lives above the one who likes kiwi but on a different flat as C.
- D lives below E who doesn't like apple.
- F doesn't live with the one who likes plum.

From the above conditions, case-2 gets eliminated because "F doesn't live with the one who likes plum", which is not satisfied.

Hence, case-1 shows the final arrangement.

Floors	Case-1		Case-2	
	Flat A	Flat B	Flat A	Flat B
3	A(plum)	C(grapes)	C(grapes)	A(mango)
2	E(mango)	F(apple)	E(plum)	F(apple)
1	B(pear)	D(kiwi)	B(pear)	D(kiwi)

Answer: E

21. Questions

Answer: B

I). Some mathematics is not science - Here, there is no direct relation between mathematics and science. But some parts of mathematics, which are associated with history, are definitely not connected with science. Hence, the conclusion follows.

II). At least some history is biology - Here, there is no direct relation between history and biology. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

22. Questions

Answer: E

I). All green may be clouds - Here, there is no direct relation between green and clouds. So, all the possible conclusions between them are true. Hence, the conclusion follows.

II). Some gardens are not blue - Here, there is no direct relation between gardens and blue. But some parts of gardens, which are associated with green, are definitely not connected with blue. Hence, the conclusion follows.

23. Questions

Answer: A

I). No constant being variable is a possibility - Here, there is no direct relation between constant and variable. But some parts of constant, which are associated with number, are definitely connected with variable. Hence, the conclusion does not follow.

II). Some numbers are definite - Here, there is no direct relation between numbers and definite. But some parts of numbers, which are associated with variables, are definitely connected with definite. Hence, the conclusion follows.

24. Questions

Answer: C

I). No tigers are snakes - Here, there is no direct relation between tigers and snakes. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). Some snakes are tigers - Here, there is no direct relation between tigers and snakes. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

But, by combining both conclusions I and II, we can say either I or II follows.

25. Questions

Answer: D

I). Some black berries can be ice cream - Here, there is no direct relation between black berries and ice creams but the black berries don't connect with anyone other than black currant. Hence, the conclusion does not follow.

II). No black currant is chocolate - Here, there is direct relation of some between black currant and chocolate. So, the relation of no between them is false. Hence, the conclusion does not follow.

26. Questions

Answer: C

57816954329

99876554321

27. Questions

Answer: D

28. Questions

Answer: B

251748361

112345678

$$3^3 = 27$$

29. Questions

Answer: B

RESPONSIBILITY

SETQOOTICIMIUZ

30. Questions

Answer: A

72913864593

1 is subtracted from all the digits

61802753482

All the digits are arranged in descending order from the left end

88765432210

31. Questions

Answer: C

32. Questions

Answer: A

33. Questions

Answer: B

34. Questions

Answer: C

35. Questions

Answer: A

36. Questions

Final arrangement:

$P(176\text{cm}) > L > N > O > M > R > Q$

- N is taller than R but shorter than L, who is not the tallest person. ($L > N > R$)
- P is taller than both Q and M. ($P > Q, M$)
- O is shorter than N but taller than Q. ($Q < O < N$)
- The number of persons taller than P is **two less than** the number of persons shorter than M.
- The height of M is 7cm more than R, who is the second shortest.
- The height of the tallest person is 176cm.

By combining these statements, we get the order.

$P(176\text{cm}) > L > N > O > M > R > Q$

Answer: C

37. Questions

Final arrangement:

$P(176\text{cm}) > L > N > O > M > R > Q$

- N is taller than R but shorter than L, who is not the tallest person. ($L > N > R$)
- P is taller than both Q and M. ($P > Q, M$)
- O is shorter than N but taller than Q. ($Q < O < N$)
- The number of persons taller than P is **two less than** the number of persons shorter than M.
- The height of M is 7cm more than R, who is the second shortest.
- The height of the tallest person is 176cm.

By combining these statements, we get the order.

$P(176\text{cm}) > L > N > O > M > R > Q$

Answer: A

The height of R is 157cm,

$R=157\text{cm}$

The height of M is 7cm more than R

$M=164\text{cm}$

The possible height of O ($164 < O$) is 169cm

38. Questions

Final arrangement:

$P(176\text{cm}) > L > N > O > M > R > Q$

- N is taller than R but shorter than L, who is not the tallest person. ($L > N > R$)
- P is taller than both Q and M. ($P > Q, M$)
- O is shorter than N but taller than Q. ($Q < O < N$)
- The number of persons taller than P is **two less than** the number of persons shorter than M.
- The height of M is 7cm more than R, who is the second shortest.
- The height of the tallest person is 176cm.

By combining these statements, we get the order.

$P(176\text{cm}) > L > N > O > M > R > Q$

Answer: D

The difference between the heights of M and P is 15cm,

$M - P = 15\text{cm}$

$P = 176\text{cm}$

$M = 161\text{cm}$

The height of M is 7cm more than R

$R = 154\text{cm}$

The ratio of the heights of P and R is $176:154 \rightarrow 16:14 \rightarrow 8:7$

39. Questions

Final arrangement:

$C > B > G > D > E > A > F$

- Only two persons bought more pencils than G. ($_ > _ > G > _ > _ > _$)
- D bought more pencils than F but less than C. ($C > D > F$)
- A bought less pencils than both D and E. ($D, E > A$)
- B bought more pencils than G but did not buy the highest number of pencils. ($B > G$)
- As many persons bought more pencils than B as less than A.
- D bought 2 pencils more than E. ($D > E$)

By combining these statements, we get the order.

$C > B > G > D > E > A > F$

40. Questions

Final arrangement:

$C > B > G > D > E > A > F$

- Only two persons bought more pencils than G. ($_ > _ > G > _ > _ > _$)

- D bought more pencils than F but less than C. ($C > D > F$)
- A bought less pencils than both D and E. ($D, E > A$)
- B bought more pencils than G but did not buy the highest number of pencils. ($B > G$)
- As many persons bought more pencils than B as less than A.
- D bought 2 pencils more than E. ($D > E$)

By combining these statements, we get the order.

$$C > B > G > D > E > A > F$$

Answer: B

F bought 6 pencils

$$F=6$$

The average number of pencils bought by E, D, and F is 10

$$E+D+F=30$$

D bought 2 pencils more than E

$$E+E+2+6=30$$

$$2E=22$$

$$E=11$$

$$D=13$$

The possible number of pencils bought by B ($14 < B$) is 17
