

1. Questions

Study the following information carefully and answer the given questions below.

Eight persons P, Q, R, S, T, U, V and W live on eight different floors of an eight storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered eight. Only one person lives on each floor.

At most two persons live below R. Only three persons live between R and S. As many persons live above S as below T, who does not live on an odd numbered floor. The floor number of P is two times the floor number of T. Q lives immediately above U, who lives on a prime numbered floor. W lives above V, who does not live on the lowermost floor.

How many people live between V and the person who lives on the third floor?

- a. Two
- b. One
- c. Three
- d. No one
- e. More than three

2. Questions

If all the persons are arranged in alphabetical order from the top most floor to the bottom most floor, then the positions of how many persons will remain unchanged?

- a. Two
- b. One
- c. Three
- d. Four
- e. No one

3. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. U
- b. V
- c. T
- d. P
- e. Q

4. Questions

As many persons live above W as below _____.

- a. The one who lives on third floor
- b. V
- c. R
- d. The one who lives on a second floor
- e. None of these

5. Questions

Which of the following combinations of pairs of persons lives adjacent to each other?

- a. S and T
- b. P and U
- c. R and T
- d. U and V
- e. S and Q

6. Questions

Study the following information carefully and answer the given questions below.

Eight persons viz., P, Q, R, S, T, U, V and W are sitting around a square table in such a way that four of them are sitting at the corners facing inside while four of them are sitting in the middle of the sides facing outside.

Both Q and T sit to the immediate right of each other. U sits third to the left of S, who neither sits at the corner nor sits opposite to W. R sits three persons away from P. Q sits at the corner. Only two persons sit between P and W, who do not sit at the corner.

Who among the following persons sits opposite to the one who sits second to the right of R?

- a. P
- b. W
- c. U
- d. Q
- e. T

7. Questions

What is the position of V with respect to Q, when counted from the right of V?

- a. Fourth to the right
- b. Second to the right

- c. Second to the left
- d. Third to the left
- e. Immediate right

8. Questions

Which among the following pairs of persons sit to the immediate right of each other?

- a. W and P
- b. P and S
- c. S and Q
- d. U and W
- e. V and S

9. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. W
- b. T
- c. U
- d. S
- e. R

10. Questions

If all the persons are made to sit in the alphabetical order from P in the clockwise direction, then how many persons do not change their previous position with respect to the new arrangement (excluding P)?

- a. One
- b. Three
- c. Two
- d. More than three
- e. No one

11. Questions

Study the following information carefully and answer the given questions below.

Seven persons – A, B, C, D, E, F and G went for the seven different classes on seven different days of the same week, starting from Sunday to Saturday. Each of them had different classes viz., Dance, Hindi,

Maths, Music, Chess, Mehndi and Tailoring. Only one person went to the class each day.

Only three persons went between D and the one who went for Hindi class, where neither of them went on the first day nor on the last day. The one who had Music class went immediately before D, who went immediately before the one who had Mehndi class. As many persons went before Mehndi class as after E. F went immediately after the one who had a Tailoring class. F went neither for Hindi class nor on Wednesday. Only two persons went between A and the one who had Dance class. The one who had Dance class went after A but did not go on Wednesday. The number of persons went between B and the one who had Maths class is the same number of persons went between the one who had Maths class and G. G, who went before both B and E.

Who among the following persons went to the class immediately before C?

- a. G
- b. B
- c. The one who had Maths class
- d. The one who had Chess class
- e. D

12. Questions

Who among the following persons went to Dance class?

- a. C
- b. D
- c. B
- d. E
- e. G

13. Questions

How many persons went to the class between B and the one who had Mehndi class?

- a. One
- b. Three
- c. Two
- d. More than three
- e. No one

14. Questions

As many persons went between G and the one who had Mehndi class as between ___ and the one who had _____ class.

- a. E and Music
- b. B and Hindi
- c. D and Tailoring
- d. F and Dance
- e. A and Hindi

15. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. Sunday-A- Hindi
- b. Wednesday-A- Maths
- c. Thursday-E-Chess
- d. Saturday-B-Dance
- e. Tuesday-F-Mehndi

16. Questions

Study the following information carefully and answer the given questions below.

Nine persons L, M, N, O, P, Q, R, S, and T are sitting in a straight line equidistant from each other but not necessarily in the same order. Some of them are facing south while some are facing north. Not more than two adjacent persons face the same direction sitting adjacent to each other.

L sits second from one of the extreme ends. P sits second to the left of L and faces the same direction as L. As many persons sit to the left of P as to the right of T. Two persons sit between O and T. R sits second to the left of O and second to the right of S. Immediate neighbours of R face the opposite direction. The persons sitting at the extreme ends face the opposite direction. Q faces south and more than one person sits between Q and N. N and M face the same direction.

Who among the following person sits second to the right of R?

- a. T
- b. O
- c. S
- d. P
- e. None of these

17. Questions

If one of the neighbors of R is N, who is the second one?

- a. O

- b. M
- c. S
- d. T
- e. Q

18. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. T
- b. S
- c. P
- d. R
- e. Q

19. Questions

As many persons sit between L and R is the same as the persons between ____.

- a. P and O
- b. L and S
- c. M and T
- d. O and S
- e. None of these

20. Questions

How many of the persons are facing the north direction?

- a. Three
- b. Four
- c. Five
- d. Six
- e. Two

21. Questions

In the given questions, the relationship between different elements is shown in the statements followed by two conclusions. Find the conclusion which is definitely true.

Statements

$$D < F \geq M > V ; K \geq G \leq A < M ; G \leq E = U$$
Conclusions**I). $E \geq F$** **II). $U < F$**

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

22. Questions**Statements**
$$L < N = O ; P = R \leq V \leq X ; R \geq N$$
Conclusions**I). $X \geq O$** **II). $P \geq N$**

- a. Only conclusion I is true
- b. Either conclusion I or II is true
- c. Both conclusions I and II are true
- d. Only conclusion II is true
- e. Neither conclusion I nor II is true

23. Questions**Statements**
$$G < Y \leq A ; A \geq B < C ; Z < C > D$$
Conclusions**I). $Z > A$** **II). $G > D$**

- a. Both conclusions I and II are true
- b. Either conclusion I or II is true
- c. Only conclusion II is true
- d. Only conclusion I is true

e. Neither conclusion I nor II is true

24. Questions

Statements

$M \geq H = P > R$; $H \leq J = G$; $K = R > S$

Conclusions

I). $H > K$

II). $M = G$

- a. Both conclusions I and II are true
- b. Either conclusion I or II is true
- c. Only conclusion II is true
- d. Only conclusion I is true
- e. Neither conclusion I nor II is true

25. Questions

Statements

$P < T \geq R$; $M \leq J = R$; $S = Q < M$

Conclusions

I). $T < M$

II). $R > Q$

- a. Only conclusion I is true
- b. Only conclusion II is true
- c. Both conclusions I and II are true
- d. Either conclusion I or II is true
- e. Neither conclusion I nor II is true

26. Questions

Study the following information carefully and answer the given questions below.

A person starts from point A and walks 4 km in the east direction to reach point B. Then, he takes a right turn and walks 3 km to reach point C. He then takes a left turn and walks 4 km, after that he takes a right turn and walks 4 km to reach point D. Then, he takes a left turn and walks 4 km to reach point E. From point E, he walks 7 km in the north direction and reaches point F.

 @QuizByMickey
Click On Me Join Our Backup Group

If point G is 4 km south of point C, then the distance between B and G is equal to _____.

- a. C and D

- b. A and F
- c. F and E
- d. C and E
- e. G and E

27. Questions

What is the direction of A with respect to E?

- a. North
- b. North-West
- c. North-East
- d. South-West
- e. None of these

28. Questions

What is the shortest distance between A and D?

- a. $\sqrt{113}$ km
- b. 15 km
- c. $\sqrt{74}$ km
- d. 12 km
- e. 13 km

29. Questions

Study the following information carefully and answer the given questions below.

Point A is 10m to the west of point B. Point A is 5m to the north of point Q, which is 7m to the west of point D. Point S is 5m to the north of point D. Point F is 12m to the west of point S and 13m to the north of point V, which is 3m to the east of point L.

What is the direction of F with respect to B?

- a. South-East
- b. North
- c. South
- d. West
- e. South-West

30. Questions

Calculate the area enclosed by the points ASDQ ?

- a. 25 m^2
- b. 49 m^2
- c. 91 m^2
- d. 45 m^2
- e. 35 m^2

31. Questions

Study the following information carefully and answer the given questions below.

In a certain code language,

“Smart city mission plan” is coded as “gt ml pq rb”

“Every citizen plays mission” is coded as “pq nq sd tf”

“Citizen feedback improves plan” is coded as “sd vz lm gt”

“Better plays smart city” is coded as “rb ml nq pg”

(Note: All the given codes are two letter codes only)

Which of the following is the word for the code “gt” represented in the given coded language?

- a. Plan
- b. Mission
- c. Plays
- d. Every
- e. Improves

32. Questions

Which of the following is the code for the word “Citizen” represented in the given coded language ?

- a. ml
- b. nq
- c. pg
- d. sd
- e. None of these

33. Questions

If the code for the phrase “Every Feedback” is “tf lm” in the given coded language, then what is

the code for the phrase “Improves planning”?

- a. pq lm
- b. zx nq
- c. rb zx
- d. zx ml
- e. vz zx

34. Questions

Which of the following may be the possible code for the word “Smart Mission” in the given coded language?

- a. pq gt
- b. pq nq
- c. rb pq
- d. sd tf
- e. pq lm

35. Questions

Which of the following is the code for the word “Better” represented in the given coded language ?

- a. pg
- b. nq
- c. ml
- d. vz
- e. rb

36. Questions

Study the following information carefully and answer the given questions.

Z is the only sister of H, who is the sister-in-law of B. B's mother is the grandmother of E, who is married. B is the son-in-law of O, who is the brother-in-law of C. C is the only brother of H's mother. V is the father-in-law of Z, both have only one child.

Four of the following five are alike in a certain way and thus form a group as per the given arrangement. Which of the following does not belong to that group?

- a. V and B's mother
- b. H and O's son-in-law
- c. C's sister and O

- d. Z's child and E's spouse
- e. V's son and H's sister

37. Questions

If Q is the daughter-in-law of B and F is the mother-in-law of Z, then how is E related to F?

- a. Grand daughter
- b. Son-in-law
- c. Nephew
- d. Grandson
- e. Son

38. Questions

If J is the wife of O, then how is J related to B?

- a. Mother-in-law
- b. Sister-in-law
- c. Daughter
- d. Mother
- e. Grandmother

39. Questions

Study the following information carefully and answer the given questions below.

B is the parent of E, who is the only sister of D, who is a male. H is the father-in-law of B, who has only one daughter and one son. F is the only daughter of H, who has only two children. A is the child of J and son-in-law of H. L is the brother-in-law of A. B is not married to F. A has no siblings.

How is F related to J ?

- a. Son-in-law
- b. Daughter
- c. Daughter-in-law
- d. Son
- e. Cannot be determined

40. Questions

How is D related to F?

- a. Brother

- b. Nephew
- c. Son
- d. Niece
- e. Grand daughter

Explanations:

1. Questions

Final arrangement:

Floor Number	Person
8	P
7	W
6	V
5	S
4	T
3	Q
2	U
1	R

We have,

- At most two persons live below R.
- Only three persons live between R and S.

From the above conditions, there are three possibilities:

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			
7	S		
6		S	
5			S
4			
3	R		
2		R	
1			R

Again we have,

- As many persons live above S as below T, who does not live on an odd numbered floor.
- The floor number of P lives is two times the floor number of T.

From the above conditions, Case-2 gets eliminated because as many persons live above S as below T, who does not live on an odd- numbered floor ,which is not satisfied.

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			P
7	S		
6		S	
5			S
4	P		T
3	R	T	
2	T	R	
1			R

Again we have,

- Q lives immediately above U, who lives on a prime numbered floor.
- W lives above V, who does not live on the lowermost floor.

From the above conditions, Case-1 gets eliminated because W lives above V, who does not live on the lowermost floor, which is not satisfied.

Hence Case-3 shows the final arrangement.

Floor Number	Case 1	Case 3
	Person	Person
8	W	P
7	S	W
6	Q	V
5	U	S
4	P	T
3	R	Q
2	T	U
1	V	R

Answer: A

2. Questions

Final arrangement:

Floor Number	Person
8	P
7	W
6	V
5	S
4	T
3	Q
2	U
1	R

We have,

- At most two persons live below R.

- Only three persons live between R and S.

From the above conditions, there are three possibilities:

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			
7	S		
6		S	
5			S
4			
3	R		
2		R	
1			R

Again we have,

- As many persons live above S as below T, who does not live on an odd numbered floor.
- The floor number of P lives is two times the floor number of T.

From the above conditions, Case-2 gets eliminated because as many persons live above S as below T, who does not live on an odd- numbered floor ,which is not satisfied.

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			P
7	S		
6		S	
5			S
4	P		T
3	R	T	
2	T	R	
1			R

Again we have,

- Q lives immediately above U, who lives on a prime numbered floor.
- W lives above V, who does not live on the lowermost floor.

From the above conditions, Case-1 gets eliminated because W lives above V, who does not live on the lowermost floor, which is not satisfied.

Hence Case-3 shows the final arrangement.

Floor Number	Case 1	Case 3
	Person	Person
8	W	P
7	S	W
6	Q	V
5	U	S
4	P	T
3	R	Q
2	T	U
1	V	R

Answer: C

3. Questions

Final arrangement:

Floor Number	Person
8	P
7	W
6	V
5	S
4	T
3	Q
2	U
1	R

We have,

- At most two persons live below R.

- Only three persons live between R and S.

From the above conditions, there are three possibilities:

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			
7	S		
6		S	
5			S
4			
3	R		
2		R	
1			R

Again we have,

- As many persons live above S as below T, who does not live on an odd numbered floor.
- The floor number of P lives is two times the floor number of T.

From the above conditions, Case-2 gets eliminated because as many persons live above S as below T, who does not live on an odd- numbered floor ,which is not satisfied.

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			P
7	S		
6		S	
5			S
4	P		T
3	R	T	
2	T	R	
1			R

Again we have,

- Q lives immediately above U, who lives on a prime numbered floor.
- W lives above V, who does not live on the lowermost floor.

From the above conditions, Case-1 gets eliminated because W lives above V, who does not live on the lowermost floor, which is not satisfied.

Hence Case-3 shows the final arrangement.

Floor Number	Case 1	Case 3
	Person	Person
8	W	P
7	S	W
6	Q	V
5	U	S
4	P	T
3	R	Q
2	T	U
1	V	R

Answer: E (Except option e, the rest of the persons are living on the even numbered floor)

4. Questions

Final arrangement:

Floor Number	Person
8	P
7	W
6	V
5	S
4	T
3	Q
2	U
1	R

We have,

- At most two persons live below R.

- Only three persons live between R and S.

From the above conditions, there are three possibilities:

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			
7	S		
6		S	
5			S
4			
3	R		
2		R	
1			R

Again we have,

- As many persons live above S as below T, who does not live on an odd numbered floor.
- The floor number of P lives is two times the floor number of T.

From the above conditions, Case-2 gets eliminated because as many persons live above S as below T, who does not live on an odd- numbered floor ,which is not satisfied.

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			P
7	S		
6		S	
5			S
4	P		T
3	R	T	
2	T	R	
1			R

Again we have,

- Q lives immediately above U, who lives on a prime numbered floor.
- W lives above V, who does not live on the lowermost floor.

From the above conditions, Case-1 gets eliminated because W lives above V, who does not live on the lowermost floor, which is not satisfied.

Hence Case-3 shows the final arrangement.

Floor Number	Case 1	Case 3
	Person	Person
8	W	P
7	S	W
6	Q	V
5	U	S
4	P	T
3	R	Q
2	T	U
1	V	R

Answer: D

5. Questions

Final arrangement:

Floor Number	Person
8	P
7	W
6	V
5	S
4	T
3	Q
2	U
1	R

We have,

- At most two persons live below R.

- Only three persons live between R and S.

From the above conditions, there are three possibilities:

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			
7	S		
6		S	
5			S
4			
3	R		
2		R	
1			R

Again we have,

- As many persons live above S as below T, who does not live on an odd numbered floor.
- The floor number of P lives is two times the floor number of T.

From the above conditions, Case-2 gets eliminated because as many persons live above S as below T, who does not live on an odd- numbered floor ,which is not satisfied.

Floor Number	Case 1	Case 2	Case 3
	Person	Person	Person
8			P
7	S		
6		S	
5			S
4	P		T
3	R	T	
2	T	R	
1			R

Again we have,

- Q lives immediately above U, who lives on a prime numbered floor.
- W lives above V, who does not live on the lowermost floor.

From the above conditions, Case-1 gets eliminated because W lives above V, who does not live on the lowermost floor, which is not satisfied.

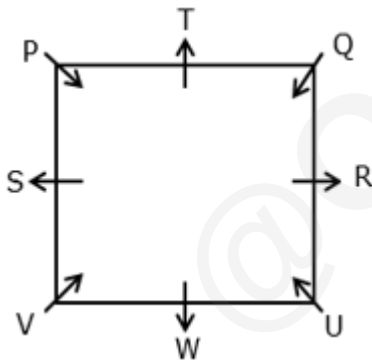

Hence Case-3 shows the final arrangement.

Floor Number	Case 1	Case 3
	Person	Person
8	W	P
7	S	W
6	Q	V
5	U	S
4	P	T
3	R	Q
2	T	U
1	V	R

Answer: A

6. Questions

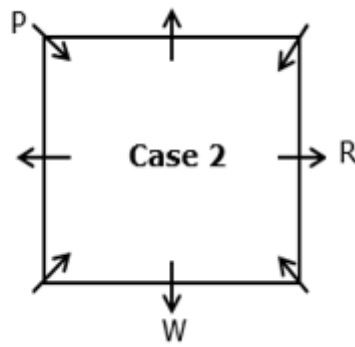

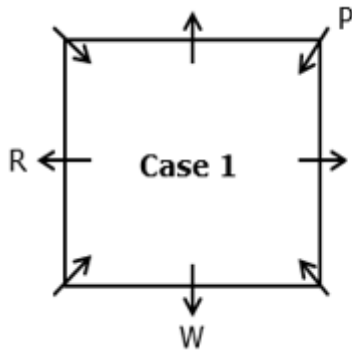

Final arrangement:

We have,

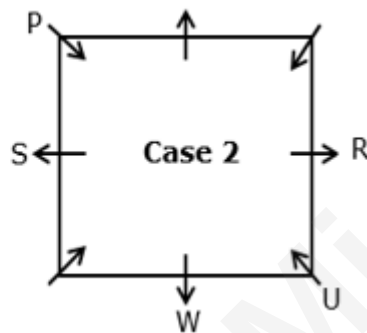

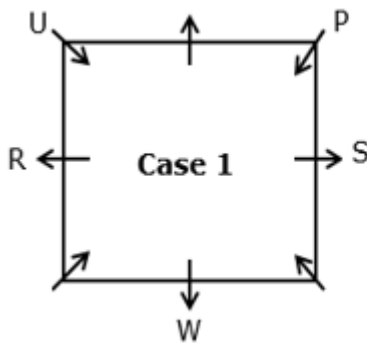

- Only two persons sit between P and W, who do not sit at the corner.
- R sits three persons away from P.

From the above conditions, there are two possibilities:

Again we have,

- U sits third to the left of S, who neither sits at the corner nor sits opposite to W.

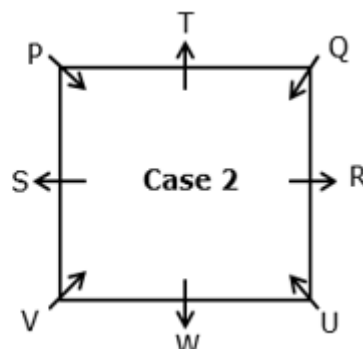

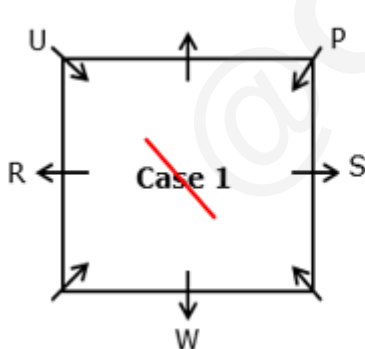

Again we have,

- Both Q and T sit to the immediate right of each other.
- Q sits at the corner.

From the above conditions, Case-1 gets eliminated because both Q and T sit to the immediate right of each other, which is not satisfied.

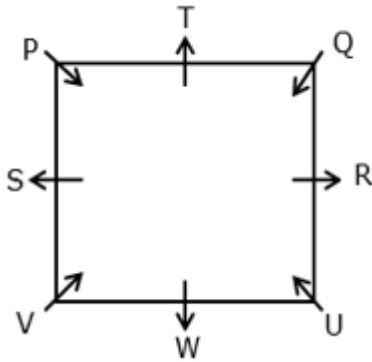

Hence Case-2 shows the final arrangement.

Answer: E

7. Questions

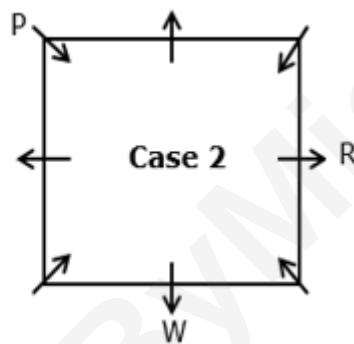

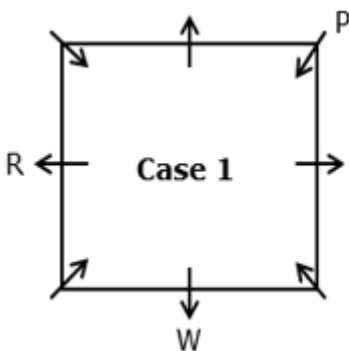

Final arrangement:

We have,

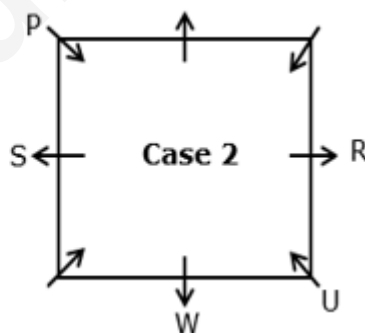

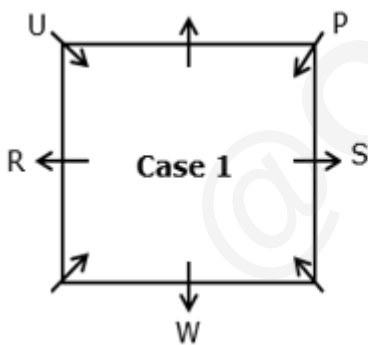

- Only two persons sit between P and W, who do not sit at the corner.
- R sits three persons away from P.

From the above conditions, there are two possibilities:

Again we have,

- U sits third to the left of S, who neither sits at the corner nor sits opposite to W.

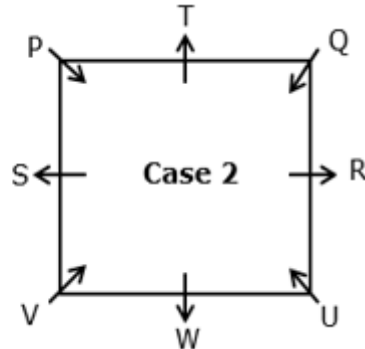

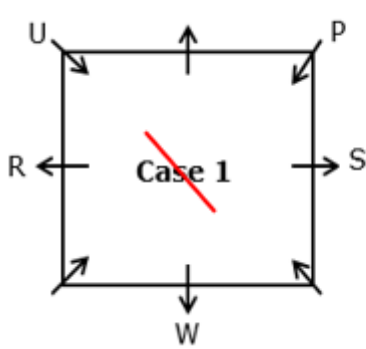

Again we have,

- Both Q and T sit to the immediate right of each other.
- Q sits at the corner.

From the above conditions, Case-1 gets eliminated because both Q and T sit to the immediate right of each other, which is not satisfied.

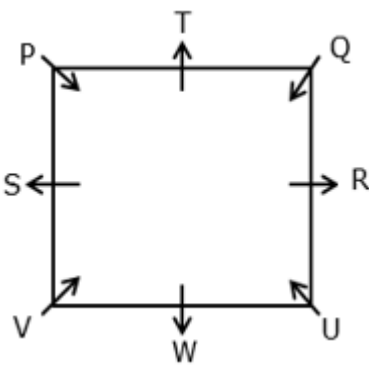

Hence Case-2 shows the final arrangement.

Answer: A

8. Questions

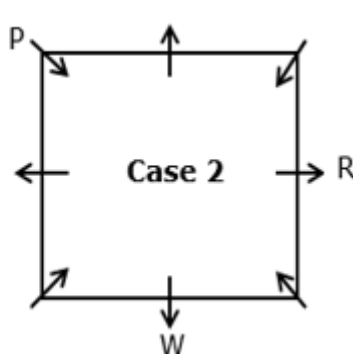

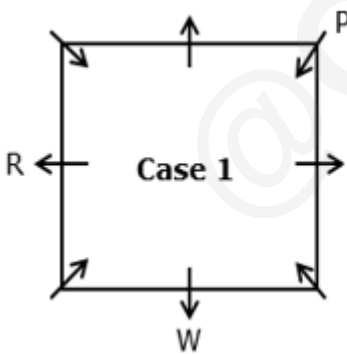

Final arrangement:

We have,

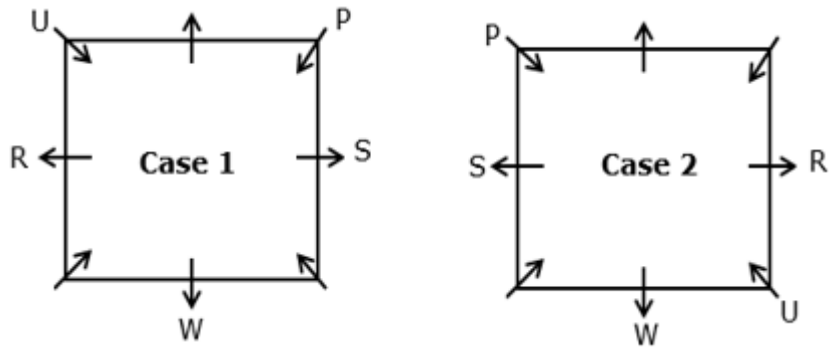

- Only two persons sit between P and W, who do not sit at the corner.
- R sits three persons away from P.

From the above conditions, there are two possibilities:

Again we have,

- U sits third to the left of S, who neither sits at the corner nor sits opposite to W.

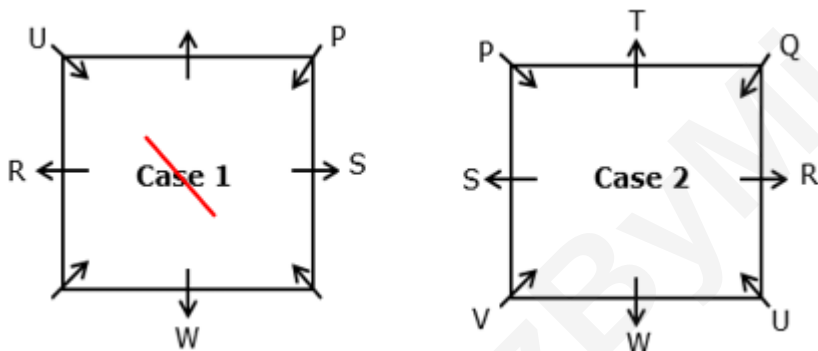

Again we have,

- Both Q and T sit to the immediate right of each other.
- Q sits at the corner.

From the above conditions, Case-1 gets eliminated because both Q and T sit to the immediate right of each other, which is not satisfied.

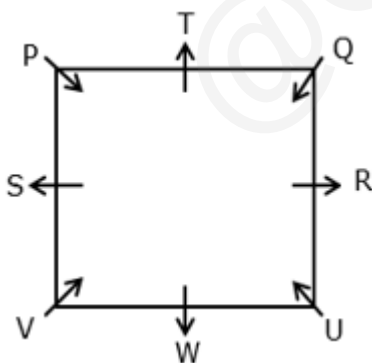

Hence Case-2 shows the final arrangement.

Answer: B

9. Questions

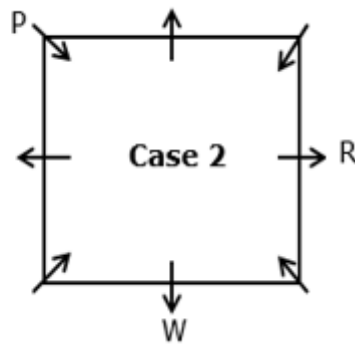

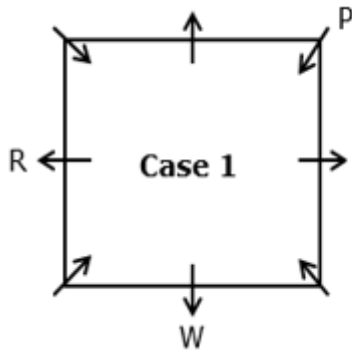

Final arrangement:

We have,

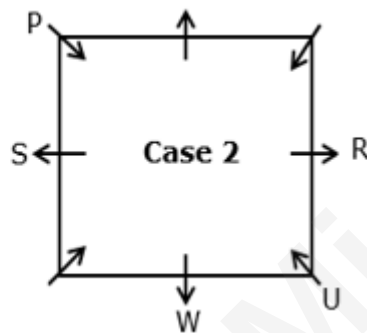

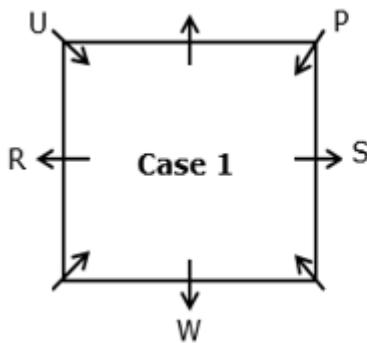

- Only two persons sit between P and W, who do not sit at the corner.
- R sits three persons away from P.

From the above conditions, there are two possibilities:

Again we have,

- U sits third to the left of S, who neither sits at the corner nor sits opposite to W.

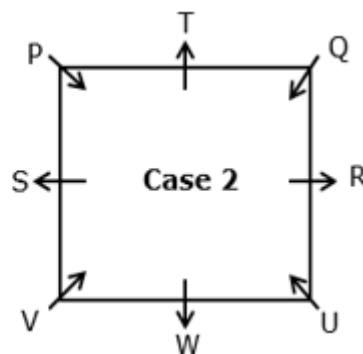

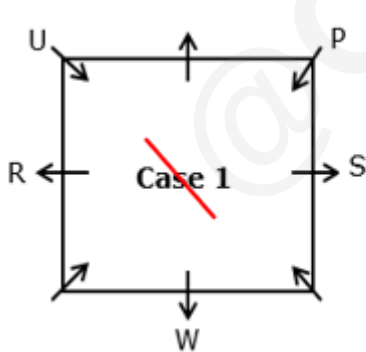

Again we have,

- Both Q and T sit to the immediate right of each other.
- Q sits at the corner.

From the above conditions, Case-1 gets eliminated because both Q and T sit to the immediate right of each other, which is not satisfied.

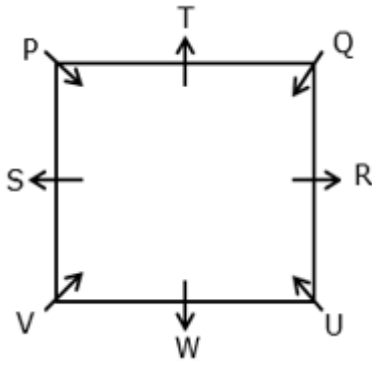

Hence Case-2 shows the final arrangement.

Answer: C (Except option c, the rest of the persons are sitting at the middle of the sides of the table)

10. Questions

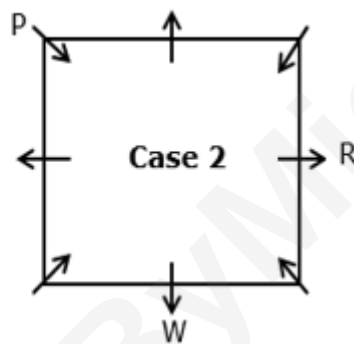

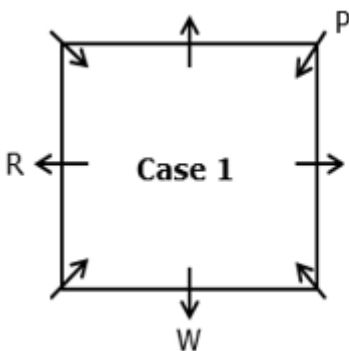

Final arrangement:

We have,

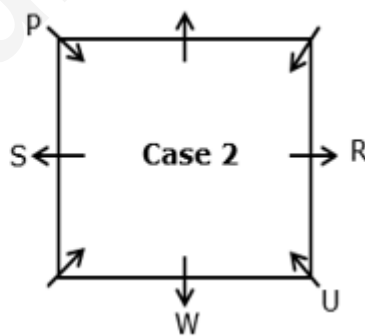

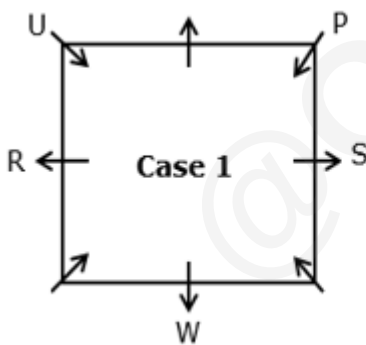

- Only two persons sit between P and W, who do not sit at the corner.
- R sits three persons away from P.

From the above conditions, there are two possibilities:

Again we have,

- U sits third to the left of S, who neither sits at the corner nor sits opposite to W.

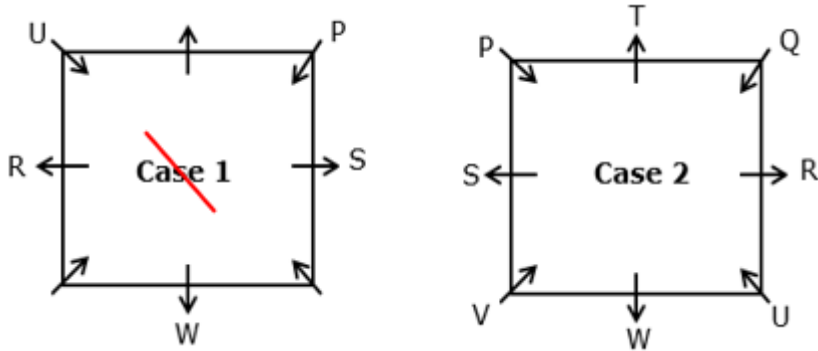

Again we have,

- Both Q and T sit to the immediate right of each other.
- Q sits at the corner.

From the above conditions, Case-1 gets eliminated because both Q and T sit to the immediate right of each other, which is not satisfied.

Hence Case-2 shows the final arrangement.

Answer: A (Only V will remain unchanged)

11. Questions

Final arrangement:

Days	Persons	Class
Sunday	G	Music
Monday	D	Tailoring
Tuesday	F	Mehndi
Wednesday	A	Maths
Thursday	E	Chess
Friday	C	Hindi
Saturday	B	Dance

We have,

- Only three persons went between D and the one who went for Hindi class, where neither of them went on the first day nor on the last day.
- The one who had Music class went immediately before D, who went immediately before the one who had Mehndi class.
- As many persons went before Mehndi class as after E.

From the above conditions, there are two possibilities:

Days	Case-1		Case-2	
	Persons	Class	Persons	Class
Sunday		Music	E	
Monday	D			Hindi
Tuesday		Mehndi		
Wednesday				
Thursday	E			Music
Friday		Hindi	D	
Saturday				Mehndi

Again, we have

- F went immediately after the one who had a Tailoring class.
- F went neither for Hindi class nor on Wednesday.

From the above conditions there is one more possibility Case-2(a) is added.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday		Music	E		E	
Monday	D	Tailoring		Hindi		Hindi
Tuesday	F	Mehndi				
Wednesday						Tailoring
Thursday	E			Music	F	Music
Friday		Hindi	D	Tailoring	D	
Saturday			F	Mehndi		Mehndi

Again, we have

- Only two persons went between A and the one who had Dance class.
- The one who had Dance class went after A but did not went on Wednesday.

- The number of persons went between B and the one who had Maths class is the same number of persons went between the one who had Maths class and G.
- G, who went before both B and E.

From the above conditions, Case-2 and Case-2(a) get eliminated. Case -2 gets eliminated because the one who had Dance class went after A but did not went on Wednesday and Case 2(a) gets eliminated because G, who went before both B and E, which is not satisfied.

Hence Case-1 shows the final arrangement.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday	G	Music	E	Dance	E	Chess
Monday	D	Tailoring		Hindi	G	Hindi
Tuesday	F	Mehndi			A	Maths
Wednesday	A	Maths	A		B	Tailoring
Thursday	E	Chess		Music	F	Music
Friday	C	Hindi	D	Tailoring	D	Dance
Saturday	B	Dance	F	Mehndi	C	Mehndi

Answer: D

12. Questions

Final arrangement:

Days	Persons	Class
Sunday	G	Music
Monday	D	Tailoring
Tuesday	F	Mehndi
Wednesday	A	Maths
Thursday	E	Chess
Friday	C	Hindi
Saturday	B	Dance

We have,

- Only three persons went between D and the one who went for Hindi class, where neither of them went on the first day nor on the last day.
- The one who had Music class went immediately before D, who went immediately before the one who had Mehndi class.
- As many persons went before Mehndi class as after E.

From the above conditions, there are two possibilities:

Days	Case-1		Case-2	
	Persons	Class	Persons	Class
Sunday		Music	E	
Monday	D			Hindi
Tuesday		Mehndi		
Wednesday				
Thursday	E			Music
Friday		Hindi	D	
Saturday				Mehndi

Again, we have

- F went immediately after the one who had a Tailoring class.

- F went neither for Hindi class nor on Wednesday.

From the above conditions there is one more possibility Case-2(a) is added.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday		Music	E		E	
Monday	D	Tailoring		Hindi		Hindi
Tuesday	F	Mehndi				
Wednesday						Tailoring
Thursday	E			Music	F	Music
Friday		Hindi	D	Tailoring	D	
Saturday			F	Mehndi		Mehndi

Again, we have

- Only two persons went between A and the one who had Dance class.
- The one who had Dance class went after A but did not went on Wednesday.
- The number of persons went between B and the one who had Maths class is the same number of persons went between the one who had Maths class and G.
- G, who went before both B and E.

From the above conditions, Case-2 and Case-2(a) get eliminated. Case -2 gets eliminated because the one who had Dance class went after A but did not went on Wednesday and Case 2(a) gets eliminated because G, who went before both B and E, which is not satisfied.

Hence Case-1 shows the final arrangement.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday	G	Music	E	Dance	E	Chess
Monday	D	Tailoring		Hindi	G	Hindi
Tuesday	F	Mehndi			A	Maths
Wednesday	A	Maths	A		B	Tailoring
Thursday	E	Chess		Music	F	Music
Friday	C	Hindi	D	Tailoring	D	Dance
Saturday	B	Dance	F	Mehndi	C	Mehndi

Answer: C

13. Questions

Final arrangement:

Days	Persons	Class
Sunday	G	Music
Monday	D	Tailoring
Tuesday	F	Mehndi
Wednesday	A	Maths
Thursday	E	Chess
Friday	C	Hindi
Saturday	B	Dance

We have,

- Only three persons went between D and the one who went for Hindi class, who neither of them went on the first day nor on the last day.
- The one who had Music class went immediately before D, who went immediately before the one who had Mehndi class.
- As many persons went before Mehndi class as after E.

From the above conditions, there are two possibilities:

Days	Case-1		Case-2	
	Persons	Class	Persons	Class
Sunday		Music	E	
Monday	D			Hindi
Tuesday		Mehndi		
Wednesday				
Thursday	E			Music
Friday		Hindi	D	
Saturday				Mehndi

Again, we have

- F went immediately after the one who had a Tailoring class.
- F went neither for Hindi class nor on Wednesday.

From the above conditions there is one more possibility Case-2(a) is added.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday		Music	E		E	
Monday	D	Tailoring		Hindi		Hindi
Tuesday	F	Mehndi				
Wednesday						Tailoring
Thursday	E			Music	F	Music
Friday		Hindi	D	Tailoring	D	
Saturday			F	Mehndi		Mehndi

Again, we have

- Only two persons went between A and the one who had Dance class.
- The one who had Dance class went after A but did not went on Wednesday.
- The number of persons went between B and the one who had Maths class is the same number of persons went between the one who had Maths class and G.
- G, who went before both B and E.

From the above conditions, Case-2 and Case-2(a) get eliminated. Case -2 gets eliminated because the one who had Dance class went after A but did not went on Wednesday and Case 2(a) gets eliminated because G, who went before both B and E, which is not satisfied.

Hence Case-1 shows the final arrangement.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday	G	Music	E	Dance	E	Chess
Monday	D	Tailoring		Hindi	G	Hindi
Tuesday	F	Mehndi			A	Maths
Wednesday	A	Maths	A		B	Tailoring
Thursday	E	Chess		Music	F	Music
Friday	C	Hindi	D	Tailoring	D	Dance
Saturday	B	Dance	F	Mehndi	C	Mehndi

Answer: B

14. Questions

Final arrangement:

Days	Persons	Class
Sunday	G	Music
Monday	D	Tailoring
Tuesday	F	Mehndi
Wednesday	A	Maths
Thursday	E	Chess
Friday	C	Hindi
Saturday	B	Dance

We have,

- Only three persons went between D and the one who went for Hindi class, where neither of them went on the first day nor on the last day.
- The one who had Music class went immediately before D, who went immediately before the one who had Mehndi class.
- As many persons went before Mehndi class as after E.

From the above conditions, there are two possibilities:

Days	Case-1		Case-2	
	Persons	Class	Persons	Class
Sunday		Music	E	
Monday	D			Hindi
Tuesday		Mehndi		
Wednesday				
Thursday	E			Music
Friday		Hindi	D	
Saturday				Mehndi

Again, we have

- F went immediately after the one who had a Tailoring class.

- F went neither for Hindi class nor on Wednesday.

From the above conditions there is one more possibility Case-2(a) is added.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday		Music	E		E	
Monday	D	Tailoring		Hindi		Hindi
Tuesday	F	Mehndi				
Wednesday						Tailoring
Thursday	E			Music	F	Music
Friday		Hindi	D	Tailoring	D	
Saturday			F	Mehndi		Mehndi

Again, we have

- Only two persons went between A and the one who had Dance class.
- The one who had Dance class went after A but did not went on Wednesday.
- The number of persons went between B and the one who had Maths class is the same number of persons went between the one who had Maths class and G.
- G, who went before both B and E.

From the above conditions, Case-2 and Case-2(a) get eliminated. Case -2 gets eliminated because the one who had Dance class went after A but did not went on Wednesday and Case 2(a) gets eliminated because G, who went before both B and E, which is not satisfied.

Hence Case-1 shows the final arrangement.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday	G	Music	E	Dance	E	Chess
Monday	D	Tailoring		Hindi	G	Hindi
Tuesday	F	Mehndi			A	Maths
Wednesday	A	Maths	A		B	Tailoring
Thursday	E	Chess		Music	F	Music
Friday	C	Hindi	D	Tailoring	D	Dance
Saturday	B	Dance	F	Mehndi	C	Mehndi

Answer: E

15. Questions

Final arrangement:

Days	Persons	Class
Sunday	G	Music
Monday	D	Tailoring
Tuesday	F	Mehndi
Wednesday	A	Maths
Thursday	E	Chess
Friday	C	Hindi
Saturday	B	Dance

We have,

- Only three persons went between D and the one who went for Hindi class, who neither of them went on the first day nor on the last day.
- The one who had Music class went immediately before D, who went immediately before the one who had Mehndi class.
- As many persons went before Mehndi class as after E.

From the above conditions, there are two possibilities:

Days	Case-1		Case-2	
	Persons	Class	Persons	Class
Sunday		Music	E	
Monday	D			Hindi
Tuesday		Mehndi		
Wednesday				
Thursday	E			Music
Friday		Hindi	D	
Saturday				Mehndi

Again, we have

- F went immediately after the one who had a Tailoring class.
- F went neither for Hindi class nor on Wednesday.

From the above conditions there is one more possibility Case-2(a) is added.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday		Music	E		E	
Monday	D	Tailoring		Hindi		Hindi
Tuesday	F	Mehndi				
Wednesday						Tailoring
Thursday	E			Music	F	Music
Friday		Hindi	D	Tailoring	D	
Saturday			F	Mehndi		Mehndi

Again, we have

- Only two persons went between A and the one who had Dance class.
- The one who had Dance class went after A but did not went on Wednesday.
- The number of persons went between B and the one who had Maths class is the same number of persons went between the one who had Maths class and G.
- G, who went before both B and E.

From the above conditions, Case-2 and Case-2(a) get eliminated. Case -2 gets eliminated because the one who had Dance class went after A but did not went on Wednesday and Case 2(a) gets eliminated because G, who went before both B and E, which is not satisfied.

Hence Case-1 shows the final arrangement.

Days	Case-1		Case-2		Case-2(a)	
	Persons	Class	Persons	Class	Persons	Class
Sunday	G	Music	E	Dance	E	Chess
Monday	D	Tailoring		Hindi	G	Hindi
Tuesday	F	Mehndi			A	Maths
Wednesday	A	Maths	A		B	Tailoring
Thursday	E	Chess		Music	F	Music
Friday	C	Hindi	D	Tailoring	D	Dance
Saturday	B	Dance	F	Mehndi	C	Mehndi

Answer: A (Except option a, the rest of the persons are exactly matched with the day and class)

16. Questions

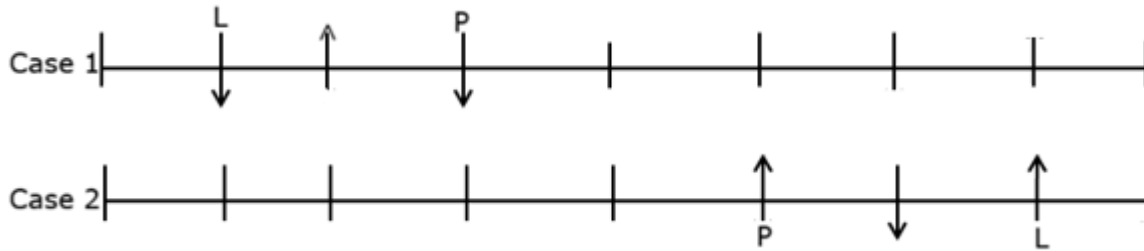

Final arrangement:

We have,

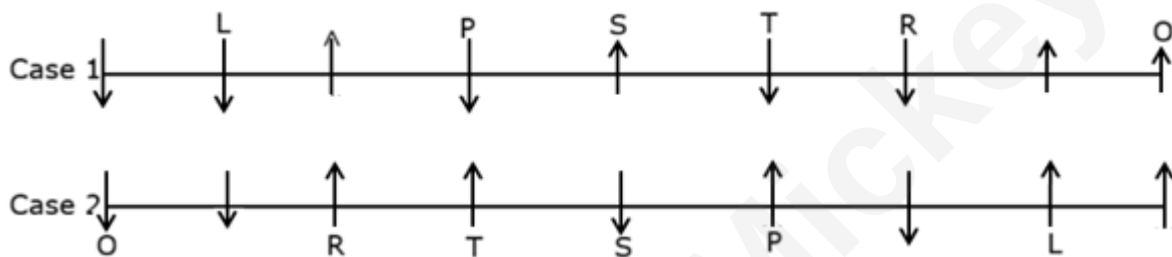

- L sits second from one of the extreme ends.
- P sits second to the left of L and faces the same direction as L.

From the above conditions, there are two possibilities:

Again we have,

- As many persons sit to the left of P as to the right of T.
- Two persons sit between O and T.
- R sits second to the left of O and second to the right of S.
- Immediate neighbours of R face the opposite direction.
- The persons sitting at the extreme ends face the opposite direction.

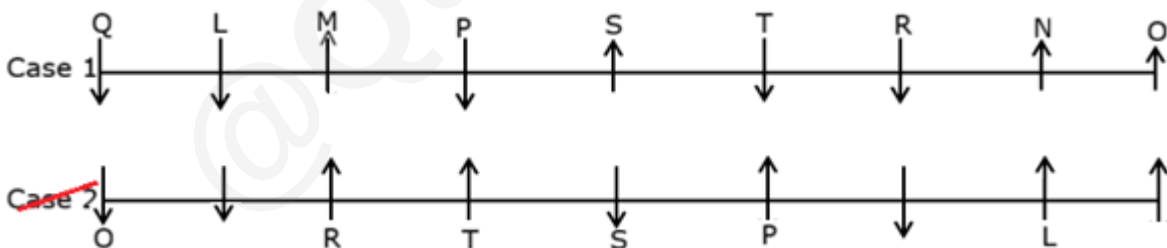

Again we have,

- Q faces south and more than one person sits between Q and N.
- N and M face the same direction.

From the above conditions, case-2 gets eliminated because N and M face the same direction, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: C

17. Questions

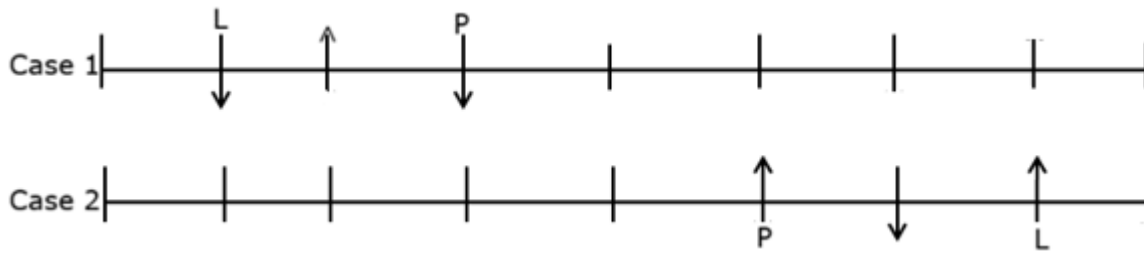

Final arrangement:

We have,

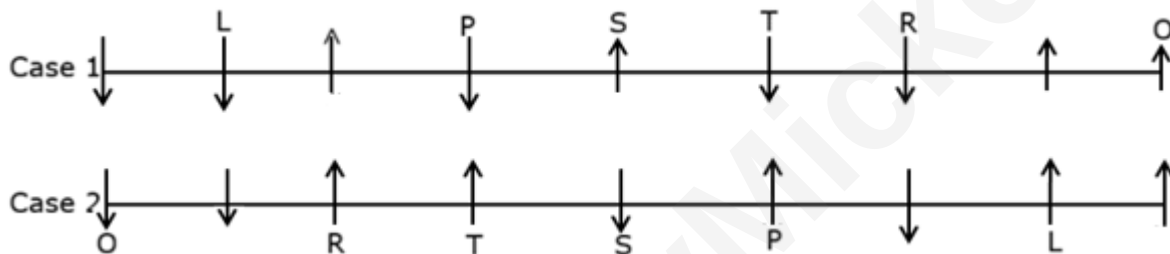

- L sits second from one of the extreme ends.
- P sits second to the left of L and faces the same direction as L.

From the above conditions, there are two possibilities:

Again we have,

- As many persons sit to the left of P as to the right of T.
- Two persons sit between O and T.
- R sits second to the left of O and second to the right of S.
- Immediate neighbours of R face the opposite direction.
- The persons sitting at the extreme ends face the opposite direction.

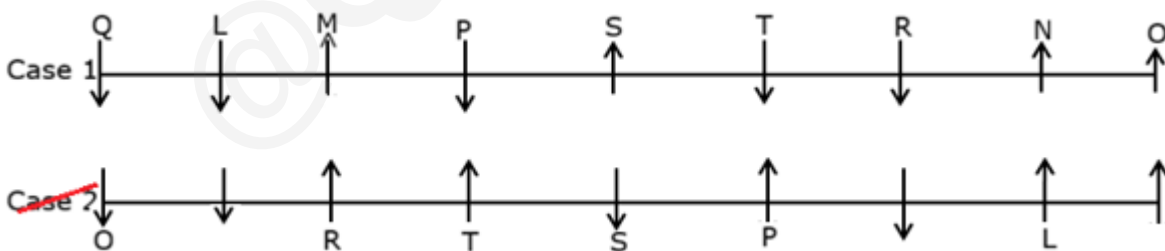

Again we have,

- Q faces south and more than one person sits between Q and N.
- N and M face the same direction.

From the above conditions, case-2 gets eliminated because N and M face the same direction, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: D

18. Questions

Final arrangement:

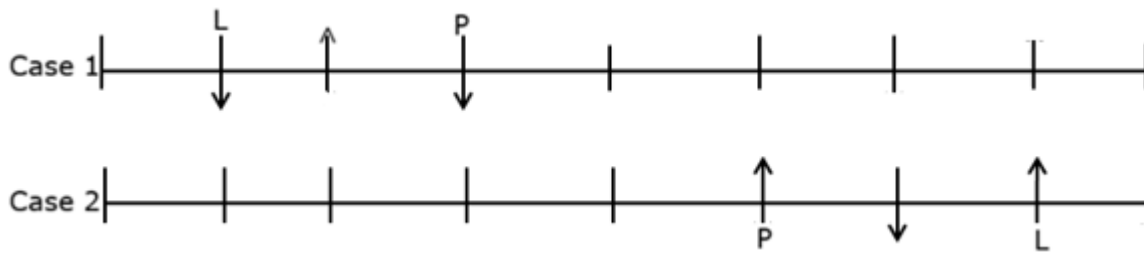

We have,

- L sits second from one of the extreme ends.

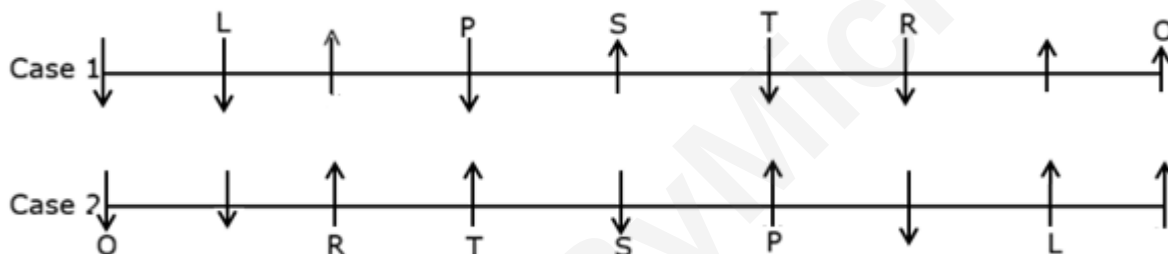

- P sits second to the left of L and faces the same direction as L.

From the above conditions, there are two possibilities:

Again we have,

- As many persons sit to the left of P as to the right of T.
- Two persons sit between O and T.
- R sits second to the left of O and second to the right of S.
- Immediate neighbours of R face the opposite direction.
- The persons sitting at the extreme ends face the opposite direction.

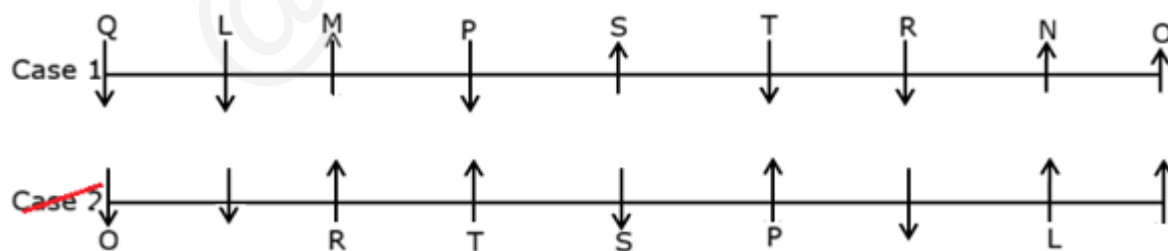

Again we have,

- Q faces south and more than one person sits between Q and N.
- N and M face the same direction.

From the above conditions, case-2 gets eliminated because N and M face the same direction, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: B (Except option b, the rest of the persons are facing south)

19. Questions

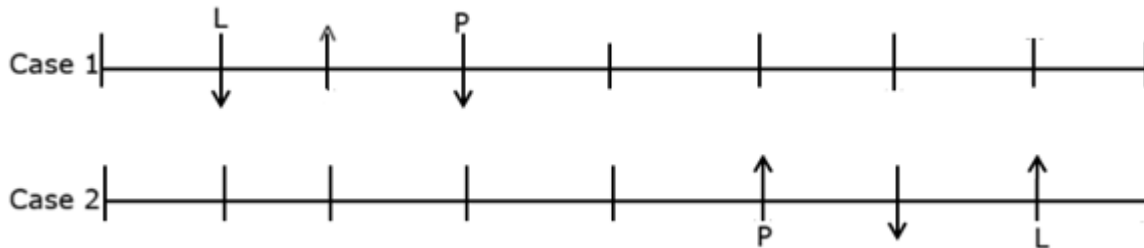

Final arrangement:

We have,

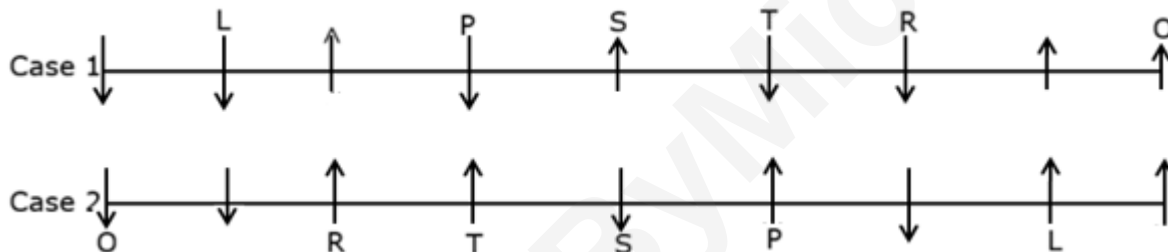

- L sits second from one of the extreme ends.
- P sits second to the left of L and faces the same direction as L.

From the above conditions, there are two possibilities:

Again we have,

- As many persons sit to the left of P as to the right of T.
- Two persons sit between O and T.
- R sits second to the left of O and second to the right of S.
- Immediate neighbours of R face the opposite direction.
- The persons sitting at the extreme ends face the opposite direction.

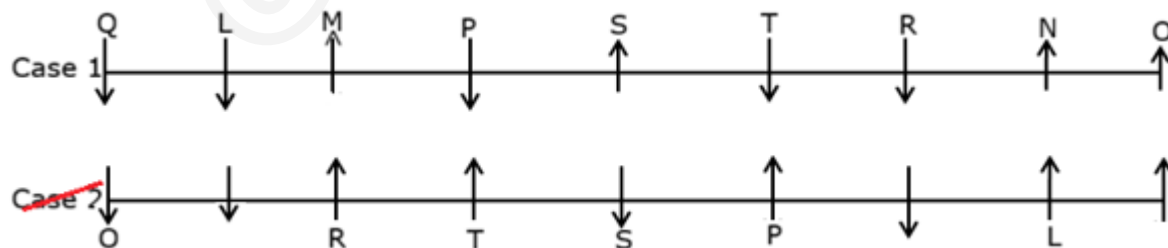

Again we have,

- Q faces south and more than one person sits between Q and N.
- N and M face the same direction.

From the above conditions, case-2 gets eliminated because N and M face the same direction, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: A

20. Questions

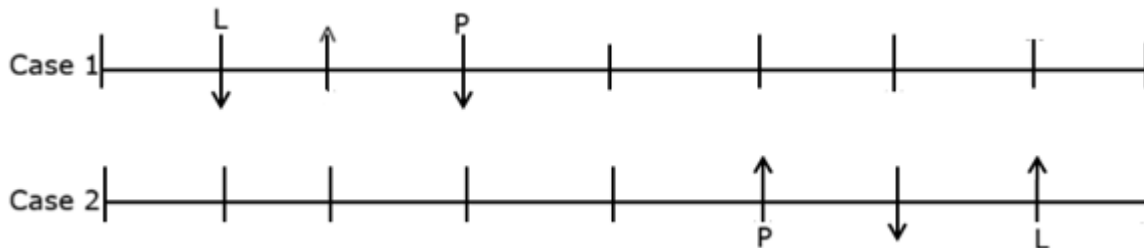

Final arrangement:

We have,

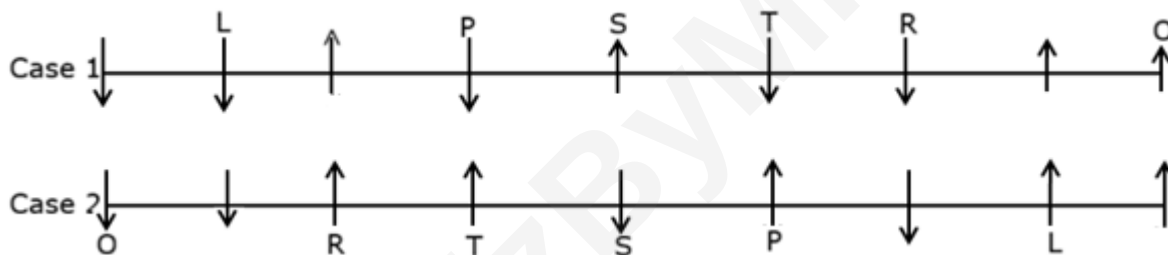

- L sits second from one of the extreme ends.
- P sits second to the left of L and faces the same direction as L.

From the above conditions, there are two possibilities:

Again we have,

- As many persons sit to the left of P as to the right of T.
- Two persons sit between O and T.
- R sits second to the left of O and second to the right of S.
- Immediate neighbours of R face the opposite direction.
- The persons sitting at the extreme ends face the opposite direction.

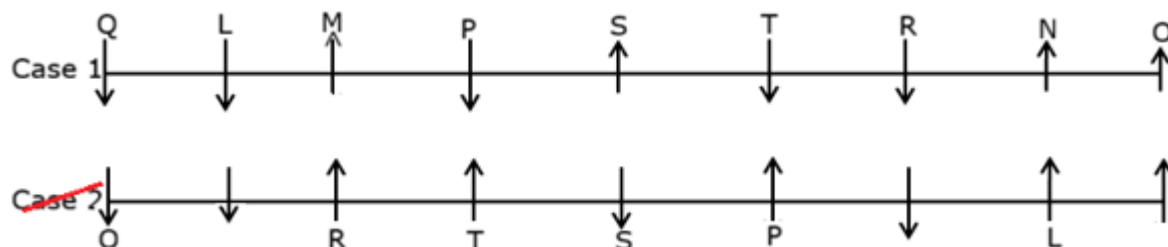

Again we have,

- Q faces south and more than one person sits between Q and N.
- N and M face the same direction.

From the above conditions, case-2 gets eliminated because N and M face the same direction, which is not satisfied.

Hence, Case-1 shows the final arrangement.

Answer: B

21. Questions

Answer: B

$D < F \geq M > V ; K \geq G \leq A < M ; G \leq E = U$

I). $E \geq F$ ($E \geq G \leq A < M \leq F$) $\rightarrow$ False

II). $U < F$ ($U = E \geq G \leq A < M \leq F$) $\rightarrow$ False

By combining the conclusions I and II, we get the complementary pair.

Hence, either conclusion I or II follows.

22. Questions

Answer: C

$L < N = O$; $P = R \leq V \leq X$; $R \geq N$

I). $X \geq O$ ($X \geq V \geq R \geq N = O$) $\rightarrow$ True

II). $P \geq N$ ($P = R \geq N$) $\rightarrow$ True

23. Questions

Answer: E

$G < Y \leq A$; $A \geq B < C$; $Z < C > D$

I). $Z > A$ ($Z < C > B \leq A$) $\rightarrow$ False

II). $G > D$ ($G < Y \leq A \geq B < C > D$) $\rightarrow$ False

24. Questions

Answer: D

$M \geq H = P > R$; $H \leq J = G$; $K = R > S$

I). $H > K$ ($H = P > R = K$) $\rightarrow$ True

II). $M = G$ ($M \geq H \leq J = G$) $\rightarrow$ False

25. Questions

Answer: B

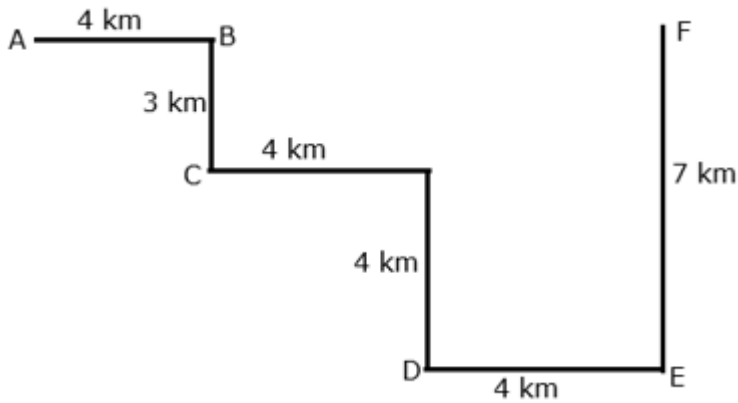

$P < T \geq R$; $M \leq J = R$; $S = Q < M$

I). $T < M$ ($T \geq R = J \geq M$) $\rightarrow$ False

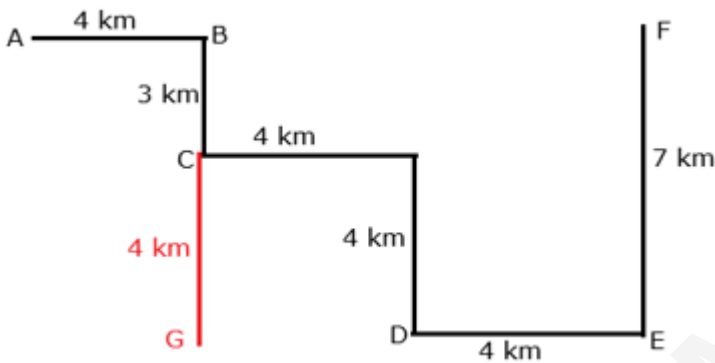

II). $R > Q$ ($R = J \geq M > Q$) $\rightarrow$ True

26. Questions

Final arrangement:

Answer: C

If point G is 4 km south of point C then the distance between point B and G is = Distance between BC + Distance between CG

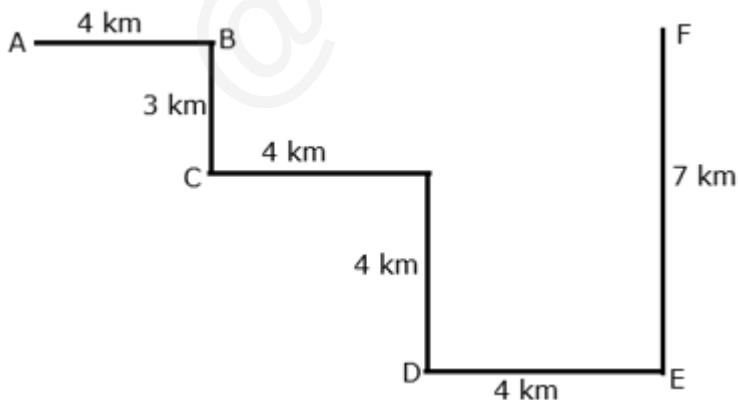

$$= 3 \text{ km} + 4 \text{ km}$$

$$= 7 \text{ km}$$

So the distance between B and G is equal to the distance between F and E (7 km)

27. Questions

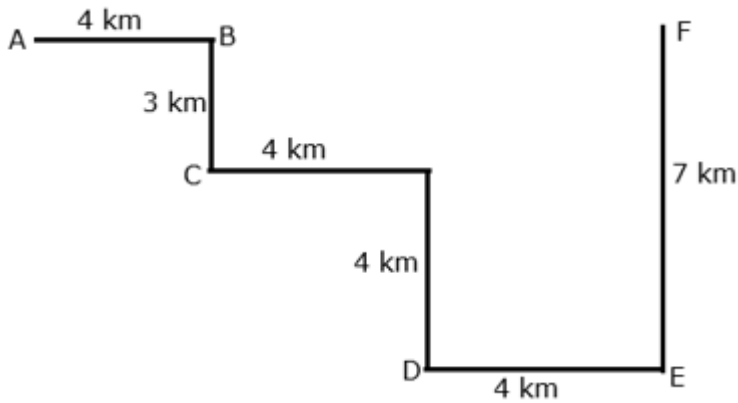

Final arrangement:

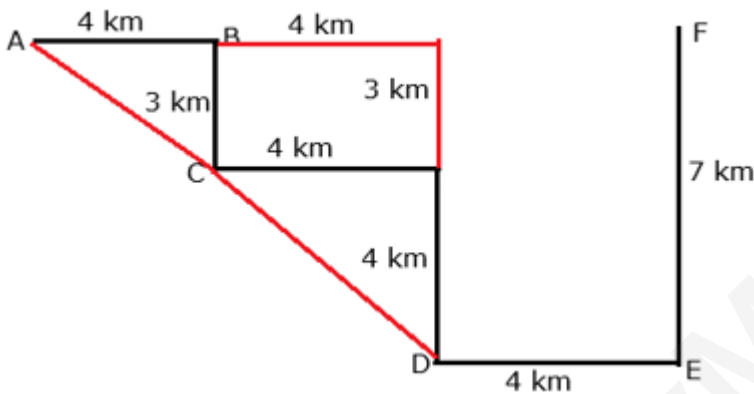

Answer: B

28. Questions

Final arrangement:

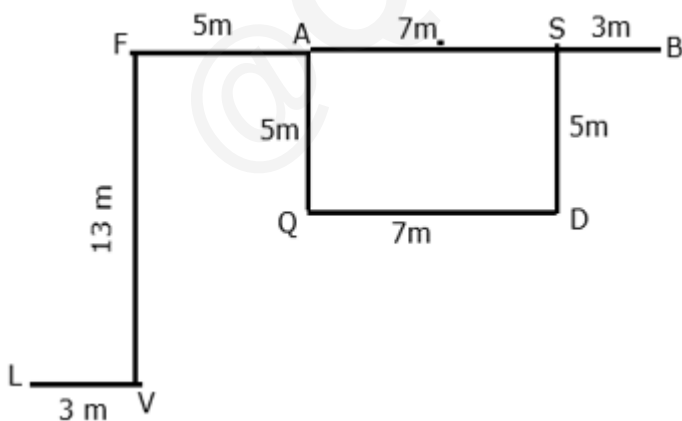

Answer: A

$$\begin{aligned}\text{Shortest distance} &= \sqrt{7^2 + 8^2} \\ &= \sqrt{49 + 64} \\ &= \sqrt{113} \text{ km}\end{aligned}$$

29. Questions

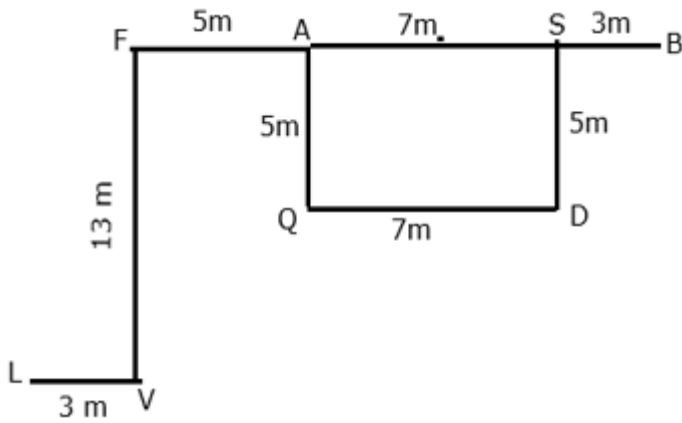

Final arrangement:

Answer: D

30. Questions

Final arrangement:

Answer: E

Shape formed by the points ASDQ = Rectangle

Area of rectangle = Length $\times$ Breadth

Length = 7m

Breath = 5m

Area = 7m $\times$ 5m

= 35 m²
