

1. Questions

Study the following information carefully and answer the given questions.

Eight people – A, B, C, D, E, F, G, and H travel to Delhi on two different dates, 17th or 30th of four different months, May, June, July, and August of the same year 2026. Only one person travels to Delhi on each date, and only two people travel to Delhi in each month.

Only three people travel between G and A, who travels in a month having an even number of days. As many people travel before A as after B. At least five people travel between G and H. H and C travel to Delhi in the same month. C does not travel on any odd numbered date. Two people travel between G and D. E travels before F.

Which of the following persons travels to Delhi on 30th July?

- a. E
- b. G
- c. F
- d. B
- e. C

2. Questions

If all the people are arranged in alphabetical order from May 17th, then how many people remain unchanged in their position?

- a. Two
- b. Three
- c. None
- d. More than three
- e. One

@RankZenBanker

3. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. H
- b. E
- c. C
- d. B
- e. A

4. Questions

If H is related to A, and D is related to B in a certain way, then who among the following people is related to F?

- a. G
- b. E
- c. B
- d. C
- e. A

5. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

I). E and B travel to Delhi in the same month

II). A travels to Delhi on June 30th

III). F and C travel to Delhi in a month having odd number of days on an even-numbered date

- a. Only I
- b. Only II and III
- c. Only II
- d. Only I and III
- e. Only III

6. Questions

@RankZenBanker

Study the following information carefully and answer the given questions.

Twelve persons are sitting in two parallel rows containing six persons each in such a way that there is an equal distance between adjacent persons. In row 1: K, L, M, N, O, and P are seated, and all of them are facing south. In row 2: U, V, W, X, Y, and Z are seated, and all of them are facing north. Each person in row 1 faces another person in row 2.

P sits at the end of the row. Only three persons sit between P and the one who faces V. As many persons sit to the left of V as to the right of O. M sits three places away from O. M faces an immediate neighbour of X, who doesn't sit at the end. W sits at one of the ends and sits diagonally opposite to K. The number of persons who sit between P and K is **two more than** the number of persons who sit between V and U. L faces Z but doesn't sit to the right of N.

Who among the following persons sits second to the left of the one who faces X?

- a. Immediate neighbour of K
- b. M
- c. The one who sits opposite to V
- d. Both a) and b)

- e. Both a) and c)

7. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. The one who sits opposite to W
- b. O
- c. The person who sits to the immediate right of V
- d. K
- e. The person who sits third to the left of Z

8. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

I). M and N are immediate neighbours

II). Y sits at one of the extreme ends.

III). X faces N

- a. Only I and II
- b. Only II and III
- c. Only I and III
- d. All are true
- e. None is true

@RankZenBanker

9. Questions

If M is related to L, and Z is related to U in a certain way, then with whom is Y related?

- a. The one who faces L
- b. U
- c. The person who sits to the immediate left of X
- d. W
- e. The one who faces N

10. Questions

If P and L interchanged their positions in the same way U and V interchanged their places, then who among the following persons faces the one who sits to the immediate left of L?

- a. U

- b. X
- c. V
- d. Y
- e. W

11. Questions

Study the following information carefully and answer the given questions.

Seven boxes – P1, P2, P3, P4, P5, P6, and P7 are kept one above another in a stack. It is assumed that no other boxes are kept in the stack other than the given boxes.

Only three boxes are kept above box P3. Two boxes are kept between box P3 and P2. As many boxes are kept above box P2 as kept below box P5. The box P7 is kept adjacent to box P5. The number of boxes kept between box P7 and box P4 is **two more than** the number of boxes kept between box P1 and box P6. The box P6 is kept below box P1 which is kept below box P7.

Which of the following boxes is kept on top of the stack?

- a. P2
- b. P3
- c. P7
- d. P5
- e. P4

12. Questions

@RankZenBanker

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. Box P5 and Box P1
- b. Box P7 and Box P3
- c. Box P1 and Box P6
- d. Box P3 and Box P4
- e. Box P2 and Box P5

13. Questions

How many boxes are kept between Box P5 and the box that is immediately below Box P4?

- a. Three
- b. Four
- c. Two

- d. More than four
- e. None

14. Questions

If Box P1 is related to Box P2, and Box P4 is related to Box P7 in a certain way, then which among the following is related to Box P6?

- a. Box P4
- b. Box P7
- c. Box P5
- d. Box P1
- e. Box P3

15. Questions

Which of the following statement(s) is/are NOT TRUE as per the arrangement?

- a. Box P2 is kept at the bottom of the stack
- b. Box P3 is kept immediately above Box P6
- c. Box P4 and box P1 are kept adjacent to each other
- d. Both a) and b)
- e. All are true

16. Questions

@RankZenBanker

Study the following information carefully and answer the given questions.

Eight persons – A, B, C, D, E, F, G and H are sitting around a circular table facing the centre with equal distance between adjacent persons.

D sits third to the right of C and opposite to G. Only one person sits between G and E. As many persons sit between D and E as between C and B, when counted from left of both D and C. H sits adjacent to B. A sits second to the left of F but not opposite to C.

Who among the following person sits third to the right of F?

- a. D
- b. E
- c. G
- d. A
- e. H

17. Questions

How many persons sit between B and H, when counted from the left of B?

- a. Two
- b. More than three
- c. One
- d. No one
- e. Three

18. Questions

Which among the following pairs of persons are the immediate neighbours of A?

- a. F, D
- b. D, E
- c. B, G
- d. H, C
- e. E, B

19. Questions

What is the position of G with respect to D?

- a. Fourth to the left
- b. Third to the right
- c. Second to the left
- d. Immediate right
- e. None of these

@RankZenBanker

20. Questions

Which of the following statement(s) is/are NOT TRUE based on the final arrangement?

- a. B sits opposite to A
- b. Only one person sits between H and D, when counted from the left of H
- c. F sits second to the left of B
- d. G sits adjacent to A
- e. All the given statements are true

21. Questions

Study the following information carefully and answer the given questions.

U G % J I 8 9 # H W 7 @ O P 6 ^ Q A 9) D A 3 1 S E & 9 > B K O < 8 ? # 7 8 * F N 2 4 + G 5 !

Which of the following elements is sixteenth to the right of the fifth element from the left end?

- a. ^
- b.)
- c. D
- d. 9
- e. A

22. Questions

If all the symbols and numbers are dropped from the given series, then which of the following element is second to the left of the thirteenth element from the left end?

- a. A
- b. H
- c. I
- d. P
- e. None of these

23. Questions

How many such symbols in the given series which are immediately followed by a letter and are immediately preceded by a number?

@RankZenBanker

- a. Six
- b. Five
- c. Seven
- d. Eight
- e. Nine

24. Questions

Which of the following elements is exactly between the seventh element from the left end and the nineteenth element from the right end?

- a. %
- b. A
- c.)
- d. 9
- e. Q

25. Questions

Four of the following five are alike in a certain way based on the final arrangement and thus form a group. Which one of the following does not belong to the group?

- a. H 7 O
- b. P ^ A
- c. D 3 S
- d. > B K
- e. O 8 #

26. Questions

Study the following information carefully and answer the given questions.

In a certain code language,

“Hot Climate summer season” is coded as “io mi es so”

“Climate Change weather temperature” is coded as “mi ec tm te”

“Hot Change Cold Winter” is coded as “ec io ni lo”

“Winter wet summer humidity” is coded as “si ni fl es ”

(Note: All the given codes are two-letter codes only)

Which of the following words is coded as “fl” in the given coded language?

- a. Climate
- b. Summer
- c. Wet
- d. Either c) or e)
- e. Humidity

@RankZenBanker

27. Questions

If the phrase "winter temperature wet" is coded as "si ni tm", then what is the code for the phrase “Humidity weather cold” in the given coded language?

- a. si ni ec
- b. lo fl te
- c. fl si te
- d. te lo mi
- e. fl te so

28. Questions

How many definite codes for the words can be identified?

- a. Five
- b. Six
- c. Seven
- d. Eight
- e. Nine

29. Questions

What is the code for the phrase “Cold Climate” in the given coded language?

- a. lo ni
- b. ec lo
- c. es io
- d. lo mi
- e. so mi

30. Questions

What may be the phrase for the code “ni ec io” in the given coded language?

- a. Change Winter Hot
- b. Hot Weather Climate
- c. Change Hot wet
- d. Winter climate change
- e. Temperature Hot Wet

@RankZenBanker

31. Questions

Study the following information carefully and answer the given questions.

A person starts walking from Point A towards the west. After walking 14 m he reaches Point B which is 7m south of Point C. From Point C, he turns right and walks 10 m to reach Point D. From Point D, he walks 6m towards north to reach Point E. From Point E, he turns right and walks 4m to reach Point F. Finally, he stops at Point G, which is east of Point D and south of Point F respectively.

What is the shortest distance between Point E and Point G?

- a. $2\sqrt{17}$ m
- b. $3\sqrt{13}$ m
- c. $2\sqrt{13}$ m

d. $3\sqrt{19}\text{m}$ e. $2\sqrt{19}\text{m}$ **32. Questions**

If Point H is exactly between Point A and Point B, then what is the position of Point G with respect to Point H?

- a. North
- b. South-east
- c. West
- d. North-west
- e. None of these

33. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. Point F and Point B
- b. Point C and Point G
- c. Point A and Point C
- d. Point B and Point E
- e. Point E and Point A

@RankZenBanker

34. Questions

Study the following information carefully and answer the given questions.

A girl starts walking from her home towards the north for 13 m to reach the temple. From the temple, she walks 8 m towards the left to reach the hotel. She then turns right and walks 7 m towards the north to reach the bus stop. From the bus stop, she turns left and walks 5m to reach her friend's home. Finally, she reaches her friend's home, which is to the north of the theatre. The theatre is to the west of the hotel.

What is the distance and direction of the theatre, with respect to the temple?

- a. 5m, North
- b. 7m, East
- c. 8m, West
- d. 13m, West
- e. 7m, South

35. Questions

What is the shortest distance between the bus stop and the temple?

- a. $\sqrt{122}$ m
- b. $\sqrt{113}$ m
- c. $\sqrt{115}$ m
- d. $\sqrt{112}$ m
- e. $\sqrt{117}$ m

36. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements, disregarding the commonly known facts.

Statements:

Some Book are Paper

Some Paper are Note

No Note is Unruled

Conclusions:

I). All Paper are Book is a possibility

II). Some Note are Book

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Both conclusions I and II follow
- d. Either conclusion I or II follows
- e. Neither conclusion I nor II follows

@RankZenBanker

37. Questions

Statements:

All seasons are Spring

Some seasons are winter

Only a few Spring have Flowers

Conclusions:

I). Some winter are Spring.

II). All flowers are winter is a possibility.

- a. Neither conclusion I nor II follows

- b. Only conclusion II follows
- c. Either conclusion I or II follows
- d. Only conclusion I follows
- e. Both conclusions I and II follow

38. Questions

Statements:

Only Inverters are ACs

Some Inverters are Cooler

Only a few Fans are Inverters

Conclusions:

I). No Inverters are Fans.

II). Some Coolers are not ACs

- a. Only conclusion II follows
- b. Only conclusion I follows
- c. Both conclusions I and II follow
- d. Either conclusion I or II follows
- e. Neither conclusion I nor II follows

39. Questions

@RankZenBanker

Statements:

All Bags are Leather

All Leather are Material

No Bag is Plastic

Conclusions:

I). Some Leather are Plastic

II). No Plastic is Leather

- a. Neither conclusion I nor II follows
- b. Only conclusion I follows
- c. Both conclusions I and II follow
- d. Either conclusion I or II follows
- e. Only conclusion II follows

40. Questions**Statements:**

Few Juice are Tasty

Only a few Guava are Tasty

No Juice is Guava

Conclusions:

I). Some Juice are Guava

II). All Tasty are Juice is not a possibility.

- a. Either conclusion I or II follows
- b. Only conclusion II follows
- c. Neither conclusion I nor II follows
- d. Only conclusion I follows
- e. Both conclusions I and II follow

Explanations:**1. Questions****Final Arrangement:**

Months	Date	People
May	17	H
	30	C
June	17	A
	30	D
July	17	E
	30	B
August	17	G
	30	F

@RankZenBanker

we have.

- Only three people travel between G and A who travel in a month having an even number of days.
- As many people travel before A as after B.

From the above conditions, there are two possibilities:

Months	Date	Case 1	Case 2
		People	People
May	17		
	30		
June	17	A	
	30		A
July	17		B
	30	B	
August	17	G	
	30		G

Again, we have,

- At least five people travel between G and H.
- H and C travel to Delhi in the same month.
- C does not travel on any odd numbered date.

@RankZenBanker

Months	Date	Case 1	Case 2
		People	People
May	17	H	H
	30	C	C
June	17	A	
	30		A
July	17		B
	30	B	
August	17	G	
	30		G

Again, we have,

- Two people travel between G and D.
- E travels before F.

From the above conditions, Case 2 gets eliminated because two persons travel between G and D, which is not satisfied. Hence, Case 1 shows the final arrangement.

@RankZenBanker

Months	Date	Case 1	Case 2
		People	People
May	17	H	H
	30	C	C
June	17	A	
	30	D	A
July	17	E	B
	30	B	
August	17	G	
	30	F	G

Answer: D

2. Questions

Final Arrangement:

Months	Date	People
May	17	H
	30	C
June	17	A
	30	D
July	17	E
	30	B
August	17	G
	30	F

@RankZenBanker

we have.

- Only three people travel between G and A who travel in a month having an even number of

days.

- As many people travel before A as after B.

From the above conditions, there are two possibilities:

Months	Date	Case 1	Case 2
		People	People
May	17		
	30		
June	17	A	
	30		A
July	17		B
	30	B	
August	17	G	
	30		G

Again, we have,

- At least five people travel between G and H.
- H and C travel to Delhi in the same month.
- C does not travel on any odd numbered date.

@RankZenBanker

Months	Date	Case 1	Case 2
		People	People
May	17	H	H
	30	C	C
June	17	A	
	30		A
July	17		B
	30	B	
August	17	G	
	30		G

Again, we have,

- Two people travel between G and D.
- E travels before F.

From the above conditions, Case 2 gets eliminated because two persons travel between G and D, which is not satisfied. Hence, Case 1 shows the final arrangement.

@RankZenBanker

Months	Date	Case 1	Case 2
		People	People
May	17	H	H
	30	C	C
June	17	A	
	30	D	A
July	17	E	B
	30	B	
August	17	G	
	30	F	G

Answer: B (D, E and G remain unchanged)

3. Questions

Final Arrangement:

Months	Date	People
May	17	H
	30	C
June	17	A
	30	D
July	17	E
	30	B
August	17	G
	30	F

@RankZenBanker

we have.

- Only three people travel between G and A who travel in a month having an even number of

days.

- As many people travel before A as after B.

From the above conditions, there are two possibilities:

Months	Date	Case 1	Case 2
		People	People

	30	C	C
June	17	A	
	30	D	A
July	17	E	B
	30	B	
August	17	G	
	30	F	G

Answer: D

6. Questions

Final Arrangement:

@RankZenBanker

we have,

- P sits at the end of the row.
- Only three persons sit between P and the one who faces V.
- As many persons sit to the left of V as to the right of O.

From the above conditions, there are two possibilities

Again, we have,

- M sits three places away from O.
- M faces an immediate neighbour of X who doesn't sit at the end.
- W sits at one of the ends and sits diagonally opposite to K.

@RankZenBanker

Again, we have,

- The number of persons who sit between P and K is **two more than** the number of persons who sit between V and U.
- L faces Z but doesn't sit to the right of N.

From the above conditions, Case 2 gets eliminated because L faces Z but doesn't sit to the right of N, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1

~~**Case 2**~~

Answer: E

7. Questions

Final Arrangement:

@RankZenBanker

we have,

- P sits at the end of the row.
- Only three persons sit between P and the one who faces V.
- As many persons sit to the left of V as to the right of O.

From the above conditions, there are two possibilities

Again, we have,

- M sits three places away from O.
- M faces an immediate neighbour of X who doesn't sit at the end.
- W sits at one of the ends and sits diagonally opposite to K.

@RankZenBanker

Again, we have,

- The number of persons who sit between P and K is **two more than** the number of persons who sit between V and U.
- L faces Z but doesn't sit to the right of N.

From the above conditions, Case 2 gets eliminated because L faces Z but doesn't sit to the right of N, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1

~~**Case 2**~~

Answer: B (In all the options, the given persons sit at the extreme ends of the row except option b)

8. Questions

Final Arrangement:

@RankZenBanker

we have,

- P sits at the end of the row.
- Only three persons sit between P and the one who faces V.
- As many persons sit to the left of V as to the right of O.

From the above conditions, there are two possibilities

Again, we have,

- M sits three places away from O.
- M faces an immediate neighbour of X who doesn't sit at the end.
- W sits at one of the ends and sits diagonally opposite to K.

@RankZenBanker

Again, we have,

- The number of persons who sit between P and K is **two more than** the number of persons who sit between V and U.
- L faces Z but doesn't sit to the right of N.

From the above conditions, Case 2 gets eliminated because L faces Z but doesn't sit to the right of N, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1

~~**Case 2**~~

Answer: D

9. Questions

Final Arrangement:

@RankZenBanker

we have,

- P sits at the end of the row.
- Only three persons sit between P and the one who faces V.
- As many persons sit to the left of V as to the right of O.

From the above conditions, there are two possibilities

Again, we have,

- M sits three places away from O.
- M faces an immediate neighbour of X who doesn't sit at the end.
- W sits at one of the ends and sits diagonally opposite to K.

@RankZenBanker

Again, we have,

- The number of persons who sit between P and K is **two more than** the number of persons who sit between V and U.
- L faces Z but doesn't sit to the right of N.

From the above conditions, Case 2 gets eliminated because L faces Z but doesn't sit to the right of N, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1

~~**Case 2**~~

Answer: A (One person sits between the given two persons)

10. Questions

Final Arrangement:

@RankZenBanker

we have,

- P sits at the end of the row.
- Only three persons sit between P and the one who faces V.
- As many persons sit to the left of V as to the right of O.

From the above conditions, there are two possibilities

Again, we have,

- M sits three places away from O.
- M faces an immediate neighbour of X who doesn't sit at the end.
- W sits at one of the ends and sits diagonally opposite to K.

@RankZenBanker

Again, we have,

- The number of persons who sit between P and K is **two more than** the number of persons who sit between V and U.
- L faces Z but doesn't sit to the right of N.

From the above conditions, Case 2 gets eliminated because L faces Z but doesn't sit to the right of N, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1

~~Case 2~~

Answer: C

11. Questions

Final Arrangement:

Boxes
P5
P7
P1
P3
P6
P4
P2

@RankZenBanker

we have,

- Only three boxes are kept above box P3.
- Two boxes are kept between box P3 and box P2.
- As many boxes are kept above box P2 as are kept below box P5.

From the above conditions, there are two possibilities:

Case 1	Case 2
Boxes	Boxes
P5	P2
P3	P3
P2	P5

Again, we have,

- The box P7 is adjacent to box P5.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	
P3	P3
	P7
P2	P5

@RankZenBanker

Again, we have,

- The number of boxes kept between box P7 and box P4 is **two more than** the number of boxes kept between box P1 and box P6.
- The box P6 is below box P1, which is below box P7.

From the above conditions, Case 2 gets eliminated because the box P6 is below box P1, which is below

box P7, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	P4
P1	P1
P3	P3
P6	P6
P4	P7
P2	P5

Answer: D

12. Questions

Final Arrangement:

Boxes
P5
P7
P1
P3
P6
P4
P2

@RankZenBanker

we have,

- Only three boxes are kept above box P3.
- Two boxes are kept between box P3 and box P2.
- As many boxes are kept above box P2 as are kept below box P5.

From the above conditions, there are two possibilities:

Case 1	Case 2
Boxes	Boxes
P5	P2
P3	P3
P2	P5

Again, we have,

- The box P7 is adjacent to box P5.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	
P3	P3
	P7
P2	P5

@RankZenBanker

Again, we have,

- The number of boxes kept between box P7 and box P4 is **two more than** the number of boxes kept between box P1 and box P6.
- The box P6 is below box P1, which is below box P7.

From the above conditions, Case 2 gets eliminated because the box P6 is below box P1, which is below box P7, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	P4
P1	P1
P3	P3
P6	P6
P4	P7
P2	P5

Answer: E (In all the given options, only one box is kept between the given boxes except option e)

13. Questions

Final Arrangement:

Boxes
P5
P7
P1
P3
P6
P4
P2

@RankZenBanker

we have,

- Only three boxes are kept above box P3.
- Two boxes are kept between box P3 and box P2.
- As many boxes are kept above box P2 as are kept below box P5.

From the above conditions, there are two possibilities:

Case 1	Case 2
Boxes	Boxes
P5	P2
P3	P3
P2	P5

Again, we have,

- The box P7 is adjacent to box P5.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	
P3	P3
	P7
P2	P5

@RankZenBanker

Again, we have,

- The number of boxes kept between box P7 and box P4 is **two more than** the number of boxes kept between box P1 and box P6.
- The box P6 is below box P1, which is below box P7.

From the above conditions, Case 2 gets eliminated because the box P6 is below box P1, which is below box P7, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	P4
P1	P1
P3	P3
P6	P6
P4	P7
P2	P5

Answer: D

14. Questions

Final Arrangement:

Boxes
P5
P7
P1
P3
P6
P4
P2

@RankZenBanker

we have,

- Only three boxes are kept above box P3.
- Two boxes are kept between box P3 and box P2.
- As many boxes are kept above box P2 as are kept below box P5.

From the above conditions, there are two possibilities:

Case 1	Case 2
Boxes	Boxes
P5	P2
P3	P3
P2	P5

Again, we have,

- The box P7 is adjacent to box P5.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	
P3	P3
	P7
P2	P5

@RankZenBanker

Again, we have,

- The number of boxes kept between box P7 and box P4 is **two more than** the number of boxes kept between box P1 and box P6.
- The box P6 is below box P1, which is below box P7.

From the above conditions, Case 2 gets eliminated because the box P6 is below box P1, which is below box P7, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	P4
P1	P1
P3	P3
P6	P6
P4	P7
P2	P5

Answer: C (Only three boxes are kept between the given boxes.)

15. Questions

Final Arrangement:

Boxes
P5
P7
P1
P3
P6
P4
P2

@RankZenBanker

we have,

- Only three boxes are kept above box P3.
- Two boxes are kept between box P3 and box P2.
- As many boxes are kept above box P2 as are kept below box P5.

From the above conditions, there are two possibilities:

Case 1	Case 2
Boxes	Boxes
P5	P2
P3	P3
P2	P5

Again, we have,

- The box P7 is adjacent to box P5.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	
P3	P3
	P7
P2	P5

@RankZenBanker

Again, we have,

- The number of boxes kept between box P7 and box P4 is **two more than** the number of boxes kept between box P1 and box P6.
- The box P6 is below box P1, which is below box P7.

From the above conditions, Case 2 gets eliminated because the box P6 is below box P1, which is below box P7, which is not satisfied. Hence, Case 1 shows the final arrangement.

Case 1	Case 2
Boxes	Boxes
P5	P2
P7	P4
P1	P1
P3	P3
P6	P6
P4	P7
P2	P5

Answer: C

16. Questions

Final arrangement:

@RankZenBanker

We have,

- D sits third to the right of C and opposite to G.
- Only one person sits between G and E.

From the above conditions there are two possibilities

Again, we have,

- As many persons sit between D and E as between C and B, when counted from left of both D and C.
- H sits adjacent to B.

Again, we have,

- A sits second to the left of F but not opposite to C.

@RankZenBanker

From the above conditions case-2 gets eliminated because A sits second to the left of F but not opposite to C, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: C

17. Questions

Final arrangement:

We have,

- D sits third to the right of C and opposite to G.
- Only one person sits between G and E.

From the above conditions there are two possibilities

Again, we have,

- As many persons sit between D and E as between C and B, when counted from left of both D and C.
- H sits adjacent to B.

Again, we have,

- A sits second to the left of F but not opposite to C.

From the above conditions case-2 gets eliminated because A sits second to the left of F but not opposite to C, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: D

18. Questions

Final arrangement:

We have,

- D sits third to the right of C and opposite to G.
- Only one person sits between G and E.

@RankZenBanker

From the above conditions there are two possibilities

Again, we have,

- As many persons sit between D and E as between C and B, when counted from left of both D and C.
- H sits adjacent to B.

Again, we have,

- A sits second to the left of F but not opposite to C.

From the above conditions case-2 gets eliminated because A sits second to the left of F but not opposite to C, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: B

19. Questions

Final arrangement:

We have,

- D sits third to the right of C and opposite to G.
- Only one person sits between G and E.

From the above conditions there are two possibilities

Again, we have,

- As many persons sit between D and E as between C and B, when counted from left of both D and C.
- H sits adjacent to B.

Again, we have,

@RankZenBanker

- A sits second to the left of F but not opposite to C.

From the above conditions case-2 gets eliminated because A sits second to the left of F but not opposite to C, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: A

20. Questions

Final arrangement:

We have,

- D sits third to the right of C and opposite to G.
- Only one person sits between G and E.

From the above conditions there are two possibilities

@RankZenBanker

Again, we have,

- As many persons sit between D and E as between C and B, when counted from left of both D and C.
- H sits adjacent to B.

Again, we have,

- A sits second to the left of F but not opposite to C.

From the above conditions case-2 gets eliminated because A sits second to the left of F but not opposite to C

C, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: D

21. Questions

Answer: C

Given series: U G % J I 8 9 # H W 7 @ O P 6 ^ Q A 9) **D** A 3 1 S E & 9 > B K O < 8 ? # 7 8 * F N 2 4 + G 5 !

The element which is sixteenth to the right of the fifth element from the left end = **D**

22. Questions

Answer: E

Given series: U G % J I 8 9 # H W 7 @ O P 6 ^ Q A 9) **D** A 3 1 S E & 9 > B K O < 8 ? # 7 8 * F N 2 4 + G 5 !

All the symbols and numbers are dropped from the given series then,

@RankZenBanker

Required series: U G J I H W O P Q A **D** A S E B K O F N G

The element which is second to the left of the thirteenth element from the left end = **D**

23. Questions

Answer: C

Given series: U G % J I 8 9 # H W 7 @ O P 6 ^ Q A 9) **D** A 3 1 S E & 9 > B K O < 8 ? # 7 8 * F N 2 4 + G 5 !

There are seven symbols which are followed by letters and are immediately preceded by numbers in the given series,

Required series: U G % J I 8 **9** # **H** W **7** @ **O** P **6** ^ **Q** A **9**) **D** A 3 1 S E & **9** > B K O < 8 ? # 7 **8** * F N 2 4 + G 5 !

24. Questions

Answer: B

Given series: U G % J I 8 9 # H W 7 @ O P 6 ^ Q A 9) **D** A 3 1 S E & 9 > B K O < 8 ? # 7 8 * F N 2 4 + G 5 !

The element which is exactly between the seventh element from the left end i.e 9 and the nineteenth element from the right end i.e > is A

25. Questions

Answer: D

Given series: U G % J I 8 9 # H W 7 @ O P 6 ^ Q A 9) D A 3 1 S E & 9 > B K O < 8 ? # 7 8 * F N 2 4 + G 5 !

a). H 7 O = H W 7 @ O

b). P ^ A = P 6 ^ Q A

c). D 3 S = D A 3 1 S

d). > B K = > B K

e). O 8 # = O < 8 ? #

@RankZenBanker

Answer: A

31. Questions

Final Arrangement:

Answer: C

By applying Pythagoras theorem,

Distance between Point E and Point G = $\sqrt{4^2 + 6^2} = \sqrt{16 + 36} = \sqrt{52} = 2\sqrt{13}$ m

32. Questions

Final Arrangement:

@RankZenBanker

Answer: E

33. Questions

Final Arrangement:

@RankZenBanker

Answer: B (All points are north-east/southwest to each other except Point C and Point D, which are in the same horizontal line (Point C is west of Point D))

34. Questions

Final Arrangement:

Answer: D

35. Questions

Final Arrangement:

@RankZenBanker

Answer: B

By applying Pythagoras theorem,

$$\text{Distance} = \sqrt{(8^2 + 7^2)} = \sqrt{(64 + 49)} = \sqrt{113} \text{ m}$$

36. Questions

Answer: B

Conclusion I: All Paper are Book is a possibility: Here, there is direct connection between Paper and Book. Some parts of books are associated with paper and vice versa. So, the possible conclusion between them follows. Hence, the conclusion follows.

Conclusion II: Some Note are Book: Here, there is no direct connection between note and book. So, the definite conclusion of some note are book doesn't follow. Hence, the conclusion does not follow.

37. Questions

Answer: E

@RankZenBanker

Conclusion I: Some winter are Spring: Here, there is an indirect connection between winter and spring through seasons. Some parts of winter are associated with seasons. All parts of seasons are inside the Spring. So, the definite conclusion follows. Hence, the conclusion follows.

Conclusion II: All flowers are winter is a possibility: Here, there is no connection between winter and Flowers. So the possible conclusion follows. Hence, the conclusion follows.

38. Questions

Answer: A

Conclusion I: No Inverter are Fans: Here, there is an indirect connection between Fans and Inverter through Cooler. So, the negative definite conclusion between inverter and fan doesn't follow. Hence, the conclusion does not follow.

Conclusion II: Some Coolers are not Acs : Here, Ac's is only related to Inverter so its relation with any other element is not possible. Hence, the conclusion follows.

39. Questions

Answer: D

@RankZenBanker

Conclusion I: Some leather are Plastic: Here, there is no direct connection between Plastic and Leather. So, all the definite conclusions between them do not follow. Hence, the conclusion does not follow.

Conclusion II : No Plastic is Leather: Here, there is no direct connection between Plastic and Leather. So, all the definite conclusions between them do not follow. Hence, the conclusion does not follow.

But, by combining both conclusions I and II, we can say that either conclusion I or II follows.

40. Questions

Answer: B

Conclusion I: Some Juice are Guava: Here, there is a negative direct connection between Juice and guava i.e., no juice is guava. Hence, the conclusion does not follow.

Conclusion II: All Tasty are Juice is not a possibility: Here, there is a direct connection between Juice and Tasty. We can't place all tasty as juice, Hence, the conclusion follows.

@RankZenBanker
