

1. Questions

Study the following information carefully and answer the given questions.

A certain number of boxes are kept one above another in a stack. It is assumed that no other boxes are kept in the stack other than the given boxes.

Box I is kept two places above box A. Only two boxes are kept between box A and box K. The number of boxes kept between box M and box Q is **one less than** the number of boxes kept between box G and box T. Not more than three boxes are kept above box I. Box G is kept immediately above the box which is kept two places above box O. Only three boxes are kept between box Q and box K, which is kept immediately below box G. Box M is kept above box I but not immediately above and doesn't keep at the top most position in the stack. Not more than twelve boxes are kept in the stack.

Which of the following boxes is kept two places below the box A?

- a. The box which is kept immediately above box T
- b. The box which is kept three places above box O
- c. The box which is kept two places below box G
- d. The box which is kept two places above box K
- e. The box which is kept three places above box Q

2. Questions

Which of the following statement(s) is not TRUE with respect to the final arrangement?

- a. Box Q is kept three places above box G
- b. Three boxes are kept between box T and box G
- c. Box M is kept at the second position from the top of the stack
- d. More than five boxes are kept above box O
- e. All are true

3. Questions

How many boxes are kept between box K and box Q?

@QuizByMickey

- a. As many boxes kept below box O
- b. As many boxes kept between box A and box T
- c. As many boxes are kept above box I
- d. As many boxes kept between box M and box I
- e. As many boxes kept between box G and box A

4. Questions

The number of boxes placed above box Q is the same as the number of boxes placed between box ____ and box ____.

- a. Q and G
- b. A and K
- c. T and O
- d. O and A
- e. I and Q

5. Questions

If box X is kept immediately above box G, then what is the position of box X with respect to box K?

- a. Two places above
- b. Three places above
- c. Two places below
- d. Three places below
- e. Immediately below

6. Questions

Study the following information carefully and answer the given questions.

Eight persons of a family sit around a circular table, in such a way that all are facing inside the table. There are three generations and two married couples in this family.

D, who is B's son, sits third to the left of H. A is the daughter-in-law of F, who is an immediate neighbour of D. Only two persons sit between C and the father of H. H is the nephew of G, who is the only brother-in-law of D. E sits second to the right of her grandmother. Neither A nor the mother of C is an immediate neighbour of E's aunt. F is the paternal grandfather of D's only son. B has only one daughter. A has two children. Not less than two persons sit between G and B's spouse when counted from the left of B's spouse.

Who among the following persons sits opposite to B's daughter?

- a. D's spouse
- b. A's father-in-law
- c. D's brother-in-law
- d. E's mother
- e. H's father

@QuizByMickey

7. Questions

How many persons sit between E and her mother?

- a. One
- b. Two
- c. Three
- d. Four
- e. Both b and d

8. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- I).** G is the uncle of E.
- II).** Three persons sit between A and her mother-in-law
- III).** A's daughter sits opposite to D

- a. Only II and III
- b. Only I and II
- c. Only II
- d. Only I and III
- e. All are true

9. Questions

Who among the following persons sits third to the right of the one who sits opposite to F's Grandson?

- a. C
- b. A
- c. E
- d. B
- e. D

10. Questions

Which among the following pairs of persons are definitely younger than A?

- a. G and C
- b. B and G
- c. E and H
- d. F and C
- e. H and G

@QuizByMickey

11. Questions

Study the following information carefully and answer the given questions.

A School organised an activity sessions for the students in a summer vacation. The sessions were held in between 10am and 6pm. six sessions were held, two sessions for Yoga activity, two sessions for dance activity and two sessions for painting. Each session was held for 1 hr. There are two breaks between the session viz. 1-2 pm lunch break and 4-5 pm Snacks break.

Note: No two continuous sessions were held for the same activity.

One of the Painting sessions was held after the lunch break. One of the dance sessions was held 180 minutes before the Yoga session. Dance session was held neither immediately before nor immediately after the Lunch break. One of the Painting sessions was held 120 minutes after one of the Yoga sessions. Dance sessions were not held after the snacks breaks.

What is the time (Hrs) gap between both Yoga sessions?

- a. 2 hrs
- b. 4 hrs
- c. 3 hrs
- d. 5 hrs
- e. 6 hrs

12. Questions

Which among the following session(s) is/are held after 3pm?

- a. Yoga
- b. Painting
- c. Dance
- d. Both (a) and (b)
- e. Both (b) and (c)

13. Questions

Which of the following session was held from 12 pm – 1 pm?

- a. Dance
- b. Either a or c
- c. Yoga
- d. Painting
- e. Either c or d

14. Questions

@QuizByMickey

Painting session was held at which of the following time?

- a. 10-11 am
- b. 12-1 pm
- c. 2-3 pm
- d. 5-6 pm
- e. Both (b) and (d)

15. Questions

Which of the following statement(s) is/are true with respect to the final arrangement?

- a. Dance session was held immediately before Yoga session
- b. As many sessions held before 1st Dance session as after 2nd Yoga session
- c. Yoga session was held 120 minutes before Dance session
- d. Two sessions were held between Snack break and Yoga session
- e. None is true

16. Questions

Study the following information carefully and answer the given questions.

Eight persons- A, B, C, D, E, F, G and H are living on eight different floors such that the bottommost floor is numbered as 1 and the floor immediately above it is numbered as 2 and so on. All the persons like different items- Shoes, Books, Clothes, Mobiles, Perfumes, Watches, Laptops and Chocolates.

C lives on an even-numbered floor. The number of persons living above C is **two less than** the number of persons living below the one who likes shoes. The one who likes chocolates lives on the bottommost floor. Only two persons live between the one who likes chocolates and the one who likes watches. E lives immediately below the one who likes shoes. F likes mobiles and lives on the floor immediately above B. Neither G nor the one who likes laptops lives on an odd-numbered floor. Only three persons live between D and A, who likes perfumes. As many persons live below B as above H. The one who likes clothes lives two floors below the one who likes books. Neither B nor G likes laptops.

Which of the following statements is TRUE regarding G with respect to the final arrangement?

- a. The one who lives immediately below G likes laptops
- b. G lives two floors above the one who likes chocolates
- c. G likes watches
- d. As many persons lives below G as above D
- e. G lives immediately below B

17. Questions

Who among the following persons lives on floor 3?

- a. The one who likes shoes
- b. G
- c. E
- d. The one who likes mobiles
- e. B

18. Questions

Which of the following items is liked by B?

- a. Watches
- b. Books
- c. Laptops
- d. Chocolates
- e. Clothes

19. Questions

How many persons live between the floors on which E lives and the one who likes Clothes?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

20. Questions

Which of the following combination(s) is/are TRUE with respect to the final arrangement?

I). E - Laptops

II). C - Books

III). G - Clothes

- a. Only III
- b. Only I and II
- c. All I, II and III
- d. Only II and III
- e. Only II

@QuizByMickey

Explanations:

1. Questions

Final arrangement:

Boxes
M
I
Q
A
G
K
O
T

We have,

- Box I is kept two places above box A.
- Only two boxes are kept between box A and box K.

@QuizByMickey

From the above conditions, there are two possibilities

Case-1	Case-2
Boxes	Boxes
K	I
I	
	A
A	
	K

Again we have,

- The number of boxes kept between box M and box Q is one less than the number of boxes kept between box G and box T.
- Not more than three boxes are kept above box I.
- Box G is kept immediately above the box which is kept two places above box O.
- Only three boxes are kept between box Q and box K, which is kept immediately below box G.
- Box M is kept above box I but not immediately above and doesn't keep at the top most position in the stack.
- Not more than twelve boxes are kept in the stack.

From the above conditions, case-1 gets eliminated because Not more than three boxes are kept above box I, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@QuizByMickey

Case-1	Case-2
Boxes	Boxes
M	M
G	
K	I
I	Q
O	A
A	
Q	G
	K
T	
	O
	T

Answer: B

2. Questions

Final arrangement:

@QuizByMickey

Boxes
M
I
Q
A
G
K
O
T

We have,

- Box I is kept two places above box A.
- Only two boxes are kept between box A and box K.

From the above conditions, there are two possibilities

@QuizByMickey

Case-1	Case-2
Boxes	Boxes
K	I
I	
	A
A	
	K

Again we have,

- The number of boxes kept between box M and box Q is one less than the number of boxes kept between box G and box T.
- Not more than three boxes are kept above box I.
- Box G is kept immediately above the box which is kept two places above box O.
- Only three boxes are kept between box Q and box K, which is kept immediately below box G.
- Box M is kept above box I but not immediately above and doesn't keep at the top most position in the stack.
- Not more than twelve boxes are kept in the stack.

From the above conditions, case-1 gets eliminated because Not more than three boxes are kept above box I, which is not satisfied.

Hence, Case-2 shows the final arrangement.

3. Questions

Final arrangement:

@QuizByMickey

Boxes
M
I
Q
A
G
K
O
T

We have,

- Box I is kept two places above box A.
- Only two boxes are kept between box A and box K.

From the above conditions, there are two possibilities

@QuizByMickey

Case-1	Case-2
Boxes	Boxes
K	I
I	
	A
A	
	K

Again we have,

- The number of boxes kept between box M and box Q is one less than the number of boxes kept between box G and box T.
- Not more than three boxes are kept above box I.
- Box G is kept immediately above the box which is kept two places above box O.
- Only three boxes are kept between box Q and box K, which is kept immediately below box G.
- Box M is kept above box I but not immediately above and doesn't keep at the top most position in the stack.
- Not more than twelve boxes are kept in the stack.

From the above conditions, case-1 gets eliminated because Not more than three boxes are kept above box I, which is not satisfied.

Hence, Case-2 shows the final arrangement.

Answer: A

6. Questions

Final arrangement:

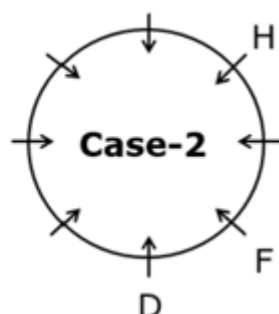

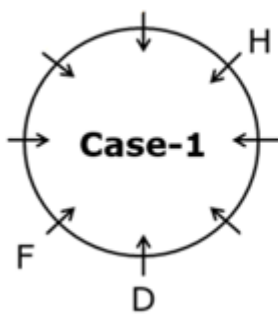

@QuizByMickey

$$\begin{array}{c}
 B (-) = F (+) \\
 | \\
 G (+) - A (-) = D (+) - C (-) \\
 | \\
 H (+) - E (-)
 \end{array}$$

We have,

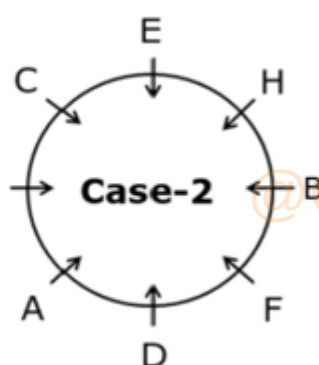

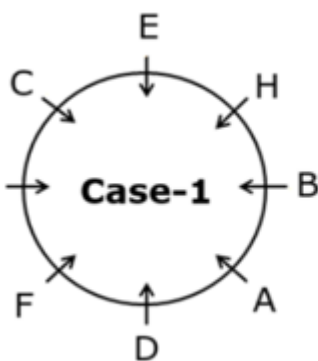

- D who is B's son sits third to the left of H.
- A is the daughter-in-law of F, who is an immediate neighbour of D.

From the above conditions, there are two possibilities

Again we have,

- Only two persons sit between C and the father of H.
- H is the nephew of G, who is the only brother-in-law of D.
- E sits second to the right of her grandmother.
- Neither A nor the mother of C is an immediate neighbour of E's aunt.
- F is the paternal grandfather of D's only son.
- B has only one daughter.
- A has two children.

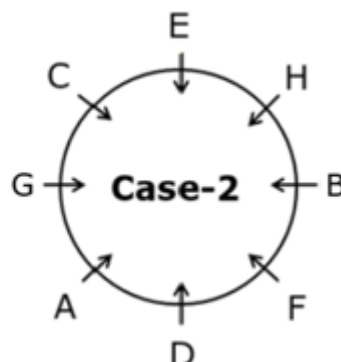

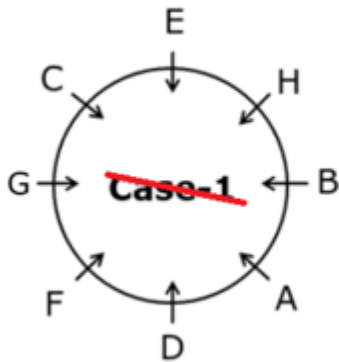

Again we have,

- Not less than two persons sit between G and B's spouse when counted from the left of B's spouse.

From the above conditions, case-1 gets eliminated because not less than two persons sit between G and B's spouse when counted from the left of B's spouse, which is not satisfied.

Hence, Case-2 shows the final arrangement.

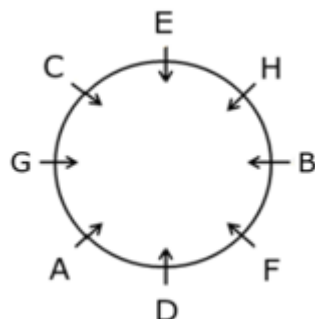

$$\begin{array}{c} B (-) = F (+) \\ | \\ G (+) - A (-) = D (+) - C (-) \\ | \\ H (+) - E (-) \end{array}$$

Answer: B

7. Questions

Final arrangement:

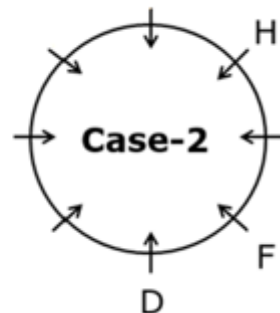

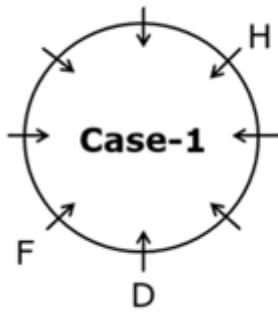

$$\begin{array}{c} B (-) = F (+) \\ | \\ G (+) - A (-) = D (+) - C (-) \\ | \\ H (+) - E (-) \end{array}$$

@QuizByMickey

We have,

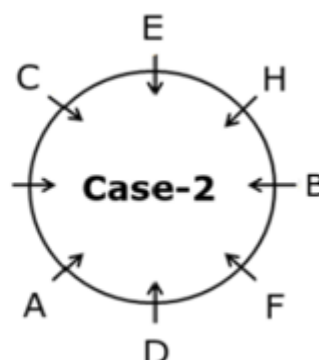

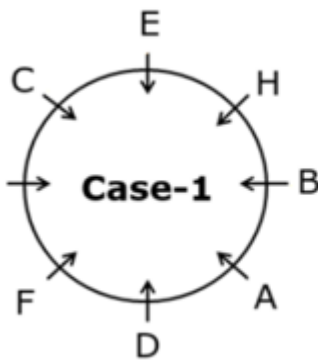

- D who is B's son sits third to the left of H.
- A is the daughter-in-law of F, who is an immediate neighbour of D.

From the above conditions, there are two possibilities

Again we have,

- Only two persons sit between C and the father of H.
- H is the nephew of G, who is the only brother-in-law of D.
- E sits second to the right of her grandmother.
- Neither A nor the mother of C is an immediate neighbour of E's aunt.
- F is the paternal grandfather of D's only son.
- B has only one daughter.
- A has two children.

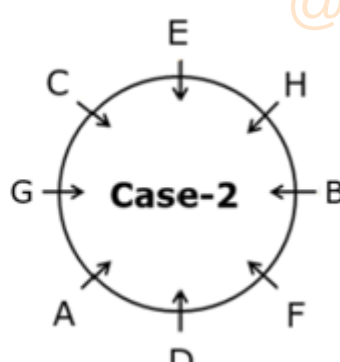

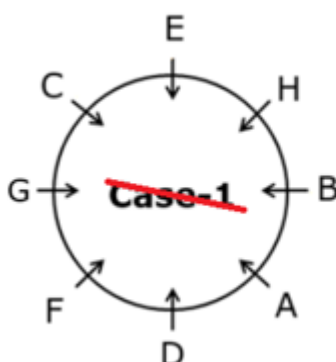

Again we have,

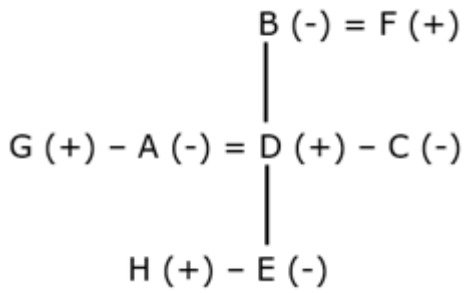

- Not less than two persons sit between G and B's spouse when counted from the left of B's spouse.

From the above conditions, case-1 gets eliminated because not less than two persons sit between G and B's spouse when counted from the left of B's spouse, which is not satisfied.

Hence, Case-2 shows the final arrangement.

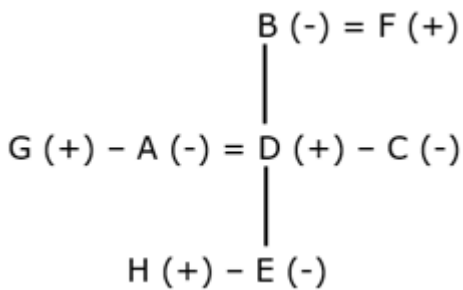

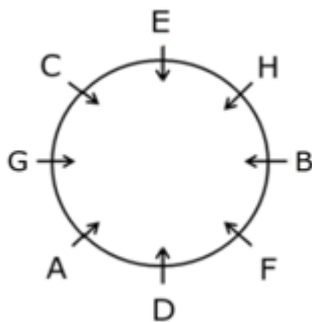

@QuizByMickey

Answer: E

8. Questions

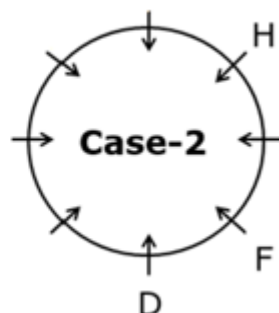

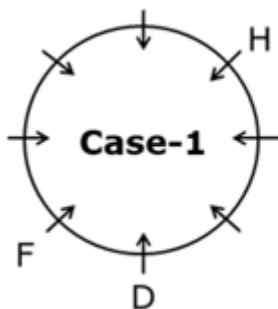

Final arrangement:

We have,

- D who is B's son sits third to the left of H.
- A is the daughter-in-law of F, who is an immediate neighbour of D.

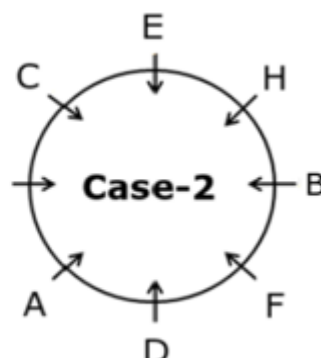

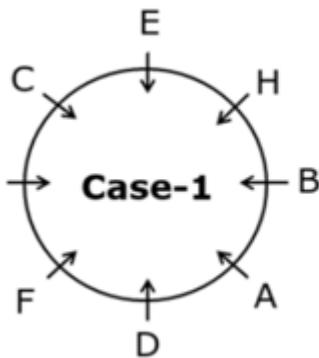

From the above conditions, there are two possibilities

Again we have,

- Only two persons sit between C and the father of H.
- H is the nephew of G, who is the only brother-in-law of D.

- E sits second to the right of her grandmother.
- Neither A nor the mother of C is an immediate neighbour of E's aunt.
- F is the paternal grandfather of D's only son.
- B has only one daughter.
- A has two children.

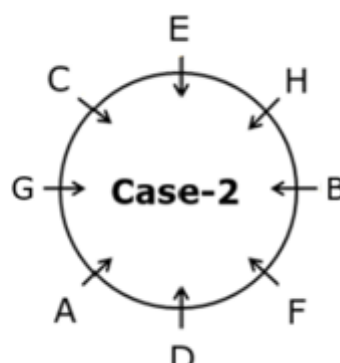

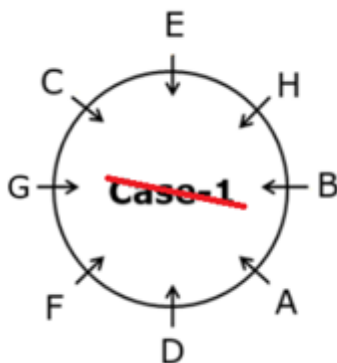

Again we have,

- Not less than two persons sit between G and B's spouse when counted from the left of B's spouse.

From the above conditions, case-1 gets eliminated because not less than two persons sit between G and B's spouse when counted from the left of B's spouse, which is not satisfied.

Hence, Case-2 shows the final arrangement.

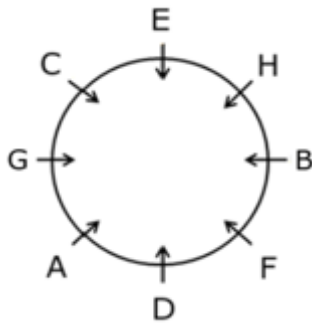

$$\begin{array}{c}
 B (-) = F (+) \\
 | \\
 G (+) - A (-) = D (+) - C (-) \\
 | \\
 H (+) - E (-)
 \end{array}$$

@QuizByMickey

Answer: D

9. Questions

Final arrangement:

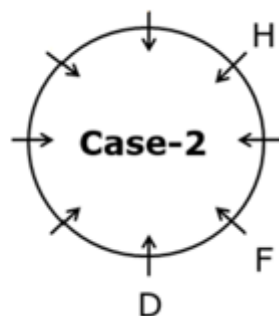

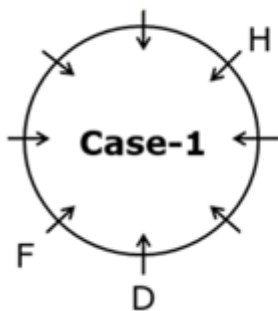

$$\begin{array}{c}
 B (-) = F (+) \\
 | \\
 G (+) - A (-) = D (+) - C (-) \\
 | \\
 H (+) - E (-)
 \end{array}$$

We have,

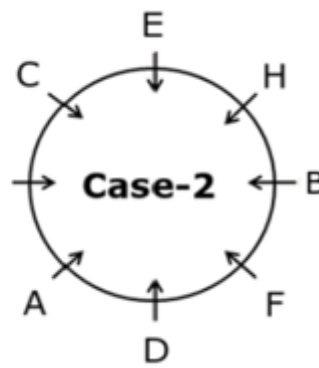

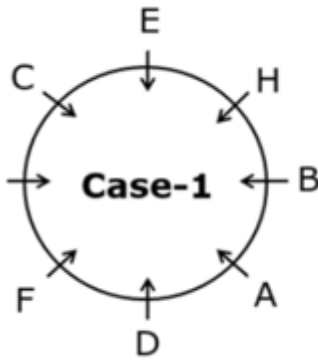

- D who is B's son sits third to the left of H.
- A is the daughter-in-law of F, who is an immediate neighbour of D.

From the above conditions, there are two possibilities

Again we have,

- Only two persons sit between C and the father of H.
- H is the nephew of G, who is the only brother-in-law of D.
- E sits second to the right of her grandmother.
- Neither A nor the mother of C is an immediate neighbour of E's aunt.
- F is the paternal grandfather of D's only son.
- B has only one daughter.
- A has two children.

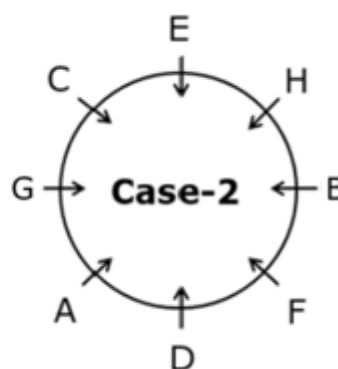

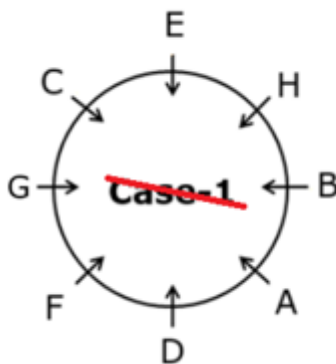

Again we have,

- Not less than two persons sit between G and B's spouse when counted from the left of B's spouse.

From the above conditions, case-1 gets eliminated because not less than two persons sit between G and B's spouse when counted from the left of B's spouse, which is not satisfied.

Hence, Case-2 shows the final arrangement.

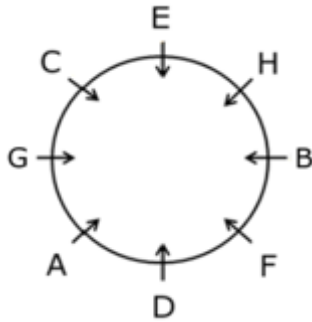

$$\begin{array}{c}
 B (-) = F (+) \\
 | \\
 G (+) - A (-) = D (+) - C (-) \\
 | \\
 H (+) - E (-)
 \end{array}$$

Answer: D

10. Questions

Final arrangement:

@QuizByMickey

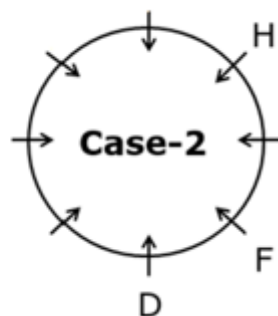

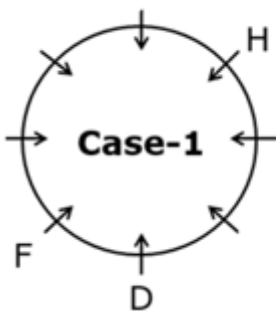

$$\begin{array}{c}
 B (-) = F (+) \\
 | \\
 G (+) - A (-) = D (+) - C (-) \\
 | \\
 H (+) - E (-)
 \end{array}$$

We have,

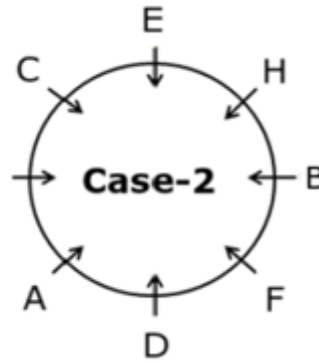

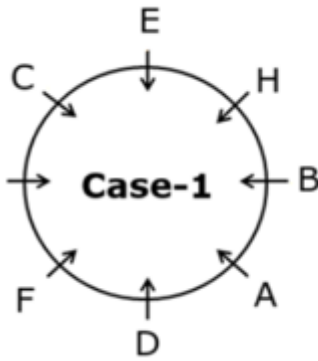

- D who is B's son sits third to the left of H.
- A is the daughter-in-law of F, who is an immediate neighbour of D.

From the above conditions, there are two possibilities

Again we have,

- Only two persons sit between C and the father of H.
- H is the nephew of G, who is the only brother-in-law of D.
- E sits second to the right of her grandmother.
- Neither A nor the mother of C is an immediate neighbour of E's aunt.
- F is the paternal grandfather of D's only son.
- B has only one daughter.
- A has two children.

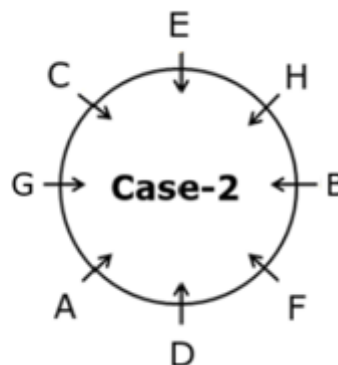

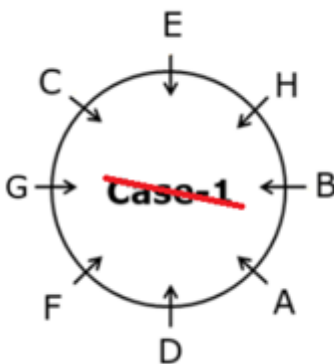

Again we have,

- Not less than two persons sit between G and B's spouse when counted from the left of B's spouse.

From the above conditions, case-1 gets eliminated because not less than two persons sit between G and B's spouse when counted from the left of B's spouse, which is not satisfied.

Hence, Case-2 shows the final arrangement.

$$\begin{array}{c}
 B (-) = F (+) \\
 | \\
 G (+) - A (-) = D (+) - C (-) \\
 | \\
 H (+) - E (-)
 \end{array}$$

Answer: C

11. Questions

Final arrangement:

10am-11pm			
11am-12pm			
12pm-1pm			
1pm-2pm	Lunch break	Lunch break	Lunch break
2pm-3pm	Painting		
3pm-4pm		Painting	
4pm-5pm	Snack break	Snack break	Snack break
5pm-6pm			Painting

Again we have,

- One of the dance sessions was held 180 minutes before the Yoga session.
- Dance session was held neither immediately before nor immediately after the Lunch break.

From the above conditions case 1 gets eliminated because dance session was held immediately before lunch break.

@QuizByMickey

	Case 1	Case 2	Case 3
Timing	Sessions	Sessions	Sessions
10am-11pm			
11am-12pm		Dance	Dance
12pm-1pm	Dance		
1pm-2pm	Lunch break	Lunch break	Lunch break
2pm-3pm	Painting	Yoga	Yoga
3pm-4pm	Yoga	Painting	
4pm-5pm	Snack break	Snack break	Snack break
5pm-6pm			Painting

Again we have,

- One of the Painting sessions was held 120 minutes after one of the Yoga sessions.
- Dance sessions were not held after the snacks breaks.

From the above conditions case 2 gets eliminated because Dance session was held after snack break.
Hence case 3 shows the final arrangement.

	Case 2	Case 3

Answer: E

15. Questions

Final arrangement:

@QuizByMickey

Timing	Session
10am-11pm	Yoga
11am-12pm	Dance
12pm-1pm	Painting
1pm-2pm	Lunch break
2pm-3pm	Yoga
3pm-4pm	Dance
4pm-5pm	Snack break
5pm-6pm	Painting

We have,

- One of the Painting sessions was held after the lunch break.

	Case 1	Case 2	Case 3
Timing	Sessions	Sessions	Sessions
10am-11pm			
11am-12pm			
12pm-1pm			
1pm-2pm	Lunch break	Lunch break	Lunch break
2pm-3pm	Painting		
3pm-4pm		Painting	
4pm-5pm	Snack break	Snack break	Snack break
5pm-6pm			Painting

Again we have,

- One of the dance sessions was held 180 minutes before the Yoga session.
- Dance session was held neither immediately before nor immediately after the Lunch break.

From the above conditions case 1 gets eliminated because dance session was held immediately before lunch break.

@QuizByMickey

	Case 1	Case 2	Case 3
Timing	Sessions	Sessions	Sessions
10am-11pm			
11am-12pm		Dance	Dance
12pm-1pm	Dance		
1pm-2pm	Lunch break	Lunch break	Lunch break

Answer: E

16. Questions

Final arrangement:

@QuizByMickey

Floors	Persons	Items
8	C	Books
7	F	Mobiles
6	B	Clothes
5	A	Perfumes
4	G	watches
3	H	Shoes
2	E	Laptops
1	D	Chocolates

We have,

- C lives on an even-numbered floor.
- The number of persons living above C is **two less than** the number of persons living below the one who likes shoes.

From the above conditions, there are three possibilities

Floors	Case-1		Case-2		Case-3	
	Persons	Items	Persons	Items	Persons	Items
8					C	
7		Shoes				
6			C			
5				Shoes		
4	C					
3						Shoes
2						
1						

@QuizByMickey

Again we have,

- The one who likes chocolates lives on the bottommost floor.
- Only two persons live between the one who likes chocolates and the one who likes watches.
- E lives immediately below the one who likes shoes.
- F likes mobiles and lives on the floor immediately above B.
- Neither G nor the one who likes laptops lives on an odd-numbered floor.
- Only three persons live between D and A, who likes perfumes.
- As many persons live below B as above H.

From the above conditions, case-2 gets eliminated because neither G nor the one who likes laptops lives on an odd-numbered floor, which is not satisfied.

Floors	Case-1		Case-2		Case-3	
	Persons	Items	Persons	Items	Persons	Items
8	G		A	Perfumes	C	
7	H	Shoes	H	Books	F	Mobiles
6	E		C		B	
5	A	Perfumes		Shoes	A	Perfumes
4	C	Watches	D	Watches	G	Watches
3	F	Mobiles	F	Mobiles	H	Shoes
2	B		B		E	
1	D	Chocolate		Chocolates	D	Chocolates

Again we have,

- The one who likes clothes lives two floors below the one who likes books.
- Neither B nor G likes laptops.

From the above conditions, case-1 gets eliminated because neither B nor G likes laptops, which is not satisfied.

Hence, Case-3 shows the final arrangement.

Floors	Case-1		Case-3	
	Persons	Items	Persons	Items
8	G	Books	C	Books
7	H	Shoes	F	Mobiles
6	E	Clothes	B	Clothes
5	A	Perfumes	A	Perfumes
4	C	Watches	G	watches
3	F	Mobiles	H	Shoes
2	B		E	Laptops
1	D	Chocolate	D	Chocolates

Answer: C

17. Questions

Final arrangement:

Floors	Persons	Items
8	C	Books
7	F	Mobiles
6	B	Clothes
5	A	Perfumes
4	G	watches
3	H	Shoes
2	E	Laptops
1	D	Chocolates

@QuizByMickey

We have,

- C lives on an even-numbered floor.

- The number of persons living above C is **two less than** the number of persons living below the one who likes shoes.

From the above conditions, there are three possibilities

Floors	Case-1		Case-2		Case-3
