

## 1. Questions

In the following questions, the symbols #, @, %, &, !, and \$ are used with the meanings as illustrated below. Study the following information and answer the given question. In each of the questions given below, statements are followed by some conclusions. You have to take the given statements to be true even if they seem to be at variance from commonly known facts. Read the conclusions and then decide which of the given conclusions logically follows from the given statements, disregarding commonly known facts.

$X\$Y \rightarrow$  Some X is Y

$X@Y \rightarrow$  All Y is X

$X\#Y \rightarrow$  No X is Y

$X!Y \rightarrow$  Only a few Y is X

$X\%Y \rightarrow$  Some Y is not X

$X\&Y \rightarrow$  Only X is Y

### Statements:

Blade @ Manage;

Yeast & Drain ;

Place # Flute;

Blade ! Flute;

Yeast ! Place;

Flute \$ Manage

### Conclusions:

I). All Manage can be Place

II). Some Yeast can never be Blade

III). No Flute is Drain

- a. Only conclusion II follows
- b. Both conclusions II and III follow
- c. Either conclusion I or II follows
- d. Only conclusion III follows
- e. All conclusions I, II and III follow

@QuizByMickey

## 2. Questions

### Statements:

Martin & Create ;

Absent \$ Martin;

Narrow ! Absent;

Zooms @ Narrow;

Horror! Zooms.

**Conclusions:**

**I).** All Absent are Horror

**II).** Some Create can be Zoom

**III).** Some Absent are not Horror

- a. Both conclusions II and III follow
- b. Both conclusions I and III follow
- c. Only conclusion II follows
- d. Either conclusion I or III follows
- e. None of the conclusions follows

**3. Questions**

**Statements:**

Magic \$ Final% Eager;

Urban & Blink;

Abacus @ Guilt ! Magic # Urban.

**Conclusions:**

**I).** No Eager is Urban

**II).** All Guilt can never be Blink

**III).** All Abacus being Magic is a possibility

- a. Only conclusion I follows
- b. Both conclusions II and III follow
- c. Only conclusion III follows
- d. Both conclusions I and II follow
- e. Only conclusion II follows

@QuizByMickey

**4. Questions**

**Statements:**

Dairy % Dream;

Diary ! Arrow;

Result @ Listen;

Arrow \$ Dairy;

Result # Dairy.

**Conclusions:**

**I).** Some Listen can be Dairy

**II).** Some Dairy are not Result

**III).** All Dream can be Dairy

- a. Both conclusions II and III follow
- b. Only conclusion I follows
- c. Only conclusion III follows
- d. Only conclusion II follows
- e. All the conclusions I, II and III follow

**5. Questions**

**Statements:**

Pepper & Notice;

Secure ! Pepper @ Learn # Action;

Card % Action \$ Think.

**Conclusions:**

**I).** All Learn being Secure is a possibility

**II).** Some Think can never be Card

**III).** No Notice being pepper is a possibility

- a. Only conclusion I follows
- b. Both conclusions I and III follow
- c. Only conclusion II follows
- d. Both conclusions II and III follow
- e. Both conclusions I and II follow

@QuizByMickey

**6. Questions**

**Study the following information carefully and answer the given questions.**

Fifteen persons are sitting in the train such that two seats are there in the left of the aisle and one seat to the right of the aisle, totally three seats in each row such that 5 rows are available.

A sits in row II on the left side of the aisle. B sits in row III on the left side of the aisle but not in the seat immediately behind A. C sits in one of the seats to the right of B in the same row as B. D sits in the seat immediately behind C. As many persons sitting to the left of D in the row in which D is sitting are the same as those who sit to the left of E in the row in which E is sitting. E sits in one of the rows in front of D but not in the same row as A. F sits in the same row as E and immediately in front of G. H sits in one of the seats to the right of G in the same row. J sits on the right side of the aisle where K and J sit in the same row. L sits in the seat immediately in front of K, but not immediately behind B. N sits in one of the rows in front of M, who doesn't sit in a seat adjacent to the aisle. O sits in one of the rows behind P. N neither sits in the same row as F nor B.

I). \_\_\_\_\_

II). \_\_\_\_\_

III). \_\_\_\_\_

IV). \_\_\_\_\_

V). \_\_\_\_\_

**Who among the following persons sit in the same row as H?**

- The one who sits immediately behind N and O
- A and the one who sits immediately in front of B
- J and the one who sits right side of the aisle in row II
- N and the one who sits immediately behind L
- The one who sits left of P and G

## 7. Questions

**The number of persons sitting to the right of \_\_\_\_ in the row in which D is sitting is equal to the number of persons sitting to the left of \_\_\_\_ in the row in which A is sitting.**

- N, H
- A, L
- G, D
- H, L
- G, N

@QuizByMickey

## 8. Questions

**Who among the following persons sit in row V?**

- G, H, A
- N, L, D
- M, K, J

d. F, P, E

e. B, O, C

#### 9. Questions

Four of the following five are alike in a certain way and hence form a group. Which of the following does not belong to the group with respect to the final arrangement?

a. P

b. L

c. K

d. J

e. A

#### 10. Questions

How many persons are sitting in the seats in front of N?

a. No one

b. As many persons sits behind O

c. As many persons sits in front of C

d. As many persons sits behind P

e. As many persons sits behind A

#### 11. Questions

In the given questions, the relationship between different elements is shown in the statements followed by some conclusions. Find the conclusions which are definitely true.

**Statements:**

$Q > Z \geq N > W = T; G \geq X = Z < R < E; O = P \geq U > X \leq D$

**Conclusions**

I).  $D > T$

II).  $W < O$

III).  $P > N$

a. Only conclusion II is true

b. All the conclusions I, II and III are true

c. Only conclusion III is true

d. Only conclusion I is true

@QuizByMickey

e. None of the conclusions is true

## 12. Questions

### Statements:

$B = R < S \leq K > Y; V \leq C = F \leq R > J; N \leq G < A = K \geq D$

### Conclusions

I).  $N \leq C$

II).  $B > V$

III).  $F < N$

- a. Only conclusion III is true
- b. Both conclusions II and III are true
- c. Either conclusion I or III is true
- d. Only conclusion I is true
- e. Only conclusion II is true

## 13. Questions

### Statements:

$X > J \geq I \leq P = H \geq F; R < S = W > M \geq H; A = O > V \geq S \geq C$

### Conclusions

I).  $O > I$

II).  $X > C$

III).  $F < A$

- a. Both conclusions I and II are true
- b. Both conclusions I and III are true
- c. Only conclusion III is true
- d. Either conclusion I or II is true
- e. Only conclusion II is true

@QuizByMickey

## 14. Questions

### Statements:

$Y \geq Q \geq J = N \geq E; Z = R \leq F \leq B = E; D < R \geq I; T \geq Y = M$

### Conclusions

I).  $T \geq I$

II).  $Z \leq M$

III).  $D < J$

- a. Only conclusion II is true
- b. Either conclusion I or III is true
- c. Only conclusion III is true
- d. Both conclusions II and III are true
- e. All the conclusions I, II and III are true

### 15. Questions

#### Statements:

$K > X \leq V \leq G > W$ ;  $Q \leq M < E > R \geq X$ ;  $L > A = E \leq C < J$ ;  $F > P = L$ .

#### Conclusions

I).  $C > V$

II).  $E < G$

III).  $F > X$

- a. Only conclusion II and III are true
- b. Only conclusion II is true
- c. Only conclusion I and II are true
- d. Only conclusion III is true
- e. None of the conclusions is true

### 16. Questions

**Study the following information carefully and answer the given questions.**

Twelve persons - B, C, D, I, J, K, L, O, P, R, S and T went to three different coaching classes viz., TNPSC, Banking and SSC on seven different days of the same week from Monday to Sunday. At least three but not more than five persons went to the same coaching class. None of the days was a holiday.

**Note: The persons who went on the same day did not go to the same coaching class.**

P went three days before R, who didn't go to the TNPSC class. Both S and D went to different classes. The number of days before B went to the class is the same as the number of days after T went to the class. Both J and T did not go to different classes, where neither of them went to SSC class. The one who went on Saturday did not go to Banking class. Only two persons went between D and R, who didn't go on the same day as J. Both L and B went on the same day. Only one person went on Tuesday and went to the SSC class. L went four days after D. The number of persons who went before C is **two less than** the number of persons who went with the same class as K. K went neither to the Banking class nor on Sunday. Both I and O went to different classes. J went two days after O. J didn't go to the SSC class but went to the same class

as S. C went before Wednesday but not on the same day as P. The number of days between R and K is **three less than** the number of days between L and P. S went immediately before the one who went two days before L. C went to the same class as O. Neither R nor L went on the same day as I, who went after O but not immediately after. Both D and B didn't go to the TNPSC class.

**Which of the following statement(s) is/are TRUE as per the final arrangement?**

- a. B went to the SSC class
- b. O went to the same class as K
- c. I went on the same day as J
- d. D went four days before J
- e. Both a) and c)

#### 17. Questions

**Who among the following persons went to the same class as D?**

- a. C
- b. O
- c. R
- d. B
- e. All of the above

#### 18. Questions

**Who among the following persons went to the class after Thursday?**

- a. J
- b. S
- c. I
- d. K
- e. Both a) and c)

@QuizByMickey

#### 19. Questions

**Which of the following pair of persons went to the same class?**

- I). RB
- II). KP
- III). TL
- IV). CI

- a. Only II and III

- b. Only I, II and III
- c. Only III and IV
- d. Only I and III
- e. All I, II, III and IV

## 20. Questions

**How many persons went between the one who went on the same day as K and the one who went on Saturday?**

- a. Three
- b. Four
- c. Two
- d. One
- e. Five

## Explanations:

### 1. Questions

**Answer: B**

**I). All Manage can be Place** - Here, some part of manage is associated with flute and no flute is associated with place. So, all manage cannot be associated with place. Hence, the conclusion does not follow.

**II). Some Yeast can never be Blade** - Here, there is no direct relation between yeast and blade. And according to the given statement 'only yeast is drain', which means drain cannot be associated with any other elements except yeast. So, some parts of yeast cannot be associated with blade. Hence, the conclusion follows.

**III). No Flute is Drain** - Here, there is no direct relation between flute and drain. And according to the given statement 'only yeast is drain', which means drain cannot be associated with any other elements except yeast. So, no flute can be associated with drain. Hence, the conclusion follows.

### 2. Questions

**Answer: D**

### Conclusions

**I). All Absent are Horror** - Here, there is no direct relation between Absent and Horror. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

**II). Some Create can be Zoom** - Here, there is no direct relation between Create and Zoom. And according to the given statement 'only Martin is Create', which means all Create cannot be associated with any other elements except Martin. So some parts of Create cannot be associated with Zoom. Hence, the conclusion does not follow.

**III). Some Absent are not Horror** - Here, there is no direct relation between Absent and Horror. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

By combining conclusion I and III, we get a complimentary pair. So, either conclusion I or III is true.

### 3. Questions

**Answer: B**

**I). No Eager is Urban** - Here, there is no direct relation between Eager and Urban. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

**II). All Guilt can never be Blink** - Here, there is no direct relation between Guilt and Blink. And according to the given statement 'only Urban is Blink', which means all Blink cannot be associated with any other elements except Urban. So, some part of Guilt cannot be associated with Blink. Hence, the conclusion follows.

**III). All Abacus being Magic is a possibility** - Here, some parts of Abacus are associated with Magic. So, all Abacus can also be associated with Magic. Hence, the conclusion follows.

### 4. Questions

**Answer: C**

**I). Some Listen can be Diary** - Here, there is no direct relation between Listen and Diary. But, all parts of Listen are associated with Result and no Result can be associated with Diary. So, all Listen also cannot be associated with Diary. Hence, the conclusion does not follow.

**II). Some Dairy are not Result** - Here, there is no direct relation between Dairy and Result. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

**III). All Dream can be Dairy** - Here, there is no direct relation between Dream and Dairy. So, all the possible conclusions between them are true. Hence, the conclusion follows.

## 5. Questions

**Answer: A**

**I). All Learn being Secure is a possibility** - Here, there is no direct relation between Learn and Secure. So, all the possible conclusions between them are true. Hence, the conclusion follows.

**II). Some Think can never be Card** - Here, there is no direct relation between Think and Card. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

**III). No Notice being pepper is a possibility** - Here, it is given that 'only Pepper is Notice', which means all parts of Notice cannot be associated with any other elements except Pepper. So, all Notice cannot be associated with Pepper is not true in possibility. Hence, the conclusion does not follow.

## 6. Questions

**Final arrangement:**

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>F</u> | <u>P</u> | <u>E</u> |
| II.  | <u>G</u> | <u>A</u> | <u>H</u> |
| III. | <u>B</u> | <u>O</u> | <u>C</u> |
| IV.  | <u>N</u> | <u>L</u> | <u>D</u> |
| V.   | <u>M</u> | <u>K</u> | <u>J</u> |

We have,

- A sits in row II on the left side of the aisle.
- B sits in row III on the left side of the aisle but not in the seat immediately behind A.
- C sits in one of the seats to the right of B in the same row as B.

From the above conditions, there are three possibilities

#### Case 1

|      |               |               |               |
|------|---------------|---------------|---------------|
| I.   | <u>      </u> | <u>      </u> | <u>      </u> |
| II.  | <u>A</u>      | <u>      </u> | <u>      </u> |
| III. | <u>      </u> | <u>B</u>      | <u>C</u>      |
| IV.  | <u>      </u> | <u>      </u> | <u>      </u> |
| V.   | <u>      </u> | <u>      </u> | <u>      </u> |

#### Case 2

|      |               |               |               |
|------|---------------|---------------|---------------|
| I.   | <u>      </u> | <u>      </u> | <u>      </u> |
| II.  | <u>      </u> | <u>A</u>      | <u>      </u> |
| III. | <u>B</u>      | <u>      </u> | <u>C</u>      |
| IV.  | <u>      </u> | <u>      </u> | <u>      </u> |
| V.   | <u>      </u> | <u>      </u> | <u>      </u> |

#### Case 2a

|      |               |               |               |
|------|---------------|---------------|---------------|
| I.   | <u>      </u> | <u>      </u> | <u>      </u> |
| II.  | <u>      </u> | <u>A</u>      | <u>      </u> |
| III. | <u>B</u>      | <u>C</u>      | <u>      </u> |
| IV.  | <u>      </u> | <u>      </u> | <u>      </u> |
| V.   | <u>      </u> | <u>      </u> | <u>      </u> |

@QuizByMickey

Again we have,

- D sits in the seat immediately behind C.
- As many persons sitting to the left of D in the row in which D is sitting are the same as those who sit to the left of E in the row in which E is sitting.
- E sits in one of the rows in front of D but not in the same row as A.
- F sits in the same row as E and immediately in front of G.

- H sits in one of the seats to the right of G in the same row.

| Case 1 |         |                 | Case 2 |                 |               |
|--------|---------|-----------------|--------|-----------------|---------------|
| I.     | _____   | F _____ E _____ | I.     | F _____ E _____ |               |
| II.    | A _____ | G _____ H _____ | II.    | G _____ A _____ | H _____       |
| III.   | _____   | B _____ C _____ | III.   | B _____         | C _____       |
| IV.    | _____   | _____ D _____   | IV.    | _____           | _____ D _____ |
| V.     | _____   | _____           | V.     | _____           | _____         |

| Case 2a |         |                 |
|---------|---------|-----------------|
| I.      | F _____ | E _____         |
| II.     | G _____ | A _____ H _____ |
| III.    | B _____ | C _____         |
| IV.     | _____   | D _____         |
| V.      | _____   | _____           |

Again we have,

- J sits on the right side of the aisle where K and J sit in the same row.
- L sits in the seat immediately in front of K, but not immediately behind B.
- N sits in one of the rows in front of M, who doesn't sit in a seat adjacent to the aisle.
- O sits in one of the rows behind P.
- N neither sits in the same row as F nor B.

From the above condition case-2a gets eliminated because L sits in the seat immediately in front of K, but not immediately behind B, which is not satisfied.

From the above conditions case-1 gets eliminated because N neither sits in the same row as F nor B, which is not satisfied. Hence, case-2 shows the final arrangement.

@QuizByMickey

~~Case 1~~

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>N</u> | <u>F</u> | <u>E</u> |
| II.  | <u>A</u> | <u>G</u> | <u>H</u> |
| III. | <u>M</u> | <u>B</u> | <u>C</u> |
| IV.  | <u>L</u> | <u>P</u> | <u>D</u> |
| V.   | <u>K</u> | <u>O</u> | <u>J</u> |

**Case 2**

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>F</u> | <u>P</u> | <u>E</u> |
| II.  | <u>G</u> | <u>A</u> | <u>H</u> |
| III. | <u>B</u> | <u>O</u> | <u>C</u> |
| IV.  | <u>N</u> | <u>L</u> | <u>D</u> |
| V.   | <u>M</u> | <u>K</u> | <u>J</u> |

~~Case 2a~~

|      |             |             |             |
|------|-------------|-------------|-------------|
| I.   | <u>F</u>    | <u>E</u>    | <u>    </u> |
| II.  | <u>G</u>    | <u>A</u>    | <u>H</u>    |
| III. | <u>B</u>    | <u>C</u>    | <u>    </u> |
| IV.  | <u>    </u> | <u>D</u>    | <u>    </u> |
| V.   | <u>    </u> | <u>    </u> | <u>    </u> |

**Answer: B**

**7. Questions**

**Final arrangement:**

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>F</u> | <u>P</u> | <u>E</u> |
| II.  | <u>G</u> | <u>A</u> | <u>H</u> |
| III. | <u>B</u> | <u>O</u> | <u>C</u> |
| IV.  | <u>N</u> | <u>L</u> | <u>D</u> |
| V.   | <u>M</u> | <u>K</u> | <u>J</u> |

@QuizByMickey

We have,

- A sits in row II on the left side of the aisle.
- B sits in row III on the left side of the aisle but not in the seat immediately behind A.
- C sits in one of the seats to the right of B in the same row as B.

From the above conditions, there are three possibilities

### Case 1

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.      A      \_\_\_\_\_    \_\_\_\_\_  
 III.    \_\_\_\_\_      B        C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B      \_\_\_\_\_      C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2a

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B        C      \_\_\_\_\_  
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

Again we have,

- D sits in the seat immediately behind C.
- As many persons sitting to the left of D in the row in which D is sitting are the same as those who sit to the left of E in the row in which E is sitting.
- E sits in one of the rows in front of D but not in the same row as A.
- F sits in the same row as E and immediately in front of G.
- H sits in one of the seats to the right of G in the same row.

@QuizByMickey

| Case 1 |               |               | Case 2 |               |               |
|--------|---------------|---------------|--------|---------------|---------------|
| I.     | _____ F _____ | _____ E _____ | I.     | _____ F _____ | _____ E _____ |
| II.    | _____ A _____ | _____ G _____ | II.    | _____ G _____ | _____ A _____ |
| III.   | _____ _____   | _____ B _____ | III.   | _____ B _____ | _____ _____   |
| IV.    | _____ _____   | _____ D _____ | IV.    | _____ _____   | _____ D _____ |
| V.     | _____ _____   | _____ _____   | V.     | _____ _____   | _____ _____   |

| Case 2a |               |               |
|---------|---------------|---------------|
| I.      | _____ F _____ | _____ E _____ |
| II.     | _____ G _____ | _____ A _____ |
| III.    | _____ B _____ | _____ C _____ |
| IV.     | _____ _____   | _____ D _____ |
| V.      | _____ _____   | _____ _____   |

Again we have,

- J sits on the right side of the aisle where K and J sit in the same row.
- L sits in the seat immediately in front of K, but not immediately behind B.
- N sits in one of the rows in front of M, who doesn't sit in a seat adjacent to the aisle.
- O sits in one of the rows behind P.
- N neither sits in the same row as F nor B.

From the above condition case-2a gets eliminated because L sits in the seat immediately in front of K, but not immediately behind B, which is not satisfied.

From the above conditions case-1 gets eliminated because N neither sits in the same row as F nor B, which is not satisfied. Hence, case-2 shows the final arrangement.

| III. | <u>B</u>      | <u>C</u>      | <u>      </u> |
| IV.  | <u>      </u> | <u>D</u>      | <u>      </u> |
| V.   | <u>      </u> | <u>      </u> | <u>      </u> |

**Answer: A**

**8. Questions**

**Final arrangement:**

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>F</u> | <u>P</u> | <u>E</u> |
| II.  | <u>G</u> | <u>A</u> | <u>H</u> |
| III. | <u>B</u> | <u>O</u> | <u>C</u> |
| IV.  | <u>N</u> | <u>L</u> | <u>D</u> |
| V.   | <u>M</u> | <u>K</u> | <u>J</u> |

@QuizByMickey

We have,

- A sits in row II on the left side of the aisle.
- B sits in row III on the left side of the aisle but not in the seat immediately behind A.
- C sits in one of the seats to the right of B in the same row as B.

From the above conditions, there are three possibilities

### Case 1

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.      A      \_\_\_\_\_    \_\_\_\_\_  
 III.    \_\_\_\_\_      B        C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B      \_\_\_\_\_      C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2a

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B        C      \_\_\_\_\_  
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

Again we have,

- D sits in the seat immediately behind C.
- As many persons sitting to the left of D in the row in which D is sitting are the same as those who sit to the left of E in the row in which E is sitting.
- E sits in one of the rows in front of D but not in the same row as A.
- F sits in the same row as E and immediately in front of G.
- H sits in one of the seats to the right of G in the same row.

@QuizByMickey

| Case 1 |               |               | Case 2 |               |               |
|--------|---------------|---------------|--------|---------------|---------------|
| I.     | _____ F _____ | _____ E _____ | I.     | _____ F _____ | _____ E _____ |
| II.    | _____ A _____ | _____ G _____ | II.    | _____ G _____ | _____ A _____ |
| III.   | _____ _____   | _____ B _____ | III.   | _____ B _____ | _____ _____   |
| IV.    | _____ _____   | _____ D _____ | IV.    | _____ _____   | _____ D _____ |
| V.     | _____ _____   | _____ _____   | V.     | _____ _____   | _____ _____   |

| Case 2a |               |               |
|---------|---------------|---------------|
| I.      | _____ F _____ | _____ E _____ |
| II.     | _____ G _____ | _____ A _____ |
| III.    | _____ B _____ | _____ C _____ |
| IV.     | _____ _____   | _____ D _____ |
| V.      | _____ _____   | _____ _____   |

Again we have,

- J sits on the right side of the aisle where K and J sit in the same row.
- L sits in the seat immediately in front of K, but not immediately behind B.
- N sits in one of the rows in front of M, who doesn't sit in a seat adjacent to the aisle.
- O sits in one of the rows behind P.
- N neither sits in the same row as F nor B.

From the above condition case-2a gets eliminated because L sits in the seat immediately in front of K, but not immediately behind B, which is not satisfied.

From the above conditions case-1 gets eliminated because N neither sits in the same row as F nor B, which is not satisfied. Hence, case-2 shows the final arrangement.

@QuizByMickey

~~Case 1~~

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>N</u> | <u>F</u> | <u>E</u> |
| II.  | <u>A</u> | <u>G</u> | <u>H</u> |
| III. | <u>M</u> | <u>B</u> | <u>C</u> |
| IV.  | <u>L</u> | <u>P</u> | <u>D</u> |
| V.   | <u>K</u> | <u>O</u> | <u>J</u> |

**Case 2**

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>F</u> | <u>P</u> | <u>E</u> |

| III. | <u>B</u>      | <u>C</u>      | <u>      </u> |
| IV.  | <u>      </u> | <u>D</u>      | <u>      </u> |
| V.   | <u>      </u> | <u>      </u> | <u>      </u> |

**Answer: C**

**9. Questions**

**Final arrangement:**

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>F</u> | <u>P</u> | <u>E</u> |
| II.  | <u>G</u> | <u>A</u> | <u>H</u> |
| III. | <u>B</u> | <u>O</u> | <u>C</u> |
| IV.  | <u>N</u> | <u>L</u> | <u>D</u> |
| V.   | <u>M</u> | <u>K</u> | <u>J</u> |

@QuizByMickey

We have,

- A sits in row II on the left side of the aisle.
- B sits in row III on the left side of the aisle but not in the seat immediately behind A.
- C sits in one of the seats to the right of B in the same row as B.

From the above conditions, there are three possibilities

### Case 1

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.      A      \_\_\_\_\_    \_\_\_\_\_  
 III.    \_\_\_\_\_      B        C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B      \_\_\_\_\_      C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2a

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B        C      \_\_\_\_\_  
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

Again we have,

- D sits in the seat immediately behind C.
- As many persons sitting to the left of D in the row in which D is sitting are the same as those who sit to the left of E in the row in which E is sitting.
- E sits in one of the rows in front of D but not in the same row as A.
- F sits in the same row as E and immediately in front of G.
- H sits in one of the seats to the right of G in the same row.

@QuizByMickey

| Case 1 |               |               | Case 2 |               |               |
|--------|---------------|---------------|--------|---------------|---------------|
| I.     | _____ F _____ | _____ E _____ | I.     | _____ F _____ | _____ E _____ |
| II.    | _____ A _____ | _____ G _____ | II.    | _____ G _____ | _____ A _____ |
| III.   | _____ _____   | _____ B _____ | III.   | _____ B _____ | _____ _____   |
| IV.    | _____ _____   | _____ D _____ | IV.    | _____ _____   | _____ D _____ |
| V.     | _____ _____   | _____ _____   | V.     | _____ _____   | _____ _____   |

| Case 2a |               |               |
|---------|---------------|---------------|
| I.      | _____ F _____ | _____ E _____ |
| II.     | _____ G _____ | _____ A _____ |
| III.    | _____ B _____ | _____ C _____ |
| IV.     | _____ _____   | _____ D _____ |
| V.      | _____ _____   | _____ _____   |

Again we have,

- J sits on the right side of the aisle where K and J sit in the same row.
- L sits in the seat immediately in front of K, but not immediately behind B.
- N sits in one of the rows in front of M, who doesn't sit in a seat adjacent to the aisle.
- O sits in one of the rows behind P.
- N neither sits in the same row as F nor B.

From the above condition case-2a gets eliminated because L sits in the seat immediately in front of K, but not immediately behind B, which is not satisfied.

From the above conditions case-1 gets eliminated because N neither sits in the same row as F nor B, which is not satisfied. Hence, case-2 shows the final arrangement.

@QuizByMickey

| <del>Case 1</del> |          |          | Case 2   |      |          |          |          |
|-------------------|----------|----------|----------|------|----------|----------|----------|
| I.                | <u>N</u> | <u>F</u> | <u>E</u> | I.   | <u>F</u> | <u>p</u> | <u>E</u> |

| III. | <u>B</u> | <u>O</u> | <u>C</u> |
| IV.  | <u>N</u> | <u>L</u> | <u>D</u> |
| V.   | <u>M</u> | <u>K</u> | <u>J</u> |

@QuizByMickey

We have,

- A sits in row II on the left side of the aisle.
- B sits in row III on the left side of the aisle but not in the seat immediately behind A.
- C sits in one of the seats to the right of B in the same row as B.

From the above conditions, there are three possibilities

### Case 1

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.      A      \_\_\_\_\_    \_\_\_\_\_  
 III.    \_\_\_\_\_      B        C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B      \_\_\_\_\_      C    
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

### Case 2a

I.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 II.    \_\_\_\_\_      A      \_\_\_\_\_  
 III.      B        C      \_\_\_\_\_  
 IV.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_  
 V.    \_\_\_\_\_    \_\_\_\_\_    \_\_\_\_\_

Again we have,

- D sits in the seat immediately behind C.
- As many persons sitting to the left of D in the row in which D is sitting are the same as those who sit to the left of E in the row in which E is sitting.
- E sits in one of the rows in front of D but not in the same row as A.
- F sits in the same row as E and immediately in front of G.
- H sits in one of the seats to the right of G in the same row.

@QuizByMickey

| Case 1 |               |               | Case 2 |               |               |
|--------|---------------|---------------|--------|---------------|---------------|
| I.     | _____ F _____ | _____ E _____ | I.     | _____ F _____ | _____ E _____ |
| II.    | _____ A _____ | _____ G _____ | II.    | _____ G _____ | _____ A _____ |
| III.   | _____ _____   | _____ B _____ | III.   | _____ B _____ | _____ _____   |
| IV.    | _____ _____   | _____ D _____ | IV.    | _____ _____   | _____ D _____ |

| Case 2a |               |               |
|---------|---------------|---------------|
| I.      | _____ F _____ | _____ E _____ |
| II.     | _____ G _____ | _____ A _____ |
| III.    | _____ B _____ | _____ C _____ |
| IV.     | _____ _____   | _____ D _____ |
| V.      | _____ _____   | _____ _____   |

Again we have,

- J sits on the right side of the aisle where K and J sit in the same row.
- L sits in the seat immediately in front of K, but not immediately behind B.
- N sits in one of the rows in front of M, who doesn't sit in a seat adjacent to the aisle.
- O sits in one of the rows behind P.
- N neither sits in the same row as F nor B.

From the above condition case-2a gets eliminated because L sits in the seat immediately in front of K, but not immediately behind B, which is not satisfied.

From the above conditions case-1 gets eliminated because N neither sits in the same row as F nor B, which is not satisfied. Hence, case-2 shows the final arrangement.

@QuizByMickey

~~Case 1~~

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>N</u> | <u>F</u> | <u>E</u> |
| II.  | <u>A</u> | <u>G</u> | <u>H</u> |
| III. | <u>M</u> | <u>B</u> | <u>C</u> |
| IV.  | <u>L</u> | <u>P</u> | <u>D</u> |
| V.   | <u>K</u> | <u>O</u> | <u>J</u> |

Case 2

|      |          |          |          |
|------|----------|----------|----------|
| I.   | <u>F</u> | <u>P</u> | <u>E</u> |
| II.  | <u>G</u> | <u>A</u> | <u>H</u> |
| III. | <u>B</u> | <u>O</u> | <u>C</u> |
| IV.  | <u>N</u> | <u>L</u> | <u>D</u> |
| V.   | <u>M</u> | <u>K</u> | <u>J</u> |

~~Case 2a~~

|      |               |               |               |
|------|---------------|---------------|---------------|
| I.   | <u>F</u>      | <u>E</u>      | <u>      </u> |
| II.  | <u>G</u>      | <u>A</u>      | <u>H</u>      |
| III. | <u>B</u>      | <u>C</u>      | <u>      </u> |
| IV.  | <u>      </u> | <u>D</u>      | <u>      </u> |
| V.   | <u>      </u> | <u>      </u> | <u>      </u> |

**Answer: E**

**11. Questions**

**Answer: B**

$Q > Z \geq N > W = T$ ;  $G \geq X = Z < R < E$ ;  $O = P \geq U > X \leq D$

**Conclusions**

**I).**  $D > T$  ( $D \geq X = Z \geq N > W = T$ ) -->True

**II).**  $W < O$  ( $W < N \leq Z = X < U \leq P = O$ ) -->True

**III).**  $P > N$  ( $P \geq U > X = Z \geq N$ ) -->True

**12. Questions**

**Answer: C**

$B = R < S \leq K > Y$ ;  $V \leq C = F \leq R > J$ ;  $N \leq G < A = K \geq D$

**Conclusions**

**I).**  $N \leq C$  ( $N \leq G < A = K \geq S > R \geq F = C$ ) -->False

**II).**  $B > V$  ( $B = R \geq F = C \geq V$ ) -->False

**III).**  $F < N$  ( $F \leq R < S \leq K = A > G \geq N$ ) -->False

By combining both the conclusions I and III, in a given statements relation between N and F=C are not obtained, From the conclusion we get  $F < N$ ;  $C = F \geq N$ ; all the three symbols between them are obtained,

@QuizByMickey

satisfies Either or conditions.

So, either conclusion I or III is true.

### 13. Questions

**Answer: B**

$X > J \geq I \leq P = H \geq F; R < S = W > M \geq H; A = O > V \geq S \geq C$

#### Conclusions

I).  $O > I$  ( $O > V \geq S = W > M \geq H = P \geq I$ ) -->True

II).  $X > C$  ( $X > J \geq I \leq P = H \leq M < W = S \geq C$ ) -->False

III).  $F < A$  ( $F \leq H \leq M < W = S \leq V < O = A$ ) -->True

### 14. Questions

**Answer: E**

$Y \geq Q \geq J = N \geq E; Z = R \leq F \leq B = E; D < R \geq I; T \geq Y = M$

#### Conclusions

I).  $T \geq I$  ( $T \geq Y \geq Q \geq J = N \geq E = B \geq F \geq R \geq I$ ) -->True

II).  $Z \leq M$  ( $Z = R \leq F \leq B = E \leq N = J \leq Q \leq Y = M$ ) -->True

III).  $D < J$  ( $D < R \leq F \leq B = E \leq N = J$ ) -->True

### 15. Questions

**Answer: D**

$K > X \leq V \leq G > W; Q \leq M < E > R \geq X; L > A = E \leq C < J; F > P = L.$

#### Conclusions

I).  $C > V$  ( $C \geq E > R \geq X \leq V$ ) -->False

II).  $E < G$  ( $E > R \geq X \leq V \leq G$ ) -->False

III).  $F > X$  ( $F > P = L > A = E > R \geq X$ ) -->True

### 16. Questions

**Final arrangement:**

@QuizByMickey

| Days      | Persons |
|-----------|---------|
| Monday    | C, T    |
| Tuesday   | P       |
| Wednesday | D, K    |
| Thursday  | S, O    |
| Friday    | R       |
| Saturday  | J, I    |
| Sunday    | L, B    |

| Course  | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

We have,

- P went three days before R, who didn't go to the TNPSC class.
- C went before Wednesday but not on the same day as P.
- The number of days before B went to the class is the same as the number of days after T went to the class.
- Only two persons went between D and R, who didn't go on the same day as J.
- Both L and B went on the same day.
- L went four days after D.
- Only one person went on Tuesday and went to the SSC class.

From the above conditions, there are four possibilities

@QuizByMickey

| Days      | Case - 1 | Case - 2 | Case - 3 | Case - 4 |
|-----------|----------|----------|----------|----------|
|           | Persons  | Persons  | Persons  | Persons  |
| Monday    | P, D     | C, T     | T        | C, T     |
| Tuesday   | C        | P        | C        | ( )      |
| Wednesday | T        | D        | P, D     | P, D     |
| Thursday  | R        | ( ), ( ) | ( )      | ( )      |
| Friday    | L, B     | R        | ( )      | ( )      |
| Saturday  |          |          | R        | R        |
| Sunday    |          | L, B     | L, B     | L, B     |

Again, we have

- The number of days between R and K is **three less than** the number of days between L and P.
- S went immediately before the one who went two days before L.
- J went two days after O.
- C went to the same class as O.
- J didn't go to the SSC class but went to the same class as S.
- K went neither to the Banking class nor went on Sunday.

From the above conditions, **Case-1** gets eliminated because, S went immediately before the one who went two days before L (here, Tuesday only one person attended SSC class is given) which is not satisfied and **Case-4** also get eliminated because J went two days after O (The persons who went on the same day did not go to the same coaching class, Here C went to the same class as O), which is not satisfied.

@QuizByMickey

| Days      | <del>Case - 1</del> | Case - 2 | Case - 3 | <del>Case - 4</del> |
|-----------|---------------------|----------|----------|---------------------|
|           | Persons             | Persons  | Persons  | Persons             |
| Monday    | P, D                | C, T     | T, O     | C, T, O             |
| Tuesday   | (C)                 | (P)      | (C)      |                     |
| Wednesday | T                   | D, K     | P, D, J  | P, D, J             |
| Thursday  | R                   | (S), (O) | (S)      | (S)                 |
| Friday    | L, B, K             | R        | (K)      | (K)                 |
| Saturday  |                     | J        | R        | R                   |
| Sunday    |                     | L, B     | L, B     | L, B                |

Again, we have

- Neither R nor L went on the same day as I, who went after O but not immediately after.

After applying the above conditions, case 3 gets eliminated because the number of persons who went on Wednesday is not satisfied (Here **four persons cannot go on the same day**, because there are only 3 different classes, and each class must be unique per day).

Hence, case 2 shows the final arrangement.

| Days      | Case - 2 | <del>Case - 3</del> |
|-----------|----------|---------------------|
|           | Persons  | Persons             |
| Monday    | C, T     | T, O                |
| Tuesday   | P        | C                   |
| Wednesday | D, K     | P, D, J, I          |
| Thursday  | S, O     | S                   |
| Friday    | R        | K                   |
| Saturday  | J, I     | R                   |
| Sunday    | L, B     | L, B                |

@QuizByMickey

Again, we have

- Both S and D went to different classes.
- Both J and T did not go to different classes, where neither of them went to SSC class.
- The one who went on Saturday did not go to Banking class.
- The number of persons who went before C is **two less than** the number of persons who went with the same class as K.
- Both I and O went to different classes.
- K went neither to the Banking class nor went on Sunday.
- Both D and B didn't go to the TNPSC class.

The final arrangement will be,

| Courses | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

**Answer: C**

**17. Questions**

**Final arrangement:**

| Days      | Persons |
|-----------|---------|
| Monday    | C, T    |
| Tuesday   | P       |
| Wednesday | D, K    |
| Thursday  | S, O    |
| Friday    | R       |
| Saturday  | J, I    |
| Sunday    | L, B    |

@QuizByMickey

| Course  | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

We have,

- P went three days before R, who didn't go to the TNPSC class.
- C went before Wednesday but not on the same day as P.
- The number of days before B went to the class is the same as the number of days after T went to the class.
- Only two persons went between D and R, who didn't go on the same day as J.
- Both L and B went on the same day.
- L went four days after D.
- Only one person went on Tuesday and went to the SSC class.

From the above conditions, there are four possibilities

| Days      | Case - 1 | Case - 2 | Case - 3 | Case - 4 |
|-----------|----------|----------|----------|----------|
|           | Persons  | Persons  | Persons  | Persons  |
| Monday    | P, D     | C, T     | T        | C, T     |
| Tuesday   | C        | P        | C        | ( )      |
| Wednesday | T        | D        | P, D     | P, D     |
| Thursday  | R        | ( ), ( ) | ( )      | ( )      |
| Friday    | L, B     | R        | ( )      | ( )      |
| Saturday  |          |          | R        | R        |
| Sunday    |          | L, B     | L, B     | L, B     |

@QuizByMickey

Again, we have

- The number of days between R and K is **three less than** the number of days between L and P.
- S went immediately before the one who went two days before L.
- J went two days after O.
- C went to the same class as O.
- J didn't go to the SSC class but went to the same class as S.
- K went neither to the Banking class nor went on Sunday.

From the above conditions, **Case-1** gets eliminated because, S went immediately before the one who went two days before L (here, Tuesday only one person attended SSC class is given) which is not satisfied and **Case-4** also get eliminated because J went two days after O (The persons who went on the same day did not go to the same coaching class, Here C went to the same class as O), which is not satisfied.

| Days      | <del>Case - 1</del> | Case - 2 | Case - 3 | <del>Case - 4</del> |
|-----------|---------------------|----------|----------|---------------------|
|           | Persons             | Persons  | Persons  | Persons             |
| Monday    | P, D                | C, T     | T, O     | C, T, O             |
| Tuesday   | (C)                 | (P)      | (C)      |                     |
| Wednesday | T                   | D, K     | P, D, J  | P, D, J             |
| Thursday  | R                   | (S), (O) | (S)      | (S)                 |
| Friday    | L, B, K             | R        | (K)      | (K)                 |
| Saturday  |                     | J        | R        | R                   |
| Sunday    |                     | L, B     | L, B     | L, B                |

Again, we have

- Neither R nor L went on the same day as I, who went after O but not immediately after.

After applying the above conditions, case 3 gets eliminated because the number of persons who went on Wednesday is not satisfied (Here **four persons cannot go on the same day**, because there are only 3 different classes, and each class must be unique per day).

Hence, case 2 shows the final arrangement.

@QuizByMickey

| Days      | Case - 2 | <del>Case - 3</del> |
|-----------|----------|---------------------|
|           | Persons  | Persons             |
| Monday    | C, T     | T, O                |
| Tuesday   | P        | C                   |
| Wednesday | D, K     | P, D, J, I          |
| Thursday  | S, O     | S                   |
| Friday    | R        | K                   |
| Saturday  | J, I     | R                   |
| Sunday    | L, B     | L, B                |

Again, we have

- Both S and D went to different classes.
- Both J and T did not go to different classes, where neither of them went to SSC class.
- The one who went on Saturday did not go to Banking class.
- The number of persons who went before C is **two less than** the number of persons who went with the same class as K.
- Both I and O went to different classes.
- K went neither to the Banking class nor went on Sunday.
- Both D and B didn't go to the TNPSC class.

The final arrangement will be,

| Courses | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

@QuizByMickey

Answer: E

18. Questions

Final arrangement:

| Days      | Persons |
|-----------|---------|
| Monday    | C, T    |
| Tuesday   | P       |
| Wednesday | D, K    |
| Thursday  | S, O    |
| Friday    | R       |
| Saturday  | J, I    |
| Sunday    | L, B    |

| Course  | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

We have,

- P went three days before R, who didn't go to the TNPSC class.
- C went before Wednesday but not on the same day as P.
- The number of days before B went to the class is the same as the number of days after T went to the class.
- Only two persons went between D and R, who didn't go on the same day as J.
- Both L and B went on the same day.
- L went four days after D.
- Only one person went on Tuesday and went to the SSC class.

From the above conditions, there are four possibilities

@QuizByMickey

| Days      | Case - 1 | Case - 2 | Case - 3 | Case - 4 |
|-----------|----------|----------|----------|----------|
|           | Persons  | Persons  | Persons  | Persons  |
| Monday    | P, D     | C, T     | T        | C, T     |
| Tuesday   | C        | P        | C        | ( )      |
| Wednesday | T        | D        | P, D     | P, D     |
| Thursday  | R        | ( ), ( ) | ( )      | ( )      |
| Friday    | L, B     | R        | ( )      | ( )      |
| Saturday  |          |          | R        | R        |
| Sunday    |          | L, B     | L, B     | L, B     |

Again, we have

- The number of days between R and K is **three less than** the number of days between L and P.
- S went immediately before the one who went two days before L.
- J went two days after O.
- C went to the same class as O.
- J didn't go to the SSC class but went to the same class as S.
- K went neither to the Banking class nor went on Sunday.

From the above conditions, **Case-1** gets eliminated because, S went immediately before the one who went two days before L (here, Tuesday only one person attended SSC class is given) which is not satisfied and **Case-4** also get eliminated because J went two days after O (The persons who went on the same day did not go to the same coaching class, Here C went to the same class as O), which is not satisfied.

@QuizByMickey

| Days      | <del>Case - 1</del> | Case - 2 | Case - 3 | <del>Case - 4</del> |
|-----------|---------------------|----------|----------|---------------------|
|           | Persons             | Persons  | Persons  | Persons             |
| Monday    | P, D                | C, T     | T, O     | C, T, O             |
| Tuesday   | (C)                 | (P)      | (C)      |                     |
| Wednesday | T                   | D, K     | P, D, J  | P, D, J             |
| Thursday  | R                   | (S), (O) | (S)      | (S)                 |
| Friday    | L, B, K             | R        | (K)      | (K)                 |
| Saturday  |                     | J        | R        | R                   |
| Sunday    |                     | L, B     | L, B     | L, B                |

Again, we have

- Neither R nor L went on the same day as I, who went after O but not immediately after.

After applying the above conditions, case 3 gets eliminated because the number of persons who went on Wednesday is not satisfied (Here **four persons cannot go on the same day**, because there are only 3 different classes, and each class must be unique per day).

Hence, case 2 shows the final arrangement.

|-----------|----------|---------------------|
|           | Persons  | Persons             |
| Monday    | C, T     | T, O                |
| Tuesday   | P        | C                   |
| Wednesday | D, K     | P, D, J, I          |
| Thursday  | S, O     | S                   |
| Friday    | R        | K                   |
| Saturday  | J, I     | R                   |
| Sunday    | L, B     | L, B                |

@QuizByMickey

Again, we have

- Both S and D went to different classes.
- Both J and T did not go to different classes, where neither of them went to SSC class.
- The one who went on Saturday did not go to Banking class.
- The number of persons who went before C is **two less than** the number of persons who went with the same class as K.
- Both I and O went to different classes.
- K went neither to the Banking class nor went on Sunday.
- Both D and B didn't go to the TNPSC class.

The final arrangement will be,

| Courses | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

**Answer: E**

**19. Questions**

**Final arrangement:**

| Days      | Persons |
|-----------|---------|
| Monday    | C, T    |
| Tuesday   | P       |
| Wednesday | D, K    |
| Thursday  | S, O    |
| Friday    | R       |
| Saturday  | J, I    |
| Sunday    | L, B    |

@QuizByMickey

| Course  | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

We have,

- P went three days before R, who didn't go to the TNPSC class.
- C went before Wednesday but not on the same day as P.
- The number of days before B went to the class is the same as the number of days after T went to the class.
- Only two persons went between D and R, who didn't go on the same day as J.
- Both L and B went on the same day.
- L went four days after D.
- Only one person went on Tuesday and went to the SSC class.

From the above conditions, there are four possibilities

| Days      | Case - 1 | Case - 2 | Case - 3 | Case - 4 |
|-----------|----------|----------|----------|----------|
|           | Persons  | Persons  | Persons  | Persons  |
| Monday    | P, D     | C, T     | T        | C, T     |
| Tuesday   | C        | P        | C        | ( )      |
| Wednesday | T        | D        | P, D     | P, D     |
| Thursday  | R        | ( ), ( ) | ( )      | ( )      |
| Friday    | L, B     | R        | ( )      | ( )      |
| Saturday  |          |          | R        | R        |
| Sunday    |          | L, B     | L, B     | L, B     |

@QuizByMickey

Again, we have

- The number of days between R and K is **three less than** the number of days between L and P.
- S went immediately before the one who went two days before L.
- J went two days after O.
- C went to the same class as O.
- J didn't go to the SSC class but went to the same class as S.
- K went neither to the Banking class nor went on Sunday.

From the above conditions, **Case-1** gets eliminated because, S went immediately before the one who went two days before L (here, Tuesday only one person attended SSC class is given) which is not satisfied and **Case-4** also get eliminated because J went two days after O (The persons who went on the same day did not go to the same coaching class, Here C went to the same class as O), which is not satisfied.

| Days      | <del>Case - 1</del> | Case - 2 | Case - 3 | <del>Case - 4</del> |
|-----------|---------------------|----------|----------|---------------------|
|           | Persons             | Persons  | Persons  | Persons             |
| Monday    | P, D                | C, T     | T, O     | C, T, O             |
| Tuesday   | (C)                 | (P)      | (C)      |                     |
| Wednesday | T                   | D, K     | P, D, J  | P, D, J             |
| Thursday  | R                   | (S), (O) | (S)      | (S)                 |
| Friday    | L, B, K             | R        | (K)      | (K)                 |
| Saturday  |                     | J        | R        | R                   |
| Sunday    |                     | L, B     | L, B     | L, B                |

Again, we have

- Neither R nor L went on the same day as I, who went after O but not immediately after.

After applying the above conditions, case 3 gets eliminated because the number of persons who went on Wednesday is not satisfied (Here **four persons cannot go on the same day**, because there are only 3 different classes, and each class must be unique per day).

Hence, case 2 shows the final arrangement.

@QuizByMickey

| Days      | Case - 2 | <del>Case - 3</del> |
|-----------|----------|---------------------|
|           | Persons  | Persons             |
| Monday    | C, T     | T, O                |
| Tuesday   | P        | C                   |
| Wednesday | D, K     | P, D, J, I          |
| Thursday  | S, O     | S                   |
| Friday    | R        | K                   |
| Saturday  | J, I     | R                   |
| Sunday    | L, B     | L, B                |

Again, we have

- Both S and D went to different classes.
- Both J and T did not go to different classes, where neither of them went to SSC class.
- The one who went on Saturday did not go to Banking class.
- The number of persons who went before C is **two less than** the number of persons who went with the same class as K.
- Both I and O went to different classes.
- K went neither to the Banking class nor went on Sunday.
- Both D and B didn't go to the TNPSC class.

The final arrangement will be,

| Courses | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

@QuizByMickey

Answer: B

20. Questions

Final arrangement:

| Days      | Persons |
|-----------|---------|
| Monday    | C, T    |
| Tuesday   | P       |
| Wednesday | D, K    |
| Thursday  | S, O    |
| Friday    | R       |
| Saturday  | J, I    |
| Sunday    | L, B    |

| Course  | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

We have,

- P went three days before R, who didn't go to the TNPSC class.
- C went before Wednesday but not on the same day as P.
- The number of days before B went to the class is the same as the number of days after T went to the class.
- Only two persons went between D and R, who didn't go on the same day as J.
- Both L and B went on the same day.
- L went four days after D.
- Only one person went on Tuesday and went to the SSC class.

From the above conditions, there are four possibilities

@QuizByMickey

| Days      | Case - 1 | Case - 2 | Case - 3 | Case - 4 |
|-----------|----------|----------|----------|----------|
|           | Persons  | Persons  | Persons  | Persons  |
| Monday    | P, D     | C, T     | T        | C, T     |
| Tuesday   | C        | P        | C        | ( )      |
| Wednesday | T        | D        | P, D     | P, D     |
| Thursday  | R        | ( ), ( ) | ( )      | ( )      |
| Friday    | L, B     | R        | ( )      | ( )      |
| Saturday  |          |          | R        | R        |
| Sunday    |          | L, B     | L, B     | L, B     |

Again, we have

- The number of days between R and K is **three less than** the number of days between L and P.
- S went immediately before the one who went two days before L.
- J went two days after O.
- C went to the same class as O.
- J didn't go to the SSC class but went to the same class as S.
- K went neither to the Banking class nor went on Sunday.

From the above conditions, **Case-1** gets eliminated because, S went immediately before the one who went two days before L (here, Tuesday only one person attended SSC class is given) which is not satisfied and **Case-4** also get eliminated because J went two days after O (The persons who went on the same day did not go to the same coaching class, Here C went to the same class as O), which is not satisfied.

@QuizByMickey

| Days      | <del>Case - 1</del> | Case - 2 | Case - 3 | <del>Case - 4</del> |

| Monday    | P, D                | C, T     | T, O     | C, T, O             |
| Tuesday   | (C)                 | (P)      | (C)      |                     |
| Wednesday | T                   | D, K     | P, D, J  | P, D, J             |
| Thursday  | R                   | (S), (O) | (S)      | (S)                 |
| Friday    | L, B, K             | R        | (K)      | (K)                 |
| Saturday  |                     | J        | R        | R                   |
| Sunday    |                     | L, B     | L, B     | L, B                |

Again, we have

- Neither R nor L went on the same day as I, who went after O but not immediately after.

After applying the above conditions, case 3 gets eliminated because the number of persons who went on Wednesday is not satisfied (Here **four persons cannot go on the same day**, because there are only 3 different classes, and each class must be unique per day).

Hence, case 2 shows the final arrangement.

| Days      | Case - 2 | <del>Case - 3</del> |
|-----------|----------|---------------------|
|           | Persons  | Persons             |
| Monday    | C, T     | T, O                |
| Tuesday   | P        | C                   |
| Wednesday | D, K     | P, D, J, I          |
| Thursday  | S, O     | S                   |
| Friday    | R        | K                   |
| Saturday  | J, I     | R                   |
| Sunday    | L, B     | L, B                |

@QuizByMickey

Again, we have

- Both S and D went to different classes.
- Both J and T did not go to different classes, where neither of them went to SSC class.
- The one who went on Saturday did not go to Banking class.
- The number of persons who went before C is **two less than** the number of persons who went with the same class as K.
- Both I and O went to different classes.
- K went neither to the Banking class nor went on Sunday.
- Both D and B didn't go to the TNPSC class.

The final arrangement will be,

| Courses | Persons       |
|---------|---------------|
| TNPSC   | L, J, T, S    |
| Banking | D, C, O, R, B |
| SSC     | P, I, K       |

**Answer: A**
