

1. Questions

Study the following information carefully and answer the questions given below.

Seven persons M, N, O, P, Q, R and S uploaded different videos on their YouTube channels on different days of the week starting from Monday to Sunday. Each of them like different types of videos viz. Dance, Singing, Comedy, Motivation, Scientific, cooking and Prank.

The one who likes Prank videos uploaded the video on three days before the one who likes scientific videos. S uploaded the video immediately after the one who likes scientific videos. The number of persons uploading the video before S is **one more than** the number of persons uploading the video after O. N uploaded the video two days before the one who likes dance videos and uploaded the video before Thursday. The number of persons uploading the video after M is **one less than** the number of persons uploading the video before the one who likes dance videos. The one who likes motivation videos uploaded the video two days before M. Only one person uploaded the video between Q and the one who likes Comedy videos, who uploaded the video immediately before R. Neither R nor P likes singing videos.

Who among the following person uploaded the video immediately before the one who likes scientific videos?

- a. The one who likes Motivation videos
- b. Q
- c. The one who likes Prank videos
- d. R
- e. Both a and d

2. Questions

Which of the following videos is liked by the one who uploaded the video on Monday?

- a. Motivation videos
- b. Prank videos
- c. Singing videos
- d. Dance videos
- e. Cooking videos

@QuizByMickey

3. Questions

If all the persons are arranged in alphabetical order from Monday then who among the following person likes Comedy videos (Videos remain the same)?

- a. O
- b. S
- c. Q

d. P

e. S

4. Questions

On which of the following day does the one who likes singing upload videos?

a. Friday

b. Tuesday

c. Sunday

d. Wednesday

e. None of these

5. Questions

Which of the following combination is true?

a. Q-Dance videos

b. M-Comedy videos

c. S-Cooking videos

d. O-Prank videos

e. P-Scientific videos

6. Questions

In each question, three conclusions have been given followed by 5 sets of possible statements. You have to take the given conclusions to be true even if they seem to be at variance with the commonly known facts and then decide that the conclusions logically follow for which of the given statements.

Conclusions:

I). All Urdu cannot be Tamil

II). Some Hindi is not English is a possibility

III). No French is Hindi is a possibility

@QuizByMickey

Statements:

a). Only a few Tamil is English, All French is English, No French is Hindi, Some Hindi is Urdu

b). All Tamil is French, Some French is Hindi, Only Hindi is Urdu, Some English is Tamil.

c). Only a few Hindi is Tamil, All Hindi is Urdu, No Tamil is French, Only a few English is French.

d). All Tamil is English, All Hindi is English, Only a few Urdu is Hindi, No Tamil is French.

e). Some Hindi is Tamil, Only a few French is Tamil, All Urdu is French, Only Hindi is English

- a. a
- b. b
- c. c
- d. d
- e. e

7. Questions

Conclusions:

- I). All Lakes can be Ponds.
- II). No Well is Mountain is a possibility
- III). Some Hills cannot be Ocean.

Statements:

- a). All Ocean is Pond, Some Ponds are Well, Only a few Hills are Well, No Ocean is Mountain, Only Hill is lake.
 - b). All Mountains are Lake, Some mountains are Pond, No pond is hill, Only pond is well, Only a few ocean is hill
 - c). Only a few hills are lakes, All mountains are lakes, Only a few mountains are ocean, All hills are ocean, No mountain is pond.
 - d). Only a few Hills are Mountain, All hills are Lake, No mountain is ocean, All ocean is pond, Some ponds are Well
 - e). None of these
- a. a
 - b. b
 - c. c
 - d. d
 - e. e

@QuizByMickey

8. Questions

Conclusions:

- I). All 947 can be 569
- II). Some 365 is not 569 is a possibility
- III). All 281 cannot be 732

Statements:

- a). All 732 is 569, Only a few 732 is 281, Some 281 is 947, Only 947 is 365

b). Some 947 is 569, All 569 is 281, Some 365 is 569, No 947 is 365, Only 732 is 365

c). All 365 is 947, Only a few 569 is 947, All 947 is 281, No 365 is 732

d). All 732 is 947, Only a few 569 is 281, Some 947 is 281, Only 281 is 365.

e). None of these.

a. a

b. b

c. c

d. d

e. e

9. Questions

Conclusions:

No Samsung is Xiaomi.

Some Nokia is Apple.

Some Samsung is not Apple.

Statements:

a). Only a few Apple is Samsung; Some Samsung is Nokia; Some Nokia is Xiaomi

b). Only a few Samsung is Apple; All Samsung is Nokia; No Nokia is Xiaomi

c). Only a few Nokia is Apple; All Apple is Xiaomi; All Xiaomi is Samsung

d). Only a few Samsung is Apple; All Apple is Nokia; Some Nokia is Xiaomi

e). All the statements are true

a. a

b. b

c. c

d. d

e. e

@QuizByMickey

10. Questions

Conclusions:

Some Honor being One plus is a possibility.

Some One plus is not Oppo.

Some Vivo can be Honor.

Statements:

- a). Only a few One plus is Vivo; No Vivo is Oppo; Some Oppo is Honor
- b). Only a few Vivo is One plus; No One plus is Oppo; All One plus is Honor
- c). Only a few One plus is Vivo; Some Vivo is Oppo; Some Oppo is Honor
- d). Only a few Vivo is Honor; Some Honor is Oppo; No Oppo is One plus
- e). None of the statements is true

- a. a
- b. b
- c. c
- d. d
- e. e

11. Questions

Study the following information carefully and answer the below questions

Seven persons P, Q, R, S, T, U and V are from the same family standing on the ground with some distance between each other. No single parent in the family.

The one who is the sister-in-law of P stands to the north of her husband V. S stands 22m north of her grand-mother and 4m east of her grand-father U. T stands 13m south-west of Q, who is the paternal aunt of P. V stands to the west of his mother and the distance between them is square of the difference between their place value as per the English alphabetical series. Q stands 8m south of her brother. R stands to the southeast of her daughter-in-law. The daughter of U is standing west of T and the distance between them is $\frac{1}{3}^{\text{rd}}$ of the sum of their place value as per the English alphabetical series.

What is the shortest distance between P and Q's nephew?

- a. 15m
- b. 17m
- c. 13m
- d. 18m
- e. 16m

@QuizByMickey

12. Questions

If W is in the mid-point of V and R and X is standing 3m south of T, then what is the shortest distance and direction of X with respect to W?

- a. 10m, South East
- b. 10m, North East

- c. 12m, North West
- d. 12m, South West
- e. 10m, North West

13. Questions

If Z is the husband of P and is standing 3m north of S's mother, then what is the shortest distance between Z and Q's sister-in-law and how is Z related to U?

- a. 16m, son-in-law
- b. 17m, son-in-law
- c. 20m, father-in-law
- d. 20m, son-in-law
- e. 18m, father-in-law

14. Questions

Study the following information carefully and answer the below questions

A family consists of nine members and they are standing on the ground. T is the son-in-law of M who stands 20m south of S who is the only daughter of K. K is the father of Q who stands 8m west of M who is the mother-in-law of O who is the spouse of Q. V stands 10m north of O's spouse. G stands 14m west of V who is the father-in-law of Q. N stands 18m north of G and 7m west of S's spouse. N is the only daughter of O who stands 32m south of T. G is a sibling of N. S stands 8m east of M's spouse.

What is the direction of S's brother with respect to G's mother?

- a. East
- b. North-West
- c. North-East
- d. South
- e. South-west

15. Questions

@QuizByMickey

How Q is related to T and what is the direction of Q with respect to T?

- a. Brother, North-east
- b. Brother-in-law, South-East
- c. Brother, South-East
- d. Father, North-west
- e. Brother-in-law, South-west

16. Questions

Study the following information carefully and answer the below questions

Certain number of persons are sitting around a circular table of diameter 273cm. All the persons are facing outside the table. The distance between the adjacent persons is different and is a consecutive multiple of eleven in a clockwise direction. The minimum distance between each person is 11cm. The number of persons sitting around the table is divisible by six also not exceeding fifteen.

A sits 165cm to the left of G. The number of persons sitting between A and G is a prime number. D sits third to the left of B. One person sits between D and E. As many persons sit between B and E, when counted from the left of B as between G and D, when counted from the right of G. The distance between E and D is same as the distance between F and C, when counted from the right of both D and C. Neither F nor C is sitting adjacent to E.

Who among the following sits third to the left of A?

- a. G
- b. The one who sits to the immediate left of F
- c. B
- d. The one who sits sixth to the right of D
- e. None of these

17. Questions

What is the distance between G and E, when measuring from the right of G?

- a. 165 cm
- b. 143 cm
- c. 121 cm
- d. 132 cm
- e. None of these

18. Questions

Which of the following statements is/are true with respect to the final arrangement?

- a. A sits second to the right of F
- b. B sits third to the right of G
- c. E sits adjacent to A
- d. All are true
- e. None of these

19. Questions

If Z sits fourth to the right of B, then what is the distance between Z and C, when measuring from the left of Z?

- a. 210 cm
- b. 280 cm
- c. 297 cm
- d. 209 cm
- e. None of these

20. Questions

How many persons are sitting at the table?

- a. Eleven
- b. Fourteen
- c. Twelve
- d. Thirteen
- e. None of these

Explanations:

1. Questions

Final arrangement:

Days	Persons	Videos
Monday	P	Cooking
Tuesday	O	Motivation
Wednesday	N	Prank
Thursday	M	Comedy
Friday	R	Dance
Saturday	Q	Scientific
Sunday	S	Singing

@QuizByMickey

We have,

- The one who likes Prank videos uploaded the video on three days before the one who likes scientific videos.
- S uploaded the video immediately after the one who likes scientific videos.
- The number of persons uploading the video before S is **one more than** the number of persons uploading the video after O.

From the above conditions, there are three possibilities

	Case-1		Case-2		Case-3	
Days	Persons	Videos	Persons	Videos	Persons	Videos
Monday		Prank				
Tuesday				Prank	O	
Wednesday			O			Prank
Thursday	O	Scientific				
Friday	S			Scientific		
Saturday			S			Scientific
Sunday					S	

Again we have,

- N uploaded the video two days before the one who likes dance videos and uploaded the video before Thursday.
- The number of persons uploading the video after M is **one less than** the number of persons uploading the video before the one who likes dance videos.
- The one who likes motivation videos uploaded the video two days before M.

From the above conditions, case-1 gets eliminated

	Case-1		Case-2		Case-3	
Days	Persons	Videos	Persons	Videos	Persons	Videos
Monday	N	Prank				
Tuesday			N	Prank	O	Motivation
Wednesday		Dance	O	Motivation	N	Prank
Thursday	O	Scientific		Dance	M	
Friday	S		M	Scientific		Dance
Saturday	M		S			Scientific
Sunday					S	

Again we have,

@QuizByMickey

- Only one person uploaded the video between Q and the one who likes Comedy videos, who uploaded the video immediately before R.
- Neither R nor P likes singing videos.

After applying the above conditions, case-2 gets eliminated, hence case-3 shows the final arrangement

	Case 2		Case-3	
Days	Persons	Videos	Persons	Videos
Monday	P		P	Cooking
Tuesday	N	Prank	O	Motivation
Wednesday	O	Motivation	N	Prank
Thursday	Q	Dance	M	Comedy
Friday	M	Scientific	R	Dance
Saturday	S	Comedy	Q	Scientific
Sunday	R		S	Singing

Answer: D

2. Questions

Final arrangement:

Days	Persons	Videos
Monday	P	Cooking
Tuesday	O	Motivation
Wednesday	N	Prank
Thursday	M	Comedy
Friday	R	Dance
Saturday	Q	Scientific
Sunday	S	Singing

We have,

- The one who likes Prank videos uploaded the video on three days before the one who likes scientific videos.
- S uploaded the video immediately after the one who likes scientific videos.
- The number of persons uploading the video before S is **one more than** the number of persons uploading the video after O.

From the above conditions, there are three possibilities

@QuizByMickey

	Case-1		Case-2		Case-3	
Days	Persons	Videos	Persons	Videos	Persons	Videos
Monday		Prank				
Tuesday				Prank	O	
Wednesday			O			Prank
Thursday	O	Scientific				
Friday	S			Scientific		
Saturday			S			Scientific
Sunday					S	

Again we have,

- N uploaded the video two days before the one who likes dance videos and uploaded the video before Thursday.
- The number of persons uploading the video after M is **one less than** the number of persons uploading the video before the one who likes dance videos.
- The one who likes motivation videos uploaded the video two days before M.

From the above conditions, case-1 gets eliminated

	Case-1		Case-2		Case-3	
Days	Persons	Videos	Persons	Videos	Persons	Videos
Monday	N	Prank				
Tuesday			N	Prank	O	Motivation
Wednesday		Dance	O	Motivation	N	Prank
Thursday	O	Scientific		Dance	M

13. Questions

@QuizByMickey

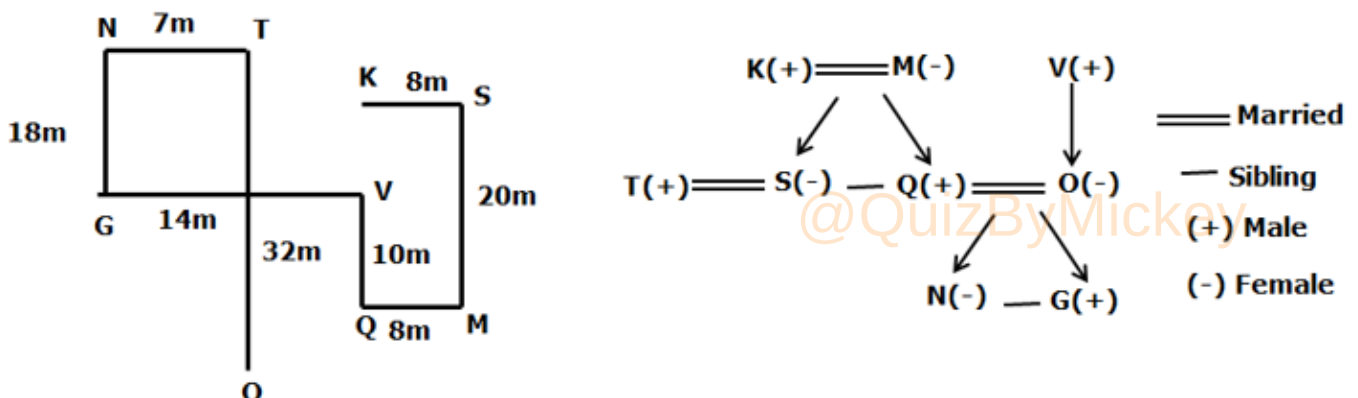

Answer: D

14. Questions

Answer: C

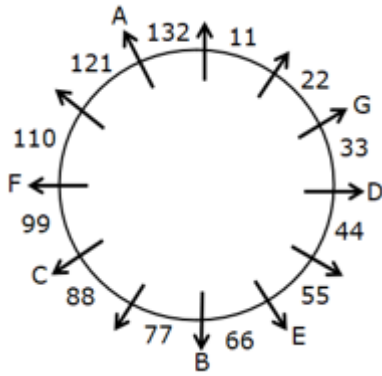

15. Questions

Answer: B

16. Questions

Final arrangement:

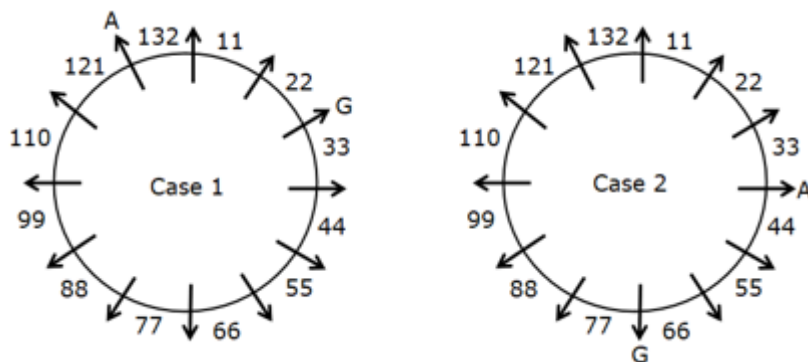

We have,

Since, diameter of the table = 273cm.

Thus, circumference = $2 \times \frac{22}{7} \times \frac{273}{2} = 858\text{cm}$.

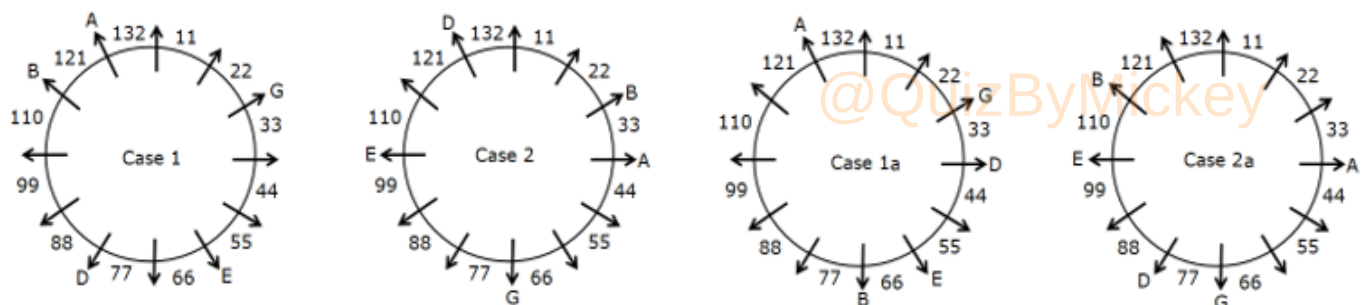

- A sits 165cm to the left of G.
- The number of persons sitting between A and G is a prime number.

From the above conditions, there are two possibilities

Again we have,

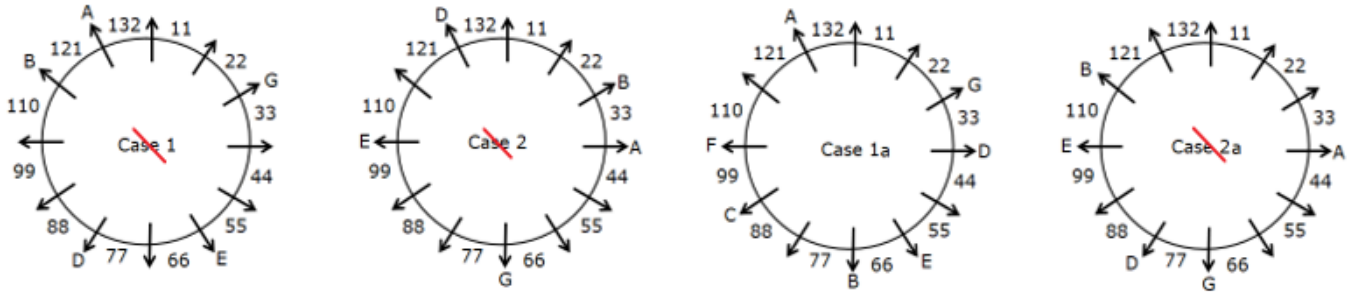

- D sits third to the left of B.
- One person sits between D and E.
- As many persons sit between B and E when counted from the left of B as between G and D when counted from the right of G.

Again we have,

- The distance between E and D is same as the distance between F and C when counted from the right of both D and C.
- Neither F nor C is sitting adjacent to E.

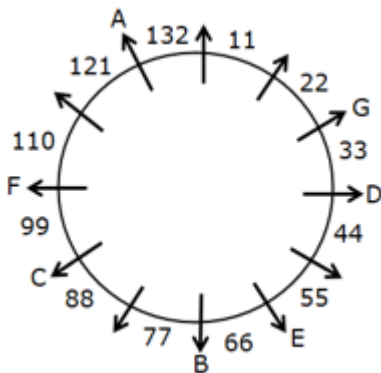

So Case 1, Case 2 and Case 2a get eliminated, hence Case 1a shows the final arrangement.

Answer: B

17. Questions

Final arrangement:

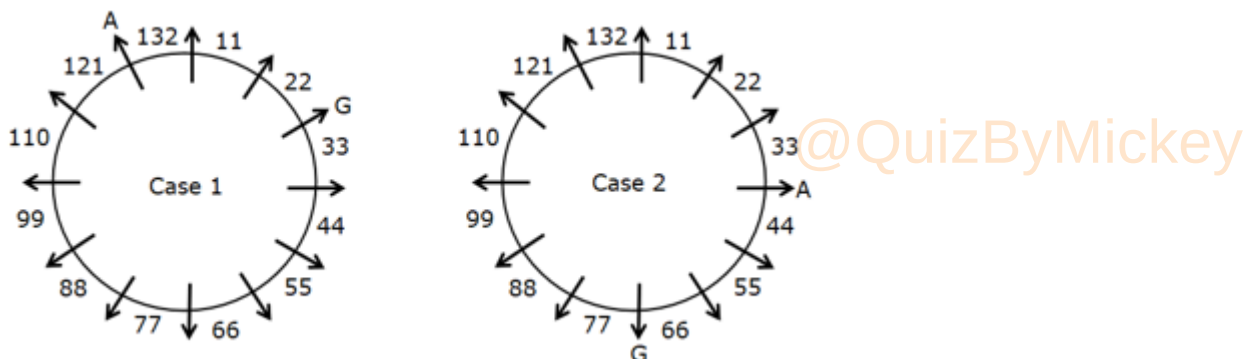

We have,

Since, diameter of the table = 273cm.

Thus, circumference = $2 \times \frac{22}{7} \times \frac{273}{2} = 858\text{cm}$.

- A sits 165cm to the left of G.
- The number of persons sitting between A and G is a prime number.

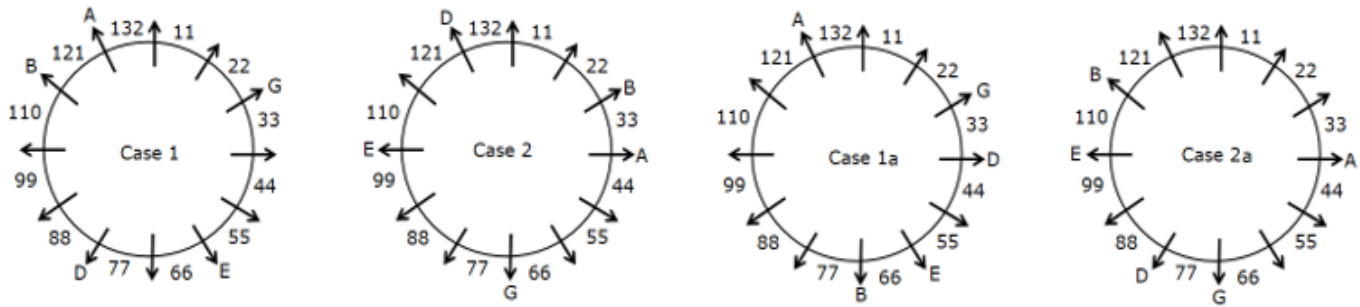

From the above conditions, there are two possibilities

Again we have,

- D sits third to the left of B.
- One person sits between D and E.
- As many persons sit between B and E when counted from the left of B as between G and D

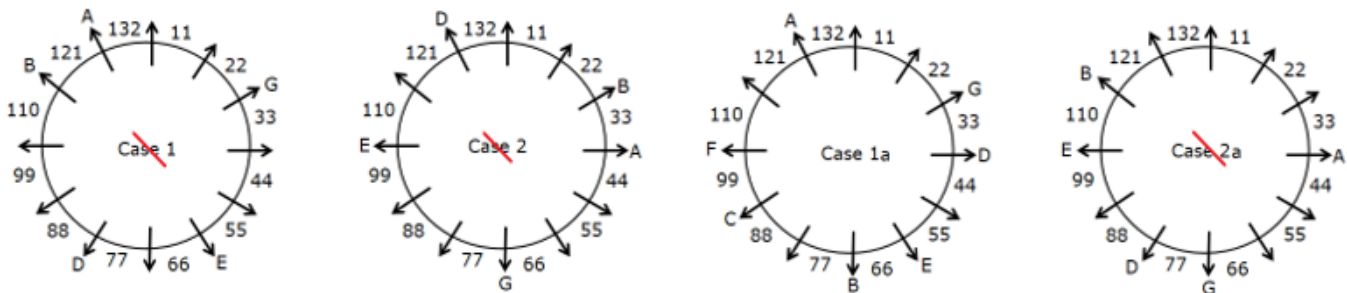

when counted from the right of G.

Again we have,

- The distance between E and D is same as the distance between F and C when counted from the right of both D and C.
- Neither F nor C is sitting adjacent to E.

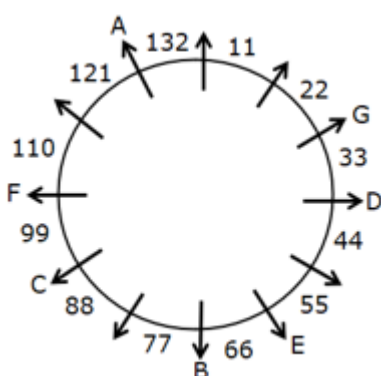

So Case 1, Case 2 and Case 2a get eliminated, hence Case 1a shows the final arrangement.

Answer: D

18. Questions

Final arrangement:

@QuizByMickey

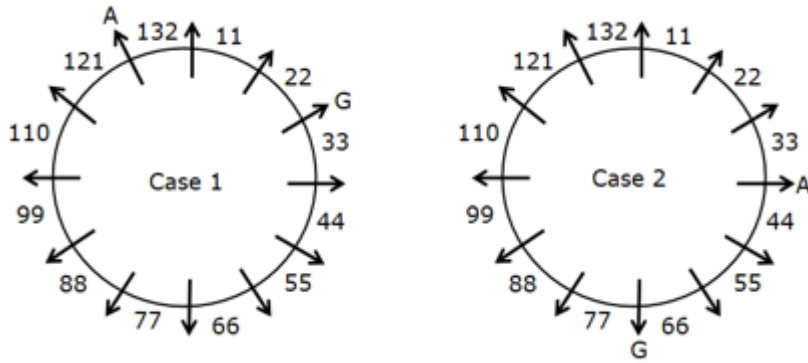

We have,

Since, diameter of the table = 273cm.

Thus, circumference = $2 \times \frac{22}{7} \times \frac{273}{2} = 858\text{cm}$.

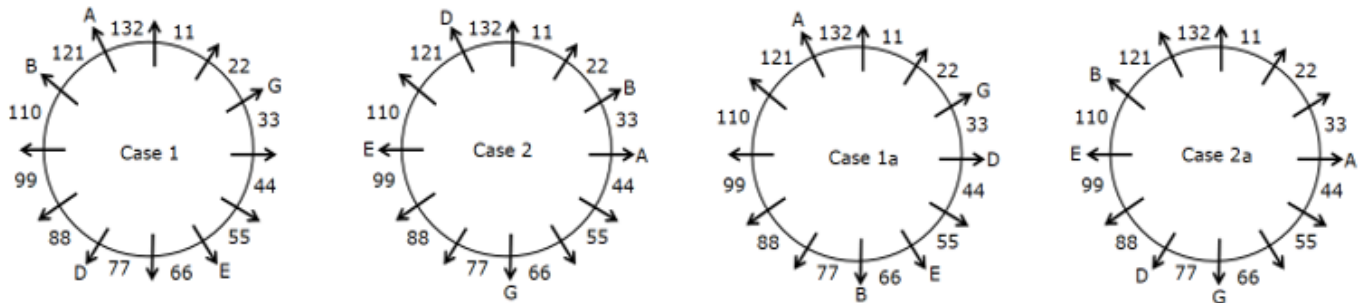

- A sits 165cm to the left of G.
- The number of persons sitting between A and G is a prime number.

From the above conditions, there are two possibilities

Again we have,

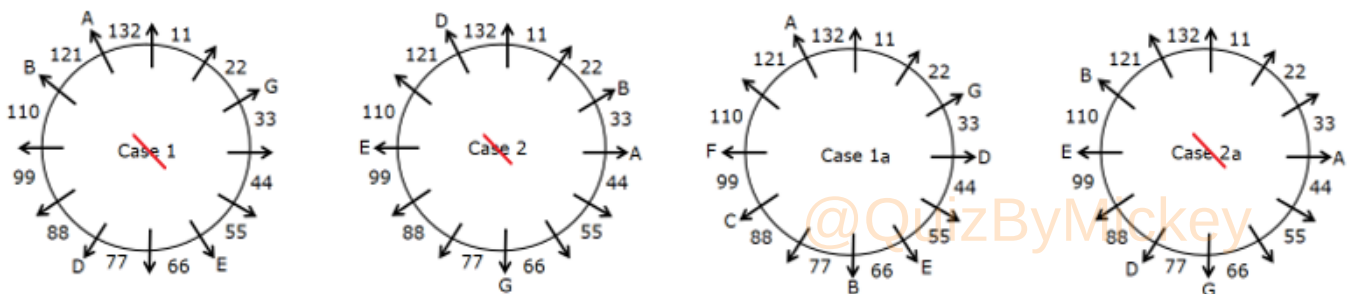

- D sits third to the left of B.
- One person sits between D and E.
