

1. Questions

Study the following information carefully and answer the below questions.

Ten persons - M, N, O, P, Q, R, S, T, U, and V - are sitting in a linear row and facing north.

Not more than two persons sit to the right of V. Two persons sit between the one who sits second to the left of V and N. N doesn't sit adjacent to V. Q sits second to the left of N. T sits exactly between Q and U. T sits third to the right of the one who sits immediate left of O. As many persons sit between T and O as between U and M. The number of persons sitting between the one who sits immediate right of M and P is **two more than** the number of persons sitting between R and the one who sits immediate left of S. R doesn't sit to the left of S.

Who among the following persons sits at the extreme ends of the row?

- a. N and the one who sits second to the left of O
- b. P and M
- c. The one who sits immediate left of Q and R
- d. T and S
- e. R and U

2. Questions

If all the persons are made to sit in alphabetical order from left to right, then how many persons remain unchanged in their position?

- a. One
- b. None
- c. Three
- d. Two
- e. More than three

3. Questions

If M and O interchange their positions, and V and T do the same, with respect to the new positions, who among the following person sits third to the right of O?

- a. M
- b. The one who sits immediate left of R
- c. N
- d. V
- e. The one who sits second to the right of P

4. Questions

In which of the following options, the first person sits exactly between the third and the second persons in the given arrangement?

- a. QNT
- b. MUR
- c. MVO
- d. RUN
- e. NOP

5. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

I). Five persons sit between O and V

II). Q sits to the immediate left of P

III). S sits adjacent to V

- a. Only I
- b. Only I and II
- c. Only III
- d. Only II and III
- e. All I, II, and III

6. Questions

Study the following information carefully and answer the below questions.

Six persons - A, B, C, D, E, and F - are sitting around the triangular table in such a way that three persons sit at the corners of the table facing inside, and three persons sit in the middle of the sides of the table facing outside (**opposite to the centre**). Each of them likes a different country, viz., France, USA, UK, Nepal, Italy, and Poland.

The one who likes the country USA sits immediate left of D, who sits opposite to the one who likes Italy. Only two persons sit between the one who likes the USA and the one who sits immediate right of F. As many persons sit between B and the one who likes Italy (when counted from the left of B) as between B and E (when counted from the left of E). The one who likes the UK sits opposite to the one who sits second to the right of E, who doesn't like the USA. The number of persons sitting between C and the one who likes Nepal (when counted from the right of C) is **one more than** the number of persons sitting between the one who likes France and A (when counted from the left of A). The one who likes Poland neither faces centre nor sits second to the right of A. E doesn't like Nepal.

Who among the following person sits opposite to the one who sits second to the left of the one who likes Poland?

- a. E

- b. The one who likes Nepal
- c. D
- d. The one who sits second to the right of E
- e. A

7. Questions

How many persons are sitting between C and the one who likes France when counted from the right of C?

- a. One
- b. Three
- c. Four
- d. Two
- e. None

8. Questions

What is the position of B with respect to the one who likes the UK as per the final arrangement?

- a. Immediate right
- b. Second to the left
- c. Second to the right
- d. Immediate left
- e. Third to the right

9. Questions

Which of the following combination(s) is/are NOT TRUE based on the final arrangement?

I). E-France

II). A-Italy

III). F-Nepal

- a. Only I
- b. Only II and III
- c. Only III
- d. Only I and II
- e. All I, II, and III

@QuizByMickey

10. Questions

If D is related to F, and A is related to E in a certain way, then in the same way. Who among the following is related to B?

- a. E
- b. The one who sits second to the right of A
- c. F
- d. D
- e. The one who sits immediate to the right of the one who likes Italy

11. Questions

Study the following information carefully and answer the below questions.

A family has eight members - A, B, C, D, E, F, G, and H. And all of them earn different amounts of salary.

H is the daughter-in-law of C and earns more than both C and G. E is the brother-in-law of G and earns less than F but more than H. G is the daughter of C, who has only two children. G doesn't earn the lowest amount of money. B is the son of H and earns less than A but more than H. As many persons earn more than B as less than A, who is the son-in-law of F. The number of persons earning more than E is **two more than** the number of persons earning more than D, who is the only brother-in-law of A. F is the paternal grandmother of the only son of D. D earns Rs. 10,000 more than B.

How is E related to A?

- a. Brother
- b. Nephew
- c. Brother-in-law
- d. Husband
- e. Son

12. Questions

How many persons earn more than E based on the final arrangement?

- a. None
- b. One
- c. More than three
- d. Three
- e. Two

@QuizByMickey

13. Questions

If the sum of the salaries of B and the brother of G is Rs. 80000 and the difference between the

salary of G and the grandson of C is Rs. 2000. Then, what is the possible salary of the sister-in-law of G?

- a. Rs. 35000
- b. Rs. 33500
- c. Rs. 45000
- d. Rs. 48000
- e. Cannot be determined

14. Questions

Which of the following pairs of persons shows that the first person is the child of the second person?

- a. E and C
- b. B and G
- c. G and H
- d. D and F
- e. None of the above

15. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

I). E is the paternal uncle of B.

II). Only two persons earn less than H.

III). A earns more than the nephew of G.

- a. Only I
- b. Only II
- c. Only II and III
- d. Only I and III
- e. All I, II, and III

@QuizByMickey

16. Questions

Statement I ---> Nearly one-third of the 75 samples of elephant dung examined contained human waste, plastic packaging and other, far worse, things.

Statement II ---> Plastic debris is frequently discovered at garbage dumps near the forest margins of villages and human settlements, which elephants frequently approach for grazing or foraging.

Choose the correct option as your answer after reading the sentences given above?

- a. I is the cause and II is its effect
- b. I and II are effects of independent causes
- c. II is the cause and I is the effect
- d. Both I and II are independent causes
- e. None of the above

17. Questions

Statement:

There were reports this year that in eight years, 20 elephants in Sri Lanka died as a result of ingesting plastic garbage.

Inferences:

- i). Plastic is very dangerous and should be out of the reach of animals
 - ii). The Sri Lankan authorities are too careless and have failed to handle the issue
 - iii). Ingestion of plastic has become a serious issue which should not be neglected
- a. Only (ii)
 - b. Both (i) and (iii)
 - c. Only (ii)
 - d. Neither (i) nor (iii)
 - e. All (i), (ii) and (iii)

18. Questions

Read the given passage carefully and answer the questions that follow:

Statement:

The students these days do not have the habit of reading and that is the reason their knowledge in many areas is not as profound as it used to be earlier as they depend on others to tell them the important information or events.

Course of Action:

@QuizByMickey

- I). Schools should promote reading as a habit in students right from their early classes
 - II). Parents must help the children come closer to reading by making their personal library at home
- a. Only II
 - b. Only I
 - c. Both I and II
 - d. Neither I nor II

e. Either I or II

19. Questions

Which of the following can be inferred from the statement given above?

- a. The schools don't help students develop a reading habit
- b. Reading helps develop and gain knowledge
- c. Nothing other than reading can help an individual gain knowledge
- d. All of the above
- e. Both (c) and (d)

20. Questions

An Interview Advertisement:

The candidates are required to come for the interview of a supervisor at the stated venue and apart from the food, no other expenses would be borne by the company. What might have the company **assumed** before putting out such an advertisement?

- A). The candidates might ask for the travel reimbursements from the company
- B). The candidates coming for an interview would not expect to be fed at the venue
- a. Not A but B
- b. Not B but A
- c. Both A and B
- d. Either A or B
- e. Neither B nor A

Explanations:

1. Questions

Final arrangement:

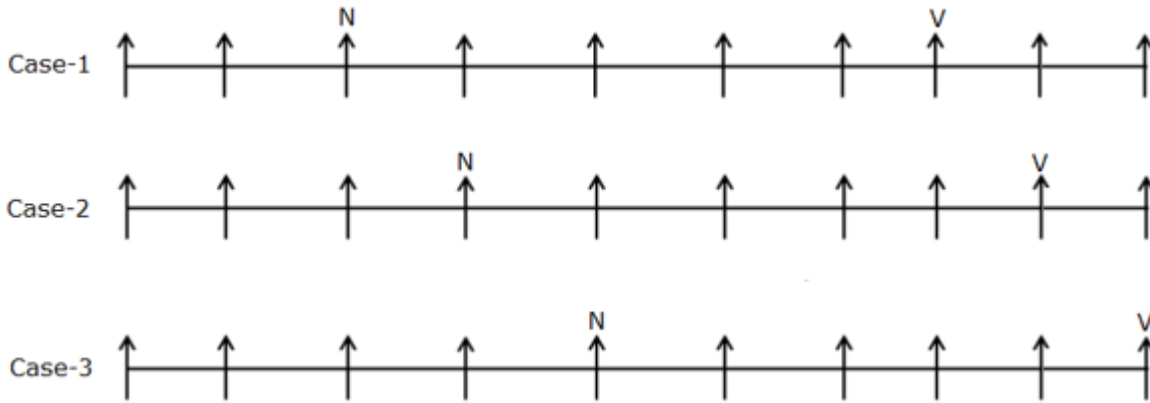

@QuizByMickey

We have,

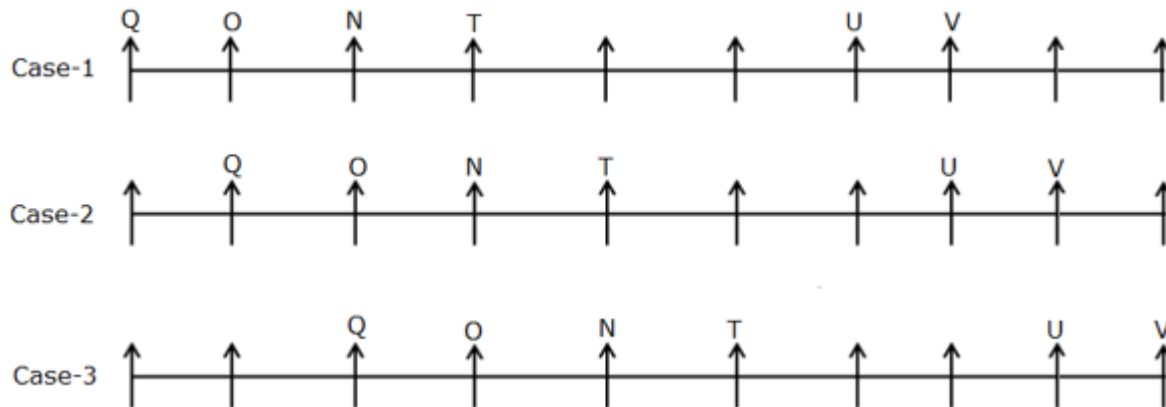

- Not more than two persons sit to the right of V.
- Two persons sit between the one who sits second to the left of V and N.
- N doesn't sit adjacent to V.

From the above conditions, there are three possibilities.

Again, we have,

- Q sits second to the left of N.
- T sits exactly between Q and U.
- T sits third to the right of the one who sits immediate left of O.

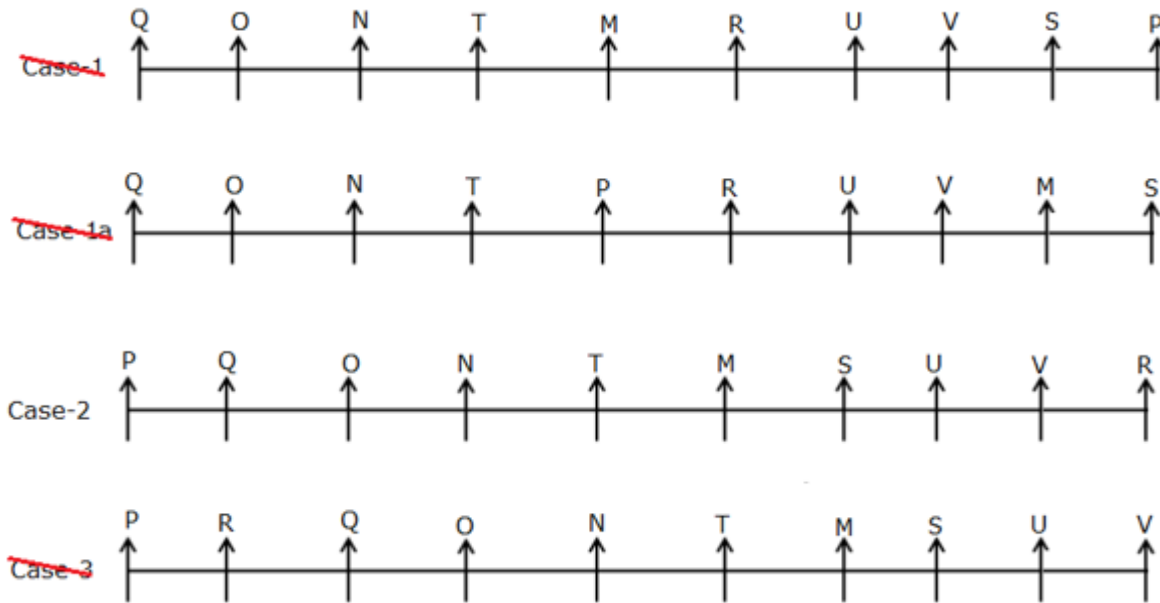

Again, We have,

- As many persons sit between T and O as between U and M.
- The number of persons sitting between the one who sits immediate right of M and P is **two more than** the number of persons sitting between R and the one who sits immediate left of S.
- R doesn't sit to the left of S.

From the above conditions, we have one more possibility, case-1 is split into case-1a.

Also, from the above conditions, case-1, case-1a, and case-3 get eliminated because R doesn't sit to the left of S, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: C

2. Questions

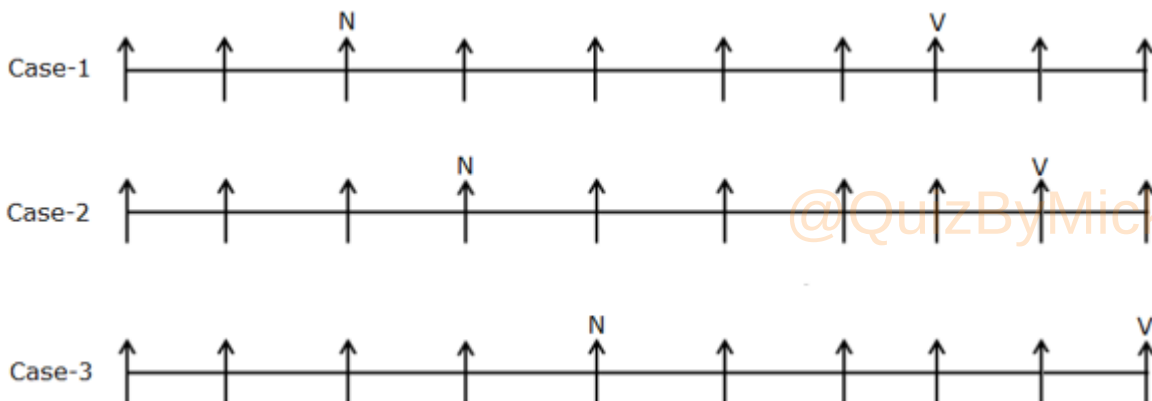

Final arrangement:

We have,

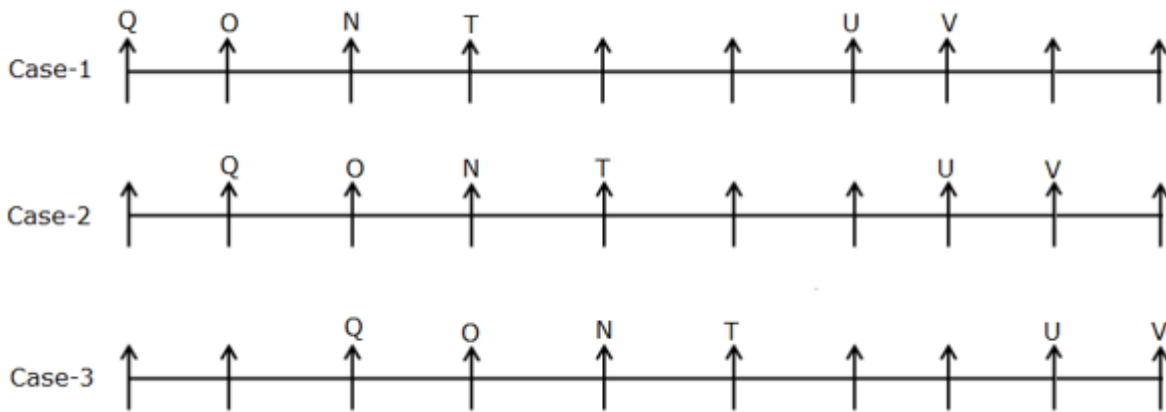

- Not more than two persons sit to the right of V.
- Two persons sit between the one who sits second to the left of V and N.
- N doesn't sit adjacent to V.

From the above conditions, there are three possibilities.

Again, we have,

- Q sits second to the left of N.
- T sits exactly between Q and U.
- T sits third to the right of the one who sits immediate left of O.

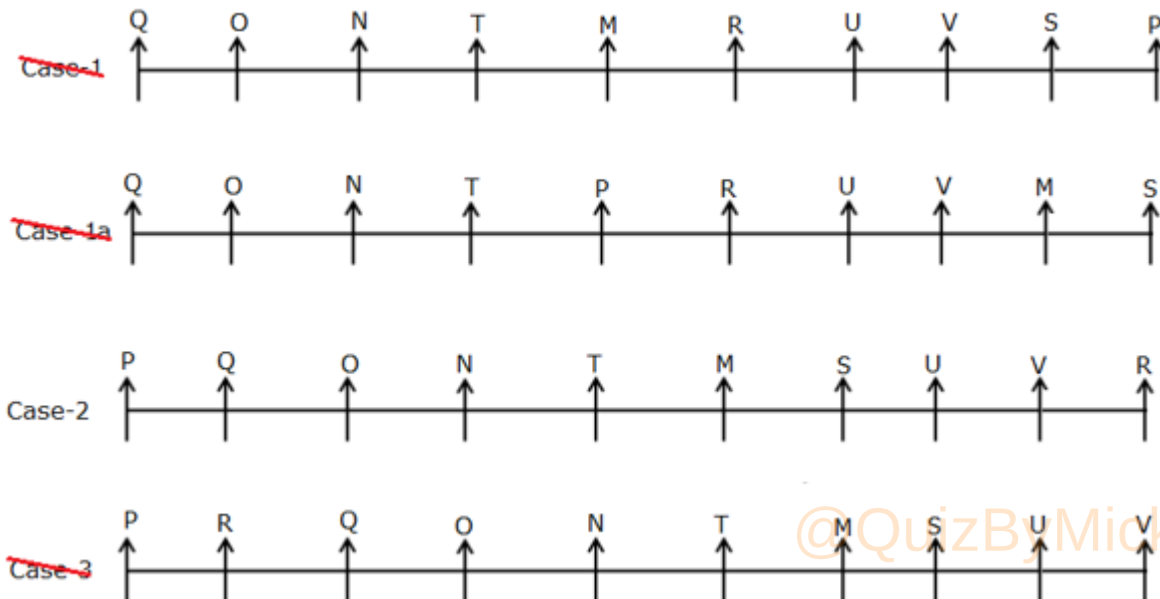

Again, We have,

- As many persons sit between T and O as between U and M.
- The number of persons sitting between the one who sits immediate right of M and P is **two more than** the number of persons sitting between R and the one who sits immediate left of S.
- R doesn't sit to the left of S.

From the above conditions, we have one more possibility, case-1 is split into case-1a.

Also, from the above conditions, case-1, case-1a, and case-3 get eliminated because R doesn't sit to the left of S, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: D

3. Questions

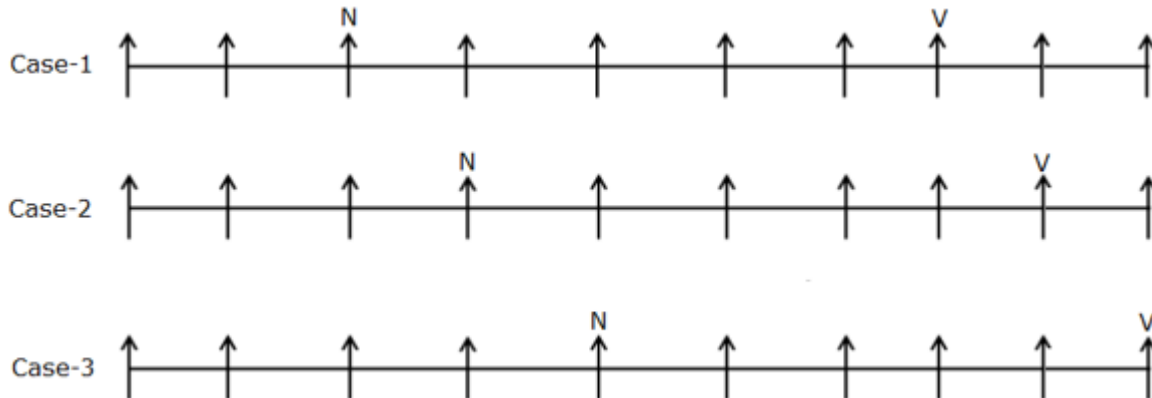

Final arrangement:

We have,

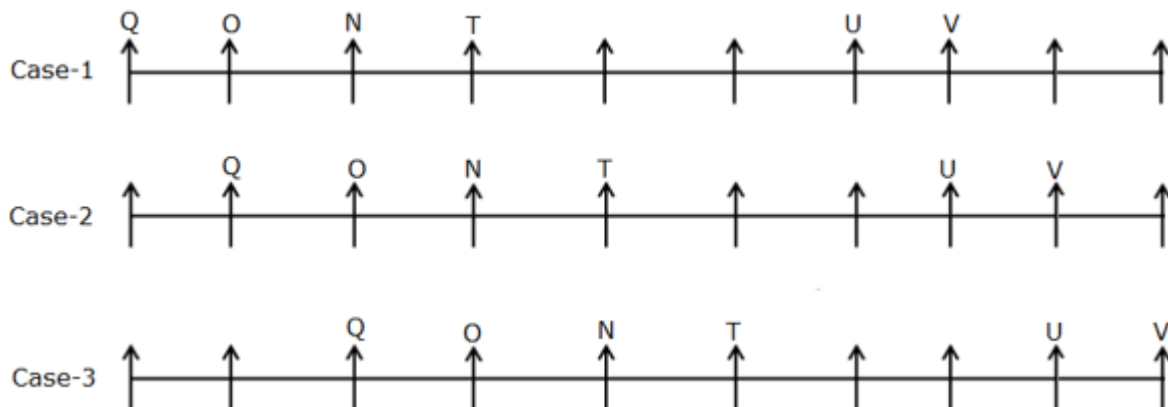

- Not more than two persons sit to the right of V.
- Two persons sit between the one who sits second to the left of V and N.
- N doesn't sit adjacent to V.

From the above conditions, there are three possibilities.

Again, we have,

- Q sits second to the left of N.
- T sits exactly between Q and U.
- T sits third to the right of the one who sits immediate left of O.

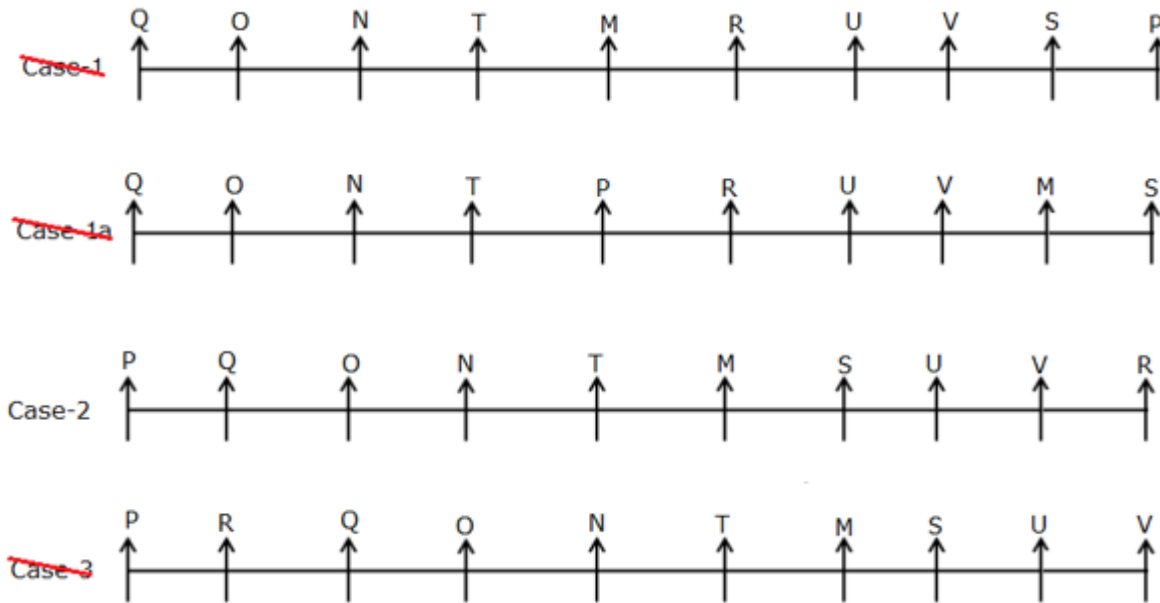

Again, We have,

- As many persons sit between T and O as between U and M.
- The number of persons sitting between the one who sits immediate right of M and P is **two more than** the number of persons sitting between R and the one who sits immediate left of S.
- R doesn't sit to the left of S.

From the above conditions, we have one more possibility, case-1 is split into case-1a.

Also, from the above conditions, case-1, case-1a, and case-3 get eliminated because R doesn't sit to the left of S, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: B

4. Questions

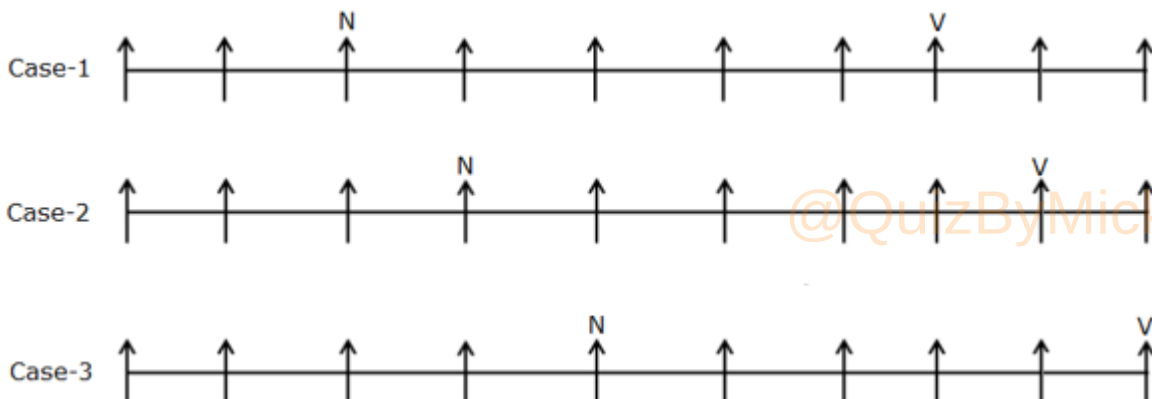

Final arrangement:

We have,

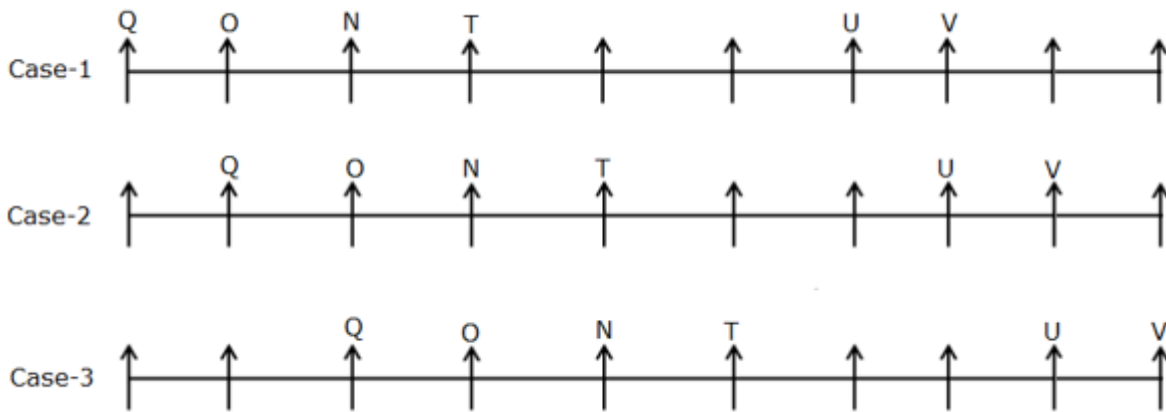

- Not more than two persons sit to the right of V.
- Two persons sit between the one who sits second to the left of V and N.
- N doesn't sit adjacent to V.

From the above conditions, there are three possibilities.

Again, we have,

- Q sits second to the left of N.
- T sits exactly between Q and U.
- T sits third to the right of the one who sits immediate left of O.

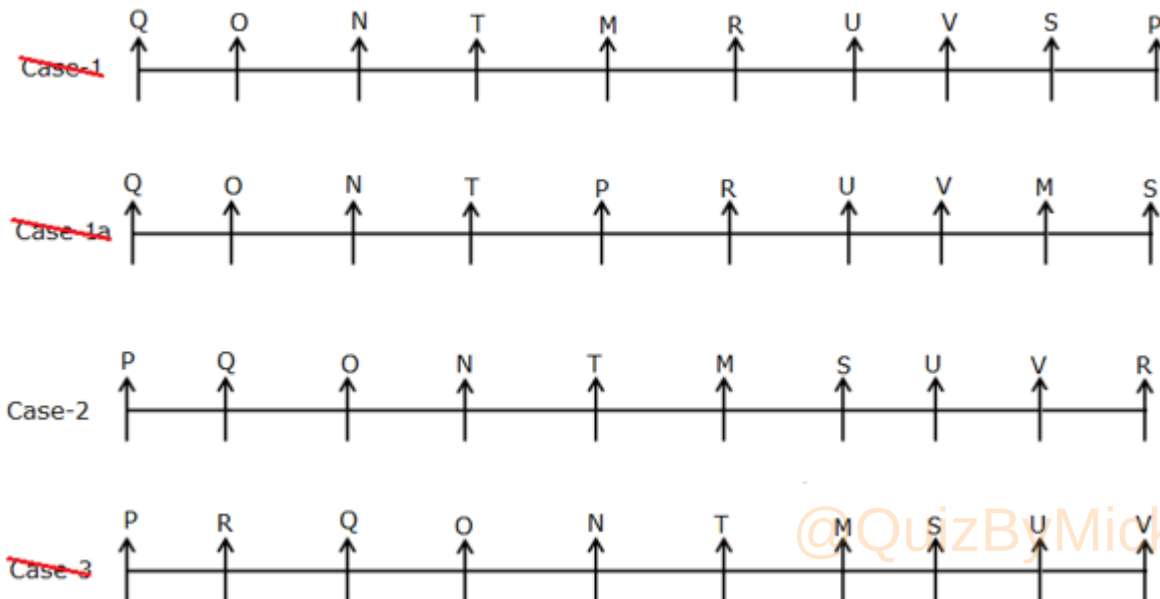

Again, We have,

- As many persons sit between T and O as between U and M.
- The number of persons sitting between the one who sits immediate right of M and P is **two more than** the number of persons sitting between R and the one who sits immediate left of S.
- R doesn't sit to the left of S.

From the above conditions, we have one more possibility, case-1 is split into case-1a.

Also, from the above conditions, case-1, case-1a, and case-3 get eliminated because R doesn't sit to the left of S, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: C

5. Questions

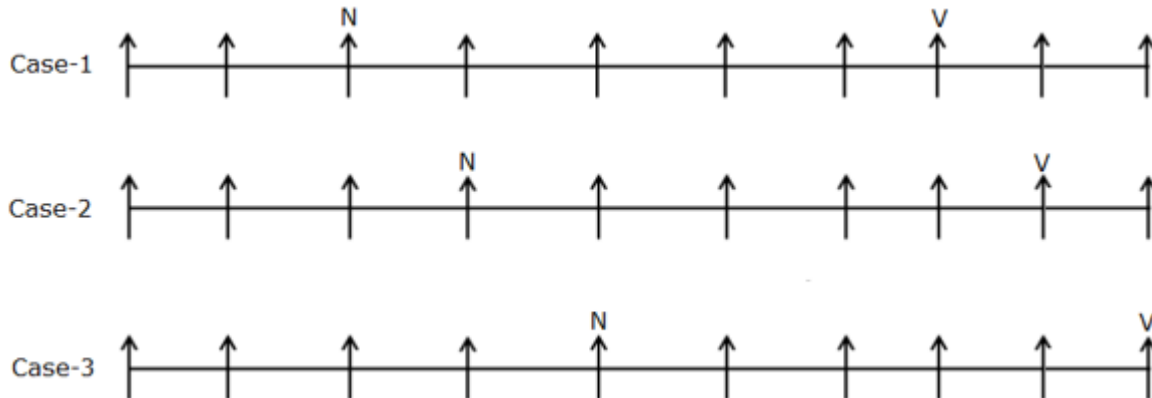

Final arrangement:

We have,

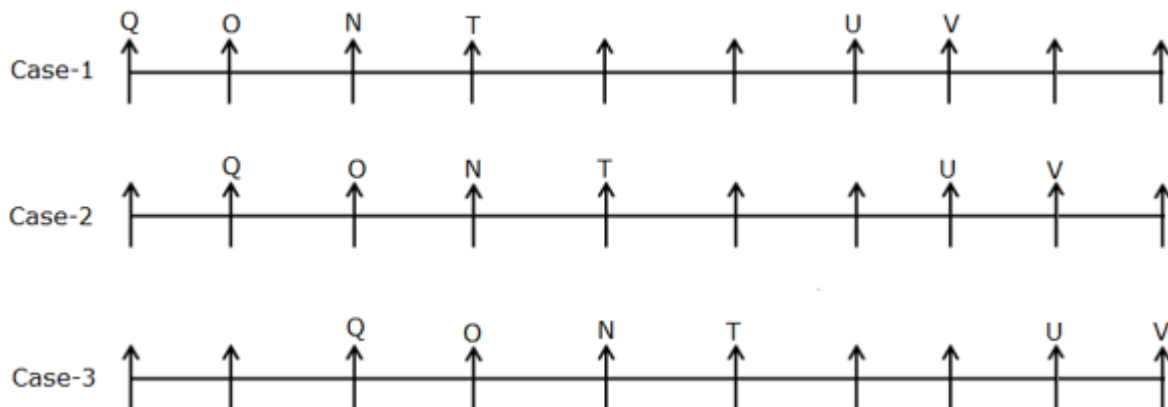

- Not more than two persons sit to the right of V.
- Two persons sit between the one who sits second to the left of V and N.
- N doesn't sit adjacent to V.

From the above conditions, there are three possibilities.

Again, we have,

- Q sits second to the left of N.
- T sits exactly between Q and U.
- T sits third to the right of the one who sits immediate left of O.

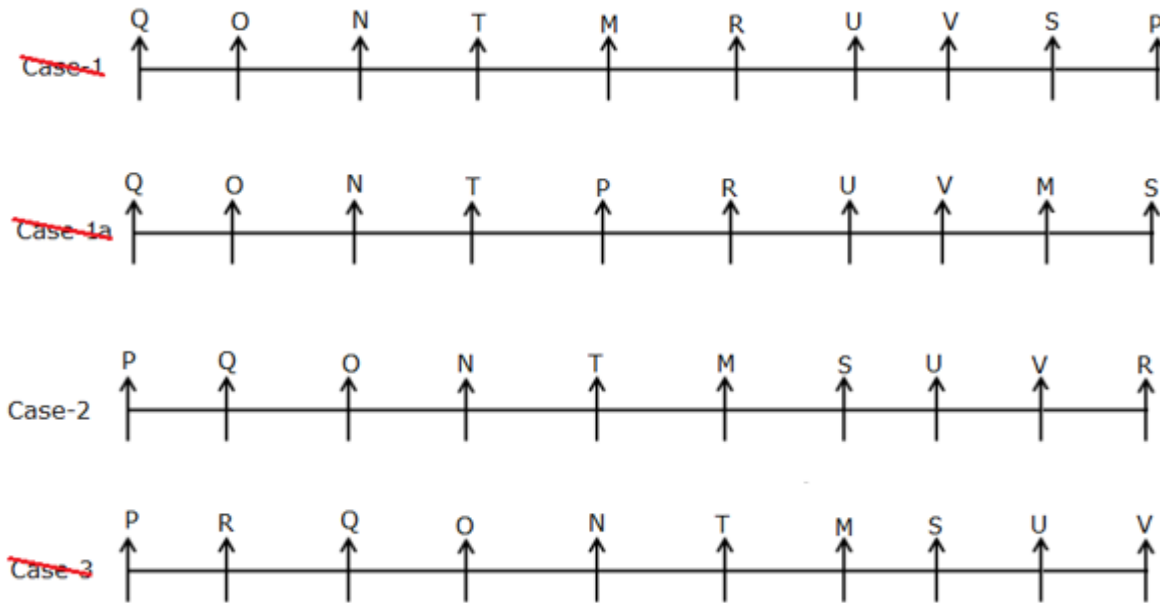

Again, We have,

- As many persons sit between T and O as between U and M.
- The number of persons sitting between the one who sits immediate right of M and P is **two more than** the number of persons sitting between R and the one who sits immediate left of S.
- R doesn't sit to the left of S.

From the above conditions, we have one more possibility, case-1 is split into case-1a.

Also, from the above conditions, case-1, case-1a, and case-3 get eliminated because R doesn't sit to the left of S, which is not satisfied.

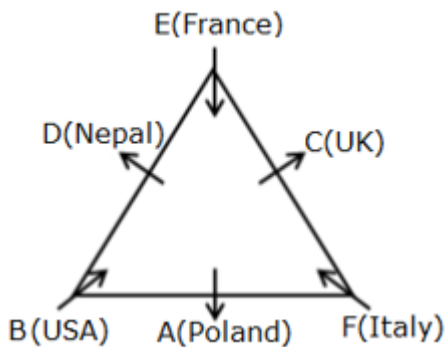

Hence, case-2 shows the final arrangement.

Answer: A

6. Questions

Final arrangement:

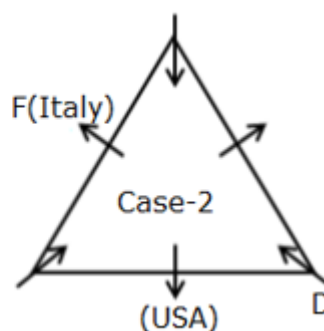

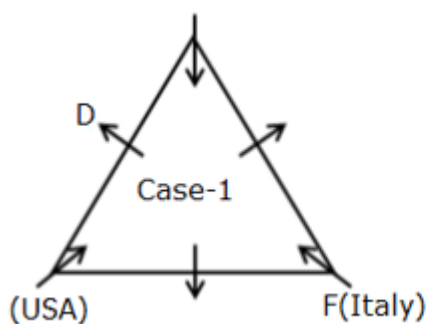

We have,

- The one who likes the country USA sits immediate left of D, who sits opposite to the one who likes Italy.
- Only two persons sit between the one who likes the USA and the one who sits immediate right of F.

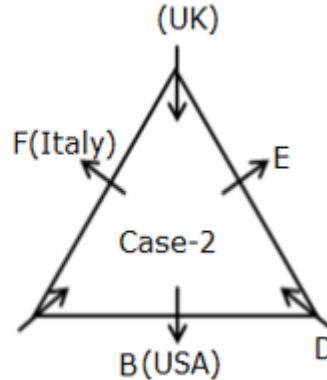

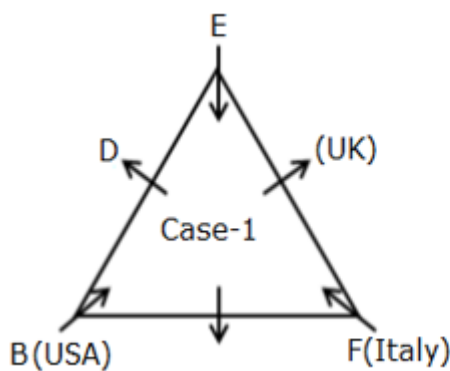

From the above conditions, there are two possibilities.

@QuizByMickey

Again, we have,

- As many persons sit between B and the one who likes Italy (when counted from the left of B) as between B and E (when counted from the left of E).
- The one who likes the UK sits opposite to the one who sits second to the right of E, who doesn't like the USA.

Again, We have,

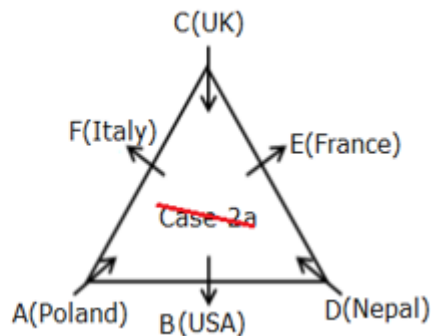

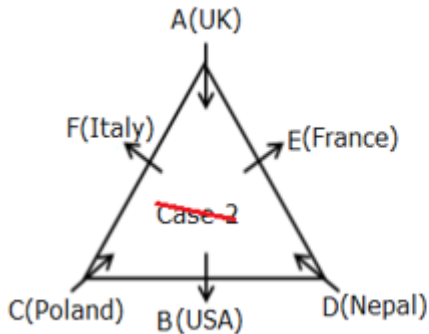

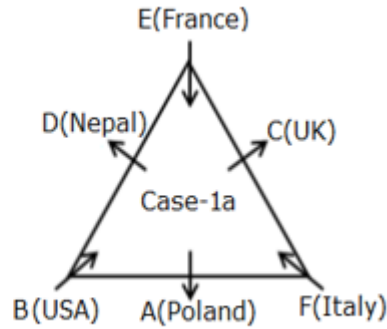

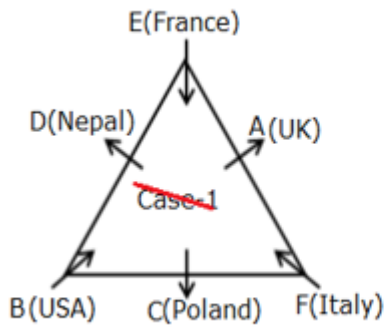

- The number of persons sitting between C and the one who likes Nepal (when counted from the right of C) is **one more than** the number of persons sitting between the one who likes France and A (when counted from the left of A).
- The one who likes Poland neither faces centre nor sits second to the right of A.
- E doesn't like Nepal.

From the above conditions, we have two more possibilities, case- 1 is split into case-1a and case-2 is split into case-2a.

Also, from the above conditions, case-1 gets eliminated because the one who likes Poland doesn't sit second to the right of A, which is not satisfied and Case-2 and case-2a also get eliminated because the one who likes Poland doesn't face centre, which is not satisfied.

Hence, case-1a shows the final arrangement.

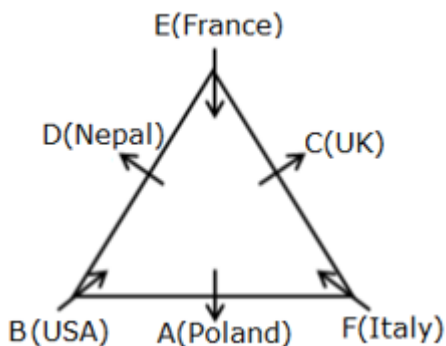

@QuizByMickey

Answer: D

7. Questions

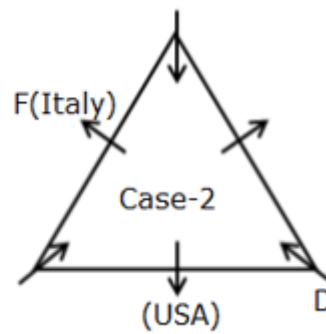

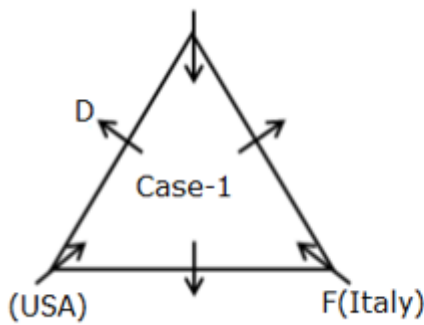

Final arrangement:

We have,

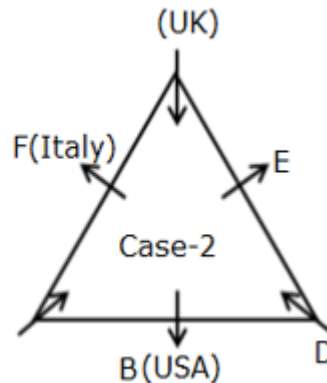

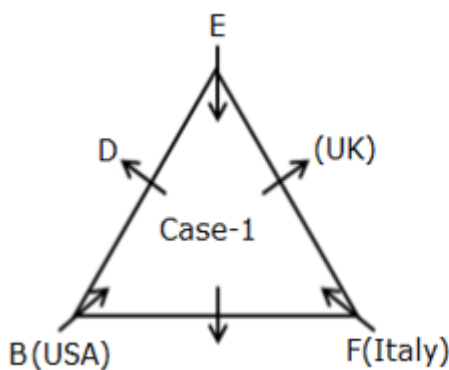

- The one who likes the country USA sits immediate left of D, who sits opposite to the one who likes Italy.
- Only two persons sit between the one who likes the USA and the one who sits immediate right of F.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and the one who likes Italy (when counted from the left of B) as between B and E (when counted from the left of E).
- The one who likes the UK sits opposite to the one who sits second to the right of E, who doesn't like the USA.

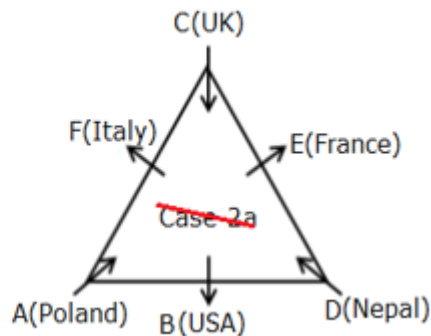

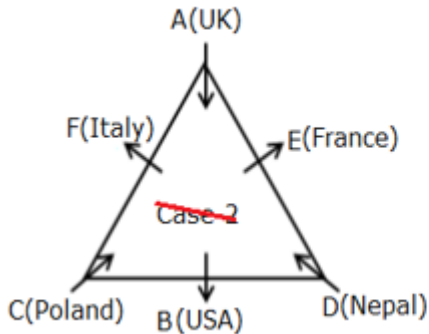

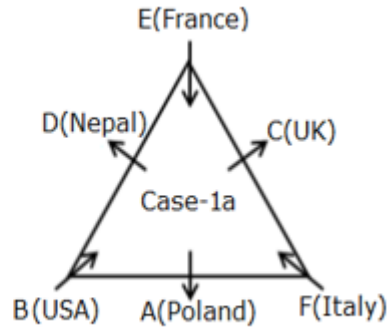

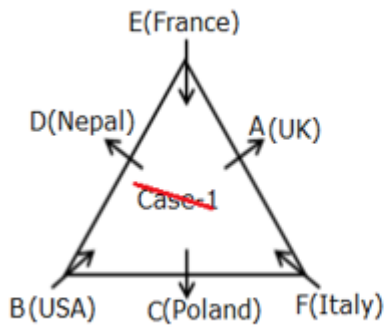

Again, We have,

- The number of persons sitting between C and the one who likes Nepal (when counted from the right of C) is **one more than** the number of persons sitting between the one who likes France and A (when counted from the left of A).
- The one who likes Poland neither faces centre nor sits second to the right of A.
- E doesn't like Nepal.

From the above conditions, we have two more possibilities, case- 1 is split into case-1a and case-2 is split into case-2a.

Also, from the above conditions, case-1 gets eliminated because the one who likes Poland doesn't sit second to the right of A, which is not satisfied and Case-2 and case-2a also get eliminated because the one who likes Poland doesn't face centre, which is not satisfied.

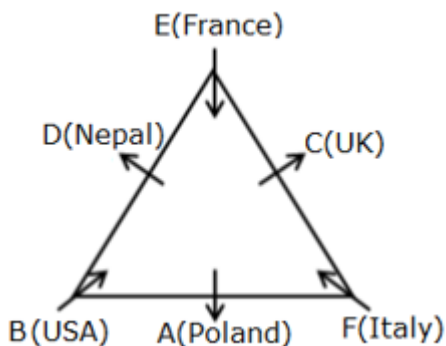

Hence, case-1a shows the final arrangement.

Answer: C

8. Questions

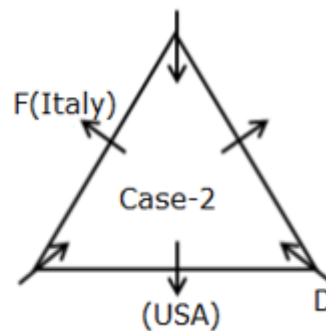

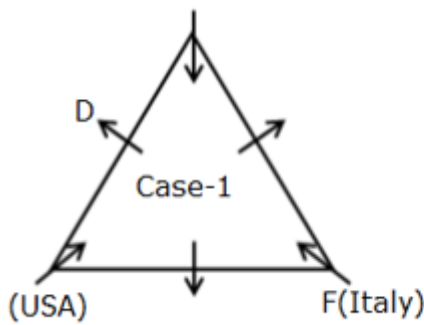

Final arrangement:

We have,

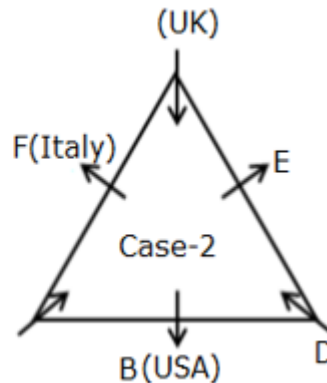

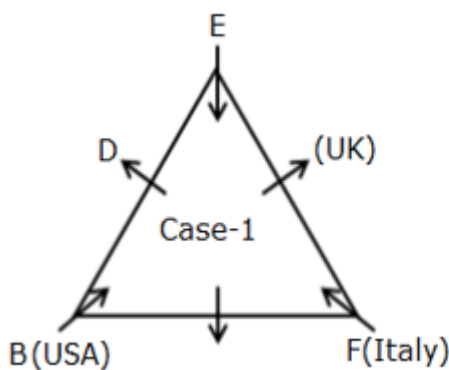

- The one who likes the country USA sits immediate left of D, who sits opposite to the one who likes Italy.
- Only two persons sit between the one who likes the USA and the one who sits immediate right of F.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and the one who likes Italy (when counted from the left of B) as between B and E (when counted from the left of E).
- The one who likes the UK sits opposite to the one who sits second to the right of E, who doesn't like the USA.

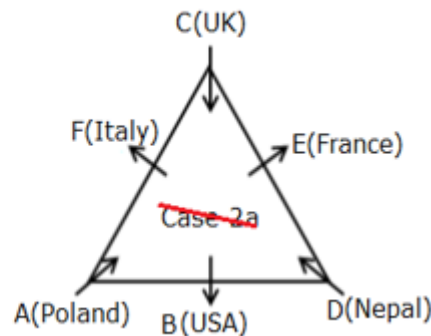

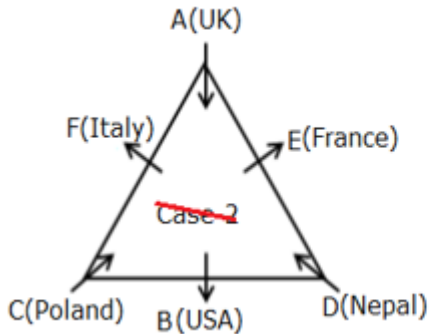

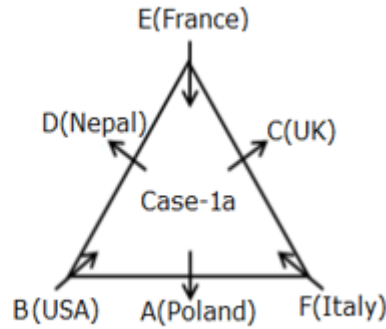

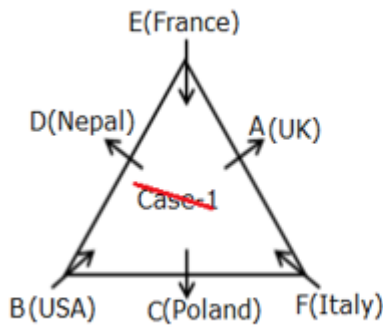

Again, We have,

- The number of persons sitting between C and the one who likes Nepal (when counted from the right of C) is **one more than** the number of persons sitting between the one who likes France and A (when counted from the left of A).
- The one who likes Poland neither faces centre nor sits second to the right of A.
- E doesn't like Nepal.

From the above conditions, we have two more possibilities, case- 1 is split into case-1a and case-2 is split into case-2a.

Also, from the above conditions, case-1 gets eliminated because the one who likes Poland doesn't sit second to the right of A, which is not satisfied and Case-2 and case-2a also get eliminated because the one who likes Poland doesn't face centre, which is not satisfied.

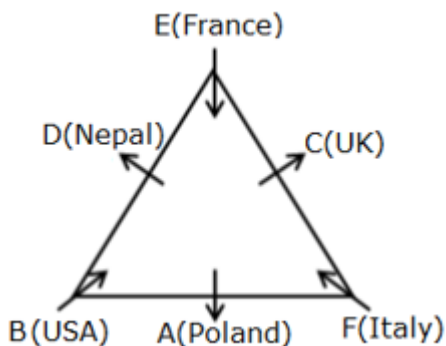

Hence, case-1a shows the final arrangement.

Answer: E

9. Questions

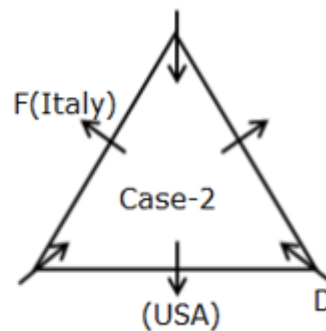

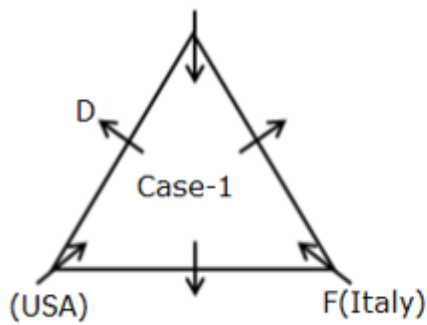

Final arrangement:

We have,

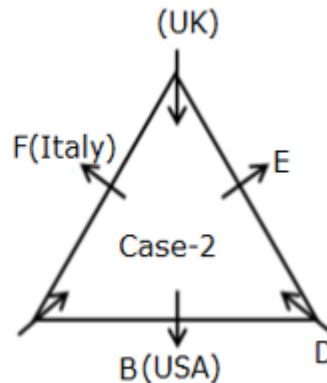

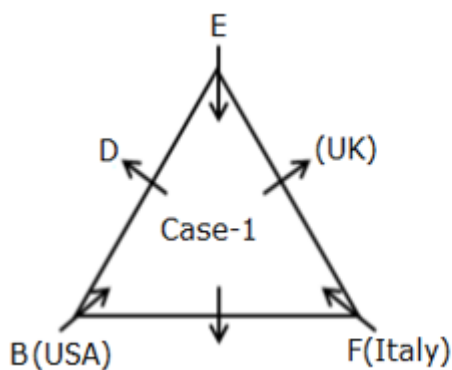

- The one who likes the country USA sits immediate left of D, who sits opposite to the one who likes Italy.
- Only two persons sit between the one who likes the USA and the one who sits immediate right of F.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and the one who likes Italy (when counted from the left of B) as between B and E (when counted from the left of E).
- The one who likes the UK sits opposite to the one who sits second to the right of E, who doesn't like the USA.

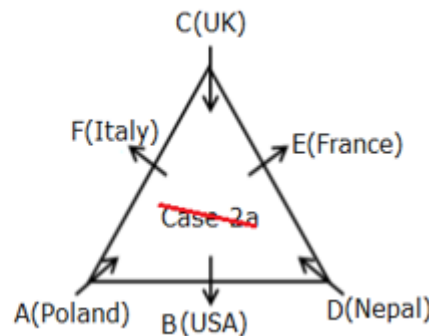

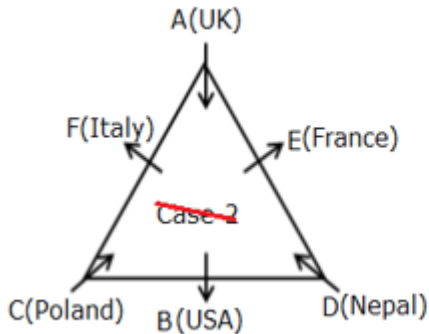

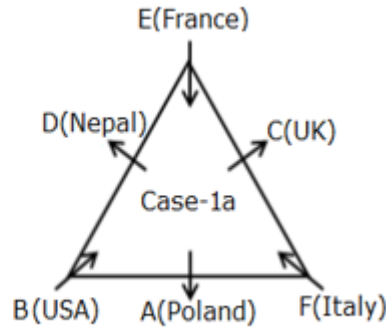

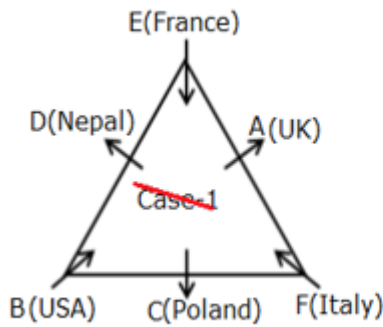

Again, We have,

- The number of persons sitting between C and the one who likes Nepal (when counted from the right of C) is **one more than** the number of persons sitting between the one who likes France and A (when counted from the left of A).
- The one who likes Poland neither faces centre nor sits second to the right of A.
- E doesn't like Nepal.

From the above conditions, we have two more possibilities, case- 1 is split into case-1a and case-2 is split into case-2a.

Also, from the above conditions, case-1 gets eliminated because the one who likes Poland doesn't sit second to the right of A, which is not satisfied and Case-2 and case-2a also get eliminated because the one who likes Poland doesn't face centre, which is not satisfied.

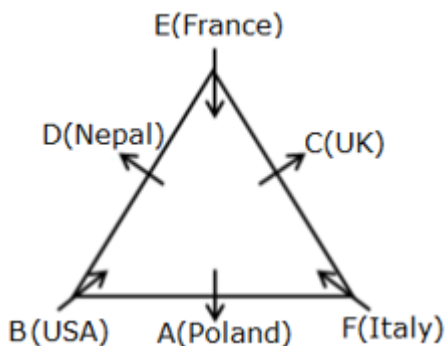

Hence, case-1a shows the final arrangement.

Answer: B

10. Questions

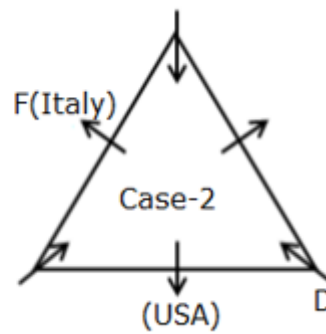

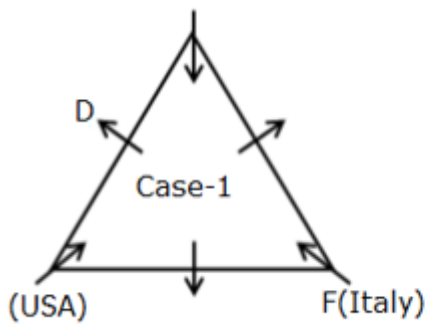

Final arrangement:

We have,

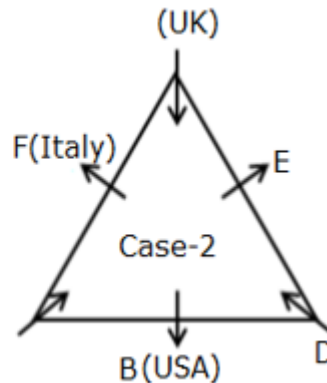

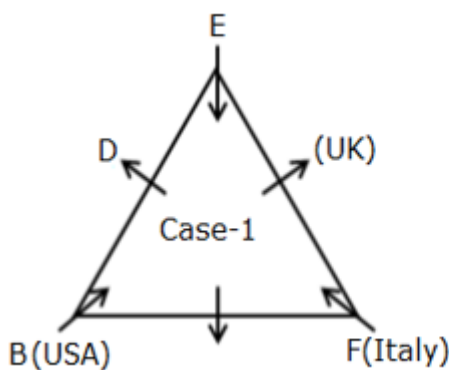

- The one who likes the country USA sits immediate left of D, who sits opposite to the one who likes Italy.
- Only two persons sit between the one who likes the USA and the one who sits immediate right of F.

From the above conditions, there are two possibilities.

Again, we have,

- As many persons sit between B and the one who likes Italy (when counted from the left of B) as between B and E (when counted from the left of E).
- The one who likes the UK sits opposite to the one who sits second to the right of E, who doesn't like the USA.

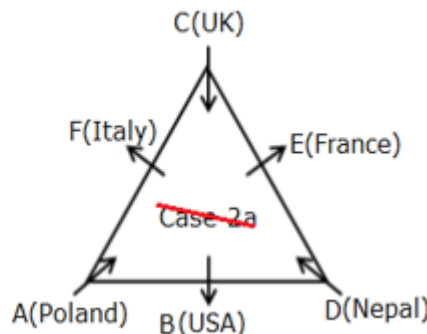

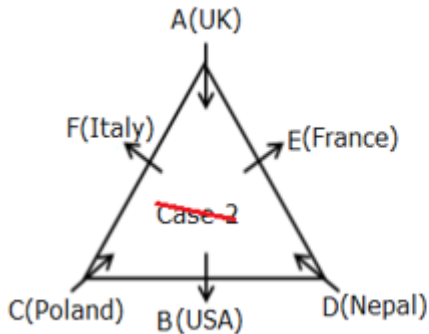

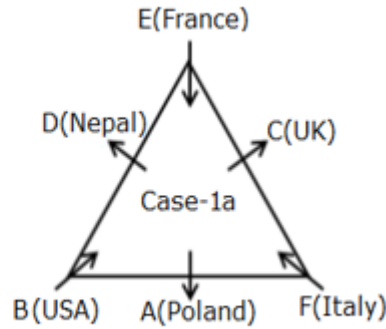

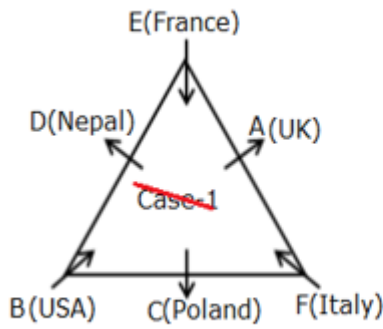

Again, We have,

- The number of persons sitting between C and the one who likes Nepal (when counted from the right of C) is **one more than** the number of persons sitting between the one who likes France and A (when counted from the left of A).
- The one who likes Poland neither faces centre nor sits second to the right of A.
- E doesn't like Nepal.

From the above conditions, we have two more possibilities, case- 1 is split into case-1a and case-2 is split into case-2a.

Also, from the above conditions, case-1 gets eliminated because the one who likes Poland doesn't sit second to the right of A, which is not satisfied and Case-2 and case-2a also get eliminated because the one who likes Poland doesn't face centre, which is not satisfied.

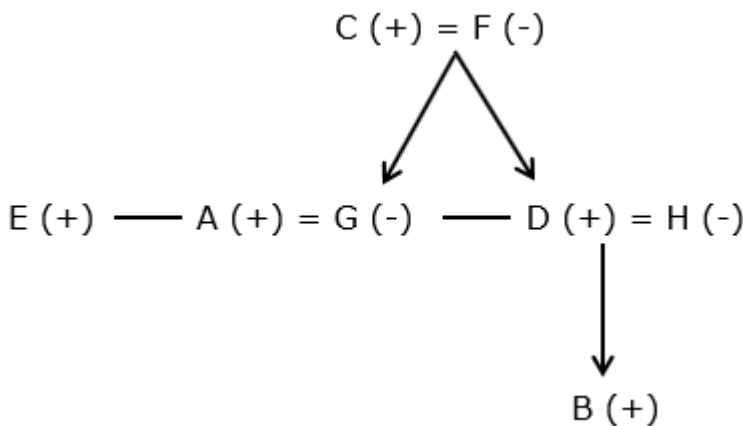

Hence, case-1a shows the final arrangement.

Answer: E

11. Questions

Final arrangement:

$D > F > E > A > B > H > G > C$

We have,

- H is the daughter-in-law of C and earns more than both C and G.
- E is the brother-in-law of G and earns less than F but more than H.

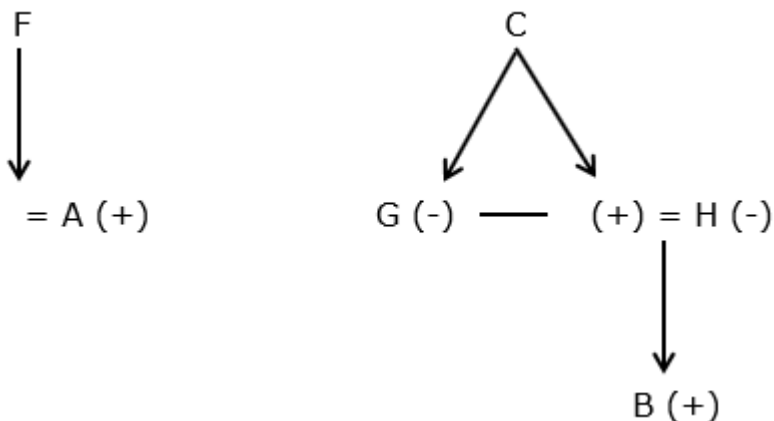

@QuizByMickey

$E(+) \text{ — } = G \text{ or } E(+) = \text{ — } G$

$F > E > H > G / C$

Again, we have,

- G is the daughter of C, who has only two children.
- G doesn't earn the lowest amount of money.
- B is the son of H and earns less than A but more than H.
- As many persons earn more than B as less than A, who is the son-in-law of F.

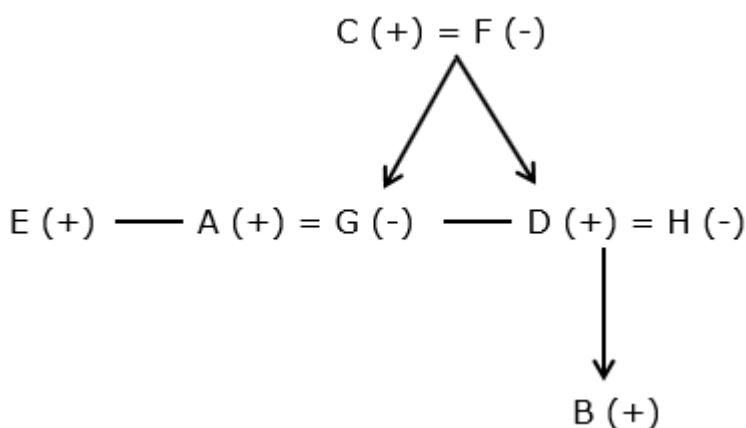

$A > B > H, F > E > H > G / C$

Again, We have,

- The number of persons earning more than E is **two more than** the number of persons earning more than D, who is the only brother-in-law of A.
- F is the paternal grandmother of the only son of D.
- D earns Rs. 10,000 more than B.

By combining these statements, we get the final order.

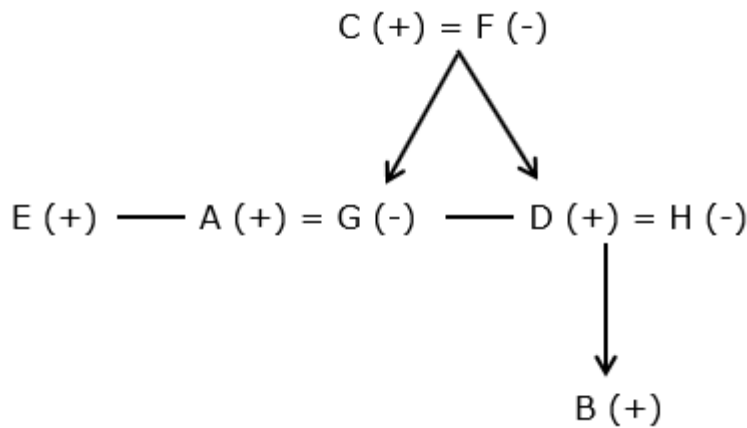

@QuizByMickey

$D > F > E > A > B > H > G > C$

Answer: A

12. Questions

Final arrangement:

$$D > F > E > A > B > H > G > C$$

We have,

- H is the daughter-in-law of C and earns more than both C and G.
- E is the brother-in-law of G and earns less than F but more than H.

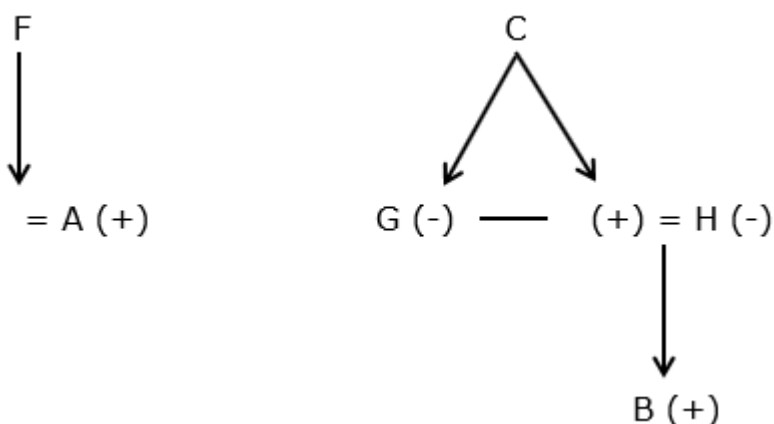

$$E(+) \text{ --- } = G \text{ or } E(+) = \text{ --- } G$$

$$F > E > H > G / C$$

Again, we have,

- G is the daughter of C, who has only two children.
- G doesn't earn the lowest amount of money.
- B is the son of H and earns less than A but more than H.
- As many persons earn more than B as less than A, who is the son-in-law of F.

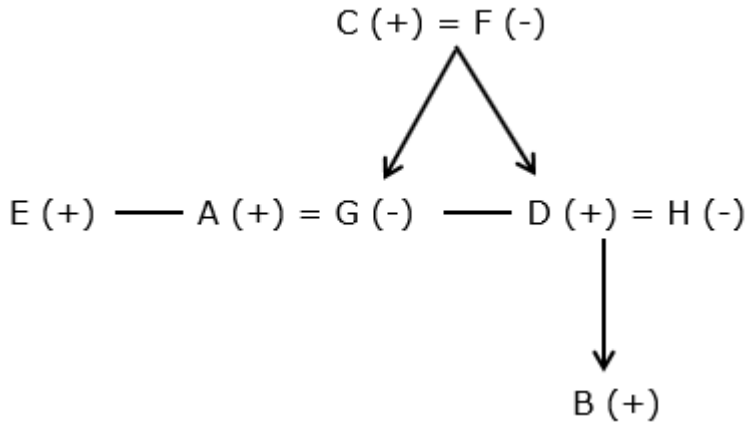

@QuizByMickey

$$A > B > H, F > E > H > G / C$$

Again, We have,

- The number of persons earning more than E is **two more than** the number of persons earning more than D, who is the only brother-in-law of A.
- F is the paternal grandmother of the only son of D.
- D earns Rs. 10,000 more than B.

By combining these statements, we get the final order.

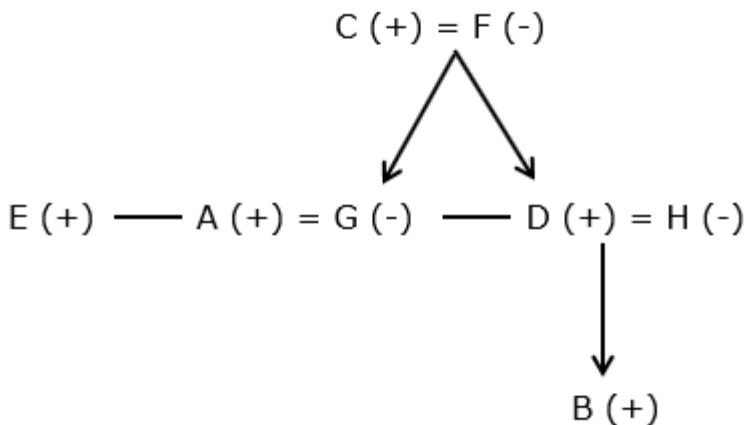

$D > F > E > A > B > H > G > C$

Answer: E

13. Questions

Final arrangement:

$D > F > E > A > B > H > G > C$

We have,

- H is the daughter-in-law of C and earns more than both C and G.
- E is the brother-in-law of G and earns less than F but more than H.

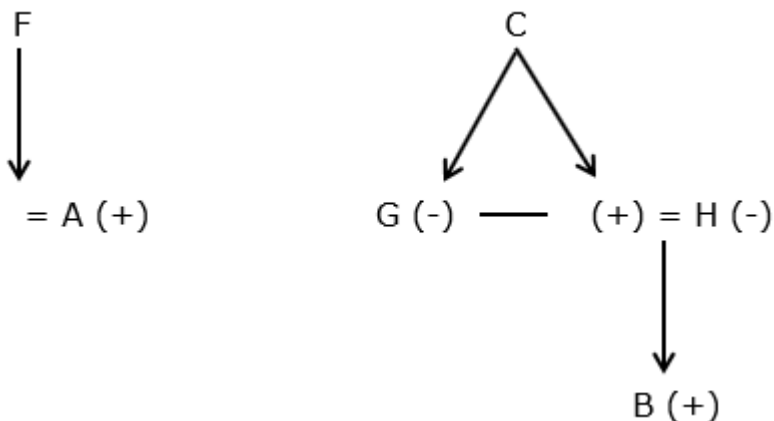

@QuizByMickey

$E(+) \text{ — } = G \text{ or } E(+) = \text{ — } G$

$F > E > H > G / C$

Again, we have,

- G is the daughter of C, who has only two children.
- G doesn't earn the lowest amount of money.
- B is the son of H and earns less than A but more than H.
- As many persons earn more than B as less than A, who is the son-in-law of F.

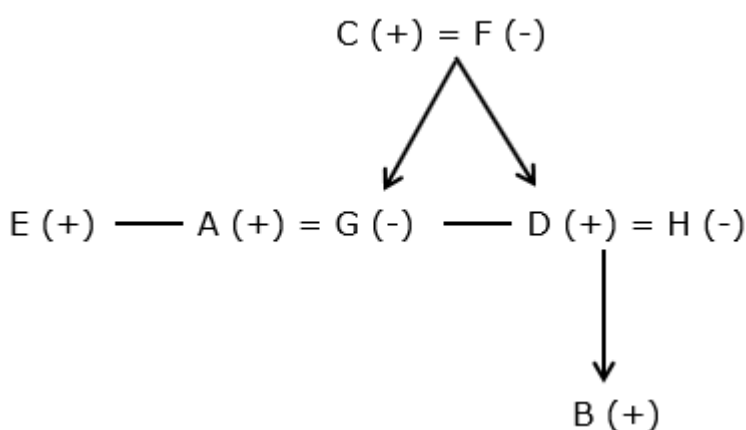

$A > B > H, F > E > H > G / C$

Again, We have,

- The number of persons earning more than E is **two more than** the number of persons earning more than D, who is the only brother-in-law of A.
- F is the paternal grandmother of the only son of D.
- D earns Rs. 10,000 more than B.

By combining these statements, we get the final order.

@QuizByMickey

$D > F > E > A > B > H > G > C$

Answer: B

The sum of the salary of B and the brother of G is Rs. 80000.

The brother of G is D.

$$B+D=80000$$

We have, $D-B=10000$

$$2D=90000$$

$$D=45000$$

$$B=35000$$

The difference between the salary of G and the grandson of C is Rs. 2000.

The grandson of C is B.

$$B-G=2000$$

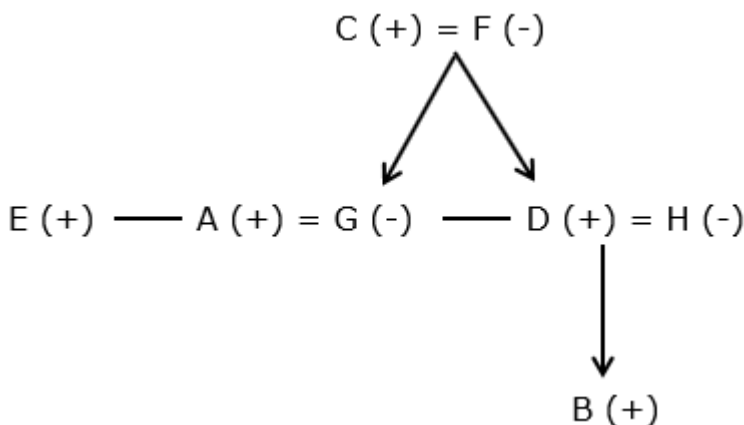

$$35000-G=2000$$

$$G=33000$$

The possible salary of the one who is the sister-in-law of G ($35000 > H > 33000$) is **Rs. 33500**.

14. Questions

Final arrangement:

$$D > F > E > A > B > H > G > C$$

We have,

- H is the daughter-in-law of C and earns more than both C and G.
- E is the brother-in-law of G and earns less than F but more than H.

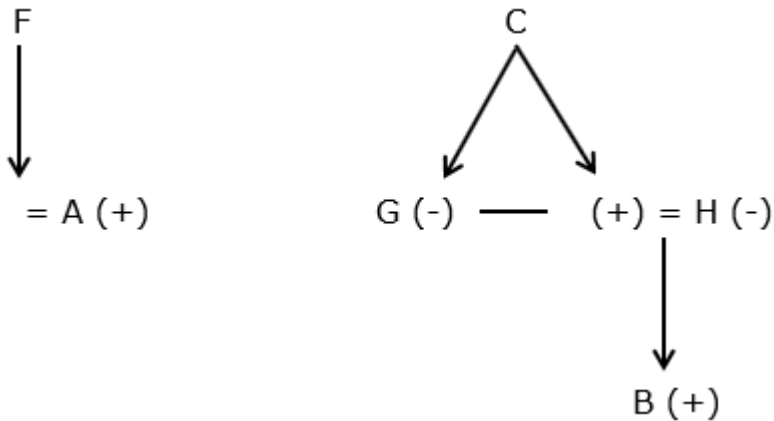

$$E(+)- = G \text{ or } E(+)= -G$$

$$F > E > H > G / C$$

Again, we have,

- G is the daughter of C, who has only two children.
- G doesn't earn the lowest amount of money.
- B is the son of H and earns less than A but more than H.
- As many persons earn more than B as less than A, who is the son-in-law of F.

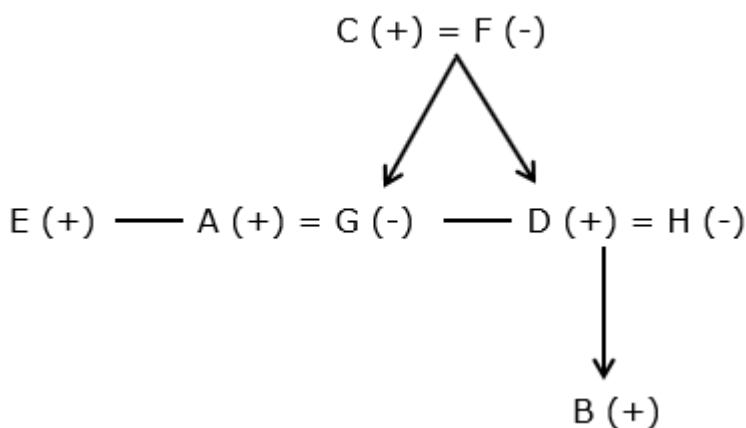

$A > B > H$, $F > E > H > G / C$

Again, We have,

- The number of persons earning more than E is **two more than** the number of persons earning more than D, who is the only brother-in-law of A.
- F is the paternal grandmother of the only son of D.
- D earns Rs. 10,000 more than B.

By combining these statements, we get the final order.

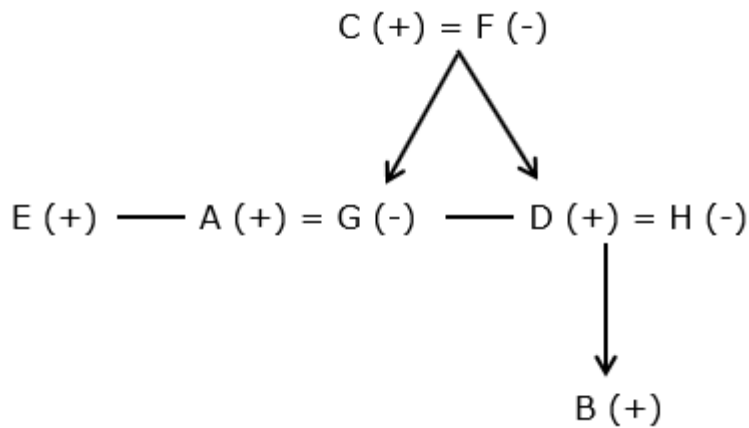

$D > F > E > A > B > H > G > C$

Answer: D

15. Questions

Final arrangement:

@QuizByMickey

$D > F > E > A > B > H > G > C$

We have,

- H is the daughter-in-law of C and earns more than both C and G.
- E is the brother-in-law of G and earns less than F but more than H.

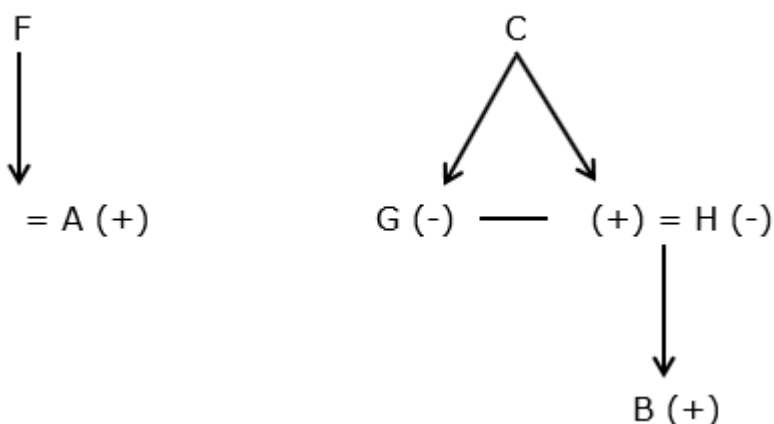

$E(+) \text{ --- } = G \text{ or } E(+) = \text{ --- } G$

$F > E > H > G / C$

Again, we have,

- G is the daughter of C, who has only two children.
- G doesn't earn the lowest amount of money.
- B is the son of H and earns less than A but more than H.
- As many persons earn more than B as less than A, who is the son-in-law of F.

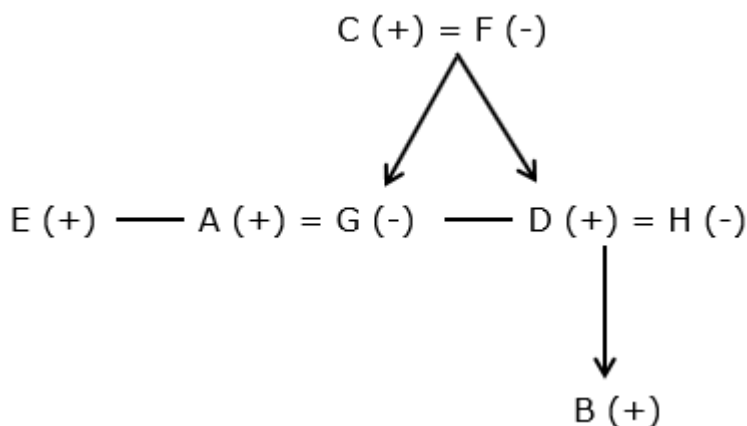

@QuizByMickey

$A > B > H, F > E > H > G / C$

Again, We have,

- The number of persons earning more than E is **two more than** the number of persons earning more than D, who is the only brother-in-law of A.
- F is the paternal grandmother of the only son of D.
- D earns Rs. 10,000 more than B.

By combining these statements, we get the final order.

$D > F > E > A > B > H > G > C$

Answer: C

16. Questions

Answer: C

The research findings being quoted in the first sentence are evident. Now, this works well as an effect because it is given in the form of a result. The reason for this finding has been mentioned in the second sentence. So, it can be taken as the cause. It goes like; ‘because the elephants graze in the areas where the villagers dispose off their waste, their dung that was studied showed they were consuming plastic which is very harmful’

So, the best would be to go with option (c) as it puts the correct pair of cause and effect forward.

17. Questions

Answer: B

Let us check the options first. The options (c) and (d) are pretty much the same. One says only (ii) and the other says neither (i) nor (iii) which indirectly means only (ii) itself. So, we can cancel both these options. Also, if we read the given statement, it doesn't fare well as an inference as nothing about the Sri Lankan authorities is being discussed. If we mark this option, it would be more of an assumption and not an inference.

The other two statements can be inferred as; the statement tells us plastic killed 20 elephants which means it is dangerous. And this is a serious issue for the same reason. That's why (investigation/study/research) report that might have come to light is being mentioned.

So, the correct answer is option (b).

18. Questions

Answer: B

As per the condition, only I is the correct answer as it will help in addressing the problem that has been given. II can be eliminated as it is an extreme solution. Personal library for everyone is a bit unreasonable, so this can be ruled out.

Hence, option (b) is correct.

19. Questions

Answer: B

From the above statement, we can clearly understand that option (b) can be clearly deduced.

The other options are eliminated as they are either not given in the statement or are too general.

So, option (b) is correct.

20. Questions

Answer: C

The company has made these two points clear as it might have thought that the candidates might be having these confusions.

So, both the assumptions stand true as they lead us to the facts given in the advertisement.

Hence, option (c) is the correct answer.
