

1. Questions

Study the following information carefully and answer the given questions.

Eight laptops — Dell, HP, Lenovo, Acer, Asus, Apple, Samsung, and MSI — are kept in eight different boxes placed one above the other in a single stack, but not necessarily in the same order. The lowermost box is numbered 1, and the box immediately above it is numbered 2, and so on.

Arrangement 1

Apple is placed in an even-numbered box and two boxes below Asus.

The number of boxes placed above Samsung is **one less than** the number of boxes placed below Lenovo, which is not placed below Apple. Asus is placed immediately below MSI. Only three boxes are placed between Acer and HP, which is kept two boxes above Dell.

Arrangement 2

All laptops were delivered on the 8th or 17th of February, March, April, and May of the same year, but not necessarily in the same order. Laptops placed in odd-numbered boxes are delivered on an even date in the four months, starting from February in ascending order of box numbers. Laptops placed in even-numbered boxes are delivered on an odd date in the four months, starting from May in descending order of box numbers.

Arrangement 3

All eight laptops are displayed on a counter in a single row, with all of them facing north. The laptops delivered in the months having 31 days are placed in the first four positions from the left end in the same order, such that the earliest delivered laptop is at the extreme left end. Laptops delivered in the months having less than 31 days are placed in the first four positions from the right end in the same order, such that the earliest delivered laptop is at the extreme right end.

Which laptop is placed in the topmost box?

- a. Acer
- b. Asus
- c. Lenovo
- d. Apple
- e. Cannot be determined

@QuizByMickey

2. Questions

How many laptops are kept between HP and MSI in the stack?

- a. None
- b. One
- c. Two
- d. Three

- e. More than three

3. Questions

If Apple was delivered on 17th May, then which of the following statement(s) must be TRUE with respect to the final arrangement?

- a. Apple is placed in an odd-numbered box
- b. Apple is placed in an even-numbered box
- c. Apple must be on the immediate right of MSI in the linear display
- d. Both b and c
- e. Apple must be on the right HP in the linear display

4. Questions

Which laptop is displayed exactly in the middle of the linear arrangement when counted from the left?

- a. Samsung
- b. Acer
- c. HP
- d. Dell
- e. Cannot be determined

5. Questions

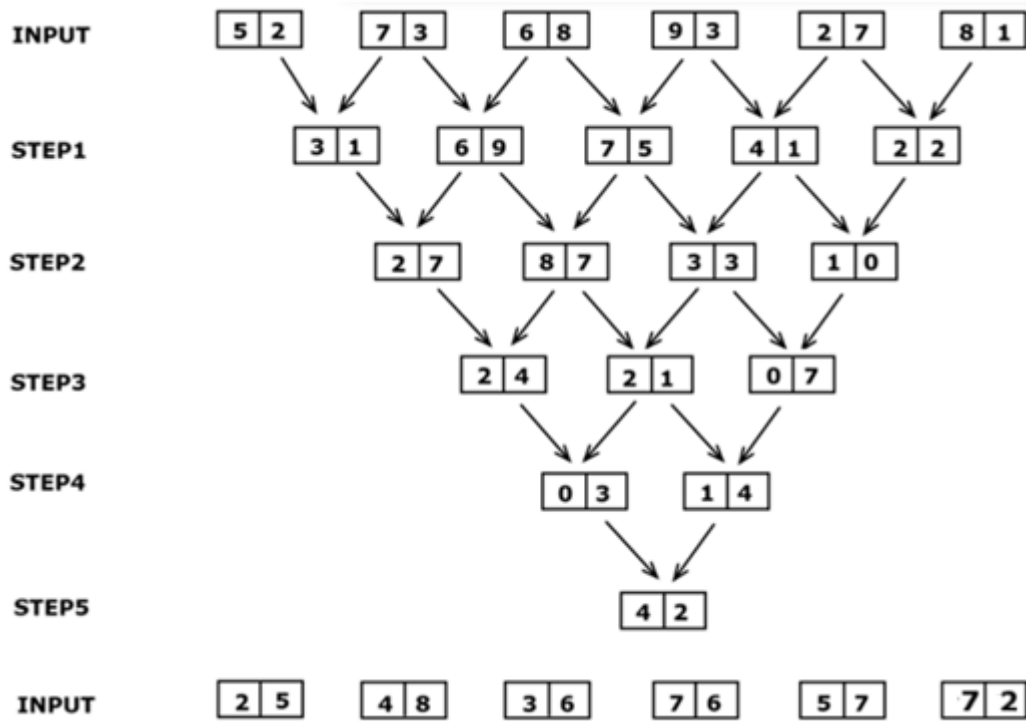

If the positions of the boxes MSI and Samsung are interchanged in the arrangement 2, then which of the following statements is definitely FALSE with respect to the final arrangement?

- a. Asus is delivered in a 30-day month
- b. Lenovo is delivered after HP
- c. Acer is displayed at one of the extreme ends in the linear row
- d. Apple is delivered after Samsung
- e. Dell is delivered after MSI

@QuizByMickey

6. Questions

Study the following information carefully and answer the given questions.

Find the sum of all numbers obtained in step III?

- a. 32
- b. 30
- c. 40
- d. 42
- e. 23

7. Questions

Find the sum of numbers obtained in step IV?

- a. 17
- b. 10
- c. 13
- d. 15
- e. 11

@QuizByMickey

8. Questions

What is the multiplication of the numbers in step II?

- a. 2195200
- b. 2330000
- c. 2295000

d. 2293200

e. 2091100

9. Questions

Which of the following number is obtained in step V?

a. 11

b. 82

c. 28

d. 53

e. 23

10. Questions

Which among the following is the lowest number in step I?

a. 42

b. 50

c. 60

d. 77

e. 49

11. Questions

Study the following information carefully and answer the given questions.

Twelve persons are sitting in the two parallel rows. In row1 A, C, E, G, H and J are sitting and facing south. In row2 M, O, Q, S, T and V are sitting and facing north. In each row one seat is vacant. The persons sit in row 1 are facing the persons sitting in row2 and vice versa.

E faces the one who sits second to the right of M. Only two persons sit between M and T, who faces H. There is no vacant seat between M and T and neither of them sit at any extreme end of the row. H is not an immediate neighbor of A. A sits second to the left of G and to the right of E but not immediate right. Q sits to the immediate right of the one who sits opposite to the vacant seat. As many persons sit to the right of J as to the left of V. Neither A nor G is an immediate neighbor of J. O sits opposite to the one who sits third to the right of the vacant seat. O sits at an extreme end of the row.

In which of the following statements does the first person sit exactly between the second and third person in the final arrangement?

I). ACJ

II). SOQ

III). QMV

- a. Only II
- b. Both I and II
- c. Only III
- d. All I, II, and III
- e. None of these

12. Questions

Four of the five among the following are similar in such a way to form a group, who among the following doesn't belong to the group?

- a. EC
- b. GC
- c. MS
- d. HE
- e. QT

13. Questions

Who among the following person sits second to the left of the Vacant seat in Row 1?

- a. The one who sits immediate right of A
- b. The one who sits immediate right of J
- c. The one who sits opposite to Q
- d. The one who third to the left of G
- e. C

14. Questions

Which of the following statement(s) is/are FALSE with respect to the final arrangement?

I). Only one person sits between A and H

II). S sits third to the right of O

III). O and J are diagonally opposite to each other.

- a. Both I and III
- b. Only III
- c. Both I and II
- d. Only I
- e. None of the statement is false

@QuizByMickey

15. Questions

Who among the following person sits third to the right of S?

- a. M
- b. Q
- c. No one
- d. V
- e. T

16. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements disregarding the commonly known facts.

Statements		Conclusions	
A	Some mobiles are laptops. Only a few laptops are tablets. All tablets are chargers. No charger is a mobile.	P	Some chargers are tablets. Some laptops are not mobiles.
B	Only a few mobiles are powerbanks. No tablets are mobiles. Only powerbanks are charger. Some powerbanks are laptops.	Q	Some laptops are not chargers. Some tablets can be powerbanks.
C	No charger is a tablet. Some powerbanks are mobiles. All tablets are laptops. Only a few laptops are chargers.	R	Some tablets are mobiles. Some laptops can be chargers.

@QuizByMickey

- a. Only AQ follows
- b. Only BR follows
- c. Only CQ and BP follow
- d. Both AP and BQ follow
- e. Only BQ follows

17. Questions

Statements		Conclusions	
A	Some books are pens. All pens are copies. Only a few copies are bags. No bag is a book.	P	Some bottles are bags. Some pens are not markers.
B	Only a few copies are markers. No pen is a bag. Only bags are bottles. Some bottles are books.	Q	Some markers are books. Some copies are not bottles.
C	No markers are copies. Some pens are bags. All bottles are copies. Only a few copies are pens.	R	Some bags being markers is a possibility. Some bottles can be pens.

- a. Only AR follows
- b. Only BQ follows
- c. Only BP and CR follow
- d. Both AP and BQ follow
- e. Only CR follows

18. Questions

Statements		Conclusions	
A	Some trains are buses. Only a few buses are flights. All flights are cabs. No cabs are metros.	P	Some flights are cabs. Some metros are not flights.
B	Only a few cabs are metros. No bus is a cab. Only metros are autos. Some buses are trains.	Q	Some buses are not metros. Some trains can be flights.
C	No metro is a flight. Some flights are trains. All autos are buses. Only a few buses are metros.	R	Some autos are metros. Some cabs are not flights.

- a. Only AP follows

- b. Only BQ follows
- c. Only AR and CQ follow
- d. Both BP and CR follow
- e. Only BQ and CP follow

19. Questions

Statements		Conclusions	
A	Some students are teachers. Only a few teachers are doctors. No doctor is a dancer. Only a few dancers are engineers.	P	Some teachers are not dancers. Some dancers can be students.
B	Only a few doctors are artists. No teacher is an artist. Only artists are dancers. Some artists are students.	Q	Some students are not doctors. Some artists can be teachers.
C	No doctor is a dancer. Some students are artists. All dancers are artists. Only a few teachers are engineers.	R	Some doctors are dancers. Some engineers can be teachers.

- a. Only BQ and CR follow
- b. Only BR follows
- c. Only AP follows
- d. Both BP and CQ follow
- e. Only BQ follows

@QuizByMickey

20. Questions

Statements		Conclusions	
A	Some fruits are vegetables. Only a few vegetables are juices. All juices are snacks. No snack is a fruit.	P	Some sweets are juices. Some vegetables are not snacks.
B	Only a few juices are snacks. No vegetables are snacks. Only snacks are drinks. Some vegetables are fruits.	Q	No drink is juice. Some fruits are not snacks.
C	No juice is a sweet. Some vegetables are snacks. All drinks are juices. Only a few snacks are fruits.	R	Some fruits are snacks. Some sweets can be drinks.

- a. Only AQ follows
- b. Only BQ follows
- c. Only CR follows
- d. Both BP and CQ follow
- e. Only CP and BQ follow

Explanations:

1. Questions

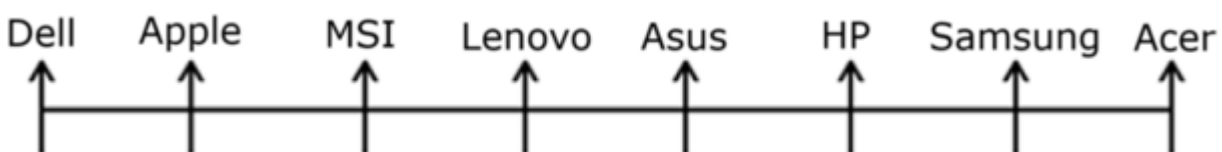

Final arrangement:

@QuizByMickey

Boxes	Laptops
8	Lenovo
7	MSI
6	Asus
5	HP
4	Apple
3	Dell
2	Samsung
1	Acer

Months	Dates	Laptops
February	8	Acer
	17	Samsung
March	8	Dell
	17	Apple
April	8	HP
	17	Asus
May	8	MSI
	17	Lenovo

@QuizByMickey

Arrangement 1:

We have,

- Apple is placed in an even-numbered box and two boxes below Asus.

From the above conditions, there are three possibilities

Boxes	Case-1	Case-2	Case-3
	Laptops	Laptops	Laptops
8			Asus
7			
6		Asus	Apple
5			
4	Asus	Apple	
3			
2	Apple		
1			

Again we have,

- Asus is placed in a box immediately below MSI.
- Only three boxes are placed between Acer and HP, which is kept two boxes above Dell.

From the above conditions, case-3 gets eliminated because Asus is placed in a box immediately below MSI, which is not satisfied.

@QuizByMickey

Boxes	Case-1	Case-2	Case-3
	Laptops	Laptops	Laptops
8			Asus
7	Acer	MSI	
6		Asus	Apple
5	MSI	HP	
4	Asus	Apple	
3	HP	Dell	
2	Apple		
1	Dell	Acer	

Again we have,

- The number of boxes placed above Samsung is **one less than** the number of boxes placed below Lenovo, which is not placed below Apple.

From the above conditions, case-1 gets eliminated because the number of boxes placed above Samsung is **one less than** the number of boxes placed below Lenovo, which is not placed below Apple, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@QuizByMickey

Boxes	Case-1	Case-2
	Laptops	Laptops
8		Lenovo
7	Acer	MSI
6		Asus
5	MSI	HP
4	Asus	Apple
3	HP	Dell
2	Apple	Samsung
1	Dell	Acer

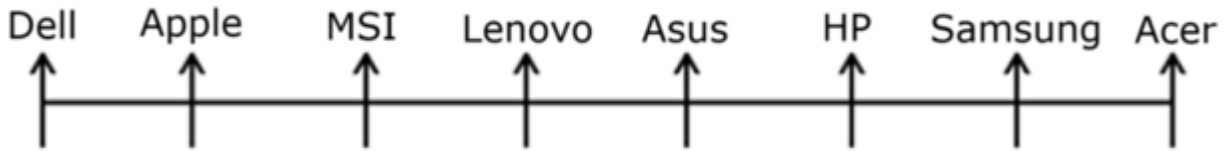

Arrangement 2:

Laptops placed in odd-numbered boxes are delivered on an even date in the four months, starting from February in ascending order of box numbers. Laptops placed in even-numbered boxes are delivered on an odd date in the four months, starting from May in descending order of box numbers.

Months	Dates	Laptops
February	8	Acer
	17	Samsung
March	8	Dell
	17	Apple
April	8	HP
	17	Asus
May	8	MSI
	17	Lenovo

@QuizByMickey

Arrangement 3:

Answer: C

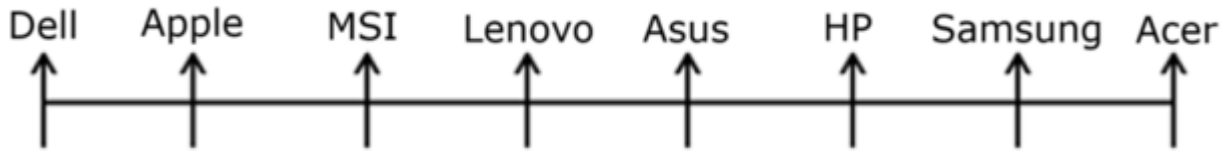

2. Questions

Final arrangement:

Boxes	Laptops
8	Lenovo
7	MSI
6	Asus
5	HP
4	Apple
3	Dell
2	Samsung
1	Acer

Months	Dates	Laptops
February	8	Acer
	17	Samsung
March	8	Dell
	17	Apple
April	8	HP
	17	Asus
May	8	MSI
	17	Lenovo

@QuizByMickey

Arrangement 1:

We have,

- Apple is placed in an even-numbered box and two boxes below Asus.

From the above conditions, there are three possibilities

Boxes	Case-1	Case-2	Case-3
	Laptops	Laptops	Laptops
8			Asus
7			
6		Asus	Apple
5			
4	Asus	Apple	
3			
2	Apple		
1			

Again we have,

- Asus is placed in a box immediately below MSI.
- Only three boxes are placed between Acer and HP, which is kept two boxes above Dell.

From the above conditions, case-3 gets eliminated because Asus is placed in a box immediately below MSI, which is not satisfied.

Boxes	Case-1	Case-2	Case-3
	Laptops	Laptops	Laptops
8			Asus
7	Acer	MSI	
6		Asus	Apple
5	MSI	HP	
4	Asus	Apple	
3	HP	Dell	
2	Apple		
1	Dell	Acer	

Again we have,

- The number of boxes placed above Samsung is **one less than** the number of boxes placed below Lenovo, which is not placed below Apple.

From the above conditions, case-1 gets eliminated because the number of boxes placed above Samsung is **one less than** the number of boxes placed below Lenovo, which is not placed below Apple, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@QuizByMickey

Boxes	Case-1	Case-2
	Laptops	Laptops
8		Lenovo
7	Acer	MSI
6		Asus
5	MSI	HP
4	Asus	Apple
3	HP	Dell
2	Apple	Samsung
1	Dell	Acer

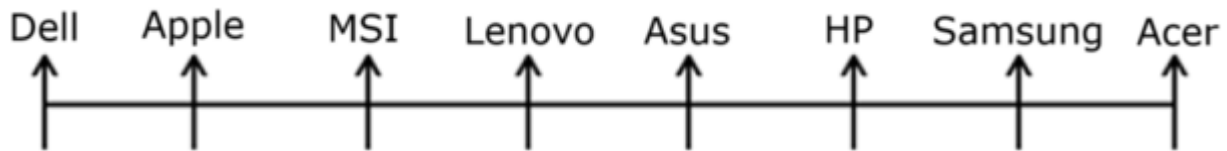

Arrangement 2:

Laptops placed in odd-numbered boxes are delivered on an even date in the four months, starting from February in ascending order of box numbers. Laptops placed in even-numbered boxes are delivered on an odd date in the four months, starting from May in descending order of box numbers.

Months	Dates	Laptops

Final arrangement:

@QuizByMickey

Step I: The sum of the product of the both digits in each number.

Step II: The sum of the product of the first digits in each number and the second digits in each number.

Step III: The sum of the digits in each number.

Step IV: The difference between the two numbers.

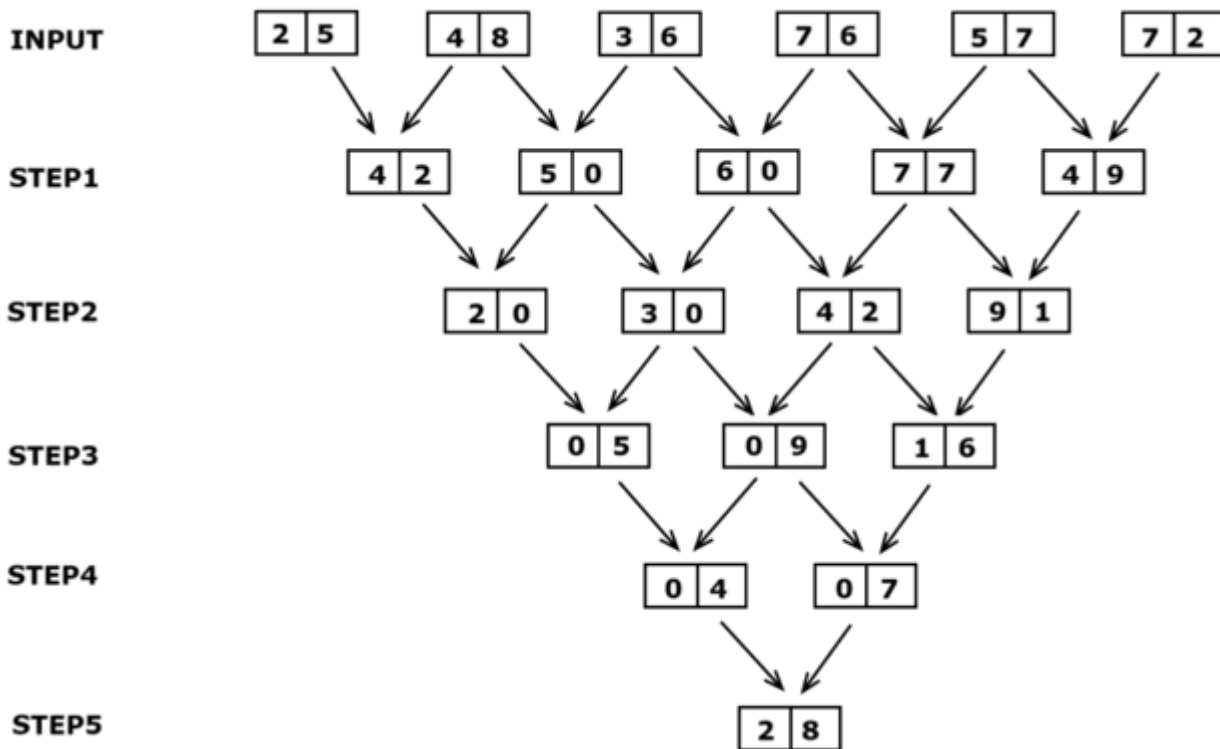

Step V: The product of both the numbers.

Answer: A

11. Questions

Final arrangement:

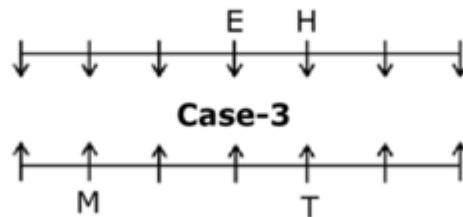

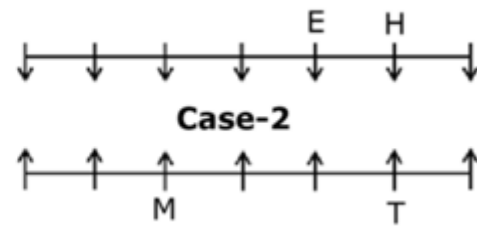

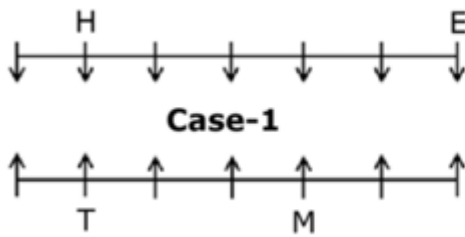

@QuizByMickey

We have,

- E faces the one who sits second to the right of M.
- Only two persons sit between M and T, who faces H.
- There is no vacant seat between M and T and neither of them sit at any extreme end of the row.

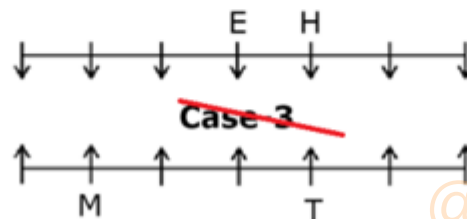

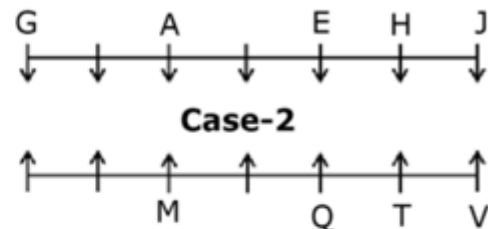

From the above conditions, there are three possibilities

Again we have,

- H is not an immediate neighbor of A.
- A sits second to the left of G and to the right of E but not immediate right.
- Q sits to the immediate right of the one who sits opposite to the vacant seat.
- As many persons sit to the right of J as to the left of V.
- Neither A nor G is an immediate neighbor of J.

From the above conditions, case-3 gets eliminated because A sits second to the left of G and to the right of E but not immediate right, which is not satisfied.

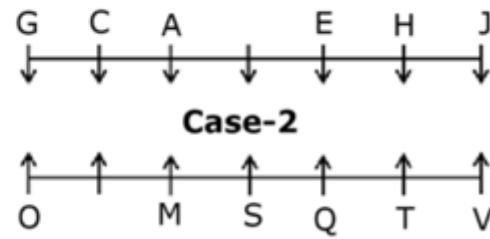

@QuizByMickey

Again we have,

- O sits opposite to the one who sits third to the right of the vacant seat.
- O sits at an extreme end of the row.

From the above conditions, case-1 gets eliminated because O sits at an extreme end of the row, which is not satisfied.

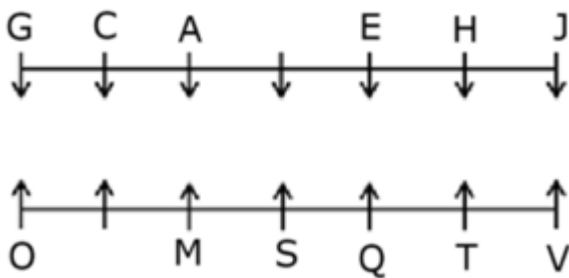

Hence, Case-2 shows the final arrangement.

Answer: C

12. Questions

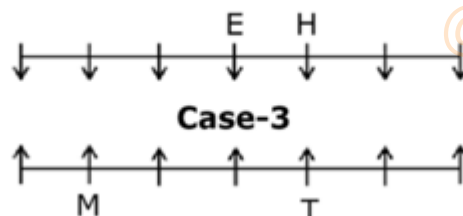

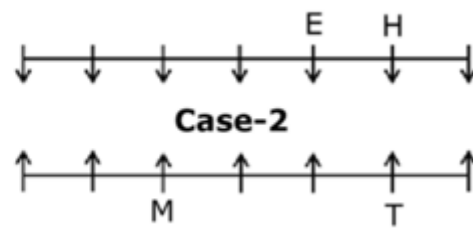

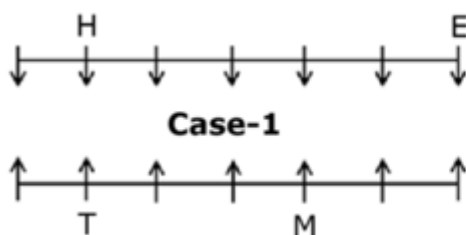

Final arrangement:

We have,

- E faces the one who sits second to the right of M.
- Only two persons sit between M and T, who faces H.
- There is no vacant seat between M and T and neither of them sit at any extreme end of the row.

From the above conditions, there are three possibilities

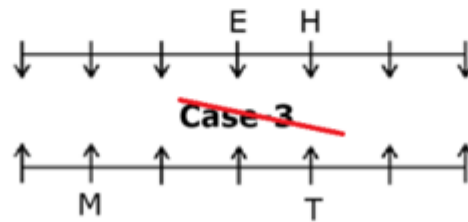

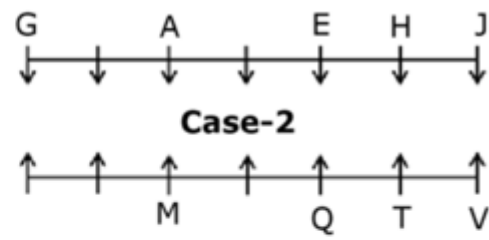

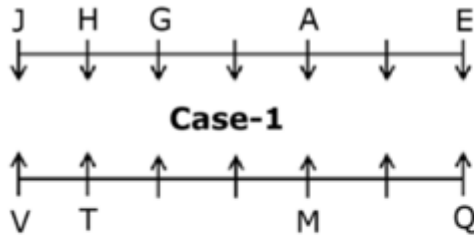

Again we have,

- H is not an immediate neighbor of A.
- A sits second to the left of G and to the right of E but not immediate right.
- Q sits to the immediate right of the one who sits opposite to the vacant seat.
- As many persons sit to the right of J as to the left of V.

- Neither A nor G is an immediate neighbor of J.

From the above conditions, case-3 gets eliminated because A sits second to the left of G and to the right of E but not immediate right, which is not satisfied.

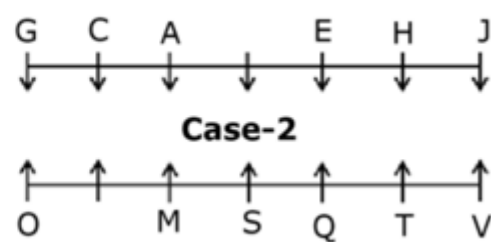

Again we have,

- O sits opposite to the one who sits third to the right of the vacant seat.
- O sits at an extreme end of the row.

From the above conditions, case-1 gets eliminated because O sits at an extreme end of the row, which is not satisfied.

Hence, Case-2 shows the final arrangement.

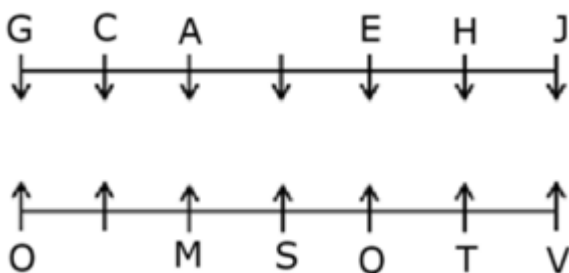

Answer: A (In all the other options, the persons are immediate neighbours of each other except option a)

13. Questions

@QuizByMickey

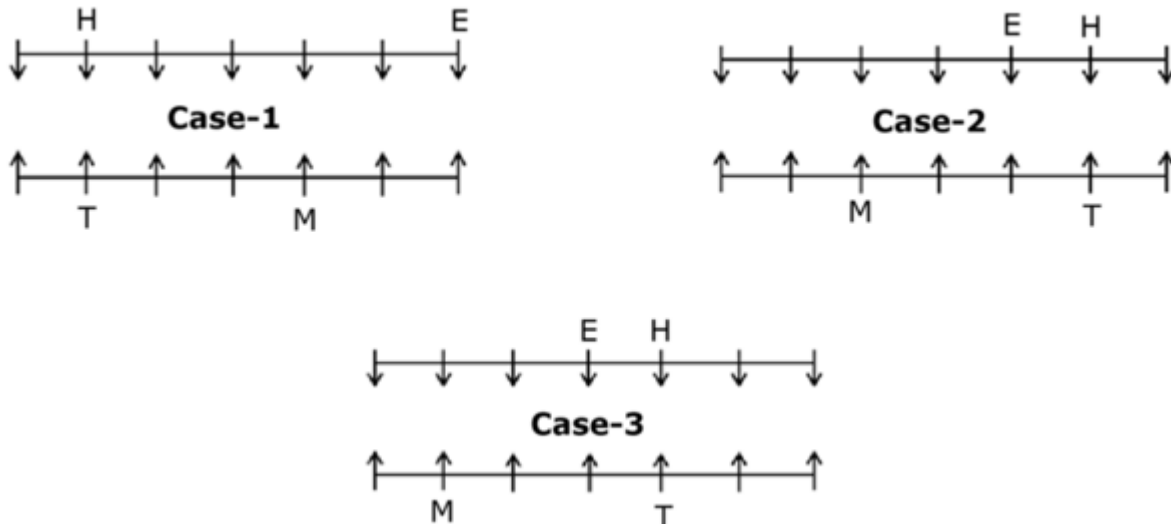

Final arrangement:

We have,

- E faces the one who sits second to the right of M.
- Only two persons sit between M and T, who faces H.
- There is no vacant seat between M and T and neither of them sit at any extreme end of the row.

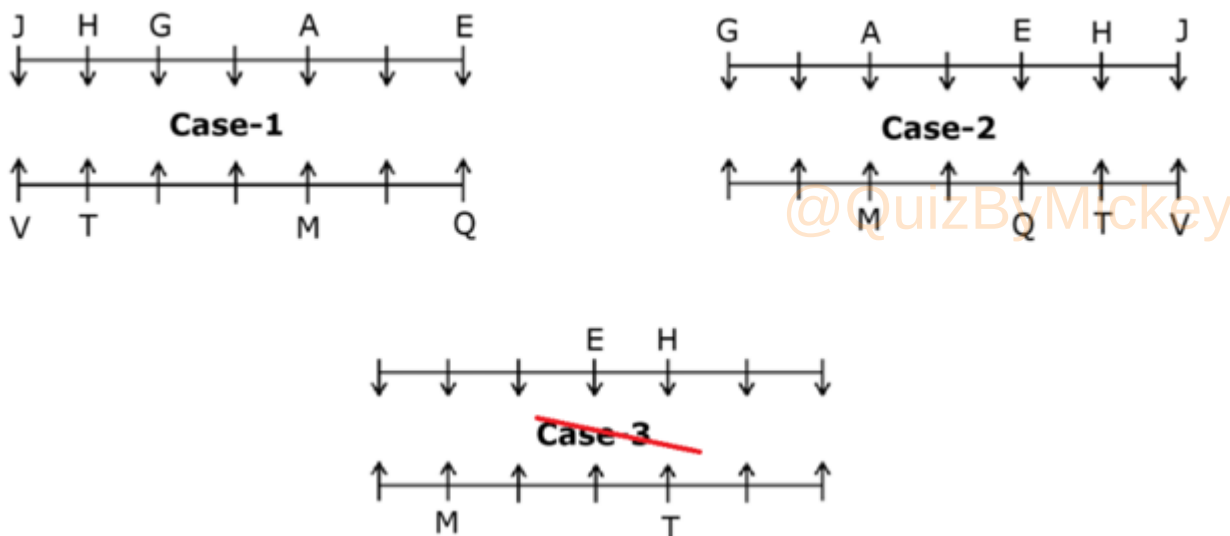

From the above conditions, there are three possibilities

Again we have,

- H is not an immediate neighbor of A.
- A sits second to the left of G and to the right of E but not immediate right.
- Q sits to the immediate right of the one who sits opposite to the vacant seat.
- As many persons sit to the right of J as to the left of V.
- Neither A nor G is an immediate neighbor of J.

From the above conditions, case-3 gets eliminated because A sits second to the left of G and to the right of E but not immediate right, which is not satisfied.

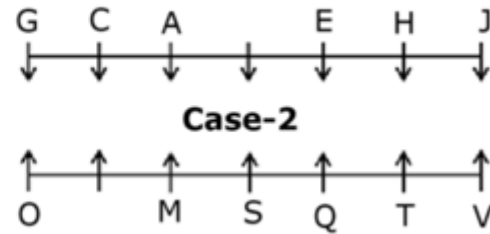

Again we have,

- O sits opposite to the one who sits third to the right of the vacant seat.

- O sits at an extreme end of the row.

From the above conditions, case-1 gets eliminated because O sits at an extreme end of the row, which is not satisfied.

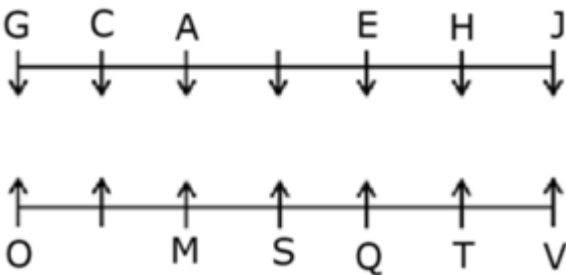

Hence, Case-2 shows the final arrangement.

Answer: B

14. Questions

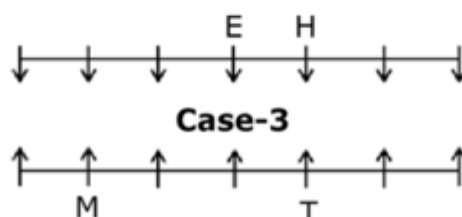

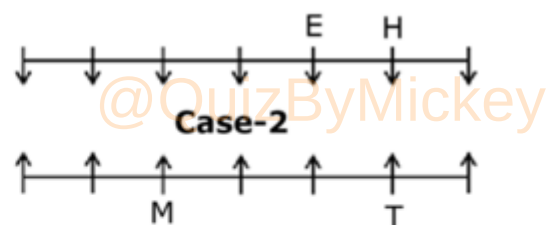

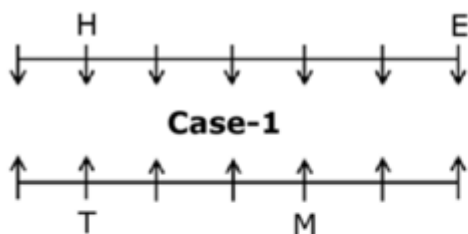

Final arrangement:

We have,

- E faces the one who sits second to the right of M.
- Only two persons sit between M and T, who faces H.
- There is no vacant seat between M and T and neither of them sit at any extreme end of the row.

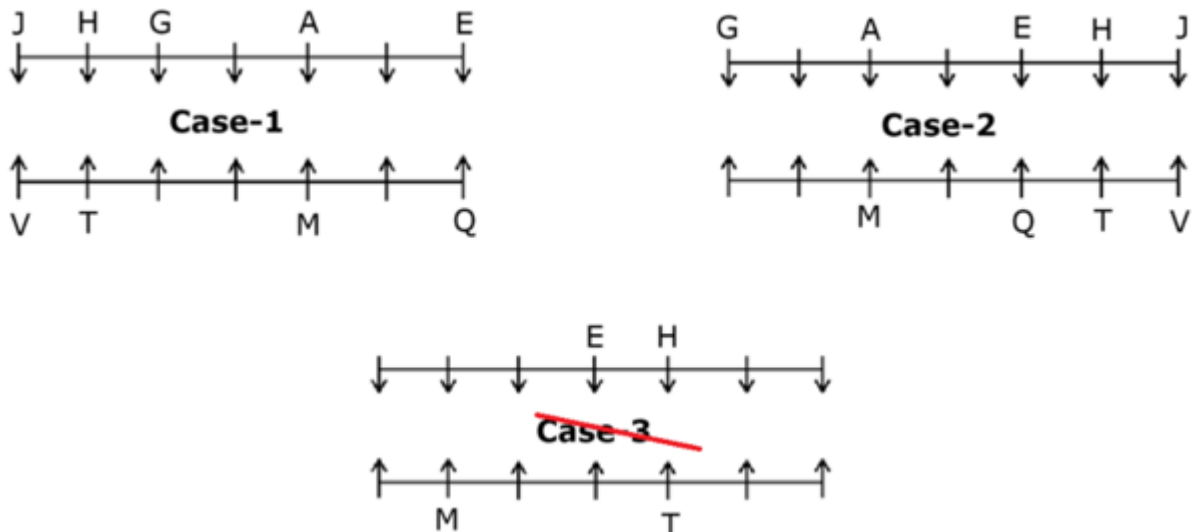

From the above conditions, there are three possibilities

Again we have,

- H is not an immediate neighbor of A.
- A sits second to the left of G and to the right of E but not immediate right.
- Q sits to the immediate right of the one who sits opposite to the vacant seat.
- As many persons sit to the right of J as to the left of V.
- Neither A nor G is an immediate neighbor of J.

From the above conditions, case-3 gets eliminated because A sits second to the left of G and to the right of E but not immediate right, which is not satisfied.

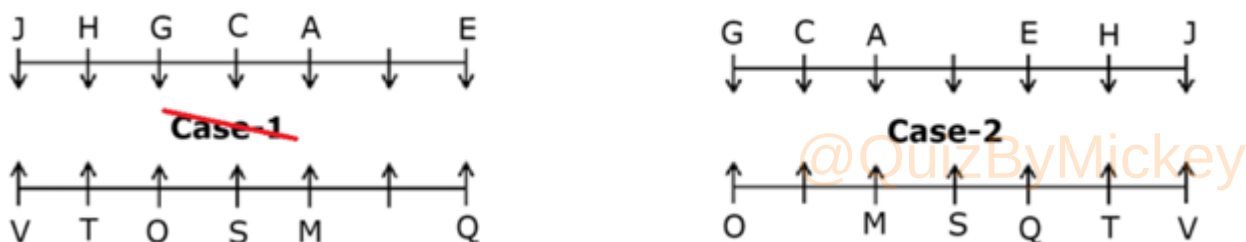

Again we have,

- O sits opposite to the one who sits third to the right of the vacant seat.
- O sits at an extreme end of the row.

From the above conditions, case-1 gets eliminated because O sits at an extreme end of the row, which is not satisfied.

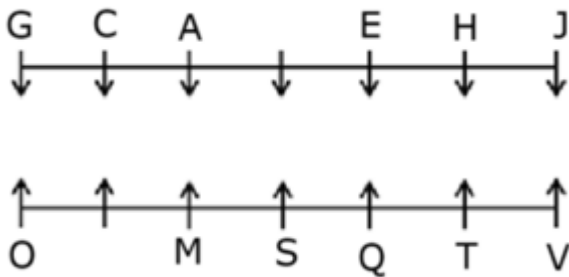

Hence, Case-2 shows the final arrangement.

Answer: E

15. Questions

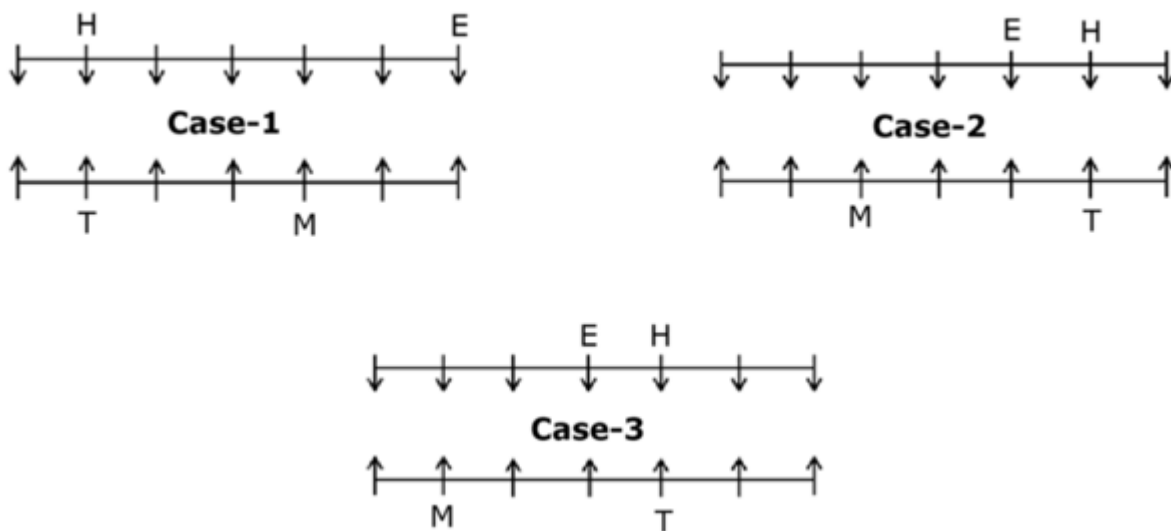

Final arrangement:

We have,

- E faces the one who sits second to the right of M.
- Only two persons sit between M and T, who faces H.
- There is no vacant seat between M and T and neither of them sit at any extreme end of the row.

From the above conditions, there are three possibilities

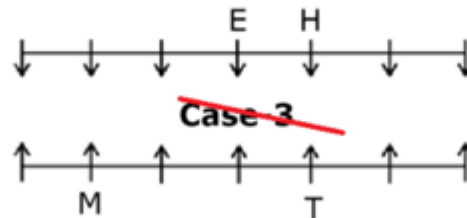

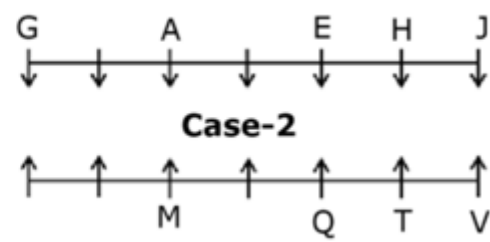

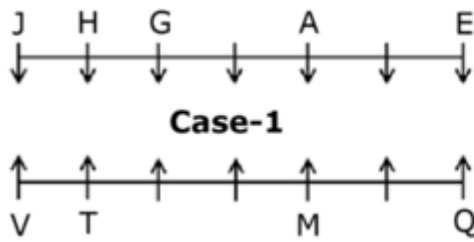

Again we have,

- H is not an immediate neighbor of A.
- A sits second to the left of G and to the right of E but not immediate right.
- Q sits to the immediate right of the one who sits opposite to the vacant seat.
- As many persons sit to the right of J as to the left of V.
- Neither A nor G is an immediate neighbor of J.

From the above conditions, case-3 gets eliminated because A sits second to the left of G and to the right of E but not immediate right, which is not satisfied.

@QuizByMickey

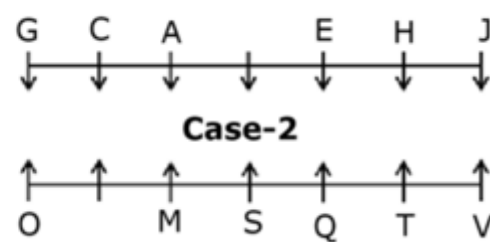

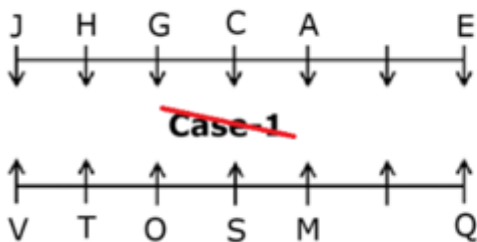

Again we have,

- O sits opposite to the one who sits third to the right of the vacant seat.
- O sits at an extreme end of the row.

From the above conditions, case-1 gets eliminated because O sits at an extreme end of the row, which is not satisfied.

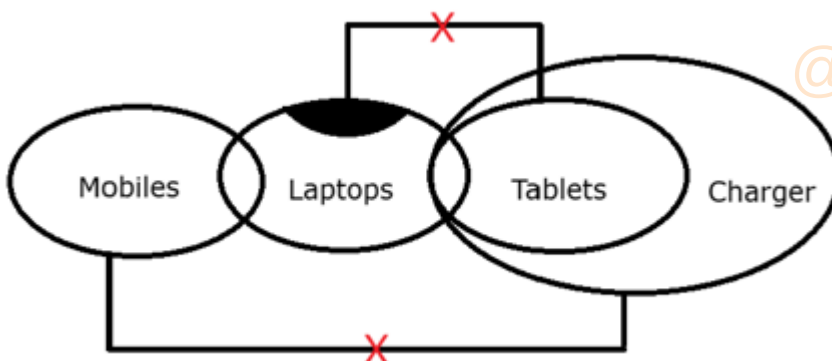

Hence, Case-2 shows the final arrangement.

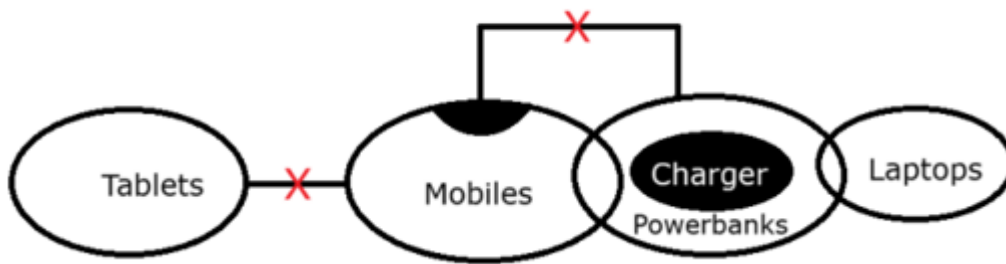

Answer: D

16. Questions

Answer: D
