

1. Questions

Read the following information carefully and answer the questions given below.

The family consists of eight members - P, Q, R, S, T, U, V and W, who belong to three generations and they are living abroad. They are visiting India in different months viz., January, March, April, June, August, September, November and December. All the given information is not necessarily in the same order.

T visited two months before R's spouse, neither of them visited in the month having an odd number of days. Only two persons visited between T and U's only daughter. V is the sister-in-law of U, vice versa. Q, who has only one sibling, is the son of R. P, who is the maternal grandfather of S, is the spouse of R. Neither V nor T have siblings. T is the son-in-law of R and the spouse of U. Only one person visited between V's spouse and S. As many persons visited before Q's son as after Q's spouse. R's daughter visited two persons before the one who is P's daughter-in-law. As many persons visited between U's spouse and P's spouse as between S's cousin and S. R's grandson visited after V's spouse.

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- I). T is the father of S
 - II). Two persons visited between S and U's spouse
 - III). W visited immediately before T
- a. Only I and III
 - b. Only III
 - c. Only I and II
 - d. Only II
 - e. All the given statements are true

2. Questions

Four of the following five are alike in a certain way and hence form a group. Which one of the following does not belong to the group?

- a. Q
- b. V's son
- c. U
- d. The one who visited immediately before R
- e. R

@QuizByMickey

3. Questions

How is W related to U with respect to the final arrangement?

- a. Aunt

- b. Nephew
- c. Niece
- d. Uncle
- e. None of these

4. Questions

Who among the following person visited in August based on the final arrangement?

- a. The one who is Grandson of R
- b. The one who is the father of U
- c. The one who is the maternal grandmother of S
- d. The one who is the sister of Q
- e. None of the above

5. Questions

In which of the following month does P's daughter-in-law visit India based on the final arrangement?

- a. January
- b. August
- c. June
- d. November
- e. December

6. Questions

Study the following information carefully and answer the given questions.

Ten boxes, viz., M, N, O, P, Q, R, S, T, U and V are kept one above the other on twelve different shelves, where the lowermost shelf is numbered as one and the topmost shelf is numbered as twelve. Two of the shelves are vacant.

@QuizByMickey

Box V is kept at the fourth shelf. Either three or four shelves are between box R and box V. Only one vacant shelf is above box R. Box U is kept immediately below box O and above box R, but not immediately. As many boxes are kept above box U as below box S, which is kept on an even-numbered shelf. Box M is kept two boxes above box P and kept adjacent to box R. As many shelves above box P as below box T. Only two boxes are kept between box Q and box N. Box N is kept neither adjacent to box T nor on the lowermost shelf.

How many boxes are kept between box Q and box M based on the final arrangement?

- a. As many boxes are kept between box P and box V

- b. As many boxes are kept between box R and box S
- c. As many boxes are kept between box M and box P
- d. As many boxes are kept between box O and box T
- e. As many boxes are kept between box S and box V

7. Questions

Which of the following box is kept immediately above box P?

- a. The box which is kept two boxes above box T
- b. The box which is kept immediately above box S
- c. The box which is kept two boxes above box Q
- d. The box which is kept immediately below box M
- e. The box which is kept three boxes below box O

8. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. Only three boxes are kept above box M
- b. Not more than two boxes are kept between box P and box O
- c. Box T is kept immediately above box V
- d. Box M is kept two boxes below box O
- e. All the above statements are true

9. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. S
- b. V
- c. P
- d. M
- e. U

@QuizByMickey

10. Questions

What is the position of box V with respect to box N based on the final arrangement?

- a. Immediately above
- b. Two boxes below

- c. Immediately below
- d. Two boxes above
- e. Four boxes below

11. Questions

Statement:

Youth rescued from five years of bonded labour. A Bonded labour is an oppressive form of forced labour, also known as debt bondage, bonded labor is a specific form of forced labour in which compulsion into servitude is derived from debt.

Course of action:

I). Financial institutions in the villages must run campaigns and nukkad natak to be aware of debt bondage and financial inclusion.

II). People should make themselves literate and educated by availing of various facilities that have been provided by the government.

- a. If only I follows
- b. If only II follows
- c. If either I or II follows
- d. If neither I nor II follows
- e. If both I and II follow

12. Questions

Statement:

A drug that is highly effective in treating many types of infection can, at present, be obtained only from the bark of the ibora, a tree that is quite rare in the wild. It takes the bark of 5,000 trees to make one kilogram of the drug. It follows, therefore, that continued production of the drug must inevitably lead to the ibora's extinction.

Which of the following, if true, most seriously weakens the argument above?

- a. The drug made from ibora bark is dispensed to doctors from a central authority
- b. The drug made from ibora bark is expensive to produce
- c. The leaves of the ibora are used in a number of medical products
- d. The ibora generally grows in largely inaccessible places
- e. The ibora can be propagated from cuttings and grown under cultivation

13. Questions

Statement:

Although computers can enhance people's ability to communicate, computer games are a cause of underdeveloped communication skills in children. After-school hours spent playing computer games are hours not spent talking with people. Therefore, children who spend all their spare time playing these games have less experience in interpersonal communication than other children have.

The argument depends on which of the following assumptions?

- a. Passive activities such as watching television and listening to music do not hinder the development of communication skills in children
- b. Most children have other opportunities, in addition to after-school hours, in which they can choose whether to play computer games or to interact with other people
- c. Formal instruction contributes little or nothing to children's acquisition of communication skills
- d. Children who do not spend all of their afterschool hours playing computer games spend at least some of that time talking with other people
- e. The mental skills developed through playing computer games do not contribute significantly to children's intellectual development

14. Questions

Statement:

Insurance Company X is considering issuing a new policy to cover services required by elderly people who suffer from diseases that afflict the elderly. Premiums for the policy must be low enough to attract customers. Therefore, Company X is concerned that the income from the policies would not be sufficient to pay for the claims that would be made.

Which of the following strategies would be most likely to minimize Company X's losses on the policies?

- a. Attracting middle-aged customers unlikely to submit claims for benefits for many years
- b. Insuring only those individuals who did not suffer any serious diseases as children
- c. Including a greater number of services in the policy than are included in other policies of lower cost
- d. Insuring only those individuals who were rejected by other companies for similar policies
- e. Insuring only those individuals who are wealthy enough to pay for the medical services

15. Questions

Statement:

Since the launch of a campaign PR team by a political party has so far accumulated a loss amounting to 150 crore during the last 5 years.

Course of action:

- I). The PR team should be directed to reduce wasteful expenses.
- II). An additional fund of rs. 500 crore is required by the PR team for their new campaign songs and

advertisements

- a. If only I follows
- b. If only II follows
- c. If either I or II follows
- d. If neither I nor II follows
- e. If both I and II follow

16. Questions

If 2 is added to the odd positioned digits and 2 is subtracted from the even positioned digits from the left in the given group of numbers, after that add all the digits of the new number, then which of the following group has both numbers are divisible by 6?

- I). 65731, 65782
- II). 35426, 36134
- III). 75396, 19347

- a. Only II
- b. Both I and II
- c. Only I
- d. Both II and III
- e. All I, II and III

17. Questions

If “1” is added to the even digits and “2” is subtracted from the odd digits of the given numbers, and then remove all the repeated digits in each number and add all the remaining digits within the number thus formed, then which of the following numbers yields the highest resultant?

- a. 5283749362
- b. 7932635842
- c. 6384359272
- d. 9548273564
- e. 6849532789

@QuizByMickey

18. Questions

If 1 is added to all the even digits and 2 is subtracted from all the odd digits and then all the digits are arranged in descending order from left to right within the number, then which of the following will be the third digit from the right end of the number which will be the second highest number after rearrangement?

- I). 75492

II). 38965

III). 29348

- a. 9
- b. 7
- c. 6
- d. 5
- e. 3

19. Questions

If the letters of each word are arranged in alphabetical order within the word from left to right and then the exact middle letter of each word is taken. Then which of the following option has the maximum number of vowels?

- a. Float, Paper, Close, Weird
- b. Blink, Moral, Store, Anger
- c. Value, Upper, Drive, Grant
- d. Horse, Joker, Yield, Lived
- e. Noise, Royal, Eight, Truck

20. Questions

All the digits are added within the number in each row then in which of the following row, the resultant formed will be a prime number if we subtract the highest value and lowest value in each row thus formed?

I). 5841, 6395, 7563

II). 7418, 6381, 5862

III). 6842, 4713, 2968

- a. Only I
- b. Both I and II
- c. Only III
- d. All I, II, and III
- e. Both II and III

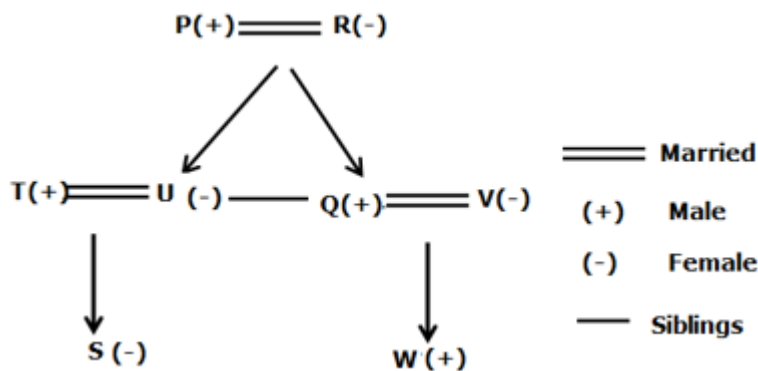

@QuizByMickey

Explanations:

1. Questions

Final Arrangement:

January	Q
March	U
April	S
June	V
August	W
September	T
November	P
December	R

We have,

- T visited two months before R's spouse, neither of them visited in the month having an odd number of days.
- Only two persons visited between T and U's only daughter.

From the above condition, there are two possibilities.

	Case1	Case2
January		
March		
April	T	U's daughter
June	R's Spouse	
August		
September	U's daughter	T
November		R's Spouse
December		

@QuizByMickey

1) $\text{==} R$

2) $\begin{matrix} U \\ \downarrow \\ (-) \end{matrix}$

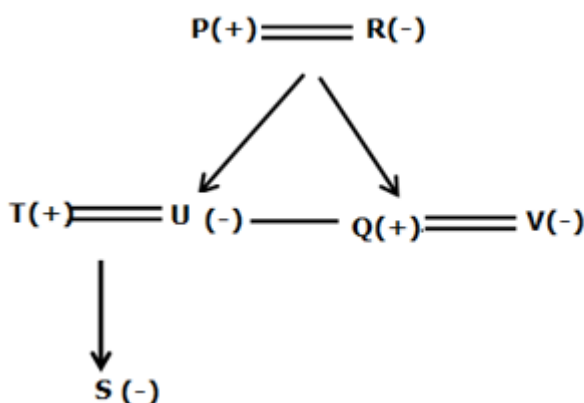

Again, we have,

- V is the sister-in-law of U, vice versa.
- Q, who has only one sibling, is the son of R.
- P, who is the maternal grandfather of S, is the spouse of R.
- Neither V nor T has siblings.
- T is the son-in-law of R and the spouse of U.
- Only one person visited between V's spouse and S.

From the above condition, there is one more possibility.

Case 2 is split into case 2a.

	Case1	Case2	Case2a
January		Q	
March			
April	T	S	S
June	P		
August			Q
September	S	T	T
November		P	P
December	Q		

== Married

(+) Male

(-) Female

— Siblings

Again, we have,

- As many persons visited before Q's son as after Q's spouse.
- R's daughter visited two persons before the one who is P's daughter-in-law.
- As many persons visited between U's spouse and P's spouse as between S's cousin and S.

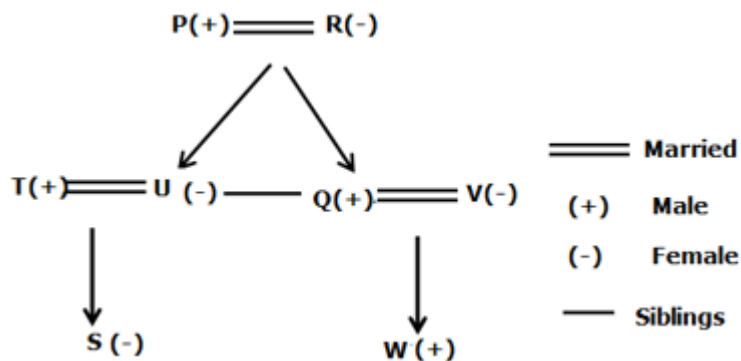

- R's grandson visited after V's spouse.

From the above condition, case-1 gets eliminated because as many persons visited between U's spouse and P's spouse as between S's cousin and S, which is not satisfied.

Case-2a gets eliminated because R's daughter visited two persons before the one who is P's daughter-in-law, which is not satisfied.

Hence, case-2 shows the final arrangement.

	Case1	Case2	Case2a
January	R	Q	V/W
March	W	U	
April	T	S	S
June	P	V	
August	U	W	Q
September	S	T	T
November	V	P	P
December	Q	R	W/V

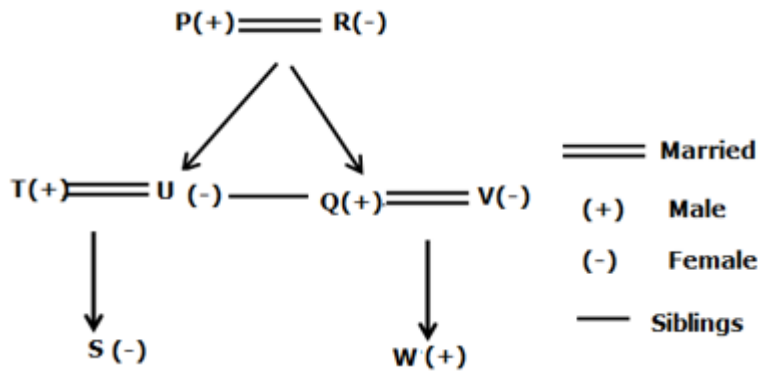

Answer: E

2. Questions

Final Arrangement:

January	Q
March	U
April	S
June	V
August	W
September	T
November	P
December	R

@QuizByMickey

We have,

- T visited two months before R's spouse, neither of them visited in the month having an odd number of days.
- Only two persons visited between T and U's only daughter.

From the above condition, there are two possibilities.

	Case1	Case2
January		
March		
April	T	U's daughter
June	R's Spouse	
August		
September	U's daughter	T
November		R's Spouse
December		

1) 

2) 

@QuizByMickey

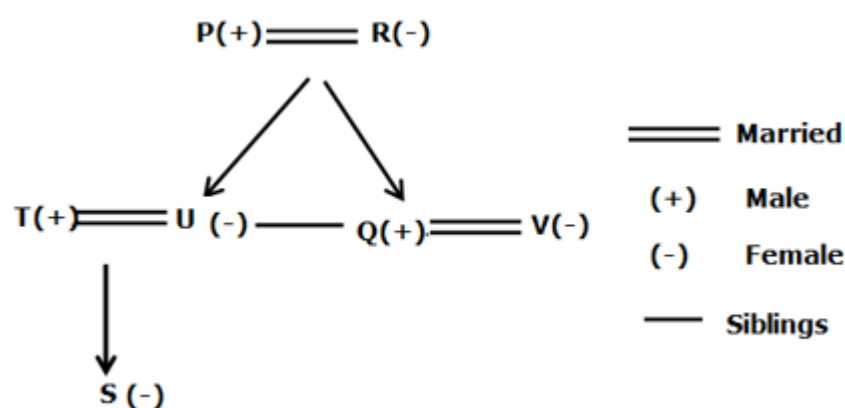

Again, we have,

- V is the sister-in-law of U, vice versa.
- Q, who has only one sibling, is the son of R.
- P, who is the maternal grandfather of S, is the spouse of R.
- Neither V nor T has siblings.
- T is the son-in-law of R and the spouse of U.
- Only one person visited between V's spouse and S.

From the above condition, there is one more possibility.

Case 2 is split into case 2a.

	Case1	Case2	Case2a
January		Q	
March			
April	T	S	S
June	P		
August			Q
September	S	T	T
November		P	P
December	Q		

Again, we have,

- As many persons visited before Q's son as after Q's spouse.
- R's daughter visited two persons before the one who is P's daughter-in-law.
- As many persons visited between U's spouse and P's spouse as between S's cousin and S.
- R's grandson visited after V's spouse.

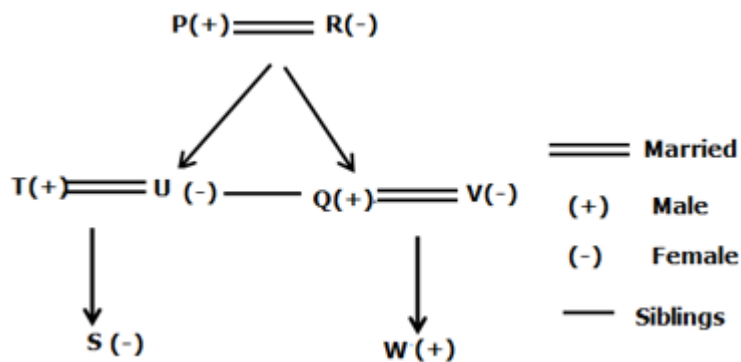

From the above condition, case-1 gets eliminated because as many persons visited between U's spouse and P's spouse as between S's cousin and S, which is not satisfied.

Case-2a gets eliminated because R's daughter visited two persons before the one who is P's daughter-in-law, which is not satisfied.

Hence, case-2 shows the final arrangement.

Again, we have,

- As many boxes are kept above box U as below box S, which is kept on an even-numbered shelf.
- Box M is kept two boxes above box P and kept adjacent to box R.
- As many shelves above box P as below box T.

@QuizByMickey

Again, we have,

- Only two boxes are kept between box Q and box N.
- Box N is kept neither adjacent to box T nor on the lowermost shelf.

From the above conditions, case-1 and case-3 get eliminated because box N is kept neither adjacent to box T nor on the lowermost shelf, which is not satisfied.

Hence, case-2 shows the final arrangement.

@QuizByMickey

Shelves	Case-1	Case-2	Case-3

9. Questions

Final arrangement:

@QuizByMickey

Shelves	Boxes
12	O
11	U
10	Vacant
9	R
8	M
7	T
6	P
5	N
4	V
3	Vacant
2	S
1	Q

We have,

- Box V is kept at the fourth shelf.
- Either three or four shelves are between box R and box V.
- Only one vacant shelf is above box R.
- Box U is kept immediately below box O and above box R, but not immediately.

From the above conditions, there are three possibilities.

@QuizByMickey

Shelves	Case-1	Case-2	Case-3

Answer: C

11. Questions

Answer: E

Clearly, proper education and financial inclusion is the only desired means to counter the bondage of labour, thus both course of action follows.

12. Questions

Answer: E

The production of the drug requires such an enormous amount of bark that, the argument concludes, the continuing existence of the rare tree is in jeopardy. But the argument assumes that killing the trees in the wild is the only way to obtain the needed bark. Can the tree be cultivated? If so, the majority of the trees in the wild could be left to flourish.

a). The method of the drug's distribution is irrelevant, unless the central authority can limit the drug's production from the bark of wild ibora trees. But this information is not provided.

@QuizByMickey

- b). The cost of producing the drug does not affect the outcome for the tree unless it deters production.
- c). The existence of uses for other parts of the tree opens the possibility that the ibora-bark drug would cause no increase in destruction of trees other than what exists already. If this information were provided, it would weaken support for the conclusion. Since it is not provided, this option does not significantly weaken the argument.
- d). Difficulty of access to the trees could provide a disincentive to their harvesting—but we are not told that it would prevent their harvesting.
- e). Correct. This information most weakens the argument.**

13. Questions

Answer: D

The unstated assumption in an argument will be a statement that has to be true in order for the argument's premises to provide a solid reason for believing its conclusion. Here, playing computer games is said to replace talking with people. Thus the argument assumes that children who do not spend all their spare time playing computer games instead spend at least some of that time talking with people.

- a). This need not be assumed. The argument is not committed to any claim about the effects that watching television or listening to music may have on the development of communication skills in children.
- b). The argument is limited to after-school hours or spare time.
- c). This could be false and the argument could still be sound; perhaps children who spend all their spare time playing computer games receive no formal instruction.
- d). Correct.** This statement properly identifies the assumption on which the argument is based.
- e). This could be false and the argument could still be sound as long as the intellectual development the games contribute to does not contribute to the development of communication skills.

14. Questions

Answer: A

The insurance company's proposed plan would include a high-risk group, the elderly, who are likely to submit claims immediately. By expanding the customer base to include those who are less likely to submit claims for many years, the company will increase its income and thus minimize its losses.

- a). Correct.** This statement properly identifies a strategy that minimizes policy losses.
- b). No connection is made between childhood diseases and geriatric diseases, so this point is irrelevant.
- c). Offering more services would tend to increase costs, and thus losses.
- d). Individuals rejected by other companies are more likely to make claims that would increase losses.
- e). People who are wealthy enough to pay for the services themselves would buy insurance only if the policies were reasonably priced and they planned to make claims on the policies; this point is irrelevant.

15. Questions

Answer: A

Clearly, if the PR team is not giving the desired outcome then their wasteful expenses need to be cut, thus course of action I follows. An additional fund is not worthy to provide if the PR team is not performing from the last 5 years, thus course of action II doesn't follow.

16. Questions

Answer: C

If 2 is added to the odd position digits and 2 is subtracted from the even position digits from the left, after that add all the digits of the new number we get.

I). $8+3+9+1+3=24$, $8+3+9+6+4=30$

II). $5+3+6+0+8=22$, $5+4+3+1+6=19$

III). $9+3+5+7+8=32$, $3+7+5+2+9=26$

Only I 65731, 65782: Both numbers are divisible by 6.

17. Questions

Answer: D

5283749362 → 3391557173 → 9

7932635842 → 5713713953 → 9

6384359272 → 7195137353 → 9

9548273564 → 7359351375 → 9, 1 → 9+1=10

6849532789 → 7957313597 → 1

18. Questions

Answer: D

After rearrangement, we get

I). 75492 - 75533

II). 38965 - 97731

III). 29348 - 97531

5 will be the third digit from the right end of the number which will be the second-highest number after rearrangement.

19. Questions

Answer: D

Horse, Joker, Yield, Lived

a). Float, Paper, Close, Weird

aflot, aeppr, celos, deirw → lpli

b). Blink, Moral, Store, Anger

bikln, almor, eorst, aegnr ->kmrg

c). Value, Upper, Drive, Grant

aeluv, eppru, deirv, agnrt ->lpin

d). Horse, Joker, Yield, Lived

ehors, ejkor, deily, deilv ->okii

e). Noise, Royal, Eight, Truck

einos, alory, eghit, ckrtu ->nohr

20. Questions

Answer: B

I). 5841, 6395, 7563- 18, 23, 21-23-18=5

II). 7418, 6381, 5862- 20, 18, 21- 21-18=3

III). 6842, 4713, 2968- 20, 15, 25- 25-15=10
