

1. Questions

Study the following information carefully and answer the questions given below:

A certain number of boxes are kept one above another in the same stack such that the box kept in the lowermost shelf is numbered 1 and immediately above that is numbered 2 and so on. The consecutive alphabetically named boxes are not kept in adjacent shelves. An even number of shelves in the stack, but not more than 23.

Only four boxes are kept between box C and box B, which is not adjacent to box M. Only three boxes are kept between box D and box J, which is kept two boxes above box B. The number of boxes kept between box C and box J is **three more than** the number of boxes kept between box D and box I. Only six boxes are kept between box H and box A. Box G is kept five boxes below the box, which is kept two boxes above box I and is kept three boxes above box H. As many boxes are kept between box K and box G as are kept between box E and box J. Box F is kept exactly between box A and box G. Box K is kept four boxes above box F and is kept eight boxes above box L. K is but not kept below box M. The number of boxes kept between box L and box A is **two less than** the number of boxes kept between box F and box M, which is kept above F.

How many boxes are kept in a stack based on the final arrangement?

- a. 20 Boxes
- b. 22 Boxes
- c. 16 Boxes
- d. 18 Boxes
- e. 14 Boxes

2. Questions

As many boxes are kept between box J and box D as between ____ and ____.

- a. Box E and Box G
- b. Box K and Box C
- c. Box A and Box H
- d. Box F and Box L
- e. Box M and Box J

@QuizByMickey

3. Questions

If box Z is kept exactly between box M and box C and box X is kept two boxes above box L, then what is the position of box X with respect to box Z?

- a. Six boxes below
- b. Seven boxes above
- c. Eight boxes below

- d. Seven boxes below
- e. Eight boxes above

4. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. More than five boxes are kept below box F
- b. Only three boxes are kept between box C and the box which is kept two boxes below box J
- c. Box H is kept seven boxes below box I
- d. Only six boxes are kept between box L and box K
- e. Box M is kept eight boxes below the box which is kept immediately below box D

5. Questions

If the positions of box F and box B are interchanged similarly, the positions of box A and box G are interchanged, then which of the following boxes is kept five boxes below box A?

- a. Box B
- b. Box F
- c. Box G
- d. Box C
- e. Box E

6. Questions

Study the following information carefully and answer the below questions.

There are three rows - Row-1, Row-2 and Row-3 with different lengths. Row-1 is 56m long, Row-2 is 38m long and Row-3 is 63m long. Row-2 is to the north of Row-3 and south of Row-1. Six persons are sitting in each row. The adjacent persons in row-1, row-2 and row-3 are sitting at an equal distance of 6m, 4m and 8m respectively from the left end. All the persons are facing towards the north direction. The position of the persons who sit at the left end in each row is the same and there is no space to the left of them in each row.

@QuizByMickey

Arrangement 1:

In arrangement 1, the persons are arranged only in Row-1 and Row-2. W sits 22m away from the right end. The distance between W and O is 4m. M sits 8m away from U. Q sits to the north of M. U does not sit to the left of M. As many persons sit to the left of Q as to the right of R. The distance between R and Y is 4m more than the distance between X and J. The distance between J and M is not less than 5m. The number of persons sitting to the left of P is **one more than** the number of persons sitting to the right of I. The distance between R and I is less than the distance between M and U. L sits at Row-1.

Arrangement 2:

Now some persons in the first two rows are shifted to row-3. The persons sitting to the right of U in row-2 from arrangement 1 are arranged in alphabetical order from the right end in row-3 and the persons sitting to the left of Y in row-1 from arrangement 1 are arranged in the reverse alphabetical order from the left end in row-3.

Who among the following person sits second to the left the one who sits to the immediate left of O in Arrangement-2?

- a. The one who sits to the immediate right of W
- b. The one who sits to the immediate left of L
- c. Q
- d. I
- e. R

7. Questions

Which of the following combinations of persons sitting in row-3 with respect to the Arrangement 2?

- a. PLQOWJ
- b. OWJYIR
- c. PLQMXU
- d. YIRPLQ
- e. MXUYIR

8. Questions

How many persons sit between M and the one who sits to the immediate right of W in Arrangement-1?

- a. Two
- b. Three
- c. Four
- d. One
- e. No one

@QuizByMickey

9. Questions

What is the distance between P and R in Arrangement-1?

- a. 8m
- b. 24m
- c. 12m

d. 16m

e. 18m

10. Questions

Which of the following statement(s) is/are TRUE with respect to Arrangement-2?

- a. Only one person sits to the left of W
- b. O sits to the immediate right of W
- c. Only one person sits between P and L
- d. No one sits between J and X
- e. All the given statements are true

11. Questions

Study the following information carefully and answer the questions given below.

Statement 1: In a certain code language, “Television channels makes entertainment” is coded as “26 34 16 57”, “Film fare awards announced” is coded as “54 87 25 36”, “Family film entertainment time” is coded as “37 87 91 34”.

Statement 2: In a certain code language, “Musical show starts tomorrow” is coded as “85 28 92 72”, “Show time changes often” is coded as “28 52 80 37”, “Film awards telecasted everywhere” is coded as “95 36 84 87”.

Along with the given two statements, three statements are given you have to decide whether the data provided along with the three statements is sufficient to answer the question. The statements given below can be used along with the above two statements, but cannot be combined together. The statements above are combined.

What is the code for “Channel telecasted new serial” in the given coded language?

I: In a certain code language, “Television makes serial everywhere” is coded as “23 57 84 16”.

II: In a certain code language, “New channels launched yesterday” is coded as “82 26 95 65”.

III: In a certain code language, “New live channels launched” is coded as “25 69 16 72”.

- a. Only I
- b. Either only I or only III
- c. Only III
- d. Either only II or only III
- e. None of these

@QuizByMickey

12. Questions

What is the code for “Online film show released” in the given coded language?

I: In a certain code language, “Recently released movie show” is coded as “62 35 28 31”.

II: In a certain code language, “Entertainment awards released online” is coded as “68 34 59 36”.

III: In a certain code language, “Television show online launch” is coded as “57 28 61 53”.

- a. Only I
- b. Either only I or only III
- c. Only II
- d. Either only II or only III
- e. None of these

13. Questions

What is the code for “Food fare changes regularly” in the given coded language?

I: In a certain code language, “Food festival organized tomorrow” is coded as “33 54 74 56”.

II: In a certain code language, “Time changes announced regularly” is coded as “66 80 37 54”.

III: In a certain code language, “Food changes announced regularly” is coded as “80 77 25 63”.

- a. Only I
- b. Only III
- c. Either only II or only III
- d. Either only I or only III
- e. None of these

14. Questions

What is the code for “Family channel announced today” in the given coded language?

I: In a certain code language, “Television fare makes today” is coded as “57 25 16 68”.

II: In a certain code language, “Film fare makes today” is coded as “26 67 25 87”.

III: In a certain code language, “Movie telecasted today time” is coded as “84 59 37 68”.

- a. Only I
- b. Either only I or only III
- c. Only II
- d. Either only II or only III
- e. Only III

15. Questions

What is the code for “Entertainment fare costs higher” in the given coded language?

I: In a certain code language, “Family show higher time” is coded as “28 91 37 53”.

II: In a certain code language, “Television costs announced higher” is coded as “57 64 25 99”.

III: In a certain code language, “Higher costs announced film” is coded as “93 54 87 75”.

- Only I
- Either only I or only II
- Only III
- Either only II or only III
- None of these

16. Questions

Study the following information carefully and answer the questions given below.

Alphabets	G	P	R	O	U	N	M	K	F	C	E	W	T	I	D	Y	B	S	A	V	L
Codes	6	©	7	Δ	§	∞	◇	Θ	1	3	9	€	®	2	Φ	¥	4	5	£	Ψ	8

Conditions:

I). If the first letter of the first meaningful word is a consonant and the first letter of the last meaningful word is a vowel, then the last letter of both the meaningful words will be coded as the code of the first vowel of the last word.

II). If the last letter of the first meaningful word is a vowel and the first letter of the last meaningful word is a consonant, then the code of both these letters will get interchanged.

III). If two successive letters in the word are the same, then they are coded as ‘@’.

Note: If more than one condition is applied, then apply each condition in the above order, one after another.

11	G

@QuizByMickey

10	K
9	M
8	H
7	
6	F
5	
4	
3	
2	L
1	A

We have,

- Only four boxes are kept between box C and box B, which is not adjacent to box M.
- Only three boxes are kept between box D and box J, which is kept two boxes above box B.

From the above conditions, there are three possibilities.

@QuizByMickey

Case- 1	Case- 2	Case- 3
Boxes	Boxes	Boxes
D	J	C
	B	
		J
J	D	
		B
B		
	C	D
C		

Again, we have,

- The number of boxes kept between box C and box J is **three more than** the number of boxes kept between box D and box I.
- Box G is kept five boxes below the box, which is kept two boxes above box I.
- G is kept three boxes above box H.
- Only six boxes are kept between box H and box A.

From the above conditions, case 3 gets eliminated because the number of boxes kept between box C and box J is **three more than** the number of boxes kept between box D and box I, which is not satisfied.

From the above conditions, case-1 is split into case-1a.

Case- 1	Case- 1a	Case- 2	Case- 3
Boxes	Boxes	Boxes	Boxes
		J	C
A			
I	I	B	
			J
		D	
G	G		B
D	D		
		C	D
H	H	I	

@QuizByMickey

J	J		
		G	
B	B		
		H	
	A		
C	C		
		A	

Again, we have,

- As many boxes are kept between box K and box G as are kept between box E and box J.
- Box F is kept exactly between box A and box G.
- Box K is kept four boxes above box F and is kept eight boxes above box L, but doesn't kept below box M.
- The number of boxes kept between box L and box A is **two less than** the number of boxes kept between box F and box M, which is kept above F.

From the above conditions, case-1a gets eliminated because Box F is kept exactly between Box A and Box G, which is not satisfied.

From the above conditions, case-1 gets eliminated because the number of boxes kept between box L and box A is **two less than** the number of boxes kept between box F and box M, which is kept above F, which is not satisfied.

Hence, case-2 shows the final arrangement

Case- 1	Case- 1a	Case- 2

- The number of boxes kept between box L and box A is **two less than** the number of boxes kept between box F and box M, which is kept above F.

From the above conditions, case-1a gets eliminated because Box F is kept exactly between Box A and Box G, which is not satisfied.

From the above conditions, case-1 gets eliminated because the number of boxes kept between box L and box A is **two less than** the number of boxes kept between box F and box M, which is kept above F, which is not satisfied.

Hence, case-2 shows the final arrangement

Case- 1	Case- 1a	Case- 2
Boxes	Boxes	Boxes
K	I	J
		E
A		B
I	G	
F	D	D
G	H	
D		C
L	J	I
H		
	B

C		
		L
		A

Answer: A

6. Questions

Final Arrangement:

Arrangement-1:

Row-1:

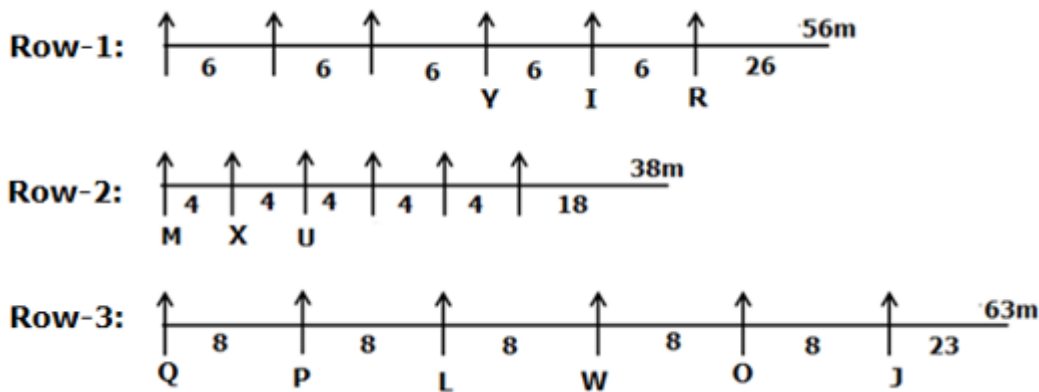

↑	6	↑	6	↑	6	↑	6	↑	6	↑	26	56m
Q		L		P		Y		I		R		

Row-2:

↑	4	↑	4	↑	4	↑	4	↑	4	↑	18	38m
M		X		U		J		W		O		

Arrangement-2:

@QuizByMickey

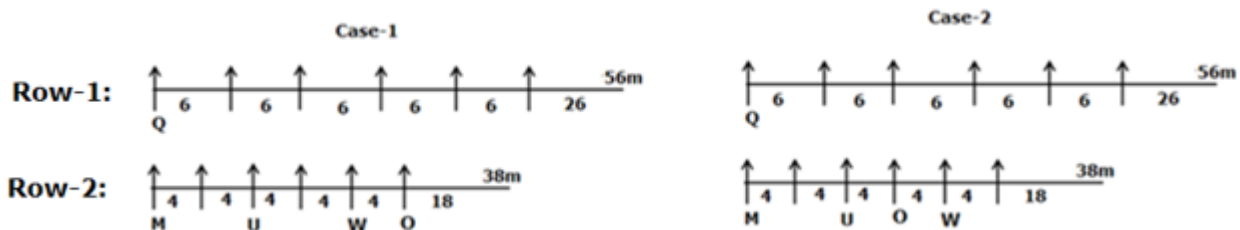

Arrangement - 1

We have,

- W sits 22m away from the right end.
- The distance between W and O is 4m.
- M sits 8m away from U.
- Q sits to the north of M.
- U does not sit to the left of M.

From the above conditions, there are two possibilities.

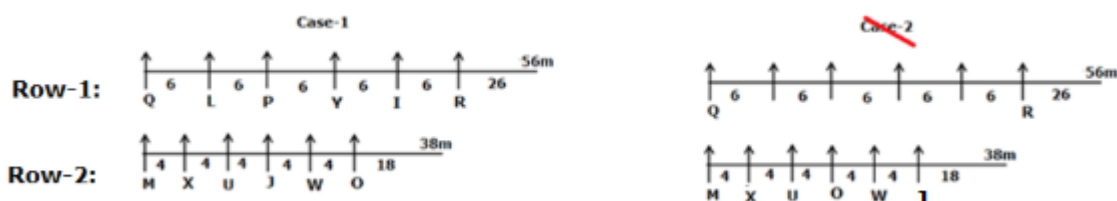

Again, we have,

- As many persons sitting to the left of Q as to the right of R.
- The distance between R and Y is 4m more than the distance between X and J.
- The distance between J and M is not less than 5m.
- The number of persons sitting to the left of P is **one more than** the number of persons sitting to the right of I.
- The distance between R and I is less than the distance between M and U.
- L sits at Row-1

From the above conditions, case-2 gets eliminated because the distance between R and Y is 4m more than the distance between X and J, which is not satisfied.

Hence case-1 shows the final arrangement-1.

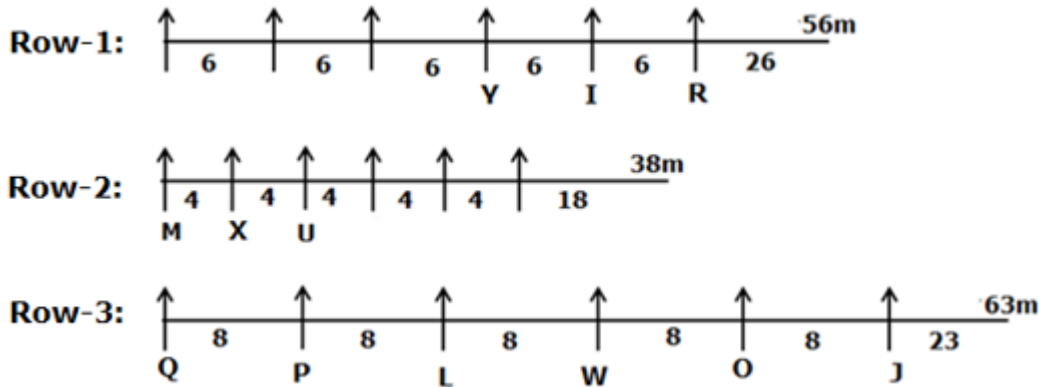

Arrangement 2:

Again, we have,

- Now some persons in the first two rows are shifted to row-3.
- The persons sitting to the right of U in row-2 in arrangement 1 are arranged in alphabetical order from the right end in row-3 and the persons sitting to the left of Y in row-1 in arrangement 1 are arranged in reverse alphabetical order from the left end in row-3.

From the above conditions, here is the final arrangement-2.

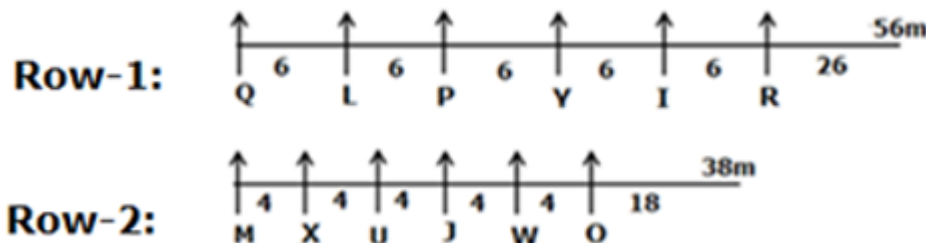

Answer: B

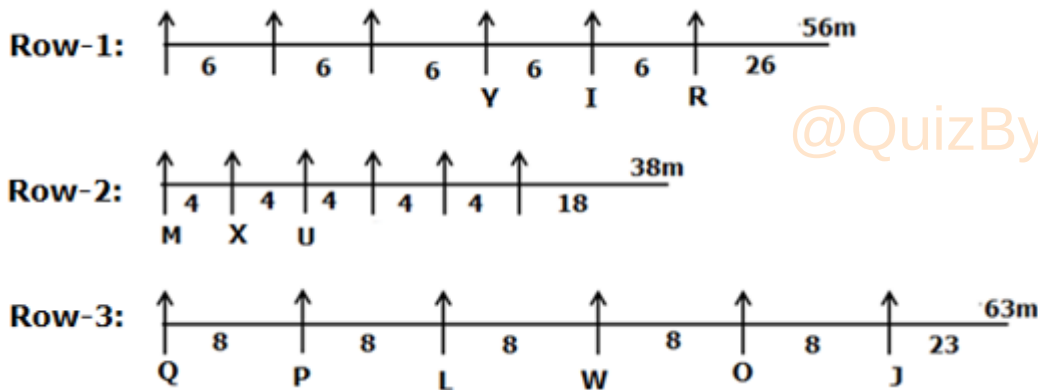

7. Questions

Final Arrangement:

Arrangement-1:

Arrangement-2:

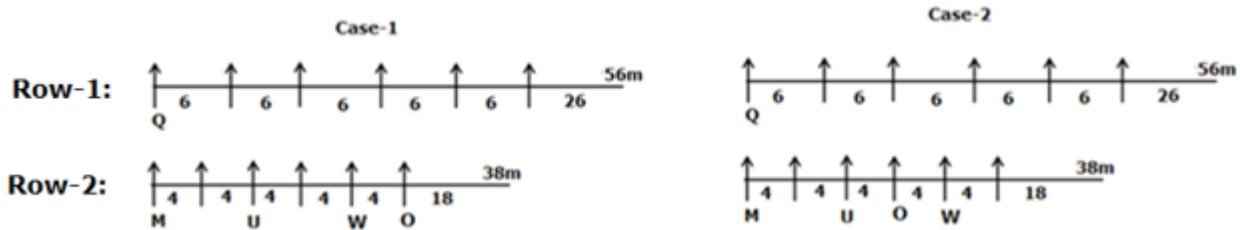

Arrangement - 1

We have,

- W sits 22m away from the right end.

- The distance between W and O is 4m.
- M sits 8m away from U.
- Q sits to the north of M.
- U does not sit to the left of M.

From the above conditions, there are two possibilities.

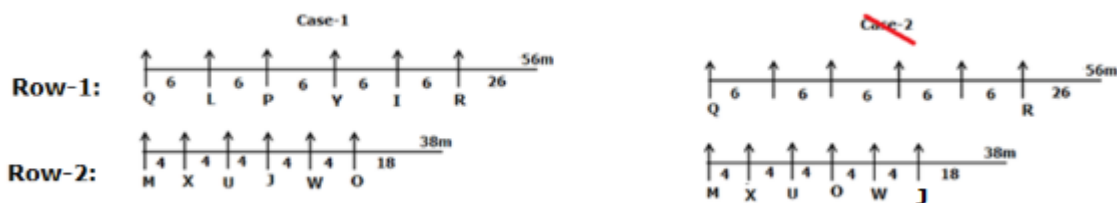

Again, we have,

- As many persons sitting to the left of Q as to the right of R.
- The distance between R and Y is 4m more than the distance between X and J.
- The distance between J and M is not less than 5m.
- The number of persons sitting to the left of P is **one more than** the number of persons sitting to the right of I.
- The distance between R and I is less than the distance between M and U.
- L sits at Row-1

From the above conditions, case-2 gets eliminated because the distance between R and Y is 4m more than the distance between X and J, which is not satisfied.

Hence case-1 shows the final arrangement-1.

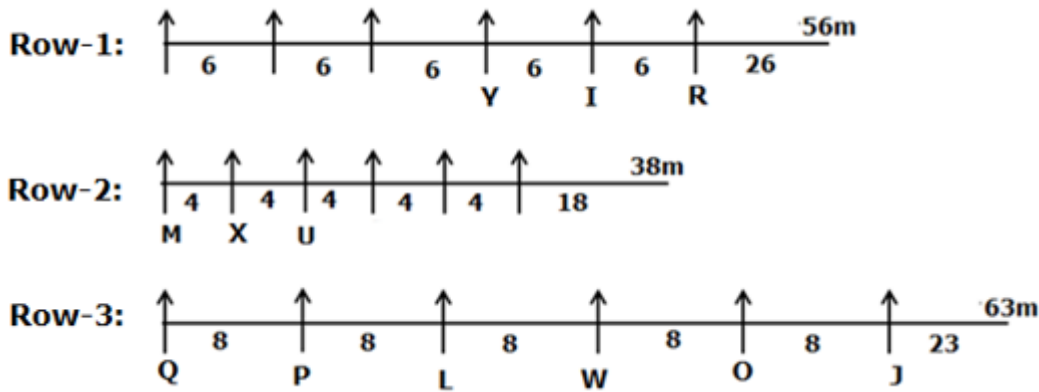

Arrangement 2:

Again, we have,

- Now some persons in the first two rows are shifted to row-3.
- The persons sitting to the right of U in row-2 in arrangement 1 are arranged in alphabetical order from the right end in row-3 and the persons sitting to the left of Y in row-1 in arrangement 1 are arranged in reverse alphabetical order from the left end in row-3.

From the above conditions, here is the final arrangement-2.

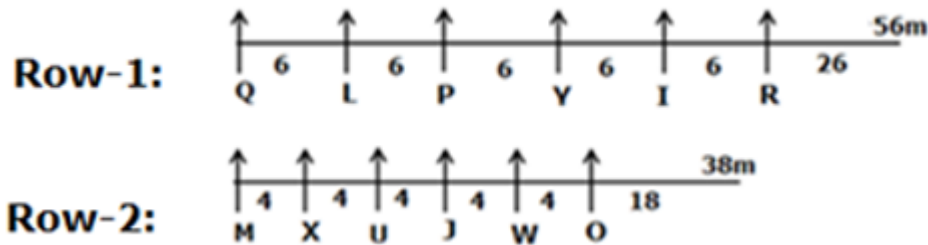

Answer: A

Arrangement-1:

Arrangement-2:

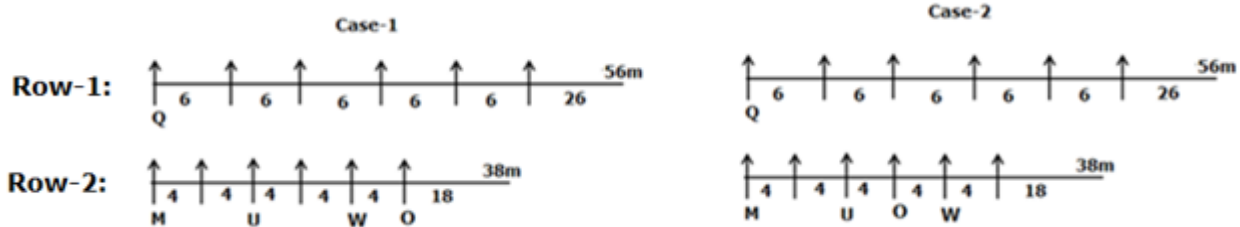

Arrangement - 1

@QuizByMickey

We have,

- W sits 22m away from the right end.
- The distance between W and O is 4m.
- M sits 8m away from U.
- Q sits to the north of M.
- U does not sit to the left of M.

From the above conditions, there are two possibilities.

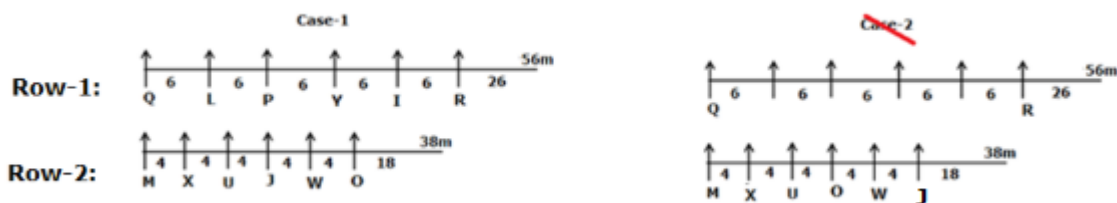

Again, we have,

- As many persons sitting to the left of Q as to the right of R.
- The distance between R and Y is 4m more than the distance between X and J.
- The distance between J and M is not less than 5m.
- The number of persons sitting to the left of P is **one more than** the number of persons sitting to the right of I.
- The distance between R and I is less than the distance between M and U.
- L sits at Row-1

From the above conditions, case-2 gets eliminated because the distance between R and Y is 4m more than the distance between X and J, which is not satisfied.

Hence case-1 shows the final arrangement-1.

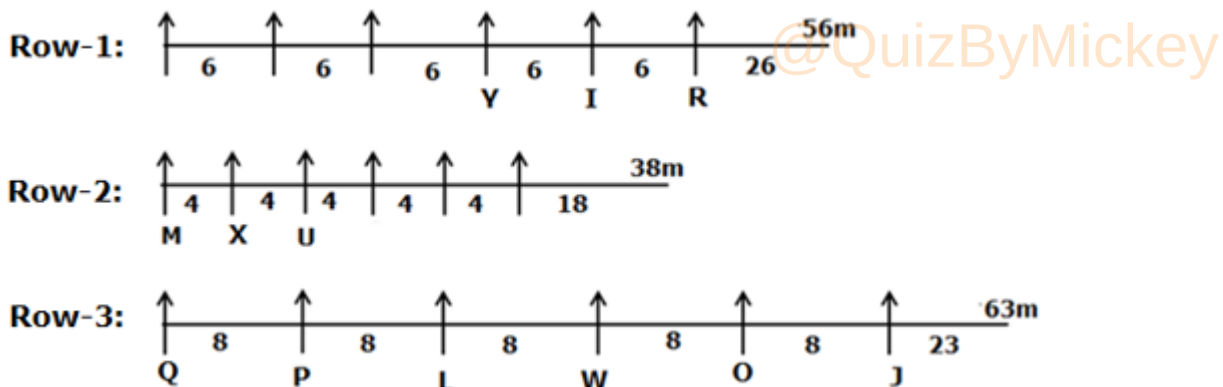

Arrangement 2:

Again, we have,

- Now some persons in the first two rows are shifted to row-3.
- The persons sitting to the right of U in row-2 in arrangement 1 are arranged in alphabetical order from the right end in row-3 and the persons sitting to the left of Y in row-1 in arrangement 1 are arranged in reverse alphabetical order from the left end in row-3.

From the above conditions, here is the final arrangement-2.

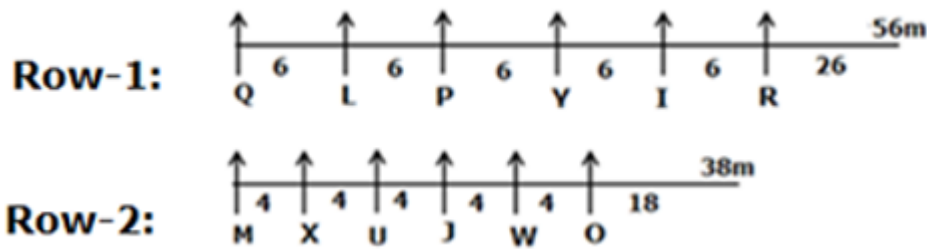

Answer: C

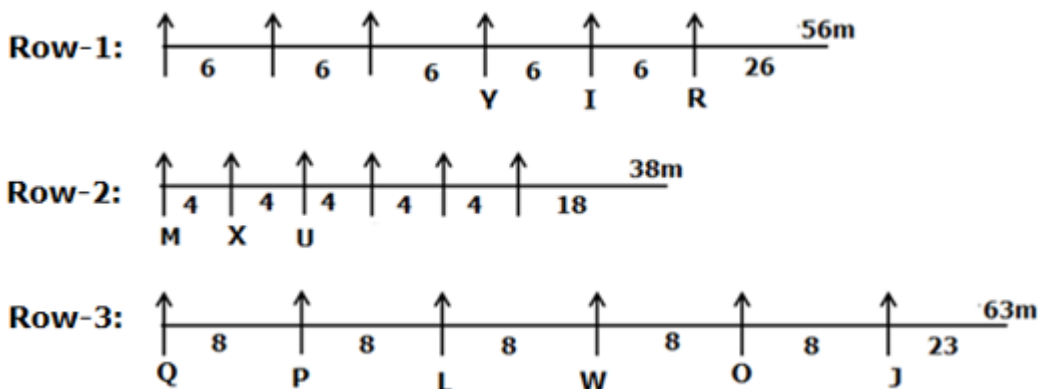

9. Questions

Final Arrangement:

Arrangement-1:

Arrangement-2:

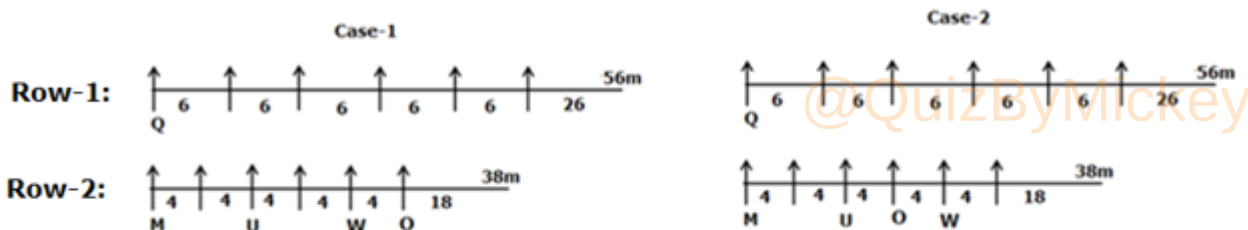

Arrangement - 1

We have,

- W sits 22m away from the right end.
- The distance between W and O is 4m.
- M sits 8m away from U.
- Q sits to the north of M.
- U does not sit to the left of M.

From the above conditions, there are two possibilities.

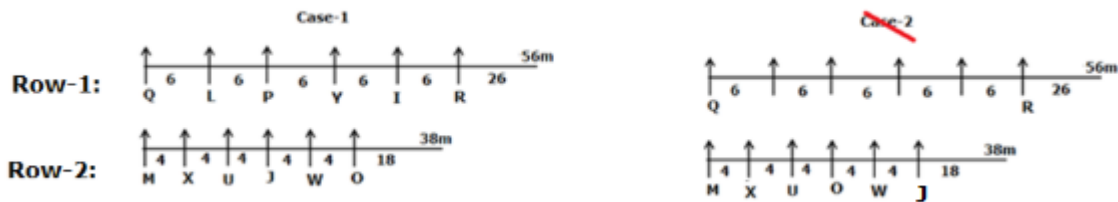

Again, we have,

- As many persons sitting to the left of Q as to the right of R.
- The distance between R and Y is 4m more than the distance between X and J.
- The distance between J and M is not less than 5m.
- The number of persons sitting to the left of P is **one more than** the number of persons sitting to the right of I.

- The distance between R and I is less than the distance between M and U.
- L sits at Row-1

From the above conditions, case-2 gets eliminated because the distance between R and Y is 4m more than the distance between X and J, which is not satisfied.

Hence case-1 shows the final arrangement-1.

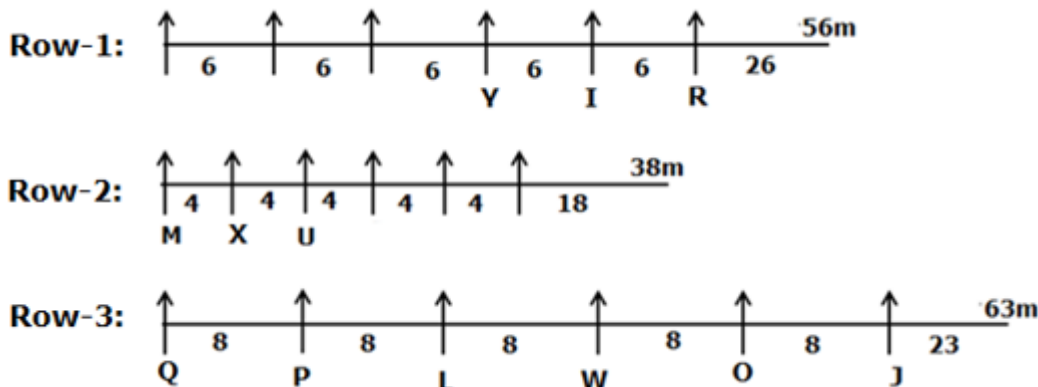

Arrangement 2:

Again, we have,

- Now some persons in the first two rows are shifted to row-3.
- The persons sitting to the right of U in row-2 in arrangement 1 are arranged in alphabetical order from the right end in row-3 and the persons sitting to the left of Y in row-1 in arrangement 1 are arranged in reverse alphabetical order from the left end in row-3.

From the above conditions, here is the final arrangement-2.

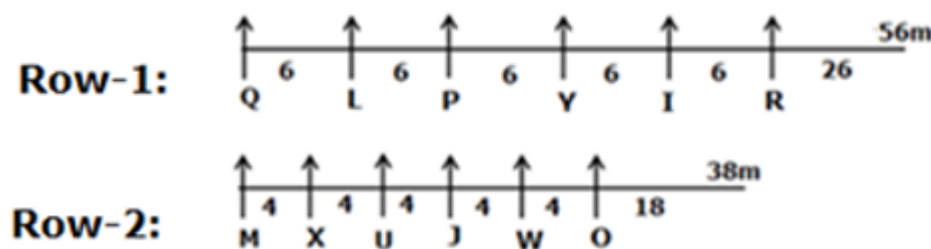

Answer: E

10. Questions

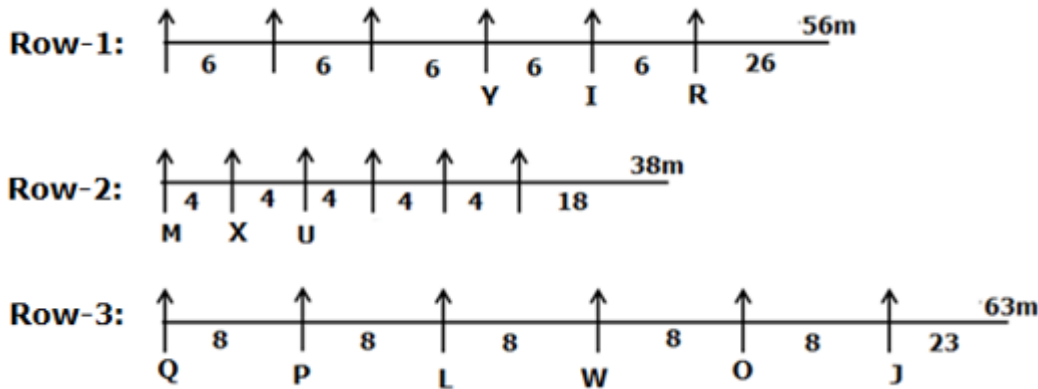

Final Arrangement:

Arrangement-1:

Arrangement-2:

@QuizByMickey

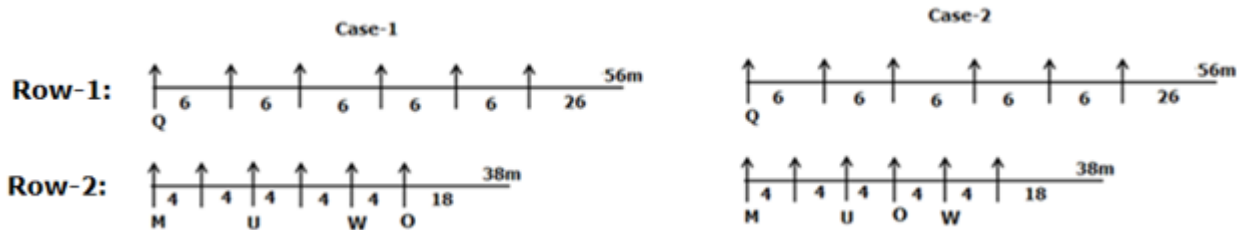

Arrangement - 1

We have,

- W sits 22m away from the right end.
- The distance between W and O is 4m.
- M sits 8m away from U.
- Q sits to the north of M.
- U does not sit to the left of M.

From the above conditions, there are two possibilities.

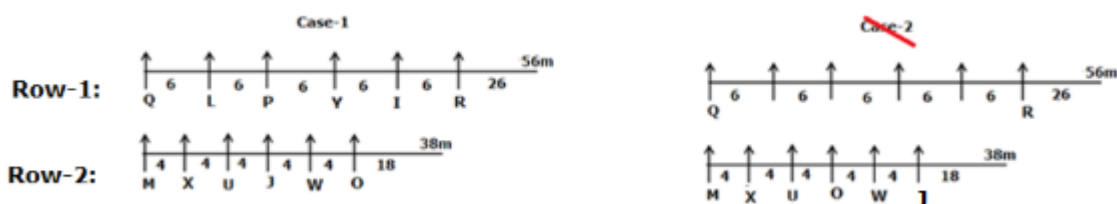

Again, we have,

- As many persons sitting to the left of Q as to the right of R.
- The distance between R and Y is 4m more than the distance between X and J.
- The distance between J and M is not less than 5m.
- The number of persons sitting to the left of P is **one more than** the number of persons sitting to the right of I.
- The distance between R and I is less than the distance between M and U.
- L sits at Row-1

From the above conditions, case-2 gets eliminated because the distance between R and Y is 4m more than the distance between X and J, which is not satisfied.

Hence case-1 shows the final arrangement-1.

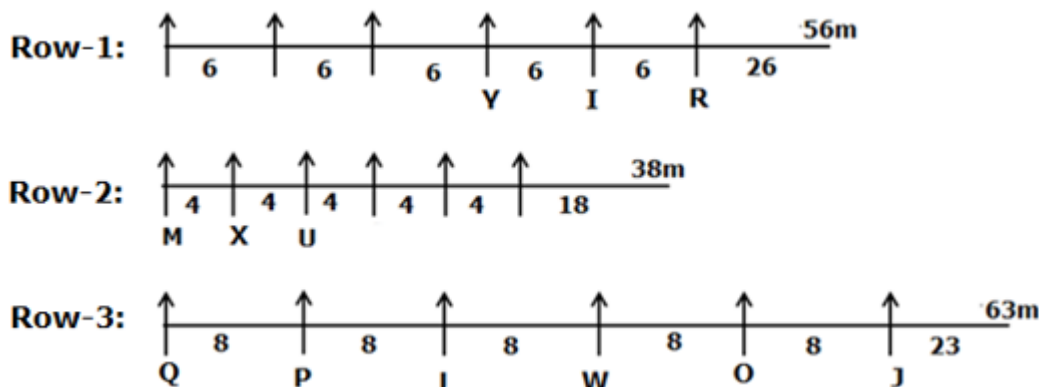

Arrangement 2:

Again, we have,

- Now some persons in the first two rows are shifted to row-3.
- The persons sitting to the right of U in row-2 in arrangement 1 are arranged in alphabetical order from the right end in row-3 and the persons sitting to the left of Y in row-1 in arrangement 1 are arranged in reverse alphabetical order from the left end in row-3.

From the above conditions, here is the final arrangement-2.

Answer: B

11. Questions

Answer: E

From the given statements, the following were determined.

Word	Code
Entertainment	34
Film	87
Show	28
Time	37
Awards	36
Family	913
Television/channel/makes	26/16/57
Fare/announced	54/25
Musical/starts/tomorrow	85/92/72
Changes/often	52/80
Telecasted/everywhere	95/84

@QuizByMickey

None of the statements determines the complete code for “Channel telecasted new serial”.

Hence, option E is correct.

12. Questions

Answer: C

From the given statements, the following were determined.

Word	Code
Entertainment	34
Film	87
Show	28
Time	37
Awards	36
Family	91
Television/channel/makes	26/16/57
Fare/announced	54/25
Musical/starts/tomorrow	85/92/72
Changes/often	52/80
Telecasted/everywhere	95/84

Using statement II, “Entertainment awards released online” is coded as “68 34 59 36”.

Word	Code
Film	87
Show	28
Released/online	68/59

Hence, option C is correct.

13. Questions

Answer: B

From the given statements, the following were determined.

@QuizByMickey

Word	Code
Entertainment	34
Film	87
Show	28
Time	37
Awards	36
Family	91
Television/channel/makes	26/16/57
Fare/announced	54/25
Musical/starts/tomorrow	85/92/72
Changes/often	52/80
Telecasted/everywhere	95/84

Using statement III, “Food changes announced regularly” is coded as “80 77 25 63”.

Word	Code
Changes	80
Often	52
Announced	25
Fare	54
Food/regularly	77/63

Hence, option B is correct.

14. Questions

Answer: A

From the given statements, the following were determined.

@QuizByMickey

Word	Code
Entertainment	34
Film	87
Show	28
Time	37
Awards	36
Family	91
Television/channel/makes	26/16/57
Fare/announced	54/25
Musical/starts/tomorrow	85/92/72
Changes/often	52/80
Telecasted/everywhere	95/84

Using statement I, “Television fare makes today” is coded as “57 25 16 68”

Word	Code
Family	91
Television/makes	57/16
Channel	26
Fare	25
Announced	54
Today	68

Hence, option A is correct.

15. Questions

Answer: D

From the given statements, the following were determined.

@QuizByMickey

Word	Code
Entertainment	34
Film	87
Show	28
Time	37
Awards	36
Family	91
Television/channel/makes	26/16/57
Fare/announced	54/25
Musical/starts/tomorrow	85/92/72
Changes/often	52/80
Telecasted/everywhere	95/84

Using statement II, “Television costs announced higher” is coded as “57 64 25 99”.

Word	Code
Entertainment	34
Television	57
Costs/higher	64/99
Fare	54
Announced	25

Using statement III, “Higher costs announced film” is coded as “93 54 87 75”.

Word	Code
Entertainment	34
Costs/higher	93/75
Fare	25
Announced	54

Hence, option D is correct.
