

1. Questions

Study the following information carefully and answer the questions given below.

Ten persons - A, B, C, D, E, F, G, H, I, and J are sitting in two parallel rows. Each row contains five persons and are facing towards each other. The persons sitting in row 1 face South and the persons sitting in row 2 face North. They are having different number of books.

Note: The persons sitting in row 1 are having an even number of books and the persons sitting in row 2 are having an odd number of books. No one has more than 30 books.

A sits third to the right of the one who has 14 books. The one who has 15 books is an immediate neighbour of the one who faces A. B sits second to the right of J, who sits immediate right of the one who has 21 books. J has less than 10 books. Both B and H are immediate neighbours. The number of persons sitting to the left of B is the same as the number of persons sitting to the right of the one who has 8 books. E sits second to the right of the one who has 24 books. The difference between the number of books with G and I is equal to the number of books with A. E has five books less than B. The one who has 17 books sits immediate left of F. The sum of the number of books with A and B is equal to the number of books with F. D neither sits opposite to H nor F and does not have the odd number of books. C sits immediate left of the one who has 9 books. G has more books than H.

Conditions:

They are playing the dice game. Two persons are rolling the dice at the same time.

I) If two persons are getting even numbers, then the sum of the number of books with them and the persons sitting opposite to them will be obtained.

II) If two persons are getting odd numbers, then the difference between the number of books with them and the persons who sit at the extreme right end of their rows will be obtained.

III) If one person gets an even number and another gets an odd number, then the number of books with them will be doubled.

If G and I are rolling the dice and both are getting even numbers, then what is the sum of the books with them?

- a. 76
- b. 75
- c. 80
- d. 78
- e. 82

@QuizByMickey

2. Questions

If the person who has 10 books and the one who has 9 books are rolling the dice and both are getting odd numbers, then what is the product of the unit digits of the books with them?

- a. 20

- b. 16
- c. 25
- d. 28
- e. 15

3. Questions

What is the sum of the number of books with the persons who sit at the left end of each row?

- a. 33
- b. 32
- c. 35
- d. 31
- e. 30

4. Questions

If A and the person who sits immediate right of J are rolling the dice and one person gets an even number and another gets an odd number, then what is the difference between the books with them?

- a. 5
- b. 10
- c. 15
- d. 20
- e. 25

5. Questions

Who among the following person sits third to the left of B?

- a. D
- b. The one who has 15 books
- c. The one who has 9 books
- d. The one who sits opposite to E
- e. A

@QuizByMickey

6. Questions

Study the following information carefully and answer the given questions.

The following symbols represent time in a clock:

& means either the hour or minute hand of the clock is at 12

@ means either the hour or minute hand of the clock is at 4

\$ means either the hour or minute hand of the clock is at 6

* means either the hour or minute hand of the clock is at 11

% means either the hour or minute hand of the clock is at 9

! means either the hour or minute hand of the clock is at 1

> means either the hour or minute hand of the clock is at 3

? means either the hour or minute hand of the clock is at 2

means either the hour or minute hand of the clock is at 8

< means either the hour or minute hand of the clock is at 5

^ means PM

⌚ means AM

Note: If two symbols are given, then the first symbol will be considered as the hour hand and the second symbol will be considered as the minute hand.

For example: #> ⌚ -> 8:15 AM

The distance between Alex's college to his native is 360km. He started his journey from the college by his bike at a speed of 50km/hr at "\$@^", then at what time did he reach his native (approximately)?

- a. %!⌚
- b. ?\$^
- c. <#^
- d. !\$⌚
- e. None of these

7. Questions

Ram books in Rapido from his house to go to the hospital and person X from Rapido took a bike to pick up Ram at &<^ and it takes 120 minutes to reach Ram's house but Ram went to a medical shop, then at what time ram should reach his house if he wants to reach there 5 minutes before X's reaching time?

- a. ?*⌚
- b. ?<^
- c. <@⌚
- d. #!^
- e. ?@^

8. Questions

Mary went to the tuition centre, she spends “?” hours for writing, “!” hour for reading, “!” for test and 30 minutes for snacks time and then she will reach her father’s office at #\$, if she takes “!” hour for travelling from tuition centre to her father’s office, then at what time she went to the tuition centre?

- a. *&Ϙ
- b. >&^
- c. ?\$^
- d. >\$^
- e. <%Ϙ

9. Questions

If A and B together can do a piece of work in 8 hours and A alone can do a piece of work in 16 hours and B starts to do the work alone at “@>Ϙ”, then at what time did B alone will complete his/her work?

- a. #>^
- b. @*Ϙ
- c. \$%^
- d. %@Ϙ
- e. <@^

10. Questions

The bus departed at “ * \$^ ”, it takes 3 hours 50 minutes(without break) to reach the destination, if the bus takes 60 minutes break in between the journey, then at what time it will reach the destination?

- a. @\$Ϙ
- b. \$!^
- c. @@Ϙ
- d. <*&
- e. Cannot be determined

@QuizByMickey

11. Questions

Study the following information carefully and answer the given below.

Certain number of boxes are kept in five different racks as shown in the below figure. The shelves of each rack are marked from bottom to top as G, 1, 2, 3, 4 and 5. Only one box is kept on each shelf of the racks.

Some of the shelves may be vacant. Boxes adjacent to each other means, either east-west

				Sun Flower		
	Jasmine					
5	lotus					
4			Rose			
3					blossom	
2						Star
1						
6						

or south-north.

F is kept on one of the even numbered shelves of Jasmine rack. O is kept two places away from I on the same shelf, where neither of them is kept in Sunflower rack. O is kept to the west of I. N is kept immediate north-east of O but is not kept on the Jasmine rack. Y is kept three shelves above N in the same rack. Z is kept three places to the west of P. B is kept immediate north-west of P. At least one shelf is above B. U is kept exactly between P and C. D is kept two shelves above U in the same rack. Q is kept immediately above Z in the same rack. H is kept immediately below A and is kept to the south of A. T neither is kept adjacent to F nor adjacent to Q. M is kept immediate north-west of A. H is kept two places away from T in the same shelf. H neither is kept in the same rack of N nor Z. K is kept exactly between M and J.

How many boxes are kept to the east of B?

- Two
- Four
- One
- Three
- No one

12. Questions

What is the direction of D with respect to M?

- South-east
- North
- West
- North-west
- East

@QuizByMickey

13. Questions

If V is kept immediate north-east of J, then how many boxes are kept along with V?

- a. As many boxes kept in first shelf
- b. As many boxes kept in Rose rack
- c. One
- d. Five
- e. As many boxes kept in Star rack

14. Questions

K is kept on which of the following rack?

- a. Lotus
- b. Sunflower
- c. Star
- d. Blossom
- e. Rose

15. Questions

Which of the following statement(s) is/are true with respect to the final arrangement?

I). M is kept to the east of N

II). Only four boxes are kept in second shelf

III). J and C are kept adjacent to each other

- a. Only I
- b. Only I and II
- c. Only II and III
- d. Only III
- e. All I, II and III

@QuizByMickey

16. Questions

Study the following information carefully and answer the given questions.

Eleven persons - L, M, N, O, P, Q, R, S, T, U, and V are getting the regularization order on two different months either January or June of different years- 2018, 2019, 2020, 2021, 2022, and 2023. One of the months no one gets the regularization order.

P gets in the leap year. Only four persons get between P and Q. The number of persons getting the order after Q is **one less** than the number of persons getting the order before N. None of the year and month is vacant before N and after Q. U gets immediately before the one who gets exactly one year before R, who

gets in an odd numbered year. At least one person gets after R. P and U do not get the order consecutively. U does not get in June. The number of persons getting the order before N is **one less** than the number of persons getting the order after S. No one gets between S and L, who gets in January of an odd numbered year. Only two persons get between O and S. M gets the order two persons before O but not in the month having 31 days. As many persons get the order between R and the one who gets three persons after P as between T and V. Not more than two persons get between L and V. V gets the order and the vacant month is not consecutive years.

How many persons get between the one who gets three persons before M and the one who gets immediately after U?

- a. Four
- b. Five
- c. Six
- d. Seven
- e. Three

17. Questions

Which of the following statements is/are true as per the given arrangement?

I). R gets the order in odd number year of even number month

II). No one gets the order between P and L

III). Q gets immediately after M

IV). V gets in the leap year

- a. Only (III) and (IV)
- b. Only (I) and (II)
- c. Only (II) and (III)
- d. Only (II)
- e. All (I), (III) and (IV)

18. Questions

@QuizByMickey

Who among the following person gets three persons before the one who gets immediately after Vacant?

- a. Q
- b. O
- c. The one who gets two persons after U
- d. The one who gets in June 2019
- e. The one who gets in June 2020

19. Questions

The number of person getting the order between R and the one who gets immediately before L is the same as the number of persons getting the order between S and _____.

- M
- P
- The one who gets in June 2018
- Q
- The one who gets two persons before N

20. Questions

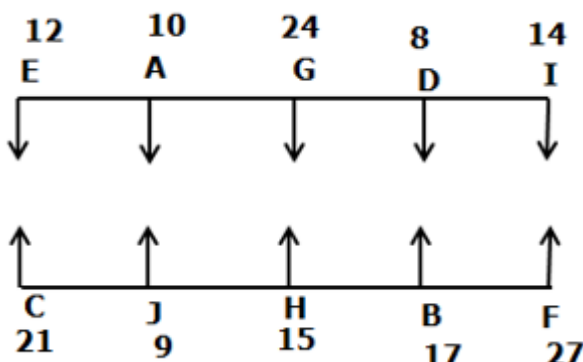

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following doesn't belong to the group?

- UN
- TR
- LV
- MO
- SQ

Explanations:

1. Questions

Final Arrangement

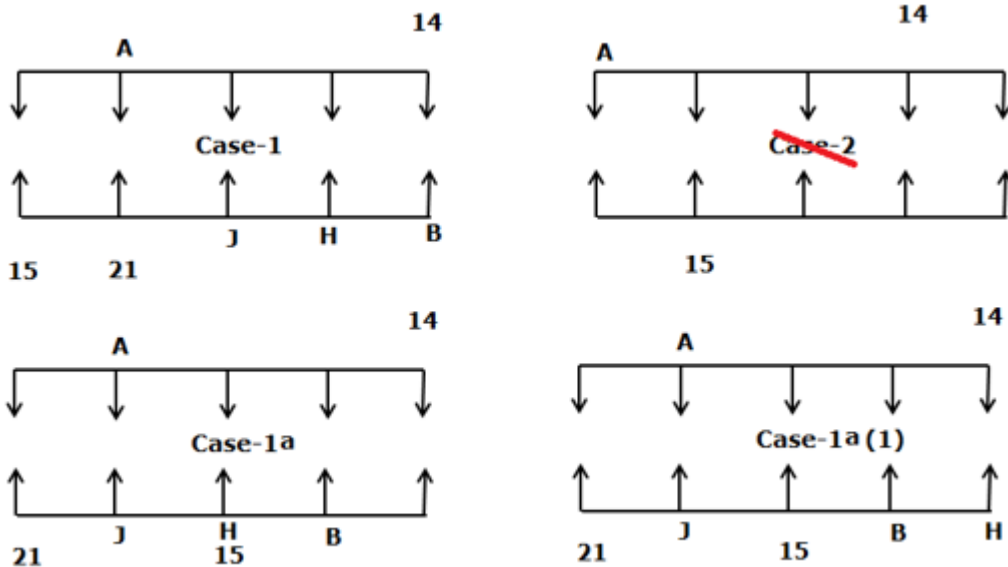

@QuizByMickey

We have,

- A sits third to the right of the one who has 14 books.
- The one who has 15 books is an immediate neighbour of the one who faces A.
- B sits second to the right of J, who sits immediate right of the one who has 21 books.
- J has less than 10 books.

- Both B and H are immediate neighbours.

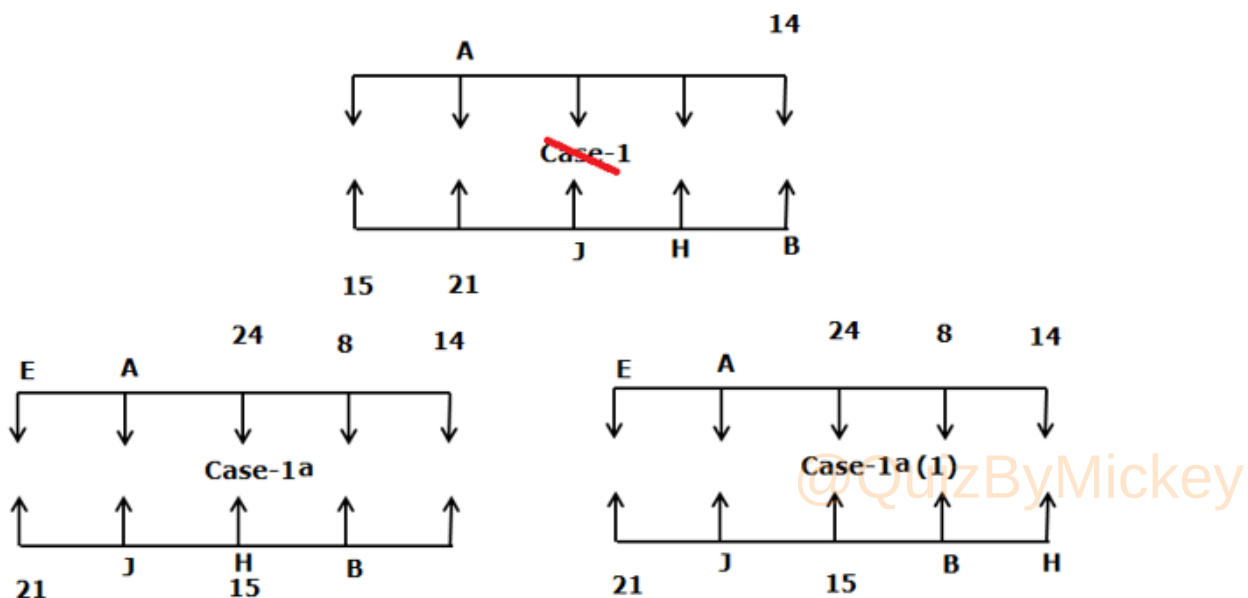

From the above condition, there are four possibilities. Case 2 gets eliminated.

Again we have,

- The number of persons sitting to the left of B is the same as the number of persons sitting to the right of the one who has 8 books.
- E sits second to the right of the one who has 24 books.

From the above condition, Case-1 gets eliminated.

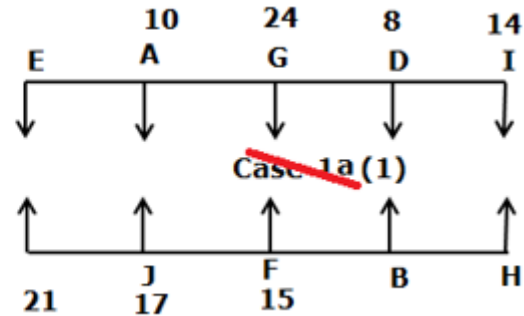

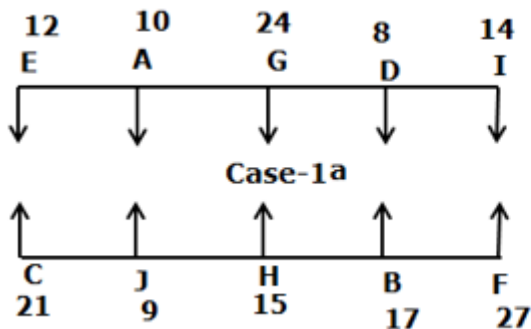

Again we have,

- The difference between the number of books with G and I is equal to the number of books with A.
- E has five books less than B.
- The one who has 17 books sits immediate left of F.
- The sum of the number of books with A and B is equal to the number of books with F.
- D neither sits opposite to H nor F and does not have the odd number of books.

- C sits immediate left of the one who has 9 books.
- G has more books than H.

From the above condition, Case-1a(1) gets eliminated. Hence, Case-1a shows the final arrangement.

Answer: C

Condition I is applied. The sum of the number of books with them and the persons sitting opposite to them will be obtained.

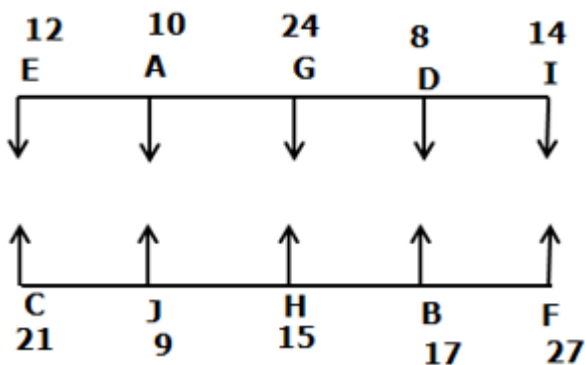

$$G = 24 + 15 = 39$$

$$I = 14 + 27 = 41$$

$$39 + 41 = 80$$

2. Questions

Final Arrangement

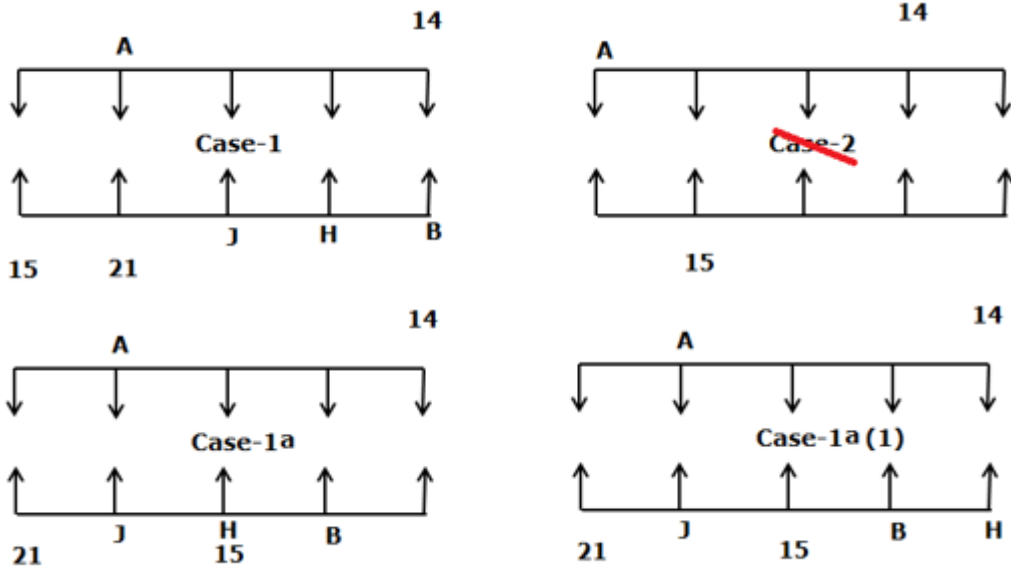

We have,

- A sits third to the right of the one who has 14 books.
- The one who has 15 books is an immediate neighbour of the one who faces A.
- B sits second to the right of J, who sits immediate right of the one who has 21 books.
- J has less than 10 books.
- Both B and H are immediate neighbours.

From the above condition, there are four possibilities. Case 2 gets eliminated.

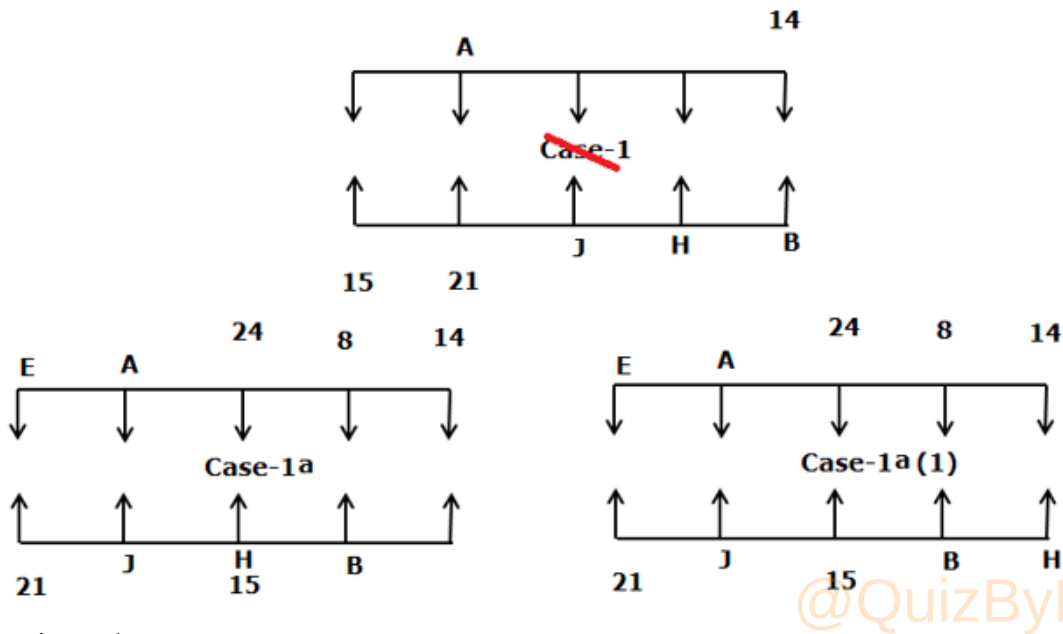

@QuizByMickey

Again we have,

- The number of persons sitting to the left of B is the same as the number of persons sitting to the right of the one who has 8 books.
- E sits second to the right of the one who has 24 books.

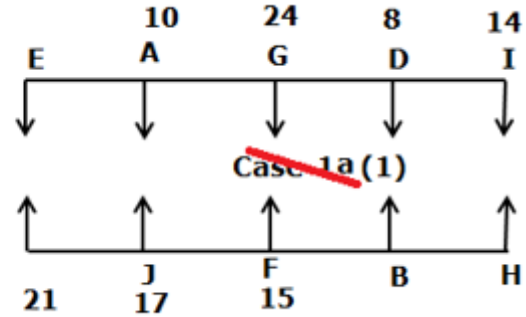

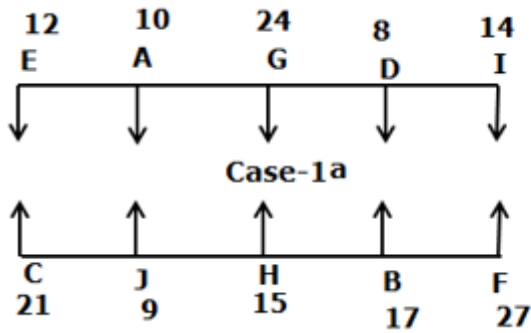

From the above condition, Case-1 gets eliminated.

Again we have,

- The difference between the number of books with G and I is equal to the number of books with A.
- E has five books less than B.
- The one who has 17 books sits immediate left of F.
- The sum of the number of books with A and B is equal to the number of books with F.
- D neither sits opposite to H nor F and does not have the odd number of books.
- C sits immediate left of the one who has 9 books.
- G has more books than H.

From the above condition, Case-1a(1) gets eliminated. Hence, Case-1a shows the final arrangement.

Answer: B

Condition II is applied. The difference between the number of books with them and the persons who sit at the extreme right end of their rows will be obtained.

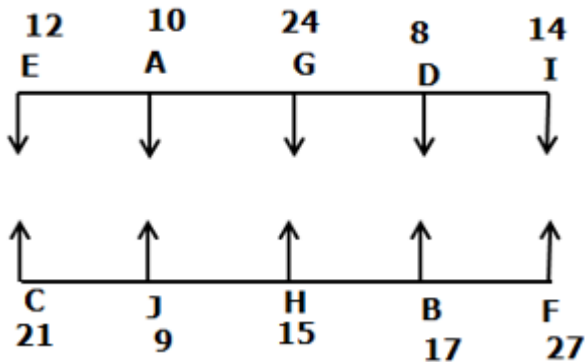

$$12-10=2$$

$$27-9=18$$

$$8*2=16$$

3. Questions

Final Arrangement

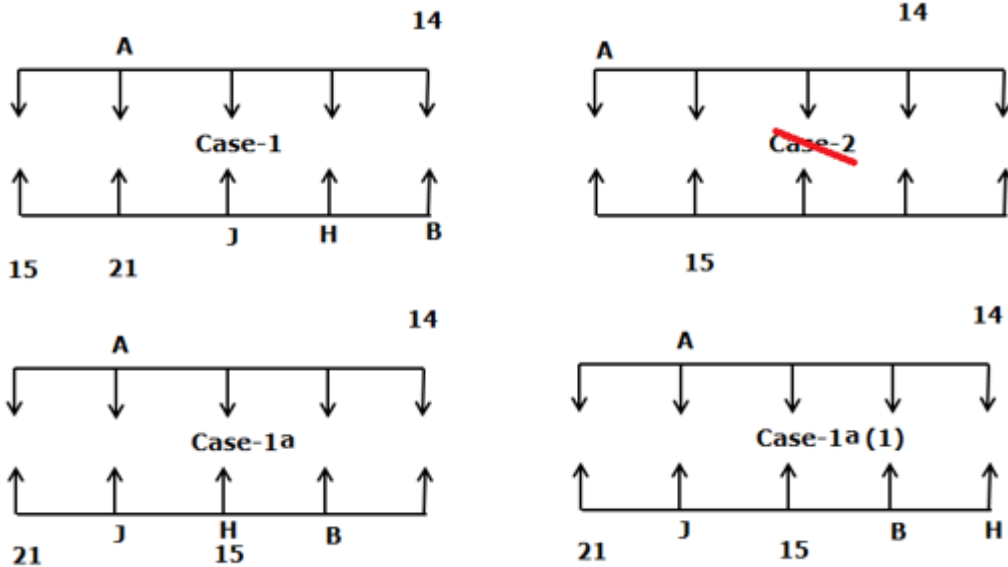

We have,

- A sits third to the right of the one who has 14 books.
- The one who has 15 books is an immediate neighbour of the one who faces A.
- B sits second to the right of J, who sits immediate right of the one who has 21 books.
- J has less than 10 books.
- Both B and H are immediate neighbours.

@QuizByMickey

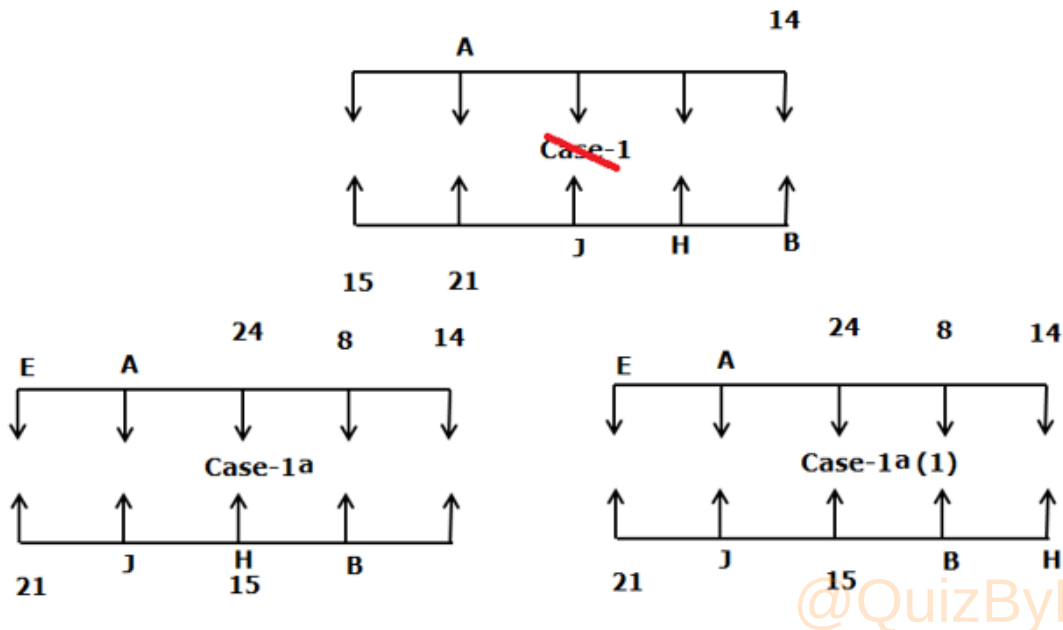

From the above condition, there are four possibilities. Case 2 gets eliminated.

Again we have,

- The number of persons sitting to the left of B is the same as the number of persons sitting to the right of the one who has 8 books.
- E sits second to the right of the one who has 24 books.

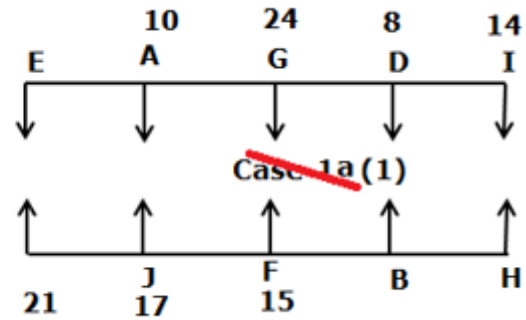

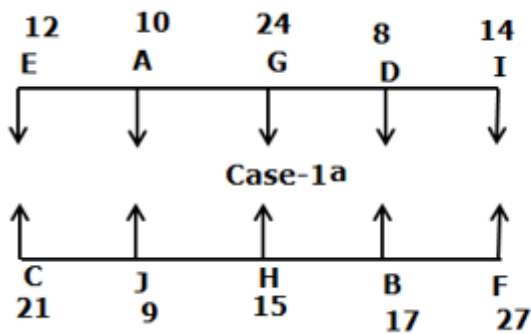

From the above condition, Case-1 gets eliminated.

Again we have,

- The difference between the number of books with G and I is equal to the number of books with A.
- E has five books less than B.
- The one who has 17 books sits immediate left of F.
- The sum of the number of books with A and B is equal to the number of books with F.
- D neither sits opposite to H nor F and does not have the odd number of books.
- C sits immediate left of the one who has 9 books.
- G has more books than H.

From the above condition, Case-1a(1) gets eliminated. Hence, Case-1a shows the final arrangement.

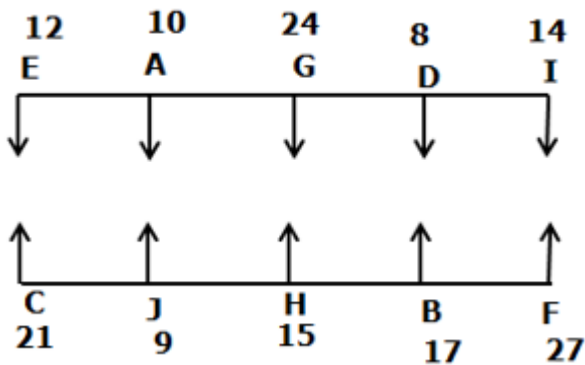

Answer: C

$$14+21=35$$

4. Questions

Final Arrangement

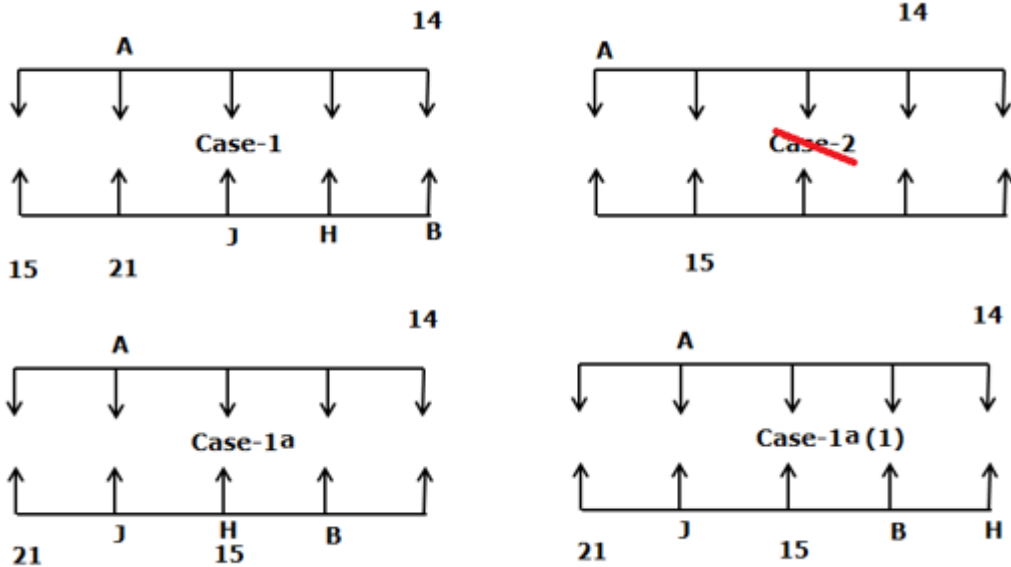

We have,

- A sits third to the right of the one who has 14 books.
- The one who has 15 books is an immediate neighbour of the one who faces A.
- B sits second to the right of J, who sits immediate right of the one who has 21 books.
- J has less than 10 books.
- Both B and H are immediate neighbours.

From the above condition, there are four possibilities. Case 2 gets eliminated.

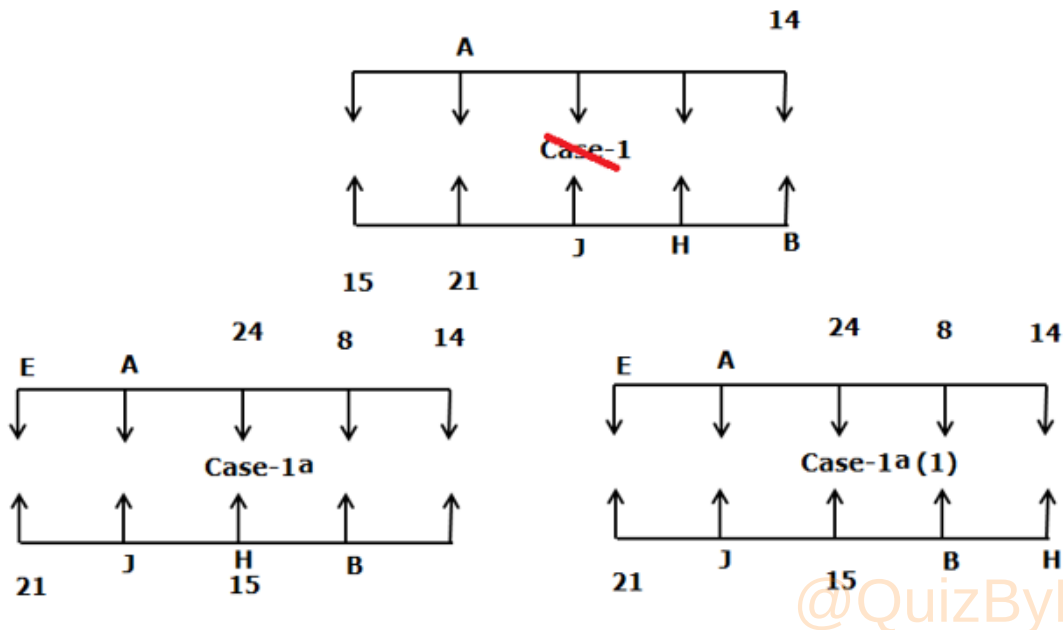

@QuizByMickey

Again we have,

- The number of persons sitting to the left of B is the same as the number of persons sitting to the right of the one who has 8 books.
- E sits second to the right of the one who has 24 books.

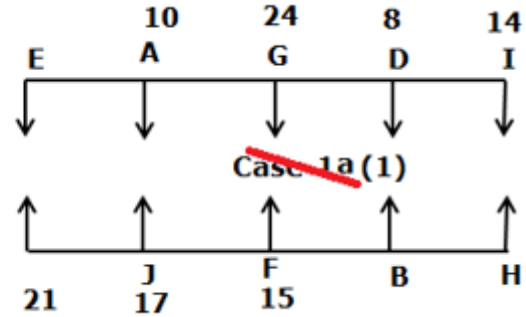

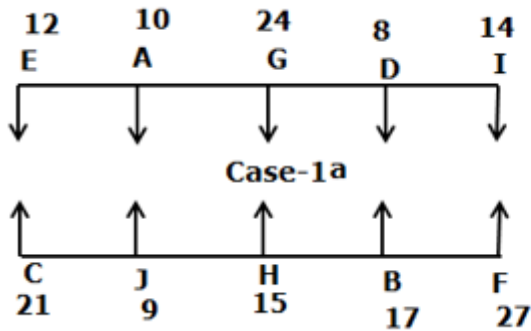

From the above condition, Case-1 gets eliminated.

Again we have,

- The difference between the number of books with G and I is equal to the number of books with A.
- E has five books less than B.
- The one who has 17 books sits immediate left of F.
- The sum of the number of books with A and B is equal to the number of books with F.
- D neither sits opposite to H nor F and does not have the odd number of books.
- C sits immediate left of the one who has 9 books.
- G has more books than H.

From the above condition, Case-1a(1) gets eliminated. Hence, Case-1a shows the final arrangement.

Answer: B

Condition III is applied. The number of books with them will be doubled.

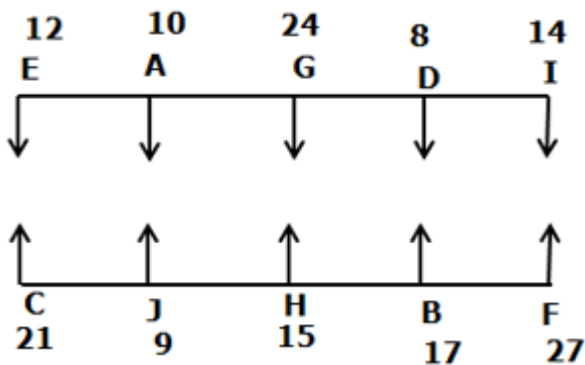

$$A = 10 \times 2 = 20$$

$$H = 15 \times 2 = 30$$

$$30 - 20 = 10$$

5. Questions

Final Arrangement

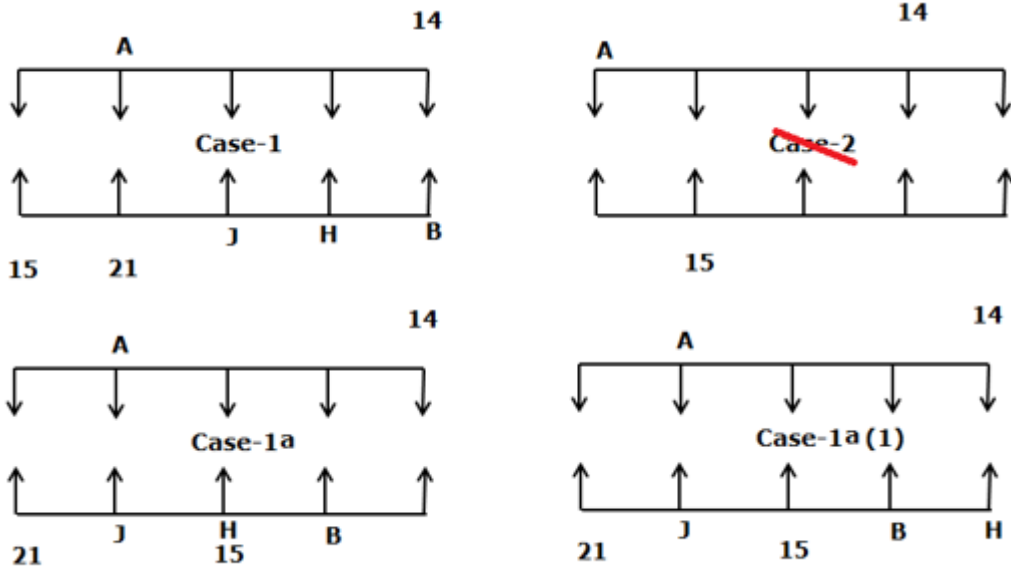

We have,

- A sits third to the right of the one who has 14 books.
- The one who has 15 books is an immediate neighbour of the one who faces A.
- B sits second to the right of J, who sits immediate right of the one who has 21 books.
- J has less than 10 books.
- Both B and H are immediate neighbours.

@QuizByMickey

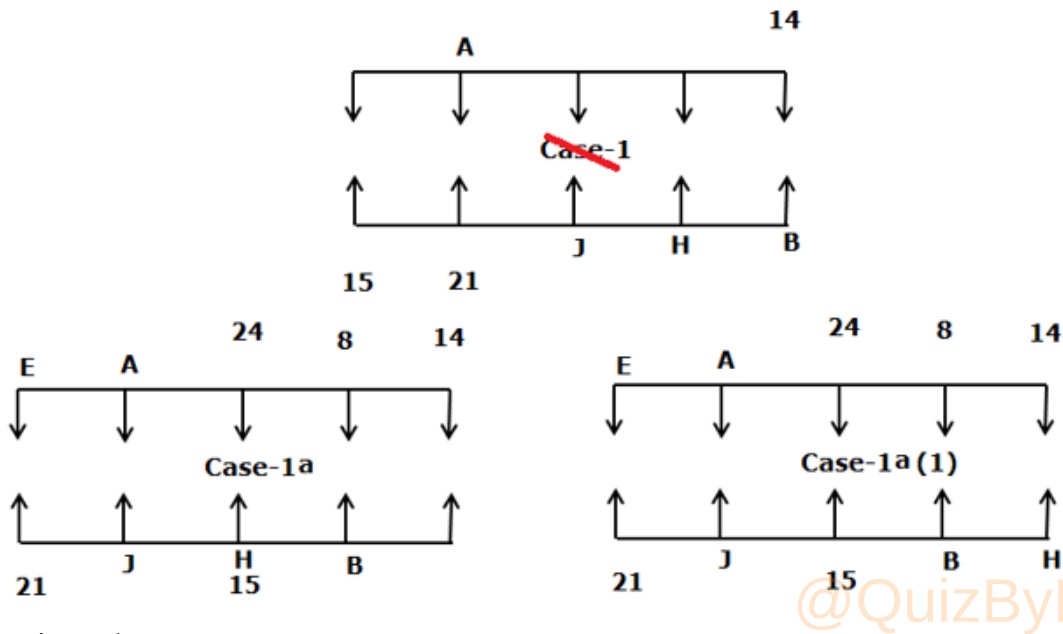

From the above condition, there are four possibilities. Case 2 gets eliminated.

Again we have,

- The number of persons sitting to the left of B is the same as the number of persons sitting to the right of the one who has 8 books.
- E sits second to the right of the one who has 24 books.

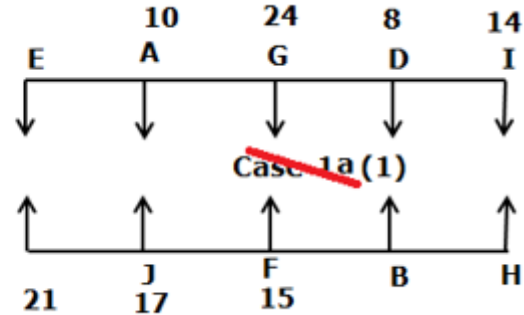

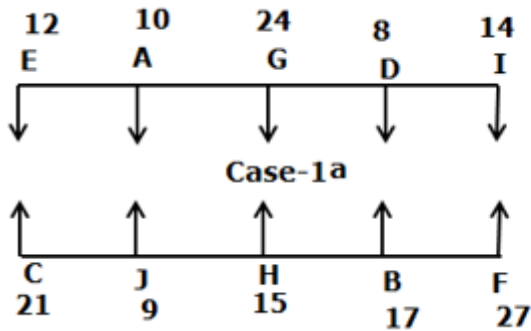

From the above condition, Case-1 gets eliminated.

Again we have,

- The difference between the number of books with G and I is equal to the number of books with A.
- E has five books less than B.
- The one who has 17 books sits immediate left of F.
- The sum of the number of books with A and B is equal to the number of books with F.
- D neither sits opposite to H nor F and does not have the odd number of books.
- C sits immediate left of the one who has 9 books.
- G has more books than H.

From the above condition, Case-1a(1) gets eliminated. Hence, Case-1a shows the final arrangement.

Answer: D

6. Questions

Answer: D

Distance=360km

Speed=50

Time=Distance/speed=360/50=7.2 hours

7 hours 12 minutes

Start time = 6:20 PM

Then Alex reached his native at 1:32 AM (approximately 1:30 AM)

1:30 AM

7. Questions

Answer: E

Person X took a bike to pick up Ram at 12:25 PM and it takes 120 minutes to reach Ram's house, which means person X reached Ram's house at 2:25 PM

As Ram has to reach his location from the medical shop 5 minutes before X's reaching time, then the reaching time would be 2:20 PM

8. Questions

Answer: B

Mary went to his father's office at 8:30 PM

She spends 2 hrs for writing, 1 hr for reading, 1 hr for test, 30 minutes for snacks time and then 1 hr for travelling.

8:30- (2+1+1+1+30 minutes) =8:30-5:30 ->3:00 PM

9. Questions

Answer: A

$A+B=1/8 \rightarrow 1/16+1/X=1/8$

$1/x=1/16-1/8 \Rightarrow 16 \text{ hours}$

@QuizByMickey

B starts at 4:15 AM and then finished at **8:15 PM** (#>^)

10. Questions

Answer: C

The bus starts at 11:30 PM

Reach the destination = $(11:30 + 3.50 + 1) = \mathbf{4:20 \text{ AM}}$ -> @ @ 

11. Questions

Final arrangement

		Jasmine		Sun Flower		
5	lotus					
4		F	Rose	Y		
3			D		blossom	
2	J	Q	K	B	M	Star
1	C	Z	U	N	P	A
G			O	T	I	H

We have,

- F is kept on one of the even numbered shelves of Jasmine rack.
- O is kept two places away from I on the same shelf, where neither of them is kept in Sunflower rack.
- O is kept to the west of I.
- N is kept immediate north-east of O but is not kept on the Jasmine rack.
- Y is kept three shelves above N in the same rack.

From the above conditions, there are four possibilities

@QuizByMickey

Case-1

	Jasmine	Sun Flower			
5	lotus			Y	
4			Rose		
3					blossom
2		F		N	Star
1			O		I
G					

Case-2a

	Jasmine	Sun Flower			
5	lotus				
4		F	Rose	Y	
3					blossom
2					Star
1				N	
G			O		I

Case-2

	Jasmine	Sun Flower			
5	lotus			Y	
4		F	Rose		
3					blossom
2				N	Star
1			O		I
G					

Case-1a

	Jasmine	Sun Flower			
5	lotus				
4			Rose	Y	
3					blossom
2		F			Star
1				N	
G			O		I

Again we have,

- Z is kept three places to the west of P.
- B is kept immediate north-west of P.
- At least one shelf is above B.
- U is kept exactly between P and C.
- D is kept two shelves above U in the same rack.
- Q is kept immediately above Z in the same rack.

After applying the above conditions case-1a gets eliminated

Case-1

	Jasmine	Sun Flower			
5	lotus			Y	
4			Rose		
3					blossom
2		F	D	N	Star
1		Q	O	B	I
G	C	Z	U		P

Case-2a

	Jasmine	Sun Flower			
5	lotus				
4		F	Rose	Y	
3			D		blossom
2		Q		B	Star
1	C	Z	U	N	P
G			O		I

Case-2

	Jasmine	Sun Flower			
5	lotus			Y	
4		F	Rose		
3					blossom
2			D	N	Star
1		Q	O	B	I
G	C	Z	U		P

Case-1a

	Jasmine	Sun Flower			
5	lotus				
4			Rose	Y	
3			D		blossom
2		F		B	Star
1	C	Z	U	N	P
G			O		I

Again we have,

- TH is kept immediately below A and is kept to the south of A.
- T neither is kept adjacent to F nor adjacent to Q.
- M is kept immediate north-west of A.
- H is kept two places away from T in the same shelf.
- H neither is kept in the same rack of N nor Z.
- K is kept exactly between M and J.

After applying the above conditions case-1 and case-2 get eliminated, hence case-2a shows the final arrangement

~~Case-1~~

	Jasmine			Sun Flower		
5	lotus				Y	
4			Rose			
3						blossom
2		F	D	N	M	Star
1		Q	O	B	I	A

Answer: D

13. Questions

Final arrangement

				Sun Flower		
5	lotus	Jasmine				
4		F	Rose	Y		
3			D		blossom	
2	J	Q	K	B	M	Star
1	C	Z	U	N	P	A
G			O	T	I	H

We have,

- F is kept on one of the even numbered shelves of Jasmine rack.
- O is kept two places away from I on the same shelf, where neither of them is kept in Sunflower rack.
- O is kept to the west of I.
- N is kept immediate north-east of O but is not kept on the Jasmine rack.
- Y is kept three shelves above N in the same rack.

From the above conditions, there are four possibilities

Case-1

				Sun Flower		
5	lotus	Jasmine		Y		
4			Rose			
3					blossom	
2		F		N		Star
1			O		I	
G						

Case-2a

				Sun Flower		
5	lotus	Jasmine				
4		F	Rose	Y		
3					blossom	
2						Star
1				N		
G			O		I	

Case-2

				Sun Flower		
5	lotus	Jasmine		Y		
4		F	Rose			
3					blossom	
2				N		Star
1			O		I	
G						

Case-1a

				Sun Flower		
5	lotus	Jasmine				
4			Rose	Y		
3					blossom	
2		F				Star
1				N		
G			O		I	

Again we have,

- Z is kept three places to the west of P.
- B is kept immediate north-west of P.

- At least one shelf is above B.
- U is kept exactly between P and C.
- D is kept two shelves above U in the same rack.
- Q is kept immediately above Z in the same rack.

After applying the above conditions case-1a gets eliminated

Case-1

	Jasmine			Sun Flower		
5	lotus				Y	
4			Rose			
3						blossom
2		F	D	N		Star
1		Q	O	B	I	
G	C	Z	U		P	

Case-2a

	Jasmine			Sun Flower		
5	lotus					
4		F	Rose	Y		
3			D			blossom
2		Q		B		Star
1	C	Z	U	N	P	
G			O		I	

Case-2

	Jasmine			Sun Flower		
5	lotus				Y	
4		F	Rose			
3						blossom
2			D	N		Star
1		Q	O	B	I	
G	C	Z	U		P	

~~**Case-1a**~~

	Jasmine			Sun Flower		
5	lotus					
4			Rose	Y		
3			D			blossom
2		F		B		Star
1	C	Z	U	N	P	
G			O		I	

Again we have,

- TH is kept immediately below A and is kept to the south of A.
- T neither is kept adjacent to F nor adjacent to Q.
- M is kept immediate north-west of A.
- H is kept two places away from T in the same shelf.
- H neither is kept in the same rack of N nor Z.
- K is kept exactly between M and J.

After applying the above conditions case-1 and case-2 get eliminated, hence case-2a shows the final arrangement

@QuizByMickey

Case-1

		Jasmine		Sun Flower

Answer: D

16. Questions

Final Arrangement:

Month and Year	Persons
January 2018	U
June 2018	T
January 2019	N
June 2019	R
January 2020	P
June 2020	V
January 2021	L
June 2021	S
January 2022	Vacant
June 2022	M
January 2023	Q
June 2023	O

We have,

- P gets in the leap year.
- Only four persons get between P and Q.
- The number of persons getting the order after Q is **one less** than the number of persons getting the order before N.
- None of the year and month is vacant before N and after Q.

From the above condition, there are three possibilities.

@QuizByMickey

	Case-1	Case-2	Case-1a	Case-2a	Case-2a(1)
January 2018		Q			
June 2018					N
January 2019			N	N	
June 2019	N				
January 2020	P		P		
June 2020		P		P	P
January 2021					
June 2021					
January 2022					
June 2022	Q				
January 2023			Q	Q	
June 2023					Q

Again we have,

- U gets immediately before the one who gets exactly one year before R, who gets in an odd numbered year.
- At least one person gets after R.
- P and U do not get the order consecutively.
- U does not get in June.

From the above condition, there are Case-1 gets eliminated.

	Case-1a	Case-2a	Case-2a(1)
January 2018	U	U	U
June 2018			N
January 2019	N	N	
June 2019	R	R	R
January 2020	P

June 2019	R	R
January 2020	P	P
June 2020	V	V
January 2021	L	L
June 2021	S	Vacant
January 2022	Vacant	S
June 2022	M	M
January 2023	Q	Q
June 2023	O	O

Answer: D

20. Questions

Final Arrangement:

Month and Year	Persons
January 2018	U
June 2018	T
January 2019	N
June 2019	R
January 2020	P
June 2020	V
January 2021	L
June 2021	S
January 2022	Vacant
June 2022	M
January 2023	Q
June 2023	O

@QuizByMickey

We have,

- P gets in the leap year.
- Only four persons get between P and Q.
- The number of persons getting the order after Q is **one less** than the number of persons getting the order before N.
- None of the year and month is vacant before N and after Q.

From the above condition, there are three possibilities.

	Case-1	Case-2	Case-1a	Case-2a	Case-2a(1)
January 2018		Q			
June 2018					N
January 2019			N	N	
June 2019	N				
January 2020	P		P		
June 2020		P		P	P
January 2021					
June 2021					
January 2022					
June 2022	Q				
January 2023			Q	Q	
June 2023					Q

Again we have,

- U gets immediately before the one who gets exactly one year before R, who gets in an odd numbered year.
- At least one person gets after R.
- P and U do not get the order consecutively.
- U does not get in June.

From the above condition, there are Case-1 gets eliminated.

	Case-1a	Case-2a	Case-2a(1)
January 2018	U	U	U
June 2018			N
January 2019	N	N	
June 2019	R	R	R
January 2020	P		
June 2020		P	P
January 2021			
June 2021			
January 2022			
June 2022			
January 2023	Q	Q	
June 2023			Q

@QuizByMickey

Again we have,

- The number of persons getting the order before N is **one less** than the number of persons getting the order after S.
- No one gets between S and L, who gets in January of an odd numbered year.
- Only two persons get between O and S.
- M gets the order two persons before O but not in the month having 31 days.

From the above condition, there are Case-2a(1) gets eliminated.

	Case-1a	Case-2a	Case-2a(1)	Case-1a(1)
January 2018	U	U	U	U
June 2018			N	
January 2019	N	N		N
June 2019	R	R	R	R
January 2020	P	Vacant		P
June 2020		P	P	
January 2021	L			L
June 2021	S			Vacant
January 2022	Vacant	S		S
June 2022	M		S	M
January 2023	Q	Q	L	Q
June 2023	O	O	Q	O

Again we have,

- As many persons get the order between R and the one who gets three persons after P as between T and V.
- Not more than two persons get between L and V.
- V gets the order and the vacant month is not consecutive years.

From the above condition, there are Case-1a(1) gets eliminated. Case-1a shows the final arrangement.

@QuizByMickey

	Case-1a	Case-1a(1)
January 2018	U	U
June 2018	T	T
January 2019	N	N
June 2019	R	R
January 2020	P	P
June 2020	V	V
January 2021	L	L
June 2021	S	Vacant
January 2022	Vacant	S
June 2022	M	M
January 2023	Q	Q
June 2023	O	O

Answer: C (Only one person gets between the given pair of persons except in option (c))
