

1. Questions

Study the following information carefully and answer the questions given below:

Eleven persons – P, Q, R, S, T, U, V, W, X, Y, and Z – live on different floors of a fourteen-storey building. The lowermost floor is numbered one, the one above it is numbered two and so on until the topmost floor is numbered fourteen. Three floors are vacant. No two persons live on the same floor. No two vacant floors are adjacent to each other.

R lives on a prime-numbered floor above the fifth floor. Only three floors are between R and Y. Only two persons live between Y and S. S lives immediately below a vacant floor. At least six persons live between S and U, who does not live on the 12th floor. V lives two floors below U. The number of floors above V are two less than the number of floors below X. P lives four persons above X, but does not live adjacent to the vacant floor. Only four persons live between W and Z, where both of them are not living on the ground floor. The number of persons living between T and Q is one more than the number of persons living between X and Z. Q is neither an immediate neighbour of W and X nor live adjacent to the vacant floor.

Who among the following persons lives exactly between X and R?

- a. The one who lives immediately below P
- b. The one who lives on 7th floor
- c. The one who lives four floors above S
- d. T
- e. The one who lives two floors below vacant floor

2. Questions

How many persons live between V and S as per the final arrangement?

- a. 6
- b. 4
- c. 5
- d. 7
- e. Can't be determined

@QuizByMickey

3. Questions

The number of persons living between Q and U is the same as the number of floors between ____ and ____ respectively?

- a. W, S
- b. T, and the nearest vacant floor of T
- c. P, Z
- d. W and the one who lives immediately below T

e. None of these

4. Questions

If all the persons lived in alphabetical order from top floor to bottom floor, then who would occupy the third floor? (Consider vacant floors as they are; only persons are reordered.)

- a. Y
- b. S
- c. Q
- d. P
- e. None of these

5. Questions

Which of the following statements is true as per the final arrangement?

- a. There are two floors between Y and U
- b. S does not live immediately above a vacant floor
- c. T lives above V
- d. X lives exactly in the middle of the building
- e. P and X live on adjacent floors

6. Questions

Each question is followed by two statements, I and II. Determine whether the statements are sufficient to answer the question and choose from the options given in each of the following questions.

Eight people – A, B, C, D, E, F, G, and H – are seated around a circular table, some facing the center and some facing outside. Who sits immediate right of C?

Statement I: B sits third to the left of A, who is facing the center. C is not an immediate neighbor of A and B. The one who sits opposite to A is facing outside.

Statement II: C sits second to the left of D, who faces outside. G, who is an immediate neighbor of C, faces the center. F sits exactly opposite to C. E and F are not an immediate neighbour.

- a. Only I is sufficient
- b. Both I and II together are sufficient
- c. Either I or II is sufficient
- d. Only II is sufficient
- e. Both I and II, even together are not sufficient

7. Questions

A five-letter word using only the letters A, E, I, O, U (without repetition) is formed. What is the exact arrangement of the letters?

Statement I: The word starts and ends with a vowel that comes alphabetically before 'I'. The second letter is not 'U' and 'O' comes somewhere after 'U' from the left end.

Statement II: 'U' is placed to the immediate left of 'I'. 'A' is not placed adjacent to 'O'. 'O' is not at the extreme ends.

- a. Only I is sufficient
- b. Both I and II together are sufficient
- c. Either I or II is sufficient
- d. Only II is sufficient
- e. Both I and II, even together are not sufficient

8. Questions

Seven friends – P, Q, R, S, T, U, and V – scored different marks in an exam. Who scored the third-highest marks?

Statement I: R scored more than only P and Q. V scored less than S but more than T. U scored the second-highest.

Statement II: S scored more than R but less than U. V scored more than Q and R but less than S. T scored more than P but less than R.

- a. Only I is sufficient
- b. Both I and II together are sufficient
- c. Either I or II is sufficient
- d. Only II is sufficient
- e. Both I and II, even together are not sufficient

9. Questions

Eight persons — A, B, C, D, E, F, G, and H — live on an eight-floor building (floors are numbered as 1 to 8 from bottom to top respectively). Each floor has exactly one person. Who lives on the 5th floor?

Statement I: C lives immediately above F. Only two persons live between A and F. E lives on an even-numbered floor below A. D lives immediately above H but not immediately below G.

Statement II: Only three persons live between B and D. G lives on one of the floors above C but not immediately above. H neither lives on the top-most nor on the bottom-most floor.

- a. Only I is sufficient

- b. Both I and II together are sufficient
- c. Either I or II is sufficient
- d. Only II is sufficient
- e. Both I and II, even together are not sufficient

10. Questions

In a certain code language, what is the code for the word "BLAZER"?

Statement I: The code for "BLADE" is written as "7 1 9 3 8", "GLAZE" is written as "21 1 9 25 8" and "DOZEN" is written as "3 23 25 8 5". Each letter is uniquely mapped to a digit/number.

Statement II: The code for "MANNER" is written as "4 9 5 5 8 6", "TURN" is written as "0 2 6 5" and "BOAT" is written as "7 23 9 0". Each letter is uniquely mapped to a digit/number.

- a. Only I is sufficient
- b. Both I and II together are sufficient
- c. Either I or II is sufficient
- d. Only II is sufficient
- e. Both I and II, even together are not sufficient

11. Questions

Study the following information carefully and answer the questions given below:

Six friends P, Q, R, S, T, and U were standing on six different stairs of a staircase containing 10 stairs which were numbered 1- 10 from bottom to top respectively. Each of them rolled the dice and moved along the staircase as per the number they rolled. Each person rolled a different number from 1 to 6. There can be more than one person standing on the same stair after rearrangement.

R's stair number was thrice that of U, who did not stand on stair number 1. Q stands two stairs above U. T stands immediately above P, who was at a gap of one stair from S. S rolled the same number as his stair number. S and U rolled consecutive numbers. T rolled a number twice that of P. The sum of the numbers rolled by Q and R is 7, where the number rolled by Q is more than R.

Based on the below conditions, the persons interchanged their positions after rolling the dice.

Conditions:

The person who rolled 1: Swap positions with the person who rolled 4.

The person who rolled 2: Go four steps up, if not possible, go four steps down.

The person who rolled 3: Swap positions with the person/persons immediately below.

The person who rolled 6: Go to the stair number that is thrice that of the current stair number, if not possible, then go to stair number 2.

In how many stairs more than one person is standing after the rearrangement?

- a. 2
- b. 3
- c. 1
- d. 5
- e. 4

12. Questions

What is the stair number of R after the rearrangement?

- a. 5
- b. 9
- c. 8
- d. 7
- e. 6

13. Questions

How many persons were standing between Q and T after the rearrangement?

- a. None
- b. One
- c. Two
- d. Three
- e. Four

14. Questions

Who among the following persons rolled the highest number of dice?

- a. P
- b. Q
- c. T
- d. U
- e. R

@QuizByMickey

15. Questions

Which of the following combinations is true as per the final arrangement?

- a. U – Stair 5

- b. P – Stair 6
- c. T – Stair 4
- d. S – Stair 7
- e. Q – Stair 9

16. Questions

A word and number arrangement machine, when given an input sequence of numbers and words, rearranges them by following a particular rule in each step. The following is an illustration of input sequence and its rearrangement:

Input: 32 Bronze 19 Medal Win 13 This 35 41 Nation

Step I: This 32 Bronze 19 Medal Win 35 41 Nation 13

Step II: Bronze This 32 Medal Win 35 41 Nation 13 19

Step III: Nation Bronze This 32 Medal Win 35 13 19 41

Step IV: Win Nation Bronze This Medal 35 13 19 41 32

Step V: Medal Win Nation Bronze This 13 19 41 32 35

Step V is the final output. Find out different steps for the following input sequence based on the above logics.

Input: 11 is 72 the Practice 31 36 key to 74 37 Success

How many steps are required to complete the arrangement?

- a. IV
- b. V
- c. III
- d. VII
- e. VI

17. Questions

Which of the following will be the second number to the right of 'key' in the final step?

- a. 37
- b. 31
- c. 11
- d. 36
- e. 72

18. Questions

How many elements are between 'The' and '11' in the second last step?

- a. Six
- b. Three
- c. Seven
- d. Five
- e. None

19. Questions

The number of elements to the left of 'Is' in step IV is the same as the number of elements to the right of ____ in step III.

- a. 74
- b. Success
- c. 11
- d. Key
- e. None of these

20. Questions

Which of the following is the penultimate step?

- a. Success the key Practice to is 11 31 37 36 72 74
- b. key Practice to is 72 the 74 Success 11 31 37 36
- c. the key to is Practice 36 74 37 Success 11 31 72
- d. Practice the key to is 11 31 37 74 Success 36 72
- e. None of these

Explanations:

@QuizByMickey

1. Questions

Final arrangement:

Floors	Persons
14	U
13	Vacant
12	V
11	R
10	Q
9	P
8	Z
7	Y
6	T
5	X
4	Vacant
3	S
2	W
1	Vacant

We have,

- R lives on a prime-numbered floor above the fifth floor.
- Only three floors between R and Y.

From the above conditions, we have 4 possible cases:

@QuizByMickey

Floors	Case-1	Case-2	Case-3	Case-4
	Persons	Persons	Persons	Persons
14				
13				R
12				
11		Y	R	
10				
9				Y
8				
7	R	R	Y	
6				
5				
4				
3	Y			
2				
1				

Again, we have,

- Only two persons live between Y and S.
- S lives immediately below a vacant floor.
- At least six persons live between S and U, who does not live on the 12th floor.
- V lives two floors below U.
- The number of floors above V are two less than the number of floors below X.

From the above conditions, Case 1 and Case 2 gets eliminated. Case 3 split into case 3a.

@QuizByMickey

Floors	Case-1	Case-2	Case-3	Case-3a	Case-4
	Persons	Persons	Persons	Persons	Persons
14			U	U	U
13					R
12			V	V	V
11		Y	R	R	
10		Vacant			
9	Vacant				Y
8	S	Vacant			Vacant
7	R	R	Y	Y	
6	Vacant	Vacant		Vacant	Vacant
5		S	X	X	X
4	Vacant		Vacant	Vacant	Vacant
3	Y		S		S
2				Vacant	
1				S	

Again, we have,

- P lives four persons above X, but does not live adjacent to the vacant floor.
- Only four persons live between W and Z, where both of them are not living on the ground floor.
- The number of persons living between T and Q is one more than the number of persons living between X and Z.

From the above condition case 3a gets eliminated.

@QuizByMickey

Floors	Case-3	Case-3a	Case-4
	Persons	Persons	Persons
14	U	U	U
13	Vacant	W/Z	R
12	V	V	V
11	R	R	P
10	T/Q	P	Z
9	P	T/Q	Y
8	Z	W/Z	Vacant
7	Y	Y	T/Q
6	T/Q	Vacant	Vacant
5	X	X	X
4	Vacant	Vacant	Vacant
3	S	T/Q	S
2	W	Vacant	W
1	Vacant	S	T/Q

Again, we have,

- Q is neither an immediate neighbour of W and X nor live adjacent to the vacant floor.

From the above condition case 4 gets eliminated.

Case 3 shows the final arrangement.

@QuizByMickey

Floors	Case-3	Case-4
	Persons	Persons
14	U	U
13	Vacant	R
12	V	V
11	R	P
10	Q	Z
9	P	Y
8	Z	Vacant
7	Y	T/Q
6	T	Vacant
5	X	X
4	Vacant	Vacant
3	S	S
2	W	W
1	Vacant	T/Q

Answer: A

2. Questions

Final arrangement:

@QuizByMickey

Floors	Persons
14	U
13	Vacant
12	V
11	R
10	Q
9	P
8	Z
7	Y
6	T
5	X
4	Vacant
3	S
2	W
1	Vacant

We have,

- R lives on a prime-numbered floor above the fifth floor.
- Only three floors between R and Y.

From the above conditions, we have 4 possible cases:

@QuizByMickey

Floors	Case-1	Case-2	Case-3	Case-4
	Persons	Persons	Persons	Persons
14				
13				R
12				
11		Y	R	
10				
9				Y
8				
7	R	R	Y	
6				
5				
4				
3	Y			
2				
1				

Again, we have,

- Only two persons live between Y and S.
- S lives immediately below a vacant floor.
- At least six persons live between S and U, who does not live on the 12th floor.
- V lives two floors below U.
- The number of floors above V are two less than the number of floors below X.

From the above conditions, Case 1 and Case 2 gets eliminated. Case 3 split into case 3a.

@QuizByMickey

Floors	Case-1	Case-2	Case-3	Case-3a	Case-4
	Persons	Persons	Persons	Persons	Persons
14			U	U	U
13					R
12			V	V	V
11		Y	R	R	
10		Vacant			
9	Vacant				Y
8	S	Vacant			Vacant
7	R	R	Y	Y	
6	Vacant	Vacant		Vacant	Vacant
5		S	X	X	X
4	Vacant		Vacant	Vacant	Vacant
3	Y		S		S
2				Vacant	
1				S	

Again, we have,

- P lives four persons above X, but does not live adjacent to the vacant floor.
- Only four persons live between W and Z, where both of them are not living on the ground floor.
- The number of persons living between T and Q is one more than the number of persons living between X and Z.

From the above condition case 3a gets eliminated.

@QuizByMickey

Floors	Case-3	Case-3a	Case-4
	Persons	Persons	Persons
14	U	U	U
13	Vacant	W/Z	R
12	V	V	V
11	R	R	P

1	Vacant	S	T/Q

Again, we have,

- Q is neither an immediate neighbour of W and X nor live adjacent to the vacant floor.

From the above condition case 4 gets eliminated.

Case 3 shows the final arrangement.

@QuizByMickey

Floors	Case-3	Case-4
	Persons	Persons
14	U	U
13	Vacant	R
12	V	V
11	R	P
10	Q	Z
9	P	Y
8	Z	Vacant
7	Y	T/Q
6	T	Vacant
5	X	X
4	Vacant	Vacant
3	S	S
2	W	W
1	Vacant	T/Q

Answer: B

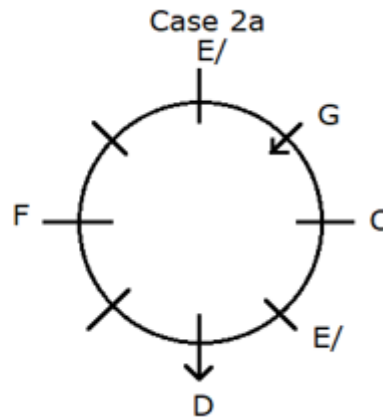

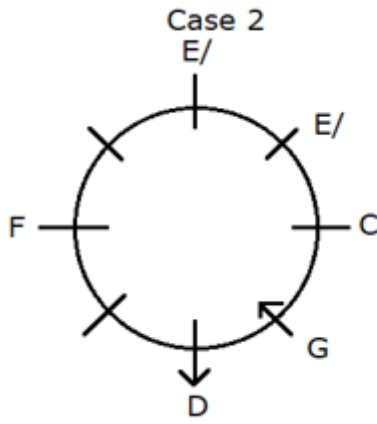

6. Questions

Answer: E

I). B sits third to the left of A, who is facing the center. C is not an immediate neighbor of A and B. The one who sits opposite to A is facing outside.

II). C sits second to the left of D, who faces outside. G, who is an immediate neighbor of C, faces the center. F sits exactly opposite to C. E and F are not an immediate neighbour.

Individually or by combining both the statements, we can't get the answer. Hence, both the statements are not sufficient to answer the question.

7. Questions

Answer: E

I). The word starts and ends with a vowel that comes alphabetically before 'I'. The second letter is not 'U', and 'O' comes somewhere after 'U' from the left end.

Case 1: A I U O E

Case 2: E I U O A

II). 'U' is placed to the immediate left of 'I'. 'A' is not placed adjacent to 'O'. 'O' is not at the extreme ends.

Case 1: U I O E A

Case 2: A U I O E

Case 3: A E O U I

Case 4: E O U I A

Individually or by combining both the statements, we can't get the answer. Hence, both the statements are not sufficient to answer the question.

8. Questions

Answer: C

I). R scored more than only P and Q. V scored less than S but more than T. U scored the second-highest.

$S > U > V > T > R > P/Q > Q/P$

II). S scored more than R but less than U. V scored more than Q and R but less than S. T scored more than P but less than R.

Case 1: $U > S > V > Q > R > T > P$

Case 2: $U > S > V > R > Q > T > P$

Case 3: $U > S > V > R > T > P > Q$

Hence, either the statement I or II is sufficient to answer the question.

9. Questions**Answer: E**

Individually or by combining both the statements, we can't get the answer. Hence, both the statements are not sufficient to answer the question.

10. Questions**Answer: B** (By combining both the statements we get, "BLAZER" is coded as "7192586".)

Letters	Codes
B	7
L	1
A	9
D	3
E	8
G	21
Z	25
M	4
N	5
R	6
T	0
U	2
W	27
O	23

11. Questions**Final arrangement:**

@QuizByMickey

Stairs	Initial position	Number rolled on dice	After rearrangement
10			
9			
8	T	2	
7	P	1	Q
6	R	3	S, U
5	S	5	R
4	Q	4	P, T
3			
2	U	6	
1			

We have,

- R's stair number was thrice that of U, who did not stand on stair number 1.
- Q stands two stairs above U.

From the above conditions, we have 2 possible cases:

Stairs	Case-1		Case-2	
	Initial position	Number rolled on dice	Initial position	Number rolled on dice
10				
9			R	
8				
7				
6	R			
5			Q	
4	Q			
3			U	
2	U			
1				

Again, we have,

- T stands immediately above P, who was at a gap of one stair from S.
- S rolled the same number as his stair number.
- S and U rolled consecutive numbers.

From the above conditions, the 2 cases are:

Stairs	Case-1		Case-2	
	Initial position	Number rolled on dice	Initial position	Number rolled on dice
10				
9			R	
8	T			
7	P		T	
6	R		P	
5	S	5	Q	
4	Q		S	4
3			U	3/5
2	U	6/4		
1				

Again, we have,

- T rolled a number twice that of P
- The sum of the numbers rolled by Q and R is 7, where the number rolled by Q is more than R.

To fix the number rolled on dice in case-1, refer to the table below,

	Case-1a	Case-1b	Case-1c
T	2	4	6
P	1	2	3
Q	4	1/6	
R	3	1/6	
U	6		
S	5		

@QuizByMickey

From the above condition, case-2 gets eliminated because the sum of the numbers rolled by Q and R is 7, which is not satisfied.

Stairs	Case-1		Case-2	
	Initial position	Number rolled on dice	Initial position	Number rolled on dice
10				
9			R	
8	T	2		
7	P	1	T	2
6	R	3	P	1
5	S	5	Q	
4	Q	4	S	4
3			U	3/5
2	U	6		
1				

The person who rolled 1: Swap positions with the person who rolled 4.

The person who rolled 2: Go four steps up, if not possible, go four steps down.

The person who rolled roll 3: Swap positions with the person/persons nearest below.

The person who rolled 6: Go to the stair number that is thrice that of the current stair number, if not possible, then go to stair number 2.

Stairs	Initial position	Number rolled on dice	After rearrangement

Answer: A

12. Questions

Final arrangement:

Stairs	Initial position	Number rolled on dice	After rearrangement
10			
9			
8	T	2	
7	P	1	Q
6	R	3	S, U
5	S	5	R
4	Q	4	P, T
3			
2	U	6	
1			

We have,

- R's stair number was thrice that of U, who did not stand on stair number 1.
- Q stands two stairs above U.

From the above conditions, we have 2 possible cases:

Stairs	Case-1		Case-2	
	Initial position	Number rolled on dice	Initial position	Number rolled on dice
10				
9			R	
8				
7				
6	R			
5			Q	
4	Q			
3			U	
2	U			
1				

Again, we have,

- T stands immediately above P, who was at a gap of one stair from S.
- S rolled the same number as his stair number.
- S and U rolled consecutive numbers.

From the above conditions, the 2 cases are:

Stairs	Case-1		Case-2	
	Initial position	Number rolled on dice	Initial position	Number rolled on dice
10				
9			R	
8	T			
7	P		T	
6	R		P	
5	S	5	Q	
4	Q		S	4
3			U	3/5
2	U	6/4		
1				

Again, we have,

- T rolled a number twice that of P
- The sum of the numbers rolled by Q and R is 7, where the number rolled by Q is more than R.

To fix the number rolled on dice in case-1, refer to the table below,

	Case-1a	Case-1b	Case-1c
T	2	4	6
P	1	2	3
Q	4	1/6	
R	3	1/6	
U	6		
S	5		

@QuizByMickey

From the above condition, case-2 gets eliminated because the sum of the numbers rolled by Q and R is 7, which is not satisfied.

Stairs	Case-1		Case-2	
	Initial position	Number rolled on dice	Initial position	Number rolled on dice
10

Answer: C

16. Questions

A word and a number is swapped in every step.

The words are arranged based on the number of letters present in the word such that the word which has the even number of letters arranged in ascending order at the left end followed by the word which has the odd number of letters arranged in ascending order. If the words have the same number of letters then they are arranged in dictionary order.

Numbers are arranged based on the prime numbers followed by the non prime numbers in ascending at the right end . The smallest prime number is placed at the right end then the second smallest prime number is placed and so on. After placing all the prime numbers, the non prime numbers start arranging.

Input: 11 is 72 the Practice 31 36 key to 74 37 Success

Step I: is 72 the Practice 31 36 key to 74 37 Success 11

Step II: to is 72 the Practice 36 key 74 37 Success 11 31
