

1. Questions

Study the following information carefully and answer the questions given below:

Nine persons- A, B, C, D, E, F, G, H and I are sitting around a square table where there are twelve chairs. Two persons sit on each side of the table and one person sits at each corner of the table. All are facing towards the centre. Three chairs are vacant and none of them adjacent chairs are vacant.

H sits in the corner of the table and is an immediate neighbour of C, who does not sit opposite to G. Two persons sit between F and H, when counted from the left of H. F neither sits adjacent to the vacant seat nor in the corner of the table. B sits second to the right of D. B neither sits in the middle of the table nor sits adjacent to G. Four persons sit between C and G, who sits neither third to the right of H nor opposite to H. D is not adjacent to C and G. B doesn't sit to the immediate right of G. The number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E).

Who among the following person sits third to the right of the one who sits immediate left of I?

- a. H
- b. C
- c. B
- d. E
- e. A

2. Questions

How many persons sit between the one who sits immediate right of E and A when counted from the right of A?

- a. Two
- b. Three
- c. One
- d. Four
- e. None

@QuizByMickey

3. Questions

If the position of D and F are interchanged, in the same way, the position of B and H are interchanged. Then who among the following person sits second to the right of F?

- a. B
- b. D
- c. G
- d. I

e. H

4. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. A sits third to the right of G
- b. Two persons sit between F and H when counted from the left of F
- c. Three persons sit between C and G when counted from the left of C
- d. D and I are immediate neighbours
- e. B and E are sitting in the same side of the table

5. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which of the following does not belong to that group?

- a. The one who sits second to the right of H
- b. The one who sits third to the right of F
- c. The one who sits second to the right of C
- d. The one who sits immediate left of D
- e. The one who faces A

6. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements disregarding the commonly known facts.

Statements:

Only a few information is message;

All thoughts are believe;

No information is source;

All messages are details;

only a few sources are thoughts;

Conclusions I: All thoughts can never be information

Conclusions II: Some details are not believe

Conclusions III: No believe being information is a possibility

- a. Only conclusion I and II follow
- b. Only conclusion I and III follow

@QuizByMickey

- c. Only conclusion II follows
- d. Either conclusion II or III follows and conclusion I follows
- e. All conclusions I, II and III follow

7. Questions

Statements:

No guava is pineapple;

Only watermelon is orange;

only a few mango is grapes;

All pineapples are grapes;

Only a few watermelon is guava

Conclusions I: All mangoes being pineapples is not a possibility

Conclusions II: Some grapes are not guava

Conclusions III: All guava can be grapes

- a. Only conclusion I and III follow
- b. Only conclusion III follows
- c. Only conclusion I and II follow
- d. Neither conclusion I nor II nor III follows
- e. All conclusions I, II and III follow

8. Questions

Statements:

Some alluvial is laterite;

Only a few alluvial is andisol;

Only laterite is vertisol;

No andisol is histosol;

All entisol is histosol

Conclusions I: All histosol may be alluvial

Conclusions II: All andisol are definitely not vertisol

Conclusions III: Some entisol being not andisol is a possibility.

- a. Only conclusion III follows
- b. Only conclusion I and III follow

@QuizByMickey

- c. Only conclusions I and II follow
- d. Neither conclusion I nor II nor III follows
- e. Only conclusion II and III follow

9. Questions

Statements:

Only a few steady is sustain;
All growth is impact;
Only a few growth is develop;
Some impact is create;
No develop is steady

Conclusions I: Some sustain being not develop is a possibility

Conclusions II: All growth may not be steady

Conclusions III: some create being develop is not a possibility

- a. Only conclusion II follows
- b. Only conclusion I and II follow
- c. Only conclusion II and III follow
- d. Neither conclusion I nor II nor III follows
- e. All conclusions I, II and III follow

10. Questions

Statements:

Only Tamilnadu is Kerala;
No Telangana is Assam;
Only a few Karnataka is Tamilnadu;
All Telangana is Delhi;
Some Karnataka is Telangana

Conclusions I: Some Telangana is Kerala

Conclusions II: No Kerala is Telangana

Conclusions III: All Assam being Karnataka is a possibility

- a. Only conclusion III follows
- b. Only conclusion I and II follow

@QuizByMickey

- c. Only conclusion II follows
- d. Only conclusions II and III follow
- e. Neither conclusion I nor II nor III follows

11. Questions

Study the following information carefully and answer the questions given below.

Seven persons - Q, R, S, T, U, V, and W - are going to market one after another in a sequence. They all buy different types of sarees, viz., Banarasi, Uppada, Gadwal, Patola, Mysore silk, Kanjivaram, and Sambalpuri.

Only four persons buy sarees between V and the one who buys Gadwal saree. As many persons buy after V as before the one who buys Kanjivaram saree. The one who buys Patola saree buys two persons after S, who buys a saree immediately after W. Neither W nor S buys Gadwal saree. V doesn't buy Patola saree. S doesn't buy a saree immediately before V. One person buys a saree between the one who buys Uppada saree and the one who buys Patola saree. The number of persons buying sarees between S and the one who buys Banarasi saree is **one more than** the number of persons buying between the one who buys Sambalpuri saree and T. T buys neither Gadwal saree nor Kanjivaram saree. At least one person buys a saree after T. The one who buys Mysore silk saree buys adjacent to both S and Q. R buys a saree before U.

As many persons buy a saree before Q as after ____.

- a. The one who buys a saree immediately before W
- b. V
- c. The one who buys a saree three persons after R
- d. The one who buys Kanjivaram saree
- e. S

12. Questions

Which of the following statements is TRUE with respect to the final arrangement?

- a. The one who buys Patola saree buys immediately before T
- b. Q buys the Sambalpuri saree
- c. No one buy a saree between the one who buys Uppada and W
- d. As many persons buy sarees between W and T as after the one who buys Banarasi saree
- e. T and U buy Gadwal and Mysore silk sarees respectively

@QuizByMickey

13. Questions

How many persons buy sarees between U and V as per the final arrangement?

- a. Three

- b. Four
- c. One
- d. None
- e. Two

14. Questions

If Q is related to Mysore silk saree, S is related to Sambalpuri saree in a certain way, then in the same way. Who among the following person is related to Gadwal saree?

- a. S
- b. The one who buys a saree immediately before the one who buys Patola saree
- c. T
- d. The one who buys a saree exactly between U and S
- e. Q

15. Questions

Which of the following sarees does V buy?

- a. Uppada
- b. Kanjivaram
- c. Patola
- d. Sambalpuri
- e. Banarasi

16. Questions

If the 2nd letter from the right end of all the words are taken and arrange them in alphabetical order from left to right without giving any space, then take the third, sixth, seventh and tenth letters from the left end of the series. Then what is the 3rd letter from the right end of the meaningful word which is formed from the taken four letters (using one letter once only)? If no such word is formed, mark your answer as 'X' or else if more than one word is formed mark your answer as 'K'.

- I). Green, White, Black, Brown
 - II). Grey, Crow, Rose, Lily
 - III). Duck, Bear, Door, Rise
 - IV). Great, Brain, Bread, Words
- a. E

- b. L
- c. D
- d. K
- e. X

17. Questions

Which of the following has a minimum number of pairs of letters are there in the words (both forward and backward) which have as many letters between them as there are in the alphabetical series?

I). RELIGION

II). NARCOTICS

III). PREVIOUS

- a. Only II
- b. Only I
- c. Only II and III
- d. Only III
- e. Only I and III

18. Questions

If in the word "CONSIDER" all the letters which are coming in the first half of the alphabetical series (A–M) are replaced by their opposite letters (i.e., A - Z, B - Y, etc.) and the remaining letters are replaced by the third preceding letter, and then all the letters are arranged in alphabetical order from left to right, what is the sum of the place values (as per the alphabetical order) of the even position letters from the left in the word thus formed?

- a. 52
- b. 48
- c. 54
- d. 46
- e. 74

@QuizByMickey

19. Questions

Use the following rule for the words given below:

- The third consonant from the left in the first word,
- The last vowel from the left in the second word,
- The consonant with the highest place value (A=1, B=2 ... Z=26) in the third word, and
- The second letter from the left in the fourth word.

Then identify which option below forms a meaningful word (keep the order of letters the same from left to right).

- Product, Information, Skilled, Training
- Clever, Academic, Reasoning, Pattern
- Bright, Educator, Mentor, Concept
- Puzzle, Operator, Gradual, Session
- None of these

20. Questions

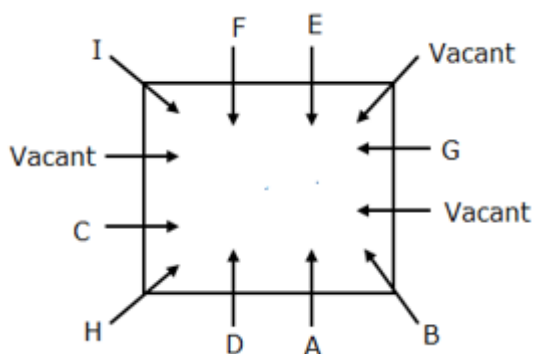

If in the given number “72649513857462”, the first six digits are arranged in ascending order from left to right, and then the last eight digits are arranged in descending order from left to right. After that, multiply the first two digits, the next two digits, and so on from the left end. If the multiplication result is a two-digit number, add its digits to obtain a single-digit number. After that, arrange all the obtained digits in ascending order from left to right. What will be the resultant value when the digit which is seventh from the left end is multiplied with the digit which is second from the left end in the number thus formed after the final arrangement?

- 32
- 45
- 36
- 18
- 27

Explanations:

1. Questions

Final arrangement:

@QuizByMickey

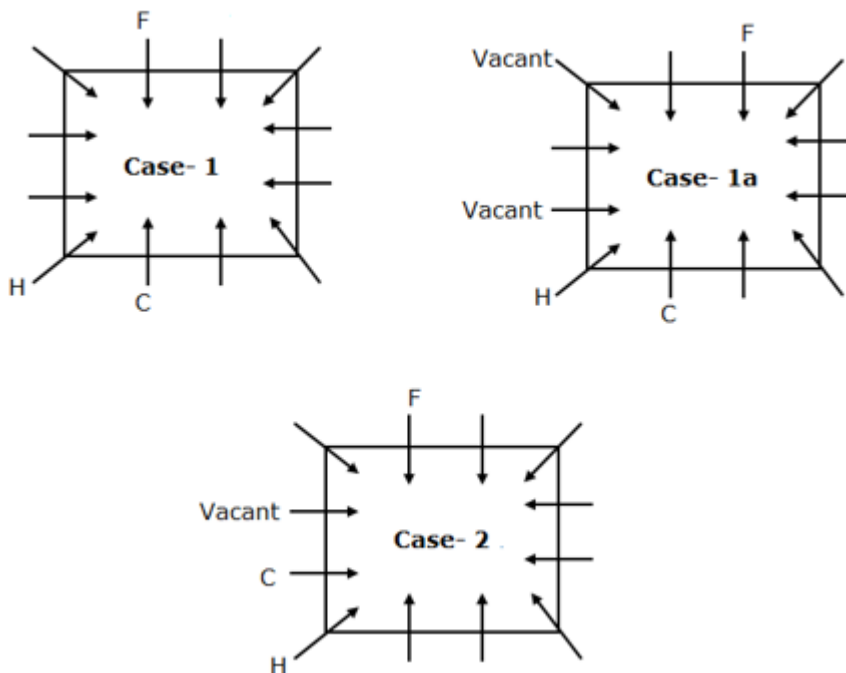

We have,

- H sits in the corner of the table and is an immediate neighbour of C, who does not sit opposite

to G.

- Two persons sit between F and H, when counted from the left of H.
- F neither sits adjacent to the vacant seat nor in the corner of the table.

From the above conditions, there are three possibilities.

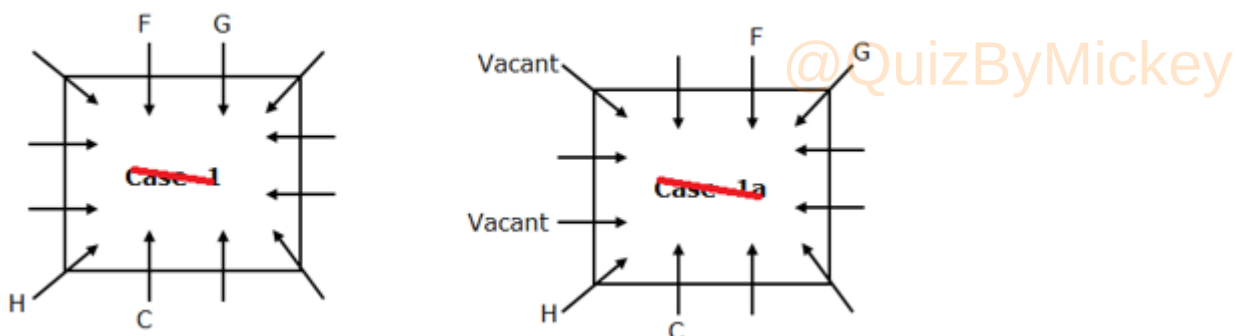

Again, we have,

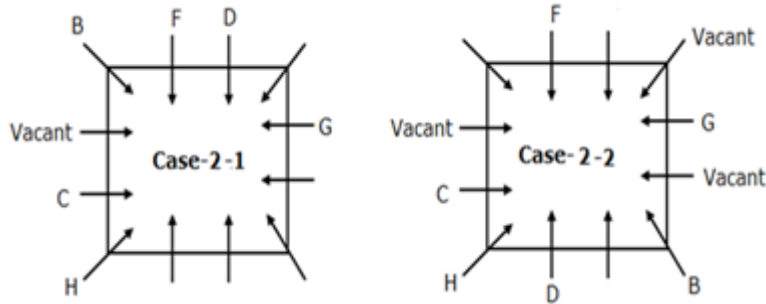

- B sits second to the right of D.
- B neither sits in the middle of the table nor sits adjacent to G.
- Four persons sit between C and G, who sits neither third to the right of H nor opposite to H.
- D is not adjacent to C and G.
- B doesn't sit to the immediate right of G.

From the above conditions, there are two more possibilities.

Case- 2 is split into case- 2- 1 and case- 2-2.

From the above conditions case-1 and case-1a get eliminated because B sits second to the right of D, which is not satisfied.

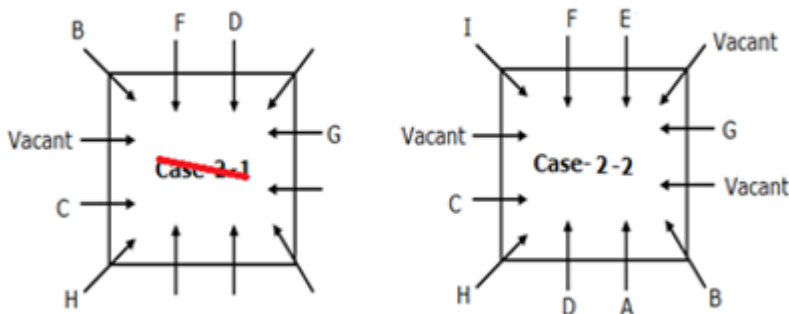

Again, we have,

- The number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E).

From the above conditions case-2-1 gets eliminated because the number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E), which is not satisfied.

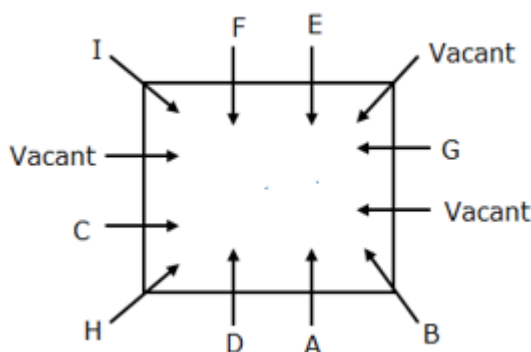

Hence case-2-2 shows the final arrangement

Answer: B

2. Questions

Final arrangement:

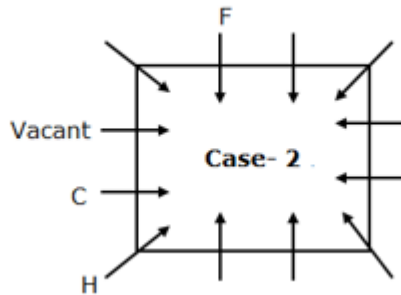

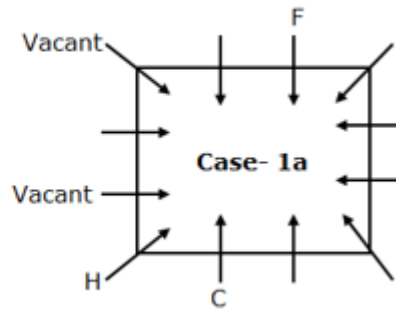

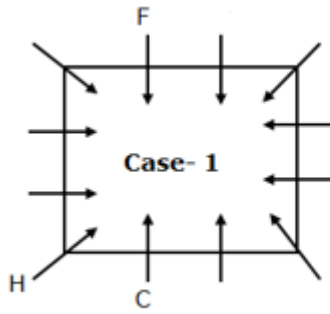

@QuizByMickey

We have,

- H sits in the corner of the table and is an immediate neighbour of C, who does not sit opposite to G.
- Two persons sit between F and H, when counted from the left of H.
- F neither sits adjacent to the vacant seat nor in the corner of the table.

From the above conditions, there are three possibilities.

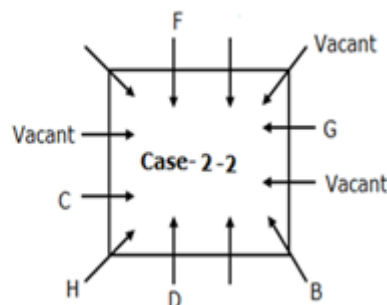

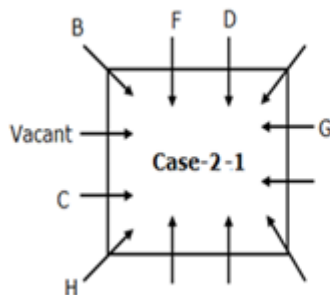

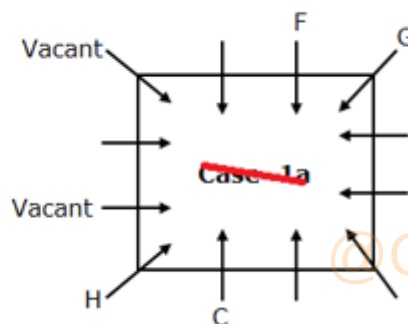

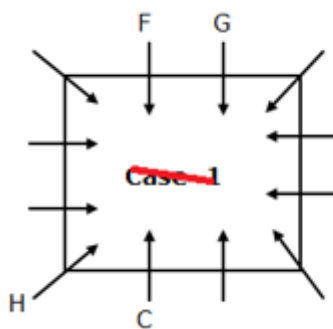

Again, we have,

- B sits second to the right of D.
- B neither sits in the middle of the table nor sits adjacent to G.
- Four persons sit between C and G, who sits neither third to the right of H nor opposite to H.
- D is not adjacent to C and G.
- B doesn't sit to the immediate right of G.

From the above conditions, there are two more possibilities.

Case- 2 is split into case- 2- 1 and case- 2-2.

From the above conditions case-1 and case-1a get eliminated because B sits second to the right of D, which is not satisfied.

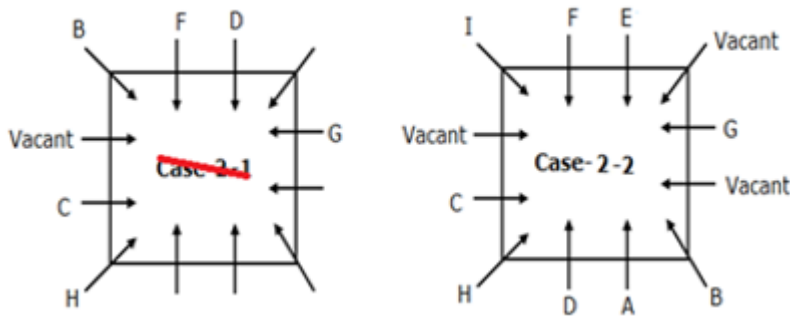

Again, we have,

- The number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E).

From the above conditions case-2-1 gets eliminated because the number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E), which is not satisfied.

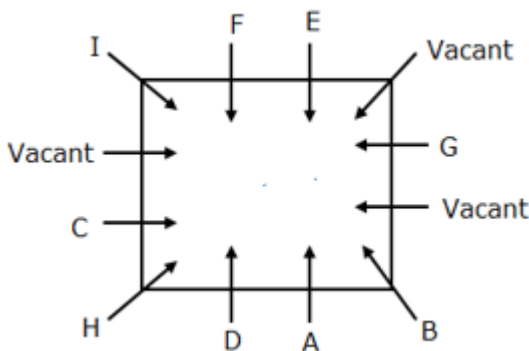

Hence case-2-2 shows the final arrangement

Answer: B

3. Questions

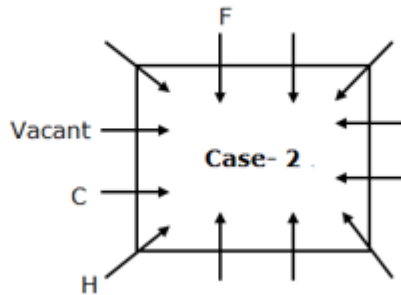

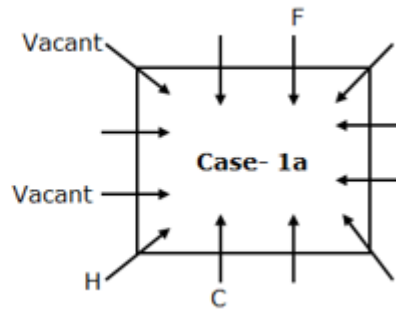

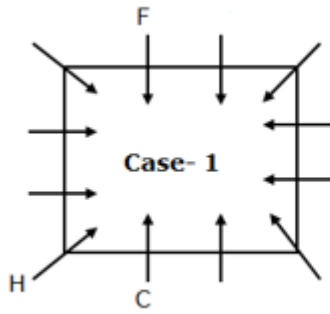

Final arrangement:

We have,

- H sits in the corner of the table and is an immediate neighbour of C, who does not sit opposite to G.
- Two persons sit between F and H, when counted from the left of H.
- F neither sits adjacent to the vacant seat nor in the corner of the table.

From the above conditions, there are three possibilities.

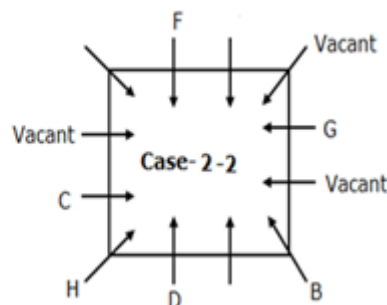

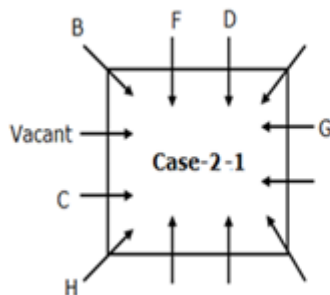

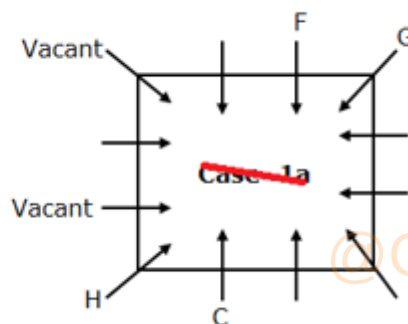

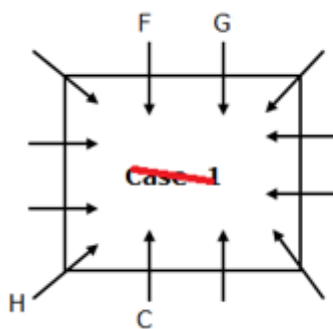

Again, we have,

- B sits second to the right of D.
- B neither sits in the middle of the table nor sits adjacent to G.
- Four persons sit between C and G, who sits neither third to the right of H nor opposite to H.
- D is not adjacent to C and G.
- B doesn't sit to the immediate right of G.

From the above conditions, there are two more possibilities.

Case- 2 is split into case- 2- 1 and case- 2-2.

From the above conditions case-1 and case-1a get eliminated because B sits second to the right of D, which is not satisfied.

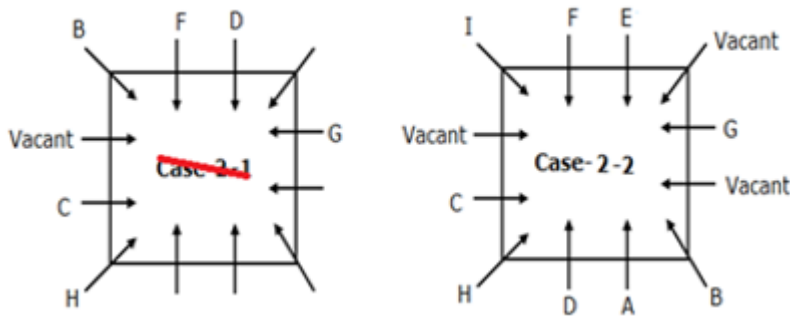

Again, we have,

- The number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E).

From the above conditions case-2-1 gets eliminated because the number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E), which is not satisfied.

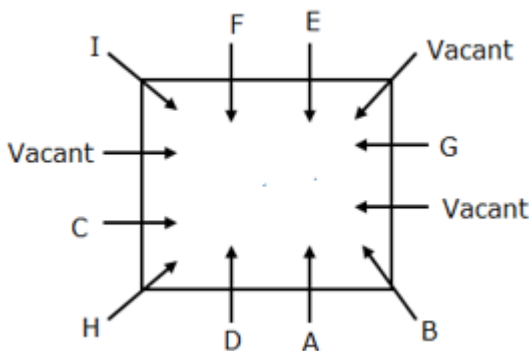

Hence case-2-2 shows the final arrangement

Answer: E

4. Questions

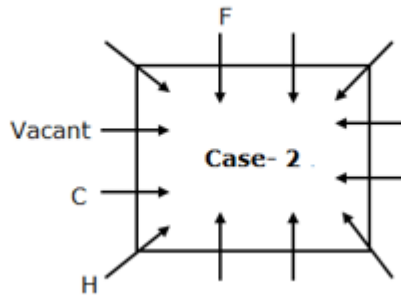

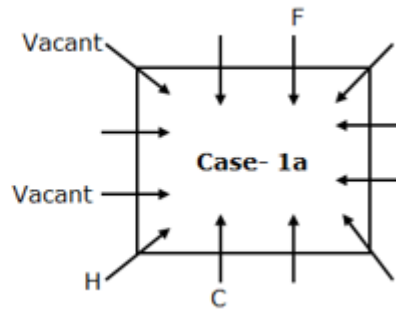

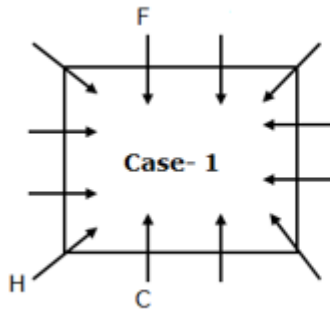

Final arrangement:

We have,

- H sits in the corner of the table and is an immediate neighbour of C, who does not sit opposite to G.
- Two persons sit between F and H, when counted from the left of H.
- F neither sits adjacent to the vacant seat nor in the corner of the table.

From the above conditions, there are three possibilities.

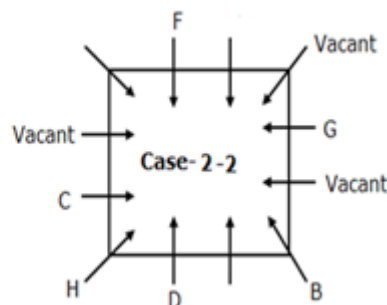

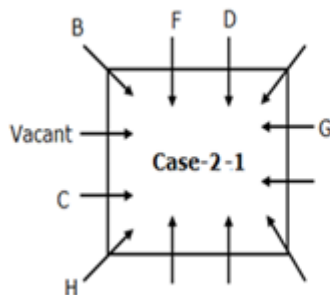

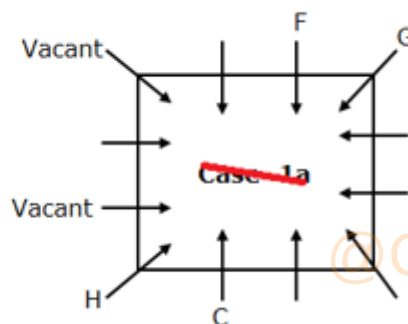

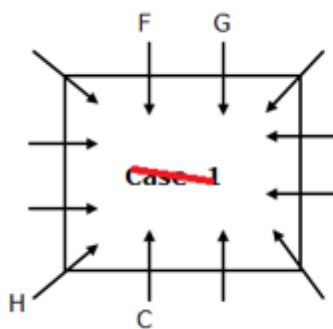

Again, we have,

- B sits second to the right of D.
- B neither sits in the middle of the table nor sits adjacent to G.
- Four persons sit between C and G, who sits neither third to the right of H nor opposite to H.
- D is not adjacent to C and G.
- B doesn't sit to the immediate right of G.

From the above conditions, there are two more possibilities.

Case- 2 is split into case- 2- 1 and case- 2-2.

From the above conditions case-1 and case-1a get eliminated because B sits second to the right of D, which is not satisfied.

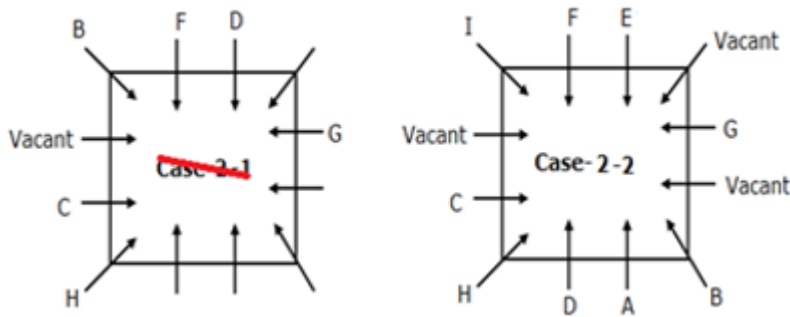

Again, we have,

- The number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E).

From the above conditions case-2-1 gets eliminated because the number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E), which is not satisfied.

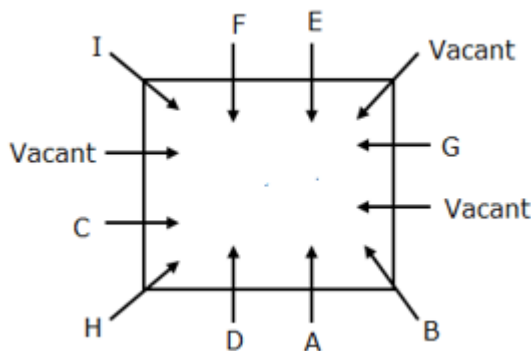

Hence case-2-2 shows the final arrangement

Answer: C

5. Questions

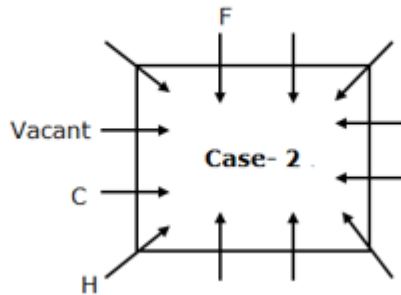

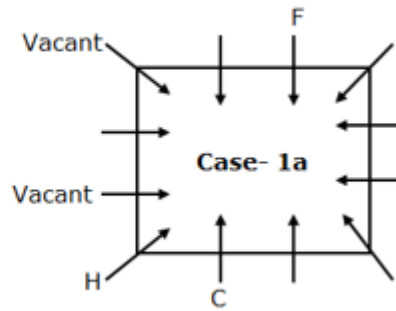

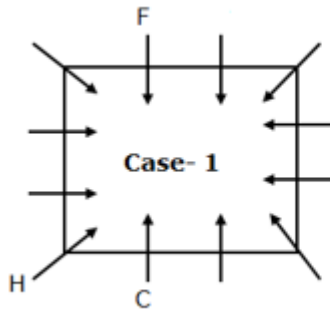

Final arrangement:

We have,

- H sits in the corner of the table and is an immediate neighbour of C, who does not sit opposite to G.
- Two persons sit between F and H, when counted from the left of H.
- F neither sits adjacent to the vacant seat nor in the corner of the table.

From the above conditions, there are three possibilities.

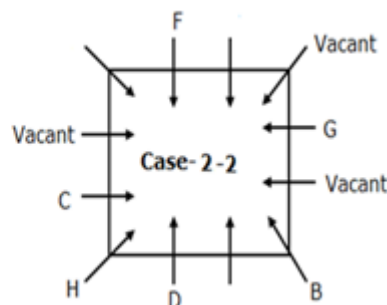

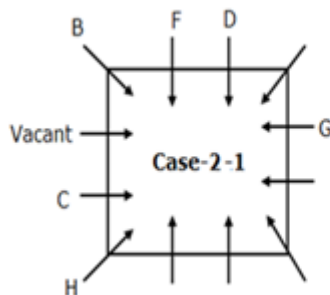

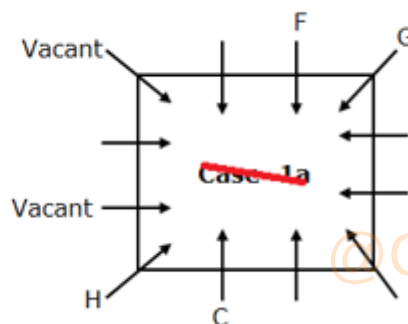

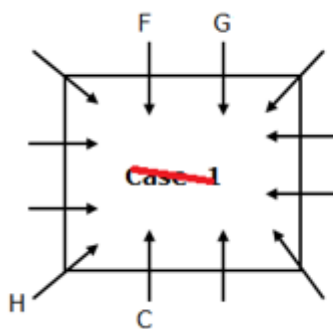

Again, we have,

- B sits second to the right of D.
- B neither sits in the middle of the table nor sits adjacent to G.
- Four persons sit between C and G, who sits neither third to the right of H nor opposite to H.
- D is not adjacent to C and G.
- B doesn't sit to the immediate right of G.

From the above conditions, there are two more possibilities.

Case- 2 is split into case- 2- 1 and case- 2-2.

From the above conditions case-1 and case-1a get eliminated because B sits second to the right of D, which is not satisfied.

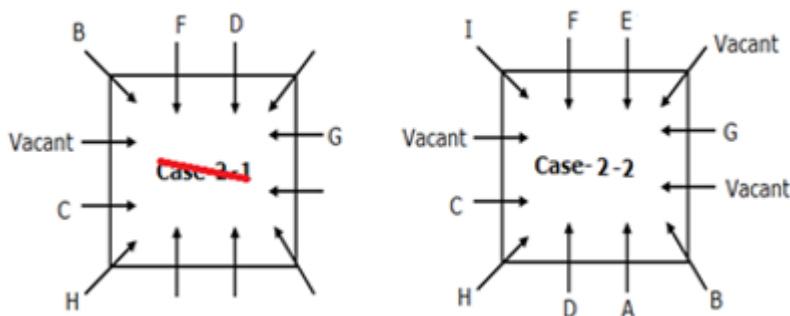

Again, we have,

- The number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E).

From the above conditions case-2-1 gets eliminated because the number of persons sitting between A and I (when counted from the left of A) is **two more than** the number of persons sitting between E and I (when counted from the right of E), which is not satisfied.

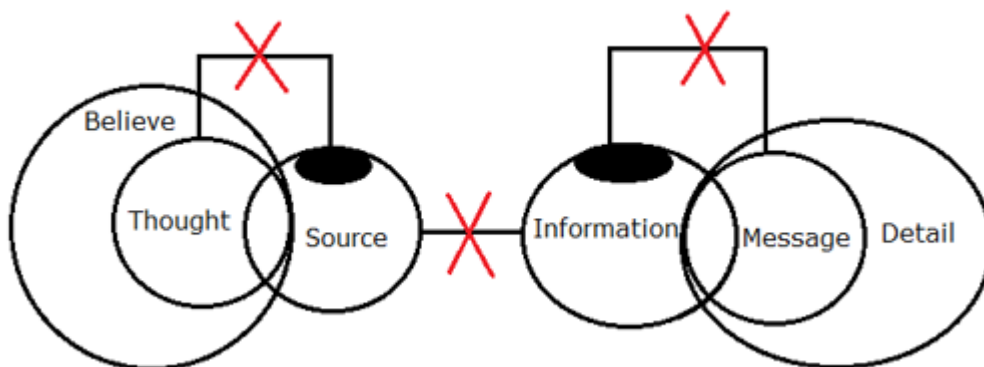

Hence case-2-2 shows the final arrangement

Answer: D (all the other persons sitting in the side of the table except option d)

6. Questions

Answer: B

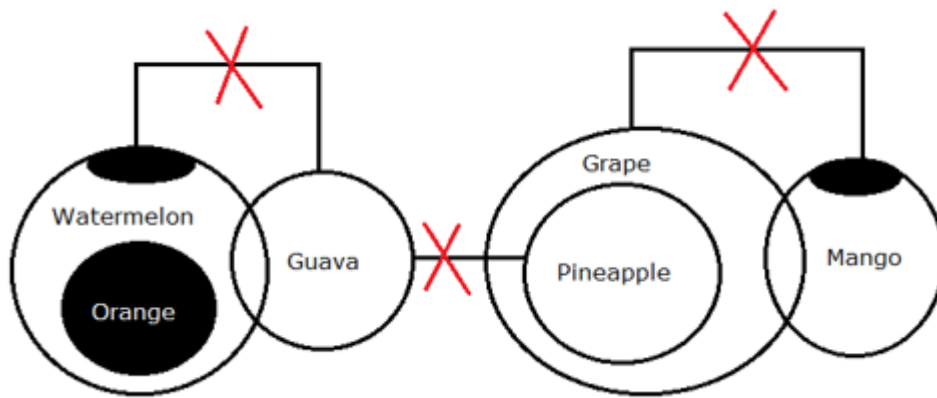

Conclusions I: All thoughts can never be information; Here there is no direct relation between thoughts and messages. So all the possible conclusions between them are true. Hence the conclusion follows.

Conclusions II: Some details are not believe; Here there is no direct relation between details and source. So all the definite conclusions between them are not true. Hence the conclusion doesn't follow.

Conclusions III: No believe being information is a possibility; Here there is no direct relation between believe and information. So all the possible conclusions between them are true. Hence the conclusion follows.

7. Questions

Answer: E

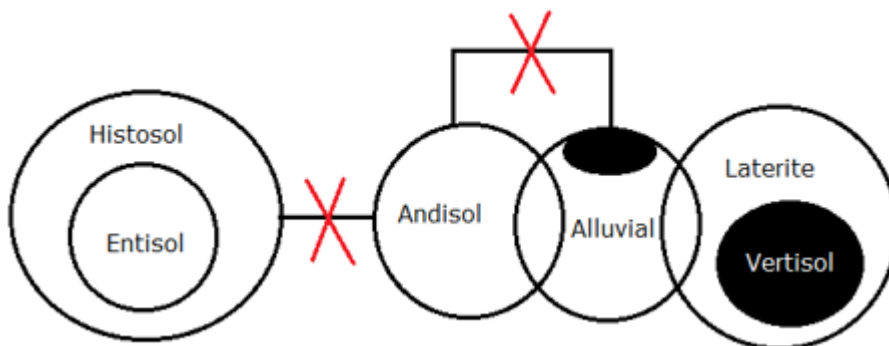

Conclusions I: All mangoes being pineapples is not a possibility; Here there is no direct relation between mango and pineapple. So all the possible conclusions between them are true. Because all pineapples are grapes. Some mangoes are not grapes. Here in conclusion, all mangoes are pineapples is not a possibility is true. Hence the conclusion follows.

Conclusions II: Some grapes are not guava; Here there is no direct relation between grapes and guava. So all the definite conclusions between them are not true. Hence the conclusion doesn't follow.

Conclusions III: All guava can be grapes ; Here there is no direct relation between guava and grape. So all the possible conclusions between them are true. Hence the conclusion follows.

8. Questions

Answer: C

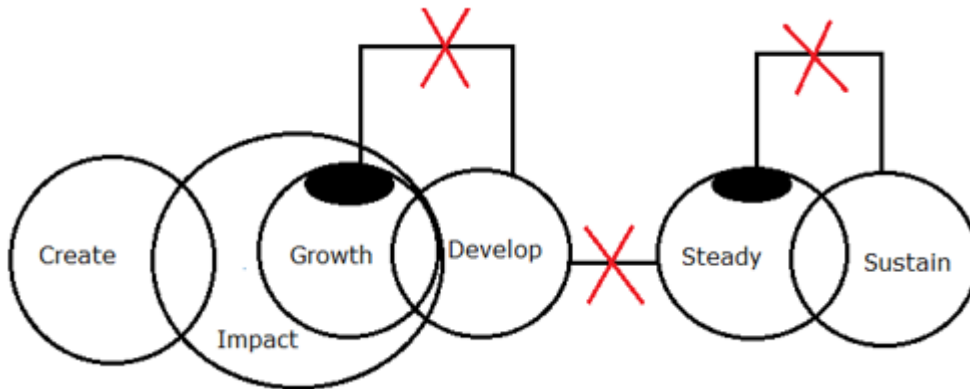

Conclusions I: All histosol may be alluvial; Here there is no direct relation between histosol and andisol. So all the possible conclusions between them are true. Hence the conclusion follows.

Conclusions II: All andison are definitely not vertisol; Here there is no direct relation between andison and vertisol. So all the definite conclusions between them are true. Because only laterite is vertisol. Vertisol is no condition with all others. Hence the conclusion follows.

Conclusions III: Some entisol being not andisol is a possibility; As per the venn diagram it is a definite condition. So all the possible conclusions between them are not true. Hence the conclusion doesn't follow.

9. Questions

Answer: A

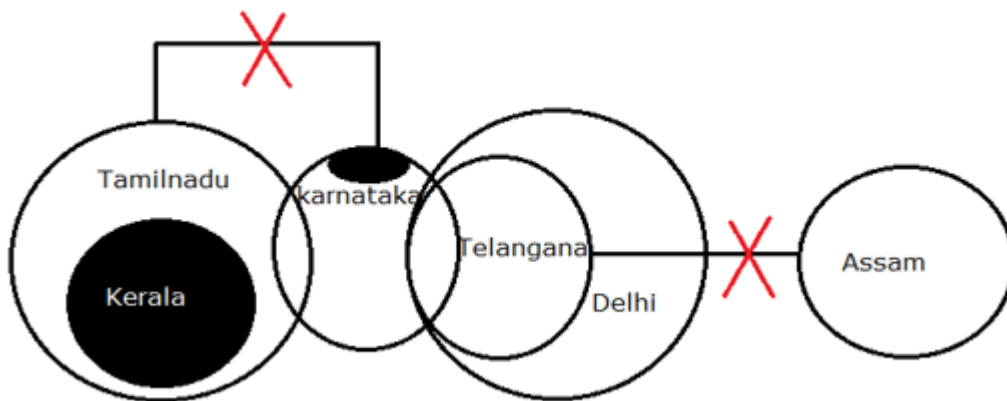

Conclusions I: Some sustain being not develop is a possibility; Here there is no direct relation between sustain and develop but the part of sustain which is steady can't be develop. Hence the conclusion doesn't follow.

Conclusions II: All growth may not be steady; Here there is no direct relation between growth and steady. So all the possible conclusions between them are true. Hence the conclusion follows.

Conclusions III: Some create being develop is not a possibility; Here there is no direct relation between create and develop. So all the possible conclusions between them are true. Hence the conclusion doesn't follow.

10. Questions

Answer: D

Conclusions I: Some Telangana is Kerala; Here, there is no direct relation between Telangana and Kerala. So all the definite conclusions between them are not true. Because only Tamilnadu is Kerala. Kerala is no condition with others. Hence the conclusion doesn't follow.

Conclusions II: No Kerala is Telangana; Here, there is no direct relation between Kerala and Telangana. So all the definite conclusions between them are true. Because only Tamilnadu is Kerala. Kerala is no condition with others. Hence the conclusion follows.

Conclusions III: All Assam being Karnataka is a possibility; Here, there is no direct relation between Assam and Karnataka. So all the possible conclusions between them are true. Hence the conclusion follows.

11. Questions

Final arrangement:

Persons and sarees
R-Kanjivaram
U-Gadwal
W-Sambalpuri
S-Uppada
T-Mysore silks
Q-Patola
V-Banarasi

We have,

- Only four persons buy sarees between V and the one who buys Gadwal saree.
- As many persons buy after V as before the one who buys Kanjivaram saree.
- The one who buys Patola saree buys two persons after S, who buys a saree immediately after W.
- Neither W nor S buys Gadwal saree.
- V doesn't buy Patola saree.
- S doesn't buy saree immediately before V.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Persons and sarees	Persons and sarees	Persons and sarees
V-	-Gadwal	-Kanjivaram
W-	W-Kanjivaram	-Gadwal
S-	S-	W-
		S-
-Patola	-Patola	
-Gadwal	V-	-Patola
-Kanjivaram		V-

@QuizByMickey

Again, we have,

- One person buys a saree between the one who buys Uppada saree and the one who buys the Patola saree.
- The number of persons buying between S and the one who buys Banarasi saree is **one more than** the number of persons buying between the one who buys Sambalpuri saree and T.
- T buys neither Gadwal saree nor Kanjivaram saree.
- At least one person buys a saree after T.

From the above conditions, there is one more possibility.

Case-2 is split into case-2a.

Case-1	Case-2	Case-3	Case-2a
Persons and sarees	Persons and sarees	Persons and sarees	Persons and sarees
V- Banarasi	-Gadwal	-Kanjivaram	-Gadwal
W	W-Kanjivaram	-Gadwal	W-Kanjivaram
S-Uppada	S-Sambalpuri	W-Sambalpuri	S-Uppada
-Sambalpuri		S-Uppada	
T-Patola	T-Patola	T-	T-Patola
-Gadwal	V-Banarasi	-Patola	V-Banarasi
-Kanjivaram	-Uppada	V-Banarasi	-Sambalpuri

Again, we have,

- The one who buys Mysore silk saree is adjacent to S and Q.
- R buys a saree before U.

From the above conditions, case 1, case-2a and case-2 get eliminated because the one who buys Mysore silk saree is adjacent to S and Q, which is not satisfied.

Hence, case-3 shows the final arrangement.

Case-1	Case-2	Case-3	Case-2a
Persons and sarees	Persons and sarees	Persons and sarees	Persons and sarees
V-Banarasi	-Gadwal	R-Kanjivaram	-Gadwal
W-	W-Kanjivaram	U-Gadwal	W-Kanjivaram
S-Uppada	S-Sambalpuri	W-Sambalpuri	S-Uppada
-sambalpuri	-Mysore silks	S-Uppada	-Mysore silks
T-Patola	T-Patola	T-Mysore silks	T-Patola
R-Gadwal	V-Banarasi	Q-Patola	V-Banarasi
U-Kanjivaram	-Uppada	V-Banarasi	-Sambalpuri

Answer: A

12. Questions

Final arrangement:

Persons and sarees
R-Kanjivaram
U-Gadwal
W-Sambalpuri
S-Uppada
T-Mysore silks
Q-Patola
V-Banarasi

@QuizByMickey

We have,

- Only four persons buy sarees between V and the one who buys Gadwal saree.
- As many persons buy after V as before the one who buys Kanjivaram saree.
- The one who buys Patola saree buys two persons after S, who buys a saree immediately after W.

- Neither W nor S buys Gadwal saree.
- V doesn't buy Patola saree.
- S doesn't buy saree immediately before V.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Persons and sarees	Persons and sarees	Persons and sarees
V-	-Gadwal	-Kanjivaram
W-	W-Kanjivaram	-Gadwal
S-	S-	W-
		S-
-Patola	-Patola	
-Gadwal	V-	-Patola
-Kanjivaram		V-

Again, we have,

- One person buys a saree between the one who buys Uppada saree and the one who buys the Patola saree.
- The number of persons buying between S and the one who buys Banarasi saree is **one more than** the number of persons buying between the one who buys Sambalpuri saree and T.
- T buys neither Gadwal saree nor Kanjivaram saree.
- At least one person buys a saree after T.

From the above conditions, there is one more possibility.

Case-2 is split into case-2a.

@QuizByMickey

Case-1	Case-2	Case-3	Case-2a

R-Gadwal	V-Banarasi	Q-Patola	V-Banarasi
U-Kanjivaram	-Uppada	V-Banarasi	-Sambalpuri

Answer: B

14. Questions

Final arrangement:

Persons and sarees
R-Kanjivaram
U-Gadwal
W-Sambalpuri
S-Uppada
T-Mysore silks
Q-Patola
V-Banarasi

@QuizByMickey

We have,

- Only four persons buy sarees between V and the one who buys Gadwal saree.
- As many persons buy after V as before the one who buys Kanjivaram saree.
- The one who buys Patola saree buys two persons after S, who buys a saree immediately after W.

- Neither W nor S buys Gadwal saree.
- V doesn't buy Patola saree.
- S doesn't buy saree immediately before V.

From the above conditions, there are three possibilities.

Case-1	Case-2	Case-3
Persons and sarees	Persons and sarees	Persons and sarees
V-	-Gadwal	-Kanjivaram
W-	W-Kanjivaram	-Gadwal
S-	S-	W-
		S-
-Patola	-Patola	
-Gadwal	V-	-Patola
-Kanjivaram		V-

Again, we have,

- One person buys a saree between the one who buys Uppada saree and the one who buys the Patola saree.
- The number of persons buying between S and the one who buys Banarasi saree is **one more than** the number of persons buying between the one who buys Sambalpuri saree and T.
- T buys neither Gadwal saree nor Kanjivaram saree.
- At least one person buys a saree after T.

From the above conditions, there is one more possibility.

Case-2 is split into case-2a.

@QuizByMickey

Case-1	Case-2	Case-3	Case-2a
Persons and sarees	Persons and sarees	Persons and sarees	Persons and sarees
V- Banarasi	-Gadwal	-Kanjivaram	-Gadwal
W	W-Kanjivaram	-Gadwal	W-Kanjivaram
S-Uppada	S-Sambalpuri	W-Sambalpuri	S-Uppada
-Sambalpuri		S-Uppada	
T-Patola	T-Patola	T-	T-Patola
-Gadwal	V-Banarasi	-Patola	V-Banarasi
-Kanjivaram	-Uppada	V-Banarasi	-Sambalpuri

Again, we have,

- The one who buys Mysore silk saree is adjacent to S and Q.
- R buys a saree before U.

From the above conditions, case 1, case-2a and case-2 get eliminated because the one who buys Mysore silk saree is adjacent to S and Q, which is not satisfied.

Hence, case-3 shows the final arrangement.

Answer: E

16. Questions

Answer: D (K)

I). Green, White, Black, Brown ---> ETCW

II). Grey, Crow, Rose, Lily ---> EOSL

III). Duck, Bear, Door, Rise ---> CAOS

IV). Great, Brain, Bread, Words ---> AIAD

Now, after arranging all letters in alphabetical order without given space,

AAACCDEEILOOSSTW

Now, take the third, sixth, seventh and tenth letters.

ADEL

From this, we get words, DEAL, LEAD, DALE, LADE

So we mark “K” as an answer because there is more than one word.

17. Questions

Answer: D

I). R E L I G I O N ---> 3 pairs (EI, LI, ON)

II). N A R C O T I C S ---> 2 Pairs (AC, OS)

III). P R E V I O U S ---> 0 pair

@QuizByMickey

18. Questions

Answer: E

We have,

CONSIDER

After rearrangement, we get

XLKPRWVO

Then, we get

KLOPRVWX

The place value of L, P, V and X is 12, 16, 22 and 24.

The sum of these place values is 74.

19. Questions

Answer: B

After rearrangement, we get

a). d, o, s, r

b). v, i, s, a

c). g, o, t, o

d). z, o, u, e

Only option b forms a meaningful word visa.

20. Questions

Answer: D

We have,

72649513857462

The first six digits are arranged in ascending order from left to right, and then the last eight digits are arranged in descending order from left to right, we get,

24567987654321

After multiplication, we get,

8,30,63,56,30,12,2

8 3 9 2 3 3 2

After arranging in ascending order, we get,

2 2 3 3 3 8 9

The resultant value when the digit which is seventh from the left end is multiplied with the digit which is second from the left end in the number thus formed after the final arrangement is **18**.
