

1. Questions

Study the following information carefully and answer the given questions.

Eight persons - P, Q, R, S, T, U, V and W are sitting in a straight line facing north, but not necessarily in the same order. Each of them had a different monthly income in the multiple of 2000s, more than 5000 and less than 50000. Their incomes are mentioned in the coded format as follows.

$X\#Y \rightarrow$ The difference between the incomes of X and Y is 8,000.

$X\$Y \rightarrow$ The difference between the incomes of X and Y is 4,000.

$X\&Y \rightarrow$ X's income is twice Y's income.

$X\%Y \rightarrow$ X's income is half of Y's income.

$X@Y \rightarrow$ The sum of the incomes of X and Y is 56,000.

Only three persons sit between W and S. Q sits to the immediate right of S, where $Q\#S$ and $W\$S$. Q's monthly income is 16000. Only one person sits between Q and V, where $V\&S$. As many persons sit between V and W as between P and R, where $V\#R$ and $P\$W$. T sits to the immediate left of P and sits at one of the ends. The number of persons sitting between S and U is **one more than** the number of persons sitting between W and T, where $T\%S$ and $U@V$.

Who among the following person sits third to the right of the one who has the second-highest salary?

- a. S
- b. The one who sits at the right end
- c. The one who sits at the left end
- d. V
- e. The one who sits to the immediate left of S

2. Questions

As many persons sit to the right of ____ as to the left of the one who has the income of Rs. ____.

- a. T, 24000
- b. P, 40000
- c. S, 32000
- d. Q, 8000
- e. W, 16000

@QuizByMickey

3. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. T-12000
- b. W-28000
- c. Q-16000
- d. R-40000
- e. S-8000

4. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

I). P#S

II). No person sits between R and V

III). Q@T

- a. Only II and I
- b. Only III
- c. All I, II, and III
- d. Only II
- e. Only II and III

5. Questions

What is the position of P with respect to the one who has the income of Rs. 24000?

- a. Second to the right
- b. Fourth to the left
- c. Fourth to the right
- d. Fifth to the left
- e. Immediate right

6. Questions

@QuizByMickey

Study the following information carefully and answer the given questions.

Eleven persons A, B, C, D, E, F, G, H, I, J and K are working in a company in different designations Chief Executive Officer (CEO), President, Chief Operating Officer (COO), Chief Technology Officer (CTO), Senior Vice President (SVP), Vice President (VP), Director, Senior Manager, Manager, Assistant Manager, Lead, Senior Engineer and Engineer.

Notes: Designations are given in decreasing order, such that CEO is the senior-most designation while Engineer is the junior-most designation . Two designations are vacant.

I hold a designation junior to Assistant Manager. Only one person is designated between I and C. K is three

designations senior to C and he is not senior to the Vice President. One of the vacant designations is junior to Assistant Manager. The topmost and bottommost designations are not vacant. B works in a designation senior to COO and one of the vacant designations is immediately below B. H is designated immediately senior to one of the vacant designations. More than three persons work between B and H. Only two persons designated between G and F, who is junior to G. The number of persons senior to A is **two less than** the number of persons junior to E, who is not senior to D. D is not the SVP and is senior to C but junior to A, who is not the senior most person. Only seven persons work between G and H. J is not the senior to manager.

Who among the following person works as the assistant manager based on the final arrangement?

- a. F
- b. The one who works two persons junior to E
- c. The one who works immediately senior to K
- d. G
- e. The one who works adjacent to E

7. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. GK
- b. AE
- c. ID
- d. BD
- e. FE

8. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

- a. No one works between D and C
- b. H is works as the lead
- c. I works as the Senior Engineer
- d. B works in the topmost designation
- e. F works as vice president

@QuizByMickey

9. Questions

As many persons senior to F as junior to ____.

- a. C

- b. A
- c. I
- d. B
- e. G

10. Questions

In which of the following designation does K works _____.

- a. Lead
- b. Senior Manager
- c. CEO
- d. Vice president
- e. COO

11. Questions

Study the following information carefully and answer the given questions.

Eight persons - A, B, C, D, E, F, G and H live on five different floors of a five storeyed building where the lowermost floor is numbered, the one above that is numbered two and so on till the topmost floor is numbered five.

Note-I: Each floor has two flats viz., Flat-1 and Flat-2, where Flat 1 is to the west of Flat 2.

Note-II: Flat 2 of floor 2 is immediately above Flat 2 of floor 1. Similarly, Flat 1 of floor 3 is immediately above Flat 1 of floor 2 and so on.

Note-III: Area of each flat on each floor is equal.

Note-IV: Two flats are vacant and only one person lives in each flat.

There is only one floor between B and E, both living in the same flat, but neither on an odd numbered floor nor in the odd numbered flat. One of the flats below H's flat is vacant. D lives immediately above H. F lives on a floor above A. H lives in a flat which is immediately northwest of E. There are three floors between G and C but both of them don't live in an odd numbered flat. The number of persons living between D and A in the same numbered flat is **one more than** the number of persons living between G and B in the same numbered flat. Neither the vacant flats are in the same numbered flats nor three floors below D.

Who among the following person lives in flat number 1?

- a. B
- b. F
- c. G
- d. E
- e. C

12. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. C lives in the same flat with D
- b. A lives on floor number 1 in flat 2
- c. H lives on the same floor with G
- d. No one lives to the east of one of the vacant flats
- e. F lives on the same floor with G but not on 5th floor

13. Questions

As many floors below D as above ____.

- a. E
- b. C
- c. A
- d. F
- e. G

14. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. F
- b. H
- c. C
- d. G
- e. B

15. Questions

In which of the following floor and flat does A lives respectively?

- a. 3, 2
- b. 4, 1
- c. 1, 2
- d. 1, 1
- e. 5, 1

16. Questions

Below questions consist of a series of letters followed by some steps following certain rules. Study the following information carefully and answer the below questions.

Input: 3 @ ! 7 Q 2 Z A M T ^ 9 4 \$ # 6 1 & P K *

Step I: * K P & 1 6 # \$ 4 9 ^ T M A Z 2 Q 7 ! @ 3

Step II: @ P K ! 8 3 ^ \$ 5 0 # G N Z A 7 J 2 & * 6

Step III: @ P K ! 8 3 ^ \$ 5 0 # G N Z A 7 & J 2 * 6

Step IV: P @ ! K 3 8 \$ ^ 0 5 G # Z N 7 A J & * 2 6

Step V: @ ! \$ ^ # & * J A N Z G K P 0 2 3 5 6 7 8

Step V is the final output

Input: 1 3 6 ! \$ 2 * M ^ A Z & P Q @ K # 4 T 7 9

Which of the following element is seventh to the left of the eighth element from the right end in step III?

- a. *
- b. 7
- c. A
- d. \$
- e. 4

17. Questions

How many letters are there in step IV which are immediately preceded by a number and immediately followed by a symbol?

- a. One
- b. Two
- c. Three
- d. More than three
- e. None

@QuizByMickey

18. Questions

In which of the following steps 6 is positioned third from the end (either left or from right)?

- a. Step I
- b. Step III and II
- c. Step IV and V
- d. Step I and IV

e. Step I , IV and V

19. Questions

How many alphabets are there between the second element from the left and fifth element from the right in step II?

- a. Eight
- b. Six
- c. Seven
- d. Five
- e. Four

20. Questions

As many elements to the right of N as to the left of ____ in step V.

- a. G
- b. \$
- c. A
- d. 7
- e. 2

Explanations:

1. Questions

Final arrangement:

We have,

- Only three persons sit between W and S.
- Q sits to the immediate right of S, where $Q \# S$ and $W \$ S$.
- Q's monthly income is 16000.

From the above conditions, there are two possibilities.

Here, Q's income is 16000, so the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

Again, we have,

- Only one person sits between Q and V, where V&S.
- As many persons sit between V and W as between P and R, where V#R and P\$W.
- T sits to the immediate left of P and sits at one of the ends.

As we know, the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

The income of V is double the income of S, i.e., 48000. Hence, the income of S is 24000.

The income of R is 40000 and the income of W will be 28000.

The income of P is 32000.

Again, we have,

- The number of persons sitting between S and U is **one more than** the persons sitting between W and T, where $T \% S$ and $U @ V$.

The income of T will be half of the income of S, i.e, 12000.

The income of U = $56000 - 48000 = 8000$.

From the above condition, Case 2 gets eliminated because the number of persons sitting between S and U is **one more than** the persons sitting between W and T, which is not satisfied.

Hence, Case 1 is the final arrangement.

Answer: B

2. Questions

Final arrangement:

We have,

- Only three persons sit between W and S.
- Q sits to the immediate right of S, where $Q \# S$ and $W \$ S$.
- Q's monthly income is 16000.

From the above conditions, there are two possibilities.

Here, Q's income is 16000, so the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

Again, we have,

@QuizByMickey

- Only one person sits between Q and V, where $V \& S$.
- As many persons sit between V and W as between P and R, where $V \# R$ and $P \$ W$.
- T sits to the immediate left of P and sits at one of the ends.

As we know, the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

The income of V is double the income of S, i.e., 48000. Hence, the income of S is 24000.

The income of R is 40000 and the income of W will be 28000.

The income of P is 32000.

Again, we have,

- The number of persons sitting between S and U is **one more than** the persons sitting between W and T, where $T \% S$ and $U @ V$.

The income of T will be half of the income of S, i.e, 12000.

The income of U = $56000 - 48000 = 8000$.

From the above condition, Case 2 gets eliminated because the number of persons sitting between S and U is **one more than** the persons sitting between W and T, which is not satisfied.

Hence, Case 1 is the final arrangement.

Answer: C

3. Questions

Final arrangement:

We have,

- Only three persons sit between W and S.
- Q sits to the immediate right of S, where $Q \# S$ and $W \$ S$.
- Q's monthly income is 16000.

From the above conditions, there are two possibilities.

Here, Q's income is 16000, so the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

Again, we have,

- Only one person sits between Q and V, where V&S.
- As many persons sit between V and W as between P and R, where V#R and P\$W.
- T sits to the immediate left of P and sits at one of the ends.

As we know, the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

The income of V is double the income of S, i.e., 48000. Hence, the income of S is 24000.

The income of R is 40000 and the income of W will be 28000.

The income of P is 32000.

Again, we have,

- The number of persons sitting between S and U is **one more than** the persons sitting between W and T, where $T \% S$ and $U @ V$.

The income of T will be half of the income of S, i.e, 12000.

The income of U = $56000 - 48000 = 8000$.

From the above condition, Case 2 gets eliminated because the number of persons sitting between S and U is **one more than** the persons sitting between W and T, which is not satisfied.

Hence, Case 1 is the final arrangement.

Answer: E (In all the other options the person and their respective incomes is given, except in option e)

4. Questions

Final arrangement:

We have,

- Only three persons sit between W and S.
- Q sits to the immediate right of S, where $Q \# S$ and $W \$ S$.
- Q's monthly income is 16000.

From the above conditions, there are two possibilities.

Here, Q's income is 16000, so the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

Again, we have,

@QuizByMickey

- Only one person sits between Q and V, where $V \& S$.
- As many persons sit between V and W as between P and R, where $V \# R$ and $P \$ W$.
- T sits to the immediate left of P and sits at one of the ends.

As we know, the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

The income of V is double the income of S, i.e., 48000. Hence, the income of S is 24000.

The income of R is 40000 and the income of W will be 28000.

The income of P is 32000.

Again, we have,

- The number of persons sitting between S and U is **one more than** the persons sitting between W and T, where $T\%S$ and $U@V$.

The income of T will be half of the income of S, i.e, 12000.

The income of U = 56000-48000=8000.

From the above condition, Case 2 gets eliminated because the number of persons sitting between S and U is **one more than** the persons sitting between W and T, which is not satisfied.

Hence, Case 1 is the final arrangement.

Answer: A

5. Questions

Final arrangement:

We have,

- Only three persons sit between W and S.
- Q sits to the immediate right of S, where $Q\#S$ and $W\$S$.
- Q's monthly income is 16000.

From the above conditions, there are two possibilities.

Here, Q's income is 16000, so the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

Again, we have,

- Only one person sits between Q and V, where $V \& S$.
- As many persons sit between V and W as between P and R, where $V \# R$ and $P \$ W$.
- T sits to the immediate left of P and sits at one of the ends.

As we know, the income of S can be 8000 or 24000. Also, the income of W can be 12000, 20000 or 28000.

The income of V is double the income of S, i.e., 48000. Hence, the income of S is 24000.

The income of R is 40000 and the income of W will be 28000.

The income of P is 32000.

Again, we have,

- The number of persons sitting between S and U is **one more than** the persons sitting between W and T, where $T \% S$ and $U @ V$.

The income of T will be half of the income of S, i.e., 12000.

The income of U = $56000 - 48000 = 8000$.

From the above condition, Case 2 gets eliminated because the number of persons sitting between S and U is **one more than** the persons sitting between W and T, which is not satisfied.

Hence, Case 1 is the final arrangement.

@QuizByMickey

Answer: D

6. Questions

Final arrangement:

Designations	Persons
Chief Executive Officer (CEO)	G
President	B
Chief Operating Officer (COO)	Vacant
Chief Technology Officer (CTO)	A
Senior Vice President (SVP)	F
Vice President (VP)	K
Director	D
Senior Manager	E
Manager	C
Assistant Manager	H
Lead	Vacant
Senior Engineer	I
Engineer	J

@QuizByMickey

We have,

- I hold a designation junior to Assistant Manager.
- Only one person is designated between I and C.
- K is three designations senior to C and he is not senior to the Vice President.

- One of the vacant designations is junior to Assistant Manager. The topmost and bottommost designations are not vacant.

From the above conditions, there are four possibilities.

Designations	Case 1	Case 2	Case 3	Case 4
	Persons	Persons	Persons	Persons
CEO				
President				
COO				
CTO				
SVP				
VP	K	K		
Director			K	K
Senior Manager				
Manager	C	C		
Asst Manager			C	C
Lead	I	Vacant		Vacant
Sen.Engineer	Vacant	I	Vacant	
Engineer			I	I

Again, we have,

- B works in a designation senior to COO and one of the vacant designations is immediately below B.
- H is designated immediately senior to one of the vacant designations.
- More than three persons work between B and H.

From the above conditions, Case 1 and Case 4 get eliminated because H is designated immediately senior to one of the vacant designations which is not satisfied.

From the above conditions, there are two more possibilities, case 2 split into case 2a and case 3 split into case 3a.

Designations	Case 1	Case 2	Case 2a	Case 3	Case 4	Case 3a
	Persons	Persons	Persons	Persons	Persons	Persons
CEO			B			B
President	B	B	Vacant	B		Vacant
COO	Vacant	Vacant		Vacant		
CTO						
SVP						
VP	K	K	K			
Director				K	K	K
Senior Manager						
Manager	C	C	C			
Asst Manager		H	H	C	C	C
Lead	I	Vacant	Vacant	H	Vacant	H
Sen.Engineer	Vacant	I	I	Vacant		Vacant
Engineer				I	I	I

Again, we have,

- Only two persons work between G and F, who is junior to G.
- The number of persons senior to A is **two less than** the number of persons junior to E, who is not senior to D.
- D is not the SVP and is senior to C but junior to A, who is not the senior most person.
- Only seven persons works between G and H.
- J is not the senior to manager.

From the above conditions Case 2a, case 3 and case 3b gets eliminated. Case 2a and Case 3 get eliminated because only seven persons works between G and H, which is not satisfied.

Case 3a gets eliminated because E, who is not senior to D, which is not satisfied.

Hence, Case 2 is the final arrangement.

Designations	Case 2	Case 2a	Case 3	Case 3a
	Persons	Persons	Persons	Persons
CEO	G	B		B
President	B	Vacant	B	Vacant
COO	Vacant		Vacant	G
CTO	A			A
SVP	F			
VP	K	K		F
Director	D		K	K
Senior Manager	E			E
Manager	C	C		D
Asst Manager	H	H	C	C
Lead	Vacant	Vacant	H	H
Sen.Engineer	I	I	Vacant	Vacant
Engineer	J	J	I	I

Answer: B

7. Questions

Final arrangement:

@QuizByMickey

Designations	Persons
Chief Executive Officer (CEO)	G
President	B
Chief Operating Officer (COO)	Vacant
Chief Technology Officer (CTO)	A
Senior Vice President (SVP)	F
Vice President (VP)	K
Director	D
Senior Manager	E
Manager	C
Assistant Manager	H
Lead	Vacant
Senior Engineer	I
Engineer	J

We have,

- I hold a designation junior to Assistant Manager.
- Only one person is designated between I and C.
- K is three designations senior to C and he is not senior to the Vice President.
- One of the vacant designations is junior to Assistant Manager. The topmost and bottommost designations are not vacant.

From the above conditions, there are four possibilities.

@QuizByMickey

Designations	Case 1	Case 2	Case 3	Case 4
	Persons	Persons	Persons	Persons
CEO				
President				
COO				
CTO				
SVP				
VP	K	K		
Director			K	K
Senior Manager

VP	K	K		F
Director	D		K	K
Senior Manager	E			E
Manager	C	C		D
Asst Manager	H	H	C	C
Lead	Vacant	Vacant	H	H
Sen.Engineer	I	I	Vacant	Vacant
Engineer	J	J	I	I

Answer: E (The number of persons working between the given pairs of persons is three, except in option e)

8. Questions

Final arrangement:

@QuizByMickey

Designations	Persons
Chief Executive Officer (CEO)	G
President	B
Chief Operating Officer (COO)	Vacant
Chief Technology Officer (CTO)	A
Senior Vice President (SVP)	F
Vice President (VP)	K
Director	D
Senior Manager	E
Manager	C
Assistant Manager	H
Lead	Vacant
Senior Engineer	I
Engineer	J

We have,

- I hold a designation junior to Assistant Manager.
- Only one person is designated between I and C.
- K is three designations senior to C and he is not senior to the Vice President.
- One of the vacant designations is junior to Assistant Manager. The topmost and bottommost designations are not vacant.

From the above conditions, there are four possibilities.

@QuizByMickey

Designations	Case 1	Case 2	Case 3	Case 4
	Persons	Persons	Persons	Persons
CEO				
President				
COO				
CTO				
SVP				
VP	K	K		
Director			K	K
Senior Manager				
Manager	C	C		
Asst Manager			C	C
Lead	I	Vacant		Vacant
Sen.Engineer	Vacant	I	Vacant	
Engineer			I	I

Again, we have,

- B works in a designation senior to COO and one of the vacant designations is immediately below B.
- H is designated immediately senior to one of the vacant designations.
- More than three persons work between B and H.

@QuizByMickey

From the above conditions, Case 1 and Case 4 get eliminated because H is designated immediately senior to one of the vacant designations which is not satisfied.

From the above conditions, there are two more possibilities, case 2 split into case 2a and case 3 split into case 3a.

Designations	Case 1	Case 2	Case 2a	Case 3	Case 4	Case 3a
	Persons	Persons	Persons	Persons	Persons	Persons
CEO			B			B
President	B	B	Vacant	B		Vacant
COO	Vacant	Vacant		Vacant		
CTO						
SVP						
VP	K	K	K			
Director				K	K	K
Senior Manager						
Manager	C	C	C			
Asst Manager		H	H	C	C	C
Lead	I	Vacant	Vacant	H	Vacant	H
Sen.Engineer	Vacant	I	I	Vacant		Vacant
Engineer				I	I	I

Again, we have,

- Only two persons work between G and F, who is junior to G.
- The number of persons senior to A is **two less than** the number of persons junior to E, who is not senior to D.
- D is not the SVP and is senior to C but junior to A, who is not the senior most person.
- Only seven persons works between G and H.
- J is not the senior to manager.

From the above conditions Case 2a, case 3 and case 3b gets eliminated. Case 2a and Case 3 get eliminated because only seven persons works between G and H, which is not satisfied.

Case 3a gets eliminated because E, who is not senior to D, which is not satisfied.

Hence, Case 2 is the final arrangement.

Designations	Case 2	Case 2a	Case 3	Case 3a
	Persons	Persons	Persons	Persons
CEO	G	B		B
President	B	Vacant	B	Vacant
COO	Vacant		Vacant	G
CTO	A			A
SVP	F			
VP	K	K		F
Director	D		K	K
Senior Manager	E			E
Manager	C	C		D
Asst Manager	H	H	C	C
Lead	Vacant	Vacant	H	H
Sen.Engineer	I	I	Vacant	Vacant
Engineer	J	J	I	I

Answer: C

9. Questions

Final arrangement:

@QuizByMickey

Designations	Persons
Chief Executive Officer (CEO)	G
President	B
Chief Operating Officer (COO)	Vacant
Chief Technology Officer (CTO)	A
Senior Vice President (SVP)	F
Vice President (VP)	K
Director	D
Senior Manager	E
Manager	C
Assistant Manager	H
Lead	Vacant
Senior Engineer	I
Engineer	J

We have,

- I hold a designation junior to Assistant Manager.
- Only one person is designated between I and C.
- K is three designations senior to C and he is not senior to the Vice President.
- One of the vacant designations is junior to Assistant Manager. The topmost and bottommost designations are not vacant.

From the above conditions, there are four possibilities.

@QuizByMickey

Designations	Case 1	Case 2	Case 3	Case 4
	Persons	Persons	Persons	Persons
CEO				
President				
COO				
CTO				
SVP				
VP	K	K		
Director			K	K
Senior Manager				
Manager	C	C		
Asst Manager			C	C
Lead	I	Vacant		Vacant
Sen.Engineer	Vacant	I	Vacant	
Engineer			I	I

Again, we have,

- B works in a designation senior to COO and one of the vacant designations is immediately below B.
- H is designated immediately senior to one of the vacant designations.
- More than three persons work between B and H.

@QuizByMickey

From the above conditions, Case 1 and Case 4 get eliminated because H is designated immediately senior to one of the vacant designations which is not satisfied.

From the above conditions, there are two more possibilities, case 2 split into case 2a and case 3 split into case 3a.

Designations	Case 1	Case 2	Case 2a	Case 3	Case 4	Case 3a
	Persons	Persons	Persons	Persons	Persons	Persons
CEO			B			B
President	B	B	Vacant	B		Vacant
COO	Vacant	Vacant		Vacant		
CTO						
SVP						
VP	K	K	K			
Director				K	K	K
Senior Manager						
Manager	C	C	C			
Asst Manager		H	H	C	C	C
Lead	I	Vacant	Vacant	H	Vacant	H
Sen.Engineer	Vacant	I	I	Vacant		Vacant
Engineer				I	I	I

Again, we have,

- Only two persons work between G and F, who is junior to G.
- The number of persons senior to A is **two less than** the number of persons junior to E, who is not senior to D.
- D is not the SVP and is senior to C but junior to A, who is not the senior most person.
- Only seven persons works between G and H.
- J is not the senior to manager.

From the above conditions Case 2a, case 3 and case 3b gets eliminated. Case 2a and Case 3 get eliminated because only seven persons works between G and H, which is not satisfied.

Case 3a gets eliminated because E, who is not senior to D, which is not satisfied.

Hence, Case 2 is the final arrangement.

Designations	Case 2	Case 2a	Case 3	Case 3a
	Persons	Persons	Persons	Persons
CEO	G	B		B
President	B	Vacant	B	Vacant
COO	Vacant		Vacant	G

Sen.Engineer	I	I	Vacant	Vacant
Engineer	J	J	I	I

Answer: D

11. Questions

Final arrangement:

@QuizByMickey

Floors	Flat 1	Flat 2
5	F	G
4	D	B
3	H	Vacant
2	Vacant	E
1	A	C

We have,

- There is only one floor between B and E, both living in the same flat, but neither on an odd numbered floor nor in the odd numbered flat.
- One of the flats below H's flat is vacant.
- D lives immediately above H.
- H lives in a flat which is immediately northwest of E.

From the above conditions, there are two possibilities

Floors	Case 1		Case 2	
	Flat 1	Flat 2	Flat 1	Flat 2
5				
4	D	B	D	B
3	H		H	
2	Vacant	E		E
1			Vacant	

Again we have,

- There are three floors between G and C but both of them don't live in an odd numbered flat.

From the above conditions there are two more possibilities. Case 1 spilt into case 1a and case 2 spilt into case 2a.

@QuizByMickey

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5		G		G		C		C
4	D	B	D	B	D	B	D	B
3	H		H		H		H	
2	Vacant	E		E	Vacant	E		E
1		C	Vacant	C		G	Vacant	G

Again we have,

- The number of persons living between D and A in the same numbered flat is **one more than** the number of persons living between G and B in the same numbered flat.
- F lives on a floor above A.
- Neither the vacant flats are in the same numbered flats nor three floors below D.

From the above conditions Case 1a and Case 2a get eliminated because the number of persons living between D and A is one more than the person living between G and B, which is not satisfied.

Case 2 gets eliminated because neither the vacant flats are in the same numbered flats nor three floors below D, which is not satisfied.

Hence, Case 1 is the final arrangement.

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5	F	G	F	G		C		C
4	D	B	D	B	D	B	D	B
3	H	Vacant	H	Vacant	H		H	
2	Vacant	E	A	E	Vacant	E		E
1	A	C	Vacant	C		G	Vacant	G

Answer: B

12. Questions

Final arrangement:

Floors	Flat 1	Flat 2
5	F	G
4	D	B
3	H	Vacant
2	Vacant	E
1	A	C

We have,

- There is only one floor between B and E, both living in the same flat, but neither on an odd numbered floor nor in the odd numbered flat.
- One of the flats below H's flat is vacant.
- D lives immediately above H.
- H lives in a flat which is immediately northwest of E.

From the above conditions, there are two possibilities

Floors	Case 1		Case 2	
	Flat 1	Flat 2	Flat 1	Flat 2
5				
4	D	B	D	B
3	H		H	
2	Vacant	E		E
1			Vacant	

Again we have,

- There are three floors between G and C but both of them don't live in an odd numbered flat.

From the above conditions there are two more possibilities. Case 1 split into case 1a and case 2 split into case 2a.

@QuizByMickey

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5		G		G		C		C
4	D	B	D	B	D	B	D	B
3	H		H		H		H	
2	Vacant	E		E	Vacant	E		E
1		C	Vacant	C		G	Vacant	G

Again we have,

- The number of persons living between D and A in the same numbered flat is **one more than** the number of persons living between G and B in the same numbered flat.
- F lives on a floor above A.
- Neither the vacant flats are in the same numbered flats nor three floors below D.

From the above conditions Case 1a and Case 2a get eliminated because the number of persons living between D and A is one more than the person living between G and B, which is not satisfied.

Case 2 gets eliminated because neither the vacant flats are in the same numbered flats nor three floors below D, which is not satisfied.

Hence, Case 1 is the final arrangement.

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5	F	G	F	G		C		C
4	D	B	D	B	D	B	D	B
3	H	Vacant	H	Vacant	H		H	
2	Vacant	E	A	E	Vacant	E		E
1	A	C	Vacant	C		G	Vacant	G

Answer: D

13. Questions

Final arrangement:

Floors	Flat 1	Flat 2
5	F	G
4	D	B
3	H	Vacant
2	Vacant	E
1	A	C

We have,

- There is only one floor between B and E, both living in the same flat, but neither on an odd numbered floor nor in the odd numbered flat.
- One of the flats below H's flat is vacant.
- D lives immediately above H.
- H lives in a flat which is immediately northwest of E.

From the above conditions, there are two possibilities

Floors	Case 1		Case 2	
	Flat 1	Flat 2	Flat 1	Flat 2
5				
4	D	B	D	B
3	H		H	
2	Vacant	E		E
1			Vacant	

Again we have,

- There are three floors between G and C but both of them don't live in an odd numbered flat.

From the above conditions there are two more possibilities. Case 1 split into case 1a and case 2 split into case 2a.

@QuizByMickey

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5		G		G		C		C
4	D	B	D	B	D	B	D	B
3	H		H		H		H	
2	Vacant	E		E	Vacant	E		E
1		C	Vacant	C		G	Vacant	G

Again we have,

- The number of persons living between D and A in the same numbered flat is **one more than** the number of persons living between G and B in the same numbered flat.
- F lives on a floor above A.
- Neither the vacant flats are in the same numbered flats nor three floors below D.

From the above conditions Case 1a and Case 2a get eliminated because the number of persons living between D and A is one more than the person living between G and B, which is not satisfied.

Case 2 gets eliminated because neither the vacant flats are in the same numbered flats nor three floors below D, which is not satisfied.

Hence, Case 1 is the final arrangement.

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5	F	G	F	G		C		C
4	D	B	D	B	D	B	D	B
3	H	Vacant	H	Vacant	H		H	
2	Vacant	E	A	E	Vacant	E		E
1	A	C	Vacant	C		G	Vacant	G

Answer: A

14. Questions

Final arrangement:

Floors	Flat 1	Flat 2
5	F	G
4	D	B
3	H	Vacant
2	Vacant	E
1	A	C

We have,

- There is only one floor between B and E, both living in the same flat, but neither on an odd numbered floor nor in the odd numbered flat.
- One of the flats below H's flat is vacant.
- D lives immediately above H.
- H lives in a flat which is immediately northwest of E.

From the above conditions, there are two possibilities

Floors	Case 1		Case 2	
	Flat 1	Flat 2	Flat 1	Flat 2
5				
4	D	B	D	B
3	H		H	
2	Vacant	E		E
1			Vacant	

Again we have,

- There are three floors between G and C but both of them don't live in an odd numbered flat.

From the above conditions there are two more possibilities. Case 1 split into case 1a and case 2 split into case 2a.

@QuizByMickey

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5		G		G		C		C
4	D	B	D	B	D	B	D	B
3	H		H		H		H	
2	Vacant	E		E	Vacant	E		E
1		C	Vacant	C		G	Vacant	G

Again we have,

- The number of persons living between D and A in the same numbered flat is **one more than** the number of persons living between G and B in the same numbered flat.
- F lives on a floor above A.
- Neither the vacant flats are in the same numbered flats nor three floors below D.

From the above conditions Case 1a and Case 2a get eliminated because the number of persons living between D and A is one more than the person living between G and B, which is not satisfied.

Case 2 gets eliminated because neither the vacant flats are in the same numbered flats nor three floors below D, which is not satisfied.

Hence, Case 1 is the final arrangement.

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5	F	G	F	G		C		C
4	D	B	D	B	D	B	D	B
3	H	Vacant	H	Vacant	H		H	
2	Vacant	E	A	E	Vacant	E		E
1	A	C	Vacant	C		G	Vacant	G

Answer: E (In all the other options the persons are living on odd numbered floor, except in option e)

15. Questions

Final arrangement:

Floors	Flat 1	Flat 2
5	F	G
4	D	B
3	H	Vacant
2	Vacant	E
1	A	C

We have,

- There is only one floor between B and E, both living in the same flat, but neither on an odd numbered floor nor in the odd numbered flat.
- One of the flats below H's flat is vacant.
- D lives immediately above H.
- H lives in a flat which is immediately northwest of E.

From the above conditions, there are two possibilities

Floors	Case 1		Case 2	
	Flat 1	Flat 2	Flat 1	Flat 2
5				
4	D	B	D	B
3	H		H	
2	Vacant	E		E
1			Vacant	

Again we have,

- There are three floors between G and C but both of them don't live in an odd numbered flat.

From the above conditions there are two more possibilities. Case 1 split into case 1a and case 2 split into case 2a.

@QuizByMickey

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5		G		G		C		C
4	D	B	D	B	D	B	D	B
3	H		H		H		H	
2	Vacant	E		E	Vacant	E		E
1		C	Vacant	C		G	Vacant	G

Again we have,

- The number of persons living between D and A in the same numbered flat is **one more than** the number of persons living between G and B in the same numbered flat.
- F lives on a floor above A.
- Neither the vacant flats are in the same numbered flats nor three floors below D.

From the above conditions Case 1a and Case 2a get eliminated because the number of persons living between D and A is one more than the person living between G and B, which is not satisfied.

Case 2 gets eliminated because neither the vacant flats are in the same numbered flats nor three floors below D, which is not satisfied.

Hence, Case 1 is the final arrangement.

Floors	Case 1		Case 2		Case 1a		Case 2a	
	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2	Flat 1	Flat 2
5	F	G	F	G		C		C
4	D	B	D	B	D	B	D	B
3	H	Vacant	H	Vacant	H		H	
2	Vacant	E	A	E	Vacant	E		E
1	A	C	Vacant	C		G	Vacant	G

Answer: D

16. Questions

Input: 1 3 6 ! \$ 2 * M ^ A Z & P Q @ K # 4 T 7 9

For Step I: All the elements are written in reverse order in a way that last element becomes the first element.

Step I: 9 7 T 4 # K @ Q P & Z A ^ M * 2 \$! 6 3 1

For Step II: For digit- Each digit is subtracted from 9.

Eg: 9-9=0, 9-7=2...

For alphabets : Each alphabet is changed with the opposite alphabets as per the English alphabetical series.

Eg: A →Z, T→G...

For symbols: Each symbol from the left is interchanged with the symbols from the right end. Eg: # →!, @ → \$...

Step II: 0 2 G 5 ! P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step III: The digits which are immediately preceded by a letter and immediately followed by a symbol are written in a way that first comes the symbol followed by the letter which is followed by digit.

Step III: 0 2 ! G 5 P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step IV: Interchange the elements by first element with second element , third element with fourth element and so on.

Step IV: 2 0 G ! P 5 J \$ * K Z A N ^ 7 & # @ 6 3 8

For Step V: Symbols are first arranged the way they come in step IV , Letters are arranged in a way that the last letter in step IV comes first and so on, for digits it is arranged in ascending order.

Step V: ! \$ * ^ & # @ N A Z K J P G 0 2 3 5 6 7 8

Answer: D

Step III: 0 2 ! G 5 P \$ J K * A Z ^ N & 7 @ # 3 6 8

The eighth element from the right end in step III is N and the seventh element to the left of 8 is \$.

17. Questions

Input: 1 3 6 ! \$ 2 * M ^ A Z & P Q @ K # 4 T 7 9

For Step I: All the elements are written in reverse order in a way that last element becomes the first element.

Step I: 9 7 T 4 # K @ Q P & Z A ^ M * 2 \$! 6 3 1

For Step II: For digit- Each digit is subtracted from 9.

Eg: 9-9=0, 9-7=2...

For alphabets : Each alphabet is changed with the opposite alphabets as per the English alphabetical series.

Eg: A →Z, T→G...

For symbols: Each symbol from the left is interchanged with the symbols from the right end. Eg: # →!, @ → \$...

@QuizByMickey

Step II: 0 2 G 5 ! P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step III: The digits which are immediately preceded by a letter and immediately followed by a symbol are written in a way that first comes the symbol followed by the letter which is followed by digit.

Step III: 0 2 ! G 5 P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step IV: Interchange the elements by first element with second element , third element with fourth element and so on.

Step IV: 2 0 G ! P 5 J \$ * K Z A N ^ 7 & # @ 6 3 8

For Step V: Symbols are first arranged the way they come in step IV , Letters are arranged in a way that the last letter in step IV comes first and so on, for digits it is arranged in ascending order.

Step V: ! \$ * ^ & # @ N A Z K J P G 0 2 3 5 6 7 8

Answer: B

There are **two** letters in step IV which are immediately preceded by a number and followed by a symbol.

Step IV: 2 0 G ! P 5 J \$ * K Z A N ^ 7 & # @ 6 3 8

18. Questions

Input: 1 3 6 ! \$ 2 * M ^ A Z & P Q @ K # 4 T 7 9

For Step I: All the elements are written in reverse order in a way that last element becomes the first element.

Step I: 9 7 T 4 # K @ Q P & Z A ^ M * 2 \$! 6 3 1

For Step II: For digit- Each digit is subtracted from 9.

Eg: 9-9=0, 9-7=2...

For alphabets : Each alphabet is changed with the opposite alphabets as per the English alphabetical series.

Eg: A →Z, T→G...

For symbols: Each symbol from the left is interchanged with the symbols from the right end. Eg: # →!, @ → \$...

Step II: 0 2 G 5 ! P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step III: The digits which are immediately preceded by a letter and immediately followed by a symbol are written in a way that first comes the symbol followed by the letter which is followed by digit.

Step III: 0 2 ! G 5 P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step IV: Interchange the elements by first element with second element , third element with fourth element and so on.

Step IV: 2 0 G ! P 5 J \$ * K Z A N ^ 7 & # @ 6 3 8

For Step V: Symbols are first arranged the way they come in step IV , Letters are arranged in a way that the last letter in step IV comes first and so on, for digits it is arranged in ascending order.

Step V: ! \$ * ^ & # @ N A Z K J P G 0 2 3 5 6 7 8

Answer: E

In step I, IV and V 6 is positioned third from the end (either left or from right).

Step I: 9 7 T 4 # K @ Q P & Z A ^ M * 2 \$! 6 3 1

Step IV: 2 0 G ! P 5 J \$ * K Z A N ^ 7 & # @ 6 3 8

Step V: ! \$ * ^ & # @ N A Z K J P G 0 2 3 5 6 7 8

19. Questions

Input: 1 3 6 ! \$ 2 * M ^ A Z & P Q @ K # 4 T 7 9

For Step I: All the elements are written in reverse order in a way that last element becomes the first element.

Step I: 9 7 T 4 # K @ Q P & Z A ^ M * 2 \$! 6 3 1

For Step II: For digit- Each digit is subtracted from 9.

Eg: 9-9=0, 9-7=2...

For alphabets : Each alphabet is changed with the opposite alphabets as per the English alphabetical series.

Eg: A →Z, T→G...

For symbols: Each symbol from the left is interchanged with the symbols from the right end. Eg: # →!, @ → \$...

Step II: 0 2 G 5 ! P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step III: The digits which are immediately preceded by a letter and immediately followed by a symbol are written in a way that first comes the symbol followed by the letter which is followed by digit.

Step III: 0 2 ! G 5 P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step IV: Interchange the elements by first element with second element, third element with fourth element and so on.

Step IV: 2 0 G ! P 5 J \$ * K Z A N ^ 7 & # @ 6 3 8

For Step V: Symbols are first arranged the way they come in step IV, Letters are arranged in a way that the last letter in step IV comes first and so on, for digits it is arranged in ascending order.

Step V: ! \$ * ^ & # @ N A Z K J P G 0 2 3 5 6 7 8

@QuizByMickey

Answer: C

There are **seven** alphabets between the second element from the left and fifth element from the right in step II.

Step II: 0 2 G 5 ! P \$ J K * A Z ^ N & 7 @ # 3 6 8

20. Questions

Input: 1 3 6 ! \$ 2 * M ^ A Z & P Q @ K # 4 T 7 9

For Step I: All the elements are written in reverse order in a way that last element becomes the first

element.

Step I: 9 7 T 4 # K @ Q P & Z A ^ M * 2 \$! 6 3 1

For Step II: For digit- Each digit is subtracted from 9.

Eg: $9-9=0$, $9-7=2$...

For alphabets : Each alphabet is changed with the opposite alphabets as per the English alphabetical series.

Eg: $A \rightarrow Z$, $T \rightarrow G$...

For symbols: Each symbol from the left is interchanged with the symbols from the right end. Eg: $\# \rightarrow !$, $@ \rightarrow \$$...

Step II: 0 2 G 5 ! P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step III: The digits which are immediately preceded by a letter and immediately followed by a symbol are written in a way that first comes the symbol followed by the letter which is followed by digit.

Step III: 0 2 ! G 5 P \$ J K * A Z ^ N & 7 @ # 3 6 8

For Step IV: Interchange the elements by first element with second element , third element with fourth element and so on.

Step IV: 2 0 G ! P 5 J \$ * K Z A N ^ 7 & # @ 6 3 8

For Step V: Symbols are first arranged the way they come in step IV , Letters are arranged in a way that the last letter in step IV comes first and so on, for digits it is arranged in ascending order.

Step V: ! \$ * ^ & # @ N A Z K J P G 0 2 3 5 6 7 8

Answer: A

As many elements to the right of N as to the left of G in step V.

Step V: ! \$ * ^ & # @ N A Z K J P G 0 2 3 5 6 7 8
