

1. Questions

Study the following information carefully and answer the given questions.

Twelve persons viz. L-W are sitting one after another in an examination hall which has a total of thirteen seats. There is one vacant seat in an examination hall.

R sits six seats before N, but two seats after T. V sits two seats after N. The number of seats after V is **one less** than the number of seats before O. M sits adjacent to R. As many seats before M as after P. Only three seats are between P and L. S sits three persons after L. Q sits immediately before U. The number of persons sitting after U is **three more** than the number of persons sitting between T and W.

Who among the following person sits five persons after the one who sits two persons after M?

- a. The one who sits two persons after S
- b. The one who sits immediately after V
- c. The one who sits two persons before T
- d. The one who sits between R and U
- e. No one

2. Questions

What is the position of T with respect to the one who sits three persons before R and how many persons sits before T?

- a. Two persons after, as many persons sit before U
- b. Immediately after, as many persons sit after P
- c. Five persons after, as many persons sit before V
- d. Immediately after, as many persons sit after S
- e. Four persons before, as many persons sit before P

3. Questions

If all the persons are sitting in a reverse alphabetical order from first to last (Except vacant), then who among the following person remains in the same position?

- a. S and R
- b. U and Q
- c. P and N
- d. Q and W
- e. L and M

4. Questions

If M is absent and Z sits in the vacant seat, then which of the following seats is vacant and in which seat does Z sit in the examination hall and who among the following sits immediately after Z respectively?

- a. Fifth from the first, ninth from the last and N
- b. Second from the last, Fourth from the last and U
- c. Eighth from the first, eleventh from the last and W
- d. Fourth from the first, second from the last and V
- e. None of these

5. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- a. Only two persons sit between U and O
- b. No one sits before the one who sits two persons before L
- c. V sits immediately after R
- d. As many persons sits before Q as after S
- e. O sits exactly between W and T

6. Questions

Study the following information carefully and answer the given questions

Nine persons—I, J, K, L, M, N, O, P and Q buy cars in different months April, May and June of the years 2014, 2015 and 2016. Each person has different cars viz. Audi, BMW, Ford, Benz, Honda, Kia, Skoda, Jeep and Tesla

K buys in the leap year and buys immediately after the one who has Skoda. Only three persons buy between the one who buys Skoda and O. The number of persons buying before O is **one more** than the number of persons buying after the one who has a Benz. Q doesn't buy Ford, but buys in the same year as the one who buys Ford. J buys in the same month as the one who has Benz but not in June. J doesn't buy a benz. The one who buys Honda in the same month as O, but not in the same year as K. O doesn't buy a honda. Only two persons buy between N and I, where neither of them buys in a leap year nor in the month of June. The one who buys Jeep buys one year after J but before Q and the one who buys Ford. Q buys two years after the one who has Tesla. As many persons buy between N and Q as between the one who has Ford and Audi. The one who has Audi buys immediately after the one who has Kia. L buys one year before M. L doesn't have BMW.

The one who buys a car in June 2016 and June 2014 respectively, has which of the following cars?

- a. Kia and Jeep
- b. Tesla and BMW
- c. Benz and Honda

d. Skoda and Jeep

e. Ford and Audi

7. Questions

The number of persons buying before ____ is two less than the number of persons buying after ____

a. The one who has Kia, L

b. I, the one who has Benz

c. The one who has Tesla, M

d. The one who has Jeep, Q

e. L, the one who has Audi

8. Questions

Who among the following person buy in the month which has an odd number of days in the year, which is an even-numbered but not a leap year?

I). The one who buys two persons after the one who has a BMW

II). The one who buys Kia

III). The one who buys two years before the one who has Benz.

a. Only II

b. Only II and III

c. All I, II and III

d. Only I

e. Only I and III

9. Questions

If P doesn't buy a car, then which of the following month and year is vacant and which of the following cars is available?

a. June 2016 and Skoda

b. April 2014 and Tesla

c. May 2015 and Jeep

d. April 2016 and Ford

e. May 2014 and Kia

@QuizByMickey

10. Questions

Which of the following statements is TRUE as per the final arrangement?

- a. The one who has Kia bought in April month of the year 2014
- b. Only two persons buy between the one who buy BMW and Benz
- c. N bought immediately before the one who buys Honda
- d. P bought two persons after the one who buys audi
- e. All the given statements are true

11. Questions

Study the following information carefully and answer the below questions.

Nine friends namely – Adam, Jonty, Mike, Tom, Joy, Peter, Varun, Smith and Paul attends a seminar. Each person likes different number viz. 3, 6, 9, 11, 13, 16, 17, 21 and 24. They shake hands with each other but in a particular way. The one who likes prime number do not shake hands with the one who likes non-prime number and vice-versa. All person shake hands with at least one person.

The one who likes 24 shakes hands with Jonty. Varun likes 11 and shakes hands with all the person. The one who likes 21 shakes hand with Adam. Adam likes 6 but doesn't shake hands with Joy. Smith likes perfect square number and shakes hand with only two person. Tom shakes hands with the one who likes 16 but not with Joy. The one who shakes hands with Tom also shakes hands with Jonty. Adam shakes hands with two persons but not with Smith. Mike neither likes 13 nor shakes hands with Paul. The one who likes 13 shakes hands with the one who likes lowest number. Person who likes perfect square number shakes hands with at least two persons. Joy Shakes hands with Smith but doesn't likes 21. Paul shake hands with one person. Sum of numbers liked by Paul and Jonty is 26.

Who among the following person likes 3?

- a. Mike
- b. Peter
- c. Tom
- d. Paul
- e. None of these

12. Questions

With whom does Tom shakes hands?

- a. Smith and Peter
- b. Paul and Smith
- c. Joy and Adam
- d. Smith, Paul and Jonty
- e. None of these

@QuizByMickey

13. Questions

What is the sum of numbers likes by the person who shakes hands with Jonty?

- a. 30
- b. 36
- c. 43
- d. 37
- e. None of these

14. Questions

Who among the following person likes 21?

- a. Smith
- b. Tom
- c. Mike
- d. Peter
- e. None of these

15. Questions

Which of the following combination of person hand shake with Mike?

- a. Paul and Peter
- b. Varun and Paul
- c. Tom and Varun
- d. Varun, Paul and Peter
- e. None of these

16. Questions

Study the following information carefully and answer the given questions.

SAGE MTOG RIHW JNUP CAYL

If the first letter of each word is changed to the third preceding letter as per the English alphabetical series, then how many meaningful English words will be formed?

- a. One
- b. Three
- c. Two
- d. More than three

e. None

17. Questions

How many letters are there in the English alphabetical series between the third letter of the second word from the left end and the fourth letter of the third word from the right end of the given words?

- a. 12
- b. 9
- c. 13
- d. 10
- e. 7

18. Questions

If all the letters are arranged in alphabetical order within the word, then which of the following letter will be the first letter of the second word from the left end and which of the following word remains unchanged?

- a. M, YACL
- b. H, RIHW
- c. G, None
- d. A, SAGE
- e. T, None

19. Questions

If in each word all the vowels are changed to the immediate succeeding letter and all the consonants are changed to immediate preceding letter as per the alphabetical series, then which of the following word has repeated letters?

- a. MTOG, JNUP
- b. SAGE, CAYL
- c. RIHW, CAYL
- d. MTOG, SAGE
- e. RIHW, JNUP

@QuizByMickey

20. Questions

If all the letters are arranged in reverse alphabetical order within the word from the left end, and if the third letter from the left end in each word is changed to the immediate preceding letter as per the alphabetical series, then which of the following formed words thus form a meaningful word?

- a. MTOG
- b. CAYL
- c. SAGE
- d. JNUP
- e. None

Explanations:

1. Questions

Final arrangement:

W
O
T
M
R
L
Q
U
S
P
N
Vacant
V

@QuizByMickey

We have,

- R sits six seats before N, but two seats after T.
- V sits two seats after N.
- The number of seats after V is **one less** than the number of seats before O.
- M sits adjacent to R.

From the above conditions, there are four possibilities

Case 1	Case 2	Case 2a	Case 3
			T
T	O	O	M
O	T	T	R
R	M		O
M	R	R	
		M	
			N
N			
	N	N	V
V			
	V	V	

Again, we have

- As many seats before M as after P.
- Only three seats are between P and L.
- S sits three persons after L.

From the above conditions, case 1 and case 3 get eliminated because S sits three persons after L, which is not satisfied.

@QuizByMickey

Case 1	Case 2	Case 2a	Case 3
	Vacant/	Vacant/	T
T	O	O	M
O	T	T	R
R	M	L	O
M	R	R	
	L	M	
		S	
		P	
	S	Vacant/	N
N	P	Vacant/	
	N	N	V
V	Vacant/	Vacant/	
	V	V	

Again, we have

- Q sits immediately before U.
- The number of persons sitting after U is **three more** than the number of persons sitting between T and W.

From the above conditions, case-2a gets eliminated because the number of persons sitting after U is **three more** than the number of persons sitting between T and W, which is not satisfied.

Hence, case 2 shows the final arrangement.

Answer: A

2. Questions

Final arrangement:

@QuizByMickey

W
O
T
M
R
L
Q
U
S
P
N
Vacant
V

We have,

- R sits six seats before N, but two seats after T.
- V sits two seats after N.
- The number of seats after V is **one less** than the number of seats before O.
- M sits adjacent to R.

From the above conditions, there are four possibilities

@QuizByMickey

Case 1	Case 2	Case 2a	Case 3
			T

6. Questions

Final arrangement:

@QuizByMickey

Months	Years	Person	Cars
April	2014	N	Tesla
May		J	Kia
June		O	Audi
April	2015	I	BMW
May		P	Jeep
June		L	Honda
April	2016	Q	Skoda
May		K	Benz
June		M	Ford

We have,

- K buys in the leap year and buys immediately after the one who has Skoda.
- Only three persons buy between the one who buys Skoda and O.
- The number of persons buying before O is **one more** than the number of persons buying after the one who has Benz.

From the above conditions, there are three possibilities.

@QuizByMickey

Months	Years	Case 1		Case 2		Case 3	
		Person	Cars	Person	Cars	Person	Cars
April	2014						
May		O					
June				O			
April	2015					O	
May							
June			Skoda				
April	2016	K			Skoda		Benz
May				K	Benz		Skoda
June			Benz			K	

Again, we have

- Q doesn't buy Ford, but buys in the same year as the one who has Ford.
- J buys in the same month as the one who has Benz but not in June.
- J doesn't buy a benz.
- The one who buys Honda buys in the same month as O, but not in the same year as K.
- O doesn't buy a honda.
- Only two persons buy between N and I, where neither of them buys in a leap year nor in the month of June.
- The one who buys Jeep buys one year after J but before Q and the one who buys Ford.

From the above condition, case 1 gets eliminated because J buys in the same month as the one who has Benz but not in June, which is not satisfied and case 3 splits into case-3a.

@QuizByMickey

Months	Years	Case 1		Case 2		Case 3		Case 3a	
		Person	Cars	Person	Cars	Person	Cars	Person	Cars
April	2014	N/I		N/I		J	Honda	J	Honda
May		O		J		N/I		N/I	
June				O

@QuizByMickey

Months	Years	Case 1		Case 2		Case 3		Case 3a	
		Person	Cars	Person	Cars	Person	Cars	Person	Cars
April	2014	N/I		N/I		J	Honda	J	Honda
May		O		J		N/I		N/I	
June				O					
April	2015	N/I		N/I		O	Jeep	O	Jeep
May			Honda		Jeep	N/I	Ford	N/I	
June			Skoda		Honda	Q			
April	2016	K		Q	Skoda		Benz	Q/	Benz
May				K	Benz		Skoda	Q/	Skoda
June			Benz		Ford	K		K	Ford

Again, we have

- Q buys two years after the one who has Tesla.
- As many persons buy between N and Q as between the one who has Ford and Audi.
- The one who has Audi buys immediately after the one who has Kia.
- L buys one year before M.
- L doesn't have a BMW.

From the above conditions, Case-3 gets eliminated because Q buys two years after the one who has Tesla, which is not satisfied. And case 3a gets eliminated because L doesn't have BMW, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@QuizByMickey

Months	Years	Case 2		Case 3		Case 3a	
		Person	Cars	Person	Cars	Person	Cars
April	2014	N	Tesla	J	Honda	J	Honda
May		J	Kia	N/I		I	Tesla
June		O	Audi			L	BMW
April	2015	I	BMW	O	Jeep	O	Jeep
May		P	Jeep	N/I	Ford	N	Kia
June		L	Honda	Q		M	Audi
April	2016	Q	Skoda		Benz	P	Benz
May		K	Benz		Skoda	Q	Skoda
June		M	Ford	K		K	Ford

Answer: B

9. Questions

Final arrangement:

@QuizByMickey

Months	Years	Person	Cars
April	2014	N	Tesla
May		J	Kia
June		O	Audi
April	2015	I	BMW
May		P	Jeep
June		L	Honda
April	2016	Q	Skoda
May		K	Benz
June		M	Ford

We have,

- K buys in the leap year and buys immediately after the one who has Skoda.
- Only three persons buy between the one who buys Skoda and O.
- The number of persons buying before O is **one more** than the number of persons buying after the one who has Benz.

From the above conditions, there are three possibilities.

@QuizByMickey

Months	Years	Case 1		Case 2		Case 3	
		Person	Cars	Person	Cars	Person	Cars
April	2014						
May		O					
June				O			
April	2015					O	
May							
June			Skoda				
April	2016	K			Skoda		Benz
May				K	Benz		Skoda
June			Benz			K	

Again, we have

- Q doesn't buy Ford, but buys in the same year as the one who has Ford.
- J buys in the same month as the one who has Benz but not in June.
- J doesn't buy a benz.
- The one who buys Honda buys in the same month as O, but not in the same year as K.
- O doesn't buy a honda.
- Only two persons buy between N and I, where neither of them buys in a leap year nor in the month of June.
- The one who buys Jeep buys one year after J but before Q and the one who buys Ford.

From the above condition, case 1 gets eliminated because J buys in the same month as the one who has Benz but not in June, which is not satisfied and case 3 splits into case-3a.

@QuizByMickey

Months	Years	Case 1		Case 2		Case 3		Case 3a	
		Person	Cars	Person	Cars	Person	Cars	Person	Cars
April	2014	N/I		N/I		J	Honda	J	Honda
May		O		J		N/I		N/I	
June				O					
April	2015	N/I		N/I		O	Jeep	O	Jeep
May			Honda		Jeep	N/I	Ford	N/I	
June			Skoda		Honda	Q			
April	2016	K		Q	Skoda		Benz	Q/	Benz
May				K	Benz		Skoda	Q/	Skoda
June			Benz		Ford	K		K	Ford

Again, we have

- Q buys two years after the one who has Tesla.
- As many persons buy between N and Q as between the one who has Ford and Audi.
- The one who has Audi buys immediately after the one who has Kia.
- L buys one year before M.
- L doesn't have a BMW.

From the above conditions, Case-3 gets eliminated because Q buys two years after the one who has Tesla, which is not satisfied. And case 3a gets eliminated because L doesn't have BMW, which is not satisfied.

Hence, Case-2 shows the final arrangement.

@QuizByMickey

June		M	Ford	K		K	Ford

Answer: C

10. Questions

Final arrangement:

@QuizByMickey

Months	Years	Person	Cars
April	2014	N	Tesla
May		J	Kia
June		O	Audi
April	2015	I	BMW
May		P	Jeep
June		L	Honda
April	2016	Q	Skoda
May		K	Benz
June		M	Ford

We have,

- K buys in the leap year and buys immediately after the one who has Skoda.
- Only three persons buy between the one who buys Skoda and O.
- The number of persons buying before O is **one more** than the number of persons buying after the one who has Benz.

From the above conditions, there are three possibilities.

@QuizByMickey

Months	Years	Case 1		Case 2		Case 3	
		Person	Cars	Person	Cars	Person	Cars
April	2014						
May		O					
June				O			
April	2015					O	
May							
June			Skoda				
April	2016	K			Skoda		Benz
May				K	Benz		Skoda
June			Benz			K	

Again, we have

- Q doesn't buy Ford, but buys in the same year as the one who has Ford.
- J buys in the same month as the one who has Benz but not in June.
- J doesn't buy a benz.
- The one who buys Honda buys in the same month as O, but not in the same year as K.
- O doesn't buy a honda.
- Only two persons buy between N and I, where neither of them buys in a leap year nor in the month of June.
- The one who buys Jeep buys one year after J but before Q and the one who buys Ford.

From the above condition, case 1 gets eliminated because J buys in the same month as the one who has Benz but not in June, which is not satisfied and case 3 splits into case-3a.

@QuizByMickey

Months	Years	Case 1		Case 2		Case 3		Case 3a	
		Person	Cars	Person	Cars	Person	Cars	Person	Cars
April	2014	N/I		N/I		J	Honda	J	Honda
May		O		J		N/I		N/I	
June				O					
April	2015	N/I		N/I		O	Jeep	O	Jeep

April	2016	Q	Skoda		Benz	P	Benz
May		K	Benz		Skoda	Q	Skoda
June		M	Ford	K		K	Ford

Answer: D

11. Questions

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

@QuizByMickey

We have:

- Person who likes perfect square number shakes hands with at least two persons.
- Smith likes perfect square number and shakes hand with only two person, that means we have two possible number for Smith, in case (1) Smith likes 9, in case (2) Smith likes 16.
- Joy Shakes hands with Smith but doesn't likes 21, that means Smith also shake hands with Joy.
- Varun likes 11 and shakes hands with all the person, that means Varun shake hands with all

the person likes prime number.

- Paul shake hands with one person.
- Sum of numbers liked by Paul and Jonty is 26, that means only possible combination is (9, 17), as the one who likes perfect square number, must shake hands with at least two persons and Paul shake hands with only one person, thus Paul likes 17 and Jonty likes 9.
- Thus, case (1) is not valid.

Based on above given information we have:

Case (1)			Case (2)		
Name	Number	Shake Hands	Name	Number	Shake Hands
Adam			Adam		
Jonty			Jonty	9	
Mike			Mike		
Tom			Tom		
Joy		Smith	Joy		Smith
Peter			Peter		
Varun	11		Varun	11	Paul
Smith	9	Joy	Smith	16	Joy
Paul			Paul	17	Varun

Case (1) is not valid as Jonty likes 9.

Again, we have:

- The one who likes 21 shakes hand with Adam.
- Adam likes 6 but doesn't shake hands with Joy.
- As, Joy doesn't like 21, that means Joy must likes 24.
- The one who likes 24 shakes hands with Jonty, that means Joy shakes hands with Jonty.
- Adam shakes hands with two persons but not with Smith.
- Tom shakes hands with the one who likes 16 but not with Joy, that means Tom likes 21 and shakes hands with Smith.
- Mike neither likes 13 nor shakes hands with Paul, as only remaining persons are those who likes prime number, that means Mike likes 3 and Peter likes 13.
- The one who shakes hands with Tom also shakes hands with Jonty.
- As, Smith only shakes hands with two person and Joy doesn't shakes hands with Tom, thus Adam shakes hands with Jonty.
- The one who likes 13 shakes hands with the one who likes lowest number, that means Peter shakes hands with Mike.

Based on above given information we have final arrangement as follow:

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

Answer: A

12. Questions

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

We have:

- Person who likes perfect square number shakes hands with at least two persons.
- Smith likes perfect square number and shakes hand with only two person, that means we have two possible number for Smith, in case (1) Smith likes 9, in case (2) Smith likes 16.
- Joy Shakes hands with Smith but doesn't likes 21, that means Smith also shake hands with Joy.
- Varun likes 11 and shakes hands with all the person, that means Varun shake hands with all the person likes prime number.
- Paul shake hands with one person.
- Sum of numbers liked by Paul and Jonty is 26, that means only possible combination is (9, 17), as the one who likes perfect square number, must shake hands with at least two persons and Paul shake hands with only one person, thus Paul likes 17 and Jonty likes 9.
- Thus, case (1) is not valid.

Based on above given information we have:

Case (1)			Case (2)		
Name	Number	Shake Hands	Name	Number	Shake Hands
Adam			Adam		
Jonty			Jonty	9	
Mike			Mike		
Tom			Tom		
Joy		Smith	Joy		Smith
Peter			Peter		
Varun	11		Varun	11	Paul
Smith	9	Joy	Smith	16	Joy
Paul			Paul	17	Varun

Case (1) is not valid as Jonty likes 9.

Again, we have:

- The one who likes 21 shakes hand with Adam.
- Adam likes 6 but doesn't shake hands with Joy.
- As, Joy doesn't like 21, that means Joy must likes 24.
- The one who likes 24 shakes hands with Jonty, that means Joy shakes hands with Jonty.
- Adam shakes hands with two persons but not with Smith.
- Tom shakes hands with the one who likes 16 but not with Joy, that means Tom likes 21 and shakes hands with Smith.
- Mike neither likes 13 nor shakes hands with Paul, as only remaining persons are those who likes prime number, that means Mike likes 3 and Peter likes 13.
- The one who shakes hands with Tom also shakes hands with Jonty.
- As, Smith only shakes hands with two person and Joy doesn't shakes hands with Tom, thus Adam shakes hands with Jonty.
- The one who likes 13 shakes hands with the one who likes lowest number, that means Peter shakes hands with Mike.

Based on above given information we have final arrangement as follow:

@QuizByMickey

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

Answer: B

13. Questions

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

We have:

- Person who likes perfect square number shakes hands with at least two persons.
- Smith likes perfect square number and shakes hand with only two person, that means we have two possible number for Smith, in case (1) Smith likes 9, in case (2) Smith likes 16.
- Joy Shakes hands with Smith but doesn't likes 21, that means Smith also shake hands with Joy.
- Varun likes 11 and shakes hands with all the person, that means Varun shake hands with all the person likes prime number.
- Paul shake hands with one person.
- Sum of numbers liked by Paul and Jonty is 26, that means only possible combination is (9, 17), as the one who likes perfect square number, must shake hands with at least two persons and Paul shake hands with only one person, thus Paul likes 17 and Jonty likes 9.
- Thus, case (1) is not valid.

Based on above given information we have:

Case (1)			Case (2)		
Name	Number	Shake Hands	Name	Number	Shake Hands
Adam			Adam		
Jonty			Jonty	9	
Mike			Mike		
Tom			Tom		
Joy		Smith	Joy		Smith
Peter			Peter		
Varun	11		Varun	11	Paul
Smith	9	Joy	Smith	16	Joy
Paul			Paul	17	Varun

Case (1) is not valid as Jonty likes 9.

Again, we have:

- The one who likes 21 shakes hand with Adam.
- Adam likes 6 but doesn't shake hands with Joy.
- As, Joy doesn't like 21, that means Joy must likes 24.
- The one who likes 24 shakes hands with Jonty, that means Joy shakes hands with Jonty.
- Adam shakes hands with two persons but not with Smith.
- Tom shakes hands with the one who likes 16 but not with Joy, that means Tom likes 21 and shakes hands with Smith.
- Mike neither likes 13 nor shakes hands with Paul, as only remaining persons are those who likes prime number, that means Mike likes 3 and Peter likes 13.
- The one who shakes hands with Tom also shakes hands with Jonty.
- As, Smith only shakes hands with two person and Joy doesn't shakes hands with Tom, thus Adam shakes hands with Jonty.
- The one who likes 13 shakes hands with the one who likes lowest number, that means Peter shakes hands with Mike.

Based on above given information we have final arrangement as follow:

@QuizByMickey

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

Answer: A

14. Questions

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

We have:

- Person who likes perfect square number shakes hands with at least two persons.
- Smith likes perfect square number and shakes hand with only two person, that means we have two possible number for Smith, in case (1) Smith likes 9, in case (2) Smith likes 16.
- Joy Shakes hands with Smith but doesn't likes 21, that means Smith also shake hands with Joy.
- Varun likes 11 and shakes hands with all the person, that means Varun shake hands with all the person likes prime number.
- Paul shake hands with one person.
- Sum of numbers liked by Paul and Jonty is 26, that means only possible combination is (9, 17), as the one who likes perfect square number, must shake hands with at least two persons and Paul shake hands with only one person, thus Paul likes 17 and Jonty likes 9.
- Thus, case (1) is not valid.

Based on above given information we have:

Case (1)			Case (2)		
Name	Number	Shake Hands	Name	Number	Shake Hands
Adam			Adam		
Jonty			Jonty	9	
Mike			Mike		
Tom			Tom		
Joy		Smith	Joy		Smith
Peter			Peter		
Varun	11		Varun	11	Paul
Smith	9	Joy	Smith	16	Joy
Paul			Paul	17	Varun

Case (1) is not valid as Jonty likes 9.

Again, we have:

- The one who likes 21 shakes hand with Adam.
- Adam likes 6 but doesn't shake hands with Joy.
- As, Joy doesn't like 21, that means Joy must likes 24.
- The one who likes 24 shakes hands with Jonty, that means Joy shakes hands with Jonty.
- Adam shakes hands with two persons but not with Smith.
- Tom shakes hands with the one who likes 16 but not with Joy, that means Tom likes 21 and shakes hands with Smith.
- Mike neither likes 13 nor shakes hands with Paul, as only remaining persons are those who likes prime number, that means Mike likes 3 and Peter likes 13.
- The one who shakes hands with Tom also shakes hands with Jonty.
- As, Smith only shakes hands with two person and Joy doesn't shakes hands with Tom, thus Adam shakes hands with Jonty.
- The one who likes 13 shakes hands with the one who likes lowest number, that means Peter shakes hands with Mike.

Based on above given information we have final arrangement as follow:

@QuizByMickey

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

Answer: B

15. Questions

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

We have:

- Person who likes perfect square number shakes hands with at least two persons.
- Smith likes perfect square number and shakes hand with only two person, that means we have two possible number for Smith, in case (1) Smith likes 9, in case (2) Smith likes 16.
- Joy Shakes hands with Smith but doesn't likes 21, that means Smith also shake hands with Joy.
- Varun likes 11 and shakes hands with all the person, that means Varun shake hands with all the person likes prime number.
- Paul shake hands with one person.
- Sum of numbers liked by Paul and Jonty is 26, that means only possible combination is (9, 17), as the one who likes perfect square number, must shake hands with at least two persons and Paul shake hands with only one person, thus Paul likes 17 and Jonty likes 9.
- Thus, case (1) is not valid.

Based on above given information we have:

Case (1)			Case (2)		
Name	Number	Shake Hands	Name	Number	Shake Hands
Adam			Adam		
Jonty			Jonty	9	
Mike			Mike		
Tom			Tom		
Joy		Smith	Joy		Smith
Peter			Peter		
Varun	11		Varun	11	Paul
Smith	9	Joy	Smith	16	Joy
Paul			Paul	17	Varun

Case (1) is not valid as Jonty likes 9.

Again, we have:

- The one who likes 21 shakes hand with Adam.
- Adam likes 6 but doesn't shake hands with Joy.
- As, Joy doesn't like 21, that means Joy must likes 24.
- The one who likes 24 shakes hands with Jonty, that means Joy shakes hands with Jonty.
- Adam shakes hands with two persons but not with Smith.
- Tom shakes hands with the one who likes 16 but not with Joy, that means Tom likes 21 and shakes hands with Smith.
- Mike neither likes 13 nor shakes hands with Paul, as only remaining persons are those who likes prime number, that means Mike likes 3 and Peter likes 13.
- The one who shakes hands with Tom also shakes hands with Jonty.
- As, Smith only shakes hands with two person and Joy doesn't shakes hands with Tom, thus Adam shakes hands with Jonty.
- The one who likes 13 shakes hands with the one who likes lowest number, that means Peter shakes hands with Mike.

Based on above given information we have final arrangement as follow:

@QuizByMickey

Case (2)		
Name	Number	Shake Hands
Adam	6	Tom & Jonty
Jonty	9	Joy & Adam
Mike	3	Varun & Peter
Tom	21	Smith & Adam
Joy	24	Smith & Jonty
Peter	13	Varun & Mike
Varun	11	Paul, Mike & Peter
Smith	16	Joy & Tom
Paul	17	Varun

Answer: E

16. Questions

Answer: A

Given series:

SAGE MTOG RIHW JNUP CAYL

The first letter of each word is changed to the third preceding alphabet

PAGE JTOG OIHW GNUP ZAYL

Only one meaningful word is formed.

17. Questions

Answer: E

Given series:

SAGE MTOG RIHW JNUP CAYL

P, Q, R, S, T, U and V are the seven letters between O and W in the alphabetical series.

18. Questions

Answer: C

Given series:

SAGE MTOG RIHW JNUP CAYL

Arranged in alphabetical order

AEGS GMOT HIRW JNPU ACLY

G will be the first letter of the second word from the left end

@QuizByMickey

19. Questions**Answer: B**

Given series:

SAGE MTOG RIHW JNUP CAYL

Vowels -> succeeding letter, Consonants-> preceding letter

RBFF LSPF QJGV IMVO BBXK**20. Questions****Answer: E**

Given series:

SAGE MTOG RIHW JNUP YACL

Arranged in reverse alphabetical order within the word,

SGEA TOMG WRIH UPNJ YLCA

Third letter from the left end in each word is changed into the preceding letter

SGDA TOLG WRHH UPMJ YLBA

No meaningful word is formed
