

## 1. Questions

**Study the following information carefully and answer the below questions**

Eight persons- J, K, L, M, N, O, P, and Q are sitting at the circular table facing the centre. Each of them has different brands of pen viz., Parker, Reynolds, Rorito, Classmate, Montex, Linc, Luxor, and Cello. All the information is not necessarily in the same order.

**Note:** The consecutively alphabetically named persons are not sitting adjacent to each other.

Not more than two persons sit between L and N, when counted from the right of L. The one who has Reynolds pen sits second to the right of N. M and the one who has Reynolds pen are sitting adjacent to each other. Only one person sits between M and O who has Luxor Pen. The one who has Rorito pen is an immediate neighbour of the one who sits opposite to O. K who has Montex pen sits third to the right of P. The number of persons sitting between P and Q is **two less than** the number of persons sitting between J and the one who has Classmate pen, when counted to the left of P and right of J. Neither Q nor M has Cello pen. Q neither has Parker pen nor sits opposite to the one who has Parker pen.

**If the position of L and O are interchanged in the same way the position of J and N are interchanged, then who among the following person sits third to the left of L?**

- a. P
- b. K
- c. M
- d. N
- e. Q

## 2. Questions

**How many persons sit between K and the one who has Cello Pen?**

- a. One
- b. Two
- c. Three
- d. Four
- e. Both b and d

@QuizByMickey

## 3. Questions

**What is the position of Q with respect to the one who has Rorito pen?**

- a. Second to the right
- b. Second to the left
- c. Third to the right
- d. Third to the left

e. Immediate right

#### 4. Questions

**Who among the following person has Linc Pen?**

- a. The one who sits immediate right of O
- b. M
- c. The one who sits opposite to N
- d. J
- e. The one who sits immediate left of M

#### 5. Questions

**The number of persons from the right of J to \_\_\_\_ is the same as the number of persons from the left of N to \_\_\_\_.**

- a. P, O
- b. L, K
- c. K, Q
- d. P, M
- e. None of these

#### 6. Questions

**Study the following information carefully and answer the questions given below.**

Eight boxes D, F, J, L, N, Q, T and W are kept on four shelves. Each Box is different in shapes viz. Cone, Square, Rectangle, Circle, Oval, Sphere, Cube and Octagon but not necessarily in the same order.

**Note:**

**I). Each shelf has two stacks viz., Stack 1 and Stack 2. Stack 1 is exactly to the west of Stack 2. Only one box is kept on each stack of each shelf.**

**II). Stack 1 of shelf 2 is immediately above Stack 1 of Shelf 1 whereas Stack 2 of Shelf 2 is immediately above Stack 2 of Shelf 1 and so on.**

**III). The shelves are numbered 1 to 4 from the bottom to top respectively.**

Box W is kept on an even numbered Shelf. Oval shape box is kept immediately below box W in different stacks. The number of shelves above the Oval shape box is one more than the number of shelves below box D. Square shape box is kept immediate northeast of box D. Box J is kept two shelves below the Cone shape box. Sphere shape box is kept southwest of box J. Cone shape box is kept northwest of box F, which is not oval shaped box. Circle shape box is kept immediately below box F in different stacks. Box Q is kept southeast of box L, which is neither in circle shape nor in Oval shape. Either box F or box Q is rectangle in shape. Box T is kept immediately above the Rectangle shape box. Octagon shape box is kept immediate

northwest of the Cube shape box.

**Which of the following box is kept on Shelf 3 of Stack 2?**

- a. The box which is kept immediately below box J
- b. Box N
- c. The box which is square in shape
- d. Box L
- e. The box which is rectangle in shape

#### 7. Questions

**On which of the following shelf and stack does the cube shape box is kept?**

- a. Shelf 4, Stack 1
- b. Shelf 2, Stack 1
- c. Shelf 2, Stack 2
- d. Shelf 3, Stack 1
- e. Shelf 4, Stack 2

#### 8. Questions

**Which of the following box is kept two shelves above Oval shape box?**

- a. Box T
- b. The sphere shaped box
- c. The Cone shaped box
- d. Box Q
- e. The Octagon shaped box

#### 9. Questions

**Four of the following five are alike in a certain way and thus form a group as per the given arrangement. Which of the following does not belong to that group?**

- a. Box T
- b. The box which is in Circle shape
- c. Box F
- d. The box which is in Oval shape
- e. Box J

#### 10. Questions

Which of the following statement(s) is/are true with respect to the final arrangement?

- I). Boxes D and J are kept in different stacks
  - II). Box J is in Square shape
  - III). Box N is kept immediately below box L in the same stack
- a. Only I
  - b. Only II and III
  - c. Only III
  - d. Only I and III
  - e. All I, II and III

#### 11. Questions

Study the following information carefully and answer the given questions.

Twelve persons – F, G, H, I, J, K, L, M, N, O, P and Q are sitting around a hexagonal shaped table for a meeting in an office. Six persons are sitting in the corners of the table and facing towards the centre while the remaining six persons are sitting in the middle of the sides of the table and facing away from the centre. The perimeter of the hexagonal table is 378m. The distance between adjacent persons is equal.

**Note: The perimeter of the hexagon = 6\* side of the hexagon (m)**

K sits 126m away from M, who sits in the middle of the table. Q sits 189m away from K. Only two persons sit between Q and J (Either from left or right). J sits adjacent to G and I, who sits 63m away from K. The number of persons sitting between I and Q, when counted from the right of I is **two more than** the number of persons sitting between F and L. Neither F nor L sits adjacent to M. H sits 94.5m right and left of O and P respectively. F sits 63m away from N.

Who among the following person sits 220.5m away from P according to the final arrangement?

- a. N
- b. M
- c. Q
- d. Both a and b
- e. Both b and c

@QuizByMickey

#### 12. Questions

If F is related to L and J is related to N in a certain way, then who among the following is related to H?

- a. Q
- b. The one who sits second to the right of I
- c. The one who sits 63m left of I

d. The one who sits 94.5m right of K

e. None of these

### 13. Questions

**Match the List I and List II according to the final arrangement:**

| List I | List II               |
|--------|-----------------------|
| 1). H  | A). 189m left of Q    |
| 2). N  | B). 252m left of J    |
| 3). K  | C). 126m right of I   |
| 4). O  | D). 220.5m right of G |

a. 1B, 2C, 3A, 4D

b. 1C, 2D, 3A, 4B

c. 1D, 2B, 3A, 4C

d. 1C, 2B, 3A, 4D

e. 1A, 2D, 3C, 4B

### 14. Questions

**As many persons sit between O and \_\_\_\_ as between K and \_\_\_\_, when counted from the right of both O and K?**

a. F, L

b. N, H

c. M, F

d. H, J

e. Both b and c

### 15. Questions

**In which of the following option, the first person sits third to the right of the second person?**

a. ML

b. LI

c. FM

d. PJ

e. None of these

### 16. Questions

**Statement:**

The students who are bright since the childhood are trained so that they choose to go out of the country for jobs after studies taking all our intelligent brains outside

**Course of Action:**

**I).** Students should be asked to sign a letter of consent with the college that they would be taking up a job in their own country

**II).** The students who are willing to go out should be given more support as they take the country's name to the world

- a. Only I
- b. Either I or II
- c. Both I and II
- d. Only II
- e. None of the above

**17. Questions**

**Statements:**

- A).** Indian team lost the crucial tournament
- B).** The team must train more players for the crisis times
- C).** Two of its important players were injured during that time

**Which of the given options is correct?**

- a. C is the Effect and B is its Cause
- b. A is the Cause and B is its Effect
- c. A and B are Effects and C is the common Cause
- d. A is the Effect and C is its Cause
- e. None of the above

**18. Questions**

**Statement:**

Forester -- The recent claims that the White rhino is not extinct are false. The White rhino's natural habitat was taken over by deforestation, resulting in the animal's systematic elimination from the area. Since then naturalists working in the region have discovered no hard evidence of its survival, such as carcasses or tracks. In spite of alleged sightings of the animal, the White rhino no longer exists.

**Which one of the following is the conclusion on which the forester's statement depends?**

- a. Deforestation drove the last White rhinos to starvation by chasing them from their natural habitat

@QuizByMickey

- b. Every naturalist working in the White rhino's natural habitat has looked systematically for evidence of the rhino's survival
- c. The White rhino did not move and adapt to a different region in response to the loss of habitat
- d. Those who have reported sightings of the White rhino are not experienced naturalists or foresters
- e. none of the above

## 19. Questions

### Statement:

“Lok Sabha passed the Motor Vehicles (Amendment) Bill in 2017. The amendments were targeted towards bringing changes in the transport sector to encourage safer driving practices among Indian motor vehicle drivers. The amendment's draft was put forward in the lower house of the Parliament to impose rigid fines for the traffic rules violation and to promote e-governance.”

### Assumptions:

- I). Now people would be more careful before riding their two-wheelers without a helmet and while driving their cars without wearing seatbelts or without valid motor insurance.
  - II). Contractors will be held responsible and blacklisted for the bad condition of roads.
  - III). The previous governments have not taken enough measures for road safety.
- a. only I and III are implicit
  - b. only I and II are implicit
  - c. Only III is implicit
  - d. Only I is implicit
  - e. Only II and III are implicit

## 20. Questions

### Statement:

IIT Kharagpur graduate develops unique device 'PM 2.5' to curb vehicular air-pollution.

### Arguments:

- I). The invention works on a combination of electrical and wave energy which include PM 2.5 pollutants which attracts large number of PM 2.5 pollutants together, and the device makes such pollutants heavier and fall on ground and the invention should be implemented.
  - II). Apart from controlling air pollution created by the car in which it is installed, the device also has potential to neutralize the pollution emitted from 10 cars in its vicinity and it should be implemented.
- a. If only argument I is strong
  - b. If only argument II is strong
  - c. If either I or II is strong

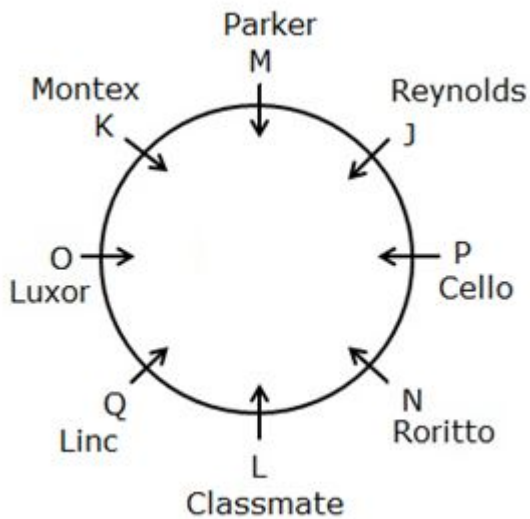

@QuizByMickey

- d. If neither I or II is strong
- e. If both I and II are strong

## Explanations:

### 1. Questions

#### Final arrangement:

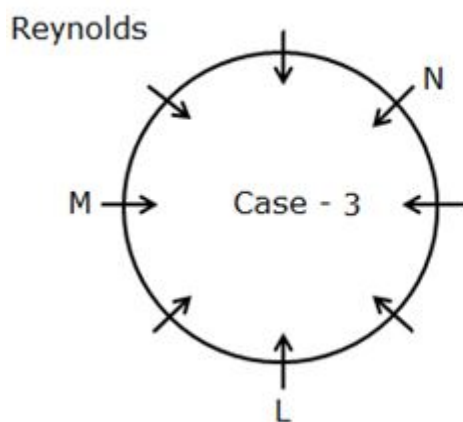

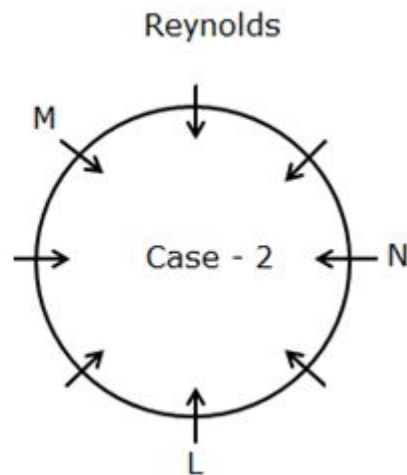

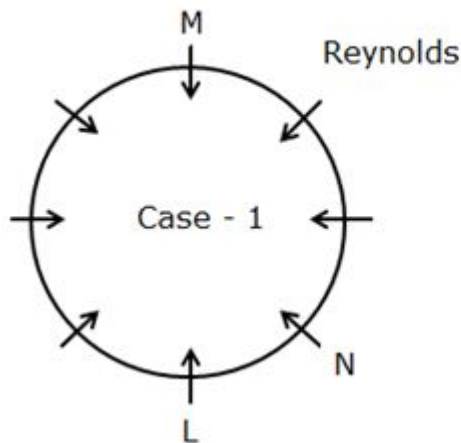

We have,

- Not more than two persons sit between L and N, when counted from the right of L.
- The one who has Reynolds pen sits second to the right of N.
- M and the one who has Reynolds pen are sitting adjacent to each other.

From the above conditions, we have three possibilities,

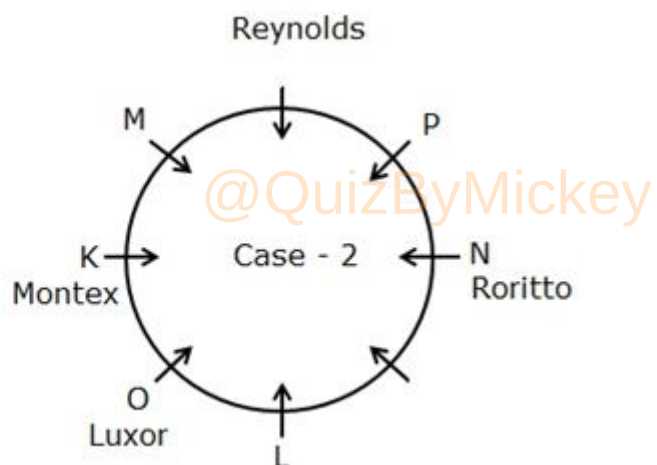

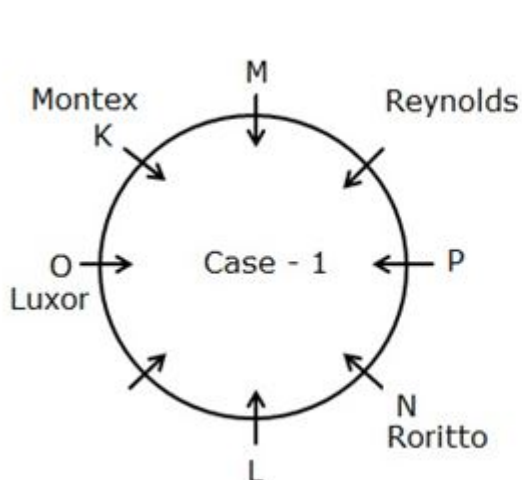

@QuizByMickey

Again we have,

- Only one person sits between M and O who has Luxor Pen.
- The one who has Roritto pen is an immediate neighbour of the one who sits opposite to O.
- K who has Montex pen sits third to the right of P.

We cannot place O in case 3. Hence it is eliminated.

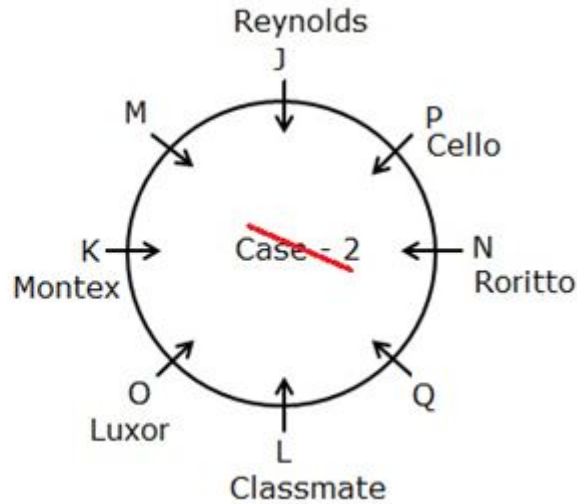

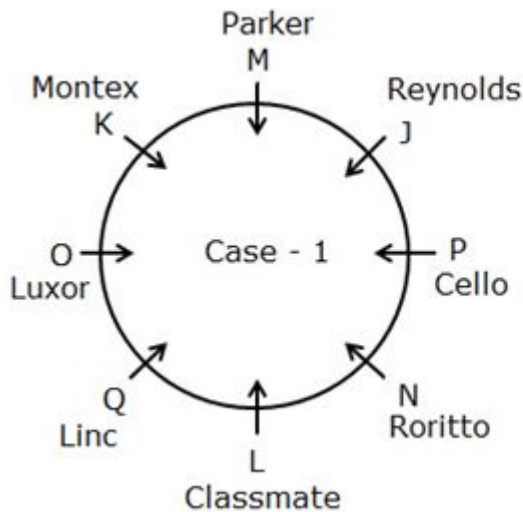

Again we have,

- The number of persons sitting between P and Q is two less than the number of persons sitting

between J and the one who has Classmate pen, when counted to the left of P and right of J.

- Neither Q nor M has Cello pen.
- Q neither has Parker pen nor sits opposite to the one who has Parker pen.

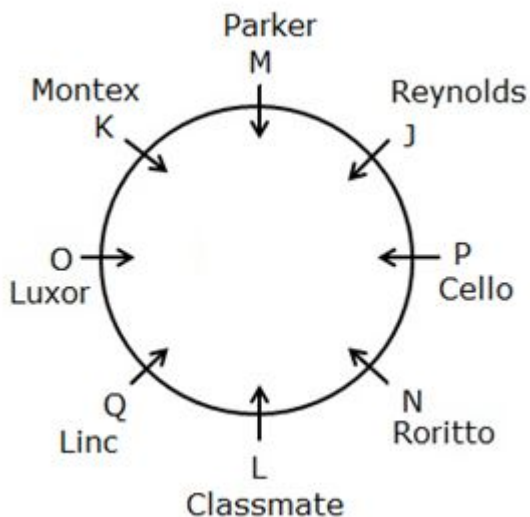

Q does not sit opposite to the one who has Parker pen. Hence case 2 is eliminated. Thus, case 1 gives the final arrangement.

**Answer: D**

## 2. Questions

**Final arrangement:**

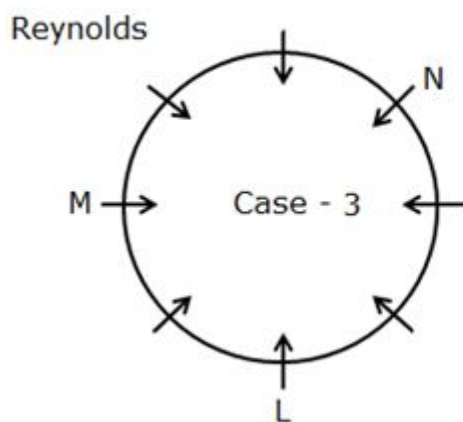

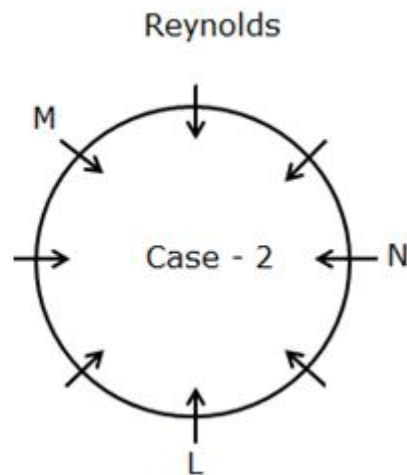

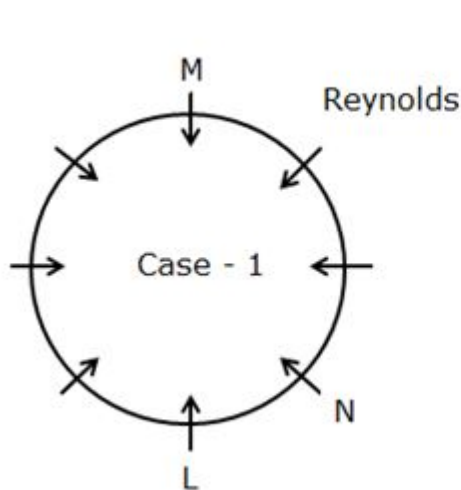

@QuizByMickey

We have,

- Not more than two persons sit between L and N, when counted from the right of L.
- The one who has Reynolds pen sits second to the right of N.
- M and the one who has Reynolds pen are sitting adjacent to each other.

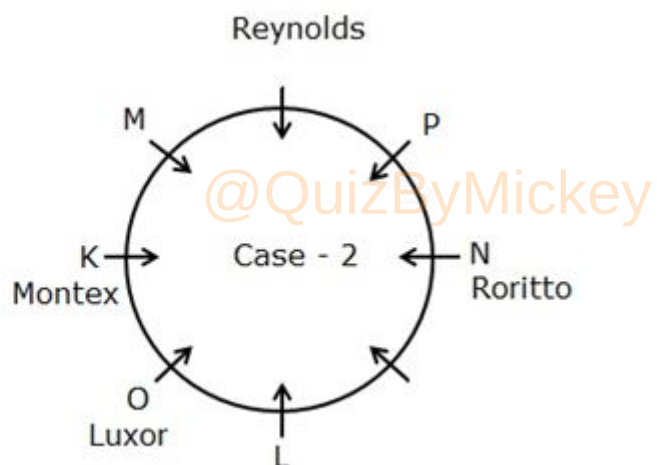

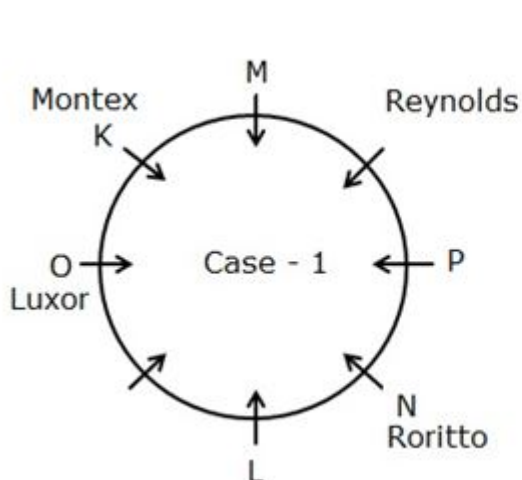

From the above conditions, we have three possibilities,

Again we have,

- Only one person sits between M and O who has Luxor Pen.
- The one who has Roritto pen is an immediate neighbour of the one who sits opposite to O.
- K who has Montex pen sits third to the right of P.

We cannot place O in case 3. Hence it is eliminated.

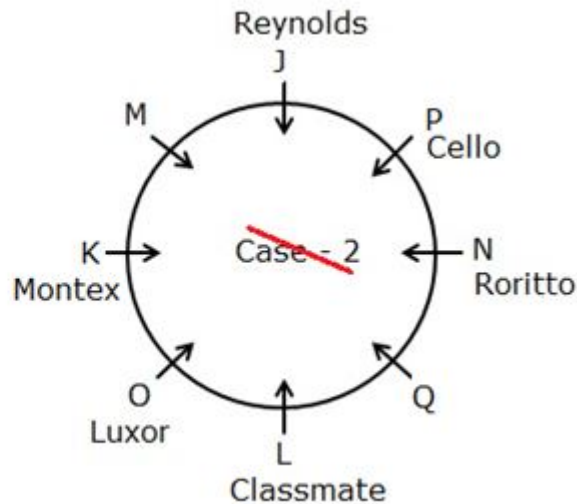

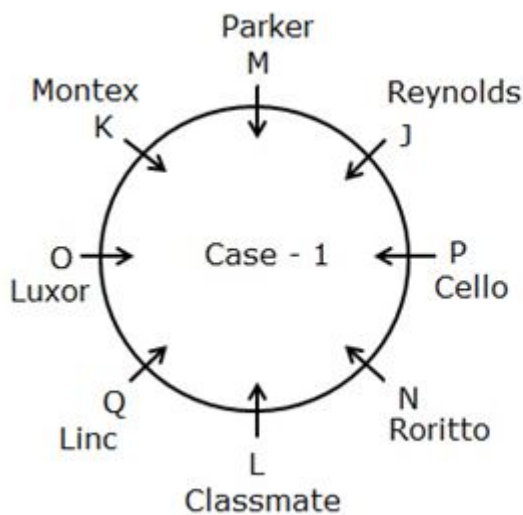

Again we have,

- The number of persons sitting between P and Q is two less than the number of persons sitting

between J and the one who has Classmate pen, when counted to the left of P and right of J.

- Neither Q nor M has Cello pen.
- Q neither has Parker pen nor sits opposite to the one who has Parker pen.

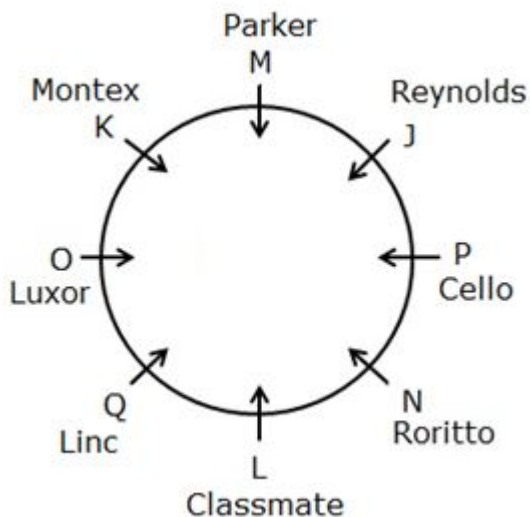

Q does not sit opposite to the one who has Parker pen. Hence case 2 is eliminated. Thus, case 1 gives the final arrangement.

**Answer: E**

### 3. Questions

**Final arrangement:**

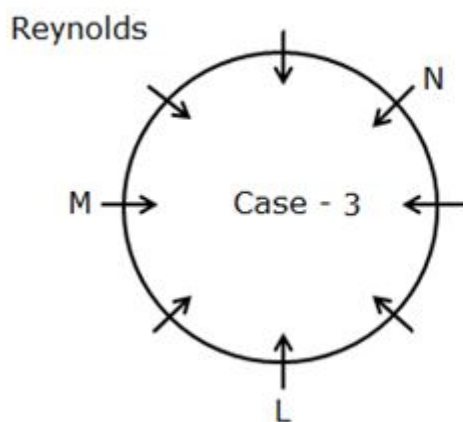

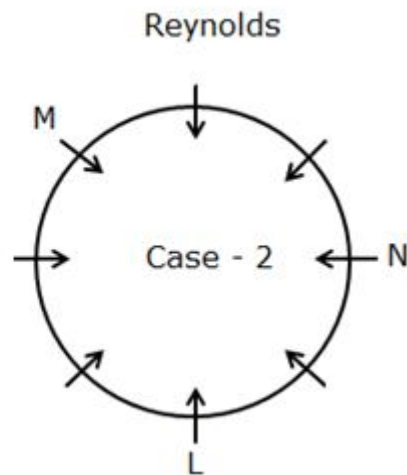

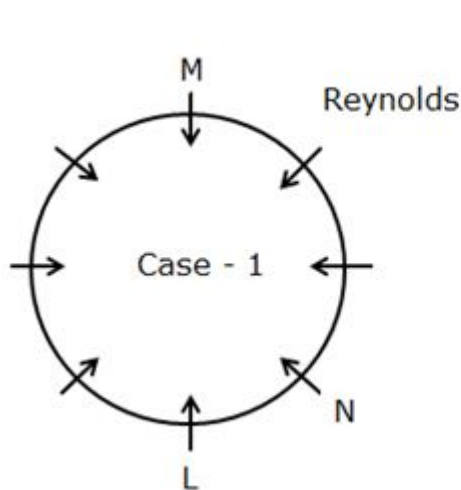

@QuizByMickey

We have,

- Not more than two persons sit between L and N, when counted from the right of L.
- The one who has Reynolds pen sits second to the right of N.
- M and the one who has Reynolds pen are sitting adjacent to each other.

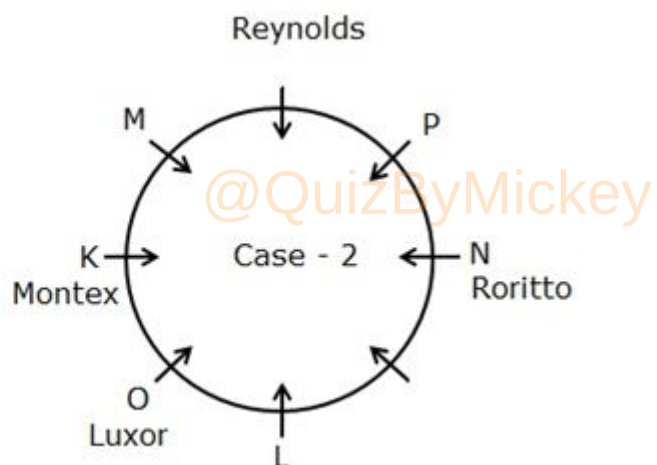

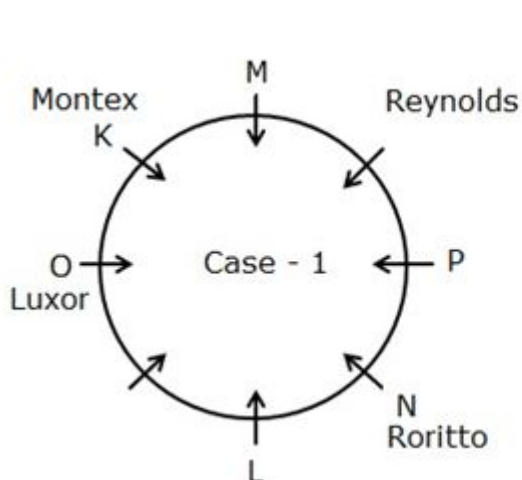

From the above conditions, we have three possibilities,

Again we have,

- Only one person sits between M and O who has Luxor Pen.
- The one who has Roritto pen is an immediate neighbour of the one who sits opposite to O.
- K who has Montex pen sits third to the right of P.

We cannot place O in case 3. Hence it is eliminated.

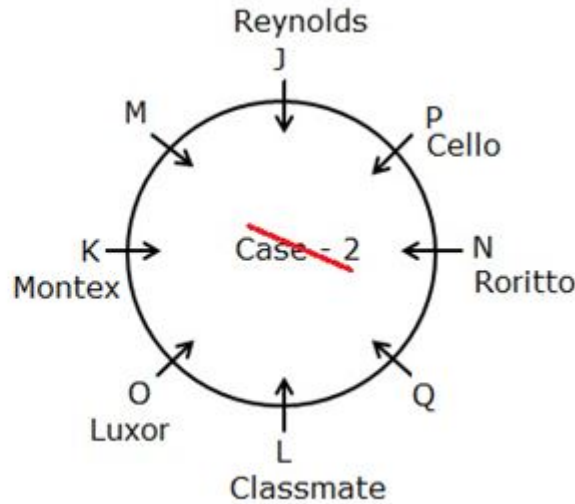

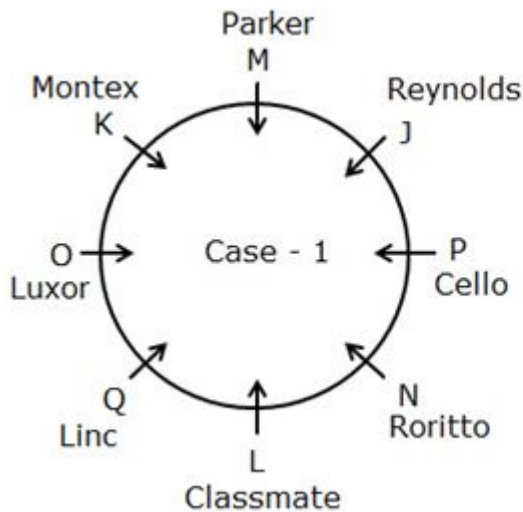

Again we have,

- The number of persons sitting between P and Q is two less than the number of persons sitting

between J and the one who has Classmate pen, when counted to the left of P and right of J.

- Neither Q nor M has Cello pen.
- Q neither has Parker pen nor sits opposite to the one who has Parker pen.

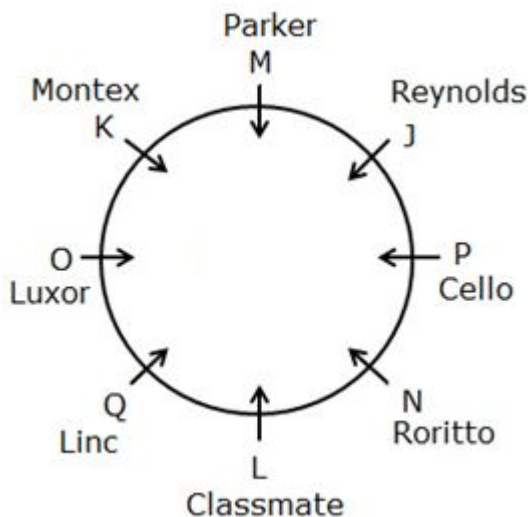

Q does not sit opposite to the one who has Parker pen. Hence case 2 is eliminated. Thus, case 1 gives the final arrangement.

**Answer: B**

#### 4. Questions

**Final arrangement:**

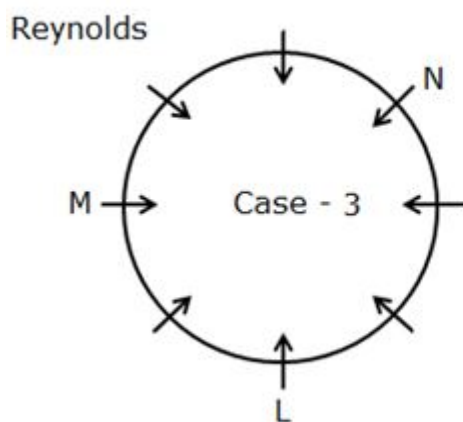

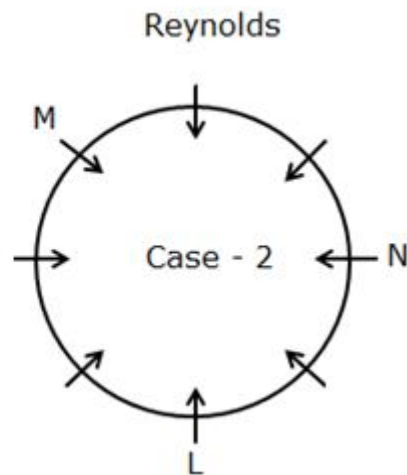

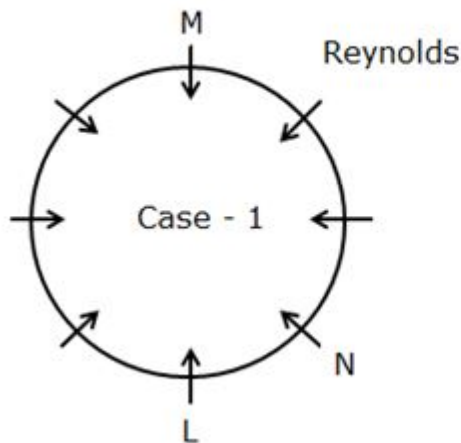

@QuizByMickey

We have,

- Not more than two persons sit between L and N, when counted from the right of L.
- The one who has Reynolds pen sits second to the right of N.
- M and the one who has Reynolds pen are sitting adjacent to each other.

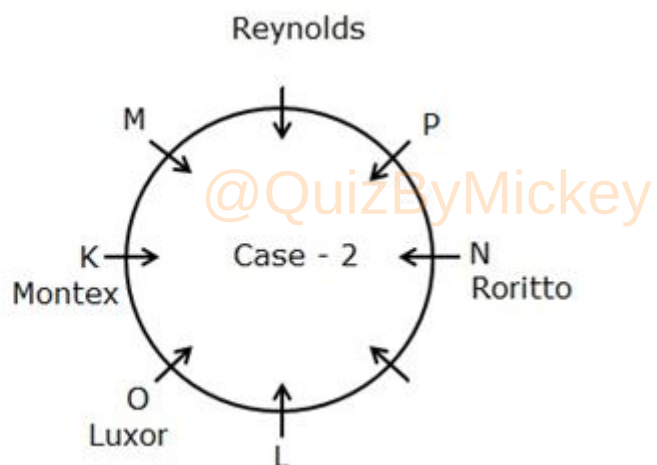

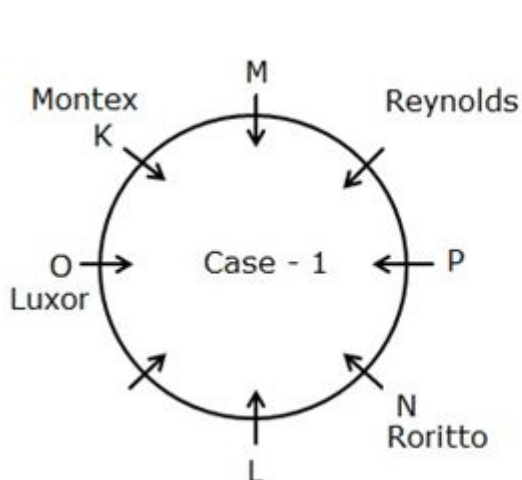

From the above conditions, we have three possibilities,

Again we have,

- Only one person sits between M and O who has Luxor Pen.
- The one who has Roritto pen is an immediate neighbour of the one who sits opposite to O.
- K who has Montex pen sits third to the right of P.

We cannot place O in case 3. Hence it is eliminated.

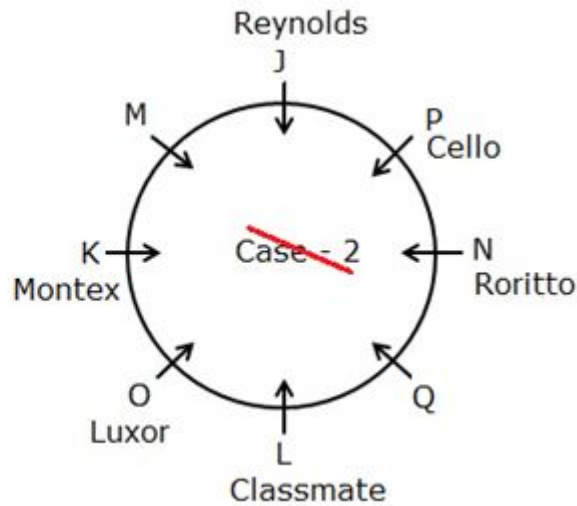

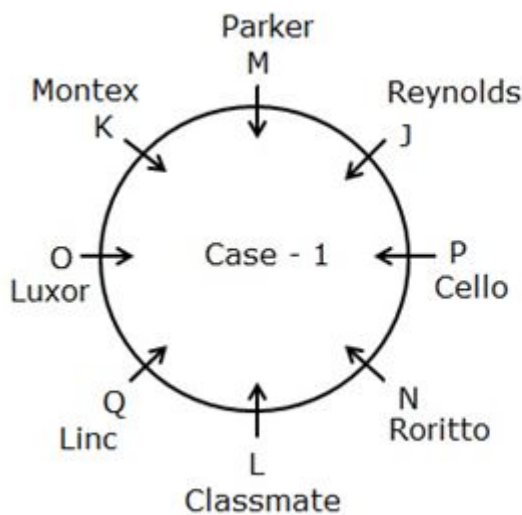

Again we have,

- The number of persons sitting between P and Q is two less than the number of persons sitting

between J and the one who has Classmate pen, when counted to the left of P and right of J.

- Neither Q nor M has Cello pen.
- Q neither has Parker pen nor sits opposite to the one who has Parker pen.

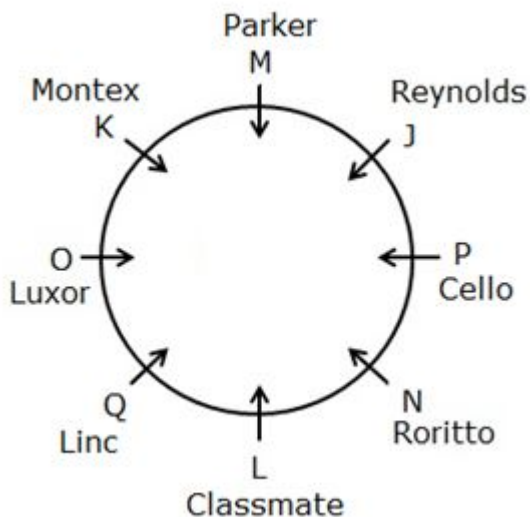

Q does not sit opposite to the one who has Parker pen. Hence case 2 is eliminated. Thus, case 1 gives the final arrangement.

**Answer: A**

**5. Questions**

**Final arrangement:**

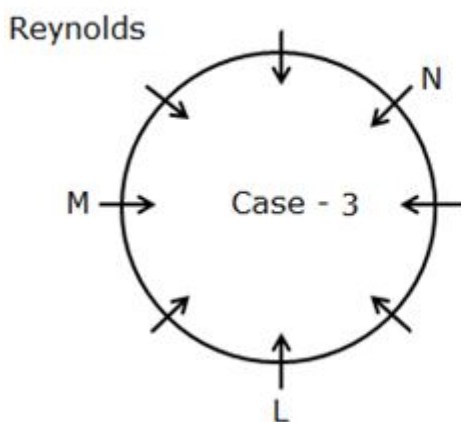

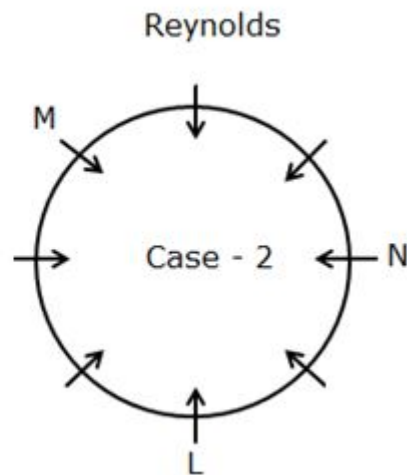

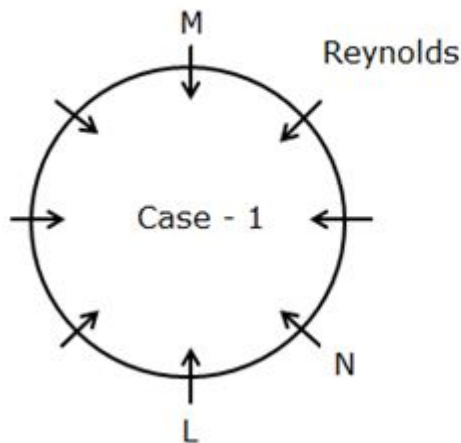

@QuizByMickey

We have,

- Not more than two persons sit between L and N, when counted from the right of L.
- The one who has Reynolds pen sits second to the right of N.
- M and the one who has Reynolds pen are sitting adjacent to each other.

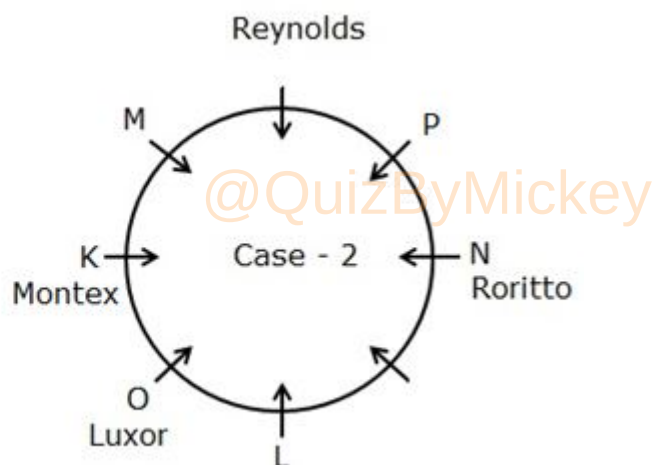

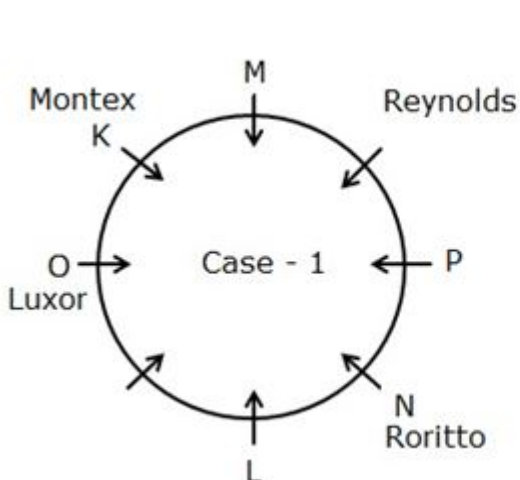

From the above conditions, we have three possibilities,

Again we have,

- Only one person sits between M and O who has Luxor Pen.
- The one who has Roritto pen is an immediate neighbour of the one who sits opposite to O.
- K who has Montex pen sits third to the right of P.

We cannot place O in case 3. Hence it is eliminated.

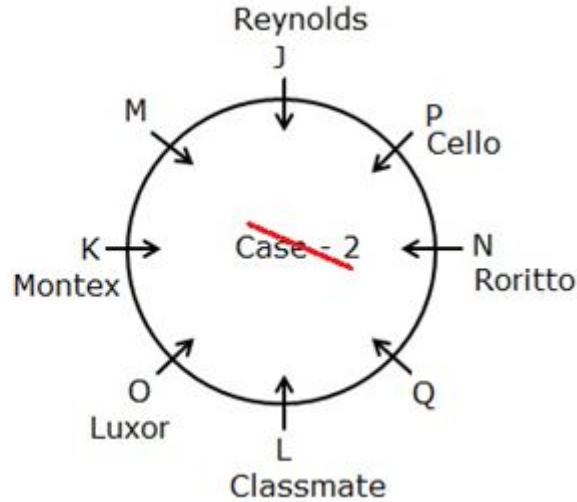

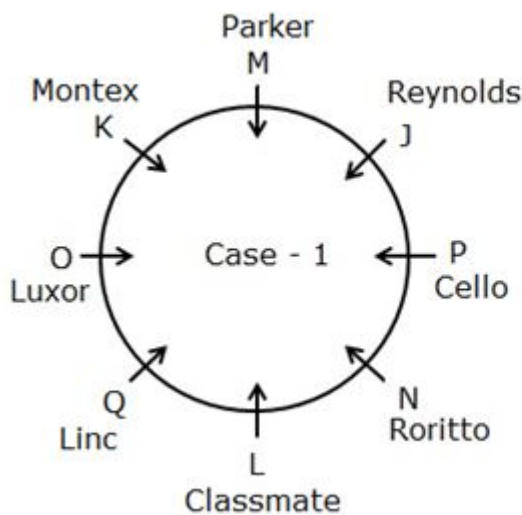

Again we have,

- The number of persons sitting between P and Q is two less than the number of persons sitting

between J and the one who has Classmate pen, when counted to the left of P and right of J.

- Neither Q nor M has Cello pen.
- Q neither has Parker pen nor sits opposite to the one who has Parker pen.

Q does not sit opposite to the one who has Parker pen. Hence case 2 is eliminated. Thus, case 1 gives the final arrangement.

**Answer: C**

## 6. Questions

### Final arrangement

| Shelves | Stack-1     | Stack-2       |
|---------|-------------|---------------|
| 4       | L (Cone)    | T (Square)    |
| 3       | D (Octagon) | F (Rectangle) |
| 2       | W (Circle)  | J (Cube)      |
| 1       | N (Sphere)  | Q (Oval)      |

We have,

- Box W is kept on an even numbered Shelf.
- Oval shape box is kept immediately below the box W in different stacks.

From the above conditions, there are four possibilities

@QuizByMickey

|         | Case-1  |         | Case-2  |         | Case-3  |         | Case-4  |         |
|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Shelves | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 |
| 4       | W       |         |         | W       |         |         |         |         |
| 3       |         | (Oval)  | (Oval)  |         |         |         |         |         |
| 2       |         |         |         |         | W       |         |         | W       |
| 1       |         |         |         |         |         | (Oval)  | (Oval)  |         |

Again we have,

- The number of shelves above the Oval shape box is one more than the number of shelves below box D.
- Square shape box is kept immediate northeast of box D.
- Box J is kept two shelves below the Cone shape box.
- Sphere shape box is kept southwest of box J.
- Cone shape box is kept northwest of box F, which is not oval shaped box.
- Circle shape box is kept immediately below box F in different stacks.

After applying above conditions Case 1 and Case 4 get eliminated

|         | <del>Case-1</del> |           | Case-2     |            | Case-3     |          | <del>Case-4</del> |          |
|---------|-------------------|-----------|------------|------------|------------|----------|-------------------|----------|
| Shelves | Stack 1           | Stack 2   | Stack 1    | Stack 2    | Stack 1    | Stack2   | Stack1            | Stack2   |
| 4       | W (Cone)          |           | (Cone)     | W          | (Cone)     | (Square) |                   | (Square) |
| 3       |                   | (Oval)    | (Oval)     | F          | D          | F        | D                 |          |
| 2       |                   | J(Square) | (Circle)   | J (Square) | W (Circle) | J        |                   | W        |
| 1       | D (Sphere)        | F         | D (Sphere) |            | (Sphere)   | (Oval)   | (Oval)            |          |

Again we have,

- Box Q is kept southeast of box L, which is neither in circle shape nor in Oval shape.
- Either box F or box Q is rectangle in shape.
- Box T is kept immediately above the Rectangle shape box.
- Octagon shape box is kept immediate northwest of the Cube shape box.

After applying above conditions Case 2 gets eliminated, Hence Case 3 shows the final arrangement

|         | <del>Case-2</del> |               | Case-3      |               |
|---------|-------------------|---------------|-------------|---------------|
| Shelves | Stack 1           | Stack 2       | Stack 1     | Stack2        |
| 4       | L (Cone)          | W             | L (Cone)    | T (Square)    |
| 3       | N (Oval)          | F             | D (Octagon) | F (Rectangle) |
| 2       | T (Circle)        | J (Square)    | W (Circle)  | J (Cube)      |
| 1       | D (Sphere)        | Q (Rectangle) | N (Sphere)  | Q (Oval)      |

**Answer: E**

7. Questions

**Final arrangement**

| Shelves | Stack-1     | Stack-2       |
|---------|-------------|---------------|
| 4       | L (Cone)    | T (Square)    |
| 3       | D (Octagon) | F (Rectangle) |
| 2       | W (Circle)  | J (Cube)      |
| 1       | N (Sphere)  | Q (Oval)      |

We have,

@QuizByMickey

- Box W is kept on an even numbered Shelf.
- Oval shape box is kept immediately below the box W in different stacks.

From the above conditions, there are four possibilities

|         | Case-1  |         | Case-2  |         | Case-3  |         | Case-4  |         |
|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Shelves | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 |
| 4       | W       |         |         | W       |         |         |         |         |
| 3       |         | (Oval)  | (Oval)  |         |         |         |         |         |
| 2       |         |         |         |         | W       |         |         | W       |
| 1       |         |         |         |         |         | (Oval)  | (Oval)  |         |

Again we have,

- The number of shelves above the Oval shape box is one more than the number of shelves below box D.
- Square shape box is kept immediate northeast of box D.
- Box J is kept two shelves below the Cone shape box.
- Sphere shape box is kept southwest of box J.
- Cone shape box is kept northwest of box F, which is not oval shaped box.
- Circle shape box is kept immediately below box F in different stacks.

After applying above conditions Case 1 and Case 4 get eliminated

|         | <del>Case-1</del> |           | Case-2     |            | Case-3     |          | <del>Case-4</del> |          |
|---------|-------------------|-----------|------------|------------|------------|----------|-------------------|----------|
| Shelves | Stack 1           | Stack 2   | Stack 1    | Stack 2    | Stack 1    | Stack 2  | Stack 1           | Stack 2  |
| 4       | W (Cone)          |           | (Cone)     | W          | (Cone)     | (Square) |                   | (Square) |
| 3       |                   | (Oval)    | (Oval)     | F          | D          | F        | D                 |          |
| 2       |                   | J(Square) | (Circle)   | J (Square) | W (Circle) | J        |                   | W        |
| 1       | D (Sphere)        | F         | D (Sphere) |            | (Sphere)   | (Oval)   | (Oval)            |          |

Again we have,

- Box Q is kept southeast of box L, which is neither in circle shape nor in Oval shape.
- Either box F or box Q is rectangle in shape.
- Box T is kept immediately above the Rectangle shape box.
- Octagon shape box is kept immediate northwest of the Cube shape box.

After applying above conditions Case 2 gets eliminated, Hence Case 3 shows the final arrangement

|         | <del>Case-2</del> |               | Case-3      |               |
|---------|-------------------|---------------|-------------|---------------|
| Shelves | Stack 1           | Stack 2       | Stack 1     | Stack2        |
| 4       | L (Cone)          | W             | L (Cone)    | T (Square)    |
| 3       | N (Oval)          | F             | D (Octagon) | F (Rectangle) |
| 2       | T (Circle)        | J (Square)    | W (Circle)  | J (Cube)      |
| 1       | D (Sphere)        | Q (Rectangle) | N (Sphere)  | Q (Oval)      |

**Answer: C**

**8. Questions**

**Final arrangement**

| Shelves | Stack-1     | Stack-2       |
|---------|-------------|---------------|
| 4       | L (Cone)    | T (Square)    |
| 3       | D (Octagon) | F (Rectangle) |
| 2       | W (Circle)  | J (Cube)      |
| 1       | N (Sphere)  | Q (Oval)      |

We have,

- Box W is kept on an even numbered Shelf.
- Oval shape box is kept immediately below the box W in different stacks.

From the above conditions, there are four possibilities

|         | Case-1  |         | Case-2  |         | Case-3  |         | Case-4  |         |
|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Shelves | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 |
| 4       | W       |         |         | W       |         |         |         |         |
| 3       |         | (Oval)  | (Oval)  |         |         |         |         |         |
| 2       |         |         |         |         | W       |         |         | W       |
| 1       |         |         |         |         |         | (Oval)  | (Oval)  |         |

Again we have,

@QuizByMickey

- The number of shelves above the Oval shape box is one more than the number of shelves below box D.
- Square shape box is kept immediate northeast of box D.
- Box J is kept two shelves below the Cone shape box.
- Sphere shape box is kept southwest of box J.
- Cone shape box is kept northwest of box F, which is not oval shaped box.
- Circle shape box is kept immediately below box F in different stacks.

After applying above conditions Case 1 and Case 4 get eliminated

|         | <del>Case-1</del> |           | Case-2     |            | Case-3     |          | <del>Case-4</del> |          |
|---------|-------------------|-----------|------------|------------|------------|----------|-------------------|----------|
| Shelves | Stack 1           | Stack 2   | Stack 1    | Stack 2    | Stack 1    | Stack2   | Stack1            | Stack2   |
| 4       | W (Cone)          |           | (Cone)     | W          | (Cone)     | (Square) |                   | (Square) |
| 3       |                   | (Oval)    | (Oval)     | F          | D          | F        | D                 |          |
| 2       |                   | J(Square) | (Circle)   | J (Square) | W (Circle) | J        |                   | W        |
| 1       | D (Sphere)        | F         | D (Sphere) |            | (Sphere)   | (Oval)   | (Oval)            |          |

Again we have,

- Box Q is kept southeast of box L, which is neither in circle shape nor in Oval shape.
- Either box F or box Q is rectangle in shape.
- Box T is kept immediately above the Rectangle shape box.
- Octagon shape box is kept immediate northwest of the Cube shape box.

After applying above conditions Case2 gets eliminated, Hence Case3 shows the final arrangement

|         | <del>Case-2</del> |               | Case-3      |               |
|---------|-------------------|---------------|-------------|---------------|
| Shelves | Stack 1           | Stack 2       | Stack 1     | Stack2        |
| 4       | L (Cone)          | W             | L (Cone)    | T (Square)    |
| 3       | N (Oval)          | F             | D (Octagon) | F (Rectangle) |
| 2       | T (Circle)        | J (Square)    | W (Circle)  | J (Cube)      |
| 1       | D (Sphere)        | Q (Rectangle) | N (Sphere)  | Q (Oval)      |

**Answer: E**

## 9. Questions

### Final arrangement

| Shelves | Stack-1     | Stack-2       |
|---------|-------------|---------------|
| 4       | L (Cone)    | T (Square)    |
| 3       | D (Octagon) | F (Rectangle) |
| 2       | W (Circle)  | J (Cube)      |
| 1       | N (Sphere)  | Q (Oval)      |

@QuizByMickey

We have,

- Box W is kept on an even numbered Shelf.
- Oval shape box is kept immediately below the box W in different stacks.

From the above conditions, there are four possibilities

|         | Case-1  |         | Case-2  |         | Case-3  |         | Case-4  |         |
|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Shelves | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 |
| 4       | W       |         |         | W       |         |         |         |         |
| 3       |         | (Oval)  | (Oval)  |         |         |         |         |         |
| 2       |         |         |         |         | W       |         |         | W       |
| 1       |         |         |         |         |         | (Oval)  | (Oval)  |         |

Again we have,

- The number of shelves above the Oval shape box is one more than the number of shelves below box D.
- Square shape box is kept immediate northeast of box D.
- Box J is kept two shelves below the Cone shape box.
- Sphere shape box is kept southwest of box J.
- Cone shape box is kept northwest of box F, which is not oval shaped box.
- Circle shape box is kept immediately below box F in different stacks.

After applying above conditions Case 1 and Case 4 get eliminated

|         | <del>Case-1</del> |           | Case-2     |            | Case-3     |          | <del>Case-4</del> |          |
|---------|-------------------|-----------|------------|------------|------------|----------|-------------------|----------|
| Shelves | Stack 1           | Stack 2   | Stack 1    | Stack 2    | Stack 1    | Stack 2  | Stack 1           | Stack 2  |
| 4       | W (Cone)          |           | (Cone)     | W          | (Cone)     | (Square) |                   | (Square) |
| 3       |                   | (Oval)    | (Oval)     | F          | D          | F        | D                 |          |
| 2       |                   | J(Square) | (Circle)   | J (Square) | W (Circle) | J        |                   | W        |
| 1       | D (Sphere)        | F         | D (Sphere) |            | (Sphere)   | (Oval)   | (Oval)            |          |

Again we have,

- Box Q is kept southeast of box L, which is neither in circle shape nor in Oval shape.
- Either box F or box Q is rectangle in shape.
- Box T is kept immediately above the Rectangle shape box.
- Octagon shape box is kept immediate northwest of the Cube shape box.

After applying above conditions Case 2 gets eliminated, Hence Case 3 shows the final arrangement

|         | <del>Case-2</del> |               | Case-3      |               |
|---------|-------------------|---------------|-------------|---------------|
| Shelves | Stack 1           | Stack 2       | Stack 1     | Stack 2       |
| 4       | L (Cone)          | W             | L (Cone)    | T (Square)    |
| 3       | N (Oval)          | F             | D (Octagon) | F (Rectangle) |
| 2       | T (Circle)        | J (Square)    | W (Circle)  | J (Cube)      |
| 1       | D (Sphere)        | Q (Rectangle) | N (Sphere)  | Q (Oval)      |

**Answer: B**(All boxes are kept in stack 2 except option b)

10. Questions

## Final arrangement

| Shelves | Stack-1     | Stack-2       |
|---------|-------------|---------------|
| 4       | L (Cone)    | T (Square)    |
| 3       | D (Octagon) | F (Rectangle) |
| 2       | W (Circle)  | J (Cube)      |
| 1       | N (Sphere)  | Q (Oval)      |

We have,

- Box W is kept on an even numbered Shelf.
- Oval shape box is kept immediately below the box W in different stacks.

From the above conditions, there are four possibilities

|         | Case-1  |         | Case-2  |         | Case-3  |         | Case-4  |         |
|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Shelves | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 | Stack 1 | Stack 2 |
| 4       | W       |         |         | W       |         |         |         |         |
| 3       |         | (Oval)  | (Oval)  |         |         |         |         |         |
| 2       |         |         |         |         | W       |         |         | W       |
| 1       |         |         |         |         |         | (Oval)  | (Oval)  |         |

Again we have,

- The number of shelves above the Oval shape box is one more than the number of shelves below box D.
- Square shape box is kept immediate northeast of box D.
- Box J is kept two shelves below the Cone shape box.
- Sphere shape box is kept southwest of box J.
- Cone shape box is kept northwest of box F, which is not oval shaped box.
- Circle shape box is kept immediately below box F in different stacks.

After applying above conditions Case 1 and Case 4 get eliminated

|         | <del>Case-1</del> | Case-2    |            | Case-3     |            | <del>Case-4</del> |
|---------|-------------------|-----------|------------|------------|------------|-------------------|
| Shelves | Stack 1           | Stack 2   | Stack 1    | Stack 2    | Stack 1    | Stack 2           |
| 4       | W (Cone)          |           | (Cone)     | W          | (Cone)     | (Square)          |
| 3       |                   | (Oval)    | (Oval)     | F          | D          | F                 |
| 2       |                   | J(Square) | (Circle)   | J (Square) | W (Circle) | J                 |
| 1       | D (Sphere)        | F         | D (Sphere) |            | (Sphere)   | (Oval)            |

Again we have,

- Box Q is kept southeast of box L, which is neither in circle shape nor in Oval shape.
- Either box F or box Q is rectangle in shape.
- Box T is kept immediately above the Rectangle shape box.

- Octagon shape box is kept immediate northwest of the Cube shape box.

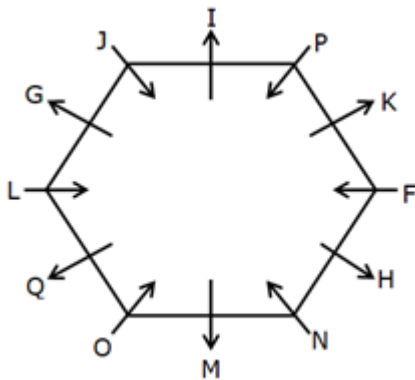

After applying above conditions Case2 gets eliminated, Hence Case3 shows the final arrangement

|         | <del>Case-2</del> |               | Case-3      |               |
|---------|-------------------|---------------|-------------|---------------|
| Shelves | Stack 1           | Stack 2       | Stack 1     | Stack2        |
| 4       | L (Cone)          | W             | L (Cone)    | T (Square)    |
| 3       | N (Oval)          | F             | D (Octagon) | F (Rectangle) |
| 2       | T (Circle)        | J (Square)    | W (Circle)  | J (Cube)      |
| 1       | D (Sphere)        | Q (Rectangle) | N (Sphere)  | Q (Oval)      |

**Answer: A**

### 11. Questions

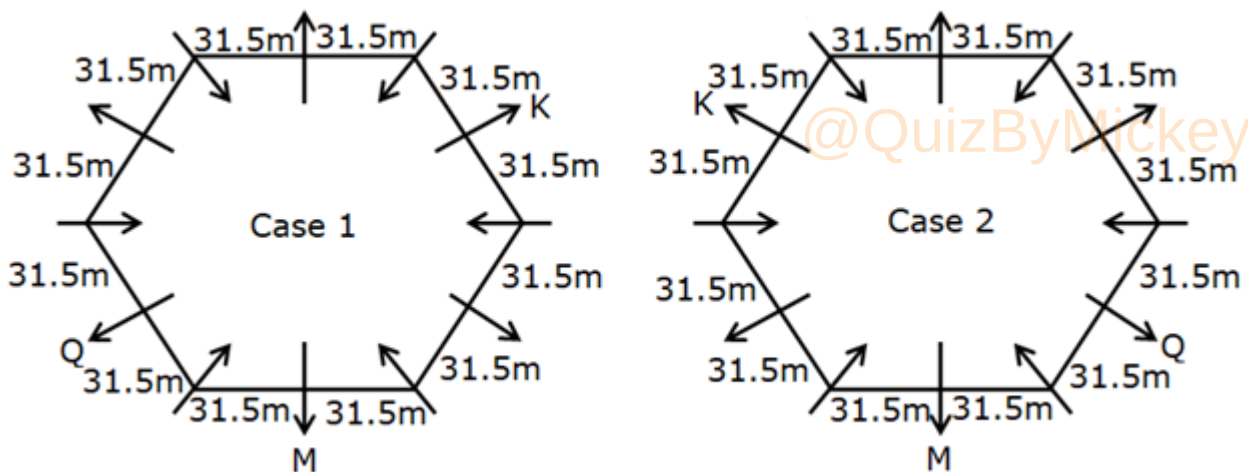

**Final arrangement:**

We have,

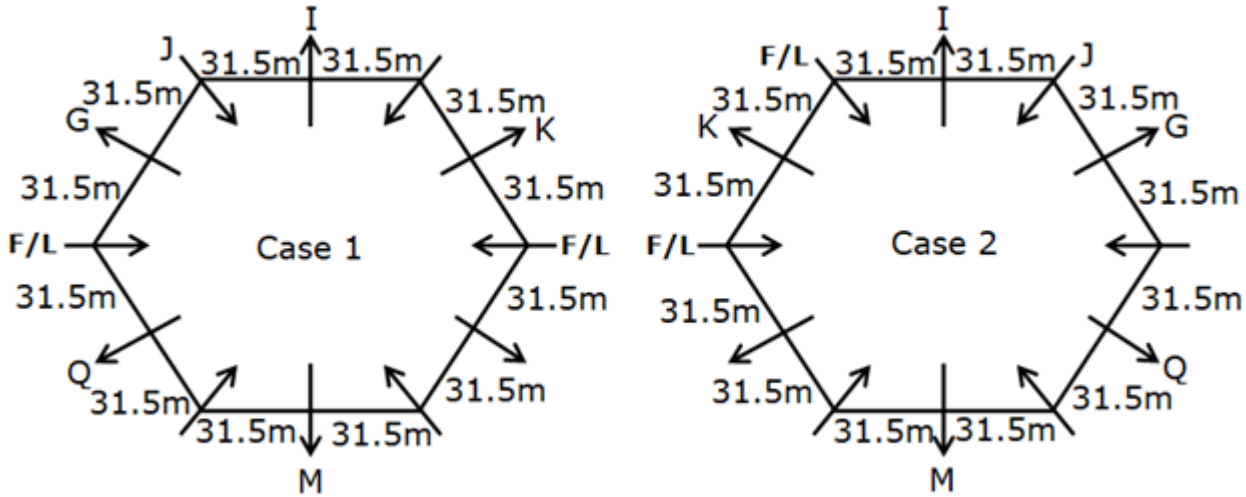

- K sits 126m away from M, who sits in the middle of the table.
- Q sits 189m away from K.

Applying the conditions, there are two possibilities.

Again we have,

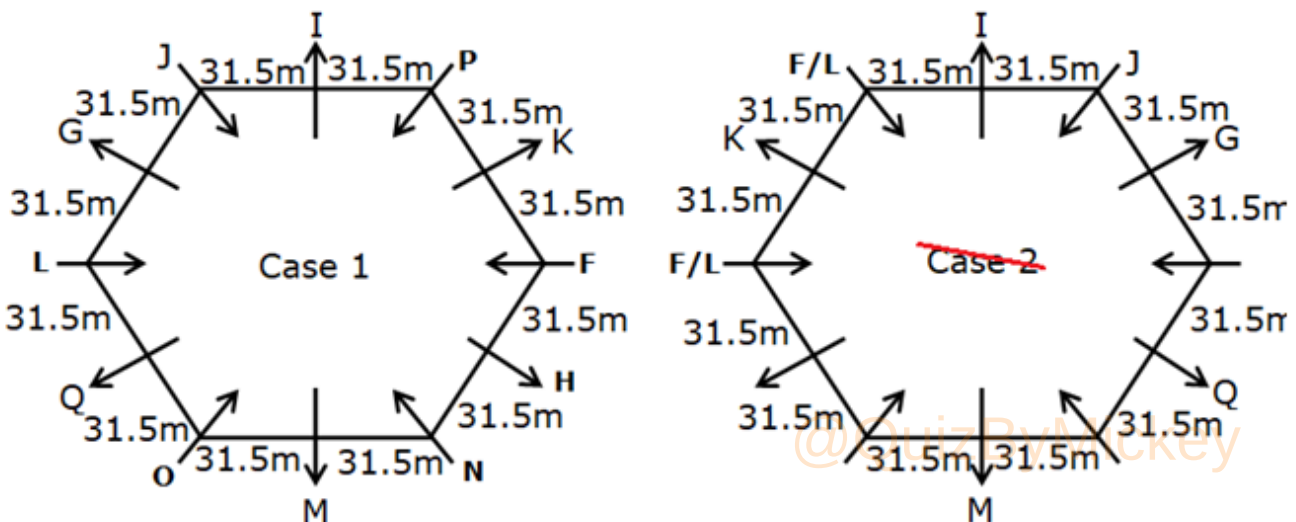

- Only two persons sit between Q and J (Either from left or right).
- J sits adjacent to G and I, who sits 63m away from K.
- The number of persons sitting between I and Q, when counted from the right of I is two more than the number of persons sitting between F and L.
- Neither F nor L sits adjacent to M.

Again we have,

- H sits 94.5m right and left of O and P respectively.
- F sits 63m away from N.

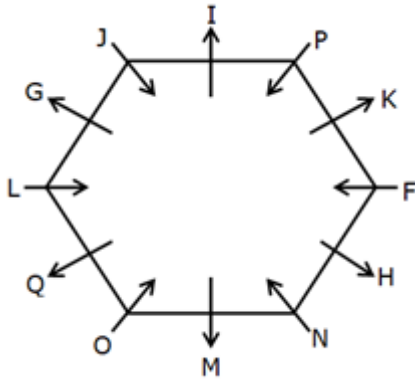

Applying the above conditions, Case 2 gets eliminated because there is no possibility to place H. Hence, Case 1 gives a final arrangement.

**Answer: E**

**12. Questions**

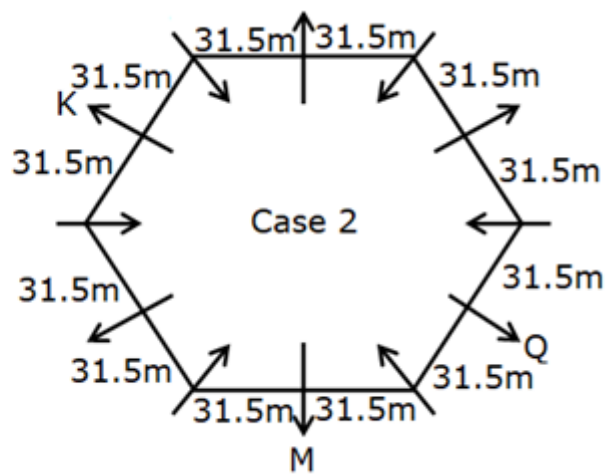

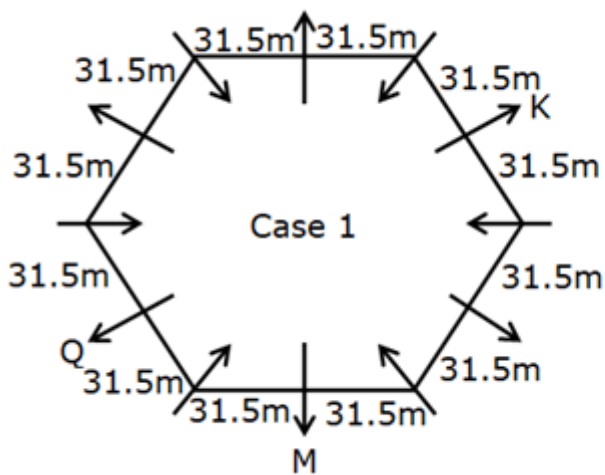

**Final arrangement:**

We have,

- K sits 126m away from M, who sits in the middle of the table.
- Q sits 189m away from K.

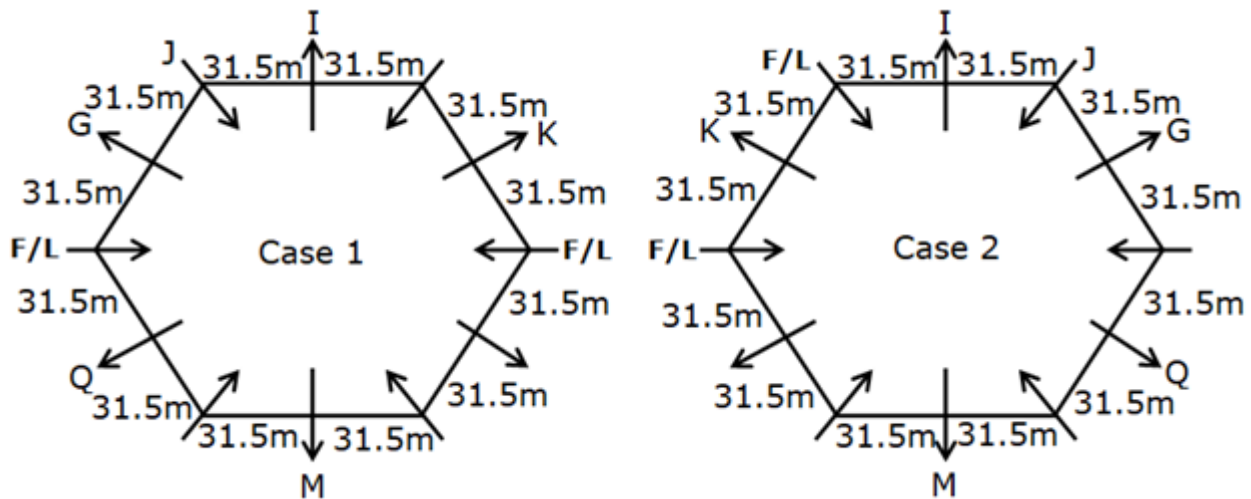

Applying the conditions, there are two possibilities.

Again we have,

- Only two persons sit between Q and J (Either from left or right).
- J sits adjacent to G and I, who sits 63m away from K.
- The number of persons sitting between I and Q, when counted from the right of I is two more than the number of persons sitting between F and L.
- Neither F nor L sits adjacent to M.

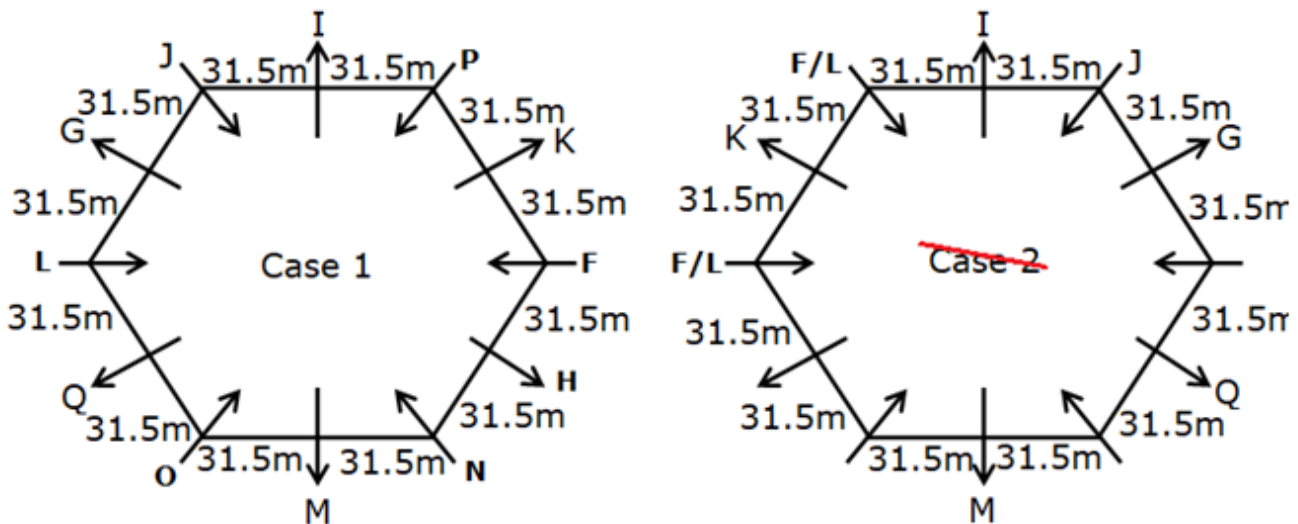

@QuizByMickey

Again we have,

- H sits 94.5m right and left of O and P respectively.
- F sits 63m away from N.

Applying the above conditions, Case 2 gets eliminated because there is no possibility to place H. Hence, Case 1 gives a final arrangement.

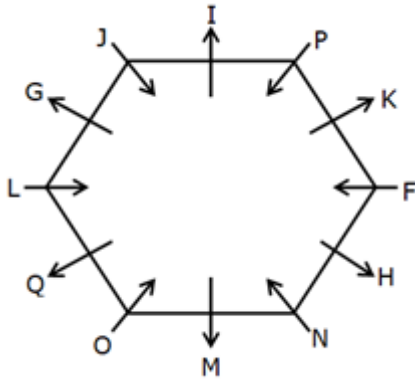

**Answer: C**

**13. Questions**

**Final arrangement:**

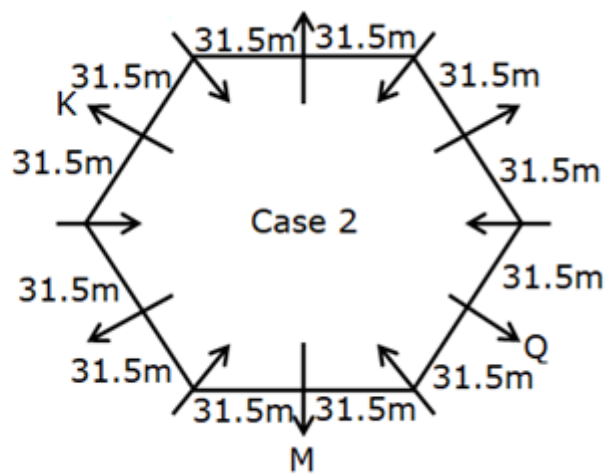

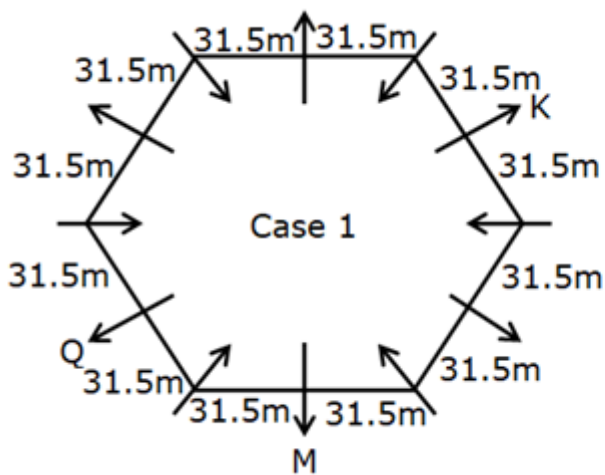

@QuizByMickey

We have,

- K sits 126m away from M, who sits in the middle of the table.
- Q sits 189m away from K.

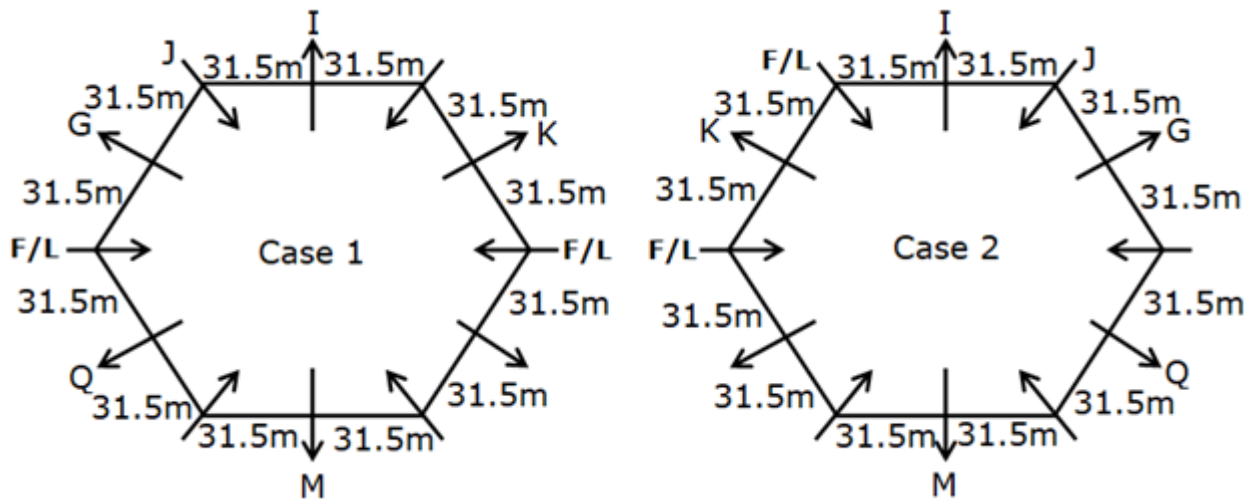

Applying the conditions, there are two possibilities.

Again we have,

- Only two persons sit between Q and J (Either from left or right).
- J sits adjacent to G and I, who sits 63m away from K.
- The number of persons sitting between I and Q, when counted from the right of I is two more than the number of persons sitting between F and L.
- Neither F nor L sits adjacent to M.

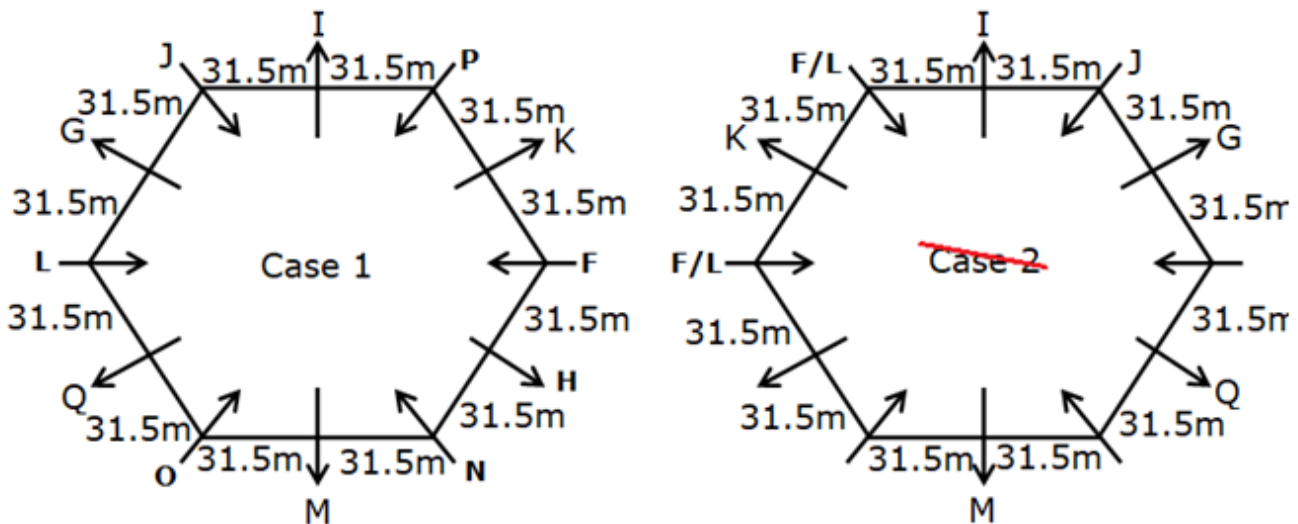

@QuizByMickey

Again we have,

- H sits 94.5m right and left of O and P respectively.
- F sits 63m away from N.

Applying the above conditions, Case 2 gets eliminated because there is no possibility to place H. Hence, Case 1 gives a final arrangement.

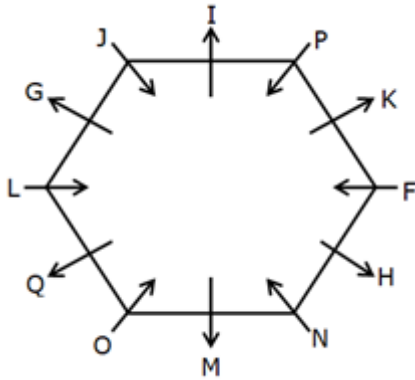

**Answer: B**

14. Questions

**Final arrangement:**

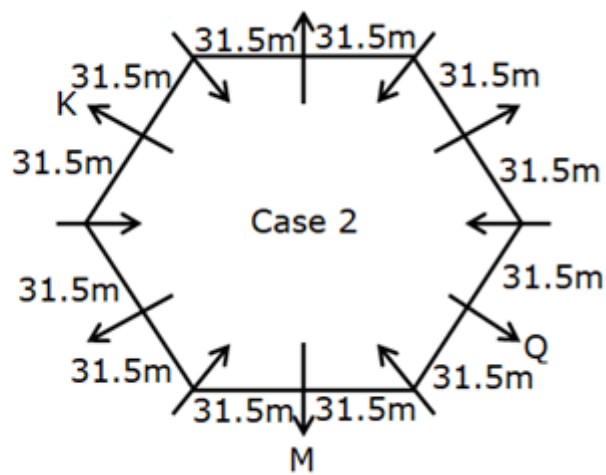

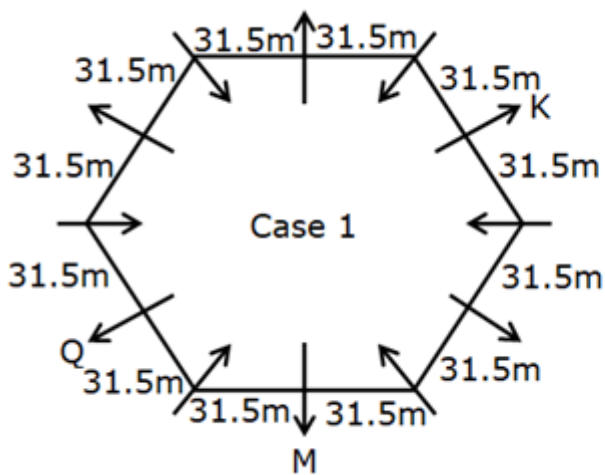

@QuizByMickey

We have,

- K sits 126m away from M, who sits in the middle of the table.
- Q sits 189m away from K.

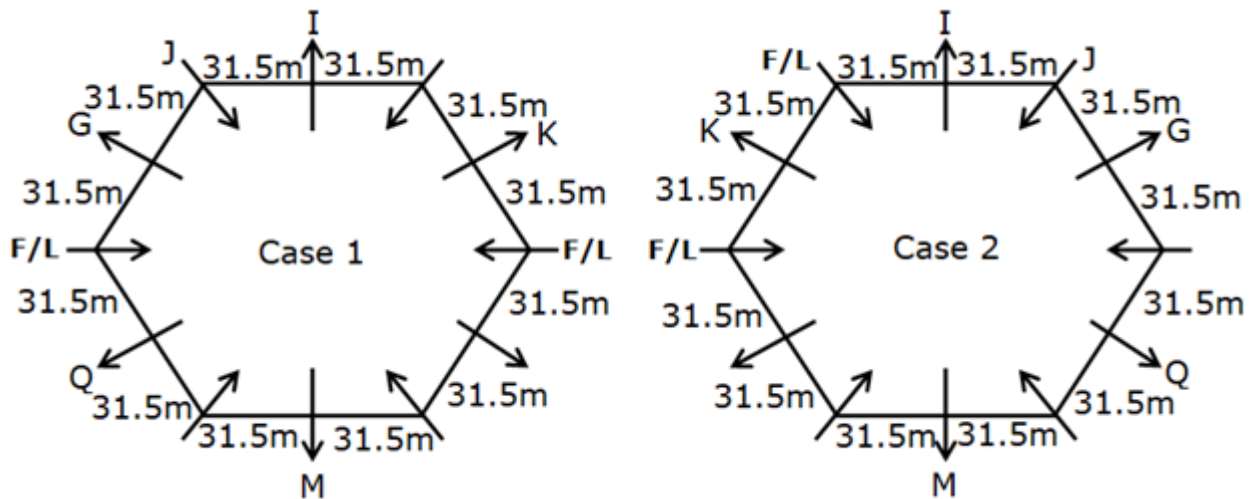

Applying the conditions, there are two possibilities.

Again we have,

- Only two persons sit between Q and J (Either from left or right).
- J sits adjacent to G and I, who sits 63m away from K.
- The number of persons sitting between I and Q, when counted from the right of I is two more than the number of persons sitting between F and L.
- Neither F nor L sits adjacent to M.

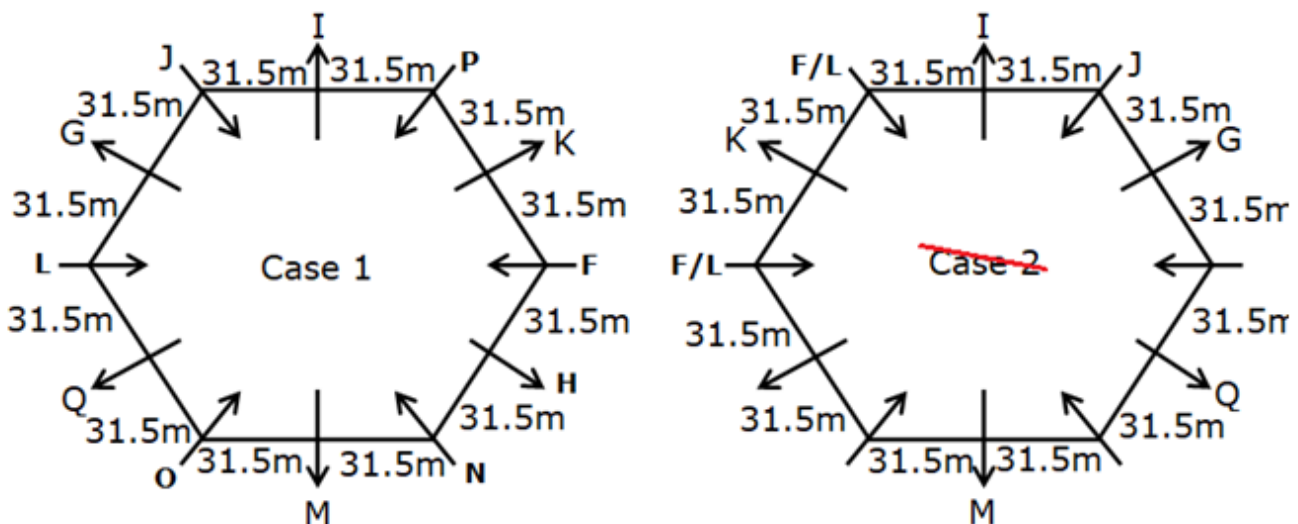

@QuizByMickey

Again we have,

- H sits 94.5m right and left of O and P respectively.
- F sits 63m away from N.

Applying the above conditions, Case 2 gets eliminated because there is no possibility to place H. Hence, Case 1 gives a final arrangement.

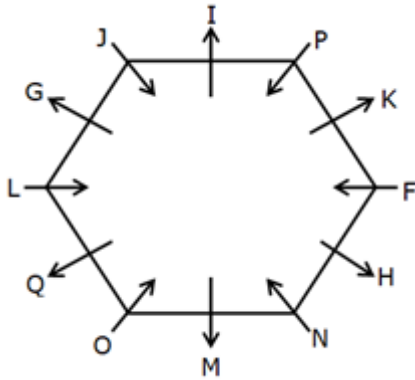

**Answer: E**

**15. Questions**

**Final arrangement:**

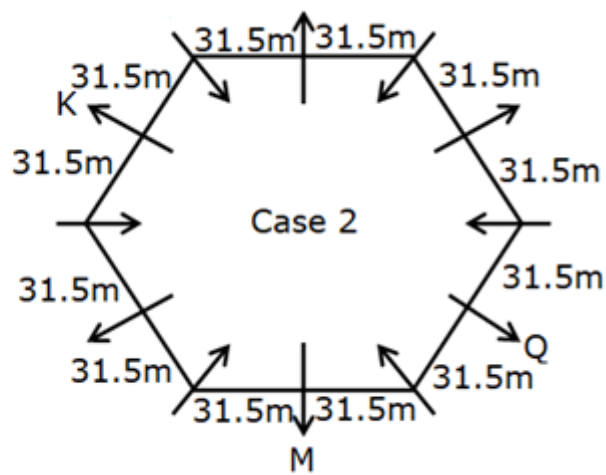

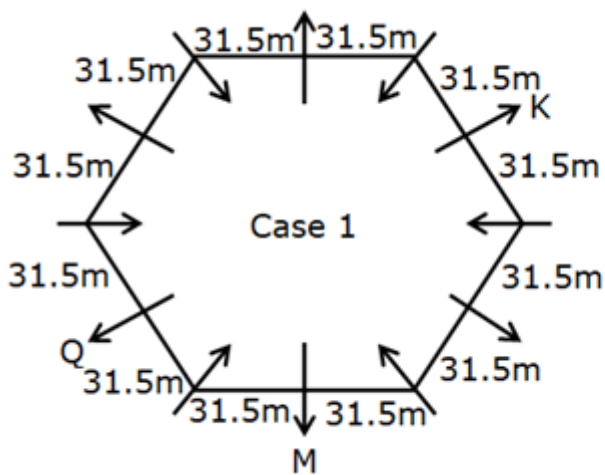

@QuizByMickey

We have,

- K sits 126m away from M, who sits in the middle of the table.
- Q sits 189m away from K.

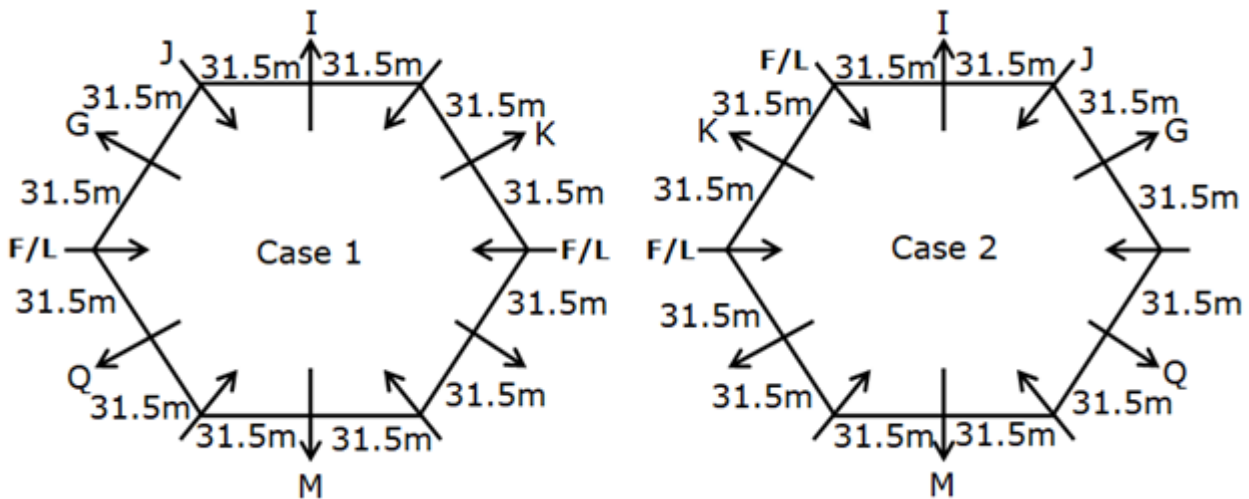

Applying the conditions, there are two possibilities.

Again we have,

- Only two persons sit between Q and J (Either from left or right).
- J sits adjacent to G and I, who sits 63m away from K.
- The number of persons sitting between I and Q, when counted from the right of I is two more than the number of persons sitting between F and L.
- Neither F nor L sits adjacent to M.

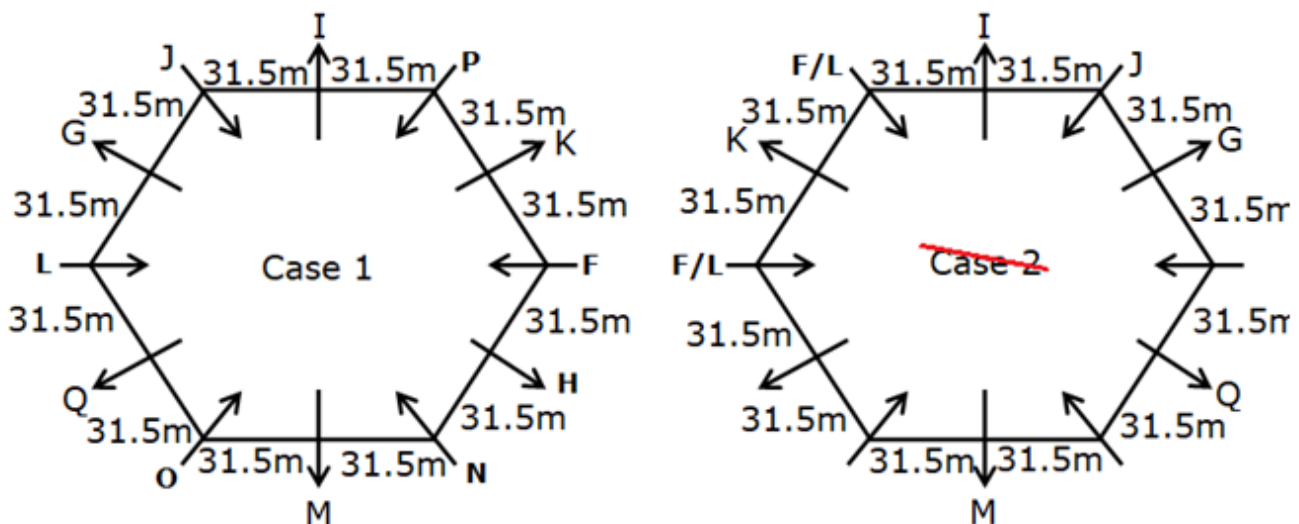

@QuizByMickey

Again we have,

- H sits 94.5m right and left of O and P respectively.
- F sits 63m away from N.

Applying the above conditions, Case 2 gets eliminated because there is no possibility to place H. Hence, Case 1 gives a final arrangement.

**Answer: A**

**16. Questions**

**Answer: E**

No student can be forced to work against his/her wish so, the first sentence is not correct.

The second sentence also strengthens the issue further and not solves the same, so can be ruled out.

Hence, option (e) is correct.

**17. Questions**

**Answer: D**

The answer is quite clear as we can see that because players were injured, the team lost.

@QuizByMickey

So, option (d) is the correct answer.

### 18. Questions

**Answer: C**

If this point was not true and the White rhinos have shifted to another location, then the conclusion will not hold good. However, if this point was actually true, it would clear any confusion and provide evidence for the foresters' view.

### 19. Questions

**Answer: D**

Assumption I: It is implicit because the decision to impose rigid fines for the traffic rules violation would make people careful while coming on the roads with their vehicles.

Assumption II: This may be included in the amendment bill, but it could not be an assumption.

Assumption III: It is not implicit, as nothing about the previous governments or their measures is mentioned in the statement.

### 20. Questions

**Answer: E**

The device attracts large number of PM 2.5 pollutants together and makes such pollutants heavier and in turn they fall safely on the ground instead of being air borne and polluting the air. The device also has potential to neutralize the pollution emitted from 10 cars in its vicinity. So, both arguments I and II are strong.
