

1. Questions

Study the following information carefully and answer the below questions.

Eight persons were born in five different months January, February, March, April, and May on two different dates 13th and 15th of each month. Only one or no one was born on each date of every month.

Only one person was born between A and C, and both were born before April on different dates, where A is elder than C. H was born 13th of the Month which has 31 days. E and B are elder than H. No one was born along with the month in which E was born. F was born after C but born before E. G and D were born on the same dates where G is younger than D. B was born immediately after the month in which C was born. The number of persons born between B and G is the same as between E and D. E was not born on a prime number date.

How many persons were born between A and E?

- a. As many as between A and D
- b. As many as between B and D
- c. As many as between C and E
- d. As many as between G and C
- e. Both (a) and (b)

2. Questions

On which of the following date and month G was born?

- a. 15th May
- b. 13th May
- c. 15th April
- d. 13th January
- e. None of these

3. Questions

@QuizByMickey

Which of the following statement is true with respect to the final arrangement?

- a. B was born on 13th April
- b. E was born on 15th May
- c. H was born on January
- d. C was born on 15th February

e. All are correct

4. Questions

Four of the following five are alike in a certain way as per the given arrangement and thus form a group. Find the one that doesn't belong to that group.

- a. CF
- b. AB
- c. BH
- d. DE
- e. AF

5. Questions

Which of the following statement(s) is/are false with respect to the final arrangement?

- I). B and F are born in the same month
 - II). A and D are born in the same month
 - III). E is born immediately after B
- a. Only II
 - b. Only III
 - c. Only I and II
 - d. Only II and III
 - e. Only I and III

6. Questions

Study the following information carefully and answer the below questions.

Sixteen persons viz.- K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, and Z are sitting on two concentric square tables in such a way that eight persons are sitting in the inner table and eight persons are sitting in the outer table. One person sits on each corner while one person sits on each side of both tables. The persons sitting on the outer table are facing towards the center whereas the persons sitting on the inner table are facing away from the center.

Note: The consecutive alphabetically named persons are not sitting together. If A sits facing B, then A and B sit facing each other at different tables.

The one who sits facing L sits third to the right of Q, who sits facing away from the center. K sits facing the one who sits third to the left of Q. K sits adjacent to O, who sits at one of the corners. Only three persons are sitting between O and S. T sits facing M and sits third to the left P. Both T and Z are neither sitting adjacent to Q nor K. Only three persons are sitting between W and the one who sits facing Y. Neither S nor T sits adjacent to W. Z sits third to the right of X, who neither sits adjacent to W nor M. The

number of persons sitting between X and U is the same as the number of persons sitting between V and S, when counted from the right of both U and S. Neither W nor Z sits adjacent to N.

Who among the following person sits second to the right of the one who sits facing W?

- a. S
- b. The one who sits third to the left of P
- c. The one who sits second to the left of Y
- d. V
- e. None of these

7. Questions

What is the position of W with respect to N?

- a. Immediate right
- b. Third to the right
- c. Second to the left
- d. Fourth to the right
- e. None of these

8. Questions

If all the persons sitting at the inner table are arranged in alphabetical order in a clockwise direction starting from M, then who among the following person sits facing the one who sits immediate right of K?

- a. W
- b. U
- c. X
- d. N
- e. None of these

@QuizByMickey

9. Questions

How many persons are sitting between L and the one who sits facing N when counted from the right of L?

- a. As many persons are sitting between K and P when counted from the right of K
- b. Three
- c. As many persons are sitting between U and R
- d. Either A or C

e. None of these

10. Questions

Which of the following statement is not true?

- a. S sits immediate right of the one who sits facing X
- b. R sits opposite to Q
- c. More than two persons are sitting between P and S when counted to the right of S
- d. R sits immediate left of X
- e. More than one statement is not true

11. Questions

Study the following information carefully and answer the questions given below.

Nine students viz., A, B, C, D, E, W, X, Y and Z have cleared the class test and are ranked from 1 to 9. They are standing in the ground at a certain distance. No two persons secured the same rank.

Note: The distance between any two students is the twice of the lowest rank among them. For example, if P is the first rank and Q is the second rank, the distance between them is 4m.

X is to the west of A and is the immediate previous rank of D who is to the north of X. The number of persons ranked between D and W is an odd prime number where no one ranks after W who is to the east of D. E ranks exactly between D and W and is to the south of Y. C stands to the south of W and ranks before E. Z stands to the west of C and ranks after Y. The direction of Y from E is same as the direction of B from Z. B holds the immediate next rank to E and stands to the west of E. C neither holds the first rank nor ranks before X. Y holds the rank after A but before E. Z holds the rank after B and is four ranks after C. Y is not secured the first rank.

In which direction is C standing with respect to A?

- a. North-east
- b. South-east
- c. North-west
- d. South-west
- e. Cannot be determined

@QuizByMickey

12. Questions

How many persons rank after E in the final arrangement?

- a. 1
- b. 2
- c. 3

d. 4

e. None

13. Questions

What is the approximate shortest distance between D and A and who ranks according to that value?

a. 5, Y

b. 7, E

c. 5, B

d. 7, B

e. 5, E

14. Questions

Find the odd one out according to their standing position in the ground?

a. D-Y

b. X-B

c. A-E

d. Z-W

e. C-D

15. Questions

Who among the following group of persons hold the prime numbered ranks?

a. A,B,C,E

b. X,A,C,W

c. A,Y,E,B

d. Z,W,A,B

e. X,D,Y,B

@QuizByMickey

16. Questions

Each of the questions below consists of statements below it. You must decide whether the data provided in the statements are sufficient to answer the question and mark the appropriate option as answer.

Six different vegetables viz., Carrot, Potato, Tomato, Onion, Brinjal and Pumpkin were purchased on different days from Monday to Saturday, then which of the vegetable was purchased on Wednesday?

- a. Tomato was purchased after Thursday. Only two vegetables were purchased between Tomato and Onion. Brinjal was purchased before Pumpkin.
- b. Pumpkin was purchased on Thursday. Only one vegetable was purchased between Pumpkin and Onion. Two vegetables were purchased between Onion and Tomato. Potato was purchased before Carrot.
- c. Only one vegetable was purchased before Potato. Onion was purchased two days after Potato. As many vegetables were purchased after Tomato is same as before Brinjal.
- d. Only two vegetables were purchased between Brinjal and Carrot. Onion was purchased four days after Carrot. Pumpkin was purchased before Tomato.
- e. Carrot was purchased before Wednesday. More than two vegetables were purchased between Onion and Pumpkin. Brinjal was purchased before Pumpkin but after Potato. Pumpkin was not purchased on Saturday.

17. Questions

Six persons P, Q, R, S, T and U are of different heights. Who is the tallest person among them?

- a. Q is shorter than S who is shorter than P. U is shorter than T who is not the second shortest person. At least two persons are taller than P. Q is not the shortest person.
- b. Exactly three persons are shorter than U but taller than R. S is taller than Q but shorter than P as well as T.
- c. P is taller than S. P is shorter than at least two persons. Only one person is shorter than Q who is shorter than S. U is neither the tallest nor the shortest person.
- d. P is taller than T who is taller than only two persons. Q is taller than S who is the shortest person. R who is not the tallest person, is taller than U who is not the second shortest person.
- e. P is taller than S and T. R is taller than S. Q is not the shortest person.

18. Questions

Seven persons J, K, L, M, N, O and P are in a family of three generation. A single person doesn't have a child. There are three married couples. How is N related to L?

- a. M is the father-in-law of K. L is the mother of N. J is not in the third generation. P is the sister in law of K.
- b. L is the mother of N. M is the grandfather of N who is married to O. K is not married to M and is not the son of M. K doesn't have a sibling.
- c. N and J are married couples. L is the child of M. P is the brother in law of K.
- d. N is the grandchild of M. K is the daughter of L. O is not married to N.
- e. J is the mother of L who is the mother of N. K is not married to J. O is a female member and doesn't have siblings. P is the maternal aunt of N.

19. Questions

Seven persons A, B, C, D, E, F and G live on different floors of a seven storey building. The bottommost floor is numbered as 1 and the topmost floor is numbered as 7. Who lives immediately above B?

- a. A lives on an odd numbered floor and immediately above C. There are two floors between A and D. F lives two floors below D.
- b. D lives two floors above F. The number of floors above D is the same as the number of floors below C. G lives above E who lives above B.
- c. F lives two floors above C. There are three floors between C and D. B lives two floors below E. G lives two floors above E who doesn't live on even numbered floor. A doesn't live above E.
- d. D lives on even numbered floor. E lives three floors below D. G lives above B but neither on fourth floor nor fifth floor. F lives three floors below G.
- e. The number floors above C is one more than the number of floors below F. F doesn't live below C. D lives three floors above F. A lives immediately below C.

20. Questions

Eight persons G, H, I, J, K, L, M and N sit around a circular table facing towards the centre. Who sits to the immediate right of H?

- a. M sits second to the right of K who sits third to the right of J. L sits second to the right of G who sits adjacent to K. H sits adjacent to J.
- b. J and I are the neighbors of L. Only one person sits between J and M. K sits second to the right of M. N sits adjacent to K.
- c. N sits second to the right of L. M sits fourth to the right of N. I sits second to the left of G. I sits adjacent to N. K sits opposite to L.
- d. J sits sixth to the left of L. I sits second to the right of J. Only two persons sit between M and I. G sits to the immediate right of K. N doesn't sit adjacent to I. M faces H.
- e. H sits fourth to the right of the person, who sits to the immediate left of M. L sits second to the right of P. K sits adjacent to I.

Explanations:

@QuizByMickey

1. Questions

Final Arrangement Diagram:

	CASE-I(d)	
Month	13 th	15 th
Jan	A	D
Feb	-	C
March	B	F
April	-	E
May	H	G

We have,

- Only one person was born between A and C, and both were born before April on different dates, where A is elder than C.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A		
Feb		C			A	
March			C			C
April						
May						

Again we have,

- H was born 13th of the Month which has 31 days.
- E and B are elder than H.
- No one was born along with the month in which E was born.
- F was born after C but born before E.
- B was born immediately after the month in which C was born.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A	B/E	B/E
Feb		C			A	
March			C	F	H	C
April						
May	H		H			

@QuizByMickey

Case-II gets eliminated because there is no place for B.

Case-III gets eliminated because E was only born in a month.

Again we have,

- G and D were born on the same dates where G is younger than D.
- B was born immediately after the month in which C was born.

	CASE-I(a)		CASE-I(b)		CASE-I(c)		CASE-I(d)	
Month	13 th	15 th	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A	D	A	D	A	D	A	D
Feb	-	C	-	C	-	C	-	C
March	F	B	B	F	F	B	B	F
April	E	-	E	-	-	E	-	E
May	H	G	H	G	H	G	H	G

Again we have,

- The number of persons born between B and G is the same as between E and D. E was not born on a prime number date.

	CASE-I(a)		CASE-I(b)		CASE-I(c)		CASE-I(d)	
Month	13 th	15 th	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A	D	A	D	A	D	A	D
Feb	-	C	-	C	-	C	-	C
March	F	B	B	F	F	B	B	F
April	E	-	E	-	-	E	-	E
May	H	G	H	G	H	G	H	G

Answer: D

@QuizByMickey

2. Questions

Final Arrangement Diagram:

	CASE-I(d)	
Month	13 th	15 th
Jan	A	D
Feb	-	C
March	B	F
April	-	E
May	H	G

We have,

- Only one person was born between A and C, and both were born before April on different dates, where A is elder than C.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A		
Feb		C			A	
March			C			C
April						
May						

Again we have,

- H was born 13th of the Month which has 31 days.
- E and B are elder than H.
- No one was born along with the month in which E was born.
- F was born after C but born before E.
- B was born immediately after the month in which C was born.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A	B/E	B/E
Feb		C			A	
March			C	F	H	C
April						
May	H		H			

@QuizByMickey

Case-II gets eliminated because there is no place for B.

Case-III gets eliminated because E was only born in a month.

Again we have,

- G and D were born on the same dates where G is younger than D.
- B was born immediately after the month in which C was born.

	CASE-I(a)		CASE-I(b)		CASE-I(c)		CASE-I(d)	
Month	13 th	15 th	13 th	15 th	13 th	15 th	13 th	15 th

March	F	B	B	F	F	B	B	F
April	E	-	E	-	-	E	-	E
May	H	G	H	G	H	G	H	G

Answer: D

@QuizByMickey

4. Questions

Final Arrangement Diagram:

	CASE-I(d)	
Month	13 th	15 th
Jan	A	D
Feb	-	C
March	B	F
April	-	E
May	H	G

We have,

- Only one person was born between A and C, and both were born before April on different dates, where A is elder than C.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A		
Feb		C			A	
March			C			C
April						
May						

Again we have,

- H was born 13th of the Month which has 31 days.
- E and B are elder than H.
- No one was born along with the month in which E was born.
- F was born after C but born before E.
- B was born immediately after the month in which C was born.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A	B/E	B/E
Feb		C			A	
March			C	F	H	C
April						
May	H		H			

@QuizByMickey

Case-II gets eliminated because there is no place for B.

Case-III gets eliminated because E was only born in a month.

Again we have,

- G and D were born on the same dates where G is younger than D.
- B was born immediately after the month in which C was born.

	CASE-I(a)		CASE-I(b)		CASE-I(c)		CASE-I(d)	
Month	13 th	15 th	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A	D	A	D	A	D	A	D
Feb	-	C	-	C	-	C	-	C
March	F	B	B	F	F	B	B	F
April	E	-	E	-	-	E	-	E
May	H	G	H	G	H	G	H	G

Again we have,

- The number of persons born between B and G is the same as between E and D. E was not born on a prime number date.

	CASE-I(a)		CASE-I(b)		CASE-I(c)		CASE-I(d)	
Month	13 th	15 th	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A	D	A	D	A	D	A	D
Feb	-	C	-	C	-	C	-	C
March	F	B	B	F	F	B	B	F
April	E	-	E	-	-	E	-	E
May	H	G	H	G	H	G	H	G

Answer: E All pairs are born on the same date but in option (e) both persons are born on different dates.

5. Questions

Final Arrangement Diagram:

	CASE-I(d)	
Month	13 th	15 th
Jan	A	D
Feb	-	C
March	B	F
April	-	E
May	H	G

We have,

- Only one person was born between A and C, and both were born before April on different dates, where A is elder than C.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A		
Feb		C			A	
March			C			C
April						
May						

Again we have,

- H was born 13th of the Month which has 31 days.
- E and B are elder than H.
- No one was born along with the month in which E was born.
- F was born after C but born before E.
- B was born immediately after the month in which C was born.

	CASE-I		CASE-II		CASE-III	
Month	13 th	15 th	13 th	15 th	13 th	15 th
Jan	A			A	B/E	B/E
Feb		C			A

March	F	B	B	F	F	B	B	F
April	E	-	E	-	-	E	-	E
May	H	G	H	G	H	G	H	G

Answer: B

@QuizByMickey

6. Questions

We have:

- The one who sits facing L sits third to the right of Q, who sits facing away from the center.
- K sits facing the one who sits third to the left of Q.
- K sits adjacent to O, who sits at one of the corners.

That means, in case (1) O sits immediate left of K, in case (2) O sits immediate right of K.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between O and S.
- T sits facing M and sits third to the left P.
- Both T and Z are neither sitting adjacent to Q nor K.

@QuizByMickey

Since, persons in alphabetical order are not sitting together.

That means, in case (1) M sits immediate left of Q, in case (2) M sits second to the right of Q.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between W and the one who sits facing Y.
- Neither S nor T sits adjacent to W.

That means, in case (1) & case (2) W sits facing K, in case (1a) W sits facing P.

Based on the above given information we have:

Again, we have:

- Z sits third to the right of X, who neither sits adjacent to W nor M.
- The number of persons sitting between X and U is the same as the number of persons sitting between V and S, when counted from the right of both U and S.

That means, in case (1) & case (1a) Z sits immediate right of W, case (2) is not valid.

- Neither W nor Z sits adjacent to N.

That means, in case (1) N sits immediate right of U, case (1a) is not valid.

Based on the above given information we have:

@QuizByMickey

Case (1a) is not valid as neither W nor Z sits adjacent to N, case (2) is not valid as the number of persons sitting between X and U is the same as the number of persons sitting between V and S.

Answer: C

7. Questions

We have:

- The one who sits facing L sits third to the right of Q, who sits facing away from the center.
- K sits facing the one who sits third to the left of Q.
- K sits adjacent to O, who sits at one of the corners.

That means, in case (1) O sits immediate left of K, in case (2) O sits immediate right of K.

Based on the above given information we have:

@QuizByMickey

Again, we have:

- Only three persons are sitting between O and S.
- T sits facing M and sits third to the left P.
- Both T and Z are neither sitting adjacent to Q nor K.

Since, persons in alphabetical order are not sitting together.

That means, in case (1) M sits immediate left of Q, in case (2) M sits second to the right of Q.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between W and the one who sits facing Y.
- Neither S nor T sits adjacent to W.

That means, in case (1) & case (2) W sits facing K, in case (1a) W sits facing P.

Based on the above given information we have:

@QuizByMickey

Again, we have:

- Z sits third to the right of X, who neither sits adjacent to W nor M.
- The number of persons sitting between X and U is the same as the number of persons sitting between V and S, when counted from the right of both U and S.

That means, in case (1) & case (1a) Z sits immediate right of W, case (2) is not valid.

- Neither W nor Z sits adjacent to N.

That means, in case (1) N sits immediate right of U, case (1a) is not valid.

Based on the above given information we have:

Case (1a) is not valid as neither W nor Z sits adjacent to N, case (2) is not valid as the number of persons sitting between X and U is the same as the number of persons sitting between V and S.

Answer: B

8. Questions

@QuizByMickey

We have:

- The one who sits facing L sits third to the right of Q, who sits facing away from the center.
- K sits facing the one who sits third to the left of Q.
- K sits adjacent to O, who sits at one of the corners.

That means, in case (1) O sits immediate left of K, in case (2) O sits immediate right of K.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between O and S.
- T sits facing M and sits third to the left P.
- Both T and Z are neither sitting adjacent to Q nor K.

@QuizByMickey

Since, persons in alphabetical order are not sitting together.

That means, in case (1) M sits immediate left of Q, in case (2) M sits second to the right of Q.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between W and the one who sits facing Y.
- Neither S nor T sits adjacent to W.

That means, in case (1) & case (2) W sits facing K, in case (1a) W sits facing P.

Based on the above given information we have:

Again, we have:

- Z sits third to the right of X, who neither sits adjacent to W nor M.
- The number of persons sitting between X and U is the same as the number of persons sitting between V and S, when counted from the right of both U and S.

That means, in case (1) & case (1a) Z sits immediate right of W, case (2) is not valid.

- Neither W nor Z sits adjacent to N.

That means, in case (1) N sits immediate right of U, case (1a) is not valid.

Based on the above given information we have:

@QuizByMickey

Case (1a) is not valid as neither W nor Z sits adjacent to N, case (2) is not valid as the number of persons sitting between X and U is the same as the number of persons sitting between V and S.

Answer: A

9. Questions

We have:

- The one who sits facing L sits third to the right of Q, who sits facing away from the center.
- K sits facing the one who sits third to the left of Q.
- K sits adjacent to O, who sits at one of the corners.

That means, in case (1) O sits immediate left of K, in case (2) O sits immediate right of K.

Based on the above given information we have:

@QuizByMickey

Again, we have:

- Only three persons are sitting between O and S.
- T sits facing M and sits third to the left P.
- Both T and Z are neither sitting adjacent to Q nor K.

Since, persons in alphabetical order are not sitting together.

That means, in case (1) M sits immediate left of Q, in case (2) M sits second to the right of Q.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between W and the one who sits facing Y.
- Neither S nor T sits adjacent to W.

That means, in case (1) & case (2) W sits facing K, in case (1a) W sits facing P.

Based on the above given information we have:

@QuizByMickey

Again, we have:

- Z sits third to the right of X, who neither sits adjacent to W nor M.
- The number of persons sitting between X and U is the same as the number of persons sitting between V and S, when counted from the right of both U and S.

That means, in case (1) & case (1a) Z sits immediate right of W, case (2) is not valid.

- Neither W nor Z sits adjacent to N.

That means, in case (1) N sits immediate right of U, case (1a) is not valid.

Based on the above given information we have:

Case (1a) is not valid as neither W nor Z sits adjacent to N, case (2) is not valid as the number of persons sitting between X and U is the same as the number of persons sitting between V and S.

Answer: A

10. Questions

@QuizByMickey

We have:

- The one who sits facing L sits third to the right of Q, who sits facing away from the center.
- K sits facing the one who sits third to the left of Q.
- K sits adjacent to O, who sits at one of the corners.

That means, in case (1) O sits immediate left of K, in case (2) O sits immediate right of K.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between O and S.
- T sits facing M and sits third to the left P.
- Both T and Z are neither sitting adjacent to Q nor K.

@QuizByMickey

Since, persons in alphabetical order are not sitting together.

That means, in case (1) M sits immediate left of Q, in case (2) M sits second to the right of Q.

Based on the above given information we have:

Again, we have:

- Only three persons are sitting between W and the one who sits facing Y.
- Neither S nor T sits adjacent to W.

That means, in case (1) & case (2) W sits facing K, in case (1a) W sits facing P.

Based on the above given information we have:

Again, we have:

- Z sits third to the right of X, who neither sits adjacent to W nor M.
- The number of persons sitting between X and U is the same as the number of persons sitting between V and S, when counted from the right of both U and S.

That means, in case (1) & case (1a) Z sits immediate right of W, case (2) is not valid.

- Neither W nor Z sits adjacent to N.

That means, in case (1) N sits immediate right of U, case (1a) is not valid.

Based on the above given information we have:

@QuizByMickey

Case (1a) is not valid as neither W nor Z sits adjacent to N, case (2) is not valid as the number of persons sitting between X and U is the same as the number of persons sitting between V and S.

Answer: D

11. Questions

Following the statements given above, the rank, distance and the directions of each student are obtained as follows.

Rank	1	2	3	4	5	6	7	8	9
Students	A	X	D	C	Y	E	B	Z	W

Answer: B

@QuizByMickey

12. Questions

Following the statements given above, the rank, distance and the directions of each student are obtained as follows.

Rank	1	2	3	4	5	6	7	8	9
Students	A	X	D	C	Y	E	B	Z	W

Answer: C

13. Questions

Following the statements given above, the rank, distance and the directions of each student are obtained as follows.

Rank	1	2	3	4	5	6	7	8	9
Students	A	X	D	C	Y	E	B	Z	W

@QuizByMickey

Answer: D

14. Questions

Following the statements given above, the rank, distance and the directions of each student are obtained as follows.

Rank	1	2	3	4	5	6	7	8	9
Students	A	X	D	C	Y	E	B	Z	W

Answer: E

15. Questions

Following the statements given above, the rank, distance and the directions of each student are obtained as follows.

Rank	1	2	3	4	5	6	7	8	9
Students	A	X	D	C	Y	E	B	Z	W

@QuizByMickey

Answer: E

16. Questions

Answer: E

We have,

- Carrot was purchased before Wednesday.
- More than two vegetables were purchased between Onion and Pumpkin.
- Brinjal was purchased before Pumpkin but after Potato.

- Pumpkin is not purchased on Saturday.

From the above conditions Case1 and Case2a gets eliminated. Hence Case2 shows the final arrangement.

Potato was purchased on Wednesday.

	Case1	Case2	Case2a
Days	Vegetables	Vegetables	Vegetables
Monday	Carrot	Onion	Onion
Tuesday	Onion	Carrot	Carrot
Wednesday		Potato	
Thursday		Brinjal	
Friday		Pumpkin	
Saturday	Pumpkin	Tomato	Pumpkin

17. Questions

Answer: D

We have,

- P is taller than T who is taller than only two persons.
- Q is taller than S who is the shortest person.
- R who is not the tallest person, is taller than U who is not the second shortest person.

P is the tallest person.

Rank	Persons
1	P
2	R
3	U
4	T
5	Q
6	S

@QuizByMickey

18. Questions

Answer: E

We have,

- J is the mother of L who is the mother of N.
- K is not married to J.
- O is a female member and doesn't have siblings.
- P is the maternal aunt of N.

From the above conditions **N is the son of L.**

19. Questions

Answer: C

We have,

- F lives two floors above C.
- There are three floors between C and D.
- B lives two floors below E.
- G lives two floors above E who doesn't live on even numbered floor.
- A doesn't live above E.

From the above conditions Case2 gets eliminated. Hence Case1 shows the final arrangement.

F lives immediately above B.

	Case1	Case2
Floor	Person	Person
7	G	F
6	D	C
5	E	G
4	F	A
3	B	E
2	C	D
1	A	B

@QuizByMickey

20. Questions

Answer: D

We have,

- J sits sixth to the left of L.
- I sits second to the right of J.
- Only two persons sit between M and I.

Again we have,

- G sits to the immediate right of K.
- N doesn't sit adjacent to I.
- M faces H.

From the above conditions Case2 gets eliminated. Hence Case1 shows the final arrangement.

I sits to the immediate right of H.
