

1. Questions

Study the following information carefully and answer the given questions.

Ten persons- A, B, C, D, E, F, G, H, I, and J are sitting around a rectangular table. One person sits at each corner and facing outside (**opposite to the center**). One person sits on each smaller side of the table and two persons sit on each longer side of the table facing towards the center.

H sits second to the left of B. Only one person sits between H and D, who sits adjacent to J. Neither B sits on the shorter side of the table nor J sits at the corner. J sits opposite to the one who sits third to the right of A. The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D. F sits to the immediate left of E. Only one person sits between G and F. Neither B nor F sits adjacent to I.

Who among the following person sits third to the right of J?

- a. The one who sits opposite to F
- b. The one who sits to the immediate left of G
- c. The one who sits third to the right of B
- d. The one who sits to the immediate right of I
- e. The one who sits fifth to the left of C

2. Questions

The number of persons sitting between G and D is _____ than the number of persons sitting between F and ____, when counted from right of both G and F.

- a. One more, E
- b. Three less, A
- c. Two less, B
- d. Two less, C
- e. One less, I

3. Questions

Who among the following person sits opposite to A?

@QuizByMickey

- a. The one who sits fourth to the right of H
- b. The one who sits second to the left of J
- c. The one who sits third to the right of F
- d. The one who sits to the immediate left of B
- e. The one who sits sixth to the left of D

4. Questions

In which of the following statements does the third person sit exactly between the first and the second person in the final arrangement?

I). IJD

II). HEB

III). CAF

- a. Only I and II
- b. Only I
- c. Only II and III
- d. Only III
- e. Only I and II

5. Questions

Which of the following statement (s) is/are TRUE with respect to the final arrangement?

- a. G sits third to the right of E
- b. C sits to the immediate left of A
- c. B sits opposite to J
- d. All the given statements are true
- e. None of the given statements is true

6. Questions

Study the following information carefully and answer the given questions

Eight persons P-W were born on the same date and same month in different years viz., 1984, 1987, 1992, 1995, 1997, 2001, 2004 and 2010. Their ages are calculated with respect to the year 2025. They belong to the same family, with four generations and only three married couples. No single parent has a child.

W was born in a leap year. The difference between the ages of W and T's father is three years. Only two persons were born between T's father and R. The number of persons born after R is **one more than** the number of persons born before S. S has only one daughter and was born immediately before his wife Q. U's daughter was born in an even numbered year. T is the sister of U, who is the son of P. Only three persons were born between P and V, who is the niece of T. There is a nine year difference between V and R's husband.

Who among the following person was born two years after V's grandfather?

- a. R's sister-in-law
- b. P's brother-in-law
- c. U's daughter
- d. R's son-in-law

e. S's Son

7. Questions

The number of persons born before ____ is two less than the number of persons born after ____ respectively.

- a. W's daughter and S
- b. P's father and W's sister
- c. P's father-in-law and V's father
- d. T and U's daughter
- e. Q's son and R's husband.

8. Questions

What is the sum of the ages of U's grandmother and U's father?

- a. 54
- b. 67
- c. 57
- d. 68
- e. 65

9. Questions

If A's age is the average of the ages of T, U, R, and V, then what is the difference between the ages of A and W?

- a. Twenty years
- b. Eleven years
- c. Eighteen years
- d. Seventeen years
- e. Fourteen years

@QuizByMickey

10. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

- I). Only two persons were born between U and T's mother
 - II). As many persons were born before V's great grandmother as after W's daughter-in-law
 - III). T was born immediately after Q's son-in-law
- a. Only II

- b. Only I and III
- c. Only III
- d. Only II and I
- e. All I, II and III

11. Questions

Study the following information carefully and answer the given questions.

Eight persons -A, B, C, D, E, F, G and H are seated on ten different seats in a row where two seats are vacant. All the persons are facing north.

Note 1: Neither the seats at both the ends are vacant nor both vacant seats are adjacent to each other.

Note 2: If it is given that two persons sit between A and B, then it means there may or may not be vacant seats between A and B.

The number of seats to the right of E is multiple of three. Only four seats are between E and F, who sit to the immediate right of B. D sits second to the right of B. The number of persons sitting to the left of D is **two more than** the number of seats to the right of C. Only one seat is between C and G. A sits to the immediate right of H. Neither H sits adjacent to D nor A sits adjacent to B. No vacant seat to the left of B.

How many persons are seated between H and C?

- a. As many persons sit between D and A
- b. As many persons sit between B and H
- c. As many persons sit between F and E
- d. As many persons sit between G and F
- e. As many persons sit between E and B

12. Questions

What is the position of A with respect to D?

- a. Second to the left
- b. Third to the left
- c. Immediate right
- d. Fourth to the right
- e. Third to the right

@QuizByMickey

13. Questions

Who among the following person sits on the fourth seat from the right end of the row?

- a. The one who sits fourth to the right of D

- b. The one who sits to the immediate left of H
- c. The one who sits second to the right of D
- d. The one who sits immediate right of B
- e. The one who sits second to the left of G

14. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

- a. Both vacant seats are to the right of H
- b. More than three persons sit between A and D
- c. C is not seated adjacent to vacant seat
- d. E and G are immediate neighbors
- e. A sits second to the right of F

15. Questions

The number of persons sitting between A and C is the same as the number of persons sitting between ___ and ___?

- a. D and H
- b. E and D
- c. B and A
- d. F and H
- e. G and C

16. Questions

In the given questions, the relationship between different elements is shown in the statements, followed by some conclusions. Find the options in which all the three conclusions are definitely true.

Statements

$G < T \leq F > N; I \leq O \geq P = F; W \geq E = D \geq O$

- a. $D < P; F \geq E; O \leq E$
- b. $E > N; G < D; T \leq W$
- c. $G = F; P > E; I < N$
- d. $T \geq I; D < G; F = N$
- e. $N > O; E < F; O \geq T$

@QuizByMickey

17. Questions**Statements** $Z < A \geq B > L; M = B > N \geq C; V < U = L \geq J$

- a. $U < A; M > J; V < B$
- b. $M \geq J; V < N; Z \leq U$
- c. $A \leq V; U > C; N = L$
- d. $Z > J; L > B; A < V$
- e. $U \geq Z; N < A; C > L$

18. Questions**Statements** $K < E \leq G \leq Z; P = J > Z; I \geq R > P$

- a. $J > I; R \leq G; E \geq Z$
- b. $K \geq P; Z > P; R = G$
- c. $P > E; K < R; G < I$
- d. $I \geq J; Z > R; E \leq P$
- e. $R < K; G > I; E \geq Z$

19. Questions**Statements** $H \leq M = Y \leq U; L > G \geq W = Q \geq Y; G < A \leq R < D$

- a. $Q > A; W < M; U > L$
- b. $H < W; R \leq Y; D < Q$
- c. $L > A; M > W; G \leq H$
- d. $M < R; G \geq M; A > Y$
- e. $D < M; Y > L; A \leq G$

@QuizByMickey

20. Questions**Statements** $U > S = P \geq I = T; N < L = R \leq G < Q; Y \leq Q \leq I$

- a. $P < Q; R \geq I; U < N$
- b. $N < S; Y > R; G \geq T$
- c. $Q > T; U \leq Y; I < R$

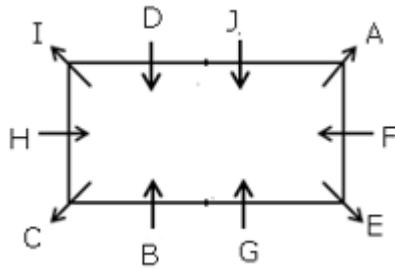

d. $L > P$; $I < N$; $G > U$

e. $S \geq Y$; $T > R$; $N < I$

Explanations:

1. Questions

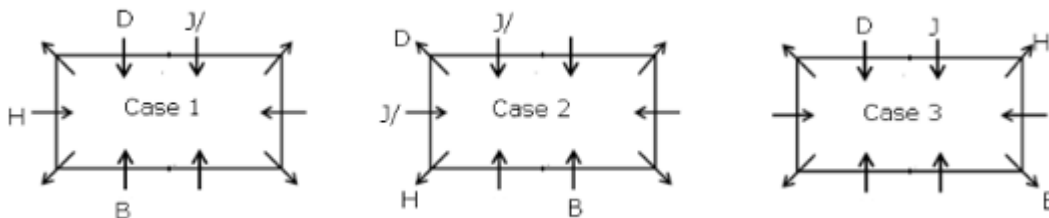

Final arrangement:

We have,

- H sits second to the left of B.
- Only one person sits between H and D, who sits adjacent to J.
- Neither B sits on the shorter side of the table nor J sits at the corner.

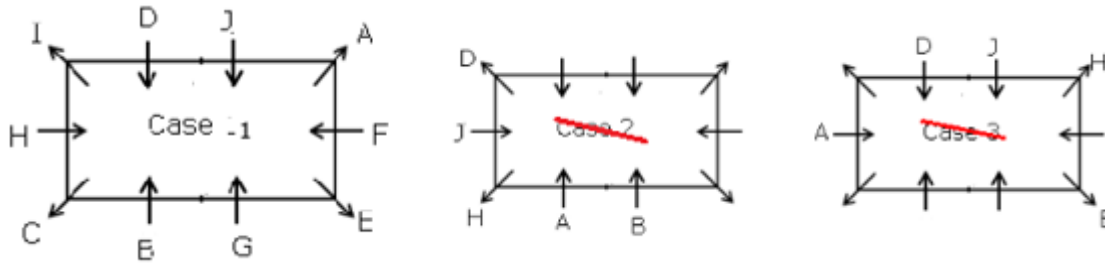

From the above conditions, there are three possibilities.

Again we have,

- J sits opposite to the one who sits third to the right of A.
- The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D.
- F sits to the immediate left of E.
- Only one person sits between G and F.
- Neither B nor F sits adjacent to I.

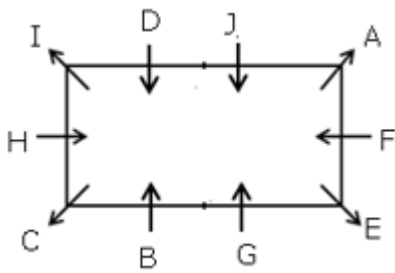

From the above conditions case 2 and case-3 get eliminated because The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D, which is not satisfied.

Answer: A

2. Questions

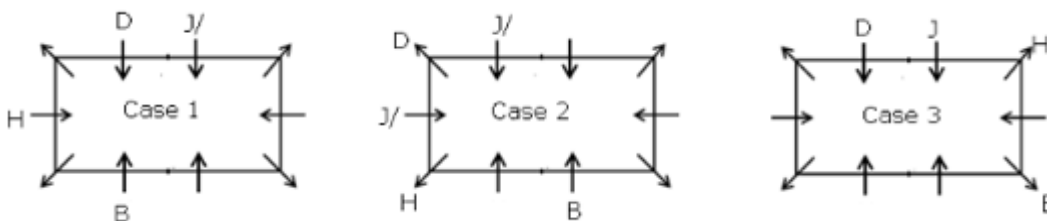

Final arrangement:

We have,

- H sits second to the left of B.
- Only one person sits between H and D, who sits adjacent to J.
- Neither B sits on the shorter side of the table nor J sits at the corner.

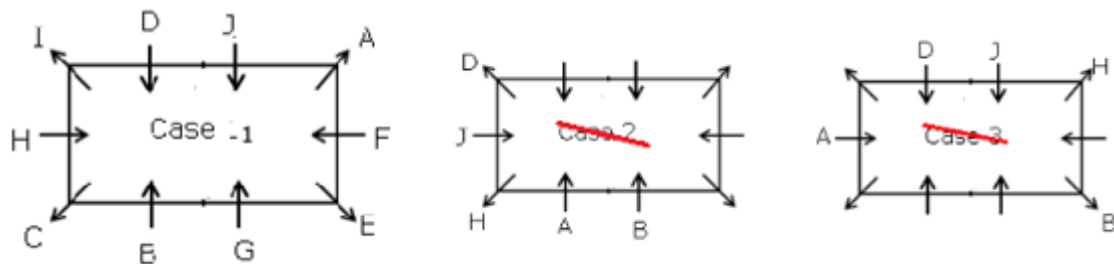

From the above conditions, there are three possibilities.

Again we have,

- J sits opposite to the one who sits third to the right of A.
- The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D.
- F sits to the immediate left of E.
- Only one person sits between G and F.
- Neither B nor F sits adjacent to I.

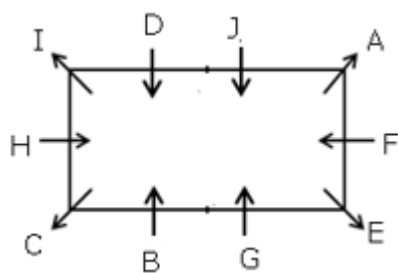

From the above conditions case 2 and case-3 get eliminated because The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D, which is not satisfied.

Answer: C

3. Questions

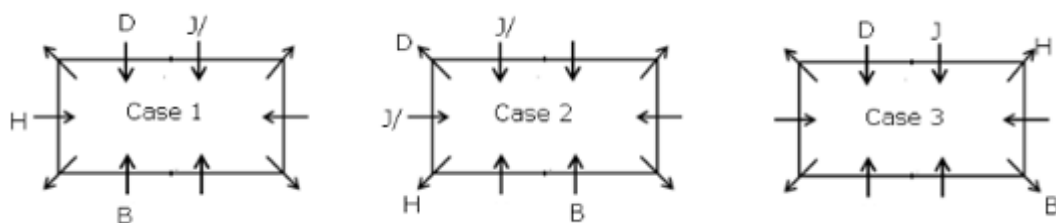

Final arrangement:

We have,

- H sits second to the left of B.
- Only one person sits between H and D, who sits adjacent to J.
- Neither B sits on the shorter side of the table nor J sits at the corner.

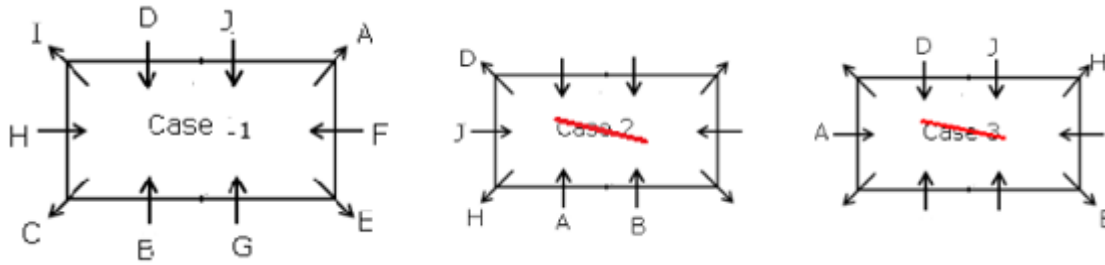

From the above conditions, there are three possibilities.

Again we have,

- J sits opposite to the one who sits third to the right of A.
- The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D.
- F sits to the immediate left of E.
- Only one person sits between G and F.
- Neither B nor F sits adjacent to I.

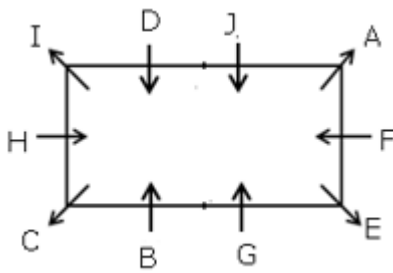

From the above conditions case 2 and case-3 get eliminated because The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D, which is not satisfied.

Answer: D

4. Questions

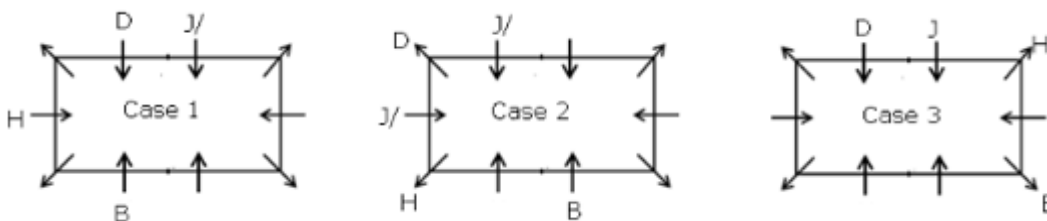

Final arrangement:

We have,

- H sits second to the left of B.
- Only one person sits between H and D, who sits adjacent to J.
- Neither B sits on the shorter side of the table nor J sits at the corner.

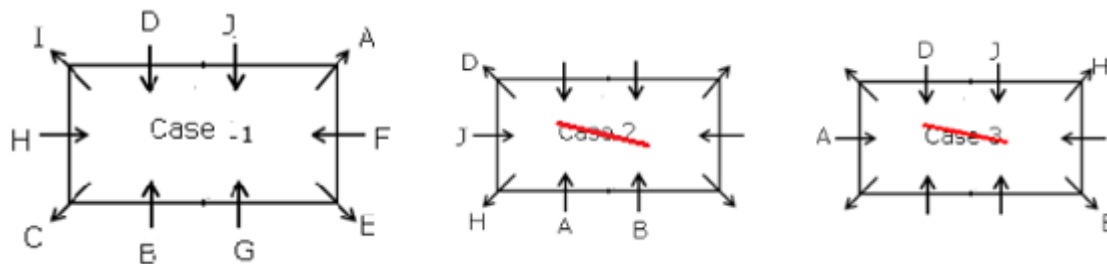

From the above conditions, there are three possibilities.

Again we have,

- J sits opposite to the one who sits third to the right of A.
- The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D.
- F sits to the immediate left of E.
- Only one person sits between G and F.
- Neither B nor F sits adjacent to I.

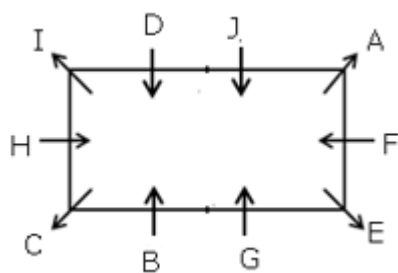

From the above conditions case 2 and case-3 get eliminated because The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D, which is not satisfied.

Answer: A

5. Questions

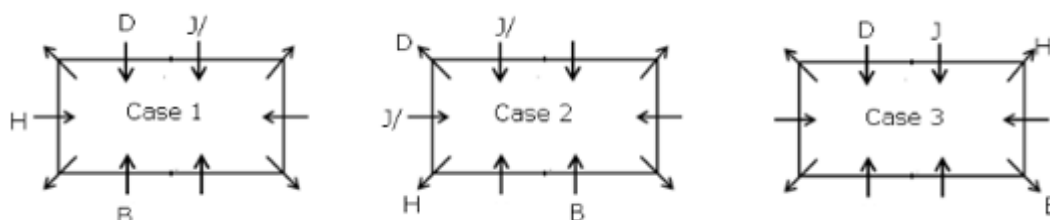

Final arrangement:

We have,

- H sits second to the left of B.
- Only one person sits between H and D, who sits adjacent to J.
- Neither B sits on the shorter side of the table nor J sits at the corner.

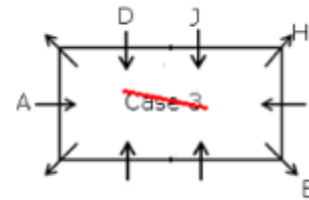

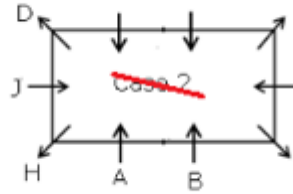

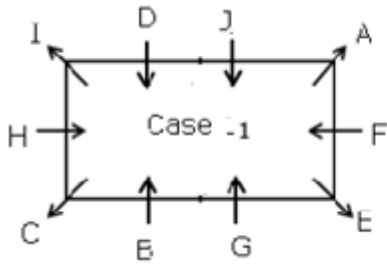

From the above conditions, there are three possibilities.

Again we have,

- J sits opposite to the one who sits third to the right of A.
- The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D.
- F sits to the immediate left of E.
- Only one person sits between G and F.
- Neither B nor F sits adjacent to I.

From the above conditions case 2 and case-3 get eliminated because The number of persons sitting between J and H is **one less than** the number of persons sitting between D and E, when counted from the left of both H and D, which is not satisfied.

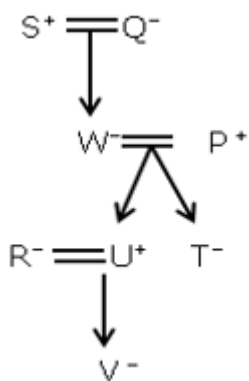

Answer: E

6. Questions

Final arrangement:

Years	Persons
1984	S
1987	Q
1992	W
1995	P
1997	T
2001	U
2004	R
2010	V

@QuizByMickey

We have,

- W was born in a leap year.
- The difference between the ages of W and T's father is three years.
- Only two persons were born between T's father and R.

From the above conditions, there are three possibilities

Years	Case 1	Case 2	Case 3
	Persons	Persons	Persons
1984	W	R/	
1987	T's dad		
1992		W	R
1995		T's dad	
1997	R		
2001			T's dad
2004		R/	W
2010			

Again we have,

- The number of persons born after R is **one more than** the number of persons born before S.
- S has only one daughter and was born immediately before his wife Q.
- U's daughter was born in an even numbered year.
- T is the sister of U, who is the son of P.
- Only three persons were born between P and V, who is the niece of T.
- There is a nine year difference between V and R's husband.

From the above conditions case-3 gets eliminated because S has only one daughter and was born immediately before his wife Q, which is not satisfied.

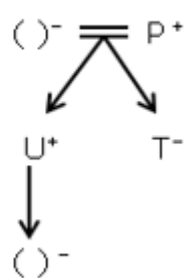

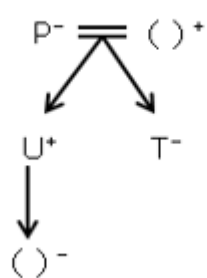

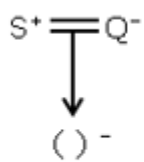

From the above condition case-1 gets eliminated because T is neither U's daughter nor R's husband, which is not satisfied. Hence, case-2 shows the final arrangement.

11. Questions

Final arrangement:

We have,

- The number of seats to the right of E is multiple of three.
- Only four seats are between E and F, who sit to the immediate right of B.
- D sits second to the right of B.

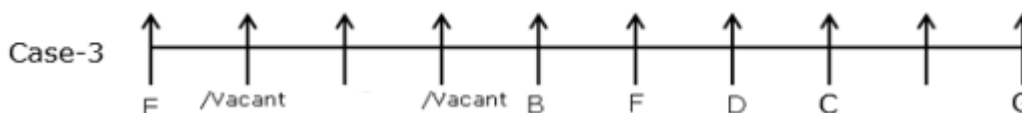

From the above conditions, there are three possibilities

Again we have,

- The number of persons sitting to the left of D is **two more than** the number of seats to the right of C.
- Only one seat is between C and G.

From the above conditions case-2 gets eliminated because The number of persons sitting to the left of D is **two more than** the number of seats to the right of C, which is not satisfied.

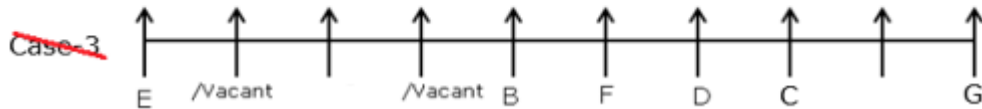

Again we have,

@QuizByMickey

- A sits to the immediate right of H.
- Neither H sits adjacent to D nor A sits adjacent to B.
- No vacant seat to the left of B.

From the above conditions case-3 gets eliminated because A sits to the immediate right of H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: C

12. Questions

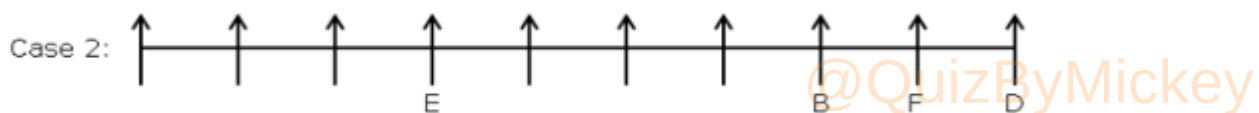

Final arrangement:

We have,

- The number of seats to the right of E is multiple of three.
- Only four seats are between E and F, who sit to the immediate right of B.
- D sits second to the right of B.

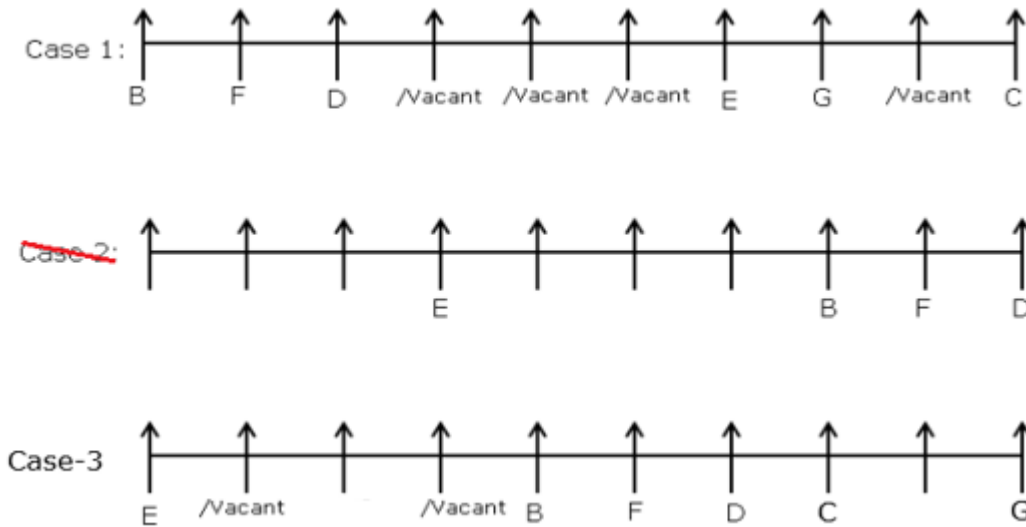

From the above conditions, there are three possibilities

Again we have,

- The number of persons sitting to the left of D is **two more than** the number of seats to the right of C.
- Only one seat is between C and G.

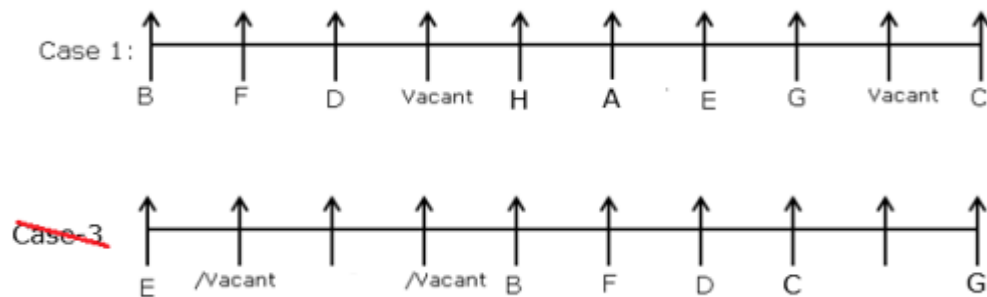

From the above conditions case-2 gets eliminated because The number of persons sitting to the left of D is **two more than** the number of seats to the right of C, which is not satisfied.

Again we have,

- A sits to the immediate right of H.
- Neither H sits adjacent to D nor A sits adjacent to B.
- No vacant seat to the left of B.

From the above conditions case-3 gets eliminated because A sits to the immediate right of H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: E

13. Questions

Final arrangement:

We have,

- The number of seats to the right of E is multiple of three.
- Only four seats are between E and F, who sit to the immediate right of B.
- D sits second to the right of B.

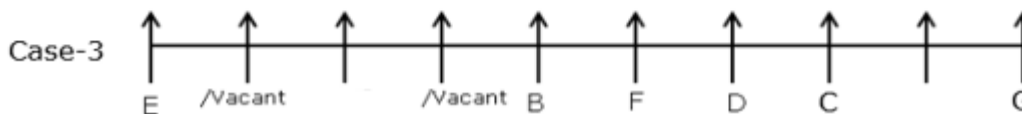

From the above conditions, there are three possibilities

Again we have,

- The number of persons sitting to the left of D is **two more than** the number of seats to the right of C.
- Only one seat is between C and G.

From the above conditions case-2 gets eliminated because The number of persons sitting to the left of D is **two more than** the number of seats to the right of C, which is not satisfied.

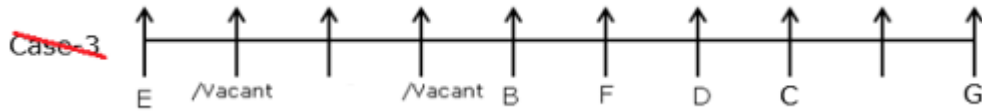

Again we have,

- A sits to the immediate right of H.
- Neither H sits adjacent to D nor A sits adjacent to B.
- No vacant seat to the left of B.

@QuizByMickey

From the above conditions case-3 gets eliminated because A sits to the immediate right of H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: A

14. Questions

Final arrangement:

We have,

- The number of seats to the right of E is multiple of three.
- Only four seats are between E and F, who sit to the immediate right of B.

From the above conditions, there are three possibilities

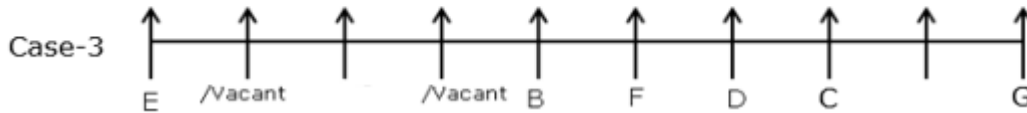

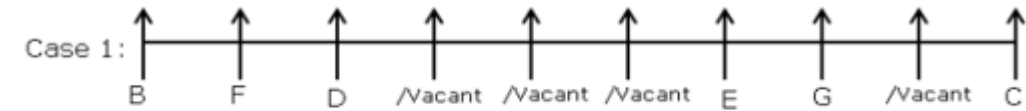

@QuizByMickey

Again we have,

- The number of persons sitting to the left of D is **two more than** the number of seats to the right of C.
- Only one seat is between C and G.

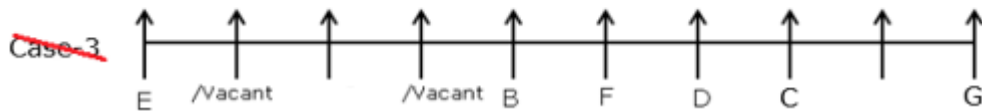

From the above conditions case-2 gets eliminated because The number of persons sitting to the left of D is **two more than** the number of seats to the right of C, which is not satisfied.

Again we have,

- A sits to the immediate right of H.
- Neither H sits adjacent to D nor A sits adjacent to B.
- No vacant seat to the left of B.

From the above conditions case-3 gets eliminated because A sits to the immediate right of H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: D

15. Questions

Final arrangement:

We have,

- The number of seats to the right of E is multiple of three.
- Only four seats are between E and F, who sit to the immediate right of B.
- D sits second to the right of B.

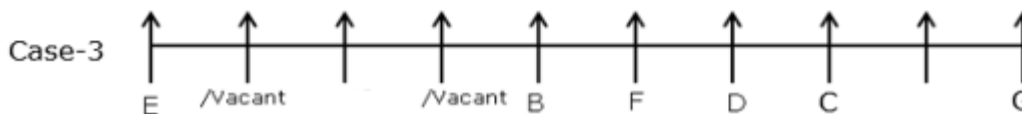

From the above conditions, there are three possibilities

Again we have,

- The number of persons sitting to the left of D is **two more than** the number of seats to the right of C.
- Only one seat is between C and G.

From the above conditions case-2 gets eliminated because The number of persons sitting to the left of D is **two more than** the number of seats to the right of C, which is not satisfied.

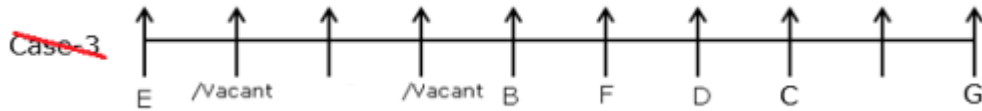

Again we have,

- A sits to the immediate right of H.
- Neither H sits adjacent to D nor A sits adjacent to B.
- No vacant seat to the left of B.

From the above conditions case-3 gets eliminated because A sits to the immediate right of H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: B

16. Questions

Answer: B

$G < T \leq F > N; I \leq O \geq P = F; W \geq E = D \geq O$

$E > N (E = D \geq O \geq P = F > N) \rightarrow \text{True}$

$G < D (G < T \leq F = P \leq O \leq D) \rightarrow \text{True}$

$T \leq W (T \leq F = P \leq O \leq D = E \leq W) \rightarrow \text{True}$

17. Questions

Answer: A

$Z < A \geq B > L; M = B > N \geq C; V < U = L \geq J$

$U < A (U = L < B \leq A) \rightarrow \text{True}$

$M > J (M = B > L \geq J) \rightarrow \text{True}$

$V < B (V < U = L < B) \rightarrow \text{True}$

18. Questions

Answer: C

$K < E \leq G \leq Z; P = J > Z; I \geq R > P$

$P > E (E \leq G \leq Z < J = P) \rightarrow \text{True}$

$K < R (K < E \leq G \leq Z < J = P < R) \rightarrow \text{True}$

$G < I (G \leq Z < J = P < R \leq I) \rightarrow \text{True}$

19. Questions

Answer: D

$H \leq M = Y \leq U; L > G \geq W = Q \geq Y; G < A \leq R < D$

$M < R (M = Y \leq Q = W \leq G < A \leq R) \rightarrow \text{True}$

$G \geq M (G \geq W = Q \geq Y = M) \rightarrow \text{True}$

$A > Y (A > G \geq W = Q \geq Y) \rightarrow \text{True}$

20. Questions

@QuizByMickey

Answer: E

$U > S = P \geq I = T; N < L = R \leq G < Q; Y \leq Q \leq I$

$S \geq Y$ ($S = P \geq I \geq Q \geq Y$) $\rightarrow$ True

$T > R$ ($R \leq G < Q \leq I = T$) $\rightarrow$ True

$N < I$ ($N < L = R \leq G < Q \leq I$) $\rightarrow$ True
