

1. Questions

Study the following information carefully and answer the below questions.

A family has seven members, viz., E, F, G, I, J, K, and L went to the movies on seven different days of the same week, starting from Tuesday to Monday. Only one person went to one movie on each day.

The one who is the son-in-law of F, went to the movie after Thursday. Three days gap between G's sister and the one who went immediately after F's son-in-law. As many persons went after G's sister as before J, who is only granddaughter of I. G, who is the maternal uncle of L, went either immediately before or immediately after J. G is not F's son-in-law. F's wife went three persons before L's maternal uncle. The number of persons going between F's wife and E's father is **two less than** the number of persons going after L. E is the mother of J, who is the sibling of L. K is the brother-in-law of G, who is the unmarried child of I. K didn't go to the movie before E's son.

Who among the following person went to the movie three days after the one who is the son of K?

- a. F
- b. The sibling of L
- c. I
- d. E
- e. The one who went on Monday

2. Questions

If all the persons went to the movie in reverse alphabetical order from Tuesday to Monday, then how many persons remained unchanged in their position?

- a. One
- b. No one
- c. Two
- d. Three
- e. More than three

3. Questions

@QuizByMickey

The one who is the brother-in-law of G went to the movie on which of the following days?

- a. Sunday
- b. Saturday
- c. Monday
- d. Friday
- e. Wednesday

4. Questions

How is L related to the one who went on Wednesday based on the final arrangement?

- a. Mother
- b. Son-in-law
- c. Daughter
- d. Son
- e. Granddaughter

5. Questions

Which of the following pairs of persons shows that the first person is the sibling of the second person?

I). FI

II). LJ

III). GE

- a. Only I
- b. Only II
- c. Only III
- d. Only I and III
- e. Only II and III

6. Questions

Study the following information carefully and answer the below questions.

8 4 9 1 5 2 3 6 4 1 7 8 2 9 5 6 3 7 1 4 6 3 8 5 2 9 7 4

Step 1: If numbers which are immediately preceded by an odd number and immediately followed by a prime number, then the numbers are arranged immediately after the last element of the given series in the same order.

Step 2: After completing Step 1, if all the even numbers, which are immediately preceded by an even number but not immediately followed by an even number, then all the even numbers are arranged immediately after the last element of the given series in the same order.

Step 3: After completing Step 2, the second half of the series are reversed.

Note: Step 3 is the final step and answer the following questions on the basis of the final step.

How many numbers are there in the given series, each of which is immediately followed by an even number and immediately preceded by a number which is less than or equal to 5?

- a. Six

- b. Four
- c. Two
- d. Three
- e. More than six

7. Questions

If all the numbers which are multiple of 3 dropped from the given series, then which of the following will be the thirteenth number from the right end?

- a. 5
- b. 7
- c. 1
- d. 4
- e. 8

8. Questions

What is the sum of the tenth odd number from the left end and the seventh number from the right end of the given series?

- a. 10
- b. 12
- c. 14
- d. 8
- e. 9

9. Questions

What is the difference between the twelfth number from the left end and the ninth number from the right end of the given series (Ignore negative value) ?

- a. 2
- b. 5
- c. 4
- d. 6
- e. 7

@QuizByMickey

10. Questions

What is the resultant if the sum of the last six elements from the right end is divided by the sixth element from the left end?

- a. 11
- b. 4
- c. 8
- d. 9
- e. 6

11. Questions

Study the following information carefully and answer the below questions.

An unknown number of persons were born in different months of two different years - 2016 and 2017.

Note: Not more than one person was born in the same month in both years.

S was born in the month having an even number of days but was not born before V. D was born five months after S. V was born three months before G but both of them were born in the month which has the same number of days. Both V and G weren't born in adjacent months of D but both of them were born in the same year as D was born. As many months were before S as after M. J was born four months before the one who was born immediately after M. Only one month was between B and J. R was born immediately before B. More than one month gap between R and M. Ten months gap between R and L. No one was born between F and N who doesn't born in the adjacent month of M. Two months gap between L and F. Both N and A weren't born in the prime numbered year.

Who among the following person was born three months before D?

- a. The one who was born in june
- b. D
- c. G
- d. L
- e. The one who was born immediately after A

12. Questions

Which of the following month did R was born?

- a. July
- b. January
- c. April
- d. May
- e. August

@QuizByMickey

13. Questions

Who among the following person was born three months after R?

- a. M
- b. A
- c. The one who was born immediately after V
- d. The one who was born in April
- e. S

14. Questions

How many known persons were born after L?

- a. One
- b. No one
- c. Four
- d. Three
- e. More than four

15. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which among the following does not belong to the group?

- a. F
- b. S
- c. The one who was born three persons after R
- d. B
- e. The one who was born immediately before F

16. Questions

Study the following information carefully and answer the below questions.

Fourteen persons are sitting in two parallel rows, each containing seven persons, all facing the north direction such that row1 is north of row2. The persons in row1 are sitting at a distance of consecutive multiple of 6m from the left end whereas the persons in row2 are sitting at a distance of consecutive multiple of 7m from the left end. The distance between two persons doesn't exceed more than 56m in both rows.

Note: If a person in row 1 sits in front of the persons in row2, then the number of persons sitting to the left of both rows is the same.

L sits 35m to the left of V. The one who sits in front of V sits third to the right of B, who sits at one of the extreme ends. The distance between B and Q is a square number, which is less than the square number of 9. S sits adjacent to B. As many persons sit between Q and F as between L and A. D sits third to the left of the one who sits to the immediate left of A. The distance between V and A is the multiple of 2. The

number of persons sitting between F and K is **three less than** the number of persons sitting to the right of C. The distance between K and W is 42m. The sum of the distance between the adjacent persons of X is the multiple of 11. G neither sits in front of X nor at the extreme ends. O is one of the persons sitting in the row.

What is the distance between A and O in the final arrangement?

- a. 54m
- b. 77m
- c. 84m
- d. 80m
- e. 90m

17. Questions

What is the position of C with respect to G based on the final arrangement?

- a. Second to the right
- b. Immediate left
- c. Third to the left
- d. Fourth to the right
- e. Fifth to the left

18. Questions

If all the persons are made to sit in the alphabetical order from left to right in Row-1, then how many persons remain unchanged in their position?

- a. None
- b. Three
- c. One
- d. More than three
- e. Two

@QuizByMickey

19. Questions

If B is related to D and X is related to G, in a certain way, then who among the following person is related to F?

- a. The one who sits immediate right of G
- b. V
- c. Q

- d. W
- e. The one who sits second to the left of K

20. Questions

In which of the following statement(s) is/are the first person sits exactly between the third person and the second person in the following arrangement?

I). WQV

II). VDO

III). XKF

- a. Only I
- b. Only I and II
- c. Only III
- d. Only II and III
- e. All I, II, and III

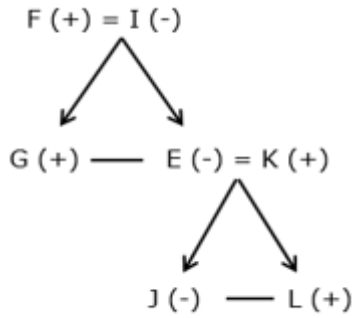

Explanations:

1. Questions

Final arrangement:

Days	Persons
Tuesday	F
Wednesday	E
Thursday	L
Friday	I
Saturday	K
Sunday	J
Monday	G

@QuizByMickey

We have,

- The one who is the son-in-law of F, went to the movie after Thursday.
- Three days gap between G's sister and the one who went immediately after F's son-in-law.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		
Saturday		F's son-in-law	
Sunday			F's son-in-law
Monday			

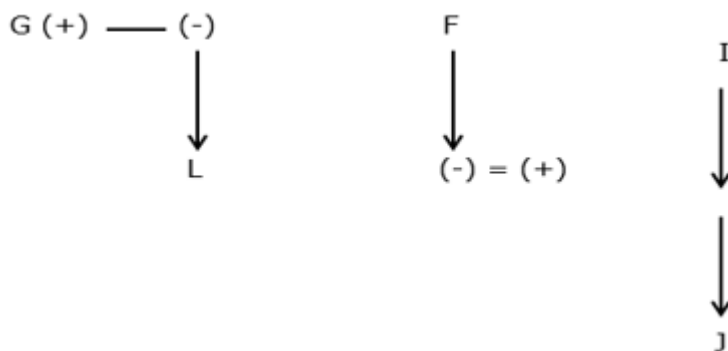

@QuizByMickey

Again, we have,

- As many persons went after G's sister as before J, who is the only granddaughter of I.
- G, who is the maternal uncle of L, went either immediately before or immediately after J.
- G is not F's son-in-law.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		G
Saturday		F's son-in-law	J
Sunday	G	J	F's son-in-law
Monday	J	G	

Again, We have,

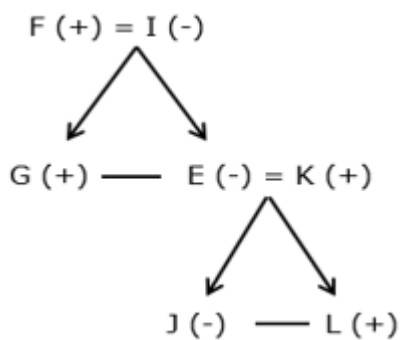

- F's wife went three persons before L's maternal uncle.
- The number of persons going between F's wife and E's father is **two less than** the number of persons going after L.
- E is the mother of J, who is the sibling of L.
- K is the brother-in-law of G, who is the unmarried child of I.
- K didn't go to the movie before E's son.

@QuizByMickey

From the above conditions, case-3 gets eliminated because the number of persons going between F's wife and E's father is **two less than** the number of persons going after L, which is not satisfied and case-1 gets eliminated because K doesn't went movie before E's son, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	E	F	I
Wednesday	F	E	
Thursday	I	L	E
Friday	K	I	G
Saturday	L	K	J
Sunday	G	J	K
Monday	J	G	

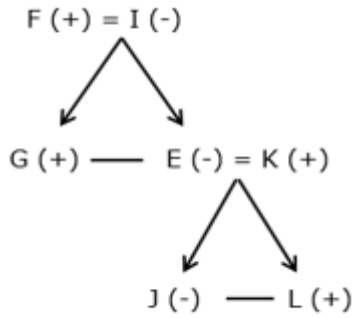

Answer: B

2. Questions

Final arrangement:

Days	Persons
Tuesday	F
Wednesday	E
Thursday	L
Friday	I
Saturday	K
Sunday	J
Monday	G

@QuizByMickey

We have,

- The one who is the son-in-law of F, went to the movie after Thursday.
- Three days gap between G's sister and the one who went immediately after F's son-in-law.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		
Saturday		F's son-in-law	
Sunday			F's son-in-law
Monday			

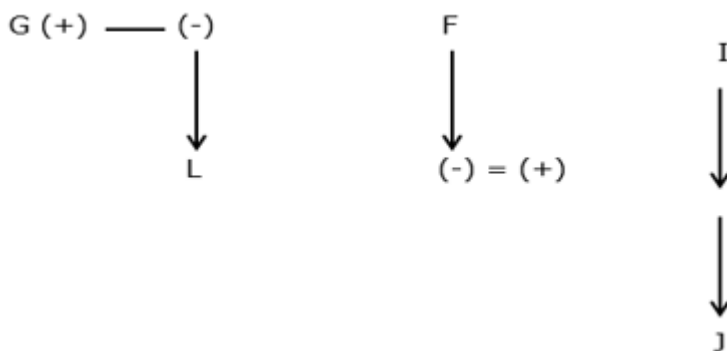

@QuizByMickey

Again, we have,

- As many persons went after G's sister as before J, who is the only granddaughter of I.
- G, who is the maternal uncle of L, went either immediately before or immediately after J.
- G is not F's son-in-law.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		G
Saturday		F's son-in-law	J
Sunday	G	J	F's son-in-law
Monday	J	G	

Again, We have,

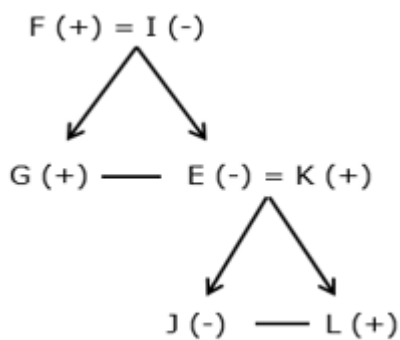

- F's wife went three persons before L's maternal uncle.
- The number of persons going between F's wife and E's father is **two less than** the number of persons going after L.
- E is the mother of J, who is the sibling of L.
- K is the brother-in-law of G, who is the unmarried child of I.
- K didn't go to the movie before E's son.

@QuizByMickey

From the above conditions, case-3 gets eliminated because the number of persons going between F's wife and E's father is **two less than** the number of persons going after L, which is not satisfied and case-1 gets eliminated because K doesn't went movie before E's son, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	E	F	I
Wednesday	F	E	
Thursday	I	L	E
Friday	K	I	G
Saturday	L	K	J
Sunday	G	J	K
Monday	J	G	

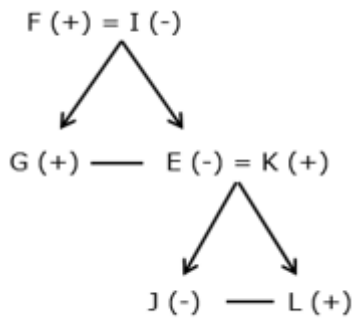

Answer: A

3. Questions

Final arrangement:

Days	Persons
Tuesday	F
Wednesday	E
Thursday	L
Friday	I
Saturday	K
Sunday	J
Monday	G

@QuizByMickey

We have,

- The one who is the son-in-law of F, went to the movie after Thursday.
- Three days gap between G's sister and the one who went immediately after F's son-in-law.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		
Saturday		F's son-in-law	
Sunday			F's son-in-law
Monday			

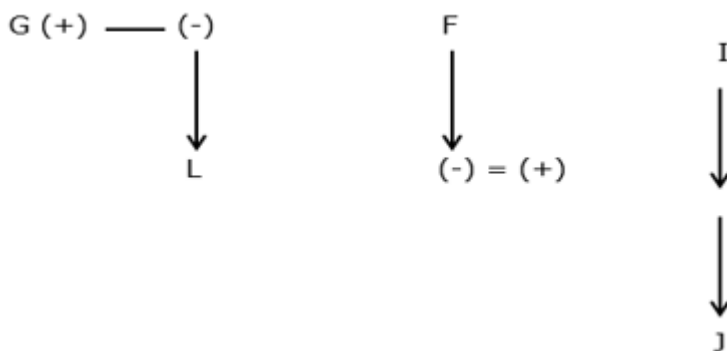

@QuizByMickey

Again, we have,

- As many persons went after G's sister as before J, who is the only granddaughter of I.
- G, who is the maternal uncle of L, went either immediately before or immediately after J.
- G is not F's son-in-law.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		G
Saturday		F's son-in-law	J
Sunday	G	J	F's son-in-law
Monday	J	G	

Again, We have,

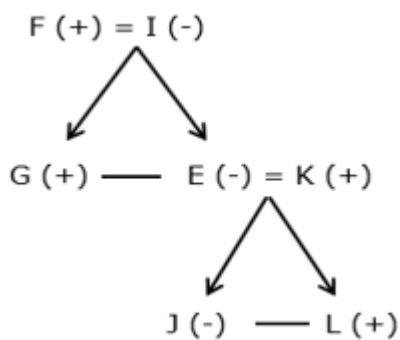

- F's wife went three persons before L's maternal uncle.
- The number of persons going between F's wife and E's father is **two less than** the number of persons going after L.
- E is the mother of J, who is the sibling of L.
- K is the brother-in-law of G, who is the unmarried child of I.
- K didn't go to the movie before E's son.

@QuizByMickey

From the above conditions, case-3 gets eliminated because the number of persons going between F's wife and E's father is **two less than** the number of persons going after L, which is not satisfied and case-1 gets eliminated because K doesn't went movie before E's son, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	E	F	I
Wednesday	F	E	
Thursday	I	L	E
Friday	K	I	G
Saturday	L	K	J
Sunday	G	J	K
Monday	J	G	

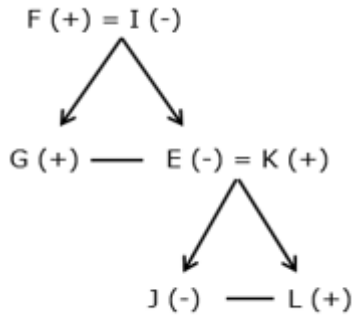

Answer: B

4. Questions

Final arrangement:

Days	Persons
Tuesday	F
Wednesday	E
Thursday	L
Friday	I
Saturday	K
Sunday	J
Monday	G

@QuizByMickey

We have,

- The one who is the son-in-law of F, went to the movie after Thursday.
- Three days gap between G's sister and the one who went immediately after F's son-in-law.

From the above conditions, there are three possibilities.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		
Saturday		F's son-in-law	
Sunday			F's son-in-law
Monday			

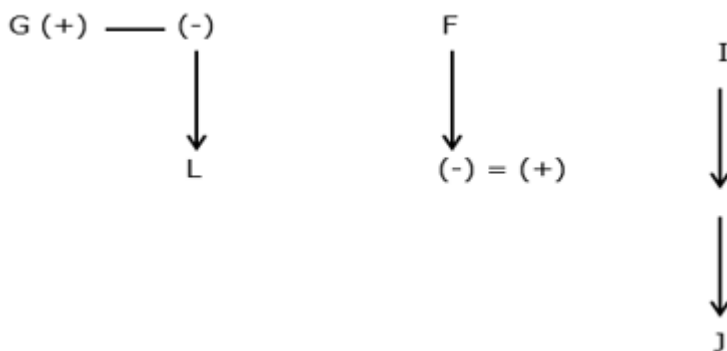

@QuizByMickey

Again, we have,

- As many persons went after G's sister as before J, who is the only granddaughter of I.
- G, who is the maternal uncle of L, went either immediately before or immediately after J.
- G is not F's son-in-law.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	G's sister		
Wednesday		G's sister	
Thursday			G's sister
Friday	F's son-in-law		G
Saturday		F's son-in-law	J
Sunday	G	J	F's son-in-law
Monday	J	G	

Again, We have,

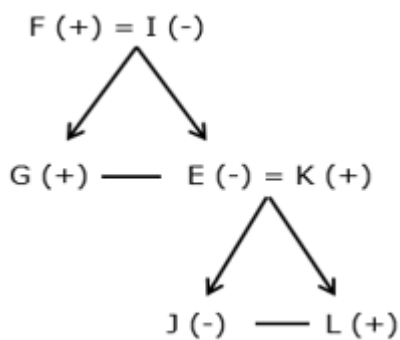

- F's wife went three persons before L's maternal uncle.
- The number of persons going between F's wife and E's father is **two less than** the number of persons going after L.
- E is the mother of J, who is the sibling of L.
- K is the brother-in-law of G, who is the unmarried child of I.
- K didn't go to the movie before E's son.

@QuizByMickey

From the above conditions, case-3 gets eliminated because the number of persons going between F's wife and E's father is **two less than** the number of persons going after L, which is not satisfied and case-1 gets eliminated because K doesn't went movie before E's son, which is not satisfied

Hence, case-2 shows the final arrangement.

	Case-1	Case-2	Case-3
Days	Persons	Persons	Persons
Tuesday	E	F	I
Wednesday	F	E	
Thursday	I	L	E

November	D
December	-

We have,

- S was born in the month having an even number of days but was not born before V.
- D was born five months after S.
- V was born three months before G but both of them were born in the month which has the same number of days.
- Both V and G weren't born in adjacent months of D but both of them were born in the same year as D was born.

From the above conditions, there are two possibilities.

Again, We have,

- Ten months gap between R and L.
- No one was born between F and N who doesn't born in the adjacent month of M.
- Two months gap between L and F.
- Both N and A weren't born in the prime numbered year.
- A was born in March.

From the above conditions, case-1 gets eliminated because N and A weren't born in the prime numbered year, which is not satisfied.

Hence, case-2 shows the final arrangement.

Answer: E (All other persons are born in the month having less than 31 days except option E)

16. Questions

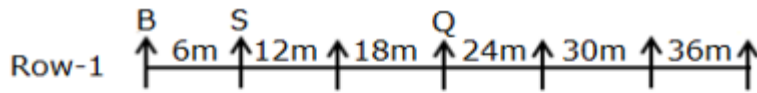

Final arrangement:

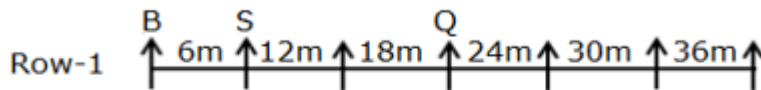

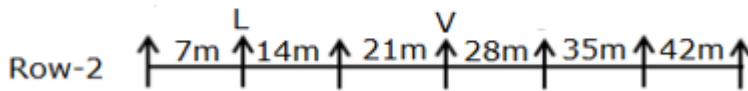

We have,

- L sits 35m to the left of V.
- The one who sits in front of V sits third to the right of B, who sits at one of the extreme ends.
- The distance between B and Q is a square number, which is less than the square number of 9.
- S sits adjacent to B.

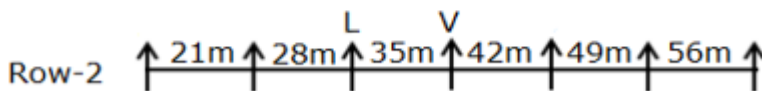

From the above conditions, there are two possibilities.

Case-1

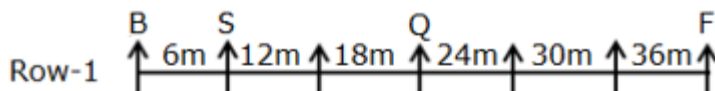

Case-2

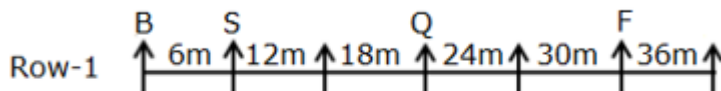

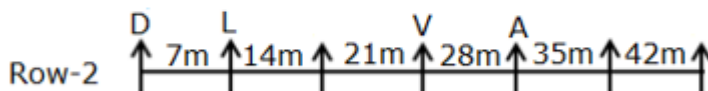

Again, we have,

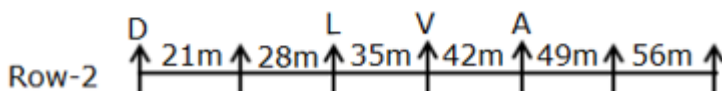

- As many persons sit between Q and F as between L and A.
- D sits third to the left of the one who sits to the immediate left of A.
- The distance between V and A is the multiple of 2.

Case-1

Case-2

Again, We have,

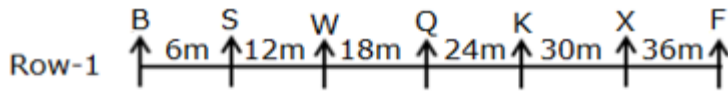

- The number of persons sitting between F and K is **three less than** the number of persons sitting to the right of C.
- The distance between K and W is 42m.
- The sum of the distance between the adjacent persons of X is the multiple of 11.
- G neither sits in front of X nor at the extreme ends.

@QuizByMickey

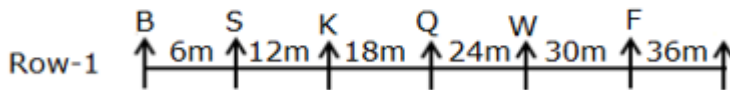

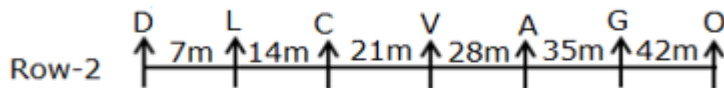

- O is one of the persons sitting in the row.

From the above conditions, case-2 gets eliminated because the sum of the distance between the adjacent persons of X is the multiple of 11, which is not satisfied.

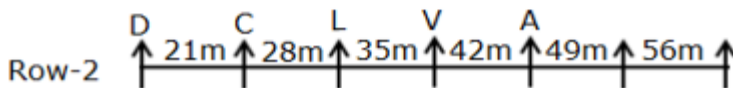

Hence, case-1 shows the final arrangement.

Case-1

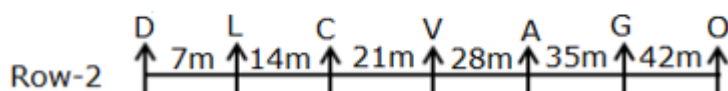

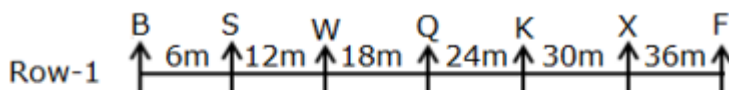

~~Case-2~~

Answer: B

17. Questions

Final arrangement:

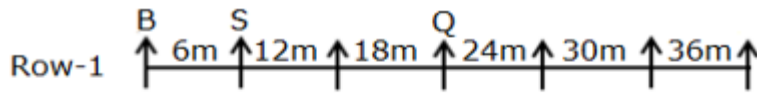

We have,

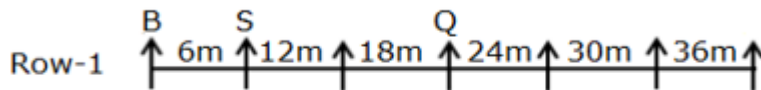

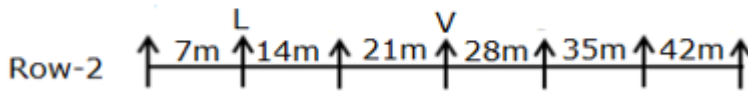

- L sits 35m to the left of V.
- The one who sits in front of V sits third to the right of B, who sits at one of the extreme ends.
- The distance between B and Q is a square number, which is less than the square number of 9.
- S sits adjacent to B.

From the above conditions, there are two possibilities.

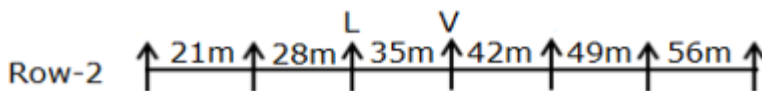

@QuizByMickey

Case-1

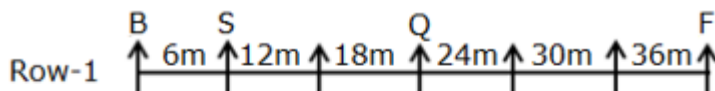

Case-2

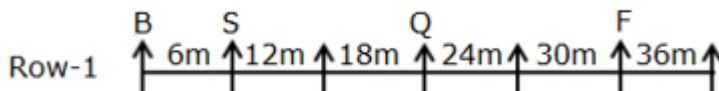

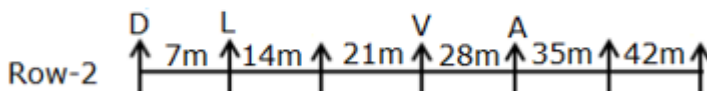

Again, we have,

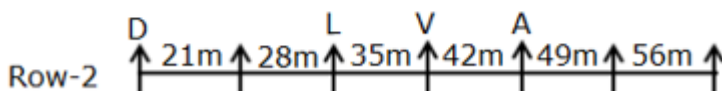

- As many persons sit between Q and F as between L and A.
- D sits third to the left of the one who sits to the immediate left of A.
- The distance between V and A is the multiple of 2.

Case-1

Case-2

Again, We have,

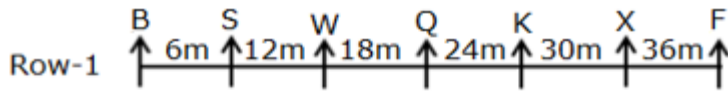

- The number of persons sitting between F and K is **three less than** the number of persons sitting to the right of C.
- The distance between K and W is 42m.
- The sum of the distance between the adjacent persons of X is the multiple of 11.
- G neither sits in front of X nor at the extreme ends.

@QuizByMickey

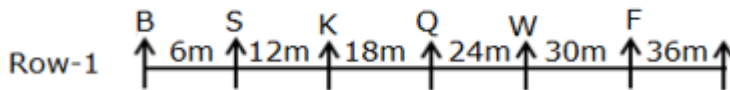

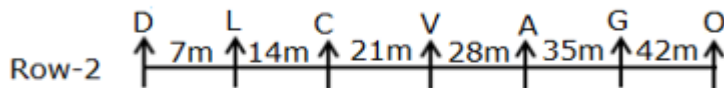

- O is one of the persons sitting in the row.

From the above conditions, case-2 gets eliminated because the sum of the distance between the adjacent persons of X is the multiple of 11, which is not satisfied.

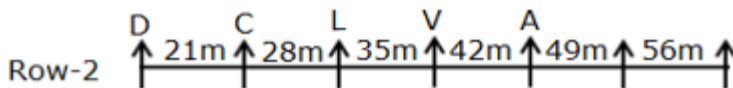

Hence, case-1 shows the final arrangement.

Case-1

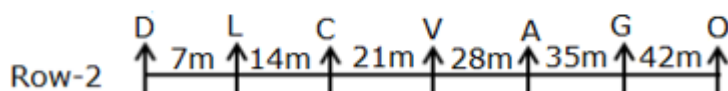

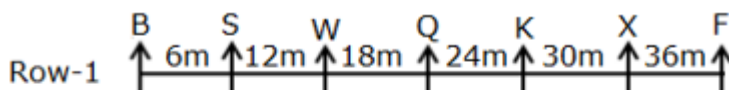

~~Case-2~~

Answer: C

18. Questions

Final arrangement:

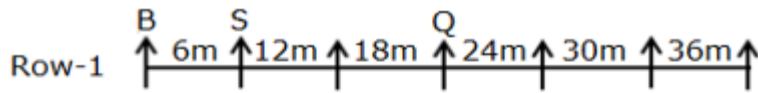

We have,

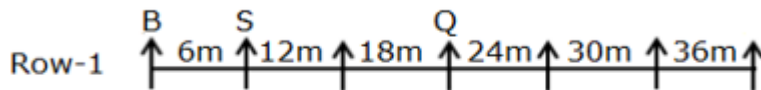

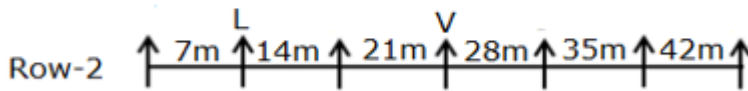

- L sits 35m to the left of V.
- The one who sits in front of V sits third to the right of B, who sits at one of the extreme ends.
- The distance between B and Q is a square number, which is less than the square number of 9.
- S sits adjacent to B.

From the above conditions, there are two possibilities.

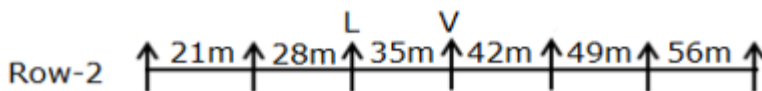

@QuizByMickey

Case-1

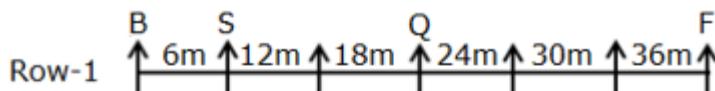

Case-2

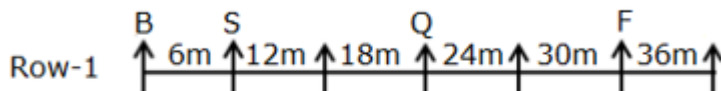

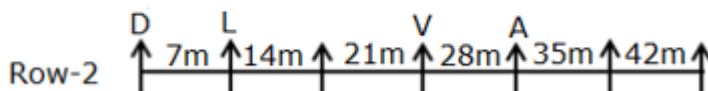

Again, we have,

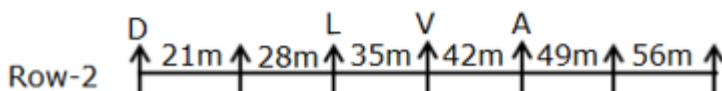

- As many persons sit between Q and F as between L and A.
- D sits third to the left of the one who sits to the immediate left of A.
- The distance between V and A is the multiple of 2.

Case-1

Case-2

Again, We have,

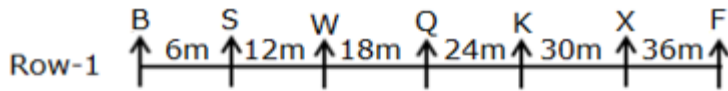

- The number of persons sitting between F and K is **three less than** the number of persons sitting to the right of C.
- The distance between K and W is 42m.
- The sum of the distance between the adjacent persons of X is the multiple of 11.
- G neither sits in front of X nor at the extreme ends.

@QuizByMickey

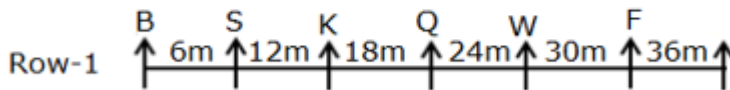

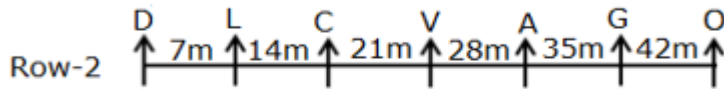

- O is one of the persons sitting in the row.

From the above conditions, case-2 gets eliminated because the sum of the distance between the adjacent persons of X is the multiple of 11, which is not satisfied.

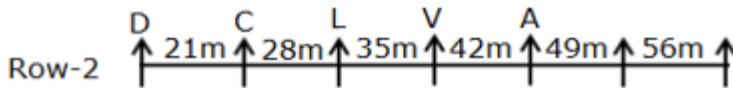

Hence, case-1 shows the final arrangement.

Case-1

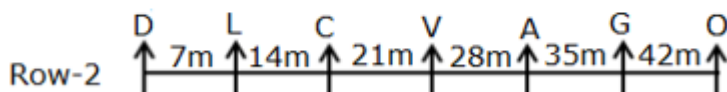

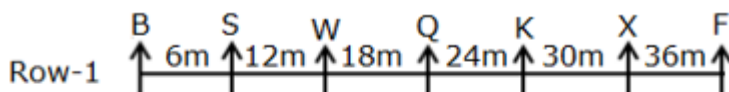

~~Case-2~~

Answer: E

19. Questions

Final arrangement:

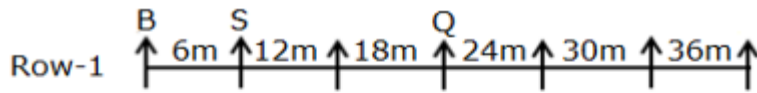

We have,

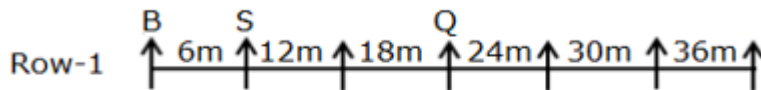

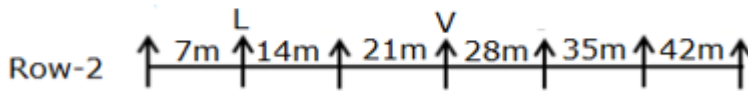

- L sits 35m to the left of V.
- The one who sits in front of V sits third to the right of B, who sits at one of the extreme ends.
- The distance between B and Q is a square number, which is less than the square number of 9.
- S sits adjacent to B.

From the above conditions, there are two possibilities.

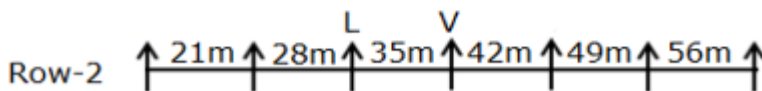

@QuizByMickey

Case-1

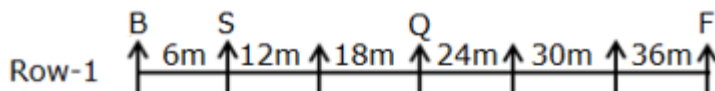

Case-2

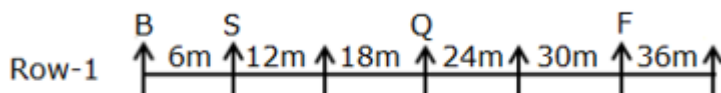

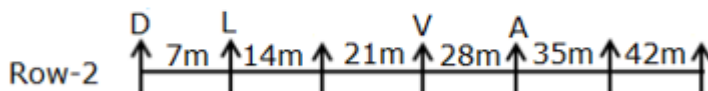

Again, we have,

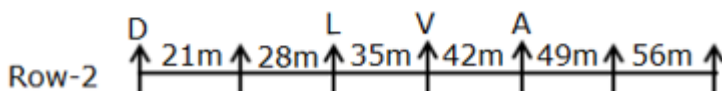

- As many persons sit between Q and F as between L and A.
- D sits third to the left of the one who sits to the immediate left of A.
- The distance between V and A is the multiple of 2.

Case-1

Case-2

Again, We have,

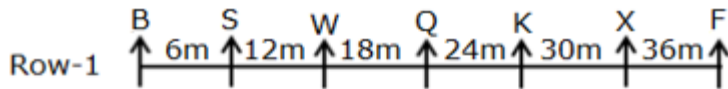

- The number of persons sitting between F and K is **three less than** the number of persons sitting to the right of C.
- The distance between K and W is 42m.
- The sum of the distance between the adjacent persons of X is the multiple of 11.
- G neither sits in front of X nor at the extreme ends.

@QuizByMickey

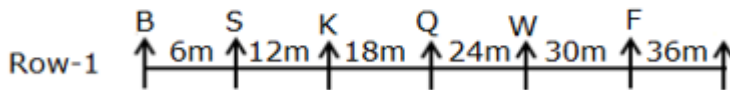

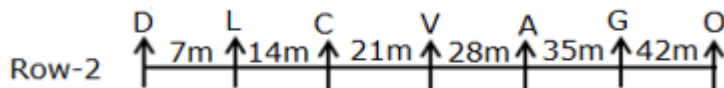

- O is one of the persons sitting in the row.

From the above conditions, case-2 gets eliminated because the sum of the distance between the adjacent persons of X is the multiple of 11, which is not satisfied.

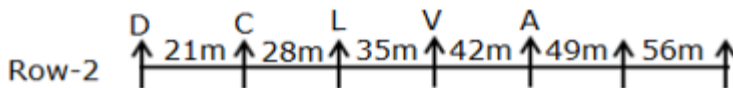

Hence, case-1 shows the final arrangement.

Case-1

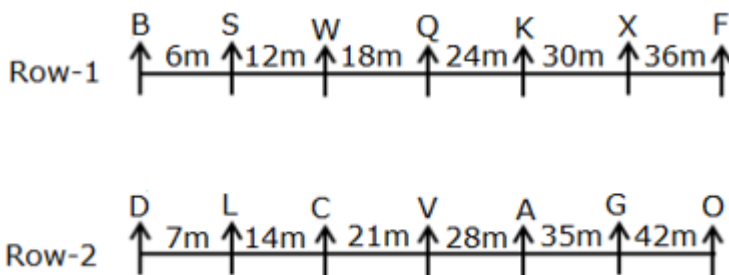

~~Case-2~~

Answer: A

20. Questions

Final arrangement:

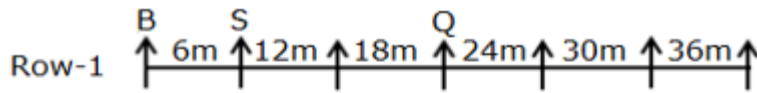

We have,

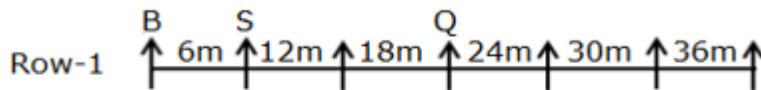

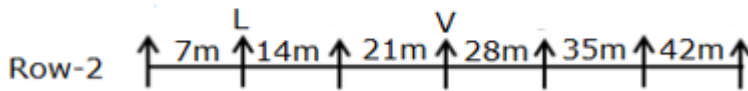

- L sits 35m to the left of V.
- The one who sits in front of V sits third to the right of B, who sits at one of the extreme ends.
- The distance between B and Q is a square number, which is less than the square number of 9.
- S sits adjacent to B.

From the above conditions, there are two possibilities.

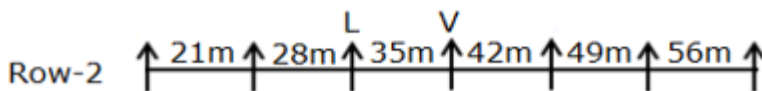

@QuizByMickey

Case-1

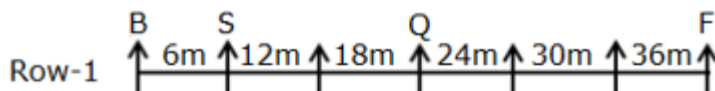

Case-2

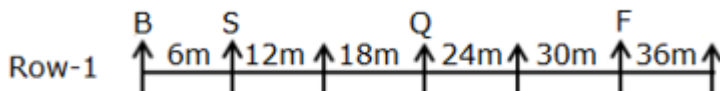

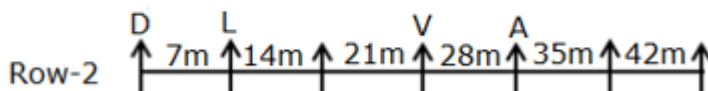

Again, we have,

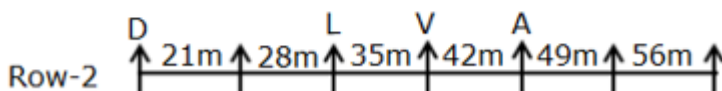

- As many persons sit between Q and F as between L and A.
- D sits third to the left of the one who sits to the immediate left of A.
- The distance between V and A is the multiple of 2.

Case-1

Case-2

Again, We have,

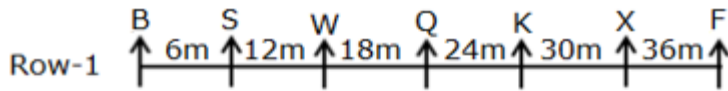

- The number of persons sitting between F and K is **three less than** the number of persons sitting to the right of C.
- The distance between K and W is 42m.
- The sum of the distance between the adjacent persons of X is the multiple of 11.
- G neither sits in front of X nor at the extreme ends.

@QuizByMickey

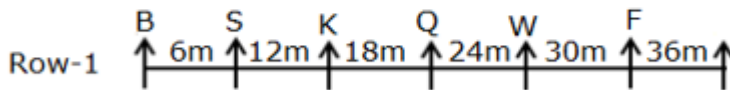

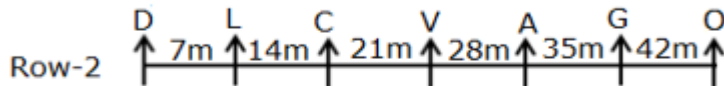

- O is one of the persons sitting in the row.

From the above conditions, case-2 gets eliminated because the sum of the distance between the adjacent persons of X is the multiple of 11, which is not satisfied.

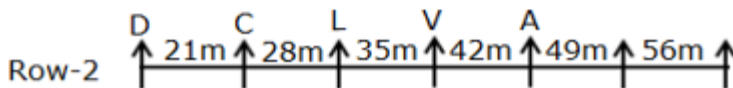

Hence, case-1 shows the final arrangement.

Case-1

~~Case-2~~

Answer: D

@QuizByMickey
