

1. Questions

Study the following information carefully and answer the given questions.

Eight persons-P, Q, R, S, T, U, V and W are sitting around a rectangular table in such a way that four of them are sitting at the corners and facing the centre while four of them are sitting in the middle of the sides and facing outside(opposite to the centre). Each person likes different languages viz, Spanish, Bengali, Urdu, Marati, Hindi, Gujarati, Punjabi and French.

Two persons sit between R and the one who likes French. The person who sits immediate left of the one who likes French sits second to the left of the one who likes Punjabi. Four persons sit between the one who likes Punjabi and the one who likes Gujarati. Three persons sit between U and the one who likes Gujarati. The number of persons sitting between the one who likes Spanish and U is **two less than** the number of persons sitting between the one who likes Hindi and Q, when counted from the right of both U and Q. U doesn't like Hindi. Neither Q likes Punjabi nor sits to the immediate neighbour of the one who likes French. The one who likes Spanish sits third to the right of V. More than two persons sit between R and the one who likes Spanish, when counted from the right of R. T sits immediate left of W, who sits opposite to the one who likes Bengali. The one who likes Urdu sits as an immediate neighbour of P. The immediate neighbors of the one who likes Marati doesn't face outside. The one who likes Marati doesn't sit opposite to the one who sits second to the left of R.

Who among the following person sits second to the right of the one who likes Marati?

- a. Q
- b. The one who likes Spanish
- c. V
- d. The one who likes Bengali
- e. R

2. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

I). W likes Gujarati

II). P and the one who likes Urdu are immediate neighbours

III). R sits third to the left of the one who likes Hindi

@QuizByMickey

- a. Only I and III
- b. Only III
- c. Only I and II
- d. Only II
- e. Only II and III

3. Questions

How many persons sit between the one who likes French and the one who likes Punjabi?

- a. One
- b. Four
- c. Two
- d. Either a or b
- e. Either b or c

4. Questions

If T is related to Q, V is related to R in a certain way based on the given arrangement, then who among the following person is related to S?

- a. The one who sits opposite to W
- b. T
- c. R
- d. The one who likes Urdu
- e. The one who sits immediate right of P

5. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to that group?

- a. The one who likes Gujarati
- b. The one who sits immediate left of P
- c. U
- d. The one who sits second to the right of S
- e. The one who likes French

6. Questions

Study the following information carefully and answer the given questions.

A%B means A is south of B

A?B means A is east of B

A\$B means A is north of B

A*B means A is west of B

& means either 4 km or 8 km

@ means either 9 km or 12 km

A#BC means A is the middle of points B and C

i.e., A\$?B means A is northeast of B

A*@B A is west of B, either 9 km or 12km

The distance between H and M is the same as the distance between T and E but less than the distance between B and R.

The distance between M and Q is less than the distance between R and T.

Statement:

T?@E; M\$&Q; B*@R; B%&H; H*@M; T%&R

What is the direction of B with respect to T?

- a. Southeast
- b. West
- c. Northwest
- d. South
- e. Northeast

7. Questions

If Q\$@P the distance between Q and P is the same as between B and R then, what is the shortest distance between B and P?

- a. $\sqrt{145}$ km
- b. 12 km
- c. $\sqrt{154}$ km
- d. $\sqrt{144}$ km
- e. 10 km

8. Questions

Which of the following statement is true with respect to the final arrangement?

- a. B is southeast of Q
- b. Q is northwest of E
- c. The shortest distance between E and M is 175 km
- d. The shortest distance between R and H is either $\sqrt{208}$ km or $\sqrt{160}$ km
- e. E is 12 km west of M

9. Questions

If H\$W*Q then, what is the direction of E with respect to W?

- a. West
- b. Northwest
- c. South
- d. East
- e. Southeast

10. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to that group?

- a. QM
- b. BQ
- c. RB
- d. TR
- e. ET

11. Questions

Study the following information carefully and answer the given question.

Eight persons - A, B, C, D, E, F, G and H are sitting around the circular table where ten chairs are there and all are facing towards the center. Two chairs are vacant and none of the adjacent chairs are vacant.

Two persons sit between D and I. F sits fourth to the right of I, who does not sit adjacent to G. Three persons sit between F and G. The number of persons sitting between G and D is **one less than** the number of persons sitting between H and C, when counted from the right of both D and H. Both H and C don't sit adjacent to I or D. Two vacant seats are between J and E when counted from the left of E. E sits neither adjacent to H nor to the immediate right of D.

As many persons sit between E and F as between ____

- a. G and I
- b. C and F
- c. E and J
- d. D and E
- e. G and C

@QuizByMickey

12. Questions

If C is related to F, then G is related to D in a certain way based on the final arrangement, then who among the following person is related to J?

- a. Vacant
- b. D
- c. I
- d. H
- e. C

13. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to that group?

- a. GD
- b. HF
- c. EC
- d. DE
- e. IJ

14. Questions

How many persons sit between F and J?

- a. Either e or c
- b. Two
- c. Four
- d. Either c or b
- e. One

15. Questions

Who among the following person sits fifth to the left of C?

- a. The one who sits immediate left of J
- b. The one who sits second to the left of E
- c. D
- d. E
- e. The one who sits immediate right of J

@QuizByMickey

16. Questions

Tourism is a major source of income for many countries, contributing to economic growth and job creation. However, excessive tourism can lead to environmental degradation, overcrowding, and cultural

disruptions. Some governments have introduced sustainable tourism initiatives to balance economic benefits with environmental protection. Experts believe that responsible tourism practices can help preserve natural and cultural heritage for future generations.

Which of the following may be a probable assumption of the above statement?

- a. Tourism can have both positive and negative impacts
- b. Tourism always harms the environment
- c. Economic growth is not influenced by tourism
- d. Governments are not concerned about sustainable tourism
- e. None of the above

17. Questions

Effect:

Reports indicate that power outages have increased in many regions. Many areas experience frequent electricity failures, disrupting daily life. Rising demand for electricity is straining the power grid. Some regions face infrastructure issues leading to unreliable power supply. Officials are working on solutions to improve energy distribution.

Probable Cause:

- A). Increased use of electrical appliances, causing higher demand.
- B). Improved energy storage systems stabilizing the power grid.
- C). More investment in renewable energy sources.
- D). Power plants operating at full capacity without issues.
- E). Reduction in electricity consumption due to conservation efforts.

- a. A
- b. B
- c. C
- d. D
- e. E

18. Questions

@QuizByMickey

Statement:

Countries that have successfully implemented high-speed rail first established a strong foundation of efficient railway operations. India, with its vast railway network, still struggles with frequent derailments, unclean stations, and poor track maintenance. Prioritizing high-speed rail without addressing these issues could result in a system that is neither cost-effective nor widely used. A well-planned, phased approach to railway modernization is essential before investing in high-speed projects.

Which of the following can be inferred from the given information?

- a. Successful high-speed rail systems require a strong and efficient conventional railway network

- b. High-speed rail investments will be ineffective unless the existing railway infrastructure is upgraded
- c. A hasty introduction of bullet trains may lead to an expensive but underutilized transport system
- d. India needs a long-term strategy to improve both conventional and high-speed railway operations
- e. Learning from global best practices is crucial before investing in high-speed rail projects

19. Questions

Statement:

Cybersecurity threats, including data breaches and hacking, are increasing globally. While companies invest in security measures, cybercriminals continue to exploit vulnerabilities. Governments have proposed stricter cybersecurity laws, but enforcement varies by country. Some experts believe international cooperation is necessary, while others think individual organizations should handle security themselves.

Which of the following would be the best course of action to address the issue?

- a. Eliminating all digital systems will completely remove cybersecurity threats
- b. Companies should be solely responsible for their cybersecurity measures without government interference
- c. Governments should implement strict cybersecurity laws and enforce international cooperation
- d. Relying on ethical hackers alone is the best way to prevent cybercrime
- e. None of the above

20. Questions

Effect:

Cases of mobile phone addiction among teenagers have increased. Excessive screen time leads to poor concentration and sleep disorders. Parents struggle to limit their children's device usage. Schools report declining academic performance due to distractions. Psychologists warn of long-term behavioral issues.

Probable Cause:

- A). Parents successfully limiting device usage at home.
- B). Stricter rules on phone usage reducing screen time.
- C). More teenagers engaging in outdoor activities.
- D). Schools banning mobile phones to improve focus.
- E). Increased smartphone usage and social media addiction.

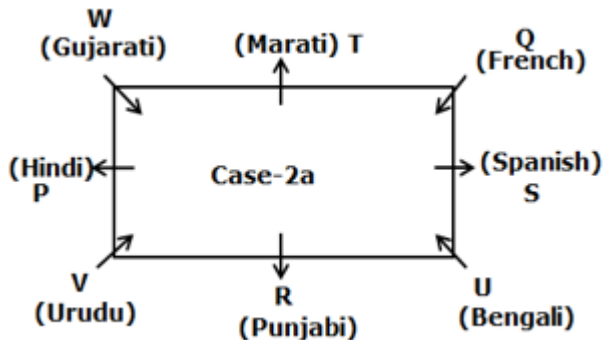

- a. A
- b. B
- c. C
- d. D
- e. E

@QuizByMickey

Explanations:

1. Questions

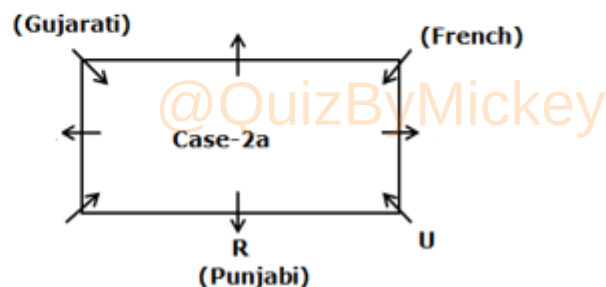

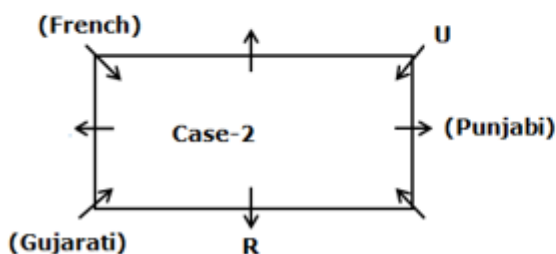

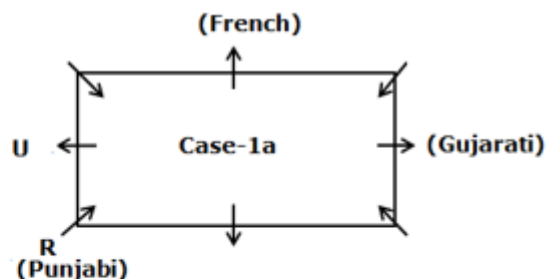

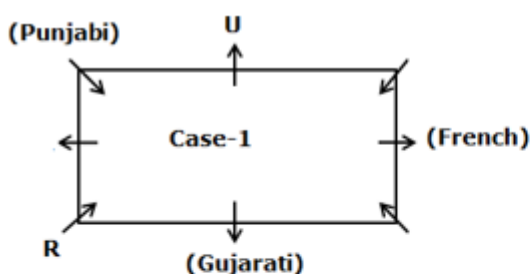

Final arrangement:

We have,

From the above conditions there are four possibilities

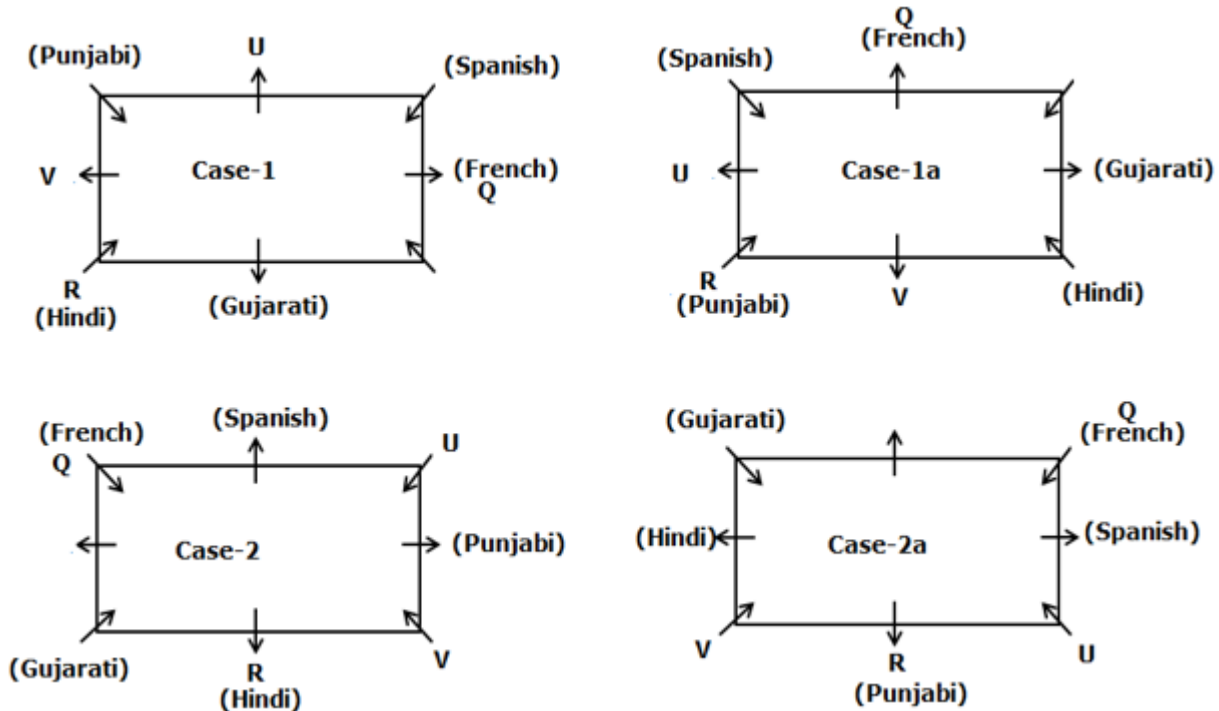

- Two persons sit between R and the one who likes French.
- The person who sits to the immediate left of the one who likes French, sits second to the left of the one who likes Punjabi.
- Four persons sit between the one who likes Punjabi and the one who likes Gujarati.
- Three persons sit between U and the one who likes Gujarat.

Again we have,

- The number of persons sitting between the one who likes Spanish and U is **two less than** the number of persons sitting between the one who likes Hindi and Q, when counted from both the right of U and Q.
- U doesn't like Hindi.

- Neither Q likes Punjabi nor sits to the immediate neighbour of the one who likes French.
- The one who likes Spanish sits third to the right of V.
- More than two persons sit between R and the one who likes Spanish when counted from the right of R.

Again we have,

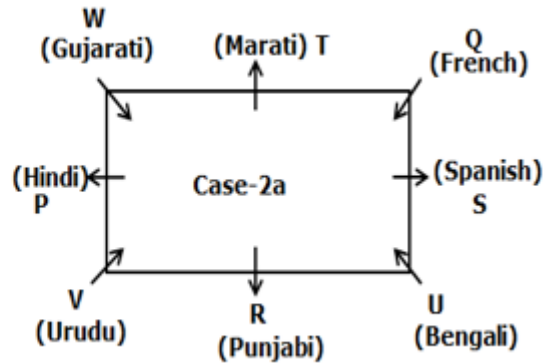

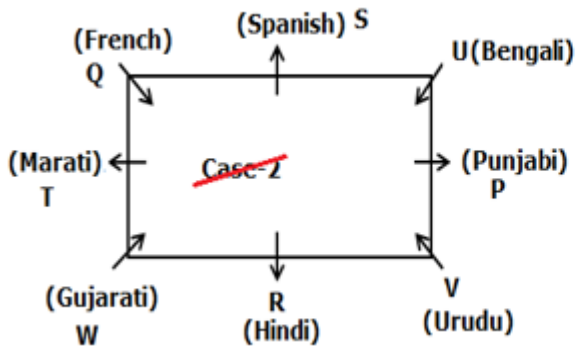

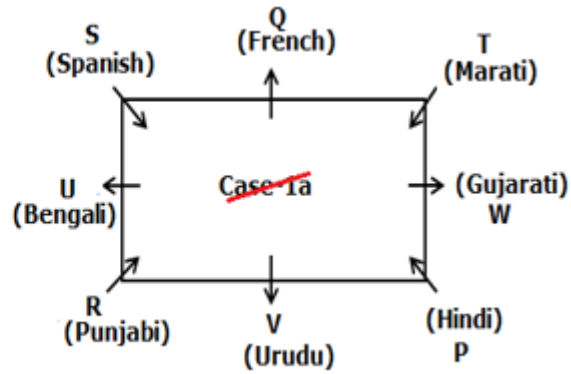

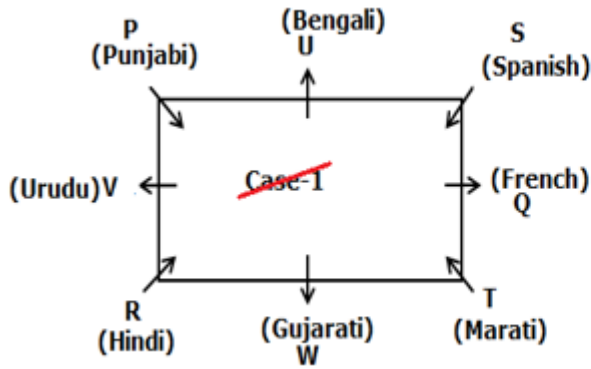

- T sits immediate left of W, who sits opposite to the one who likes Bengali.
- The one who likes Urdu sits as an immediate neighbour of P.
- The immediate neighbors of the one who likes Marathi doesn't face outside.
- The one who likes Marathi doesn't sit opposite to the one who sits second to the left of R.

From the above conditions, case-1, and case-1a get eliminated because the immediate neighbors of the one who likes Marathi doesn't face outside, which is not satisfied.

From the above conditions, case-2 also gets eliminated because the one who likes Marathi doesn't sit opposite to the one who sits second to the left of R, which is also not satisfied.

Hence case-2a shows the final arrangement.

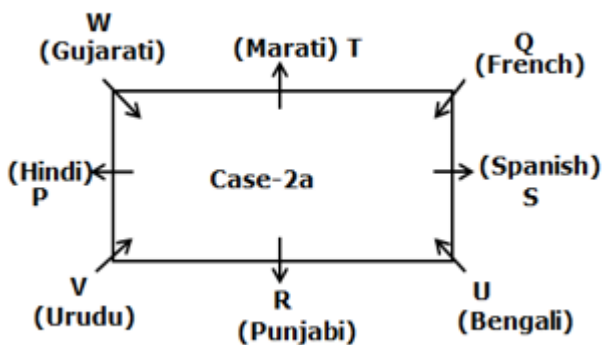

@QuizByMickey

Answer: B

2. Questions

Final arrangement:

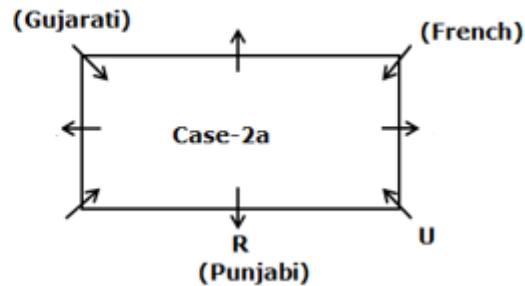

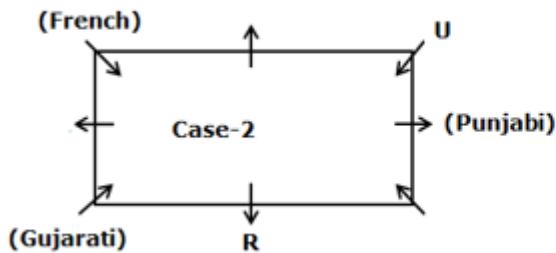

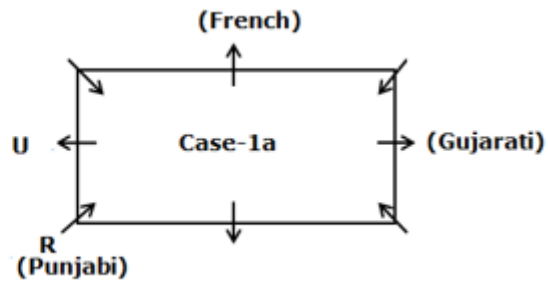

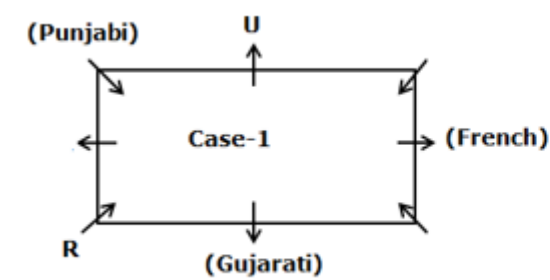

We have,

From the above conditions there are four possibilities

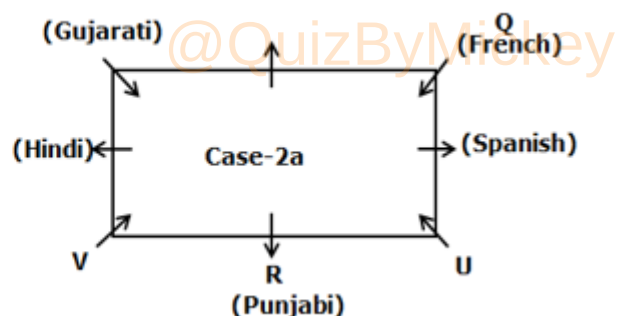

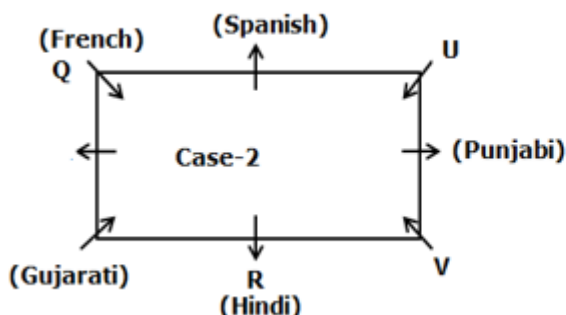

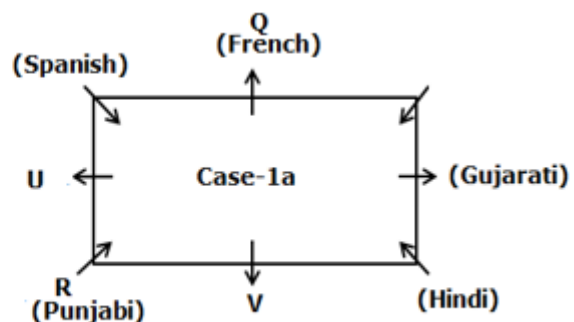

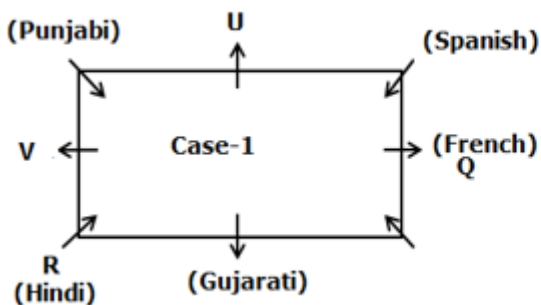

@QuizByMickey

- Two persons sit between R and the one who likes French.
- The person who sits to the immediate left of the one who likes French, sits second to the left of the one who likes Punjabi.
- Four persons sit between the one who likes Punjabi and the one who likes Gujarati.
- Three persons sit between U and the one who likes Gujarat.

Again we have,

- The number of persons sitting between the one who likes Spanish and U is **two less than** the number of persons sitting between the one who likes Hindi and Q, when counted from both the right of U and Q.
- U doesn't like Hindi.
- Neither Q likes Punjabi nor sits to the immediate neighbour of the one who likes French.
- The one who likes Spanish sits third to the right of V.
- More than two persons sit between R and the one who likes Spanish when counted from the right of R.

Again we have,

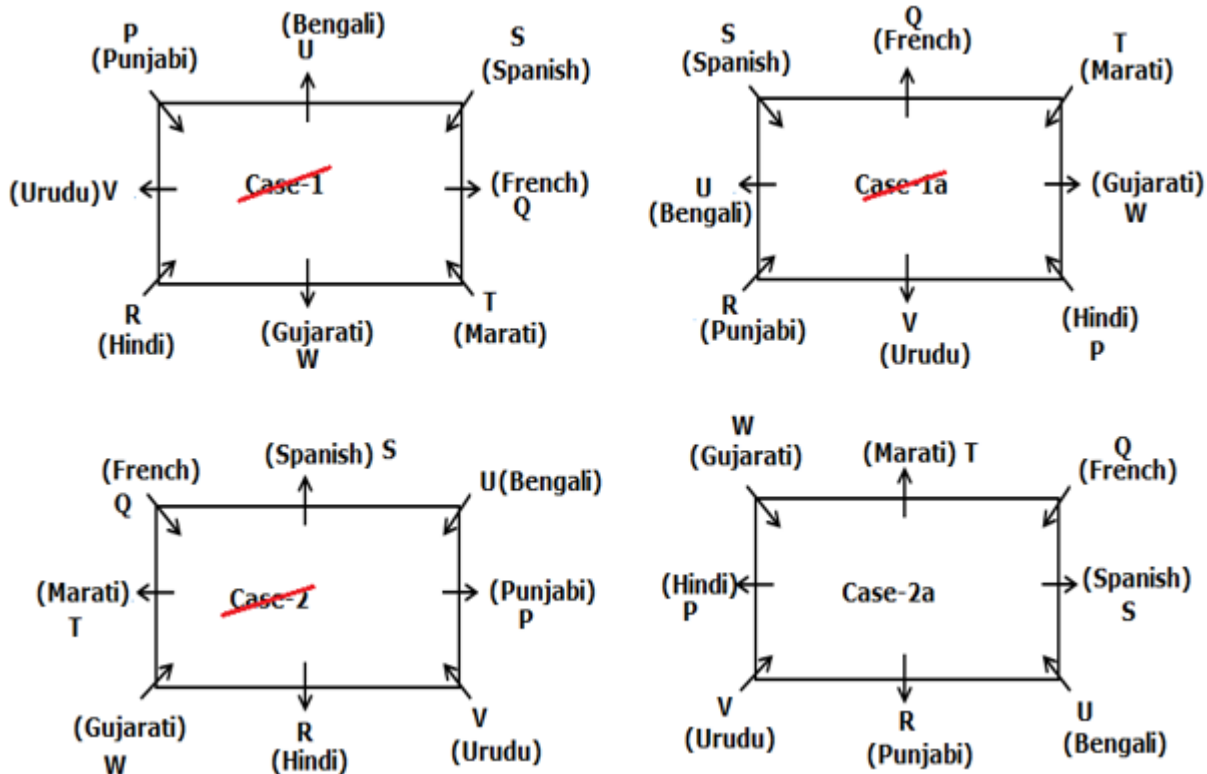

- T sits immediate left of W, who sits opposite to the one who likes Bengali.
- The one who likes Urdu sits as an immediate neighbour of P.

- The immediate neighbors of the one who likes Marati doesn't face outside.
- The one who likes Marati doesn't sit opposite to the one who sits second to the left of R.

From the above conditions, case-1, and case-1a get eliminated because the immediate neighbors of the one who likes Marati doesn't face outside, which is not satisfied.

From the above conditions, case-2 also gets eliminated because the one who likes Marati doesn't sit opposite to the one who sits second to the left of R, which is also not satisfied.

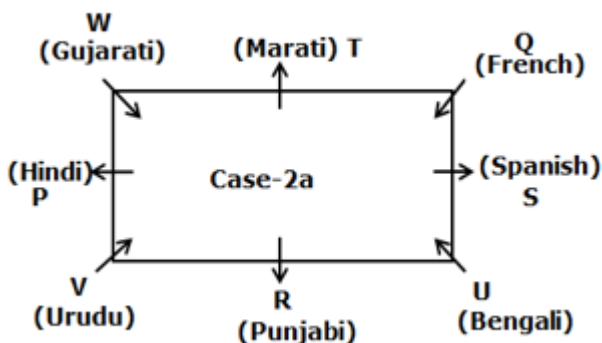

Hence case-2a shows the final arrangement.

Answer: C

3. Questions

Final arrangement:

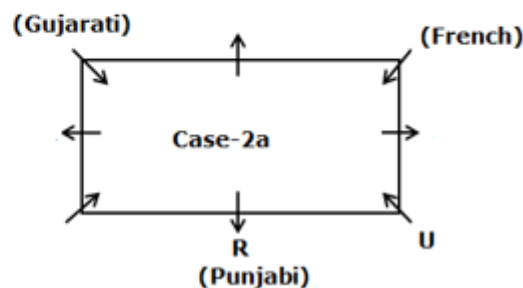

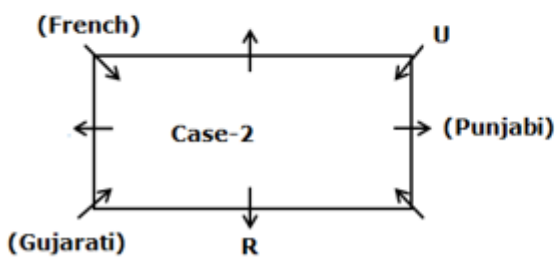

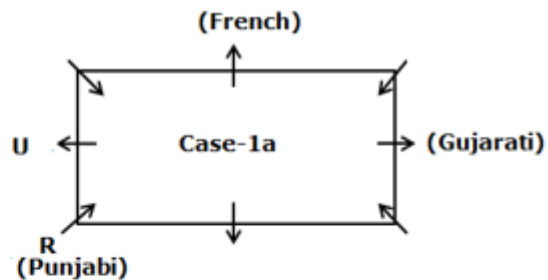

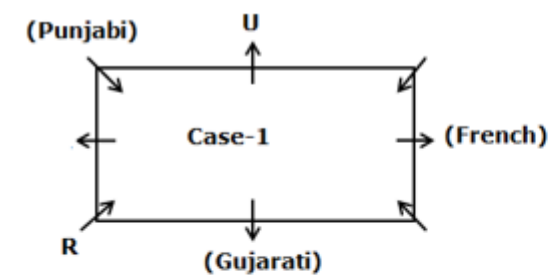

@QuizByMickey

We have,

From the above conditions there are four possibilities

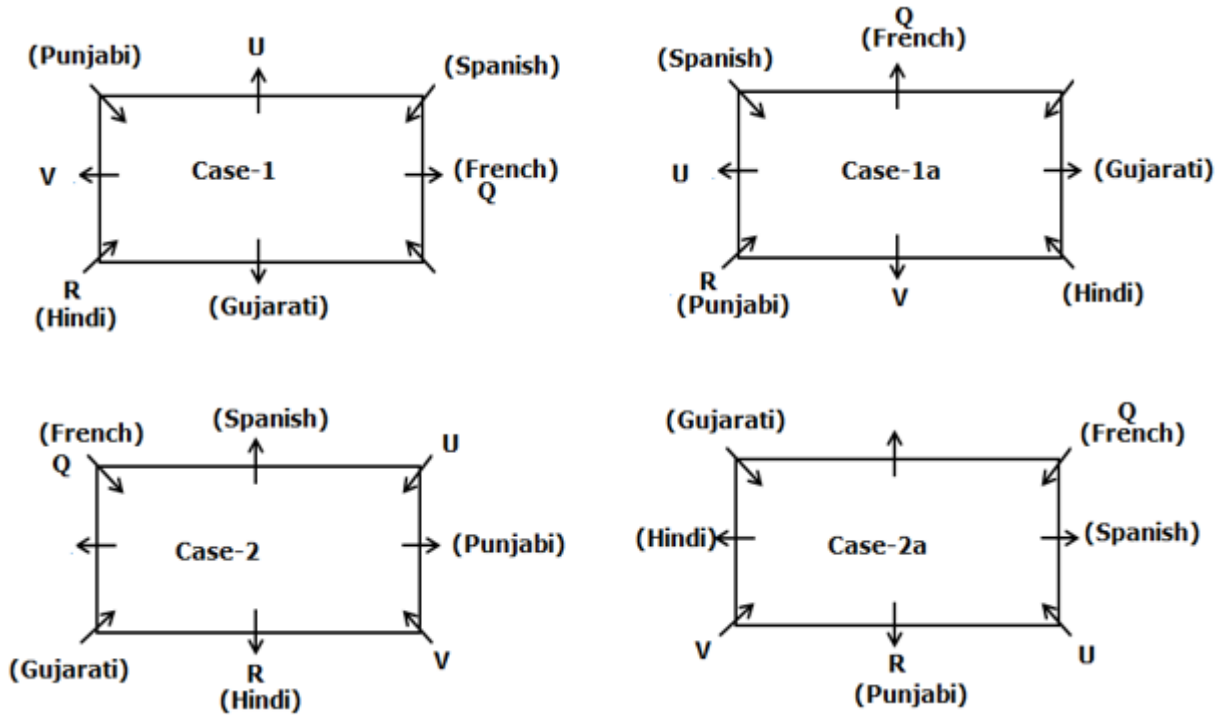

- Two persons sit between R and the one who likes French.
- The person who sits to the immediate left of the one who likes French, sits second to the left of the one who likes Punjabi.
- Four persons sit between the one who likes Punjabi and the one who likes Gujarati.
- Three persons sit between U and the one who likes Gujarat.

Again we have,

- The number of persons sitting between the one who likes Spanish and U is **two less than** the number of persons sitting between the one who likes Hindi and Q, when counted from both the right of U and Q.
- U doesn't like Hindi.
- Neither Q likes Punjabi nor sits to the immediate neighbour of the one who likes French.
- The one who likes Spanish sits third to the right of V.
- More than two persons sit between R and the one who likes Spanish when counted from the right of R.

@QuizByMickey

Again we have,

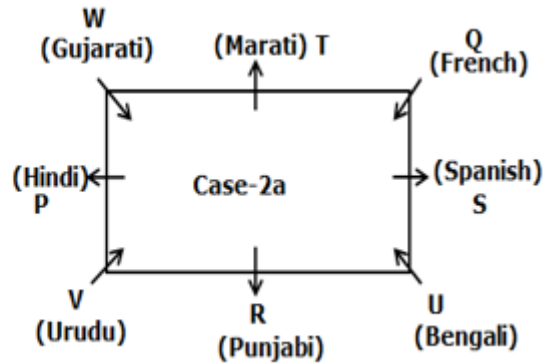

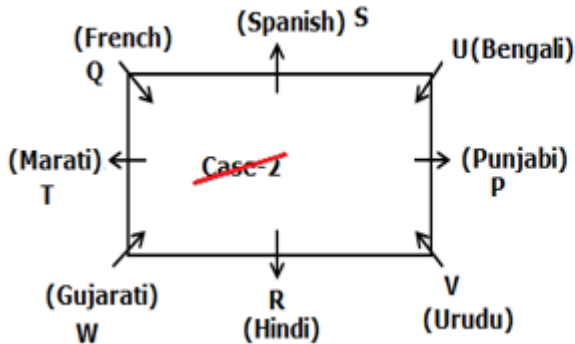

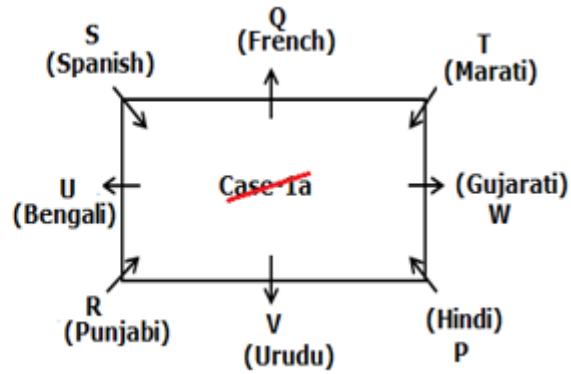

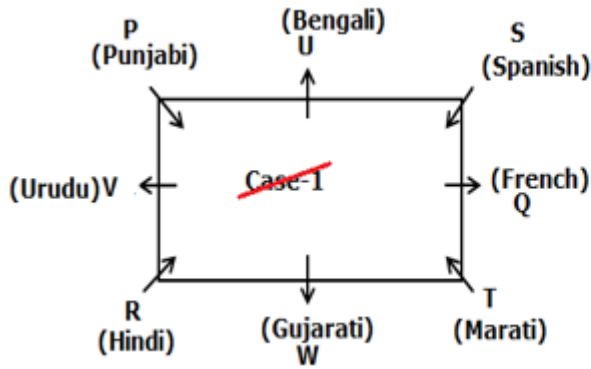

- T sits immediate left of W, who sits opposite to the one who likes Bengali.
- The one who likes Urdu sits as an immediate neighbour of P.
- The immediate neighbors of the one who likes Marati doesn't face outside.
- The one who likes Marati doesn't sit opposite to the one who sits second to the left of R.

From the above conditions, case-1, and case-1a get eliminated because the immediate neighbors of the one who likes Marati doesn't face outside, which is not satisfied.

From the above conditions, case-2 also gets eliminated because the one who likes Marati doesn't sit opposite to the one who sits second to the left of R, which is also not satisfied.

Hence case-2a shows the final arrangement.

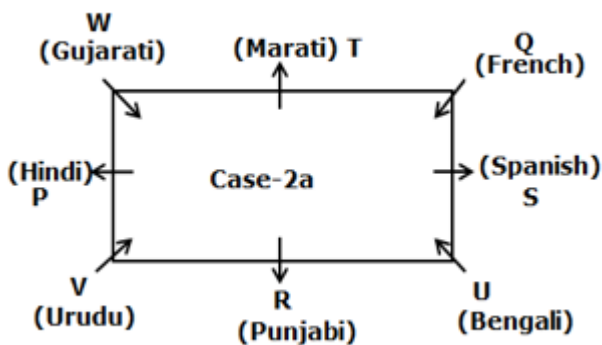

@QuizByMickey

Answer: E

4. Questions

Final arrangement:

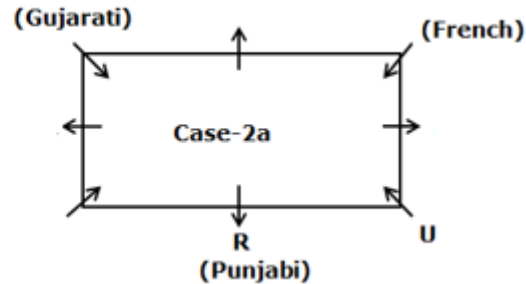

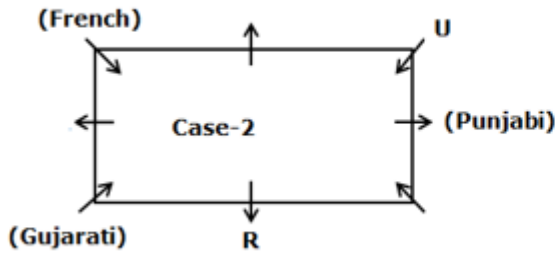

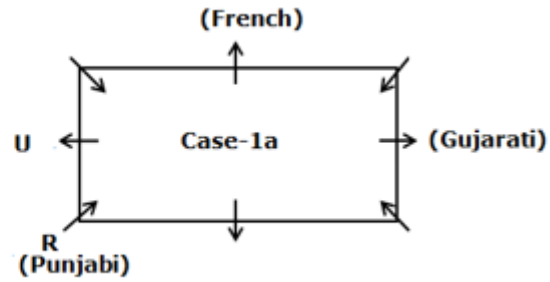

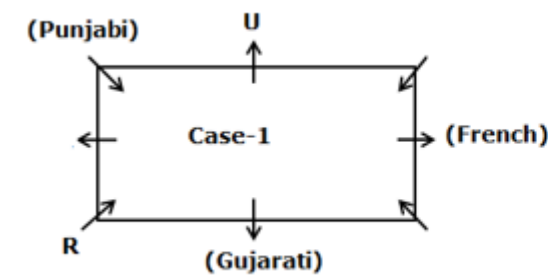

We have,

From the above conditions there are four possibilities

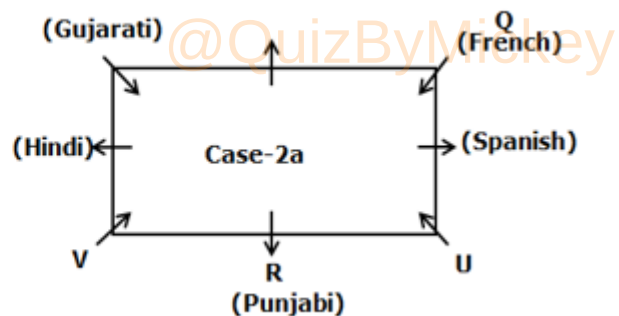

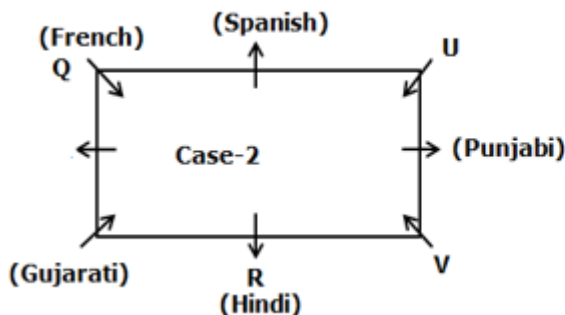

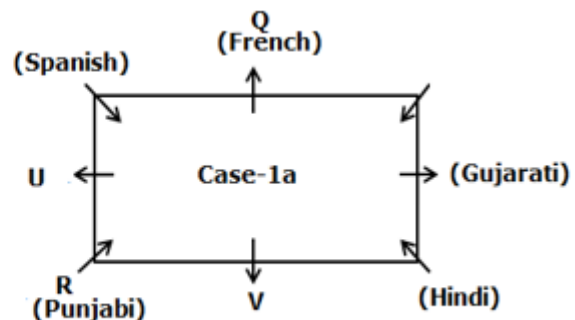

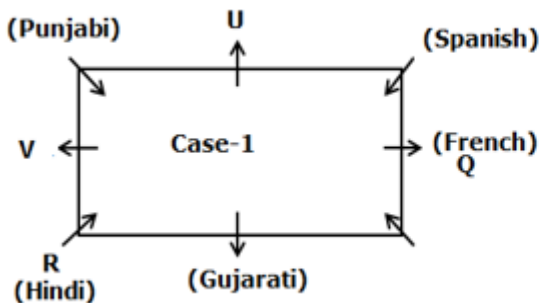

@QuizByMickey

- Two persons sit between R and the one who likes French.
- The person who sits to the immediate left of the one who likes French, sits second to the left of the one who likes Punjabi.
- Four persons sit between the one who likes Punjabi and the one who likes Gujarati.
- Three persons sit between U and the one who likes Gujarat.

Again we have,

- The number of persons sitting between the one who likes Spanish and U is **two less than** the number of persons sitting between the one who likes Hindi and Q, when counted from both the right of U and Q.
- U doesn't like Hindi.
- Neither Q likes Punjabi nor sits to the immediate neighbour of the one who likes French.
- The one who likes Spanish sits third to the right of V.
- More than two persons sit between R and the one who likes Spanish when counted from the right of R.

Again we have,

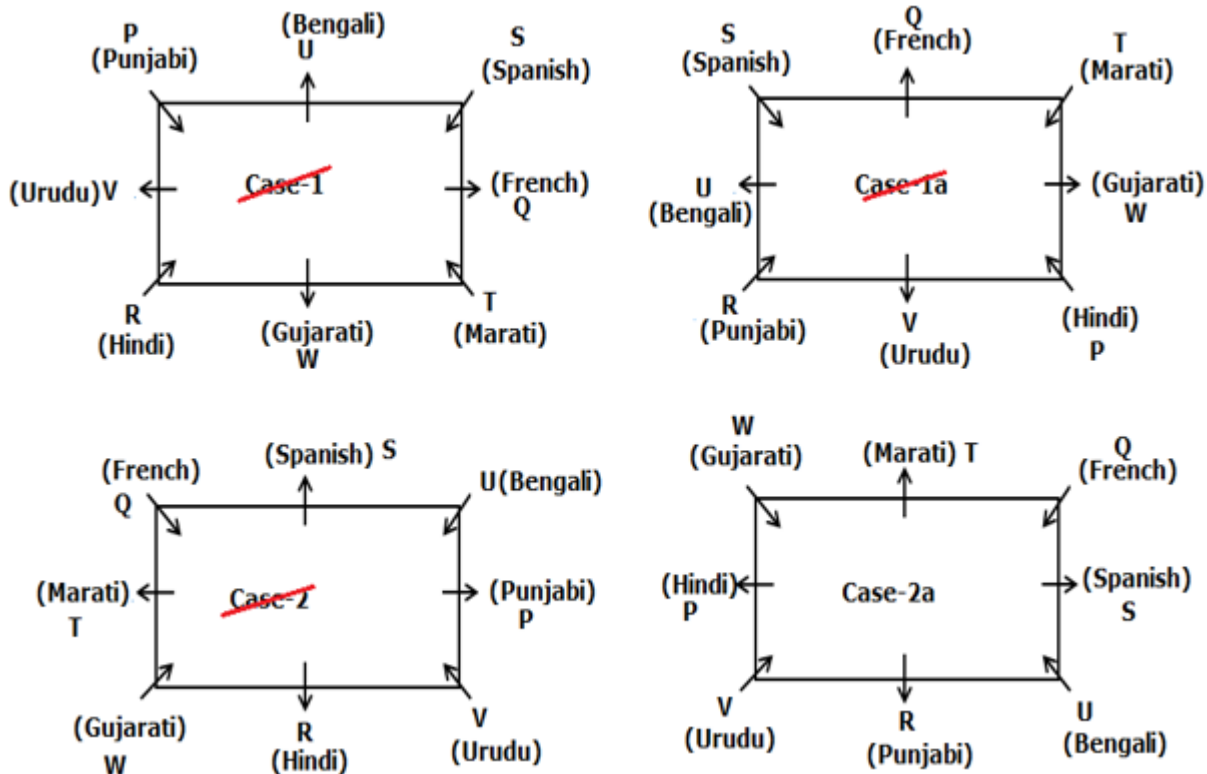

- T sits immediate left of W, who sits opposite to the one who likes Bengali.
- The one who likes Urdu sits as an immediate neighbour of P.

- The immediate neighbors of the one who likes Marati doesn't face outside.
- The one who likes Marati doesn't sit opposite to the one who sits second to the left of R.

From the above conditions, case-1, and case-1a get eliminated because the immediate neighbors of the one who likes Marati doesn't face outside, which is not satisfied.

From the above conditions, case-2 also gets eliminated because the one who likes Marati doesn't sit opposite to the one who sits second to the left of R, which is also not satisfied.

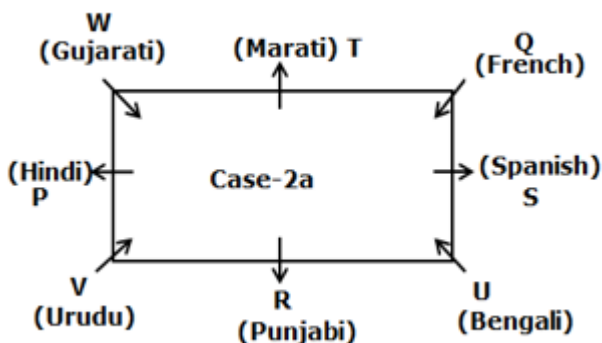

Hence case-2a shows the final arrangement.

Answer: A

5. Questions

Final arrangement:

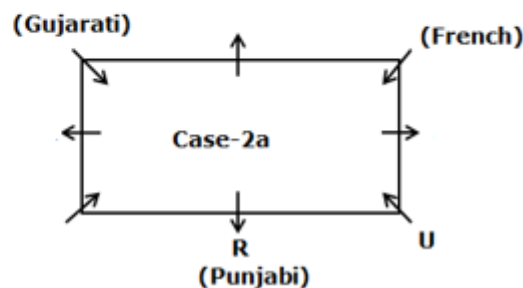

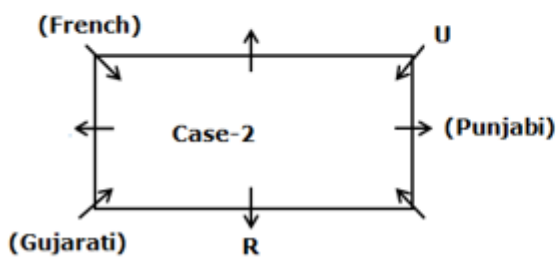

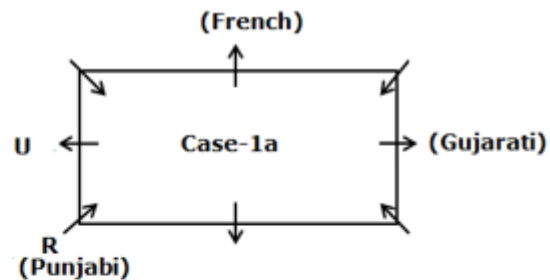

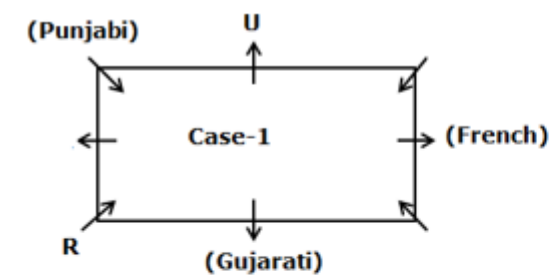

@QuizByMickey

We have,

From the above conditions there are four possibilities

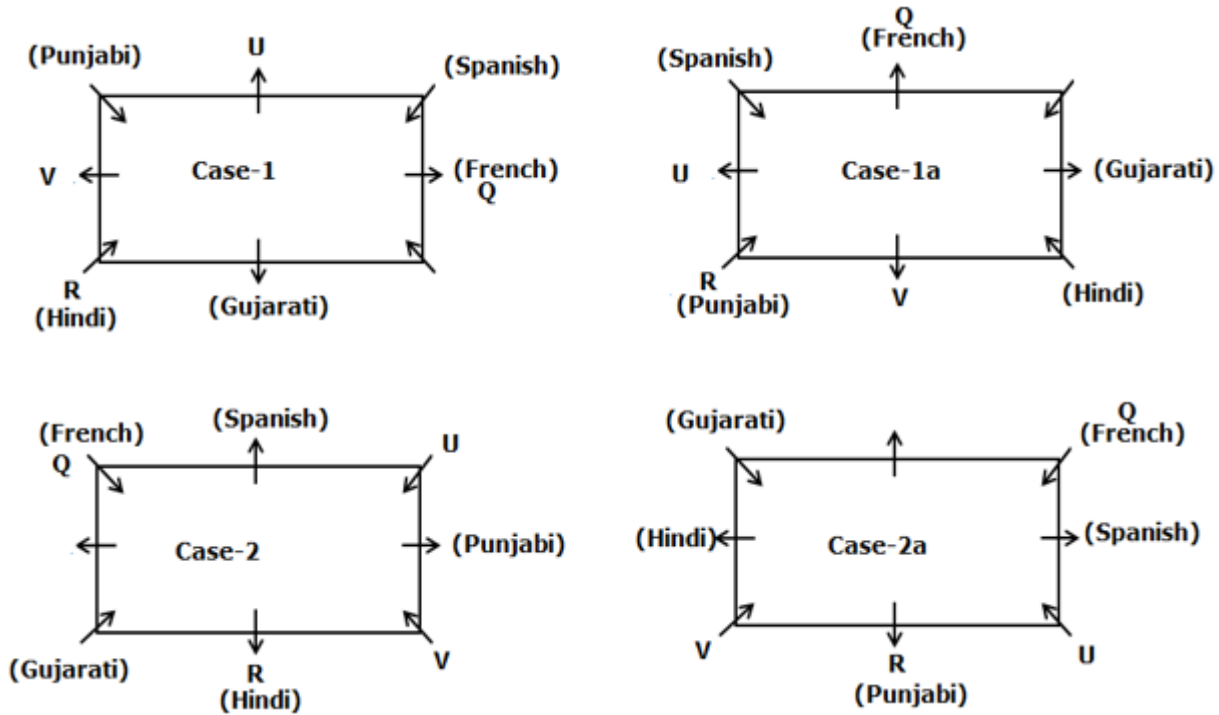

- Two persons sit between R and the one who likes French.
- The person who sits to the immediate left of the one who likes French, sits second to the left of the one who likes Punjabi.
- Four persons sit between the one who likes Punjabi and the one who likes Gujarati.
- Three persons sit between U and the one who likes Gujarat.

Again we have,

- The number of persons sitting between the one who likes Spanish and U is **two less than** the number of persons sitting between the one who likes Hindi and Q, when counted from both the right of U and Q.
- U doesn't like Hindi.
- Neither Q likes Punjabi nor sits to the immediate neighbour of the one who likes French.
- The one who likes Spanish sits third to the right of V.
- More than two persons sit between R and the one who likes Spanish when counted from the right of R.

@QuizByMickey

Again we have,

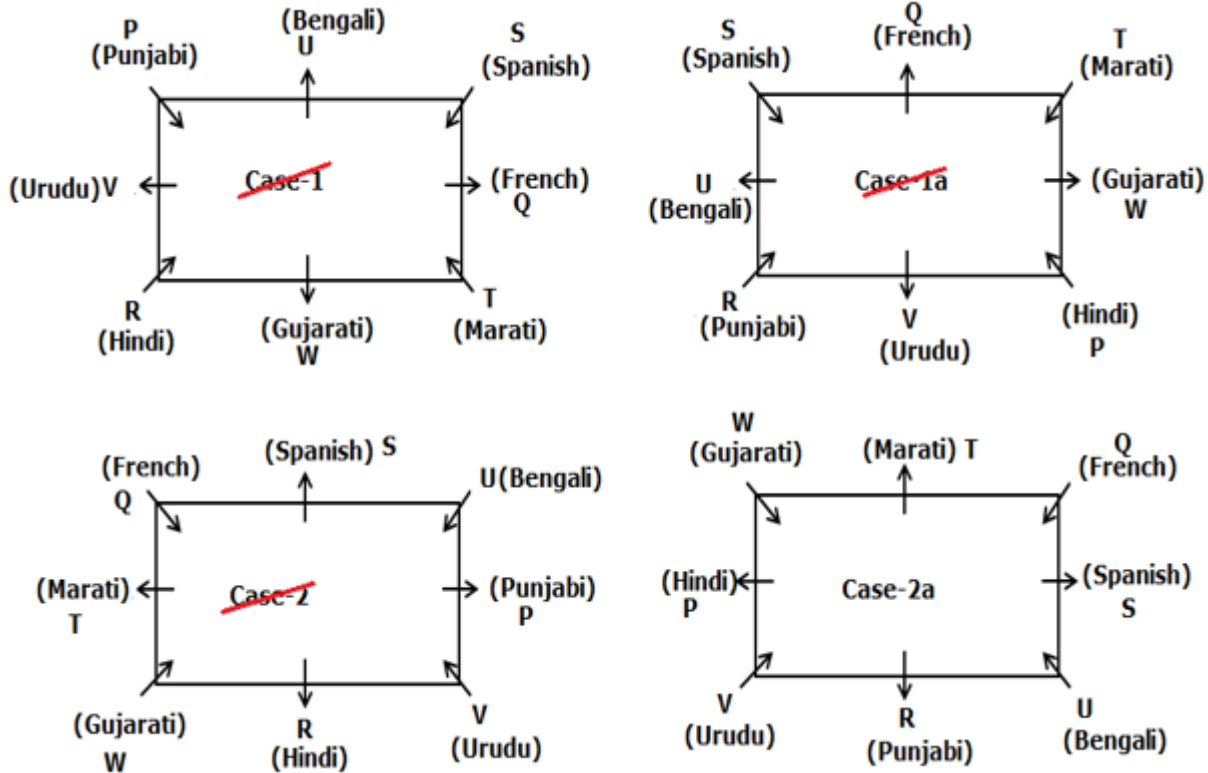

- T sits immediate left of W, who sits opposite to the one who likes Bengali.
- The one who likes Urdu sits as an immediate neighbour of P.
- The immediate neighbors of the one who likes Marathi doesn't face outside.
- The one who likes Marathi doesn't sit opposite to the one who sits second to the left of R.

From the above conditions, case-1, and case-1a get eliminated because the immediate neighbors of the one who likes Marathi doesn't face outside, which is not satisfied.

From the above conditions, case-2 also gets eliminated because the one who likes Marathi doesn't sit opposite to the one who sits second to the left of R, which is also not satisfied.

Hence case-2a shows the final arrangement.

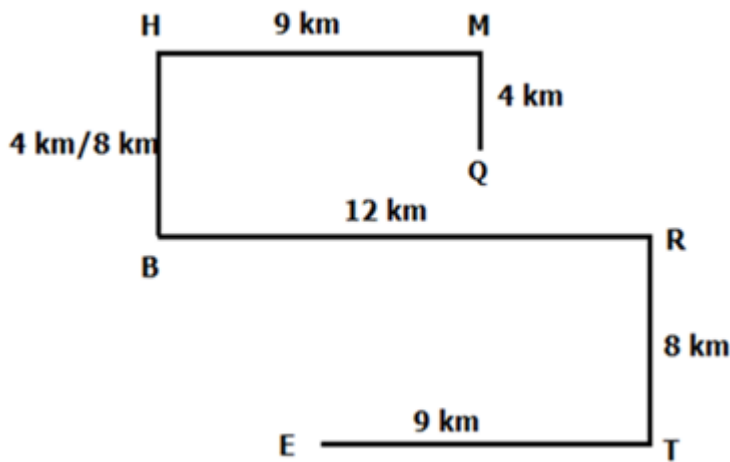

@QuizByMickey

Answer: D (Except option d all persons are facing inside)

6. Questions

Final arrangement:

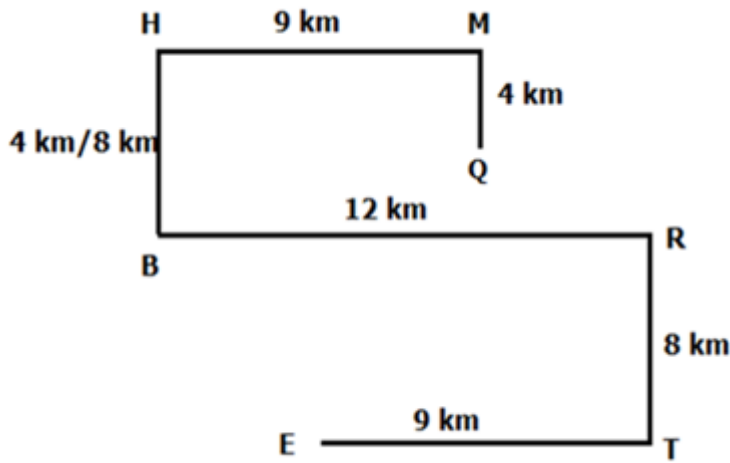

Answer: C

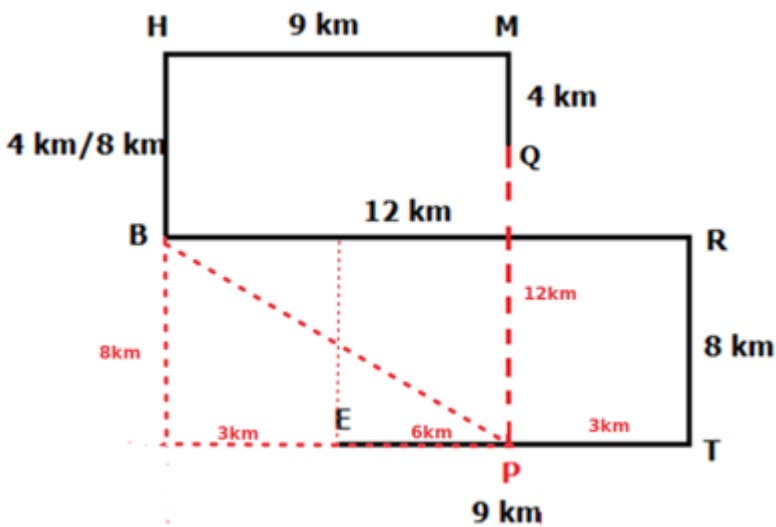

7. Questions

Final arrangement:

@QuizByMickey

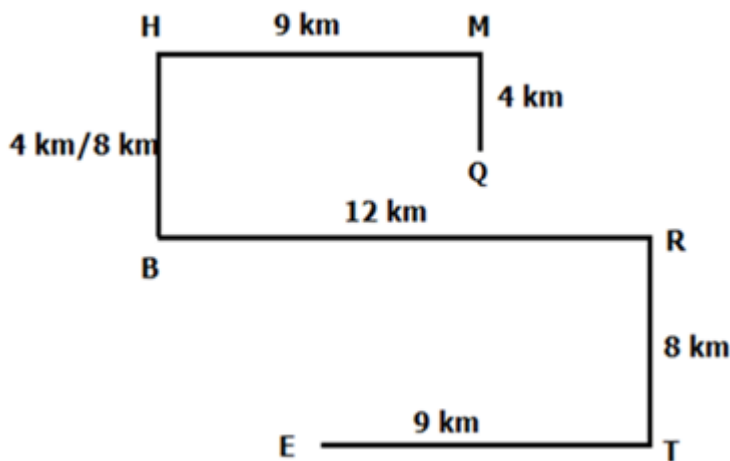

Answer: A

The shortest distance between B and P = $(9^2 + 8^2)^{1/2} = \sqrt{145}$ km

8. Questions

Final arrangement:

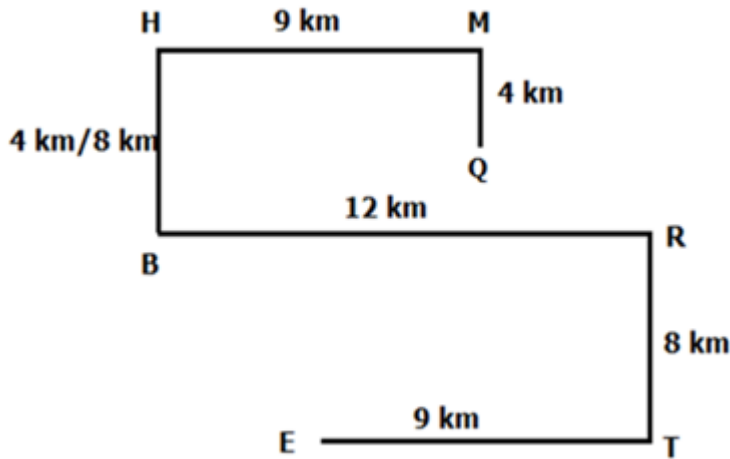

@QuizByMickey

Answer: D

9. Questions

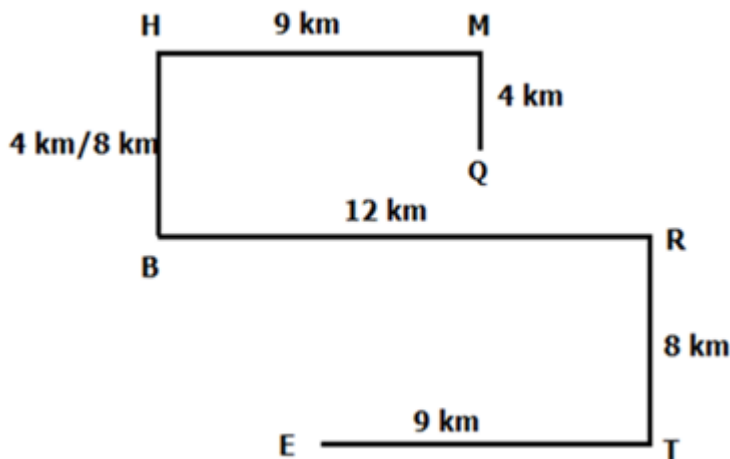

Final arrangement:

Answer: E

10. Questions

Final arrangement:

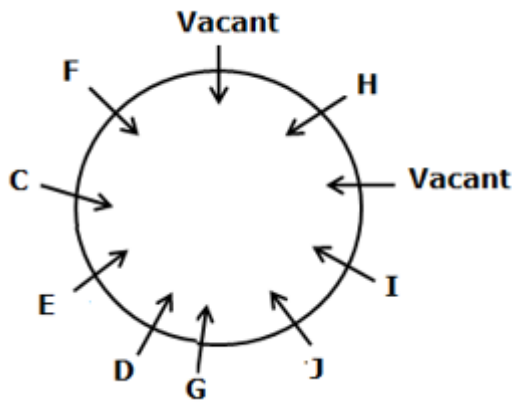

Answer: B (All the given pairs of points in the options form a straight line, except option b)

11. Questions

Final arrangement:

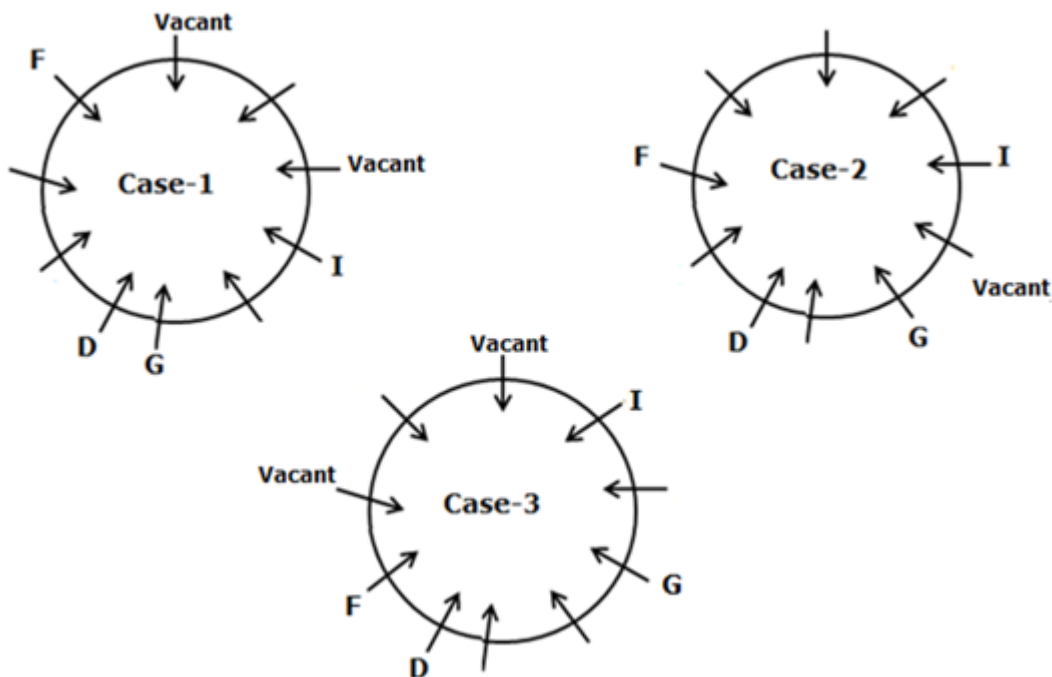

@QuizByMickey

We have,

- Two persons sit between D and I.
- F sits fourth to the right of I, who does not sit adjacent to G.
- Three persons sit between F and G.

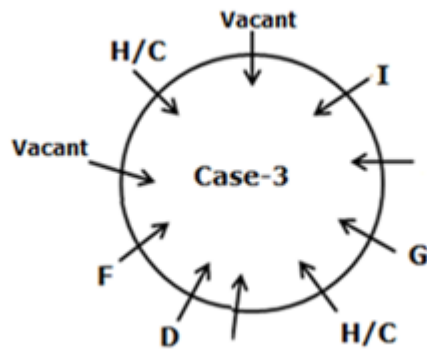

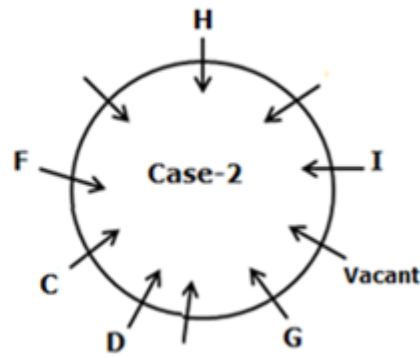

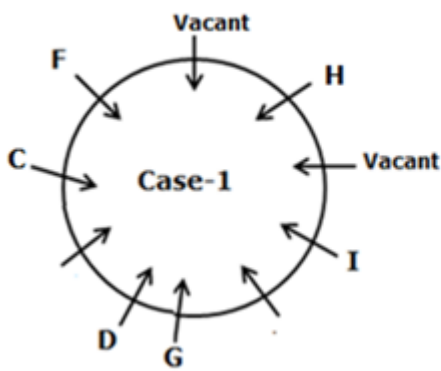

From the above conditions, there are three possibilities.

Again we have,

@QuizByMickey

- The number of persons sitting between G and D is **one less than** the number of persons sitting between H and C, when counted from the right of both D and H.
- Both H and C don't sit adjacent to I or D.

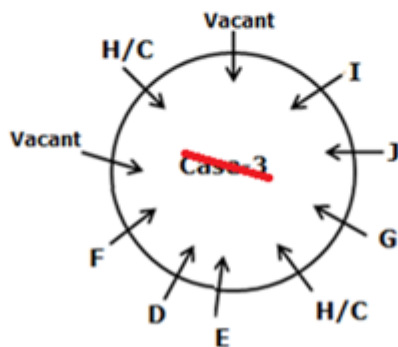

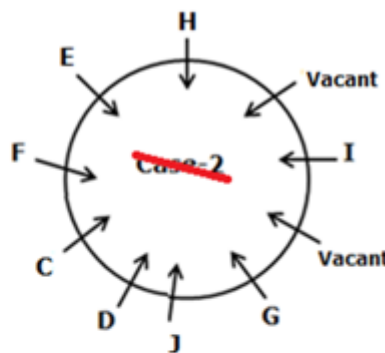

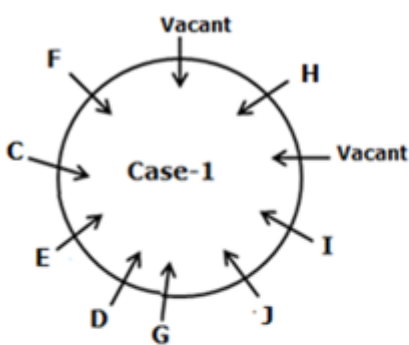

Again we have,

- Two vacant seats are between J and E, when counted from the left of E.
- E sits neither adjacent to H nor to the immediate right of D.

From the above condition case-2 and case-3 get eliminated because E sits neither adjacent to H nor to the immediate right of D, which is not satisfied.

Hence, case-1 shows the final arrangement.

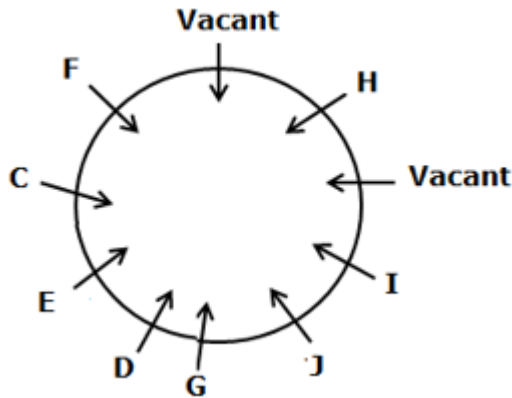

@QuizByMickey

Answer: A

12. Questions

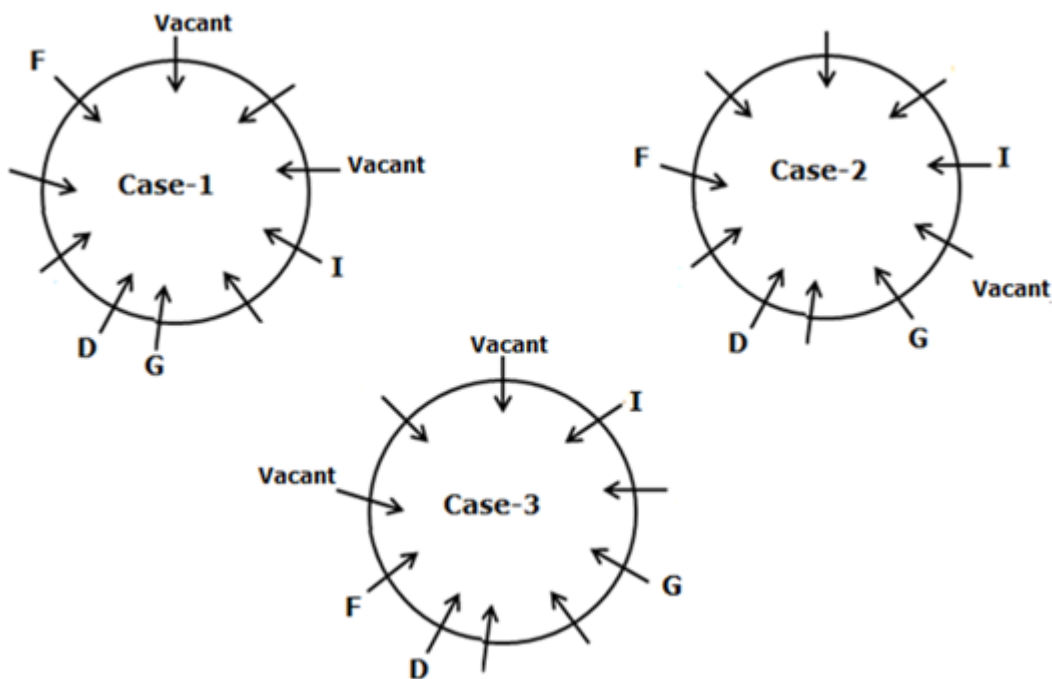

Final arrangement:

We have,

- Two persons sit between D and I.
- F sits fourth to the right of I, who does not sit adjacent to G.
- Three persons sit between F and G.

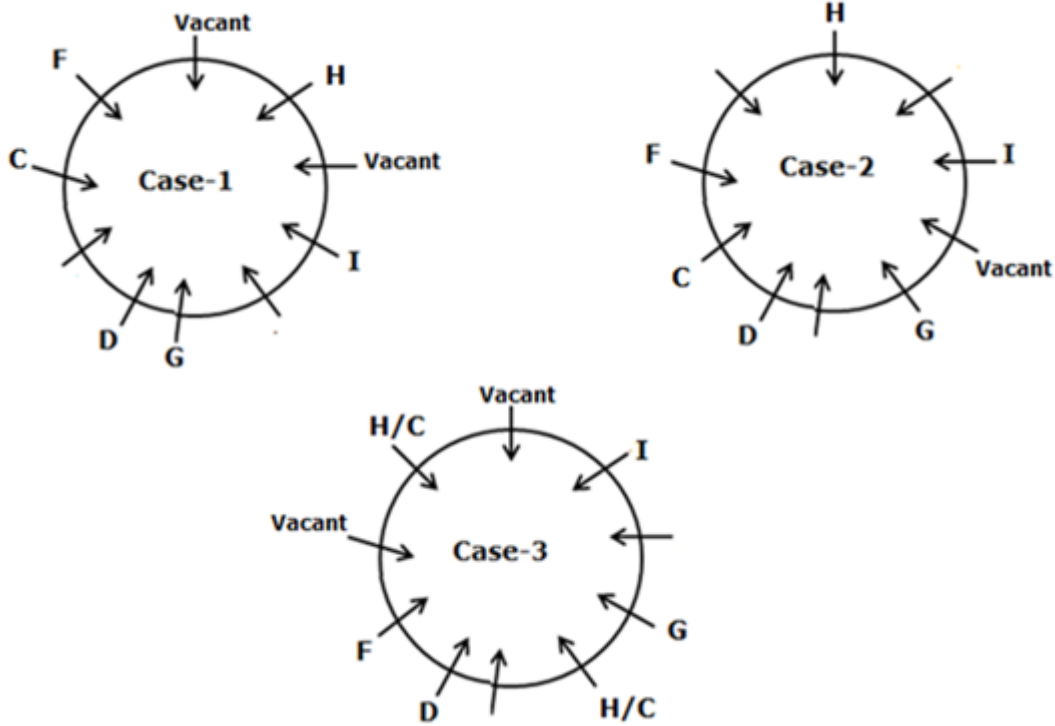

From the above conditions, there are three possibilities.

Again we have,

@QuizByMickey

- The number of persons sitting between G and D is **one less than** the number of persons sitting between H and C, when counted from the right of both D and H.
- Both H and C don't sit adjacent to I or D.

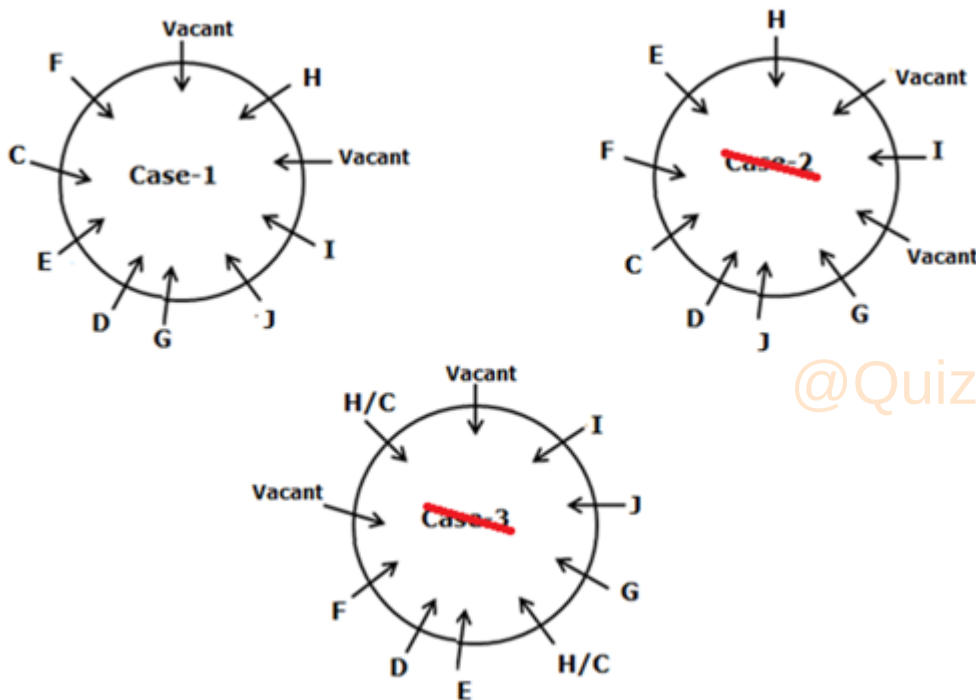

Again we have,

- Two vacant seats are between J and E, when counted from the left of E.
- E sits neither adjacent to H nor to the immediate right of D.

From the above condition case-2 and case-3 get eliminated because E sits neither adjacent to H nor to the immediate right of D, which is not satisfied.

Hence, case-1 shows the final arrangement.

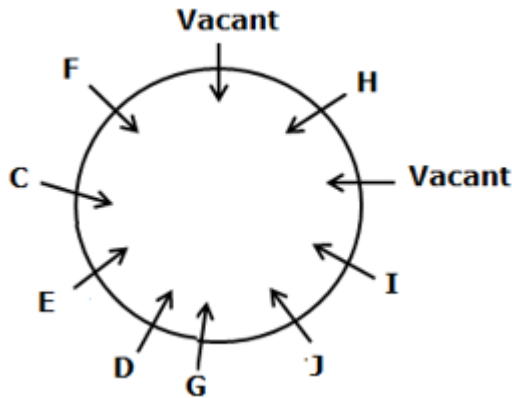

@QuizByMickey

Answer: C

13. Questions

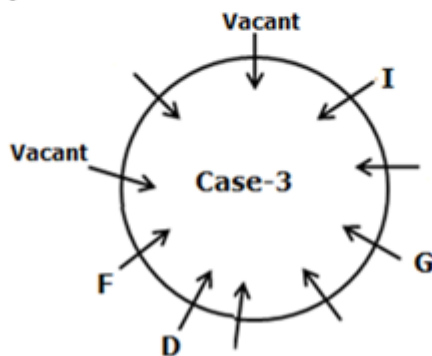

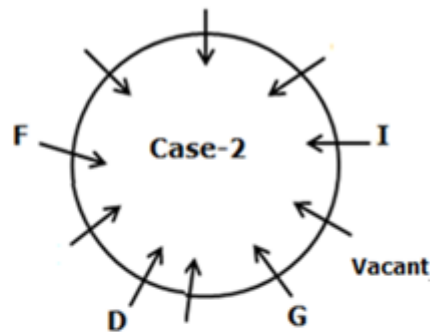

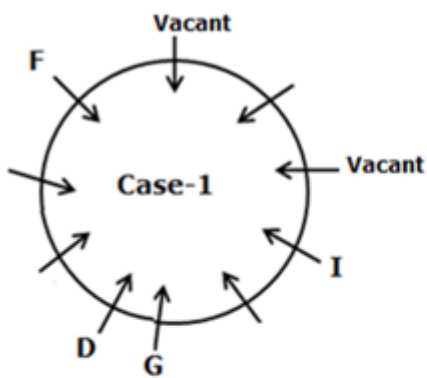

Final arrangement:

We have,

- Two persons sit between D and I.
- F sits fourth to the right of I, who does not sit adjacent to G.
- Three persons sit between F and G.

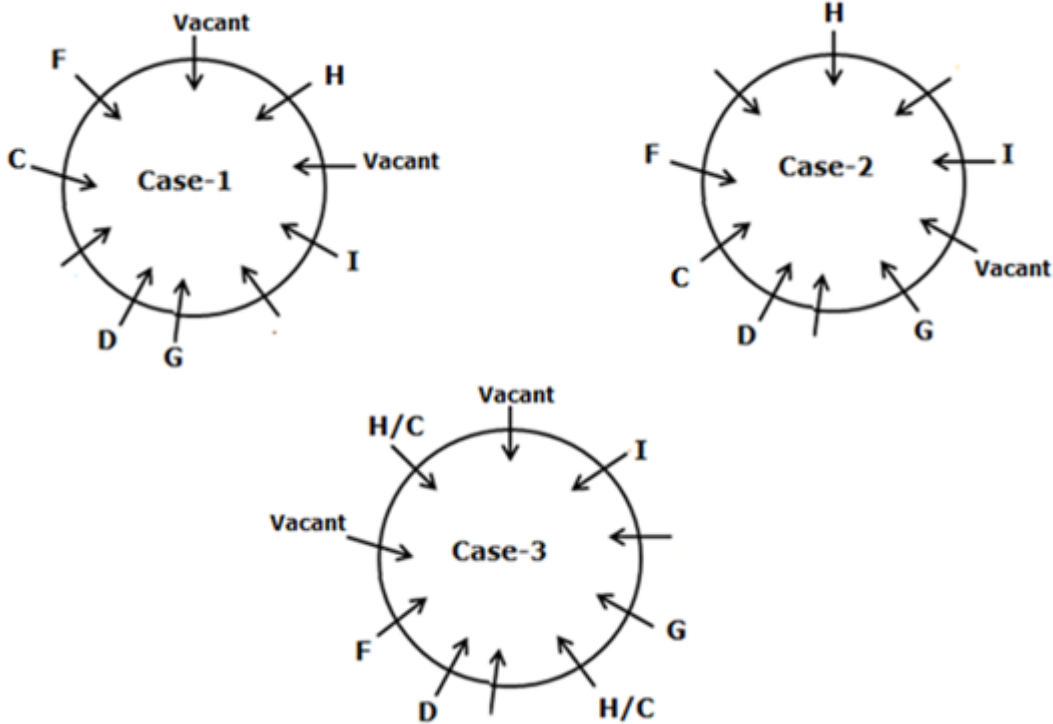

From the above conditions, there are three possibilities.

Again we have,

@QuizByMickey

- The number of persons sitting between G and D is **one less than** the number of persons sitting between H and C, when counted from the right of both D and H.
- Both H and C don't sit adjacent to I or D.

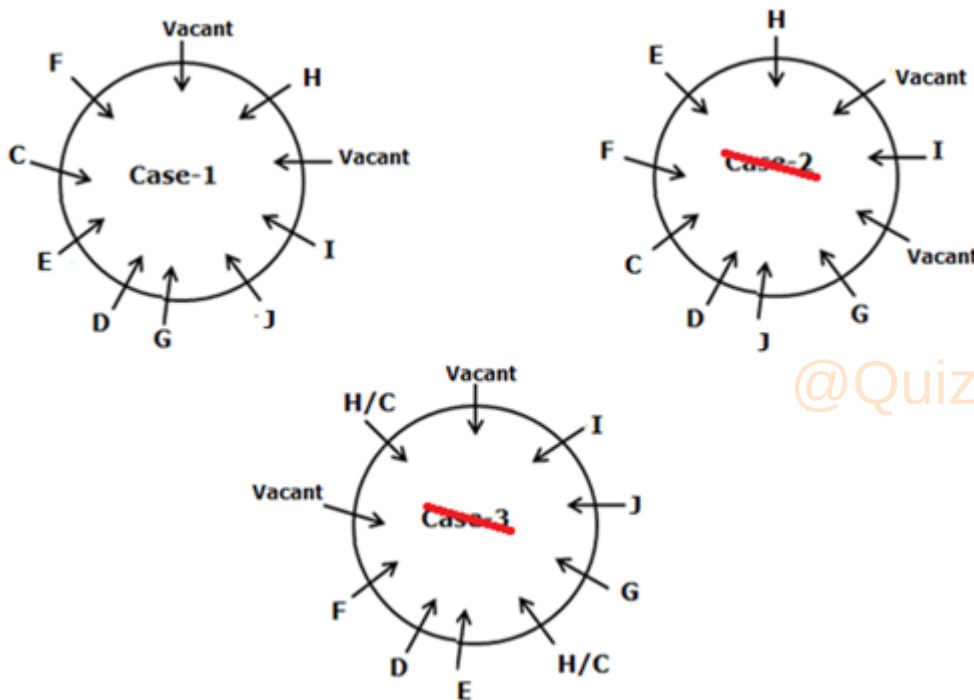

Again we have,

- Two vacant seats are between J and E, when counted from the left of E.
- E sits neither adjacent to H nor to the immediate right of D.

From the above condition case-2 and case-3 get eliminated because E sits neither adjacent to H nor to the immediate right of D, which is not satisfied.

Hence, case-1 shows the final arrangement.

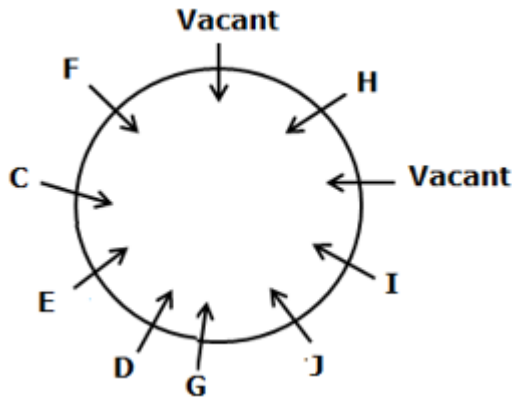

@QuizByMickey

Answer: B (Except option b all the given pairs of persons are immediate neighbours)

14. Questions

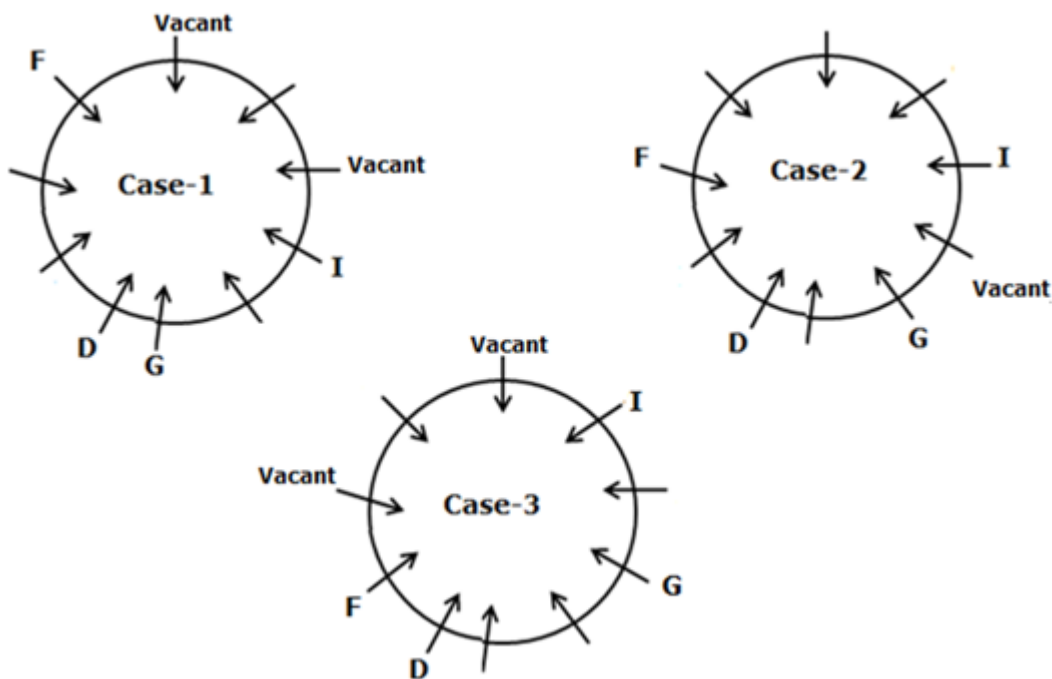

Final arrangement:

We have,

- Two persons sit between D and I.
- F sits fourth to the right of I, who does not sit adjacent to G.
- Three persons sit between F and G.

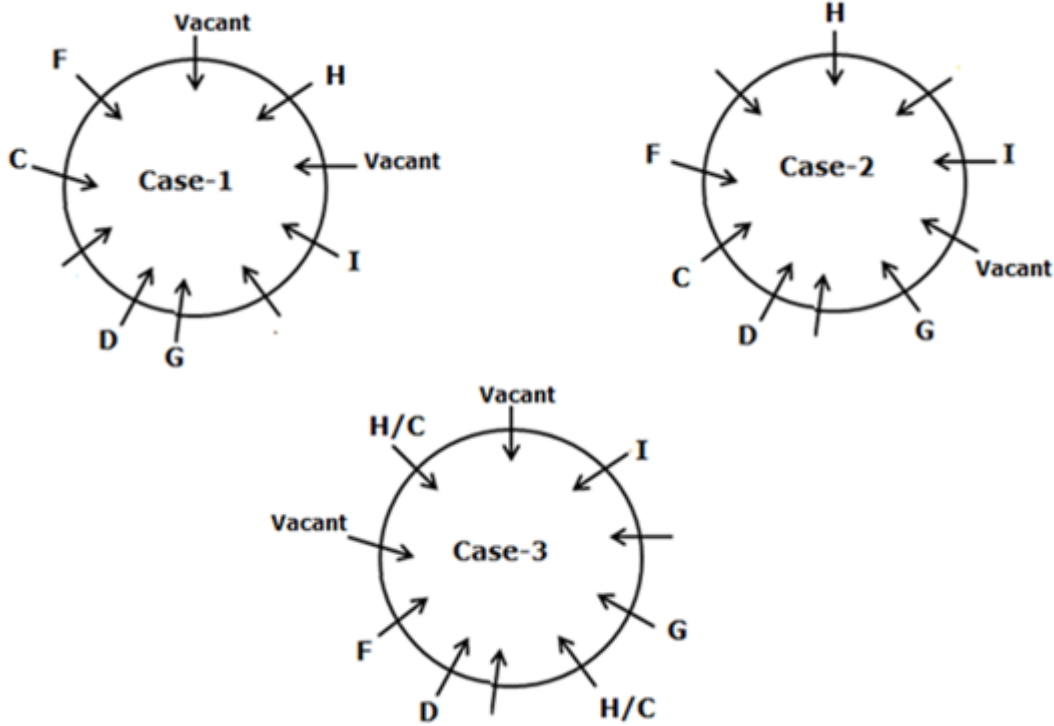

From the above conditions, there are three possibilities.

Again we have,

@QuizByMickey

- The number of persons sitting between G and D is **one less than** the number of persons sitting between H and C, when counted from the right of both D and H.
- Both H and C don't sit adjacent to I or D.

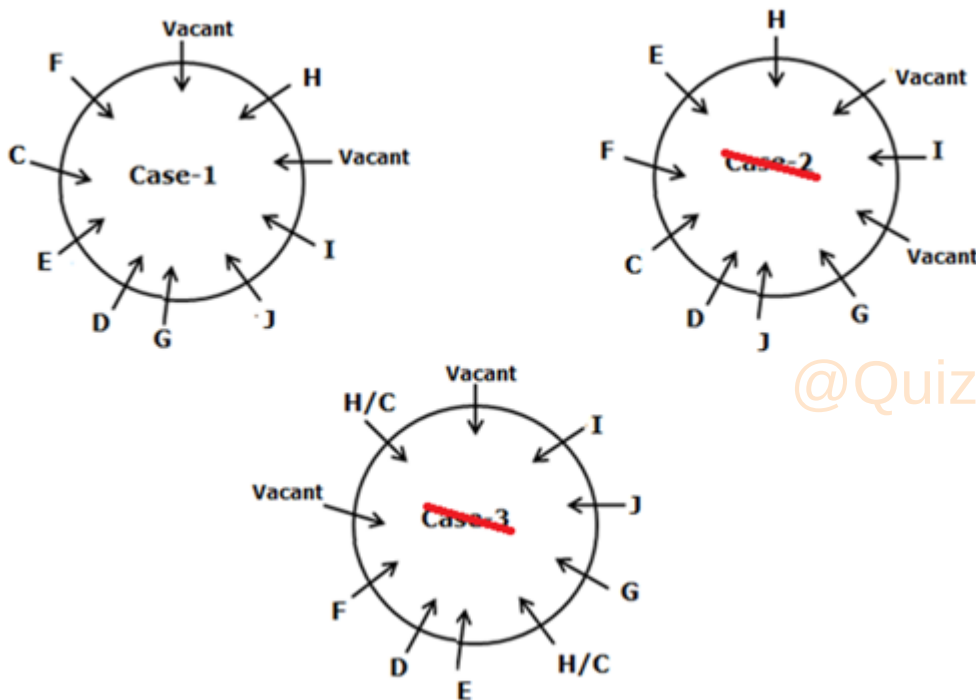

Again we have,

- Two vacant seats are between J and E, when counted from the left of E.
- E sits neither adjacent to H nor to the immediate right of D.

From the above condition case-2 and case-3 get eliminated because E sits neither adjacent to H nor to the immediate right of D, which is not satisfied.

Hence, case-1 shows the final arrangement.

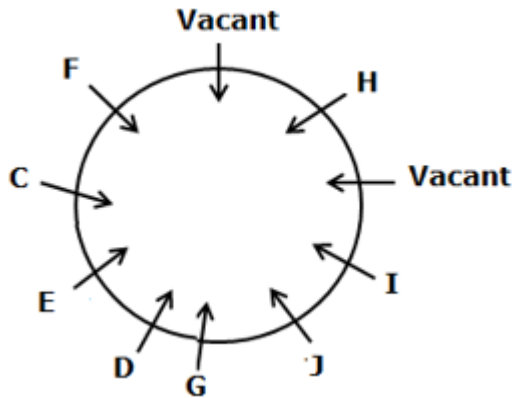

@QuizByMickey

Answer: D

15. Questions

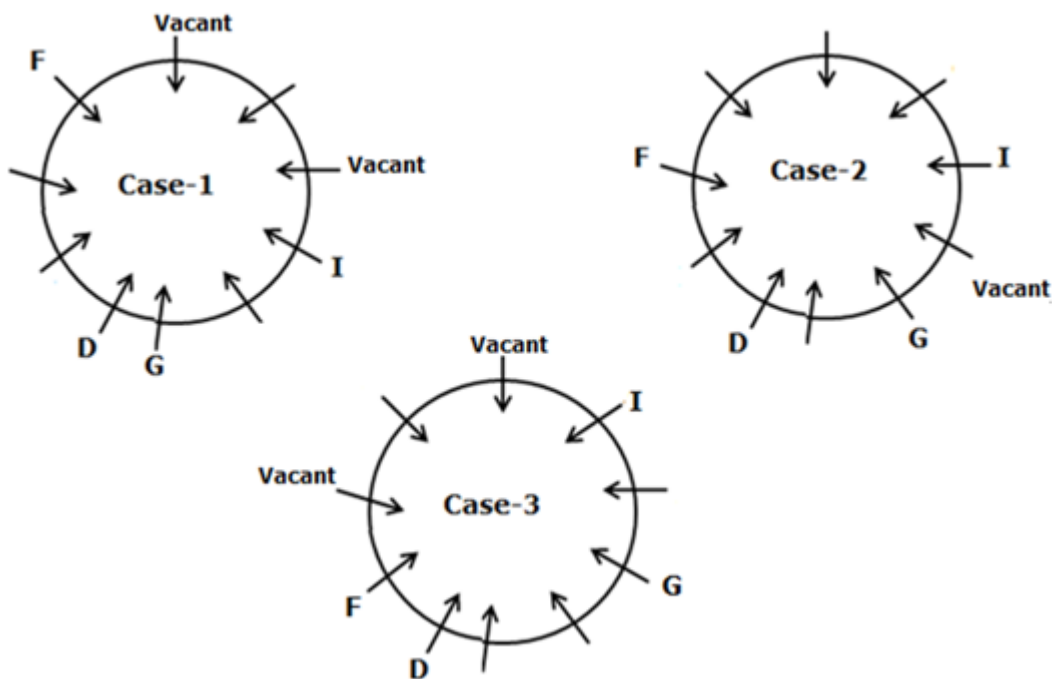

Final arrangement:

We have,

- Two persons sit between D and I.
- F sits fourth to the right of I, who does not sit adjacent to G.
- Three persons sit between F and G.

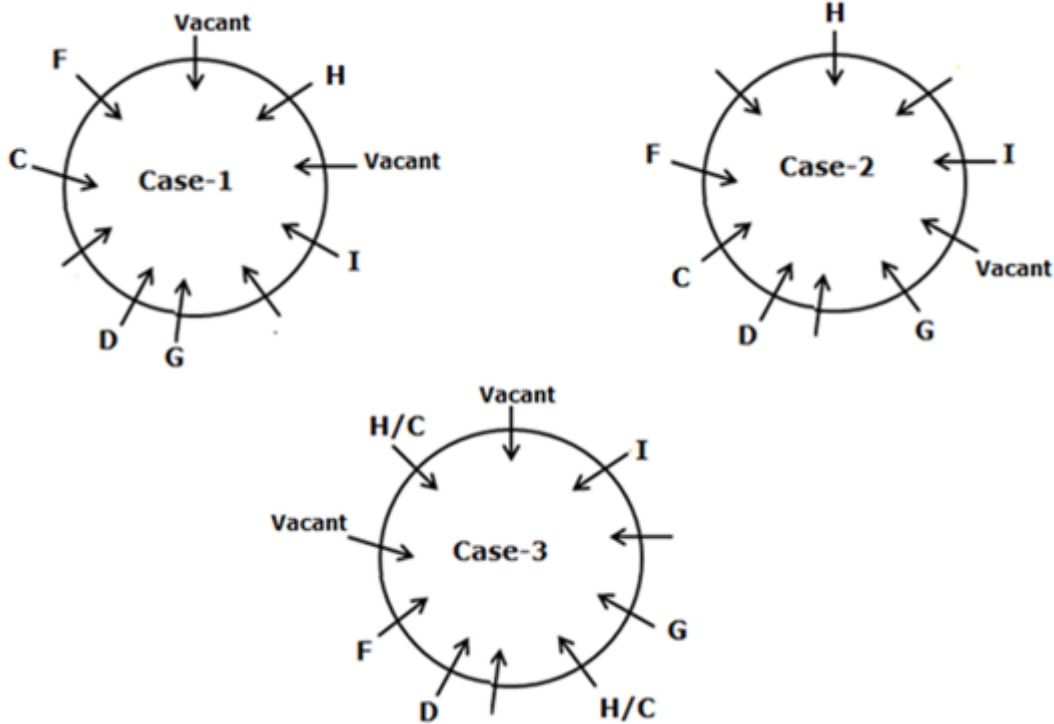

From the above conditions, there are three possibilities.

Again we have,

@QuizByMickey

- The number of persons sitting between G and D is **one less than** the number of persons sitting between H and C, when counted from the right of both D and H.
- Both H and C don't sit adjacent to I or D.

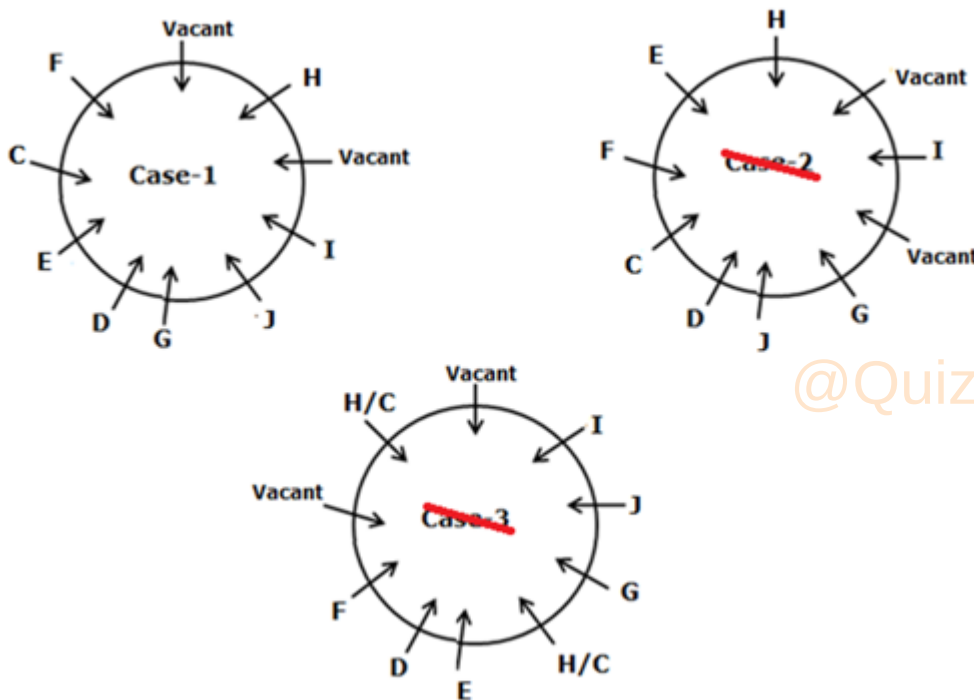

Again we have,

- Two vacant seats are between J and E, when counted from the left of E.
- E sits neither adjacent to H nor to the immediate right of D.

From the above condition case-2 and case-3 get eliminated because E sits neither adjacent to H nor to the immediate right of D, which is not satisfied.

Hence, case-1 shows the final arrangement.

@QuizByMickey

Answer: E

16. Questions

Answer: A

The passage mentions that tourism contributes to economic growth but can also harm the environment and cultural sites. This suggests that tourism has both benefits and drawbacks, making option (a) a valid assumption. The other options either ignore key details or misinterpret the passage.

17. Questions

Answer: A

A is a major reason for power outages as rising demand overloads the system. B, C, D, and E are incorrect as they help improve electricity supply rather than cause failures.

18. Questions

Answer: B

The passage mentions that **successful high-speed rail systems exist only in countries where railway infrastructure is already strong.**

(a) and (e) discuss global best practices, which are supporting details, not direct inferences.

(c) and (d) mention financial burden and long-term strategy, but they do not fully capture the main message.

(b) is correct because it highlights that bullet trains will not be effective without improving basic infrastructure first.

19. Questions

Answer: C

The key problem is the increasing threat of cyberattacks and weak enforcement of cybersecurity laws. (c) is the best choice as government intervention ensures consistency and security. (b) lacks regulation, (a) is unrealistic, and (d) is insufficient.

20. Questions

Answer: E

Overuse of smartphones directly causes addiction. A, B, C and D are incorrect because they reduce phone addiction rather than cause it.

@QuizByMickey
