

1. Questions

In each question below is given a group of letters followed by four combinations of numbers/symbols and letters. You have to find out which of the combinations correctly represents the code based on the given coding system.

In a certain code language,

Rules:

I). All the consonants that appear before 'M' in the alphabetical series are to be coded as 1-9 respectively

II). All the consonants that appear after 'M' in the alphabetical series are to be coded as 1-9 respectively (After 9, start the numbering from 1 again)

III). 'M' is to be coded as 2.

Conditions:

I). If the word starts and ends with Consonants, then both the consonants are coded as the code for the immediate previous letter of that consonant in the alphabetical series. (E.g. The code for 'C' will be coded for the code 'B').

II). If the word starts and ends with Vowels, then both of them are coded as '%'.

III). If a vowel is immediately preceded as well as immediately followed by consonants then the vowel is coded with the numeric code of the second alphabet from the left end of that word. In case, the second alphabet is a vowel then the vowel is coded as "@".

IV). If no conditions satisfy for vowel letters, then uncoded vowels are to be coded as '&'

Note: If more than one condition is applicable in a single word, then apply all the conditions as per the given order.

What is the code for the word "Umbrella"?

- a. %854172%
- b. %243119%
- c. %214299%
- d. &812921%
- e. None of these

@QuizByMickey

2. Questions

What is the code of the Sentence "Life gives Stress"?

- a. 8&3% 4#78% 842334
- b. 9@5# 47#3\$ 862541
- c. 9@5% 4#9#8 8@4521
- d. 9@4& 4@7@4 464654

e. 8%3@ 7#4#7 564@41

3. Questions

What is the sum of all the digits of the code of the Sentence “Information Data”?

- a. 45
- b. 33
- c. 21
- d. 17
- e. 29

4. Questions

What is the code for the word “Reflection”?

- a. 3&49@26@@2
- b. 3@49@26&&2
- c. 8953@26&31
- d. 3&42&3@2@9
- e. 3@49&62&32

5. Questions

Which of the following word will be coded as “2&&49”?

- a. Quant
- b. Quads
- c. Quest
- d. Quell
- e. Query

6. Questions

@QuizByMickey

In each of the following questions two rows of numbers are given. The resultant number in each row is to be workout separately based on the following rules and the question below the rows of numbers are to be answered. The operations of numbers progress from left to right.

Rules:

- I). If a perfect square number is followed by an odd number, then both numbers are to be added.
- II). If an even number is followed by a prime number, then the unit digit of the first number is to be multiplied by the unit digit of the second number.

III). If an odd number is followed by an even number, then the first number is subtracted from the second number (ignore negativity).

IV). If an even number is followed by an even number, then both numbers are to be added.

V). If an odd number is followed by an odd number, then the unit digits of both numbers are to be added.

What will be the sum of the resultant of both rows?

18 23 48

25 62 29

- a. 76
- b. 56
- c. 88
- d. 64
- e. 70

7. Questions

What is the value of $Y + 2X$, where X and Y is the resultant of row 1 and 2 respectively?

16 33 21 = X

11 39 64 = Y

- a. 200
- b. 243
- c. 198
- d. 214
- e. 302

8. Questions

What will be the value of X/Y ?

24 29 44 = X

19 30 13 = Y

- a. 20
- b. 23
- c. 45
- d. 36
- e. 41

@QuizByMickey

9. Questions

What will be the difference between the resultant of both rows?

49 27 14

69 35 54

- a. 24
- b. 22
- c. 38
- d. 42
- e. 63

10. Questions

Find the value of X+Y?

14 19 73=X

37 17 40=Y

- a. 160
- b. 337
- c. 248
- d. 174
- e. 163

11. Questions

Read the following information carefully and answer the questions given below

Nine persons- C, D, E, F, G, H, I, J, and K are sitting in a row facing north but not necessarily in the same order. Distance between adjacent persons is a consecutive multiple of “6m” from the left end. The distance between adjacent persons is not more than ‘54m’.

E sits 54m away from D who sits to the right of E. Only one person sits between J and H who sits immediate right of D. G sits 30m away from E. The number of persons sit to the left of G is the same as the number of persons sit to the right of C who sits to the right of J. The number of persons sit between I and J is the same as the number of persons sit between H and K. I sits to the left of K. The distance between K and C is the same as the distance between G and J.

J walks for 10m towards the north then took a right turn of 15m and reach J'. H walks for 12m towards the south and then took a right turn of 51m and reach H'. G walks 30m towards the east and then took a right turn of 6m and reach G'. C walks for 20m towards the south and then took a right turn of 50m and reach C'. F walks for 30m towards the west and then took a right turn of 10m and reach F'.

Who among the following person sits second to the right of H?

- a. E
- b. The one who sits second to the left of C
- c. The one who sits 30m away from J
- d. The one who sits immediate right of F
- e. None of the above

12. Questions

What is the distance between J' and H' in the final arrangement?

- a. 23m
- b. 18m
- c. 22m
- d. 20m
- e. 21m

13. Questions

What is the distance between F and the one who sits immediate right of E?

- a. 90m
- b. 108m
- c. 126m
- d. 132m
- e. 180m

14. Questions

What is the direction of C' with respect to F?

- a. North-east
- b. North-west
- c. South-west
- d. South-east
- e. South

@QuizByMickey

15. Questions

How many people sit between the one who sits immediate left of K and I?

- a. Three

- b. Four
- c. Two
- d. Five
- e. One

16. Questions

Study the following information carefully and answer the given questions

Fifteen persons - A to O are sitting around a pentagonal table in such a way that one person sits at each corner and two persons sit at each side of the table. All of them are facing the centre of the table.

G sits third to the left of A, none of them sit at the corner of the table. I sits adjacent to G but doesn't sit in the middle of the table. Three persons sit between I and M. The number of persons sitting between I and A, when counted from the right of I is **one less than** the number of persons sitting between A and O. L sits second to the right of the one who sits fourth to the left of O. J sits immediate right of E, who does not sit in the middle of the table. J neither sits adjacent to M nor G. More than two persons sit between E and L, when counted from both sides. K sits second to the right of the one who sits third to the left of D. The number of persons sitting between K and L is the same as the number of persons sitting between F and K. F and O are not sitting together. B sits second to the right of H. F and C are not immediate neighbours.

What is the position of the one who sits third to the right of A with respect to the one who sits immediate left of C?

- a. Fifth to the right
- b. Eighth to the right
- c. Seventh to the left
- d. Sixth to the left
- e. Seventh to the right

17. Questions

How many persons sit between M and D, when counted from the right of D?

- a. Two
- b. One
- c. Three
- d. Four
- e. None

@QuizByMickey

18. Questions

**As many persons sit between I and F (when counted from the right of I) as between B and ____
I). H**

II). The one who sits immediate left of C

III). The one who sits third to the right of A

- a. Both I and III
- b. Both I and II
- c. Both II and III
- d. Only I
- e. Only II

19. Questions

If all the persons are arranged in alphabetical order from A in a clockwise direction, then how many persons remain unchanged in their position(Excluding A)?

- a. None
- b. One
- c. Two
- d. Three
- e. More than three

20. Questions

Who among the following person sits third to the left of the one who sits fourth to the right of N?

- a. E
- b. J
- c. The one who sits fourth to the right of B
- d. The one who sits third to the right of H
- e. The one who sits immediate left of A

Explanations:

@QuizByMickey

1. Questions

Codes for Consonants before M

Code Numbers	1	2	3	4	5	6	7	8	9
Letters	B	C	D	F	G	H	J	K	L

Codes for Consonants after M

Code	1	2	3	4	5	6	7	8	9	1	2
Numbers											
Letters	N	P	Q	R	S	T	V	W	X	Y	Z

Code for M is 2

Answer: C

Umbrella -> Condition II and IV applies

Condition II: %mbrell%

Condition III: %mbr2ll%

Finally you can place the code for the remaining letters which do not satisfy any conditions by applying codes from the above table.

Final code of the word -> %**214299**%

Hence, option c is correct

2. Questions

Codes for Consonants before M

Code	1	2	3	4	5	6	7	8	9
Numbers									
Letters	B	C	D	F	G	H	J	K	L

Codes for Consonants after M

Code Numbers	1	2	3	4	5	6	7	8	9	1	2
Letters	N	P	Q	R	S	T	V	W	X	Y	Z

Code for M is 2

Answer: D

Life -> Condition III and IV applies

Condition III: L@Fe

Condition IV: L@F&

Final code: 9@4&

Gives -> Condition I and III applies

Condition I: 4IVE4

Condition III: 4@V@4

Final code: 4@7@4

Stress -> Condition I and III applies

@QuizByMickey

Condition I: 4TRES4

Condition III: 4TR6S4

Final code: 464654

Final code: 9@4& 4@7@4 464654

Hence, option d is correct

3. Questions

Codes for Consonants before M

Code	1	2	3	4	5	6	7	8	9
Numbers									
Letters	B	C	D	F	G	H	J	K	L

Codes for Consonants after M

Code Numbers	1	2	3	4	5	6	7	8	9	1	2
Letters	N	P	Q	R	S	T	V	W	X	Y	Z

Code for M is 2

Answer: E

Information ->Condition III and IV applies

Condition III: INF1RM1TION

Condition IV: &NFIRMIT&&N

Final code: &1414216&&1

Data -> Condition III and IV

Condition III: D@TA

Condition IV: D@T&

Final code: 3@6&

$1+4+1+4+2+1+6+1+3+6=29$

Hence, option e is correct

4. Questions

Codes for Consonants before M

Code	1	2	3	4	5	6	7	8	9
Numbers									
Letters	B	C	D	F	G	H	J	K	L

@QuizByMickey

Codes for Consonants after M

Code Numbers	1	2	3	4	5	6	7	8	9	1	2
Letters	N	P	Q	R	S	T	V	W	X	Y	Z

Code for M is 2

Answer: B

Reflection -> Condition I, III and IV applies

Condition I: 3EFLECTIO2

Condition III: 3@FL@CTIO2

Condition IV: 3@FL@CT&&2

Final Code: 3@49@26&&2

Hence, option b is correct

5. Questions

Codes for Consonants before M

Code Numbers	1	2	3	4	5	6	7	8	9
Letters	B	C	D	F	G	H	J	K	L

Codes for Consonants after M

Code Numbers	1	2	3	4	5	6	7	8	9	1	2
Letters	N	P	Q	R	S	T	V	W	X	Y	Z

Code for M is 2

Answer: E

QUERY ->Condition I and IV applies

Condition I: 2UER9

Condition IV: 2&&R9

Final code: 2&&49

Hence, option e is correct

6. Questions

Answer: C

Row 1

8*3=24 (Rule II)

@QuizByMickey

$$24+48=72 \text{ (Rule IV)}$$

Row 2

$$62-25=37 \text{ (Rule III)}$$

$$7+9=16 \text{ (Rule V)}$$

$$72+16=88$$

7. Questions

Answer: D

Row 1

$$16+33=49 \text{ (Rule I)}$$

$$49+21=70 \text{ (Rule I)}$$

Row 2

$$1+9=10 \text{ (Rule V)}$$

$$10+64=74 \text{ (Rule IV)}$$

$$Y + 2X = 74 + (2 \times 70) = 214$$

8. Questions

Answer: A

Row 1

$$4 \times 9=36 \text{ (Rule II)}$$

$$36+44=80 \text{ (Rule IV)}$$

Row 2

$$30-19=11 \text{ (Rule III)}$$

$$1+3=4 \text{ (Rule V)}$$

$$X/Y=80/4=20$$

9. Questions

Answer: B

Row 1

$$49+27=76 \text{ (Rule I)}$$

$$76+14=90 \text{ (Rule IV)}$$

Row 2

$$9+5=14 \text{ (Rule V)}$$

$$54+14=68 \text{ (Rule IV)}$$

@QuizByMickey

90-68=22

10. Questions

Answer: E

Row 1

$4 \times 9 = 36$ (Rule II)

$73 + 36 = 109 = X$ (Rule I)

Row 2

$7 + 7 = 14$ (Rule V)

$40 + 14 = 54 = Y$ (Rule IV)

$X + Y = 109 + 54 = 163$

11. Questions

Final Arrangement

We have,

- E sits 54m away from D who sits to the right of E.
- Only one person sits between J and H who sits immediate right of D.

@QuizByMickey

From the above condition, there are four possibilities.

Case1

Case2

Case2 a

Case1 a

Again we have,

- G sits 30m away from E.
- The number of persons sit to the left of G is the same as the number of persons sit to the right of C who sits to the right of J.

From the above condition, case2 and case2a get eliminated. Case1a has one more possibility.

Case1

~~Case2~~

Case1 a

~~Case2 a~~

Case1 a (1)

Again we have,

- The number of persons sit between I and J is the same as the number of persons sit between H and K.
- I sit to the left of K.

From the above condition, case1 gets eliminated.

Case1 a

Case1 a(1)

Again we have,

- The distance between K and C is the same as the distance between G and J.

From the above condition, case1a(1) get eliminated. Case1a shows the final arrangement.

Case1 a

~~Case1 a(1)~~

After we have,

- J walks for 10m towards the north then took a right turn of 15m and reach J'.
- H walks for 12m towards the south and then took a right turn of 51m and reach H'.
- G walks for 30m towards the east and then took a right turn of 6m and reach G'.
- C walks for 20m towards the south and then took a right turn of 50m and reach C'.

- F walks for 30m towards the west and then took a right turn of 10m and reach F'.

Based on the above-given information we have the final arrangement as follows.

Answer: D

12. Questions

Final Arrangement

We have,

- E sits 54m away from D who sits to the right of E.
- Only one person sits between J and H who sits immediate right of D.

From the above condition, there are four possibilities.

Case1

Case2

Case2 a

Case1 a

Again we have,

- G sits 30m away from E.
- The number of persons sit to the left of G is the same as the number of persons sit to the right of C who sits to the right of J.

From the above condition, case2 and case2a get eliminated. Case1a has one more possibility.

Case1

~~Case2~~

Case1 a

~~Case2 a~~

Case1 a (1)

Again we have,

- The number of persons sit between I and J is the same as the number of persons sit between H and K.
- I sit to the left of K.

From the above condition, case1 gets eliminated.

Case1 a

Case1 a(1)

Again we have,

- The distance between K and C is the same as the distance between G and J.

From the above condition, case1a(1) get eliminated. Case1a shows the final arrangement.

Case1 a

~~Case1 a(1)~~

After we have,

- J walks for 10m towards the north then took a right turn of 15m and reach J'.
- H walks for 12m towards the south and then took a right turn of 51m and reach H'.
- G walks for 30m towards the east and then took a right turn of 6m and reach G'.
- C walks for 20m towards the south and then took a right turn of 50m and reach C'.

- F walks for 30m towards the west and then took a right turn of 10m and reach F'.

Based on the above-given information we have the final arrangement as follows.

Answer: C

13. Questions

Final Arrangement

We have,

- E sits 54m away from D who sits to the right of E.
- Only one person sits between J and H who sits immediate right of D.

From the above condition, there are four possibilities.

Case1

Case2

Case2 a

Case1 a

Again we have,

- G sits 30m away from E.

Case1 a

Case1 a(1)

Again we have,

- The distance between K and C is the same as the distance between G and J.

From the above condition, case1a(1) get eliminated. Case1a shows the final arrangement.

Case1 a

~~Case1 a(1)~~

After we have,

- J walks for 10m towards the north then took a right turn of 15m and reach J'.
- H walks for 12m towards the south and then took a right turn of 51m and reach H'.
- G walks for 30m towards the east and then took a right turn of 6m and reach G'.
- C walks for 20m towards the south and then took a right turn of 50m and reach C'.

- F walks for 30m towards the west and then took a right turn of 10m and reach F'.

Based on the above-given information we have the final arrangement as follows.

Answer: B

16. Questions

Final Arrangement

We have,

@QuizByMickey

- G sits third to the left of A, none of them sit at the corner of the table.
- I sits adjacent to G but does not sit in the middle of the table.
- Three persons sit between I and M.

From the above condition, there are three possibilities.

Again we have,

- The number of persons sitting between I and A, when counted from the right of I is **one less than** the number of persons sitting between A and O.
- L sits second to the right of the one who sits fourth to the left of O.

From the above condition, there are four possibilities.

Again we have,

- J sits immediate right of E, who does not sit in the middle of the table.
- J neither sits adjacent to M nor G.
- More than two persons sit between E and L, when counted from both sides.

From the above condition, Case-2a gets eliminated.

@QuizByMickey

Again we have,

- K sits second to the right of the one who sits third to the left of D.
- The number of persons sitting between K and L is the same as the number of persons sitting between F and K.
- F and O are not sitting together.

From the above condition, Case-1 gets eliminated.

Again we have,

- B sits second to the right of H.
- F and C are not immediate neighbours.

From the above condition, Case-2 gets eliminated. Case-1a shows the final arrangement.

Answer: D

17. Questions

Final Arrangement

We have,

- G sits third to the left of A, none of them sit at the corner of the table.
- I sits adjacent to G but does not sit in the middle of the table.
- Three persons sit between I and M.

From the above condition, there are three possibilities.

Again we have,

- The number of persons sitting between I and A, when counted from the right of I is **one less than** the number of persons sitting between A and O.
- L sits second to the right of the one who sits fourth to the left of O.

From the above condition, there are four possibilities.

Again we have,

- J sits immediate right of E, who does not sit in the middle of the table.
- J neither sits adjacent to M nor G.
- More than two persons sit between E and L, when counted from both sides.

From the above condition, Case-2a gets eliminated.

@QuizByMickey

Again we have,

- K sits second to the right of the one who sits third to the left of D.
- The number of persons sitting between K and L is the same as the number of persons sitting between F and K.
- F and O are not sitting together.

From the above condition, Case-1 gets eliminated.

Again we have,

- B sits second to the right of H.
- F and C are not immediate neighbours.

From the above condition, Case-2 gets eliminated. Case-1a shows the final arrangement.

Answer: D

18. Questions

Final Arrangement

We have,

- G sits third to the left of A, none of them sit at the corner of the table.
- I sits adjacent to G but does not sit in the middle of the table.
- Three persons sit between I and M.

From the above condition, there are three possibilities.

Again we have,

- The number of persons sitting between I and A, when counted from the right of I is **one less than** the number of persons sitting between A and O.
- L sits second to the right of the one who sits fourth to the left of O.

From the above condition, there are four possibilities.

Again we have,

- J sits immediate right of E, who does not sit in the middle of the table.
- J neither sits adjacent to M nor G.
- More than two persons sit between E and L, when counted from both sides.

From the above condition, Case-2a gets eliminated.

@QuizByMickey

Again we have,

- K sits second to the right of the one who sits third to the left of D.
- The number of persons sitting between K and L is the same as the number of persons sitting between F and K.
- F and O are not sitting together.

From the above condition, Case-1 gets eliminated.

Again we have,

- B sits second to the right of H.
- F and C are not immediate neighbours.

From the above condition, Case-2 gets eliminated. Case-1a shows the final arrangement.

Answer: C

19. Questions

Final Arrangement

We have,

- G sits third to the left of A, none of them sit at the corner of the table.
- I sits adjacent to G but does not sit in the middle of the table.
- Three persons sit between I and M.

From the above condition, there are three possibilities.

Again we have,

- The number of persons sitting between I and A, when counted from the right of I is **one less than** the number of persons sitting between A and O.
- L sits second to the right of the one who sits fourth to the left of O.

From the above condition, there are four possibilities.

Again we have,

- J sits immediate right of E, who does not sit in the middle of the table.
- J neither sits adjacent to M nor G.
- More than two persons sit between E and L, when counted from both sides.

From the above condition, Case-2a gets eliminated.

@QuizByMickey

Again we have,

- K sits second to the right of the one who sits third to the left of D.
- The number of persons sitting between K and L is the same as the number of persons sitting between F and K.
- F and O are not sitting together.

From the above condition, Case-1 gets eliminated.

Again we have,

- B sits second to the right of H.
- F and C are not immediate neighbours.

From the above condition, Case-2 gets eliminated. Case-1a shows the final arrangement.

Answer: A

20. Questions

Final Arrangement

We have,

- G sits third to the left of A, none of them sit at the corner of the table.
- I sits adjacent to G but does not sit in the middle of the table.
- Three persons sit between I and M.

From the above condition, there are three possibilities.

Again we have,

- The number of persons sitting between I and A, when counted from the right of I is **one less than** the number of persons sitting between A and O.
- L sits second to the right of the one who sits fourth to the left of O.

From the above condition, there are four possibilities.

Again we have,

- J sits immediate right of E, who does not sit in the middle of the table.
- J neither sits adjacent to M nor G.
- More than two persons sit between E and L, when counted from both sides.

From the above condition, Case-2a gets eliminated.
