

1. Questions

Study the following information carefully and answer the questions given below.

Input: 7531 9842 6391 3565 1817 6982

Step I: 1357 2489 1369 3556 1178 2689

Step II: 82 114 103 90 96 112

Step III: 114 112 103 96 90 82

Step IV: 36 16 16 225 81 100

Step V: 8 8 18 27 50 75

Step V is the last and final step of the arrangement. Following the same rules as above, determine the steps for the given input.

Input: 6287 1567 3249 1786 8382 1672

Which of the following elements is at the extreme right end in step I?

- a. 2388
- b. 2678
- c. 1267
- d. 1567
- e. 2349

2. Questions

Which of the following elements is third to the left of the second element from the right end in the penultimate step?

- a. 81
- b. 100
- c. 4
- d. 36
- e. 9

@QuizByMickey

3. Questions

What is the difference between the numbers which are second from the left end in step II and fourth from the right end in step III?

- a. 20
- b. 16
- c. 25

d. 10

e. 5

4. Questions

What is the sum of all the even numbers in step V?

a. 121

b. 142

c. 106

d. 163

e. 134

5. Questions

How many elements are present between 81 and 84 in step II and which of the elements are between them?

a. One, 91

b. Three, 111 91 101

c. Two, 84 111

d. Four, 101 111 91 105

e. Three, 111 91 105

6. Questions

Study the following information carefully and answer the given questions.

In a certain code language,

“Rules are defined for perfection” is coded as “\$\$ >> ~~ ^^ @@”

“Violating is the perfection” is coded as “<< @@ == !!”

“Value is defined from characters” is coded as “{{ && ++ !! \$\$”

“Characters are value added” is coded as “++ ^^ ** {{”

(Note: All the given codes are two symbols codes only)

If the phrase “people character” is coded as “[] ++”, then what is the code for the word “value” in the given coded language?

a. !!

b. {{

c. ^^

d. &&

e. **

7. Questions

Which of the following phrase denotes the code “** \$\$” in the given coded language?

a. Defined value

b. From value

c. defined added

d. Added from

e. Are defined

8. Questions

What is the code for the phrase “is violating” in the given coded language?

a. !! ==

b. @@ \$\$

c. << !!

d. \$\$!!

e. Cannot be determined

9. Questions

Which of the following phrases denoted the code “~~ &&” in the given coded language?

a. Rules from

b. Defined for

c. From for

d. Either a or c

e. Either b or c

@QuizByMickey

10. Questions

What is the code for the phrase “added are perfection” in the given coded language?

a. ** ^^ @@

b. {{ @@ \$\$

c. ++ && <<

d. !! ~~ **

e. Can't be determined

11. Questions

Study the following information carefully and answer the given questions.

Twelve persons - A, B, C, D, E, F, I, J, K, L, M and N are sitting in concentric rectangular tables such as one table is inside and another table is outside with six persons in each table. A, B, C, D, E and F are sitting in the outer rectangular table facing centre. I, J, K, L, M and N are sitting in the inner rectangular table facing outside the centre. They all are sitting in such a way that in each rectangular table four persons are sitting in the middle of the sides and two persons are sitting on diagonally opposite corners. Each person in the inner rectangular table sits exactly opposite to the persons in the outer rectangular table.

Note: If two persons face each other means they are sitting at different tables while two persons are opposite to each other means they are sitting at the same table.

Three persons sit between C and A, who doesn't sit at the corner. L faces A and sits second to the right of N who sits in the inner table. The one who faces N sits third to the left of D. The number of persons sitting between C and A is **one more than** the number of persons sitting between L and K, when counted from the left of both C and L. K sits opposite to M, who sits to the immediate left of the one who faces E. As many persons sit between E and A as between N and I, when counted from the left of both E and N. J faces E. B sits neither adjacent to C nor at the corner of the table.

What is the position of E with respect to A according to the final arrangement?

- a. Immediate right
- b. Second to the left
- c. Second to the right
- d. Third to the left
- e. Immediate left

12. Questions

The number of persons sitting between ____ and ____ is one more than the number of persons sitting between ____ and ____, when counted from the left of both ____ and ____ respectively.

- a. D, E, M, L, D, M
- b. F, C, N, I, C, I
- c. D, F, L, I, F, I
- d. A, B, J, L, A, J
- e. J, K, B, D, J, B

@QuizByMickey

13. Questions

Who among the following persons sits third to the right of I as per the final arrangement?

- a. The one who faces C

- b. The one who sits to the immediate left of L
- c. The one who sits third to the left of J
- d. The one who sits to the immediate left of N
- e. The one who sits opposite to K

14. Questions

If 'F' is related to 'K' and 'A' is related to 'L' in a certain way, then in the same way, 'B' is related to who among the following persons?

- a. The one who sits to the immediate left of K
- b. The one who sits second to the right of L
- c. The one who sits third to the left of J
- d. The one who sits third to the left of L
- e. The one who sits to the immediate right of N

15. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- I). Two persons sit between J and L.
 - II). B sits third to the right of F, who faces M.
 - III). N sits opposite to I, who faces D.
- a. Only I and II
 - b. Only II
 - c. All I, II and III
 - d. Only I
 - e. Only I and III

16. Questions

Study the following information carefully and answer the questions given.

Ten persons – P, Q, R, S, T, U, V, W, X and Y won the competition one after another. It is assumed that no other persons won the competition other than the given persons.

Q won five persons before S, who won immediately before U. As many persons won after S as before W. Only two persons won between W and T. The number of persons won before T is **one more than** the number of persons won after X. Five persons won between R and X. Neither X nor T won adjacent to Y. Only one person won between V and P, who won before V.

As many persons won between ____ and ____ as after ____ respectively.

- a. Y, P, V
- b. V, W, S
- c. Q, T, R
- d. S, P, Q
- e. U, Y, V

17. Questions

Who among the following persons won before Q according to the final arrangement?

- I). The one who won immediately before P
 - II). The one who won two persons after V
 - III). The one who won five persons before X
 - IV). The one who won immediately after W
- a. Only I and IV
 - b. Only I and II
 - c. Only III and IV
 - d. Only II and III
 - e. Only I and III

18. Questions

If all the persons are arranged in alphabetical order from first to last, then who among the following persons remain unchanged in their position?

- a. P
- b. T
- c. No one
- d. W
- e. U

@QuizByMickey

19. Questions

Who among the following person won six persons after the one who won immediately before Y?

- a. The one who won two persons after R
- b. The one who won immediately before T
- c. The one who won five persons after R
- d. The one who won three persons before U

e. The one who won four persons after Q

20. Questions

Which of the following statement(s) is/are TRUE with respect to the one who won immediately before U?

- a. Only one person won before the one who won immediately before U
- b. The one who won immediately before U won two persons after P
- c. No one won between the one who won immediately before U and Q
- d. Only three persons won between the one who won immediately before U and T
- e. R won after the one who won immediately before U

Explanations:

1. Questions

Input: 6287 1567 3249 1786 8382 1672

Step I: The digits are arranged in ascending order within the number.

Step I: 2678 1567 2349 1678 2388 1267

Step II: The sum of the first and the last digits followed by the difference between the second and the third digits.

Step II: 101 81 111 91 105 84

Step III: The numbers are arranged in descending order from left to right.

Step III: 111 105 101 91 84 81

Step IV: The square of the sum of all the digits.

Step IV: 9 36 4 100 144 81

Step V: Even numbers are divided by 2 and the odd numbers are divided by 3 and arranged in ascending order from left to right.

Step V: 2 3 18 27 50 72

Answer: C

Input: 2687 1567 3249 1783 8382 1672

Step I: 2678 1567 2349 1678 2388 1267

1267 is at the extreme right end in step I.

2. Questions

Input: 6287 1567 3249 1786 8382 1672

@QuizByMickey

Step I: The digits are arranged in ascending order within the number.

Step I: 2678 1567 2349 1678 2388 1267

Step II: The sum of the first and the last digits followed by the difference between the second and the third digits.

Step II: 101 81 111 91 105 84

Step III: The numbers are arranged in descending order from left to right.

Step III: 111 105 101 91 84 81

Step IV: The square of the sum of all the digits.

Step IV: 9 36 4 100 144 81

Step V: Even numbers are divided by 2 and the odd numbers are divided by 3 and arranged in ascending order from left to right.

Step V: 2 3 18 27 50 72

Answer: D

Step IV: 9 36 4 100 144 81

36 is the third to the left of the second element from the right end in the penultimate step.

3. Questions

Input: 6287 1567 3249 1786 8382 1672

Step I: The digits are arranged in ascending order within the number.

Step I: 2678 1567 2349 1678 2388 1267

Step II: The sum of the first and the last digits followed by the difference between the second and the third digits.

Step II: 101 81 111 91 105 84

Step III: The numbers are arranged in descending order from left to right.

Step III: 111 105 101 91 84 81

Step IV: The square of the sum of all the digits.

Step IV: 9 36 4 100 144 81

Step V: Even numbers are divided by 2 and the odd numbers are divided by 3 and arranged in ascending order from left to right.

Step V: 2 3 18 27 50 72

Answer: A

Step II: 101 81 111 91 105 84

Step III: 111 105 101 91 84 81

@QuizByMickey

Difference=101-81=20

4. Questions

Input: 6287 1567 3249 1786 8382 1672

Step I: The digits are arranged in ascending order within the number.

Step I: 2678 1567 2349 1678 2388 1267

Step II: The sum of the first and the last digits followed by the difference between the second and the third digits.

Step II: 101 81 111 91 105 84

Step III: The numbers are arranged in descending order from left to right.

Step III: 111 105 101 91 84 81

Step IV: The square of the sum of all the digits.

Step IV: 9 36 4 100 144 81

Step V: Even numbers are divided by 2 and the odd numbers are divided by 3 and arranged in ascending order from left to right.

Step V: 2 3 18 27 50 72

Answer: B

Step V: 2 3 18 27 50 72

Sum of all the even numbers=2+18+50+72=142

5. Questions

Input: 6287 1567 3249 1786 8382 1672

Step I: The digits are arranged in ascending order within the number.

Step I: 2678 1567 2349 1678 2388 1267

Step II: The sum of the first and the last digits followed by the difference between the second and the third digits.

Step II: 101 81 111 91 105 84

Step III: The numbers are arranged in descending order from left to right.

Step III: 111 105 101 91 84 81

Step IV: The square of the sum of all the digits.

Step IV: 9 36 4 100 144 81

Step V: Even numbers are divided by 2 and the odd numbers are divided by 3 and arranged in ascending order from left to right.

Step V: 2 3 18 27 50 72

Answer: A

11. Questions

@QuizByMickey

Final arrangement:

We have,

- Three persons sit between C and A, who doesn't sit at the corner.
- L faces A and sits second to the right of N who sits in the inner table.

From the above conditions, there are three possibilities.

Again, we have,

@QuizByMickey

- The one who faces N sits third to the left of D.
- The number of persons sitting between C and A is **one more than** the number of persons sitting between L and K, when counted from the left of both C and L.
- K sits opposite to M, who sits to the immediate left of the one who faces E.

From the above conditions, case-2 gets eliminated because K sits opposite to M, who sits to the immediate left of the one who faces E, which is not satisfied.

Again, we have,

- As many persons sit between E and A as between N and I, when counted from the left of both E and N.
- J faces E.
- B sits neither adjacent to C nor at the corner of the table.

From the above conditions, case-3 gets eliminated because B sits neither adjacent to C nor at the corner of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D

12. Questions

Final arrangement:

We have,

- Three persons sit between C and A, who doesn't sit at the corner.
- L faces A and sits second to the right of N who sits in the inner table.

From the above conditions, there are three possibilities.

Again, we have,

- The one who faces N sits third to the left of D.
- The number of persons sitting between C and A is **one more than** the number of persons sitting between L and K, when counted from the left of both C and L.
- K sits opposite to M, who sits to the immediate left of the one who faces E.

@QuizByMickey

From the above conditions, case-2 gets eliminated because K sits opposite to M, who sits to the immediate left of the one who faces E, which is not satisfied.

Again, we have,

- As many persons sit between E and A as between N and I, when counted from the left of both E and N.
- J faces E.
- B sits neither adjacent to C nor at the corner of the table.

From the above conditions, case-3 gets eliminated because B sits neither adjacent to C nor at the corner of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

13. Questions

Final arrangement:

We have,

- Three persons sit between C and A, who doesn't sit at the corner.
- L faces A and sits second to the right of N who sits in the inner table.

From the above conditions, there are three possibilities.

Again, we have,

- The one who faces N sits third to the left of D.
- The number of persons sitting between C and A is **one more than** the number of persons sitting between L and K, when counted from the left of both C and L.
- K sits opposite to M, who sits to the immediate left of the one who faces E.

@QuizByMickey

From the above conditions, case-2 gets eliminated because K sits opposite to M, who sits to the immediate left of the one who faces E, which is not satisfied.

Again, we have,

- As many persons sit between E and A as between N and I, when counted from the left of both E and N.
- J faces E.
- B sits neither adjacent to C nor at the corner of the table.

From the above conditions, case-3 gets eliminated because B sits neither adjacent to C nor at the corner of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: A

14. Questions

Final arrangement:

We have,

- Three persons sit between C and A, who doesn't sit at the corner.
- L faces A and sits second to the right of N who sits in the inner table.

From the above conditions, there are three possibilities.

Again, we have,

- The one who faces N sits third to the left of D.
- The number of persons sitting between C and A is **one more than** the number of persons sitting between L and K, when counted from the left of both C and L.
- K sits opposite to M, who sits to the immediate left of the one who faces E.

@QuizByMickey

From the above conditions, case-2 gets eliminated because K sits opposite to M, who sits to the immediate left of the one who faces E, which is not satisfied.

Again, we have,

- As many persons sit between E and A as between N and I, when counted from the left of both E and N.
- J faces E.
- B sits neither adjacent to C nor at the corner of the table.

From the above conditions, case-3 gets eliminated because B sits neither adjacent to C nor at the corner of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: B

15. Questions

Final arrangement:

We have,

- Three persons sit between C and A, who doesn't sit at the corner.
- L faces A and sits second to the right of N who sits in the inner table.

From the above conditions, there are three possibilities.

Again, we have,

- The one who faces N sits third to the left of D.
- The number of persons sitting between C and A is **one more than** the number of persons sitting between L and K, when counted from the left of both C and L.
- K sits opposite to M, who sits to the immediate left of the one who faces E.

@QuizByMickey

From the above conditions, case-2 gets eliminated because K sits opposite to M, who sits to the immediate left of the one who faces E, which is not satisfied.

Again, we have,

- As many persons sit between E and A as between N and I, when counted from the left of both E and N.
- J faces E.
- B sits neither adjacent to C nor at the corner of the table.

From the above conditions, case-3 gets eliminated because B sits neither adjacent to C nor at the corner of the table, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: E

16. Questions

Final arrangement:

Persons
R
W
Y
Q
T
P
X
V
S
U

We have,

- Q won five persons before S, who won immediately before U.
- As many persons won after S as before W.

From the above conditions, there are three possibilities

@QuizByMickey

Case 1	Case 2	Case 3
Persons	Persons	Persons
Q		
	Q	W
	W	Q
W		
S		
U	S	
	U	
		S
		U

Again, we have,

- Only two persons won between W and T.
- The number of persons won before T is **one more than** the number of persons won after X.
- Five persons won between R and X.

From the above conditions, case-2 gets eliminated because the number of persons won before T is **one more than** the number of persons won after X, which is not satisfied.

And also, case-1 splits into case-1a.

@QuizByMickey

Case 1	Case 2	Case 3	Case 1a
Persons	Persons	Persons	Persons
Q	T	R	Q
	Q	W	T
X	W	Q	R
W		T	W

W		T	W
S			S
U	S	X	U
T	U		
		S	
R		U	X

Again, we have,

- Neither X nor T won adjacent to Y.
- Only one person won between V and P, who won before V.

From the above conditions case-1 and case-1a get eliminated because only one person won between V and P, who won before V, which is not satisfied.

Hence case-3 shows the final arrangement.

@QuizByMickey

Case 1	Case 3	Case 1a
Persons	Persons	Persons
Q	R	Q
Y	W	T
	Y	
X	Q	R
W	T	W
S	P	S
U	X	U
T	V	Y
	S	
R	U	X

Answer: E

20. Questions

Final arrangement:

@QuizByMickey

Persons
R
W
Y
Q
T
P
X
V
S
U

We have,

- Q won five persons before S, who won immediately before U.
- As many persons won after S as before W.

From the above conditions, there are three possibilities

@QuizByMickey

Case 1	Case 2	Case 3
Persons	Persons	Persons
Q		
	Q	W
	W	Q
W		
S		
U	S	
	U	
		S
		U

Again, we have,

- Only two persons won between W and T.
- The number of persons won before T is **one more than** the number of persons won after X.
- Five persons won between R and X.

From the above conditions, case-2 gets eliminated because the number of persons won before T is **one more than** the number of persons won after X, which is not satisfied.

And also, case-1 splits into case-1a.

@QuizByMickey

Case 1	Case 2	Case 3	Case 1a
Persons	Persons	Persons	Persons
Q	T	R	Q
	Q	W	T
X	W	Q	R
W		T	W
S			S
U	S	X	U
T	U		
		S	
R		U	X

Again, we have,

- Neither X nor T won adjacent to Y.
- Only one person won between V and P, who won before V.

From the above conditions case-1 and case-1a get eliminated because only one person won between V and P, who won before V, which is not satisfied.

Hence case-3 shows the final arrangement.
