

1. Questions

Each of the questions below consists of a question and three statements numbered I, II and III given below it. You have to decide whether the data provided in the statements are sufficient to answer the question. Read all the statements and give an answer.

Seven persons – A, B, C, D, E, F and G are sitting in a linear row and all are facing north. Who among the following person sits third to the left of C?

Statement I: E sits second from the left end of the row. F sits third to the right of B, who does not sit adjacent to E. G sits immediate right of C.

Statement II: As many persons sit to the left of D as to the right of F. B sits three places away from D. C sits second to the left of F. A sits to the right of E.

Statement III: A sits fourth to the left of F. E sits immediate left of A. One person sits between E and B. D sits to the left of G, who sits to the left of F.

- If the data given in statement I alone is sufficient to answer the question, while the data in statements II and III are not sufficient to answer the question.
- If the data given in statement II alone is sufficient to answer the question, while the data in statement I and III are not sufficient to answer the question.
- If the data given in statement III alone is sufficient to answer the question, while the data in statement I and II are not sufficient to answer the question.
- If the data given in either statement I alone is sufficient to answer the question or the data in both statement II and III together are sufficient to answer the question.
- If the data given in all the statements together are sufficient to answer the question.

2. Questions

Six persons– P, Q, R, S, T and U live on six different floors of a six storeyed building where the lowermost floor is numbered one, the one above that is numbered two and so on till the topmost floor is numbered six. Only one person lives on each floor. Who among the following person lives exactly between Q and U?

Statement I: R lives two floors above S. As many floors above R as below P. T lives immediately below P.

Statement II: Three persons live between Q and P. S lives two floors above T. U lives above R, but not immediately above R.

Statement III: Two floors between S and P. Q lives on an odd numbered floor. R lives three floors below U, who doesn't live adjacent to Q.

- If the data given in statement II alone is sufficient to answer the question, while the data in statement I and III are not sufficient to answer the question.
- If the data given in statement I alone is sufficient to answer the question, while the data in statement II and III are not sufficient to answer the question.
- If the data given in both statements I and statement II together are necessary to answer the question.

- d. If the data given in statement III alone is sufficient to answer the question, while the data in statement I and II are not sufficient to answer the question.
- e. If the data given in all the statements together are not sufficient to answer the question.

3. Questions

Seven persons - I, J, K, L, M, N and O have different numbers of pens. Who among the following person has the third highest number of pens?

Statement I: K has more pens than both N and O. Only two persons have less pens than M. I has less pens than O. J has more pens than I.

Statement II: L has less pens than K but has more pens than O. N has more pens than I. J has less pens than at least three persons.

Statement III: Neither N nor O has the second lowest number of pens. L has more pens than M but less pens than N. K has more pens than I.

- a. If the data given in statement III alone is sufficient to answer the question, while the data in statement I and II are not sufficient to answer the question.
- b. If the data given in statement I alone is sufficient to answer the question, while the data in statement II and III are not sufficient to answer the question.
- c. If the data given in either statement I alone or II alone is sufficient to answer the questions, while the data in statement III is not sufficient to answer the question.
- d. If the data given in statement II alone is sufficient to answer the question, while the data in statement I and III are not sufficient to answer the question.
- e. If the data given in all the statements together are sufficient to answer the question.

4. Questions

Seven people – A, B, C, D, E, F and H went to the movies on seven different days of the same week starting from Monday to Sunday. Only one person went to the movie each day. Who among the following persons went two persons after D?

Statement I: F went before Wednesday. Two persons went between F and B. The number of persons went between B and H is one more than the number of persons went after A. C went three persons before A.

Statement II: D went two persons before the one who went immediately before C. Three persons went between D and B. A went immediately after E.

Statement III: H went after A. The one who went three persons after H did not went on Thursday. As many persons went before F as after E. B went two persons before A. C went after F.

- a. If the data given in either statement I alone or II alone is sufficient to answer the question, while the data in statement III is not sufficient to answer the question.
- b. If the data given in either statement II alone or III alone is sufficient to answer the question, while the data in statement I is not sufficient to answer the question.

- c. If the data given in both statements I and II together are necessary to answer the question.
- d. If the data given in both statements I and III together are necessary to answer the question.
- e. If the data given in both statements II and III together are necessary to answer the question.

5. Questions

Six persons - U, V, W, X, Y and Z are sitting around a circular table facing the centre with equal distance between adjacent persons. Who among the following person sits opposite to Y?

Statement I: Only one person sits between X and Z. W sits second to the left of V. U, neither sits adjacent to V nor sits opposite to Z.

Statement II: Three persons sit between V and U. Both X and W sit adjacent to each other. Y sits opposite to the one who sits immediate left of X.

Statement III: Y sits immediate right of W. As many persons sit between Z and V as between X and U, when counted from the left of both X and Z.

- a. If the data given in either the both statements I and III are sufficient to answer the question or the data in both statements II and III are sufficient to answer the question.
- b. If the data given in statement II alone is sufficient to answer the question, while the data in statement I and III are not sufficient to answer the question.
- c. If the data given in statement III alone is sufficient to answer the question, while the data in statement I and II are not sufficient to answer the question.
- d. If the data given in all the statements together are not sufficient to answer the question.
- e. If the data given in all the statements together are sufficient to answer the question.

6. Questions

Study the following information carefully and answer the given questions.

A certain number of persons were sitting in the linear row facing north and they wore different brands of shoes.

Note : Not more than twenty-one persons sit in a row.

V sits at one of the extreme ends and sits adjacent to the one who wore Bata. Only two persons sit between B and the one who wore Bata. B sits adjacent to S, who sits third to the left of X. As many persons sit between V and S is one more than the persons sit between X and A. The one who wore crocs sits to the immediate right of A. Only three persons sit between the one who wore crocs and F, who doesn't sit adjacent to X. The one who wore puma sits eleven places away to the left of F. The one who wore Nike sits second to the right of the one who wore puma. The number of persons sitting between the one who wore Nike and V is **one more than** the number of persons sitting to the right of the one who wore Lotto. The one who wore Lotto sits exactly between the one who wore Fila and F. As many persons sit between B and S as to the right of the one who wore Fila.

How many persons sit between the one who wore Nike and the one who wore Lotto?

- a. As many persons sit between V and the one who wore crocs
- b. One more than the number of persons sitting to the right of A
- c. As many persons sit between S and the one who wore Bata
- d. Two less than the number of persons sitting to the left of X
- e. As many persons sit between F and the one who wore Fila

7. Questions

If F moves two positions to the left , then what is the position of X with respect to F?

- a. Fifth to the left
- b. Second to the left
- c. Immediate left
- d. Sixth to the left
- e. Third to the left

8. Questions

How many persons sit in a row?

- a. Fifteen
- b. Sixteen
- c. One more than the number of persons sitting to the right of V
- d. Two more than the number of persons sitting to the right of F
- e. Nineteen

9. Questions

Who among the following person sits fifth to the right of the one who sits second to the right of the one who wore Puma?

- a. The one who sits third to the right of F
- b. The one who sits second to the left of the one who wore Nike
- c. The one who sits at the extreme right end
- d. The one who sits immediate right of A
- e. The one who sits fifth to the right of the one wore Bata

10. Questions

Which of the following statement(s) is / are not true according to the final arrangement?

- a. V and the one who wore Puma sits adjacent to the one who wore Bata

- b. Only one person sits between the one who wore Nike and X
- c. A sits fifth to the left of F
- d. V and the one who wore Fila sits at the extreme end.
- e. The one who wore crocs and Fila are immediate neighbours.

11. Questions

Study the following information carefully and answer the given questions

“Cheetah Kangaroo Africa Reality” is coded as “G9# I22@ O13@ M15&”

“Genuine Location Doctrine Elegant” is coded as “D24# U9& H6@ H20#”

“Marriage Examine Finance Conceive” is coded as “Y14# O22@ S18@ O26#”

“Beginning Bamboo Draft Emphasize” is coded as “I8# C14@ S9& O13\$”

What is the code for the phrase “Frequent Learning Purposed” in the given code language?

- a. R6# O13# Q9#
- b. V7@ N13# Q10#
- c. R6# O12# O9#
- d. V6@ G13\$ Q7&
- e. D8# O9@ T8@

12. Questions

What is the phrase for the code “T9# S9& Q14&” in the given code language?

- a. Keyboard Radical Library
- b. Workshop Certain Complex
- c. Brilliant Lifestyle Scale
- d. Skillful Duty Method
- e. Target Sunset Advisor

@QuizByMickey

13. Questions

Which of the following options is correctly matched?

- a. Aspects Magnetic - Q22# H20&
- b. Displace Failure - R15& G15&
- c. Paragraph Brief - S9\$ C18&
- d. Alphabet Mystery - I11# S7#
- e. Upgrade Natural - F9& V20#

14. Questions

What is the code for the phrase “Separate Behaviour Choice Group” in the given code language?

- a. E12@ U19& D12# H12&
- b. Q18# Y20@ K12# H12&
- c. Q9\$ I19& D12# O12&
- d. Q9@ I19& D12# H12&
- e. R18# I19& D14# L15&

15. Questions

What is the phrase for the code “Q15# M22#” in the given code language?

- a. Regular College
- b. Obedient Student
- c. License Website
- d. Mixture Farewell
- e. Discipline Knowledge

16. Questions

Study the following information carefully and answer the given questions

If one is added to the even digits and two is subtracted from the odd digits and then the repeated digits are dropped, then add the remaining digits. Now, the resultant of which of the following numbers is an even number?

- a. 7832645709
- b. 3746598375
- c. 6582954738
- d. 8467285374
- e. 4364957625

@QuizByMickey

17. Questions

If in each word, the place value of the letter (as per the alphabetical order) is odd, then that letter is changed to the second succeeding letter (as per the alphabetical order) and the remaining letters are changed to the immediate preceding letter (as per the alphabetical order), then which of the following option will have more than five vowels after the rearrangement?

I). HEART, CROWN, FIGHT, CHAIR

II). DREAM, WORLD, IMAGINE, FRAMES

III). ACTORS, ARROW, BREAKS, FASTER

IV). IGNORE, VIBES, NORMAL, LAUNCH

- a. Only II and III
- b. Only II and IV
- c. Only III and IV
- d. Only II, III and IV
- e. All I, II, III and IV

18. Questions

In which of the following words, the pairs of letters in the given words, each of which has as many letters between them (both forward and backward directions) as in the alphabetical series is a composite number?

I). ACCOMPLISHED

II). MATHEMATICS

III). HEADQUARTERS

- a. Only I
- b. Only I and II
- c. Only I and III
- d. Only II and III
- e. All I, II and III

19. Questions

If in each number, add all the odd digits then add all the even digits within the number, then subtract their resultant values (ignore negative values). Now, add all the resultant values of each row, then in which of the following options the final resultant thus formed will be a prime number?

I). 2536, 7392, 9526, 6853

II). 6434, 8437, 5683, 7542

III). 7634, 8543, 9542, 4365

IV). 9628, 5762, 8139, 4926

- a. Only I, II and IV
- b. Only I, III and IV
- c. Only I and IV
- d. Only IV

@QuizByMickey

e. All I, II, III and IV

20. Questions

If in each word, the consonants are changed to the previous letter and the vowels are changed to the third succeeding letter as per the English alphabetical series, then all the letters of the word are arranged in alphabetical order from left to right, then which of the following word contains the highest number of consonants as per the english alphabetical series between third letter from the left end and fourth letter from the right end of the word?

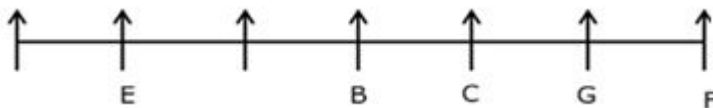

- a. MISCONSTRUE
- b. HYPOTHETIC
- c. ISOLATION
- d. MEASUREMENT
- e. OPERATION

Explanations:

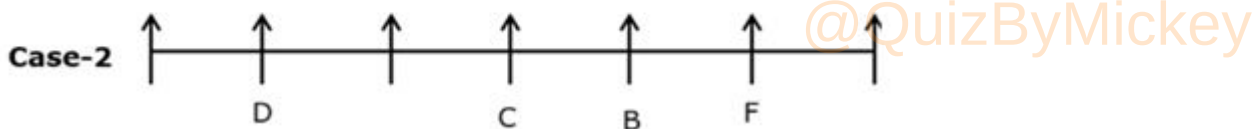

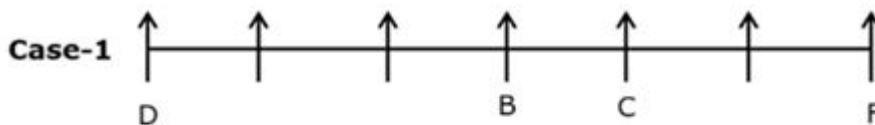

1. Questions

Answer: D

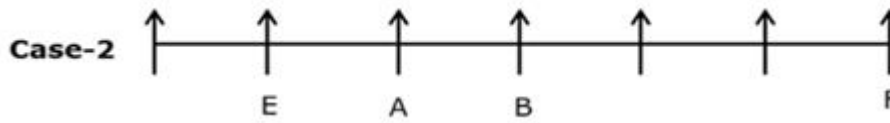

Statement I:

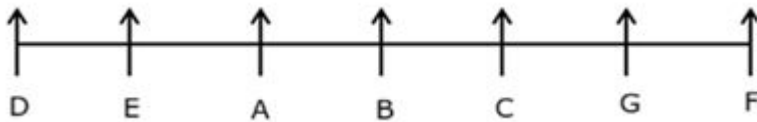

Statement II:

Statement III:

By combine statement II and III, we get

2. Questions

Answer: B

Statement I:

Floors	Persons
6	Q/U
5	R
4	Q/U
3	S
2	P
1	T

Statement II:

@QuizByMickey

	Case-1	Case-2
Floors	Persons	Persons
6	Q/P	U
5	S	Q/P
4	U	S
3	T	R
2	Q/P	T
1	R	Q/P

Statement III:

	Case-1	Case-2	Case-3
Floors	Persons	Persons	Persons
6	S/P	T	U
5	U	U	S/P
4	T	S/P	T
3	S/P	Q	R
2	R	R	P/S
1	Q	S/P	Q

3. Questions

Answer: E

By combining all the three statements, we get

$K > N > L > O > M > J > I$

4. Questions

Answer: C

Statement I:

@QuizByMickey

Days	Case-1	Case-2
	Persons	Persons
Monday		F
Tuesday	F	
Wednesday	H	C
Thursday	C	B
Friday	B	
Saturday		A
Sunday	A	H

Statement II:

Days	Case-1	Case-2	Case-3
	Persons	Persons	Persons
Monday	D		
Tuesday		D	
Wednesday		E	D
Thursday	C	A	
Friday	B	C	
Saturday		B	C
Sunday			B

@QuizByMickey

But we combine both the statement I and II, we get

Days	Persons
Monday	D
Tuesday	F
Wednesday	H
Thursday	C
Friday	B
Saturday	E
Sunday	A

Statement III:

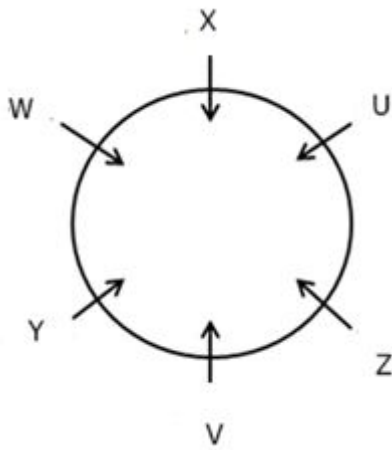

Days	Persons
Monday	B
Tuesday	E/F
Wednesday	A
Thursday	H
Friday	C/D
Saturday	F/E
Sunday	D/C

5. Questions

Answer: A

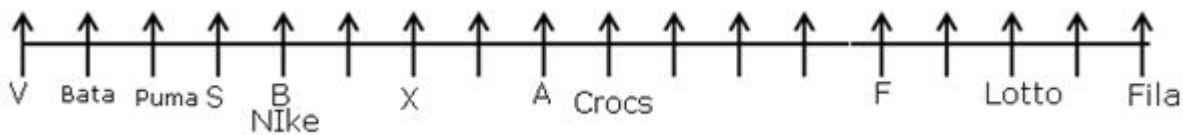

By combining statement I and III and also combining statement II and III , we get

@QuizByMickey

6. Questions

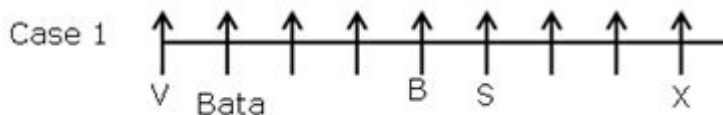

Final arrangement:

We have,

- V sits at one of the extreme ends and adjacent to the one who wore Bata.
- Only two persons sit between B and the one who wore Bata.
- B sits adjacent to S, who sits third to the left of X.

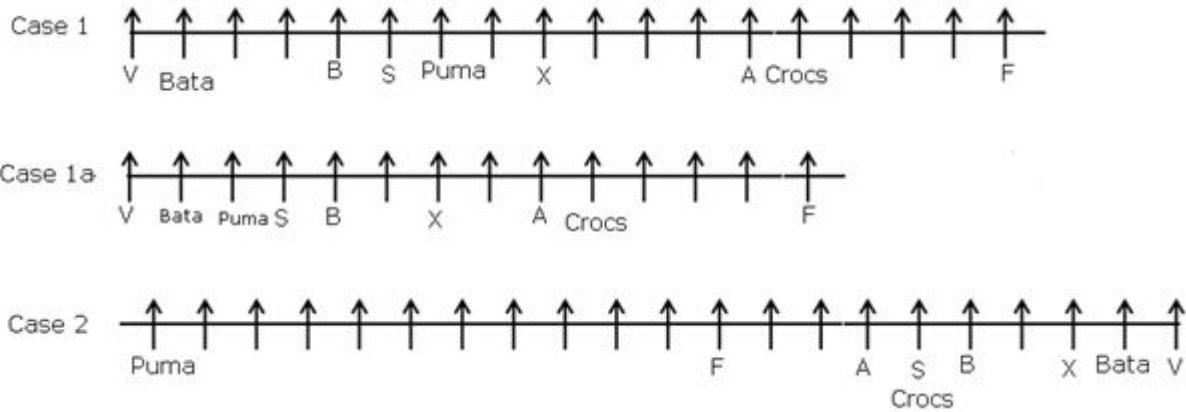

From the above conditions, there are three possibilities

@QuizByMickey

Again we have,

- As many persons sit between V and S is one more than the persons sit between X and A.
- The one who wore crocs sits immediate right of A.
- Only three persons sit between the one who wore crocs and F, who doesn't sit adjacent to X.
- The one who wore puma sits eleven places away to the left of F.

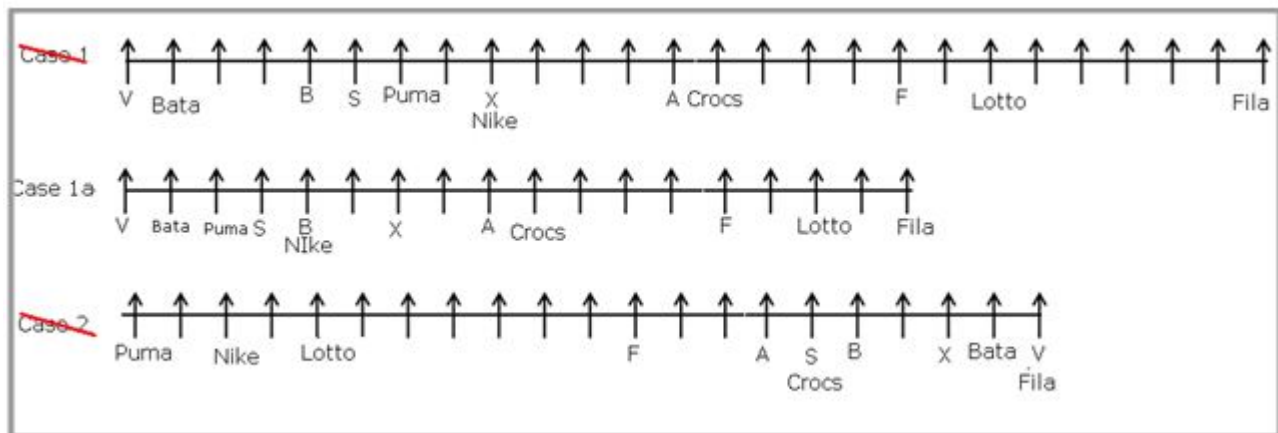

Again we have,

- The one who wore Nike sits second to the right of the one who wore puma.
- The number of persons sitting between the one who wore Nike and V is one more than the number of persons sitting to the right of the one who wore Lotto.
- The one who wore Lotto sits exactly between the one who wore Fila and F.
- As many persons sit between B and S as to the right of the one who wore Fila.

From the above conditions, case-1 gets eliminated because not more than twenty-one people sit in a row, which is not satisfied and Case-2 gets eliminated because the one who wore Lotto sits exactly between the one who wore Fila and F, which is not satisfied. .

Hence, case-1a shows the final arrangement.

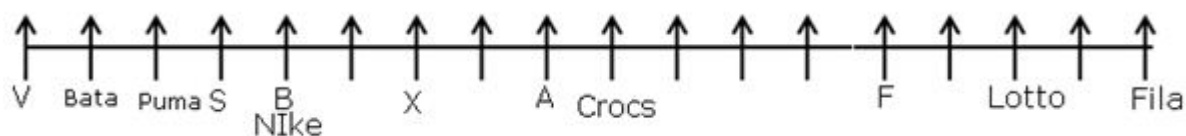

Answer: B

7. Questions

Final arrangement:

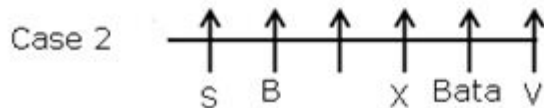

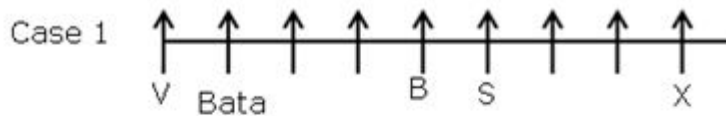

@QuizByMickey

We have,

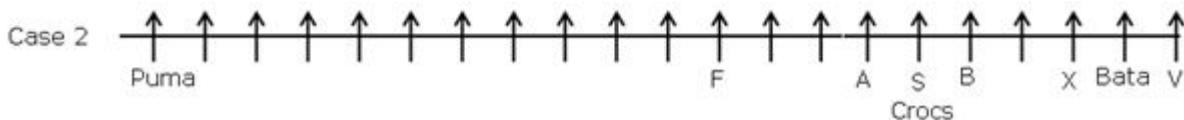

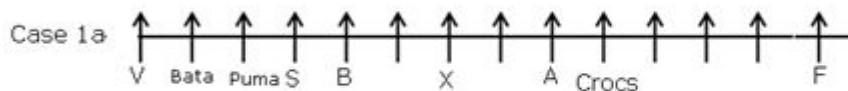

- V sits at one of the extreme ends and adjacent to the one who wore Bata.
- Only two persons sit between B and the one who wore Bata.
- B sits adjacent to S, who sits third to the left of X.

From the above conditions, there are three possibilities

Again we have,

- As many persons sit between V and S is one more than the persons sit between X and A.
- The one who wore crocs sits immediate right of A.
- Only three persons sit between the one who wore crocs and F, who doesn't sit adjacent to X.
- The one who wore puma sits eleven places away to the left of F.

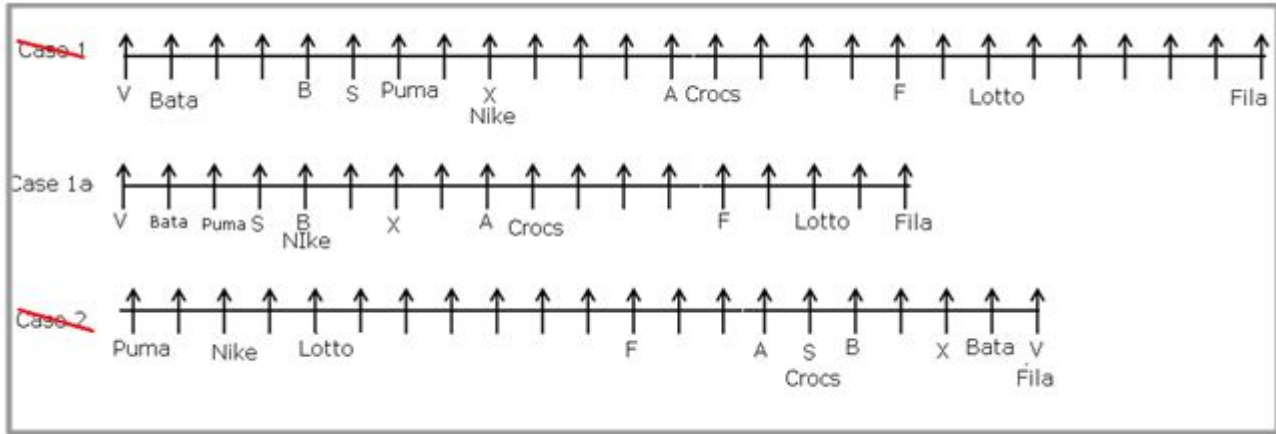

Again we have,

- The one who wore Nike sits second to the right of the one who wore puma.
- The number of persons sitting between the one who wore Nike and V is one more than the number of persons sitting to the right of the one who wore Lotto.
- The one who wore Lotto sits exactly between the one who wore Fila and F.
- As many persons sit between B and S as to the right of the one who wore Fila.

From the above conditions, case-1 gets eliminated because not more than twenty-one people sit in a row, which is not satisfied and Case-2 gets eliminated because the one who wore Lotto sits exactly between the one who wore Fila and F, which is not satisfied. .

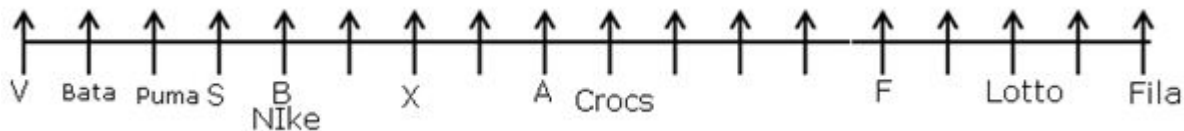

Hence, case-1a shows the final arrangement.

Answer: A

8. Questions

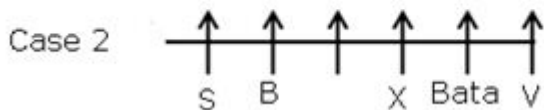

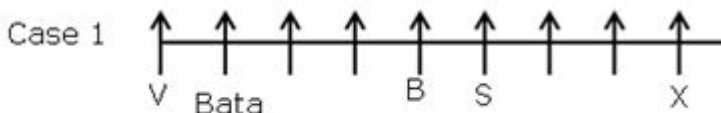

Final arrangement:

We have,

- V sits at one of the extreme ends and adjacent to the one who wore Bata.
- Only two persons sit between B and the one who wore Bata.
- B sits adjacent to S, who sits third to the left of X.

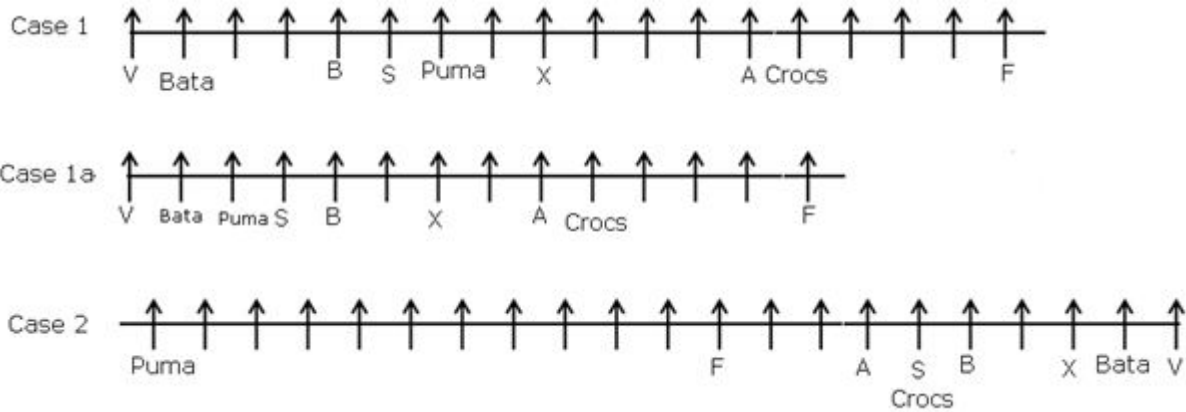

From the above conditions, there are three possibilities

@QuizByMickey

Again we have,

- As many persons sit between V and S is one more than the persons sit between X and A.
- The one who wore crocs sits immediate right of A.
- Only three persons sit between the one who wore crocs and F, who doesn't sit adjacent to X.
- The one who wore puma sits eleven places away to the left of F.

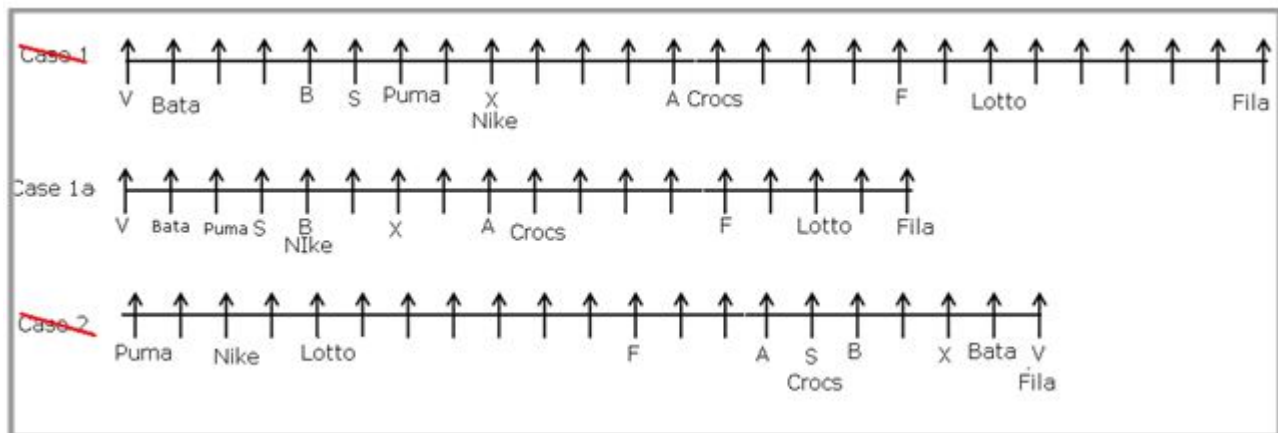

Again we have,

- The one who wore Nike sits second to the right of the one who wore puma.
- The number of persons sitting between the one who wore Nike and V is one more than the number of persons sitting to the right of the one who wore Lotto.
- The one who wore Lotto sits exactly between the one who wore Fila and F.
- As many persons sit between B and S as to the right of the one who wore Fila.

From the above conditions, case-1 gets eliminated because not more than twenty-one people sit in a row, which is not satisfied and Case-2 gets eliminated because the one who wore Lotto sits exactly between the one who wore Fila and F, which is not satisfied. .

Hence, case-1a shows the final arrangement.

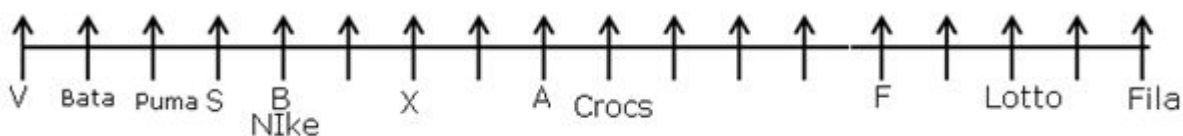

Answer: C

9. Questions

Final arrangement:

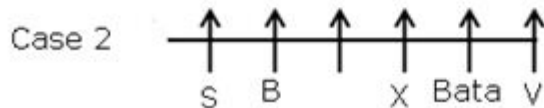

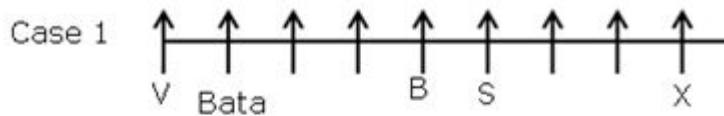

@QuizByMickey

We have,

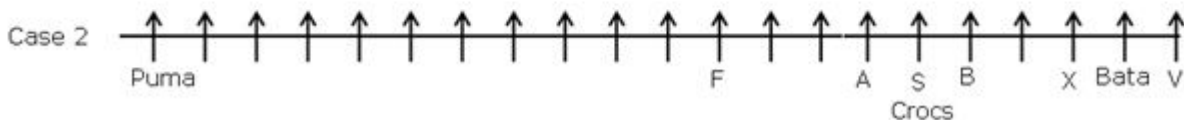

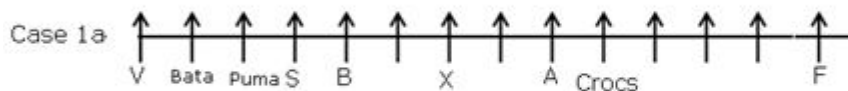

- V sits at one of the extreme ends and adjacent to the one who wore Bata.
- Only two persons sit between B and the one who wore Bata.
- B sits adjacent to S, who sits third to the left of X.

From the above conditions, there are three possibilities

Again we have,

- As many persons sit between V and S is one more than the persons sit between X and A.
- The one who wore crocs sits immediate right of A.
- Only three persons sit between the one who wore crocs and F, who doesn't sit adjacent to X.
- The one who wore puma sits eleven places away to the left of F.

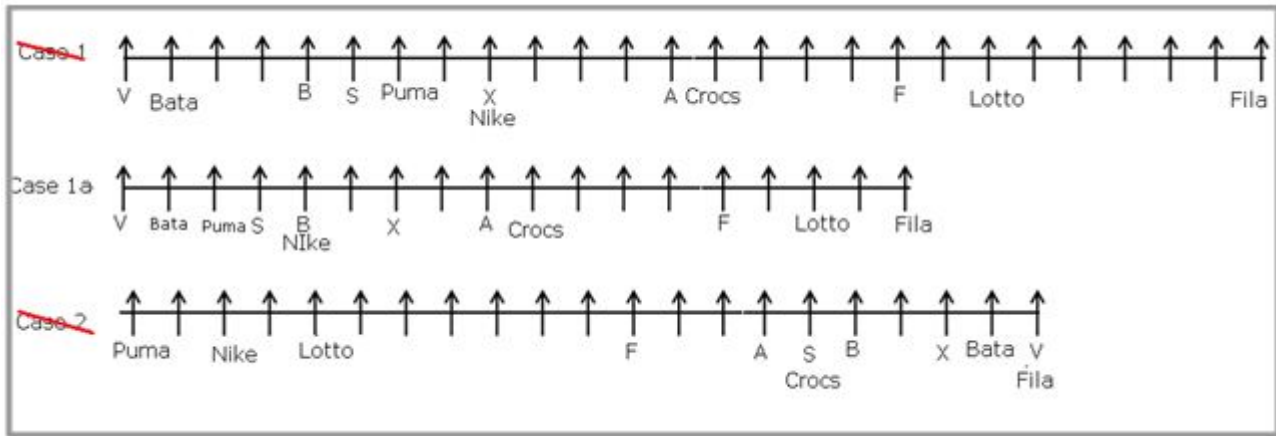

Again we have,

- The one who wore Nike sits second to the right of the one who wore puma.
- The number of persons sitting between the one who wore Nike and V is one more than the number of persons sitting to the right of the one who wore Lotto.
- The one who wore Lotto sits exactly between the one who wore Fila and F.
- As many persons sit between B and S as to the right of the one who wore Fila.

From the above conditions, case-1 gets eliminated because not more than twenty-one people sit in a row, which is not satisfied and Case-2 gets eliminated because the one who wore Lotto sits exactly between the one who wore Fila and F, which is not satisfied. .

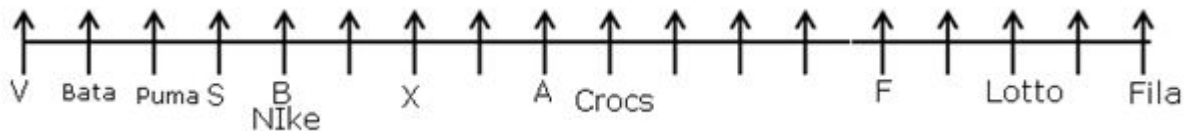

Hence, case-1a shows the final arrangement.

Answer: D

10. Questions

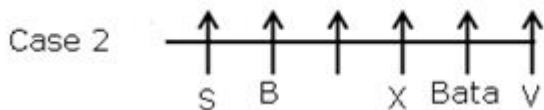

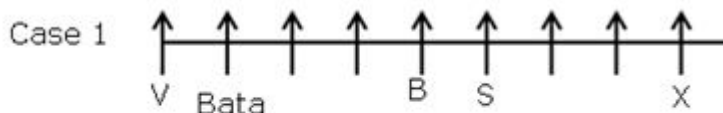

Final arrangement:

We have,

- V sits at one of the extreme ends and adjacent to the one who wore Bata.
- Only two persons sit between B and the one who wore Bata.
- B sits adjacent to S, who sits third to the left of X.

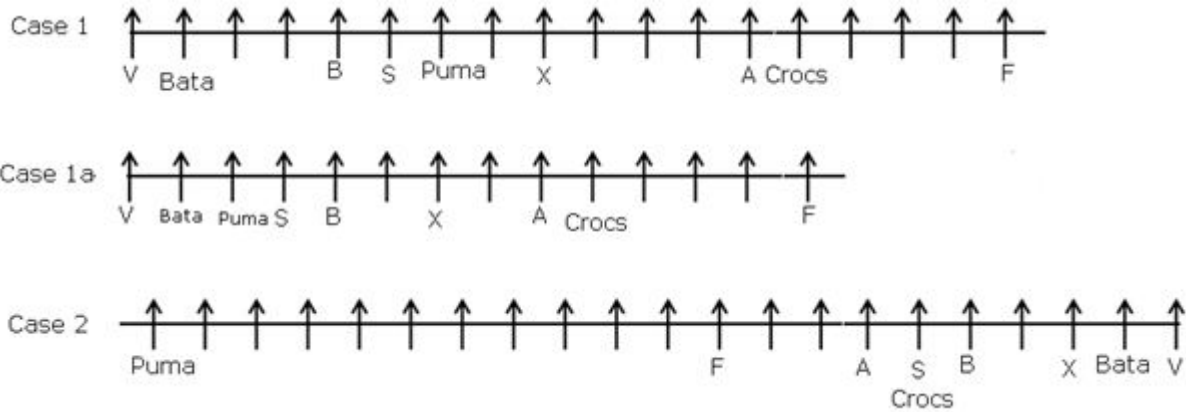

From the above conditions, there are three possibilities

@QuizByMickey

Again we have,

- As many persons sit between V and S is one more than the persons sit between X and A.
- The one who wore crocs sits immediate right of A.
- Only three persons sit between the one who wore crocs and F, who doesn't sit adjacent to X.
- The one who wore puma sits eleven places away to the left of F.

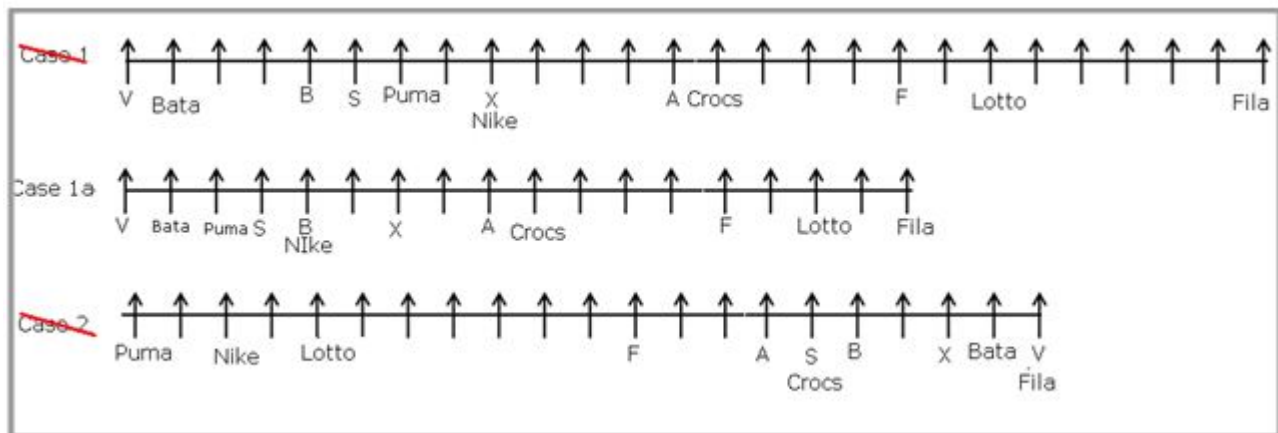

Again we have,

- The one who wore Nike sits second to the right of the one who wore puma.
- The number of persons sitting between the one who wore Nike and V is one more than the number of persons sitting to the right of the one who wore Lotto.
- The one who wore Lotto sits exactly between the one who wore Fila and F.
- As many persons sit between B and S as to the right of the one who wore Fila.

From the above conditions, case-1 gets eliminated because not more than twenty-one people sit in a row, which is not satisfied and Case-2 gets eliminated because the one who wore Lotto sits exactly between the one who wore Fila and F, which is not satisfied. .

Hence, case-1a shows the final arrangement.

Answer: E

11. Questions

Number —> If the second letter from the right end is a vowel, then take the place value of the reverse letter of the third letter from the left end(as per the alphabetical series).

If the second letter from the right end is a consonant, then take the place value of the reverse letter of the fourth letter from the right end (as per the alphabetical series).

Symbol —> The symbol is assigned based on the letters repeated in a word. If the word contains no repeated letters, we use '&'. If the word contains one repeated letters, we use '#'. If the word contains two repeated letters, we use '@'. If the word contains three repeated letters, we use '\$'.

Letter —> The letter is placed based on the immediate succeeding letter of the third consonant from the right end (as per the alphabetical series).

Answer: A

12. Questions

Number —> If the second letter from the right end is a vowel, then take the place value of the reverse letter of the third letter from the left end(as per the alphabetical series).

If the second letter from the right end is a consonant, then take the place value of the reverse letter of the fourth letter from the right end (as per the alphabetical series).

Symbol —> The symbol is assigned based on the letters repeated in a word. If the word contains no repeated letters, we use '&'. If the word contains one repeated letters, we use '#'. If the word contains two repeated letters, we use '@'. If the word contains three repeated letters, we use '\$'.

Letter —> The letter is placed based on the immediate succeeding letter of the third consonant from the right end (as per the alphabetical series).

Answer: B

13. Questions

Number —> If the second letter from the right end is a vowel, then take the place value of the reverse letter of the third letter from the left end(as per the alphabetical series).

If the second letter from the right end is a consonant, then take the place value of the reverse letter of the fourth letter from the right end (as per the alphabetical series).

Symbol —> The symbol is assigned based on the letters repeated in a word. If the word contains no repeated letters, we use '&'. If the word contains one repeated letters, we use '#'. If the word contains two repeated letters, we use '@'. If the word contains three repeated letters, we use '\$'.

Letter —> The letter is placed based on the immediate succeeding letter of the third consonant from the right end (as per the alphabetical series).

Answer: C

14. Questions

Number —> If the second letter from the right end is a vowel, then take the place value of the reverse letter of the third letter from the left end(as per the alphabetical series).

If the second letter from the right end is a consonant, then take the place value of the reverse letter of the fourth letter from the right end (as per the alphabetical series).

Symbol —> The symbol is assigned based on the letters repeated in a word. If the word contains no repeated letters, we use '&'. If the word contains one repeated letters, we use '#'. If the word contains two repeated letters, we use '@'. If the word contains three repeated letters, we use '\$'.

Letter —> The letter is placed based on the immediate succeeding letter of the third consonant from the right end (as per the alphabetical series).

Answer: D

15. Questions

Number —> If the second letter from the right end is a vowel, then take the place value of the reverse

letter of the third letter from the left end(as per the alphabetical series).

If the second letter from the right end is a consonant, then take the place value of the reverse letter of the fourth letter from the right end (as per the alphabetical series).

Symbol —> The symbol is assigned based on the letters repeated in a word. If the word contains no repeated letters, we use '&'. If the word contains one repeated letters, we use '#'. If the word contains two repeated letters, we use '@'. If the word contains three repeated letters, we use '\$'.

Letter —> The letter is placed based on the immediate succeeding letter of the third consonant from the right end (as per the alphabetical series).

Answer: E

16. Questions

Answer: D

a). 7832645709 —> 5913753517 = 9

b). 3746598375 —> 1557379153 = 9

c). 6582954738 —> 7393735519 = 1

d). 8467285374 —> 9575393155 = 8

e). 4364957625 —> 5175735733 = 1

17. Questions

Answer: D

I). HEART, CROWN, FIGHT, CHAIR —> GGCQS, EQQYM, EKIGS, EGCKQ = 4 Vowels

II). DREAM, WORLD, IMAGINE, FRAMES —> CQGCO, YQQKC, KOCIKMG, EQCOGU = 6 vowels

III). ACTORS, ARROW, BREAKS, FASTER —> CESQQU, CQQQY, AQGCMU, ECUSGQ = 6 vowels

IV). IGNORE, VIBES, NORMAL, LAUNCH —> KIMQQG, UKAGU, MQQOCK, KCWMEG = 6 vowels

Only options II, III and IV have more than five vowels in the resultant letters formed.

18. Questions

Answer: A

I). ACCOMPLISHED- The pairs of letters are

AC, CI, PS, DE, HM and LO = **6 pairs**

II). MATHEMATICS- The pairs of letters are

MT and EI = **2 pairs**

III). HEADQUARTERS -The pairs of letters are

@QuizByMickey

HS, HR, RS, RT, and AD = 5 pairs

19. Questions

Answer: C

I). 2536, 7392, 9526, 6853

—> 8-8 , 19-2, 14-8, 14-8

—> 0, 17, 6, 6 —> $0+17+6+6=29$

II). 6434, 8437, 5683, 7542

—> 14-3, 12-10, 14-8, 12-6

—> 11, 2, 6, 6 —> $11+2+6+6 = 25$

III). 7634, 8543, 9542, 4365

—> 10-10, 12-8, 14-6, 10-8

—> 0, 4, 8, 2 —> $0+4+8+2= 14$

IV). 9628, 5762, 8139, 4926

—> 16-9, 12-8, 13-8, 12-9

—> 7, 4, 5, 3 —> $7+4+5+3 = 19$

20. Questions

Answer: B

a). MISCONSTRUE

—> LLRBRMRSQXH

—> BHLLMQRRRSX

Consonants between L and R are **M, N, P, Q**

b). HYPOTHETIC

—> GXORSGHSLB

—> BGGHLORSSX

Consonants between G and R are **H, J, K, L, M, N, P, Q**

c). ISOLATION

—> LRRKDSLRLM

—> DKLLMRRRS

Consonants between L and R are **M, N, P, Q.**

d). MEASUREMENT

—> LHDRXQHLHMS

@QuizByMickey

—> DHHHLLMQRSX

Consonants between H and Q are **J, K, L, M, N, P.**

e). OPERATION

—> ROHQDSLRLM

—> DHLMOQRRS

Consonants between L and Q are **M, N, P**
