

1. Questions

Study the following information carefully and answer the below questions.

Seven persons M, N, O, P, Q, R and S sit in a linear row and face towards the north direction. Distance between two adjacent persons is multiple of either 5 or 8. Each of them likes different fruits such as Apple, Banana, Guava, Mango, Melon, Cherry and Orange but not necessarily in the same order.

R sits at an extreme end of the row. Only three persons sit to the right of the one, who likes Mango. The distance between R and the one who likes Mango is 31m. The distance between the one, who likes Banana and R is 5m. S sits to the immediate left of N, who sits to the immediate left of the one, who likes Melon. At least two persons sit to the right of the one, who likes Melon. S doesn't sit at the extreme end. The distance between S and the one who likes melon is not more than 30m but not less than 20. The distance between N and the one who likes Melon is two times the distance between S and N. The distance between O and the one who likes Melon is 60m. The distance between Q and M is two times the distance between M and O. M doesn't sit to the right of O. Neither the one who likes Guava nor the one who likes cherry sits at the extreme ends of the row. The one who likes Cherry sits to the right of the one who likes Guava. Neither O likes Cherry nor R likes Orange.

What is the distance between N and the one who likes Apple?

- a. 31 m
- b. 62 m
- c. 51 m
- d. 50 m
- e. 20 m

2. Questions

Study the following information carefully and answer the below questions.

Seven persons M, N, O, P, Q, R and S sit in a linear row and face towards the north direction. Distance between two adjacent persons is multiple of either 5 or 8. Each of them likes different fruits such as Apple, Banana, Guava, Mango, Melon, Cherry and Orange but not necessarily in the same order.

R sits at an extreme end of the row. Only three persons sit to the right of the one, who likes Mango. The distance between R and the one who likes Mango is 31m. The distance between the one, who likes Banana and R is 5m. S sits to the immediate left of N, who sits to the immediate left of the one, who likes Melon. At least two persons sit to the right of the one, who likes Melon. S doesn't sit at the extreme end. The distance between S and the one who likes melon is not more than 30m but not less than 20. The distance between N and the one who likes Melon is two times the distance between S and N. The distance between O and the one who likes Melon is 60m. The distance between Q and M is two times the distance between M and O. M doesn't sit to the right of O. Neither the one who likes Guava nor the one who likes cherry sits at the extreme ends of the row. The one who likes Cherry sits to the right of the one who likes Guava. Neither O likes Cherry nor R likes Orange.

The distance between P and the one who likes _____ is 98m.

- a. Guava
- b. Orange
- c. Apple
- d. Banana
- e. None of these

3. Questions

As many persons sit to the left of ____ as to the right of the one, who likes ____.

- a. S, Cherry
- b. Q, Apple
- c. M, Banana
- d. M, Orange
- e. S, Guava

4. Questions

What is the distance between the persons, who sit at the two extreme ends of the row?

- a. 117 m
- b. 110 m
- c. 111 m
- d. 125 m
- e. None of these

5. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following box does not belong to the group?

- a. P
- b. M
- c. N
- d. Q
- e. R

@QuizByMickey

6. Questions

Study the following information carefully and answer the below questions.

Eight boxes- P, Q, R, S, T, U, V and W are kept one above the other in eight different shelves such that the

lowermost shelf is numbered as 1, the shelf just above it is numbered as 2 and so on till the topmost shelf is numbered as 8 but not necessarily in the same order. Each box has a different height viz: 63cm, 24cm, 12cm, 21cm, 28cm, 30cm, 25cm, 20cm but not necessarily in the same order.

Note: Height of each box is multiple of the shelf number of the box kept immediately above it (For example: Height of the box kept at the lowermost shelf is multiple of the shelf number 2 and the height of the box kept at the topmost shelf is multiple of the shelf number 9).

Box P is kept immediately above the box which is 12cm. Box P is kept at an even numbered shelf. Three boxes kept between box P and box V. The box which is 25cm kept just below box R. The number of boxes kept below box R is the same as above box Q. The box which is 28 cm is kept just below box U. The height of the box kept at shelf 2 is 4cm less than the height of box Q. The height of box U is less than box V but more than box S, which is neither kept at the topmost nor at the bottommost shelf. Box T is kept above box W.

Which of the following box has the maximum height?

- a. U
- b. V
- c. T
- d. S
- e. R

7. Questions

How many boxes are kept above box T?

- a. Five
- b. Three
- c. Same as between box P and box S
- d. Same as below box V
- e. Two

8. Questions

What is the sum of the heights of the boxes which are kept at the 2nd shelf and the 6th shelf?

- a. 48 cm
- b. 49 cm
- c. 64 cm
- d. 100 cm
- e. None of above

9. Questions

@QuizByMickey

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following box does not belong to the group?

- a. W
- b. V
- c. Q
- d. P
- e. T

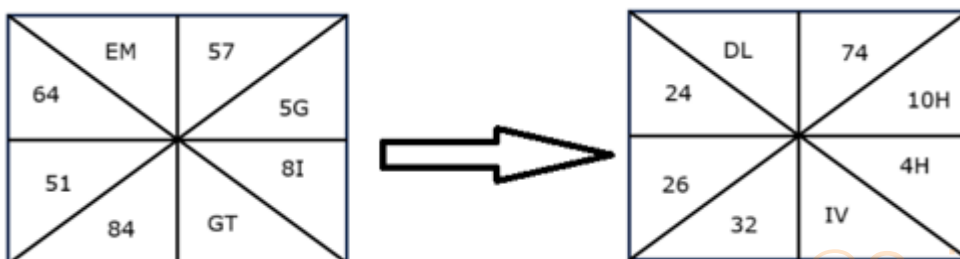

10. Questions

Which among the following statement(s) is/are TRUE with respect to the final arrangement?

- I). Box R is kept at an even-numbered shelf.
 - II). The height of box S is an even number.
 - III). More than three boxes are kept below box Q.
- a. Only III
 - b. Only I
 - c. Only II
 - d. Only I and II
 - e. Only I and III

11. Questions

Study the following information carefully and answer the below questions.

If the box contains only number:

- 1). And, the number is an even number, then the number is replaced by the product of the digits of the number.
- 2). Otherwise, it is replaced by the addition of the square of its all digits.

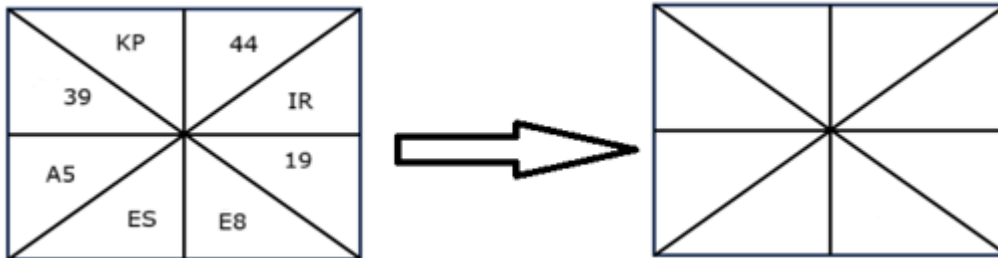

If the box contains only letter/s:

- 1). And at-least one letter is vowel then replace both letters by its immediate previous letter as per alphabetical order.

2). And if all letters are consonants then replace them by its 2nd next letter as per alphabetical order.

If the box contains one letter and one number, then:

- 1). Double the odd number and half the even number
- 2). Replace the vowel by its immediate previous letter as per alphabetical order, and replace the consonant by its immediate next letter.

Apply the given conditions to the input and provide answers to the questions:

What is the sum of all numbers present with letters in the output box?

- a. 11
- b. 12
- c. 13
- d. 14
- e. 15

12. Questions

ES is replaced by which of the following option?

- a. DR
- b. MS
- c. DB
- d. NA
- e. BK

@QuizByMickey

13. Questions

How many vowels are there in the output?

- a. One
- b. Two
- c. Three
- d. Four
- e. None

14. Questions

How many even numbers (without letters) are there in the output?

- a. One
- b. Two
- c. Three
- d. Four
- e. None

15. Questions

What is the sum of the place value of the letters given in the output only in the letter group?

- a. 78
- b. 87
- c. 64
- d. 46
- e. 32

16. Questions

Study the following information carefully and answer the below questions.

Sixteen persons sit around a square table on different seats facing inside such that one seat is at each corner and four seats are at each side of the square (equidistant from each other). One seat is vacant at each side of the square but vacant seats are not opposite to each other.

The vacant seat is adjacent to T, who sits at one of the corners. W sits seven seats to the left of T who doesn't sit adjacent to U. Only one person sits between U and the one who sits opposite to W. J seat is fifth to the right of U. The seat which is third to the right of J is vacant. P sits to the immediate left of V, who sits opposite to J. K sits four seats to the right of P. N sits opposite to the vacant seat but not at the same side as U and W. Q sits adjacent to a vacant seat but does not sit on any side of the table. S sits to the immediate right of L, who is not an immediate neighbor of J. The one who sits second to the left of X sits opposite to M. Two persons sit between R and I, who sit on the same side as O.

Which of the following combinations of persons sit opposite to vacant seats?

- a. X, V, R
- b. L, M, I
- c. R, K, U
- d. K, O, S
- e. O, S, Q

17. Questions

How many persons sit between O and the one who sits third to the left of Q (when counting from the left of O)?

- a. 5
- b. 6
- c. 7
- d. 8
- e. 9

18. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

I). M sits opposite to the one who sits second to the right of N

II). One of the adjacent seats of O is vacant

III). Q sits exactly between T and X (from any side)

- a. Only I
- b. Only II
- c. Only III
- d. Only I and II
- e. Only II and III

19. Questions

Who among the following person is not adjacent to the vacant seat?

- a. S
- b. N
- c. L
- d. K
- e. I

@QuizByMickey

20. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following person does not belong to the group?

- a. X
- b. Q

- c. T
- d. P
- e. R

Explanations:

1. Questions

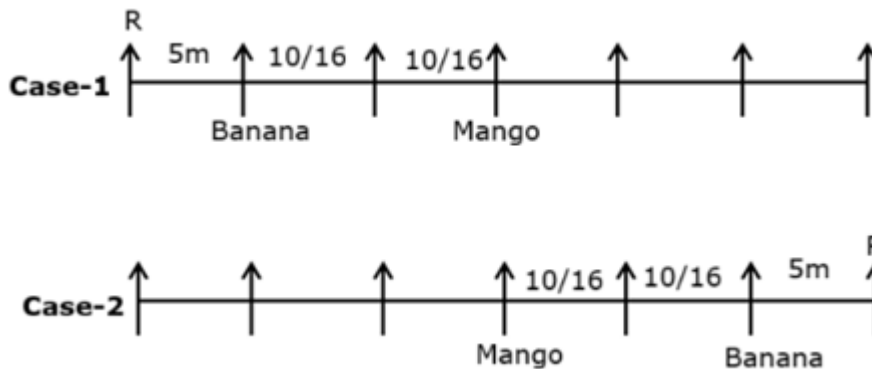

Final Arrangement:

We have:

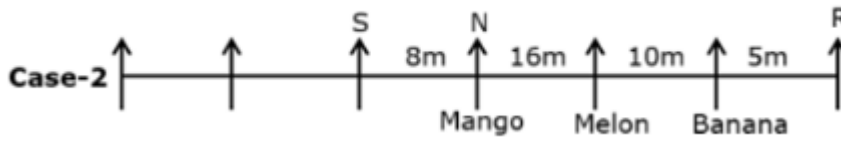

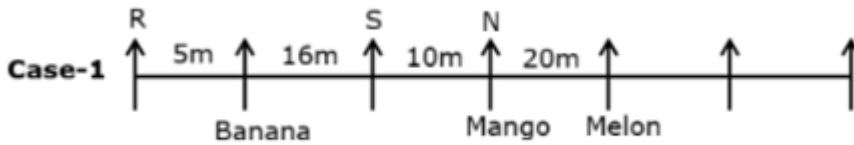

- R sits at an extreme end of the row.
- Only three persons sit to the right of the one, who likes Mango.
- The distance between R and the one who likes Mango is 31m.
- The distance between the one, who likes Banana and R is 5m.

From the above we have two possibilities:

Also, we have:

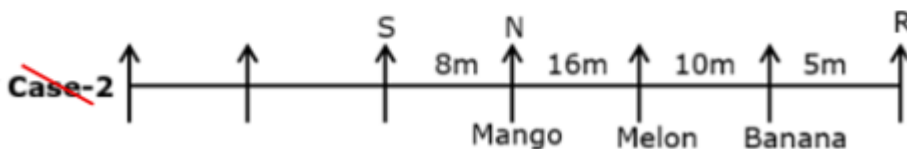

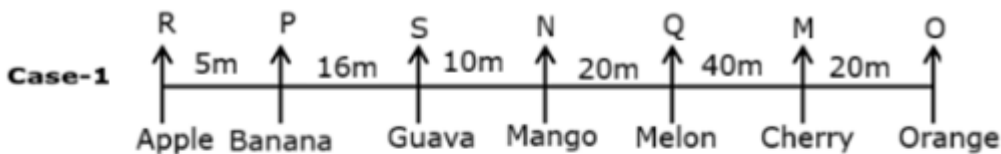

- S sits to the immediate left of N, who sits to the immediate left of the one, who likes Melon.
- At least two persons sit to the right of the one, who likes Melon.
- The distance between N and the one who likes Melon is two times the distance between S and N.
- S doesn't sit at the extreme end.
- The distance between S and the one who likes melon is not more than 30m but not less than 20.

Also, we have:

- The distance between O and the one who likes Melon is 60m.
- The distance between Q and M is two times the distance between M and O.
- M doesn't sit to the right of O.
- Neither the one who likes Guava nor the one who likes cherry sits at the extreme ends of the row.
- The one who likes Cherry sits to the right of the one who likes Guava.
- Neither O likes Cherry nor R likes Orange.

From the above conditions, case-2 gets eliminated here.

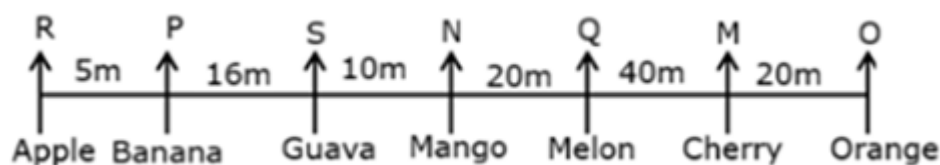

Hence, case-1 shows the final arrangement.

Answer: A

2. Questions

Final Arrangement:

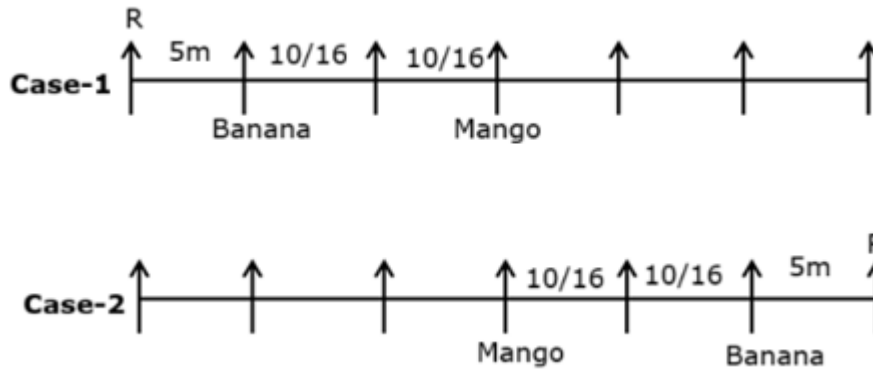

We have:

- R sits at an extreme end of the row.
- Only three persons sit to the right of the one, who likes Mango.

@QuizByMickey

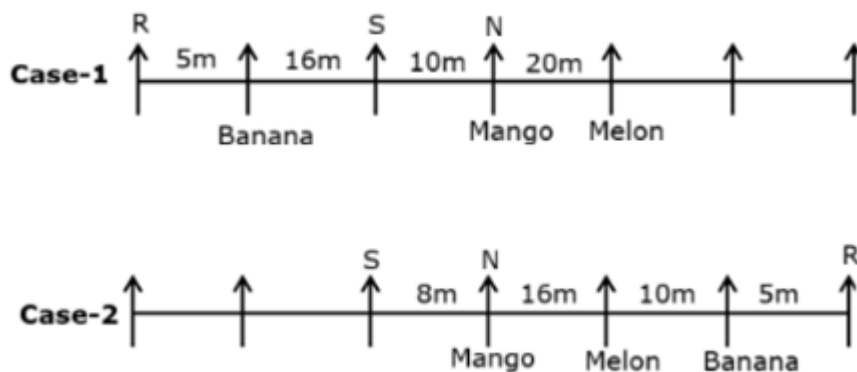

- The distance between R and the one who likes Mango is 31m.
- The distance between the one, who likes Banana and R is 5m.

From the above we have two possibilities:

Also, we have:

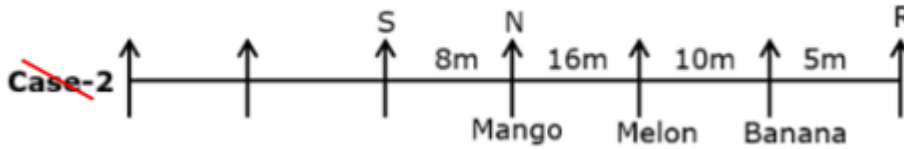

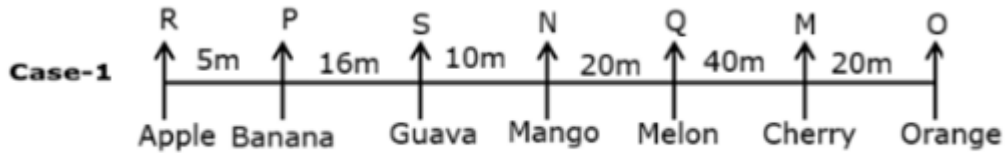

- S sits to the immediate left of N, who sits to the immediate left of the one, who likes Melon.
- At least two persons sit to the right of the one, who likes Melon.
- The distance between N and the one who likes Melon is two times the distance between S and N.
- S doesn't sit at the extreme end.
- The distance between S and the one who likes melon is not more than 30m but not less than 20.

Also, we have:

- The distance between O and the one who likes Melon is 60m.
- The distance between Q and M is two times the distance between M and O.
- M doesn't sit to the right of O.
- Neither the one who likes Guava nor the one who likes cherry sits at the extreme ends of the row.
- The one who likes Cherry sits to the right of the one who likes Guava.
- Neither O likes Cherry nor R likes Orange.

From the above conditions, case-2 gets eliminated here.

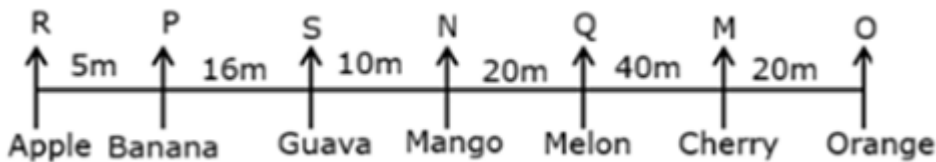

Hence, case-1 shows the final arrangement.

Answer: E

3. Questions

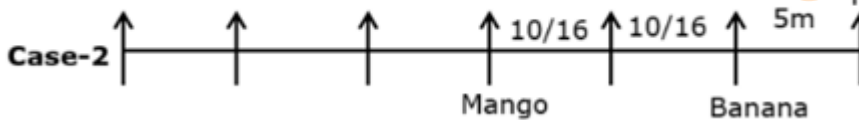

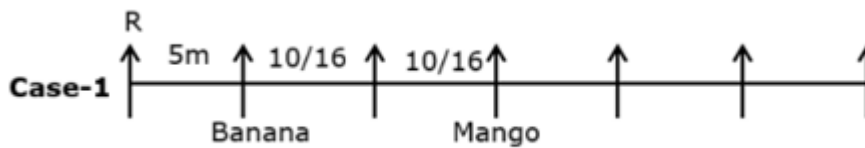

Final Arrangement:

We have:

- R sits at an extreme end of the row.
- Only three persons sit to the right of the one, who likes Mango.
- The distance between R and the one who likes Mango is 31m.
- The distance between the one, who likes Banana and R is 5m.

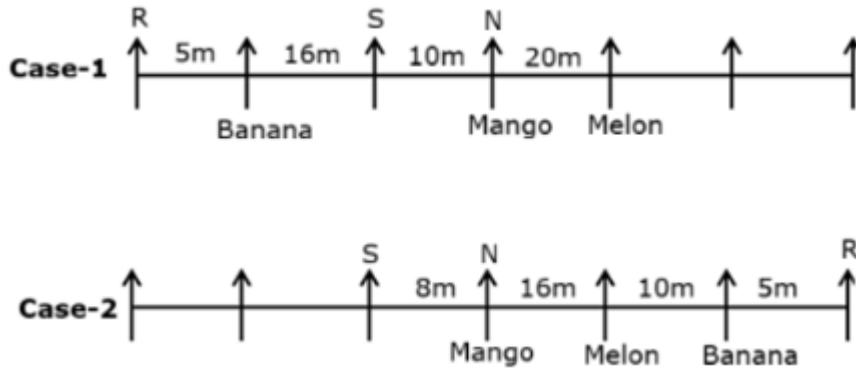

From the above we have two possibilities:

Also, we have:

- S sits to the immediate left of N, who sits to the immediate left of the one, who likes Melon.
- At least two persons sit to the right of the one, who likes Melon.
- The distance between N and the one who likes Melon is two times the distance between S and N.
- S doesn't sit at the extreme end.

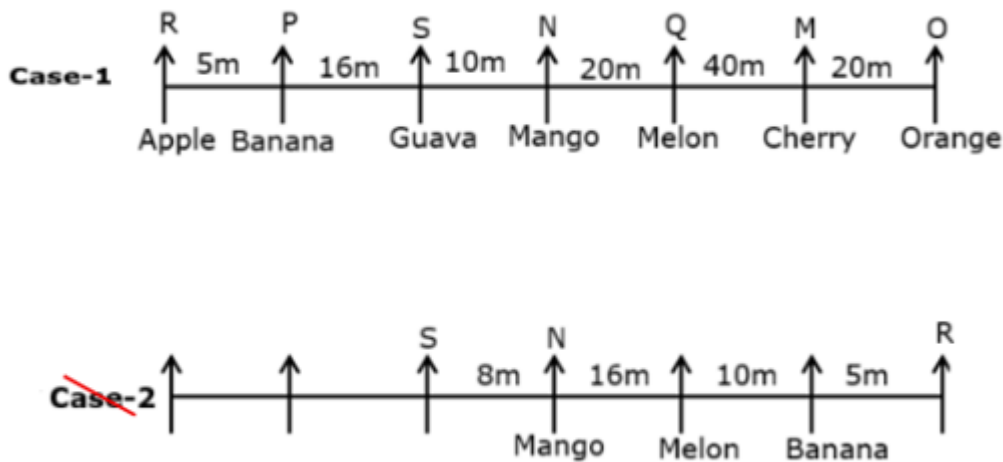

- The distance between S and the one who likes melon is not more than 30m.

Also, we have:

- The distance between O and the one who likes Melon is 60m.
- The distance between Q and M is two times the distance between M and O.
- M doesn't sit to the right of O.
- Neither the one who likes Guava nor the one who likes cherry sits at the extreme ends of the row.
- The one who likes Cherry sits to the right of the one who likes Guava.
- Neither O likes Cherry nor R likes Orange.

From the above conditions, case-2 gets eliminated here.

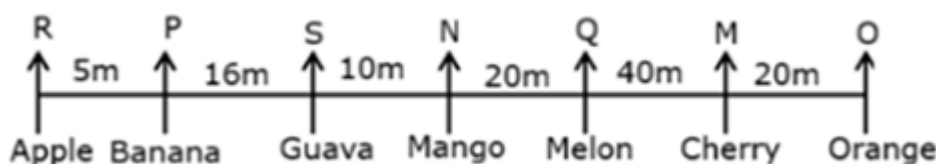

Hence, case-1 shows the final arrangement.

Answer: C

@QuizByMickey

4. Questions

Final Arrangement:

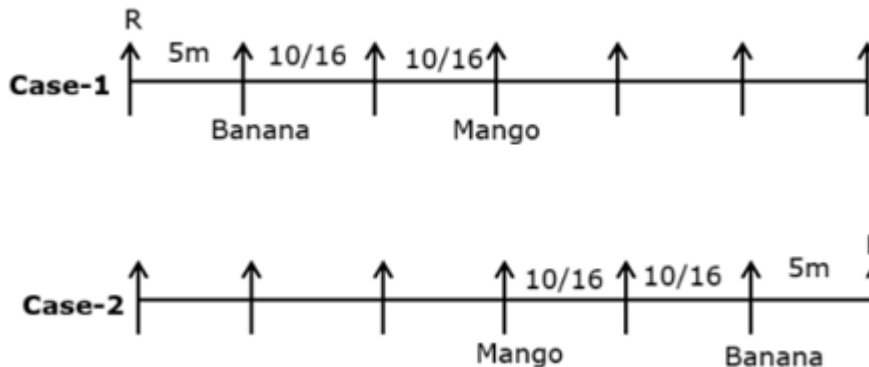

We have:

- R sits at an extreme end of the row.

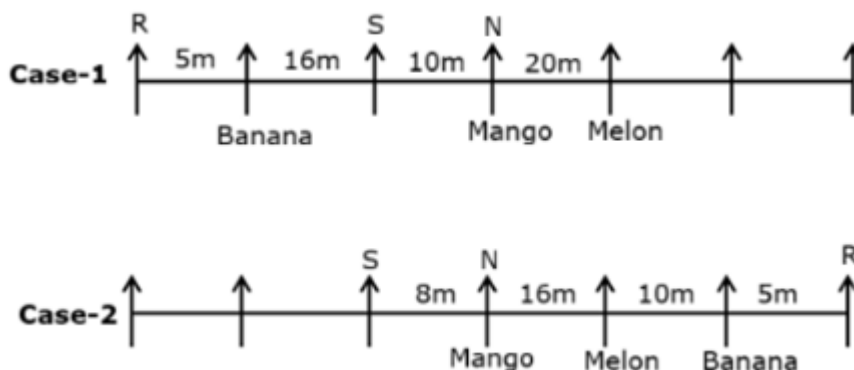

- Only three persons sit to the right of the one, who likes Mango.
- The distance between R and the one who likes Mango is 31m.
- The distance between the one, who likes Banana and R is 5m.

From the above we have two possibilities:

Also, we have:

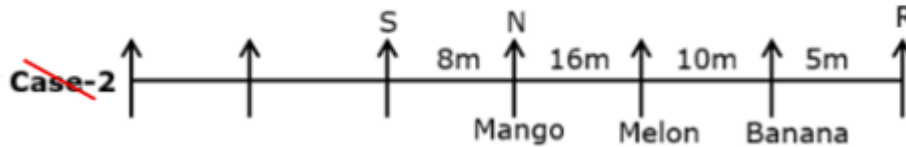

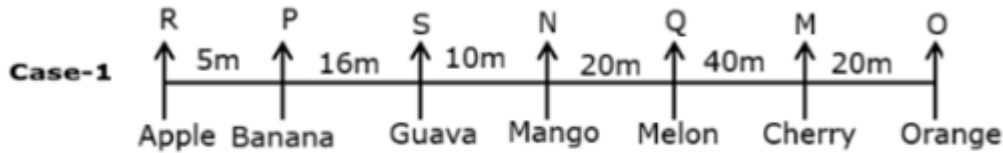

- S sits to the immediate left of N, who sits to the immediate left of the one, who likes Melon.
- At least two persons sit to the right of the one, who likes Melon.
- The distance between N and the one who likes Melon is two times the distance between S and N.
- S doesn't sit at the extreme end.
- The distance between S and the one who likes melon is not more than 30m.

Also, we have:

- The distance between O and the one who likes Melon is 60m.
- The distance between Q and M is two times the distance between M and O.
- M doesn't sit to the right of O.
- Neither the one who likes Guava nor the one who likes cherry sits at the extreme ends of the row.
- The one who likes Cherry sits to the right of the one who likes Guava.
- Neither O likes Cherry nor R likes Orange.

From the above conditions, case-2 gets eliminated here.

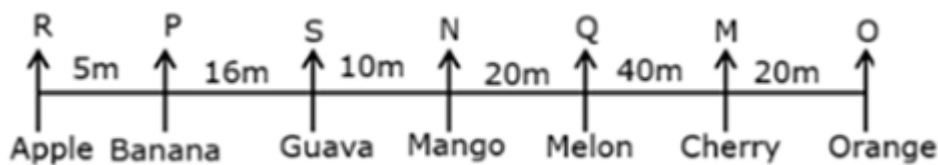

Hence, case-1 shows the final arrangement.

Answer: C

5. Questions

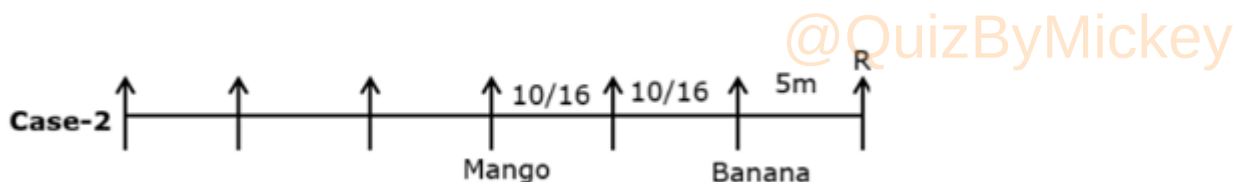

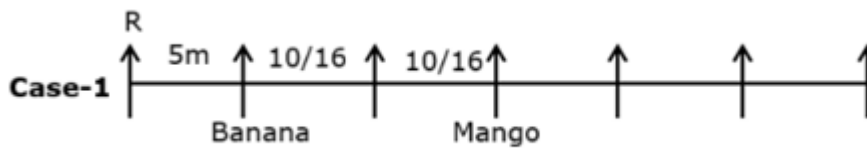

Final Arrangement:

We have:

- R sits at an extreme end of the row.
- Only three persons sit to the right of the one, who likes Mango.
- The distance between R and the one who likes Mango is 31m.
- The distance between the one, who likes Banana and R is 5m.

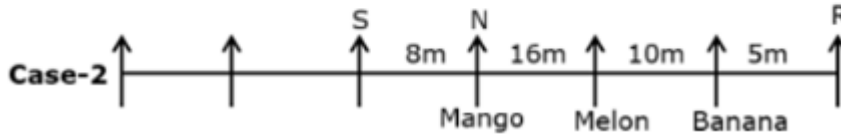

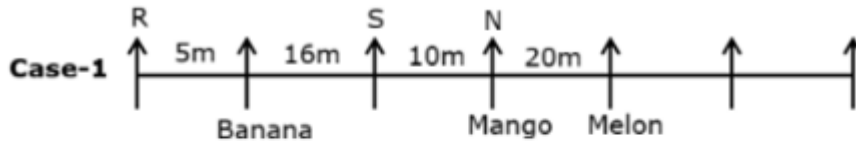

From the above we have two possibilities:

Also, we have:

- S sits to the immediate left of N, who sits to the immediate left of the one, who likes Melon.
- At least two persons sit to the right of the one, who likes Melon.
- The distance between N and the one who likes Melon is two times the distance between S and N.
- S doesn't sit at the extreme end.

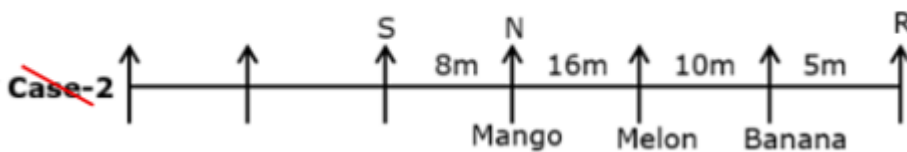

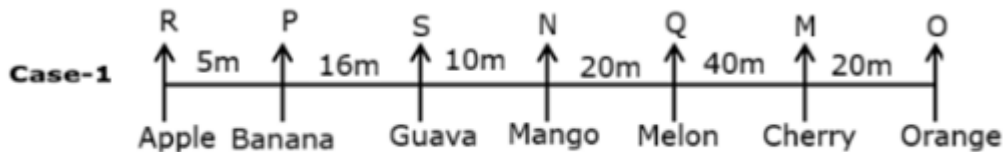

- The distance between S and the one who likes melon is not more than 30m.

Also, we have:

- The distance between O and the one who likes Melon is 60m.
- The distance between Q and M is two times the distance between M and O.
- M doesn't sit to the right of O.
- Neither the one who likes Guava nor the one who likes cherry sits at the extreme ends of the row.
- The one who likes Cherry sits to the right of the one who likes Guava.
- Neither O likes Cherry nor R likes Orange.

From the above conditions, case-2 gets eliminated here.

Hence, case-1 shows the final arrangement.

Answer: E (No person sit at the end except the person in option E)

6. Questions

Final Arrangement:

@QuizByMickey

Number	Box	Height
8	T	63cm
7	U	24cm
6	V	28cm
5	R	30cm
4	Q	25cm
3	S	20cm
2	P	21cm
1	W	12cm

We have:

- Box P is kept immediately above the box which is 12cm.
- Box P is kept at an even-numbered shelf.
- Three boxes are kept between box P and box V.

From the above conditions we have three possibilities:

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7						
6	V				P	
5						12cm
4			P			
3				12cm		
2	P				V	
1		12cm				

@QuizByMickey

Again, we have:

- The box which is 25cm kept just below box R.
- The number of boxes kept above box R is the same as below Q.
- The box which is 28 cm is kept just below box U.

From the above conditions, case-2 gets eliminated because the number of boxes kept above box R is the same as below box Q which is not satisfied.

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7	U		U		U	
6	V	28cm		28cm	P	28cm
5	R		R		R	12cm
4	Q	25cm	P	25cm	Q	25cm
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The height of the box kept at shelf 2 is 4cm less than the height of box Q.
- The height of box U is less than box V but more than box S, which is neither kept at the topmost nor at the bottommost shelf.
- Box T is kept above box W.

From the above conditions, case-3 gets eliminated because the height of box U is less than box V but more than box S, which is not satisfied.

@QuizByMickey

	Case-1		Case-3	
Number	Box	Height	Box	Height
8	T	63cm		63cm
7	U	24cm	U	24cm
6	V	28cm	P	28cm
5	R	30cm	R	12cm
4	Q	25cm	Q	25cm
3	S	20cm		48cm
2	P	21cm	V	21cm
1	W	12cm		

Hence case-1 shows the final arrangement.

Answer: C

7. Questions

Final Arrangement:

Number	Box	Height
8	T	63cm
7	U	24cm
6	V	28cm
5	R	30cm
4	Q	25cm
3	S	20cm
2	P	21cm
1	W	12cm

We have:

@QuizByMickey

- Box P is kept immediately above the box which is 12cm.
- Box P is kept at an even-numbered shelf.
- Three boxes are kept between box P and box V.

From the above conditions we have three possibilities:

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7						
6	V				P	
5						12cm
4			P			
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The box which is 25cm kept just below box R.
- The number of boxes kept above box R is the same as below Q.
- The box which is 28 cm is kept just below box U.

From the above conditions, case-2 gets eliminated because the number of boxes kept above box R is the same as below box Q which is not satisfied.

@QuizByMickey

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7	U		U		U	
6	V	28cm		28cm	P	28cm
5	R		R		R	12cm
4	Q	25cm	P	25cm	Q	25cm
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The height of the box kept at shelf 2 is 4cm less than the height of box Q.
- The height of box U is less than box V but more than box S, which is neither kept at the topmost nor at the bottommost shelf.
- Box T is kept above box W.

From the above conditions, case-3 gets eliminated because the height of box U is less than box V but more than box S, which is not satisfied.

@QuizByMickey

	Case-1		Case-3	
Number	Box	Height	Box	Height
8	T	63cm		63cm
7	U	24cm	U	24cm
6	V	28cm	P	28cm
5	R	30cm	R	12cm
4	Q	25cm	Q	25cm
3	S	20cm		48cm
2	P	21cm	V	21cm
1	W	12cm		

Hence case-1 shows the final arrangement.

Answer: C

8. Questions

Final Arrangement:

Number	Box	Height
8	T	63cm
7	U	24cm
6	V	28cm
5	R	30cm
4	Q	25cm
3	S	20cm
2	P	21cm
1	W	12cm

We have:

@QuizByMickey

- Box P is kept immediately above the box which is 12cm.
- Box P is kept at an even-numbered shelf.
- Three boxes are kept between box P and box V.

From the above conditions we have three possibilities:

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7						
6	V				P	
5						12cm
4			P			
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The box which is 25cm kept just below box R.
- The number of boxes kept above box R is the same as below Q.
- The box which is 28 cm is kept just below box U.

From the above conditions, case-2 gets eliminated because the number of boxes kept above box R is the same as below box Q which is not satisfied.

@QuizByMickey

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7	U		U		U	
6	V	28cm		28cm	P	28cm
5	R		R		R	12cm
4	Q	25cm	P	25cm	Q	25cm
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The height of the box kept at shelf 2 is 4cm less than the height of box Q.
- The height of box U is less than box V but more than box S, which is neither kept at the topmost nor at the bottommost shelf.
- Box T is kept above box W.

From the above conditions, case-3 gets eliminated because the height of box U is less than box V but more than box S, which is not satisfied.

@QuizByMickey

	Case-1		Case-3	
Number	Box	Height	Box	Height
8	T	63cm		63cm
7	U	24cm	U	24cm
6	V	28cm	P	28cm
5	R	30cm	R	12cm
4	Q	25cm	Q	25cm
3	S	20cm		48cm
2	P	21cm	V	21cm
1	W	12cm		

Hence case-1 shows the final arrangement.

Answer: B

9. Questions

Final Arrangement:

Number	Box	Height
8	T	63cm
7	U	24cm
6	V	28cm
5	R	30cm
4	Q	25cm
3	S	20cm
2	P	21cm
1	W	12cm

We have:

@QuizByMickey

- Box P is kept immediately above the box which is 12cm.
- Box P is kept at an even-numbered shelf.
- Three boxes are kept between box P and box V.

From the above conditions we have three possibilities:

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7						
6	V				P	
5						12cm
4			P			
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The box which is 25cm kept just below box R.
- The number of boxes kept above box R is the same as below Q.
- The box which is 28 cm is kept just below box U.

From the above conditions, case-2 gets eliminated because the number of boxes kept above box R is the same as below box Q which is not satisfied.

@QuizByMickey

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7	U		U		U	
6	V	28cm		28cm	P	28cm
5	R		R		R	12cm
4	Q	25cm	P	25cm	Q	25cm
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The height of the box kept at shelf 2 is 4cm less than the height of box Q.
- The height of box U is less than box V but more than box S, which is neither kept at the topmost nor at the bottommost shelf.
- Box T is kept above box W.

From the above conditions, case-3 gets eliminated because the height of box U is less than box V but more than box S, which is not satisfied.

@QuizByMickey

	Case-1		Case-3	
Number	Box	Height	Box	Height
8	T	63cm		63cm
7	U	24cm	U	24cm
6	V	28cm	P	28cm
5	R	30cm	R	12cm
4	Q	25cm	Q	25cm
3	S	20cm		48cm
2	P	21cm	V	21cm
1	W	12cm		

Hence case-1 shows the final arrangement.

Answer: A (All the boxes are kept in even numbered shelf except box W)

10. Questions

Final Arrangement:

Number	Box	Height
8	T	63cm
7	U	24cm
6	V	28cm
5	R	30cm
4	Q	25cm
3	S	20cm
2	P	21cm
1	W	12cm

@QuizByMickey

We have:

- Box P is kept immediately above the box which is 12cm.
- Box P is kept at an even-numbered shelf.
- Three boxes are kept between box P and box V.

From the above conditions we have three possibilities:

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7						
6	V				P	
5						12cm
4			P			
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The box which is 25cm kept just below box R.
- The number of boxes kept above box R is the same as below Q.
- The box which is 28 cm is kept just below box U.

From the above conditions, case-2 gets eliminated because the number of boxes kept above box R is the same as below box Q which is not satisfied.

@QuizByMickey

	Case-1		Case-2		Case-3	
Number	Box	Height	Box	Height	Box	Height
8			V			
7	U		U		U	
6	V	28cm		28cm	P	28cm
5	R		R		R	12cm
4	Q	25cm	P	25cm	Q	25cm
3				12cm		
2	P				V	
1		12cm				

Again, we have:

- The height of the box kept at shelf 2 is 4cm less than the height of box Q.
- The height of box U is less than box V but more than box S, which is neither kept at the topmost nor at the bottommost shelf.
- Box T is kept above box W.

From the above conditions, case-3 gets eliminated because the height of box U is less than box V but more than box S, which is not satisfied.

@QuizByMickey

	Case-1		Case-3	
Number	Box	Height	Box	Height
8	T	63cm		63cm
7	U	24cm	U	24cm
6	V	28cm	P	28cm
5	R	30cm	R	12cm
4	Q	25cm	Q	25cm
3	S	20cm		48cm
2	P	21cm	V	21cm
1	W	12cm		

Hence case-1 shows the final arrangement.

Answer: C

11. Questions

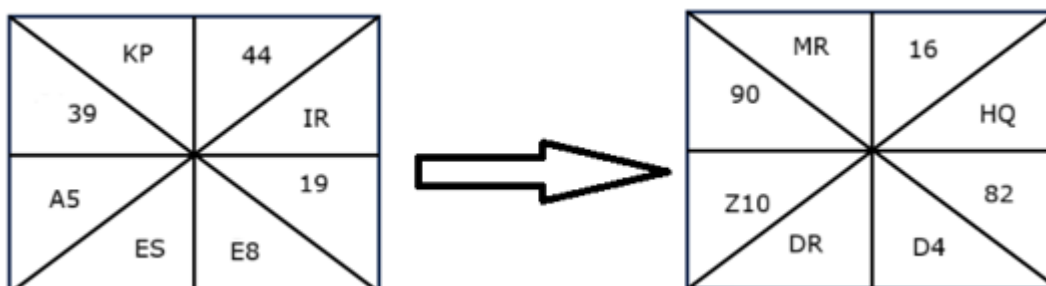

Final Arrangement:

Answer: D

Answer: A

13. Questions

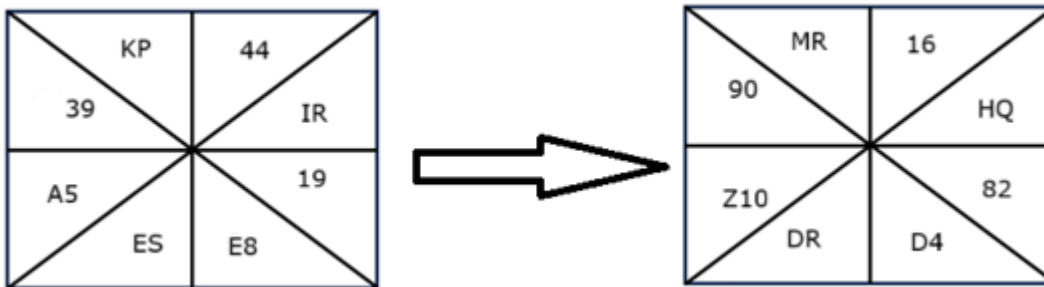

Final Arrangement:

Answer: E

14. Questions

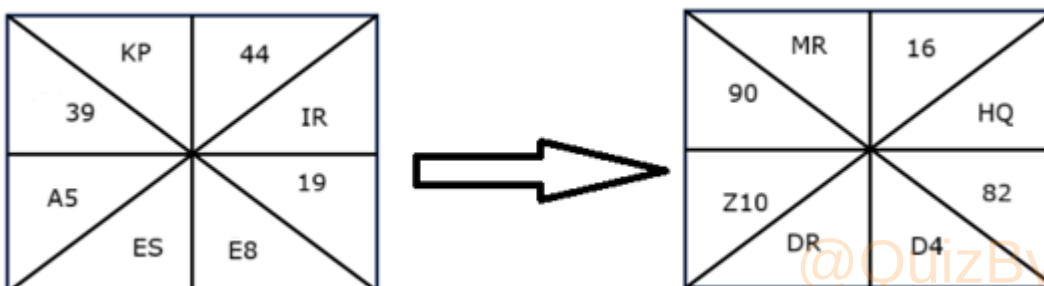

Final Arrangement:

Answer: C

15. Questions

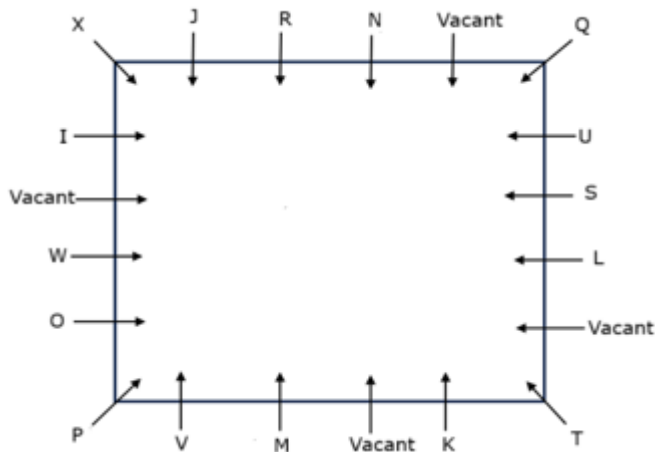

Final Arrangement:

Answer: A

16. Questions

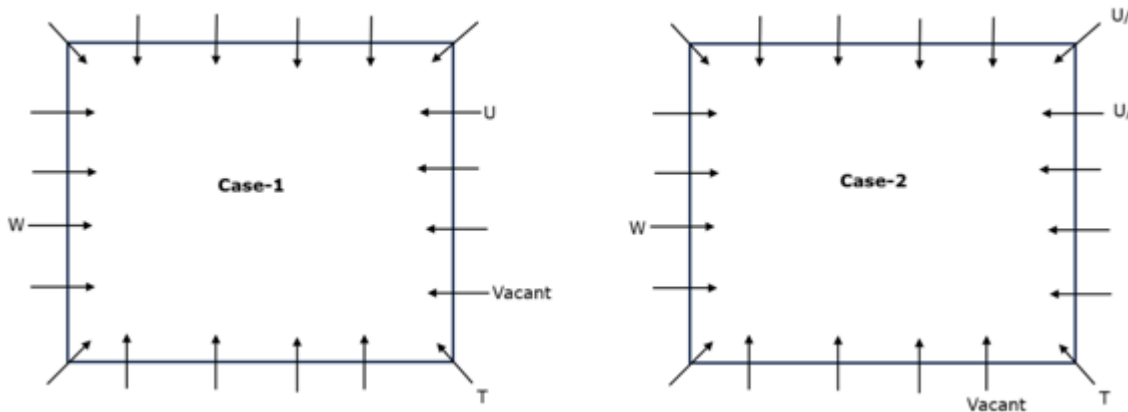

Final Arrangement:

We have:

- The vacant seat is adjacent to T who sits at one of the corners.
- W sits seven seats to the left of T who doesn't sit adjacent to U.
- Only one person sits between U and the one who sits opposite to W.

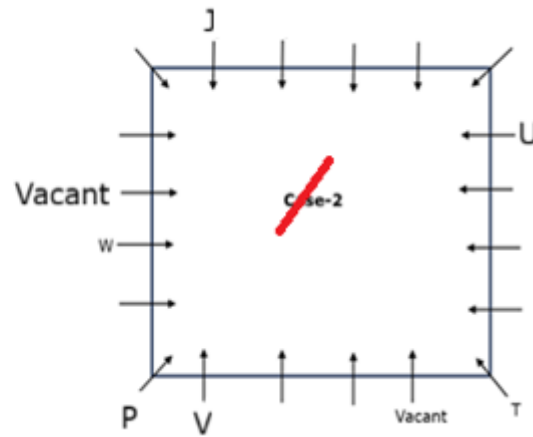

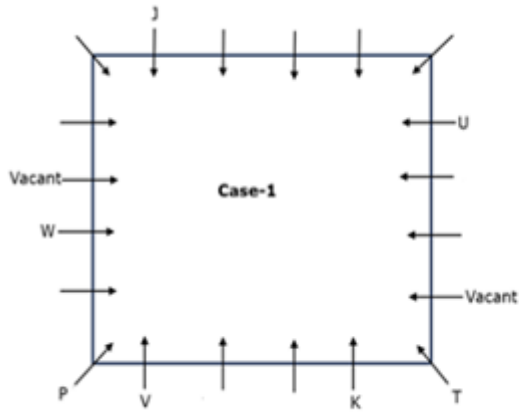

From the above conditions we have two possibilities:

Again, we have:

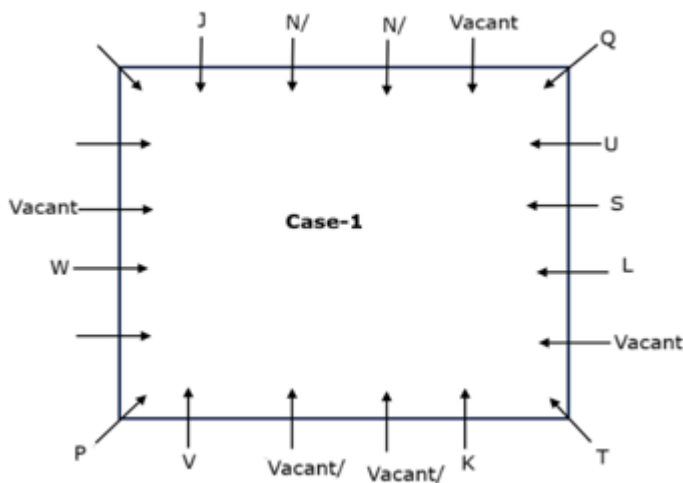

- J seat is fifth to the right of U.
- The seat which is third to the right of J is vacant.
- P sits to the immediate left of V, who sits opposite to J.
- K sits four seats to the right of P.

From the above conditions, case-2 gets eliminated because K sits four seats to the right of P, which is not satisfied.

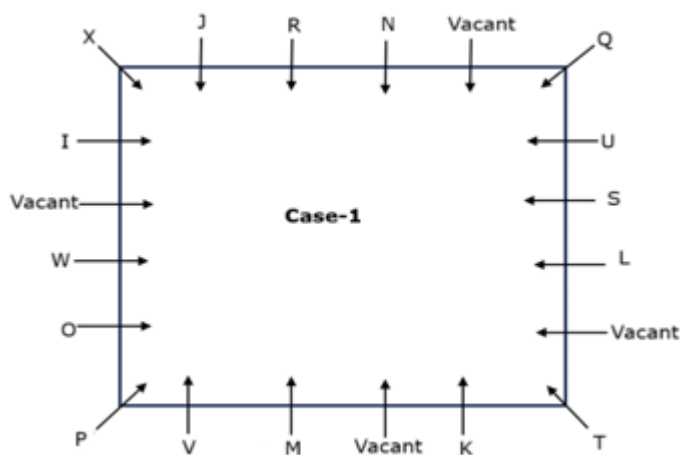

Again, we have:

- N sits opposite to the vacant seat but not on the same side as U and W.
- Q sits adjacent to a vacant seat but does not sit on any side of the table.
- S sits to the immediate right of L, who is not an immediate neighbour of J.

Again, we have:

- The one who sits second to the left of X sits opposite to M.
- Two persons sit between R and I, who sit on the same side as O.

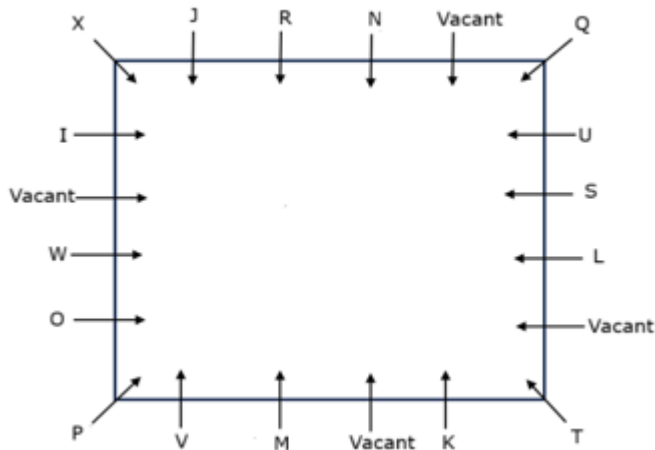

@QuizByMickey

Hence, case-1 shows the final arrangement.

Answer: D

17. Questions

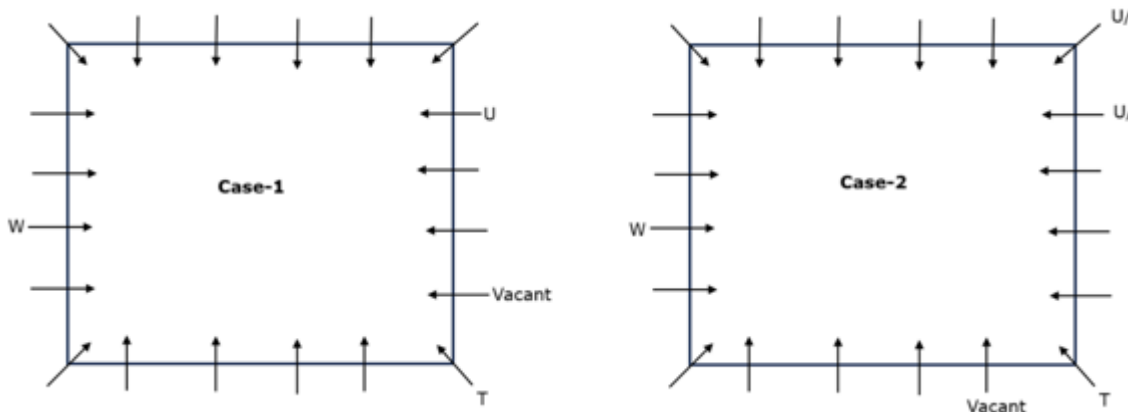

Final Arrangement:

We have:

- The vacant seat is adjacent to T who sits at one of the corners.
- W sits seven seats to the left of T who doesn't sit adjacent to U.
- Only one person sits between U and the one who sits opposite to W.

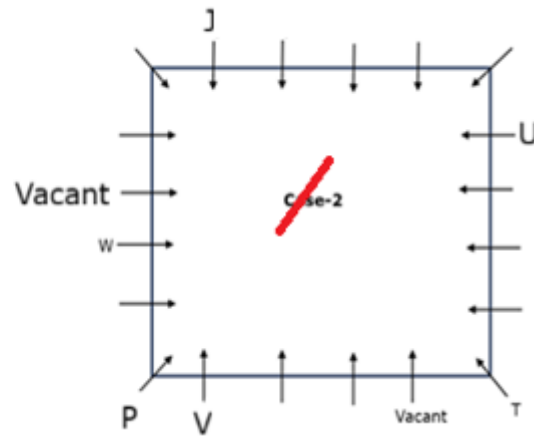

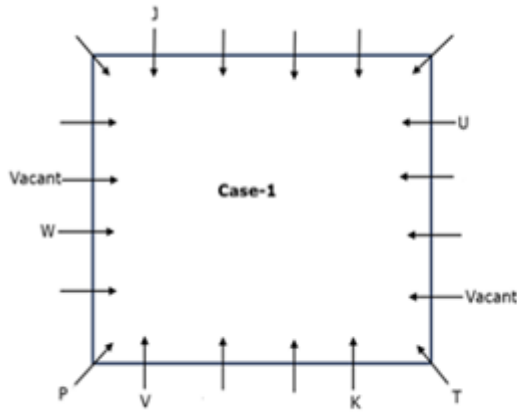

From the above conditions we have two possibilities:

Again, we have:

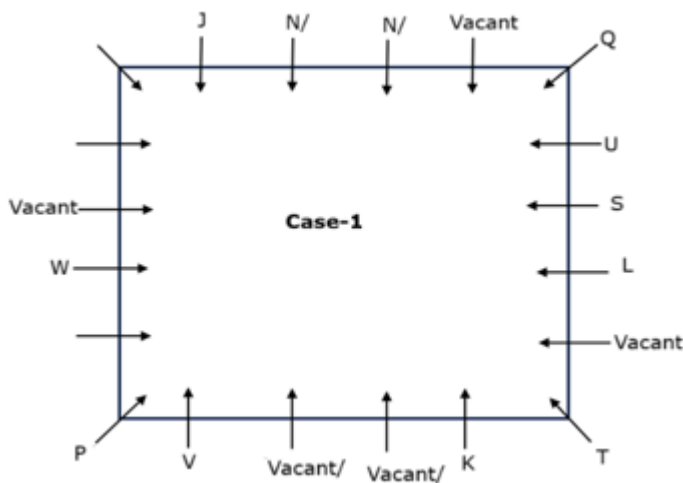

- J seat is fifth to the right of U.
- The seat which is third to the right of J is vacant.
- P sits to the immediate left of V, who sits opposite to J.
- K sits four seats to the right of P.

From the above conditions, case-2 gets eliminated because K sits four seats to the right of P, which is not satisfied.

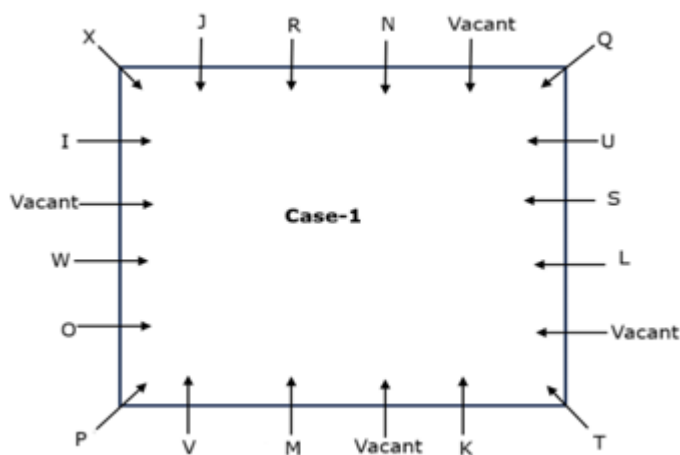

Again, we have:

- N sits opposite to the vacant seat but not on the same side as U and W.
- Q sits adjacent to a vacant seat but does not sit on any side of the table.
- S sits to the immediate right of L, who is not an immediate neighbour of J.

Again, we have:

- The one who sits second to the left of X sits opposite to M.
- Two persons sit between R and I, who sit on the same side as O.

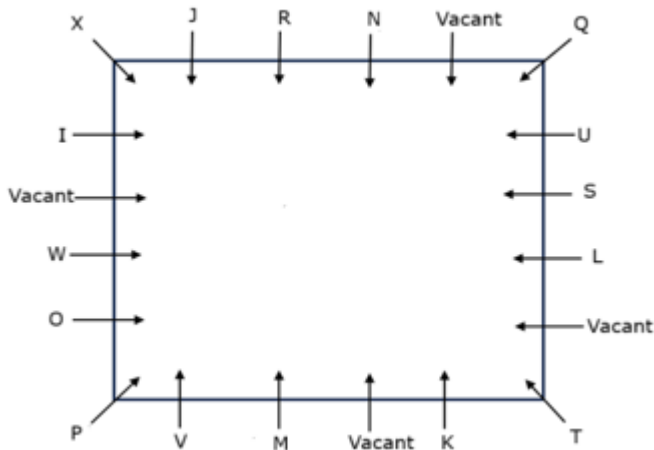

@QuizByMickey

Hence, case-1 shows the final arrangement.

Answer: E

18. Questions

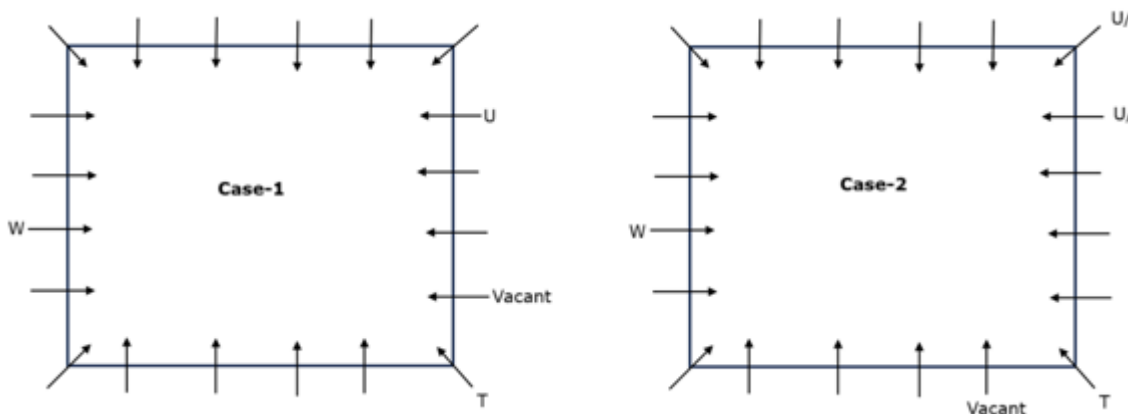

Final Arrangement:

We have:

- The vacant seat is adjacent to T who sits at one of the corners.
- W sits seven seats to the left of T who doesn't sit adjacent to U.
- Only one person sits between U and the one who sits opposite to W.

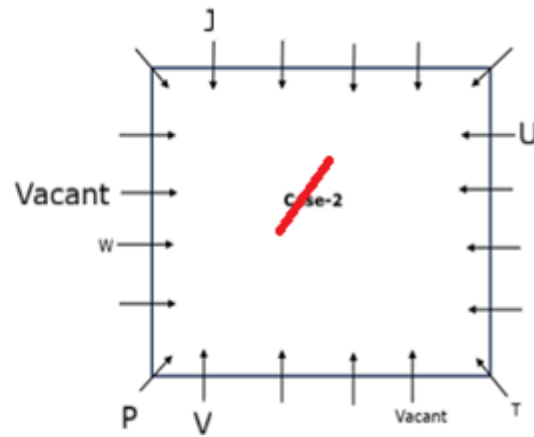

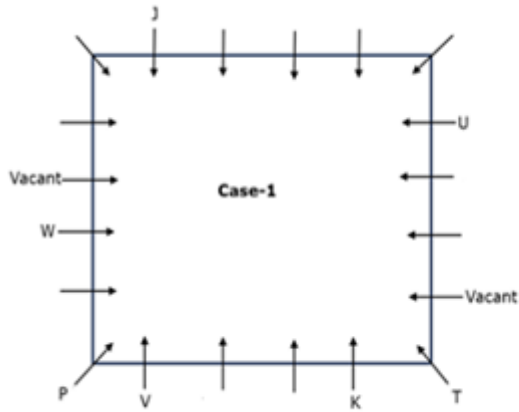

From the above conditions we have two possibilities:

Again, we have:

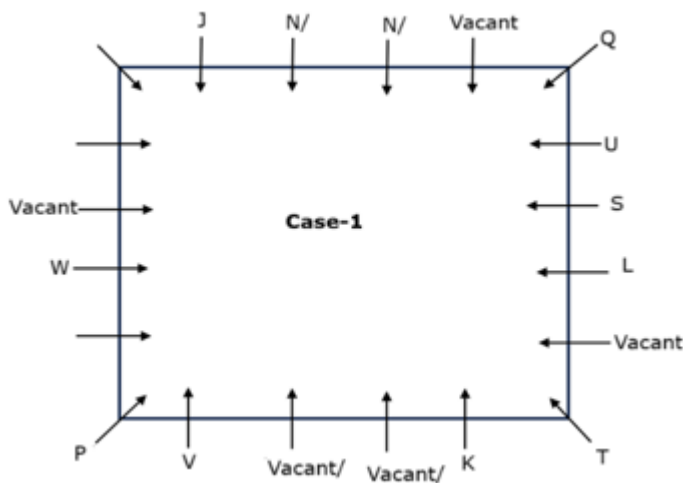

- J seat is fifth to the right of U.
- The seat which is third to the right of J is vacant.
- P sits to the immediate left of V, who sits opposite to J.
- K sits four seats to the right of P.

From the above conditions, case-2 gets eliminated because K sits four seats to the right of P, which is not satisfied.

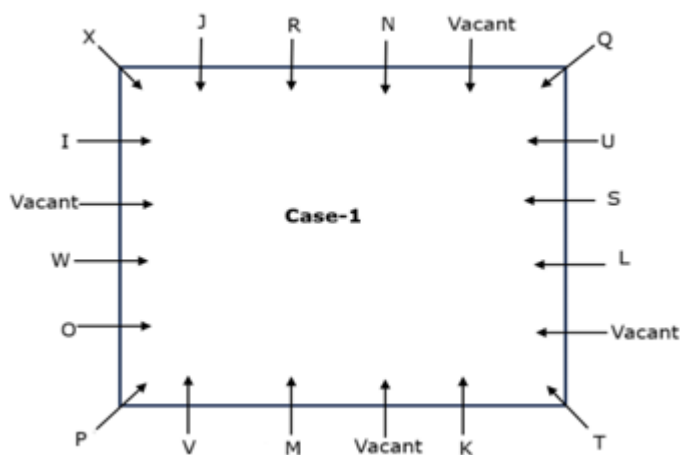

Again, we have:

- N sits opposite to the vacant seat but not on the same side as U and W.
- Q sits adjacent to a vacant seat but does not sit on any side of the table.
- S sits to the immediate right of L, who is not an immediate neighbour of J.

Again, we have:

- The one who sits second to the left of X sits opposite to M.
- Two persons sit between R and I, who sit on the same side as O.

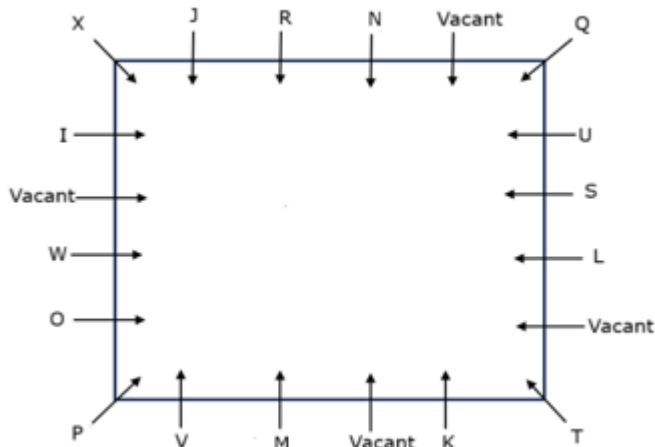

@QuizByMickey

Hence, case-1 shows the final arrangement.

Answer: C

19. Questions

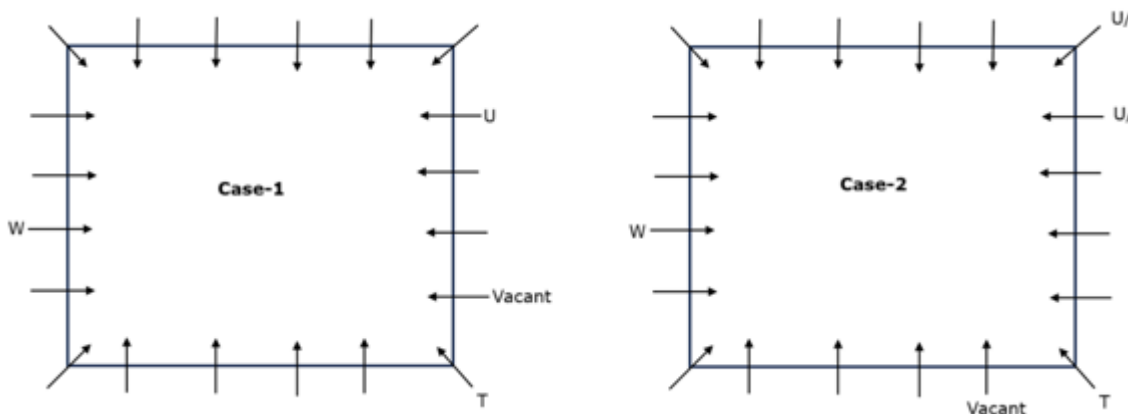

Final Arrangement:

We have:

- The vacant seat is adjacent to T who sits at one of the corners.
- W sits seven seats to the left of T who doesn't sit adjacent to U.
- Only one person sits between U and the one who sits opposite to W.

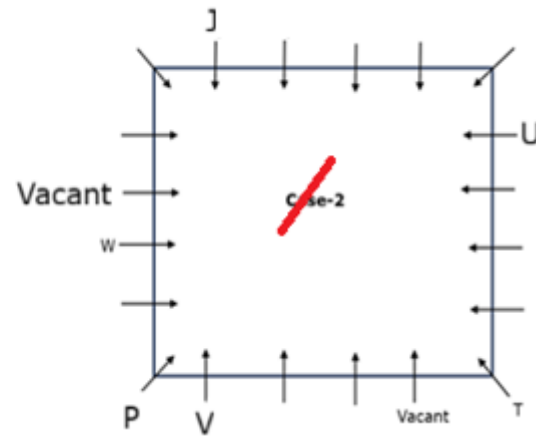

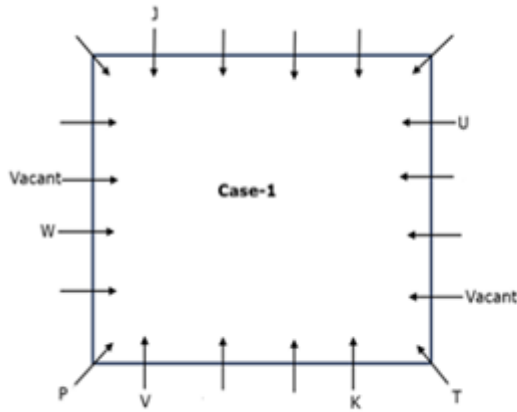

From the above conditions we have two possibilities:

Again, we have:

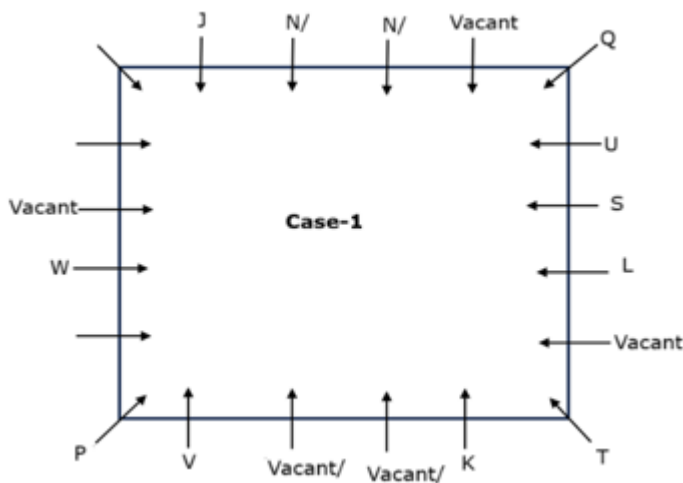

- J seat is fifth to the right of U.
- The seat which is third to the right of J is vacant.
- P sits to the immediate left of V, who sits opposite to J.
- K sits four seats to the right of P.

From the above conditions, case-2 gets eliminated because K sits four seats to the right of P, which is not satisfied.

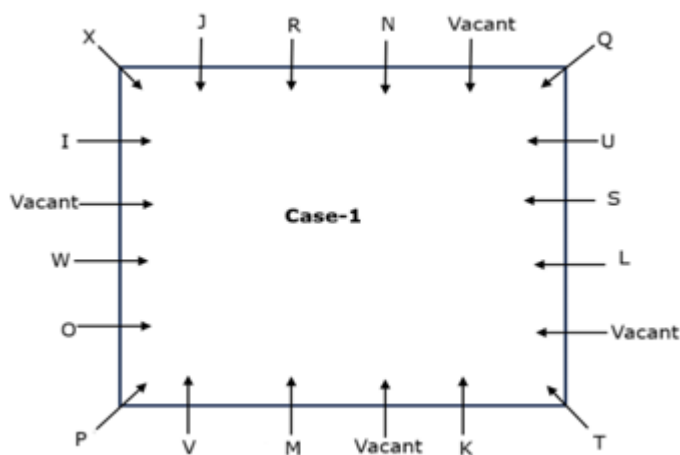

Again, we have:

- N sits opposite to the vacant seat but not on the same side as U and W.
- Q sits adjacent to a vacant seat but does not sit on any side of the table.
- S sits to the immediate right of L, who is not an immediate neighbour of J.

Again, we have:

- The one who sits second to the left of X sits opposite to M.
- Two persons sit between R and I, who sit on the same side as O.

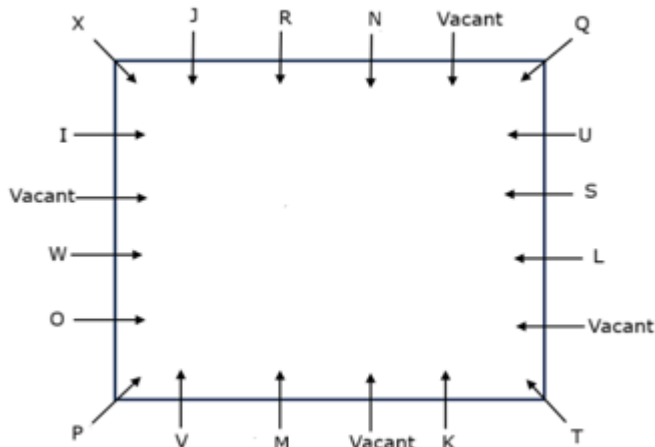

@QuizByMickey

Hence, case-1 shows the final arrangement.

Answer: A

20. Questions

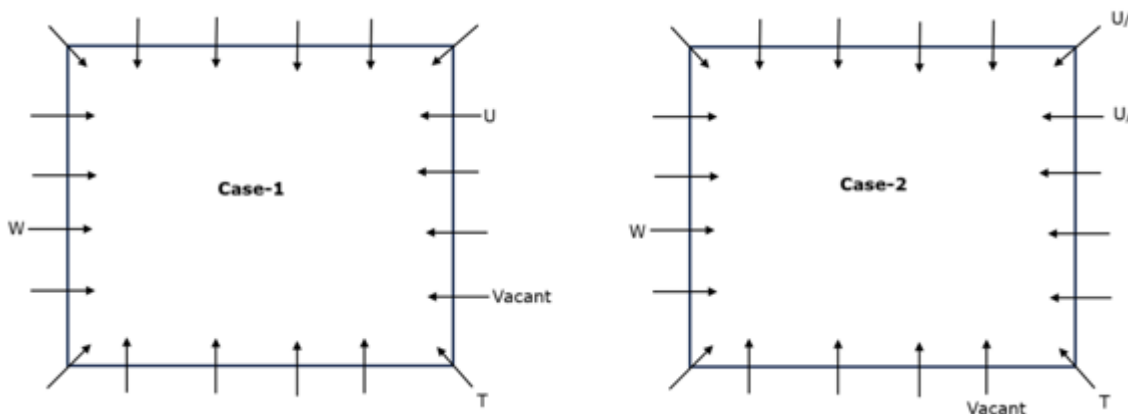

Final Arrangement:

We have:

- The vacant seat is adjacent to T who sits at one of the corners.
- W sits seven seats to the left of T who doesn't sit adjacent to U.
- Only one person sits between U and the one who sits opposite to W.

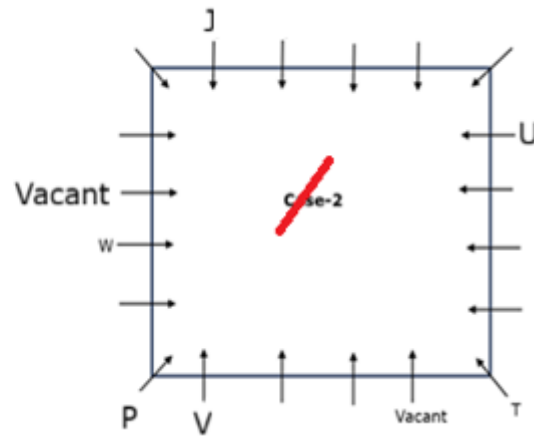

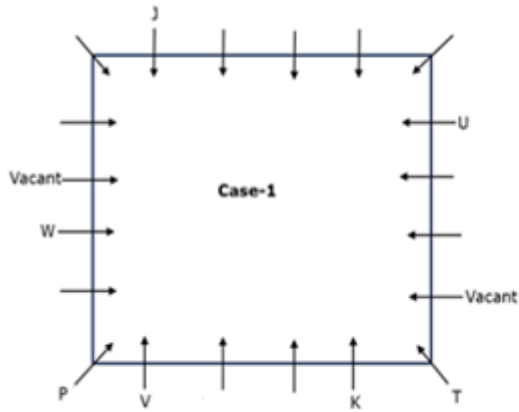

From the above conditions we have two possibilities:

Again, we have:

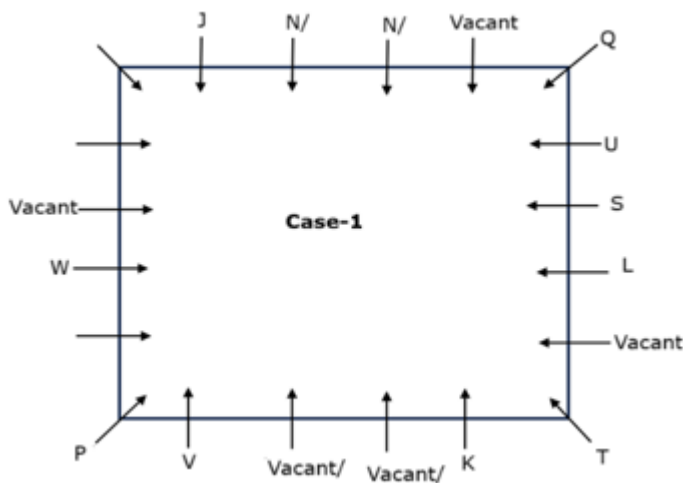

- J seat is fifth to the right of U.
- The seat which is third to the right of J is vacant.
- P sits to the immediate left of V, who sits opposite to J.
- K sits four seats to the right of P.

From the above conditions, case-2 gets eliminated because K sits four seats to the right of P, which is not satisfied.

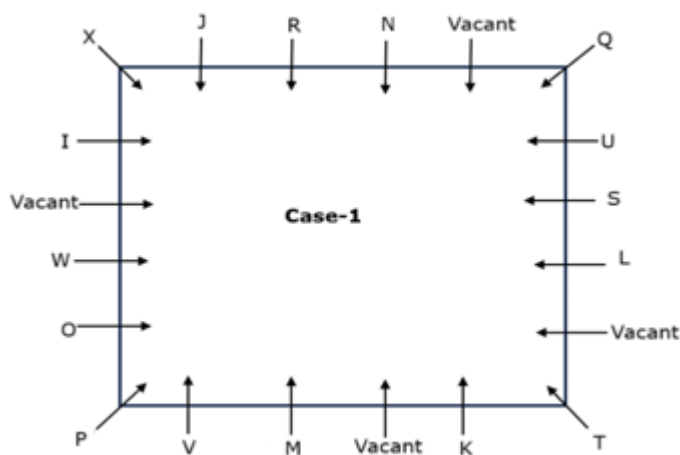

Again, we have:

- N sits opposite to the vacant seat but not on the same side as U and W.
- Q sits adjacent to a vacant seat but does not sit on any side of the table.
- S sits to the immediate right of L, who is not an immediate neighbour of J.

Again, we have:

- The one who sits second to the left of X sits opposite to M.
- Two persons sit between R and I, who sit on the same side as O.

@QuizByMickey

Hence, case-1 shows the final arrangement.

Answer: E (All the persons sit at the corner of the table except option E)
