

1. Questions

Read the following information carefully and answer the questions given below.

Sixteen persons sit on two separate circular tables such that one table has the eight males - A, B, C, D, E, F, G, H (facing inside) and the another one has the eight females - M, N, O, P, Q, R, S, T (facing outside). Each man is married to one woman (Eight couples). Each couple shares the same profession (so a couple = a profession).

The one who is married to B sits second to the right of P. D, who is the chef, is married to M. Only two persons sit between D and the Tailor. N sits second to the right of the one who is the chef. H sits to the immediate right of B, who faces the teacher. The tailor sits opposite to T and the male dentist sits to the immediate left of the teacher. Neither B nor the lawyer is an immediate neighbor of both D and the tailor. T, who is married to C, sits to the immediate left of P. T sits second to the right of the doctor. M is an immediate neighbor of the doctor. The one who is the scientist sits to the immediate left of S, who is not married to B. A, who is the doctor, sits second to the left of the engineer. Neither S nor H is Tailor and the Engineer. The female dentist sits to the immediate left of the teacher. As many persons sit between E and G as between G and F. O sits to the immediate left of Q. F is not a lawyer. O is not a teacher.

How many persons sit between E and D, when counted from the clockwise direction based on the final arrangement?

- a. One
- b. Two
- c. Three
- d. Four
- e. None

2. Questions

Who among the following person sits opposite to the one who is an Engineer on the female table?

- a. The one who is a lawyer
- b. The one who is a Dentist
- c. The one who is the teacher
- d. The one who is a tailor
- e. The one who is a scientist

@QuizByMickey

3. Questions

Who among the following person sits to the immediate right of A based on the final arrangement?

- a. The one who is a lawyer
- b. B
- c. The one who is a tailor

- d. D
- e. The one who is a scientist

4. Questions

Which of the following pairs of persons are immediate neighbours of D as per the final arrangement?

- a. G and the one who is a lawyer
- b. H and E
- c. C and the one who is a doctor
- d. G and F
- e. H and the one who is a dentist

5. Questions

Which of the following statement(s) is/are NOT TRUE with respect to the final arrangement?

- a. A faces D
- b. B's wife is O
- c. H and S is a Lawyer couple
- d. P sits second to the left of O
- e. None of the above

6. Questions

Study the following information carefully and answer the given questions.

A certain number of floors are there in a building where the lowermost floor is numbered one, the one above that is numbered two and so on. Only some of the flats are occupied by some persons.

Note-I: Each floor has two flats, viz., Flat-A and Flat-B, where Flat A is to the west of Flat B.

Note-II: Flat B of floor 2 is immediately above Flat B of floor 1. Similarly, Flat A of floor 3 is immediately above Flat A of floor 2 and so on.

Note-III: Area of each flat on each floor is equal.

Note-IV: There are not more than 17 floors in the building.

D lives on an even-numbered floor, but not above the ninth floor. G lives three floors above D, and they live in different flats. E, who lives on the same floor as H, lives immediately above G. Neither H lives in flat A nor G and E live in different flats. More than three floors are there between H and I, but both live in the same flat. Neither I nor B lives on an odd-numbered floor. A lives to the west of C, who lives three floors above I. C lives on the topmost floor and two floors above F. As many floors above B as below E, but they live in different flats. F lives on the same floor as K. The number of floors between K and B is **one less than** the number of floors between G and J. J lives immediately below B in the same flat.

@QuizByMickey

Who among the following person lives on the topmost floor based on the final arrangement?

- a. I
- b. A
- c. C
- d. Both A and C
- e. F

7. Questions

In which of the following flat and floor does F live as per the final arrangement?

- a. 13, Flat A
- b. 13, Flat B
- c. 15, Flat A
- d. 15, Flat B
- e. 13, Either A or B

8. Questions

How many floors are there between H and J as per the final arrangement?

- a. Same as between E and B
- b. Same as between G and D
- c. Same as between C and J
- d. Same as between H and G
- e. Same as between A and K

9. Questions

How many floors are there in the flat with respect to the final arrangement?

- a. Fifteen
- b. Thirteen
- c. Twelve
- d. Fourteen
- e. Seventeen

@QuizByMickey

10. Questions

Who among the following person lives three floors above J?

- a. The one who lives immediately below H in different flat
- b. F
- c. The one who lives three floors below C in the same flat
- d. K
- e. The one who lives two floors below I in the same flat

11. Questions

Below questions consist of a series of letters followed by some steps following certain rules. Study the following information carefully and answer the questions given below.

Input: S T R A N G E M I N D F O X Y

Step I: S T A R N E G I M N D O F X Y

Step II: T S R A E N I G N M O D X F Y

Step III: R S T N E A N G I D O M Y F X

Step IV: X F Y M O D I G N A E N T S R

Step V: E N T S R X F Y M O D I G N A

Step V is the final output

Input: C O M P U T E R S C R E N C E

Which of the following letters is third from the right end in Step V?

- a. I
- b. E
- c. M
- d. T
- e. P

12. Questions

How many vowels are there in Step III of the given input? @QuizByMickey

- a. Four
- b. Five
- c. Three
- d. Two
- e. Six

13. Questions

Which of the following letter is fourth to the right of the seventh letter from the left in Step II?

- a. R
- b. N
- c. D
- d. X
- e. M

14. Questions

Which of the following letters remain unchanged in their position in the Step II with respect to the given input?

- a. C
- b. O
- c. E
- d. R
- e. All of these

15. Questions

If all the letters in Step III are arranged in reverse order from left to right, then which of the following letters will be eighth from the left end?

- a. E
- b. R
- c. T
- d. M
- e. I

16. Questions

Study the following information carefully and answer the given questions.

Statement:

In a university, it is observed that "all professors are teachers" and "some teachers are researchers." The management also confirms that "no researcher is a student," while "some students are learners". The vice-chancellor mentions that "some teachers are not researchers."

Conclusions:

- I). Some professors are researchers.
- II). Some learners are not researchers.

III). No student is a professor.

IV). Some teachers being learners is a possibility.

- a. Only I follows
- b. Only I, II and III follows
- c. Only II and IV follows
- d. Only II follows
- e. All follows

17. Questions

Statement:

During a survey, it was found that "all cars are vehicles" and "some vehicles are electric items". The report adds that "no electric item is noisy things" and "all noisy things are mechanical". It's also known that "some vehicles are not mechanical."

Conclusions:

- I). Some cars are electric items.
- II). Some mechanical are vehicles.
- III). Some vehicles are not noisy things.
- IV). No electric item is mechanical.

- a. Only III follows
- b. Only I, II and III follows
- c. Only II and III follows
- d. Only II follows
- e. All follows

18. Questions

Statement:

In an organization, it was noted that "no manager is an employee," and "some employees are leaders". The HR department reported that "no leader is temporary," and "all temporary are trainees". It's also known that "some employees are not leaders."

Conclusions:

- I). Some managers are trainees.
- II). Some employees are not temporary.
- III). No trainee is a leader.

@QuizByMickey

IV). Some leaders being managers is a possibility.

- a. Only I follows
- b. Only II and IV follows
- c. Only II and III follows
- d. Only III follows
- e. All follows

19. Questions

Statement:

A recent report on education mentions that "all scientists are researchers" and "no researcher is lecturer". It also says that "some lecturers are uneducated" and "some uneducated are not ordinary". Moreover, "some lecturers are not uneducated."

Conclusions:

- I). Some scientists are lecturers.
 - II). Some lecturers can be ordinary.
 - III). No uneducated is scientist.
 - IV). Some researchers can be uneducated.
- a. Only I follows
 - b. Only I, II and III follows
 - c. Only II and III follows
 - d. Only II follows
 - e. Only II and IV follows

20. Questions

Statement:

In a technology firm, it was observed that "some programmers are coders" and "no coder is designer". The operations head said that "all designers are testers" and "some testers are analysts". It is also noted that "some testers are not analysts."

Conclusions:

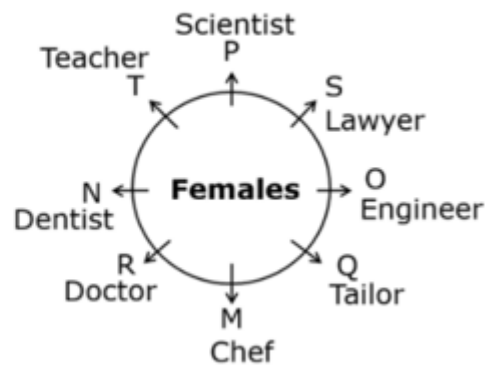

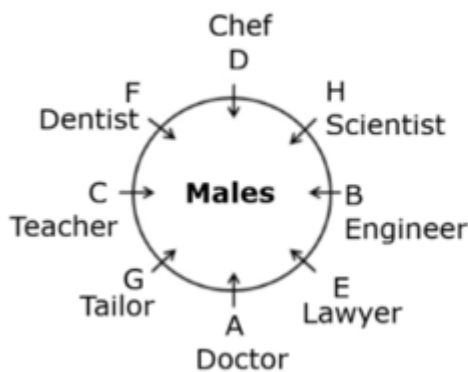

- I). Some programmers are designers.
- II). Some designers are analysts.
- III). No tester is a programmer.
- IV). Some coders being analysts is a possibility.

- Only I follows
- Only I, II and III follows
- Only II and III follows
- Only IV follows
- All follows

Explanations:

1. Questions

Final Arrangement:

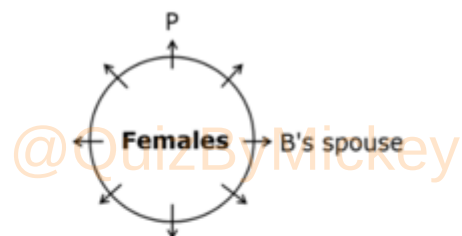

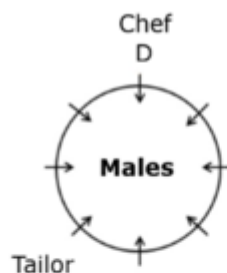

We have,

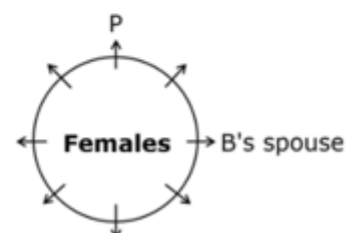

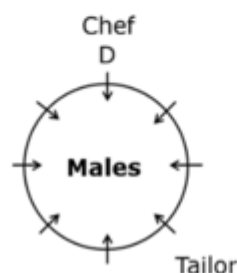

- The one who is married to B sits second to the right of P.
- D, who is the chef, is married to M.
- Only two persons sit between D and the Tailor.

From the above condition, there are two possibilities.

Case-1

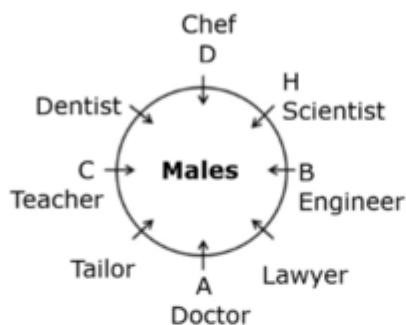

Case-2

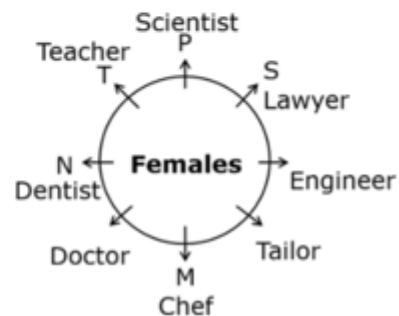

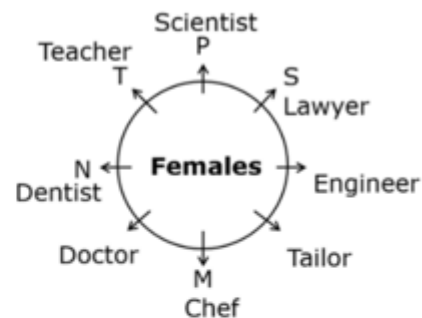

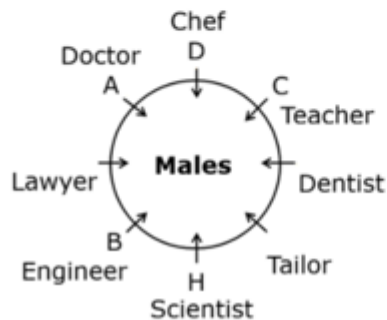

Again, we have,

- N sits second to the right of the one who is the chef.
- H sits to the immediate right of B, who faces the teacher.
- The tailor sits opposite to T and the male dentist sits to the immediate left of the teacher.
- Neither B nor the lawyer is an immediate neighbor of both D and the tailor.
- T, who is married to C, sits to the immediate left of P. T sits second to the right of the doctor.
- M is an immediate neighbor of the doctor.
- The one who is the scientist sits to the immediate left of S, who is not married to B.
- A, who is the doctor, sits second to the left of the engineer.
- Neither S nor H is both the Tailor and the Engineer.
- F is not a lawyer. O is not a teacher.
- The female dentist sits to the immediate left of the teacher.

Case-1

Case-2

Again, we have,

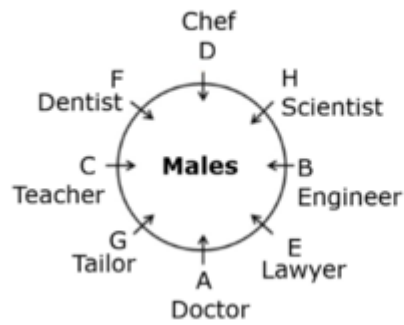

- As many persons sit between E and G as between G and F.
- O sits to the immediate left of Q.
- F is not a lawyer.

From the above condition, case-2 gets eliminated because as many persons sit between E and G as between G and F, which is not satisfied.

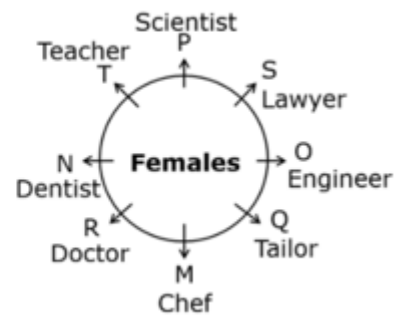

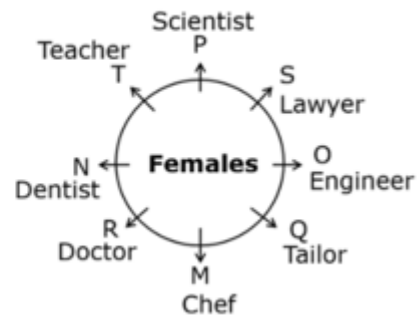

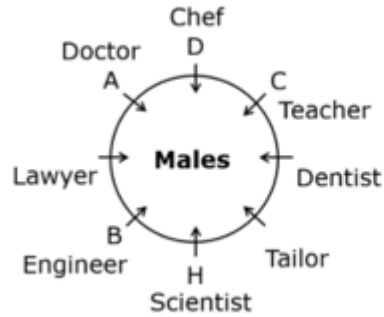

Hence, case-1 shows the final arrangement.

@QuizByMickey

Case-1

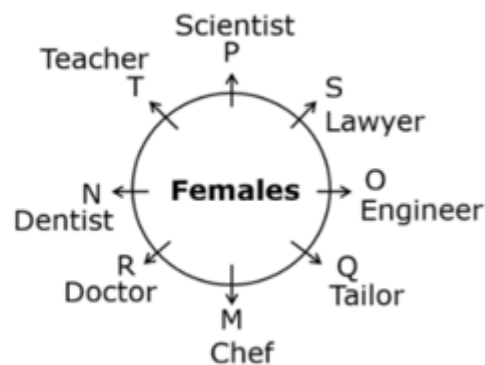

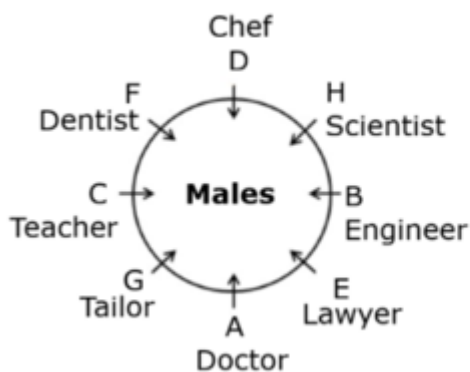

~~Case-2~~

Answer: D

2. Questions

Final Arrangement:

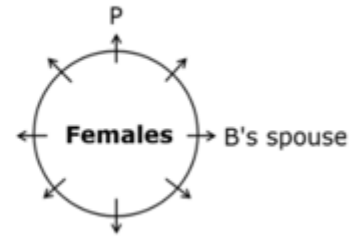

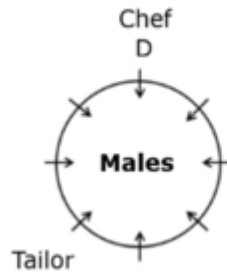

We have,

- The one who is married to B sits second to the right of P.
- D, who is the chef, is married to M.
- Only two persons sit between D and the Tailor.

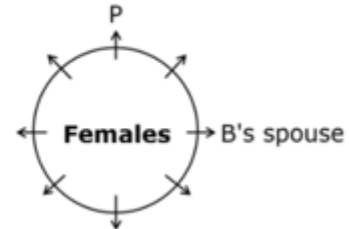

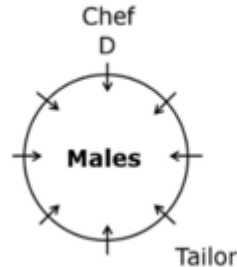

@QuizByMickey

From the above condition, there are two possibilities.

Case-1

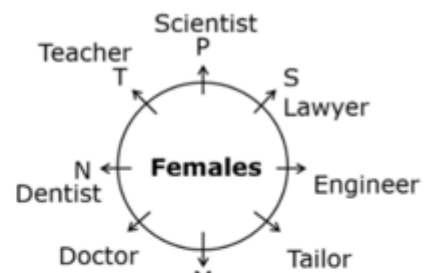

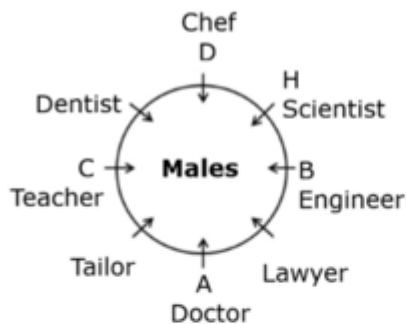

Case-2

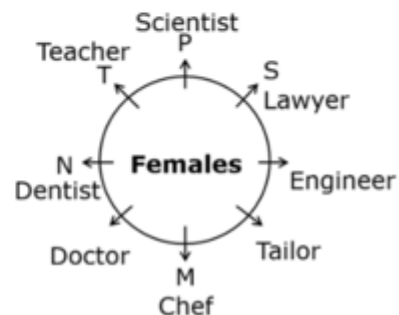

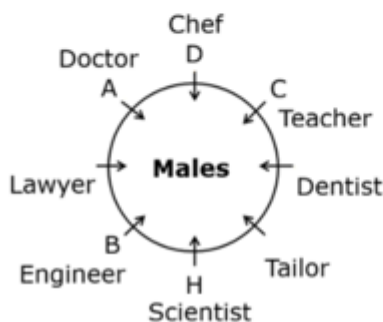

Again, we have,

- N sits second to the right of the one who is the chef.
- H sits to the immediate right of B, who faces the teacher.
- The tailor sits opposite to T and the male dentist sits to the immediate left of the teacher.
- Neither B nor the lawyer is an immediate neighbor of both D and the tailor.
- T, who is married to C, sits to the immediate left of P. T sits second to the right of the doctor.
- M is an immediate neighbor of the doctor.
- The one who is the scientist sits to the immediate left of S, who is not married to B.
- A, who is the doctor, sits second to the left of the engineer.
- Neither S nor H is both the Tailor and the Engineer.
- F is not a lawyer. O is not a teacher.
- The female dentist sits to the immediate left of the teacher.

Case-1

Case-2

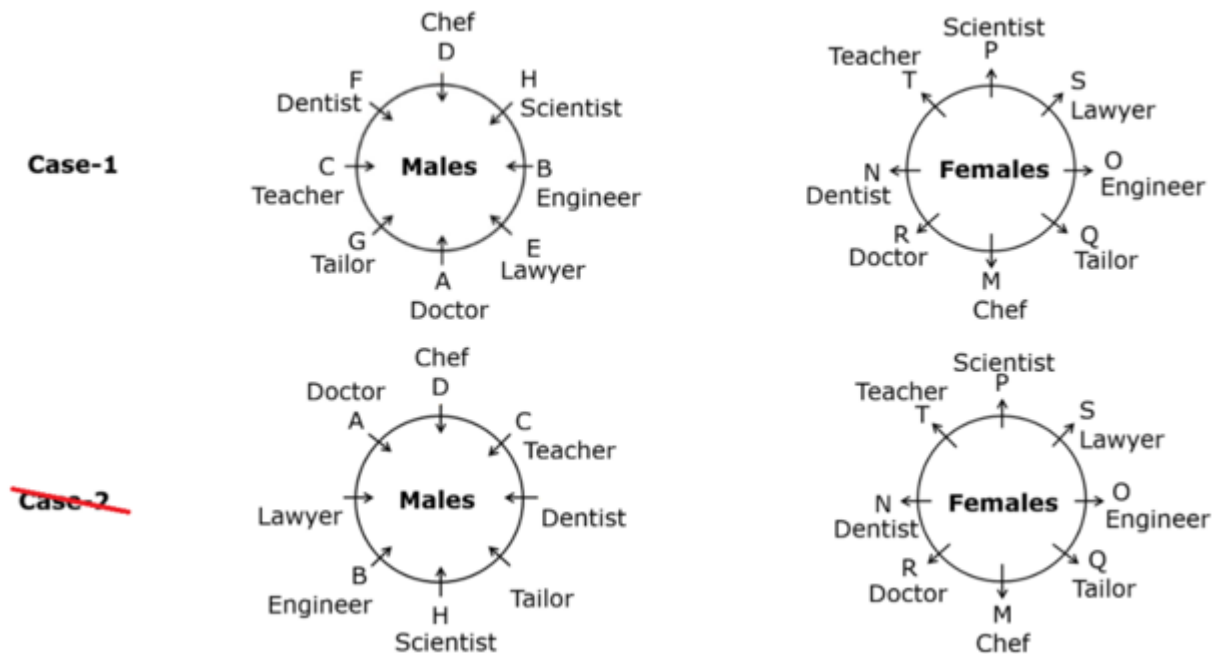

Again, we have,

- As many persons sit between E and G as between G and F.
- O sits to the immediate left of Q.
- F is not a lawyer.

From the above condition, case-2 gets eliminated because as many persons sit between E and G as between G and F, which is not satisfied.

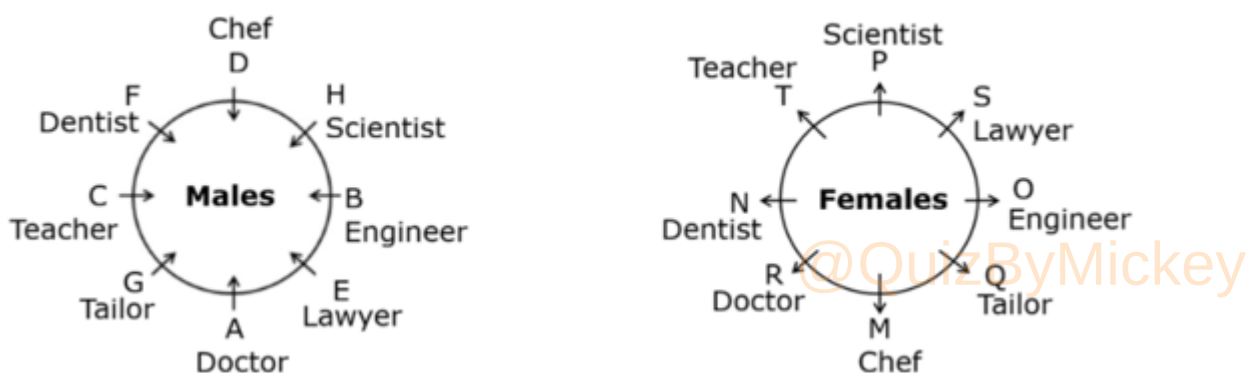

Hence, case-1 shows the final arrangement.

Answer: B

3. Questions

Final Arrangement:

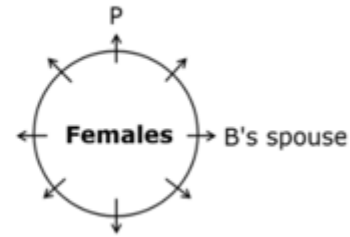

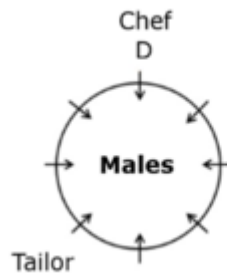

We have,

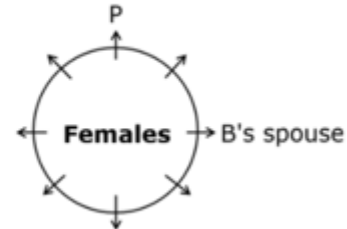

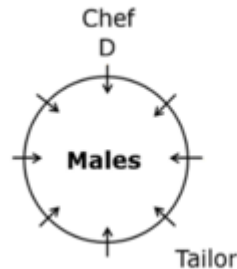

- The one who is married to B sits second to the right of P.
- D, who is the chef, is married to M.
- Only two persons sit between D and the Tailor.

From the above condition, there are two possibilities.

Case-1

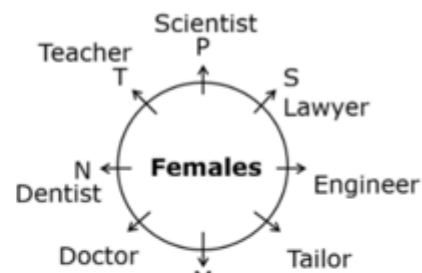

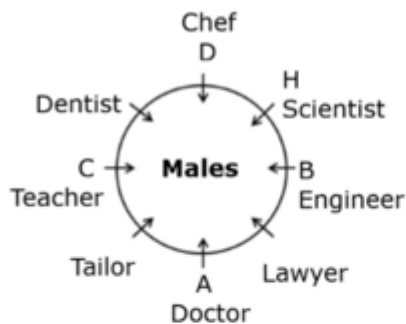

Case-2

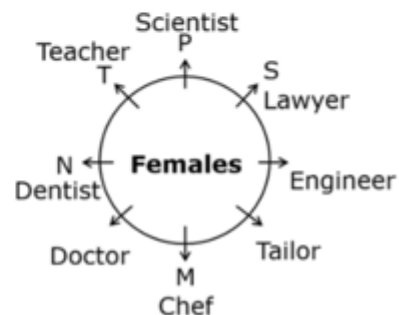

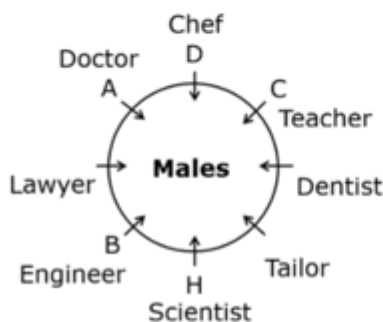

Again, we have,

- N sits second to the right of the one who is the chef.
- H sits to the immediate right of B, who faces the teacher.
- The tailor sits opposite to T and the male dentist sits to the immediate left of the teacher.
- Neither B nor the lawyer is an immediate neighbor of both D and the tailor.
- T, who is married to C, sits to the immediate left of P. T sits second to the right of the doctor.
- M is an immediate neighbor of the doctor.
- The one who is the scientist sits to the immediate left of S, who is not married to B.
- A, who is the doctor, sits second to the left of the engineer.
- Neither S nor H is both the Tailor and the Engineer.
- F is not a lawyer. O is not a teacher.
- The female dentist sits to the immediate left of the teacher.

Case-1

Case-2

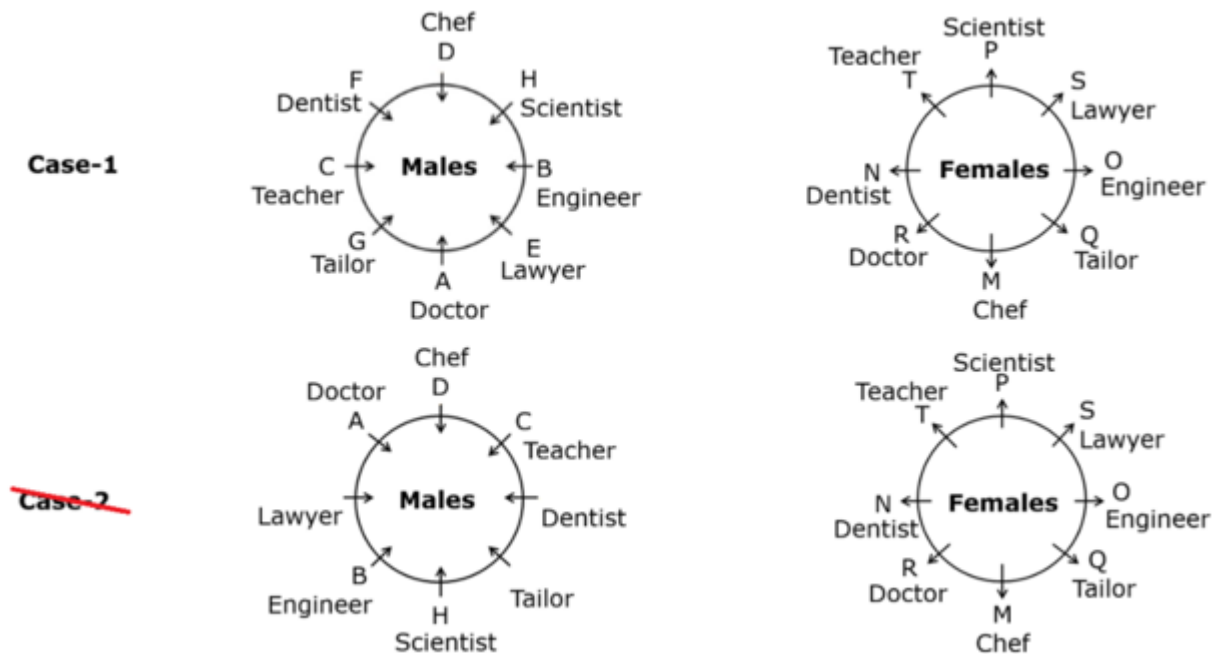

Again, we have,

- As many persons sit between E and G as between G and F.
- O sits to the immediate left of Q.
- F is not a lawyer.

From the above condition, case-2 gets eliminated because as many persons sit between E and G as between G and F, which is not satisfied.

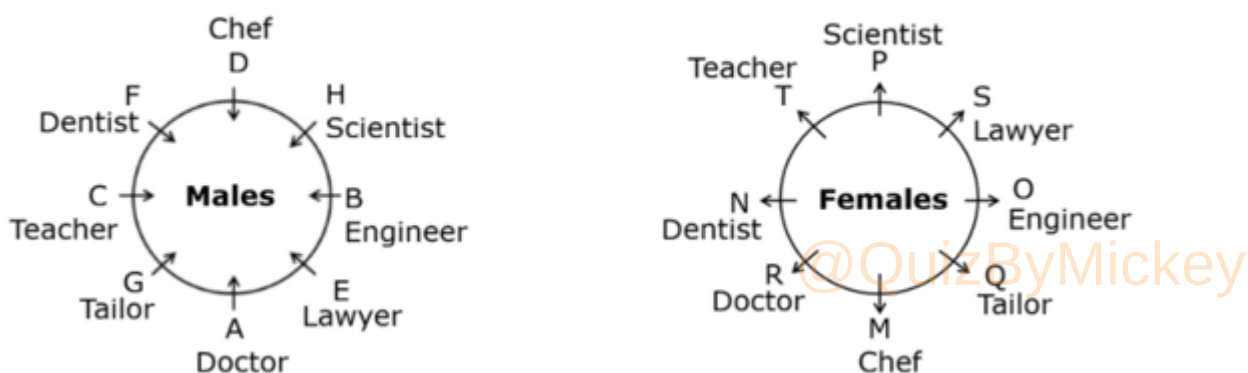

Hence, case-1 shows the final arrangement.

Answer: A

4. Questions

Final Arrangement:

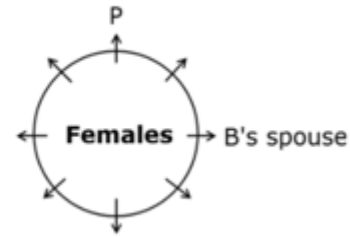

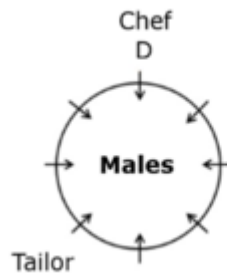

We have,

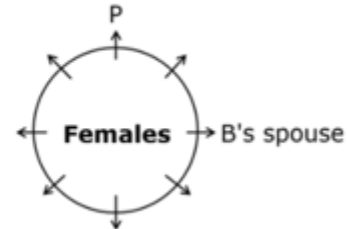

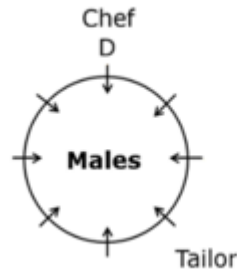

- The one who is married to B sits second to the right of P.
- D, who is the chef, is married to M.
- Only two persons sit between D and the Tailor.

From the above condition, there are two possibilities.

Case-1

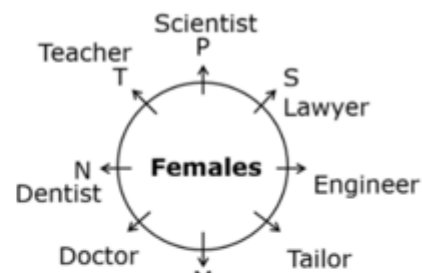

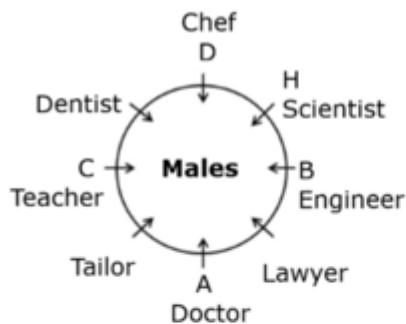

Case-2

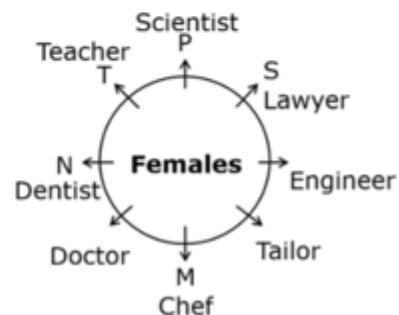

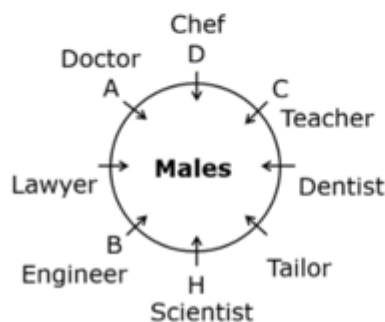

Again, we have,

- N sits second to the right of the one who is the chef.
- H sits to the immediate right of B, who faces the teacher.
- The tailor sits opposite to T and the male dentist sits to the immediate left of the teacher.
- Neither B nor the lawyer is an immediate neighbor of both D and the tailor.
- T, who is married to C, sits to the immediate left of P. T sits second to the right of the doctor.
- M is an immediate neighbor of the doctor.
- The one who is the scientist sits to the immediate left of S, who is not married to B.
- A, who is the doctor, sits second to the left of the engineer.
- Neither S nor H is both the Tailor and the Engineer.
- F is not a lawyer. O is not a teacher.
- The female dentist sits to the immediate left of the teacher.

Case-1

Case-2

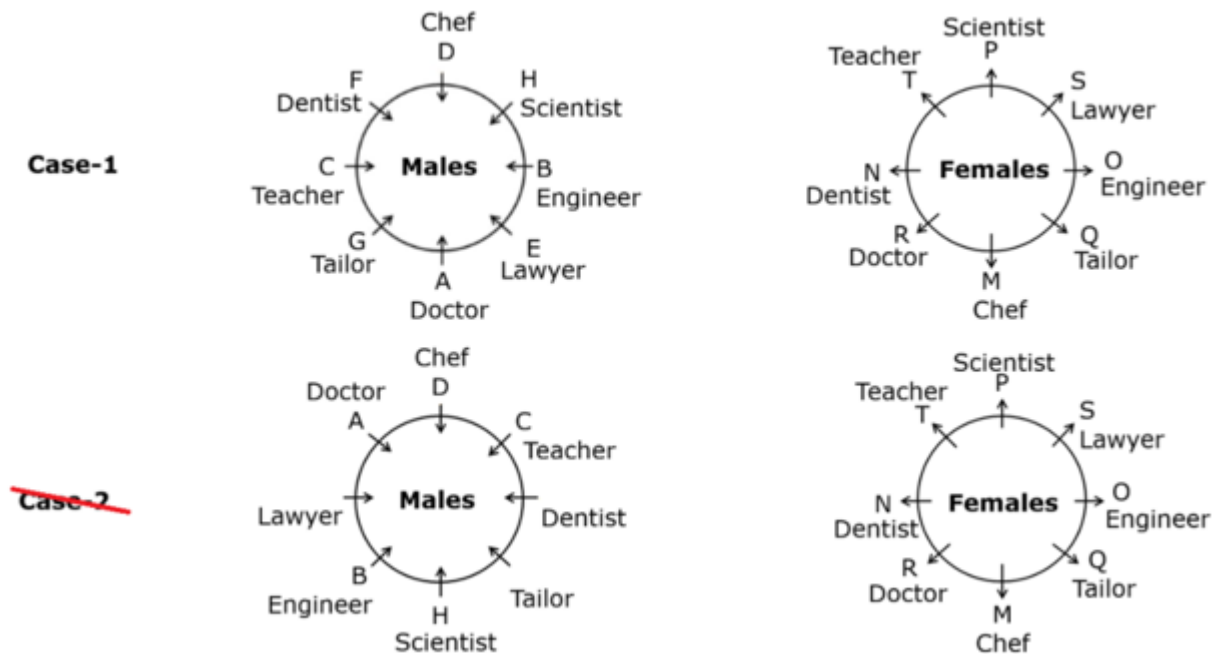

Again, we have,

- As many persons sit between E and G as between G and F.
- O sits to the immediate left of Q.
- F is not a lawyer.

From the above condition, case-2 gets eliminated because as many persons sit between E and G as between G and F, which is not satisfied.

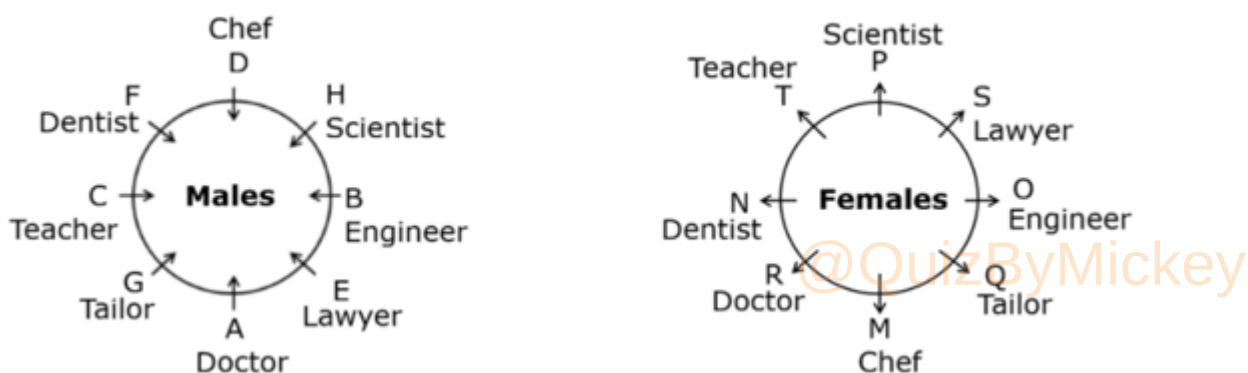

Hence, case-1 shows the final arrangement.

Answer: E

5. Questions

Final Arrangement:

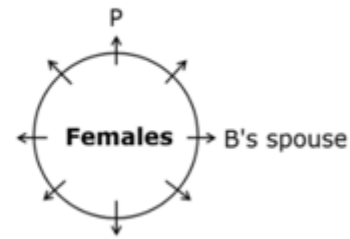

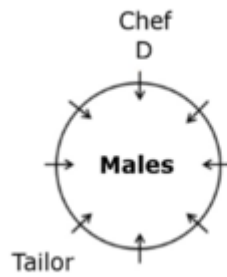

We have,

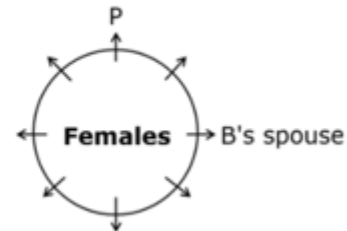

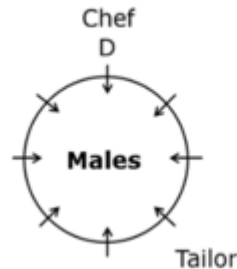

- The one who is married to B sits second to the right of P.
- D, who is the chef, is married to M.
- Only two persons sit between D and the Tailor.

From the above condition, there are two possibilities.

Case-1

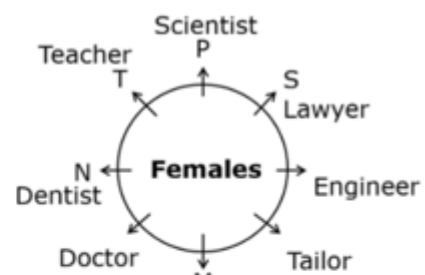

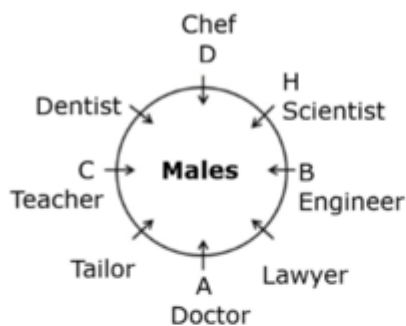

Case-2

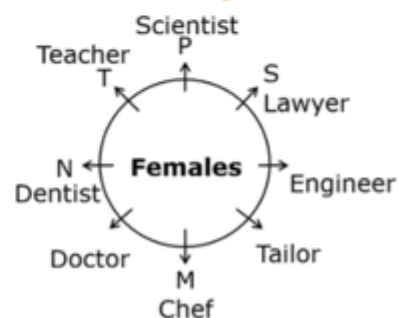

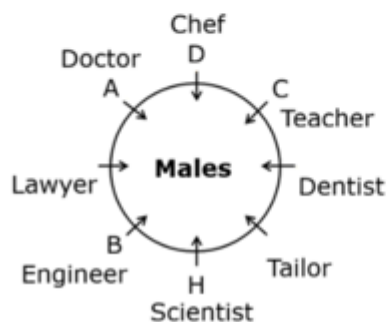

Again, we have,

- N sits second to the right of the one who is the chef.
- H sits to the immediate right of B, who faces the teacher.
- The tailor sits opposite to T and the male dentist sits to the immediate left of the teacher.
- Neither B nor the lawyer is an immediate neighbor of both D and the tailor.
- T, who is married to C, sits to the immediate left of P. T sits second to the right of the doctor.
- M is an immediate neighbor of the doctor.
- The one who is the scientist sits to the immediate left of S, who is not married to B.
- A, who is the doctor, sits second to the left of the engineer.
- Neither S nor H is both the Tailor and the Engineer.
- F is not a lawyer. O is not a teacher.
- The female dentist sits to the immediate left of the teacher.

Case-1

Case-2

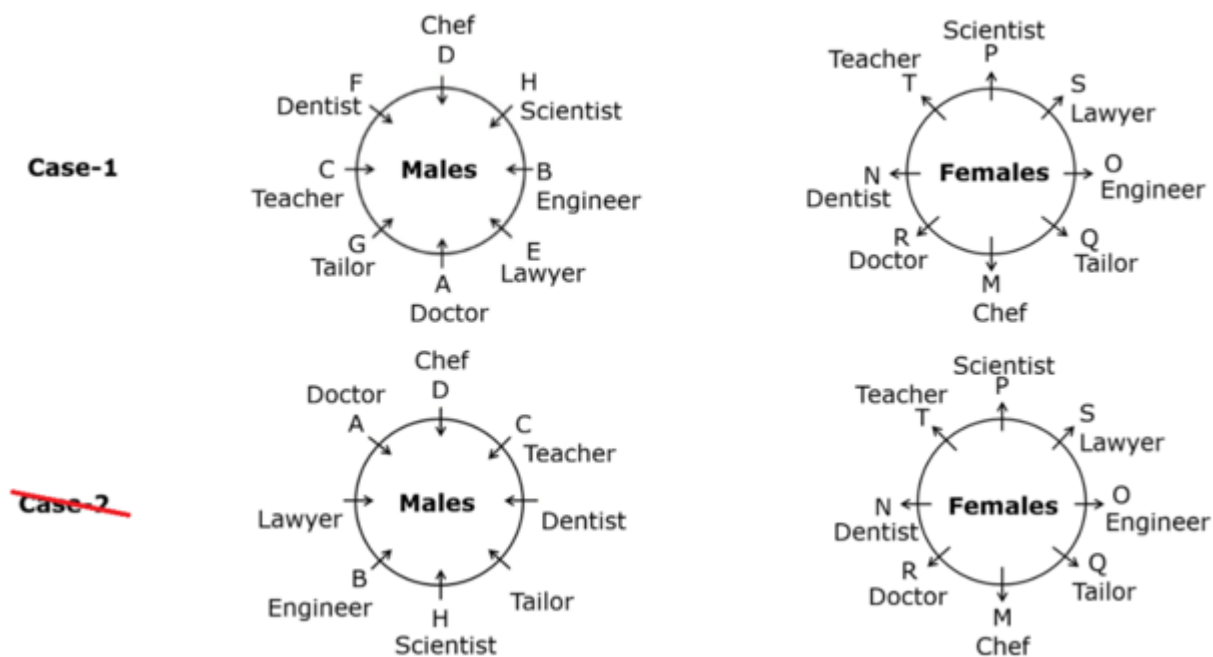

Again, we have,

- As many persons sit between E and G as between G and F.
- O sits to the immediate left of Q.
- F is not a lawyer.

From the above condition, case-2 gets eliminated because as many persons sit between E and G as between G and F, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: C

6. Questions

Final arrangement:

@QuizByMickey

Floors	Flat A	Flat B
15	A	C
14		
13	F/K	F/K
12		I
11		
10		B
9		J
8		
7		
6	E	H
5	G	
4		
3		
2		D
1		

We have,

- D lives on an even-numbered floor, but not above the ninth floor.
- G lives three floors above D, and they live in different flats.
- E, who lives on the same floor as H, lives immediately above G.
- Neither H lives in flat A nor G and E live in different flats.

From the above conditions, there are three possibilities.

	Case-1		Case-2		Case-3		Case-4	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17								
16								
15								
14								
13								
12							E	H
11							G	
10					E	H		
9					G			
8			E	H				D
7			G					
6	E	H				D		
5	G							
4				D				
3								
2		D						
1								

Again, we have,

- More than three floors are there between H and I, but both live in the same flat.
- Neither I nor B lives on an odd-numbered floor.
- A lives to the west of C, who lives three floors above I.
- C lives on the topmost floor and two floors above F.
- As many floors above B as below E, but they live in different flats.
- F lives on the same floor as K.

From the above conditions, case-1 splits into case-1a.

From the above conditions, case-3 and case-4 get eliminated because A lives to the west of C, who lives three floors above I, which is not satisfied.

	Case-1		Case-2		Case-3		Case-4		Case-1a	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17	A	C	A	C				I	A	C

- G lives three floors above D, and they live in different flats.
- E, who lives on the same floor as H, lives immediately above G.
- Neither H lives in flat A nor G and E live in different flats.

From the above conditions, there are three possibilities.

	Case-1		Case-2		Case-3		Case-4	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17								
16								
15								
14								
13								
12							E	H
11							G	
10					E	H		
9					G			
8			E	H				D
7			G					
6	E	H				D		
5	G							
4				D				
3								
2		D						
1								

Again, we have,

- More than three floors are there between H and I, but both live in the same flat.
- Neither I nor B lives on an odd-numbered floor.
- A lives to the west of C, who lives three floors above I.
- C lives on the topmost floor and two floors above F.
- As many floors above B as below E, but they live in different flats.
- F lives on the same floor as K.

From the above conditions, case-1 splits into case-1a.

From the above conditions, case-3 and case-4 get eliminated because A lives to the west of C, who lives three floors above I, which is not satisfied.

	Case-1		Case-2		Case-3		Case-4		Case-1a	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17	A	C	A	C				I	A	C
16										
15			F/K	F/K		I			F/K	F/K
14				I						I
13	F/K	F/K								
12		I					E	H		B
11							G			
10		B		B	E	H				
9					G					
8			E	H				D		
7			G							
6	E	H				D			E	H
5	G								G	
4				D						
3										
2		D								D
1										

Again, we have,

- The number of floors between K and B is **one less than** the number of floors between G and J.
- J lives immediately below B in the same flat.

From the above conditions, case-1 and case-3 get eliminated because J lives immediately below B in the same flat, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Case-1		Case-2		Case-1a	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17			A	C	A	C
16						
15	A	C	F/K	F/K	F/K	F/K
14				I		I
13	F/K	F/K		J		
12		I				B
11						
10		B		B		
9		J				J
8			E	H		
7			G			
6	E	H			E	H
5	G				G	
4				D		
3						
2		D				D
1						

Answer: A

10. Questions

Final arrangement:

@QuizByMickey

Floors	Flat A	Flat B
15	A	C
14		
13	F/K	F/K
12		I
11		
10		B
9		J
8		
7		
6	E	H
5	G	
4		
3		
2		D
1		

We have,

- D lives on an even-numbered floor, but not above the ninth floor.
- G lives three floors above D, and they live in different flats.
- E, who lives on the same floor as H, lives immediately above G.
- Neither H lives in flat A nor G and E live in different flats.

From the above conditions, there are three possibilities.

	Case-1		Case-2		Case-3		Case-4	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17								
16								
15								
14								
13								
12							E	H
11							G	
10					E	H		
9					G			
8			E	H				D
7			G					
6	E	H				D		
5	G							
4				D				
3								
2		D						
1								

Again, we have,

- More than three floors are there between H and I, but both live in the same flat.
- Neither I nor B lives on an odd-numbered floor.
- A lives to the west of C, who lives three floors above I.
- C lives on the topmost floor and two floors above F.
- As many floors above B as below E, but they live in different flats.
- F lives on the same floor as K.

From the above conditions, case-1 splits into case-1a.

From the above conditions, case-3 and case-4 get eliminated because A lives to the west of C, who lives three floors above I, which is not satisfied.

	Case-1		Case-2		Case-3		Case-4		Case-1a	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17	A	C	A	C				I	A	C
16										
15			F/K	F/K		I			F/K	F/K
14				I						I
13	F/K	F/K								
12		I					E	H		B
11							G			
10		B		B	E	H				
9					G					
8			E	H				D		
7			G							
6	E	H				D			E	H
5	G								G	
4				D						
3										
2		D								D
1										

Again, we have,

- The number of floors between K and B is **one less than** the number of floors between G and J.
- J lives immediately below B in the same flat.

From the above conditions, case-1 and case-3 get eliminated because J lives immediately below B in the same flat, which is not satisfied.

Hence, case-1 shows the final arrangement.

	Case-1		Case-2		Case-1a	
Floors	Flat A	Flat B	Flat A	Flat B	Flat A	Flat B
17			A	C	A	C
16						
15	A	C	F/K	F/K	F/K	F/K
14				I		I
13	F/K	F/K		J		
12		I				B
11						
10		B		B		
9		J				J
8			E	H		
7			G			
6	E	H			E	H
5	G				G

@QuizByMickey

Answer: C

11. Questions

COMPUTER SCIENCE

For step I: Interchange all the vowels with its immediate preceding letter in the given input.

Step I: O C M U P E T R S C E R N E C

For step II: The first letter is interchanged with the second letter, the third letter is interchanged with the fourth letter and so on till the last two letters. Keep the last letter unchanged.

Step II: C O U M E P R T C S R E E N C

For step III: The first letter is interchanged with the third letter from the left end, while the second letter remains unchanged. Similarly, the fourth letter is interchanged with the sixth letter, while the fifth letter remains unchanged and so on

Step III: U O C P E M C T R E R S C N E

For step IV: All letters are reversed.

Step IV: E N C S R E R T C M E P C O U

For Step V: Arrange the first five letters from the right end at the beginning of the sequence without changing the order.

Step V: E P C O U E N C S R E R T C M

Answer: D

Step V: E P C O U E N C S R E R T C M

The third letter from the right end in Step V is **T**.

12. Questions

C O M P U T E R S C R E N C E

For step I: Interchange all the vowels with its immediate preceding letter in the given input.

Step I: O C M U P E T R S C E R N E C

For step II: The first letter is interchanged with the second letter, the third letter is interchanged with the fourth letter and so on till the last two letters. Keep the last letter unchanged.

Step II: C O U M E P R T C S R E E N C

For step III: The first letter is interchanged with the third letter from the left end, while the second letter remains unchanged. Similarly, the fourth letter is interchanged with the sixth letter, while the fifth letter remains unchanged and so on

Step III: U O C P E M C T R E R S C N E

For step IV: All letters are reversed.

Step IV: E N C S R E R T C M E P C O U

For Step V: Arrange the first five letters from the right end at the beginning of the sequence without changing the order.

Step V: E P C O U E N C S R E R T C M

Answer: B

Step III: U O C P E M C T R E R S C N E

There are **FIVE** vowels in Step III of the given input.

13. Questions

COMPUTERSCRENC E

For step I: Interchange all the vowels with its immediate preceding letter in the given input.

Step I: O C M U P E T R S C E R N E C

For step II: The first letter is interchanged with the second letter, the third letter is interchanged with the fourth letter and so on till the last two letters. Keep the last letter unchanged.

Step II: C O U M E P R T C S R E E N C

For step III: The first letter is interchanged with the third letter from the left end, while the second letter remains unchanged. Similarly, the fourth letter is interchanged with the sixth letter, while the fifth letter remains unchanged and so on

Step III: U O C P E M C T R E R S C N E

For step IV: All letters are reversed.

Step IV: E N C S R E R T C M E P C O U

For Step V: Arrange the first five letters from the right end at the beginning of the sequence without changing the order.

Step V: E P C O U E N C S R E R T C M

Answer: A

Step II: C O U M E P R T C S **R** E E N C

The fourth to the right of the seventh letter from the left in Step II is **R**.

14. Questions

COMPUTERSCRENC E

For step I: Interchange all the vowels with its immediate preceding letter in the given input.

Step I: O C M U P E T R S C E R N E C

For step II: The first letter is interchanged with the second letter, the third letter is interchanged with the fourth letter and so on till the last two letters. Keep the last letter unchanged.

Step II: C O U M E P R T C S R E E N C

For step III: The first letter is interchanged with the third letter from the left end, while the second letter remains unchanged. Similarly, the fourth letter is interchanged with the sixth letter, while the fifth letter remains unchanged and so on

Step III: U O C P E M C T R E R S C N E

For step IV: All letters are reversed.

Step IV: E N C S R E R T C M E P C O U

For Step V: Arrange the first five letters from the right end at the beginning of the sequence without changing the order.

Step V: E P C O U E N C S R E R T C M

Answer: E

C O M P U T E R S C R E N C E

Step II: C O U M E P R T C S R E E N C

C, O, R and E remain unchanged in their position in the Step II of the given input.

15. Questions

C O M P U T E R S C R E N C E

For step I: Interchange all the vowels with its immediate preceding letter in the given input.

Step I: O C M U P E T R S C E R N E C

For step II: The first letter is interchanged with the second letter, the third letter is interchanged with the fourth letter and so on till the last two letters. Keep the last letter unchanged.

Step II: C O U M E P R T C S R E E N C

For step III: The first letter is interchanged with the third letter from the left end, while the second letter remains unchanged. Similarly, the fourth letter is interchanged with the sixth letter, while the fifth letter remains unchanged and so on

Step III: U O C P E M C T R E R S C N E

For step IV: All letters are reversed.

Step IV: E N C S R E R T C M E P C O U

For Step V: Arrange the first five letters from the right end at the beginning of the sequence without changing the order.

Step V: E P C O U E N C S R E R T C M

Answer: C

Step III: U O C P E M C T R E R S C N E

All the letters in Step III are arranged in reverse order from left to right,

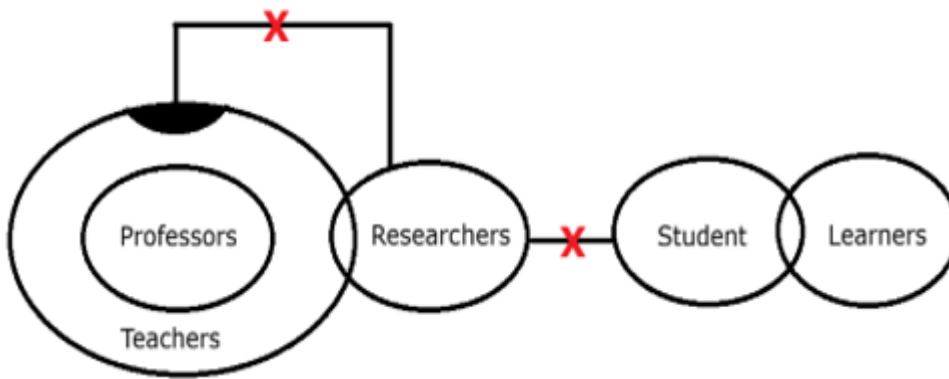

E N C S R E R T C M E P C O U

T is the eighth letter from the left end.

16. Questions

Answer: C

@QuizByMickey

I). Some professors are researchers - Here, there is no direct relation between professors and researchers. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

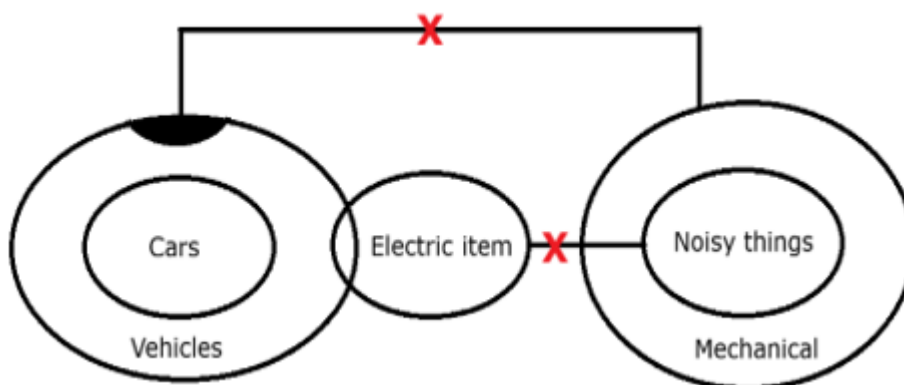

II). Some learners are not researchers - Here, there is no direct relation between learners and researchers. But some learners, who are students, cannot be researchers. Hence, the conclusion follows.

III). No student is a professor - Here, there is no direct relation between researchers and students. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

IV). Some teachers being learners is a possibility - Here, there is no direct relation between teachers and learners. So, all the possible conclusions between them are true. Hence, the conclusion follows.

17. Questions

Answer: A

I). Some cars are electric items - Here, there is no direct relation between cars and electric items. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

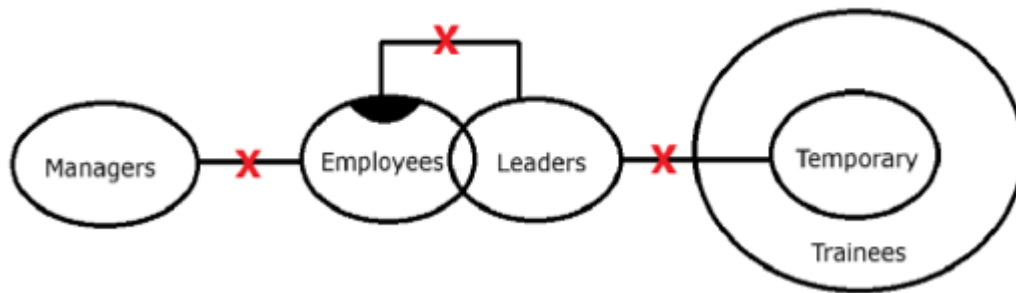

II). Some mechanical are vehicles - Here, there is no direct relation between mechanical and vehicles. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

III). Some vehicles are not noisy things - Here, there is no direct relation between vehicles and noisy things. But some parts of vehicles, which are associated with electric items, are not connected with noisy things. Hence, the conclusion follows.

IV). No electric item is mechanical - Here, there is no direct relation between the electric item and the mechanical. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

18. Questions

Answer: B

I). Some managers are trainees - Here, there is no direct relation between employees and trainees. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

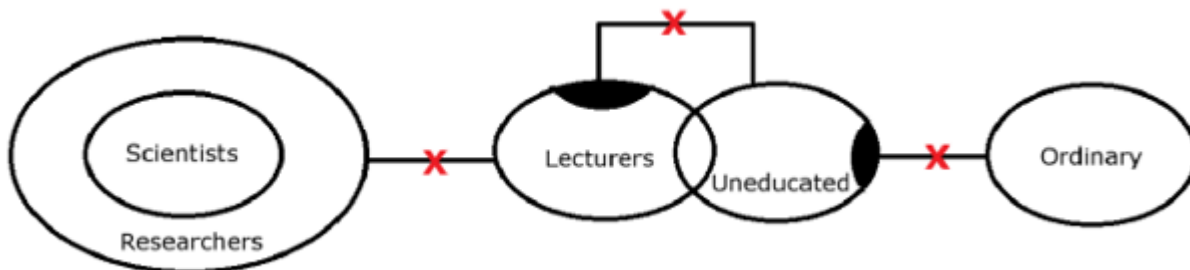

II). Some employees are not temporary - Here, there is no direct relation between employees and temporary. But some parts of employees, which are associated with leaders, are not connected with the temporary. Hence, the conclusion follows.

III). No trainee is a leader - Here, there is no direct relation between trainees and leaders. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

IV). Some leaders being managers is a possibility - Here, there is no direct relation between leaders and managers. So, all the possible conclusions between them are true. Hence, the conclusion follows.

19. Questions

Answer: E

I). Some scientists are lecturers - Here, there is no direct relation between scientist and lecturers. But all scientists, which are researchers, cannot be lecturers. Hence, the conclusion does not follow.

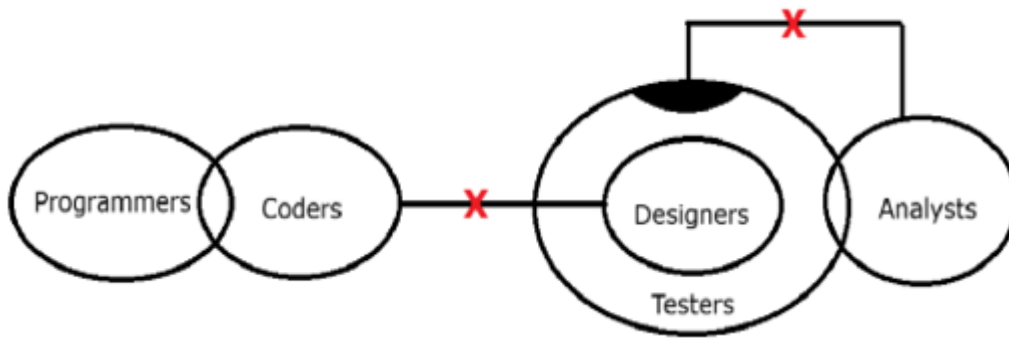

II). Some lecturers can be ordinary - Here, there is no direct relation between lecturers and ordinary. So, all the possible conclusions between them are true. Hence, the conclusion follows.

III). No uneducated is a scientist - Here, there is no direct relation between uneducated and scientists. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

IV). Some researchers can be uneducated - Here, there is no direct relation between researchers and the uneducated. So, all the possible conclusions between them are true. Hence, the conclusion follows.

20. Questions

Answer: D

I). Some programmers are designers - Here, there is no direct relation between programmers and designers. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

II). Some designers are analysts - Here, there is no direct relation between designers and analysts. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

III). No tester is a programmer - Here, there is no direct relation between tester and programmer. So, all the definite conclusions between them are not true. Hence, the conclusion does not follow.

IV). Some coders being analysts is a possibility - Here, there is no direct relation between coders and analysts. So, all the possible conclusions between them are true. Hence, the conclusion follows.
