

1. Questions

Study the following information carefully and answer the questions given below:

A certain number of persons are sitting in a row facing north, Information about only a few is known. Only five persons sit between W and G, who sits second to the left of Q. Z and W are not sitting adjacent to each other. Only four persons sit between Q and Z. The number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q. Only nine persons sit between Z and E, who sits to the left of the one who sits fifth to the right of W. The number of persons sitting between Y and T is the same as the number of persons sitting between T and F and is also the same as the number of persons sitting between F and E. At most three persons are sitting to the left of Y. The number of persons sitting to the right of E is thrice the number of persons sitting between G and F. A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

How many persons are sitting to the right of F?

- a. 14
- b. 17
- c. 11
- d. 15
- e. None of these

2. Questions

How many persons are sitting between W and the one who sits immediate left of G?

- a. Five
- b. As many persons sit to the left of Y
- c. Six
- d. As many persons sit to the right of C
- e. None of these.

3. Questions

Who among the following person sits third to the left of Q? @QuizByMickey

- a. The one who sits sixth to the left of C.
- b. T
- c. The one who sits second to the right of E
- d. F
- e. None of these

4. Questions

As many persons sit between T and E is same as between ____?

- a. Y and W
- b. Q and C
- c. G and Z
- d. T and Y
- e. None of these

5. Questions

Which of the following statement(s) is/are not true?

- I). G sits fifth to the left of the one who sits second to the left of Z.
 - II). Three persons are sitting to the right of the one who sits third to the right of Q.
 - III). F sits sixth to the left of the one who sits third to the left of C.
- a. Both II and III
 - b. Only III
 - c. Only I
 - d. Both I and II
 - e. None of these

6. Questions

Study the following information carefully and answer the questions given below.

Seven persons – Kavya, Gauri, Madan, Sonali, Ravi, Hemant, and Purvi are living in a building with seven floors, marked 1 to 7 from bottom to top respectively. Each person wore a jersey with different numbers viz.- 7, 12, 13, 22, 25, 27, 35. All the information is not necessarily in the same order.

Note: The persons living on adjacent floors whose jersey number is neither common multiple nor common factors.

Only three persons live between Purvi and the one whose jersey number is 13 but none of them lives either on the topmost or bottommost floor. One person lives between Hemant and the one whose jersey number is 13. Gauri's jersey number is 12 and lives two floors below Ravi. The number of persons living above Ravi is one less than the number of persons living below Madan. Ravi lives on a prime numbered floor but above the floor on which Hemant lives. Madan lives immediately above the floor of the one whose jersey number is 27. The number of persons living between Sonali and the one whose jersey number is 35 is one less than the number of persons living above the one whose jersey number is 7. Sonali doesn't wear a prime numbered jersey. Not more than two persons live between Kavya and the one whose jersey number is 25.

What is the position of Sonali with respect to the one whose jersey number is 12?

- a. Three floors below

- b. Immediate above
- c. Two floors below
- d. Four floors above
- e. None of these

7. Questions

Who among the following person wears a jersey number 35?

- a. The one who lives immediately below Ravi
- b. Madan
- c. The one who lives immediately above Hemant
- d. Either A or C
- e. None of these

8. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to that group?

- a. The one whose jersey number 25
- b. Purvi
- c. The one who lives immediately below Hemant
- d. Kavya
- e. The one whose jersey number 12

9. Questions

Who among the following person lives two floors above Madan?

- a. Gauri
- b. The one whose jersey number 22
- c. Purvi
- d. The one who lives three floors below Ravi
- e. None of these

@QuizByMickey

10. Questions

Which of the following statement is true?

- a. Kavya wears a jersey number 13
- b. Both Ravi and Gauri live on the adjacent floor

- c. Gauri wears a jersey number 12
- d. Madan lives on an odd numbered floor
- e. None of the statements are true

11. Questions

Study the following information carefully and answer the below questions.

2 5 3 6 8 4 2 6 8 3 5 7 2 8 3 5 3 8 5 2 6 4 7 5

Step I: In the above given number series, add '1' to all the digits at an odd position, and subtract '1' from all the digits at an even position from the left end.

Step II: The first half of the digits are arranged in reverse order after the second half.

Step III: Subtract and add the digits alternatively from its square value respectively from the left end.

Note: Step II is applied after step I, step III is applied after step II.

Step III is the final arrangement and is used to determine answers to the given questions.

If all the numbers divisible by a perfect square number (except 1) are removed, then which of the following number is sixth from the right end?

- a. 15
- b. 30
- c. 6
- d. 2
- e. None of these

12. Questions

Which of the following number is eleventh from the left end?

- a. 56
- b. 2
- c. 42
- d. 6
- e. None of these

@QuizByMickey

13. Questions

What is the sum of the seventh number from both ends?

- a. 42
- b. 36

- c. 24
- d. 18
- e. None of these

14. Questions

If all the numbers divisible by 3 are removed, then which of the following number is sixth from the left end?

- a. 26
- b. 56
- c. 2
- d. 20
- e. None of these

15. Questions

How many numbers are repeated more than twice?

- a. Two
- b. More than three
- c. One
- d. Three
- e. None of these

16. Questions

Read the following information carefully to answer the question that follows

The banking, financial services, and insurance sector represents a major portion of the multi-billion-dollar Indian economy comprising of all Banking, Insurance and Non-banking Financial institutions. Over the past few years, technological innovations and steady adoption of digital finance by the Indian population pushed the sector to amplify their digital offerings. But the new normal induced by the pandemic, pushed the sector to undertake a complete digital overhaul very quickly. Bound by the legacy systems and hierarchical structure, where physical presence and face-to-face interactions were customary, shift to a digital set up was extremely difficult for the companies of the BSFI sector.

Which of the following will serve as the best conclusion to the above paragraph?

- a. However, a handful of the Indian BSFI brands have succeeded in turning these challenges into opportunities
- b. These brands are not just the best in what they do but can also create a wave of confidence
- c. However, these brands want to serve their customers in their time of need

- d. Both (b) and (c)
- e. None serves as a good conclusion

17. Questions

Which of the following statements can be inferred from the paragraph above?

- a. The few BSFI brands have been able to create a name for themselves with path breaking innovative ideas
- b. Few BSFI brands have been successful in harnessing the power of technology to master change
- c. The banks have been able to change the regulatory frameworks and formulate new policies for the ease of the customers
- d. All of the above
- e. None of the above

18. Questions

Study the following information carefully and answer the question given below:

To encourage and thank people who got vaccinated during the nationwide vaccination drive, PVR has introduced a 'JAB Offer' for the customers. As part of the scheme, one vaccinated guest can get another ticket free on select content as well as one F&B Combo free with the purchase of another in the first week of reopening. In addition to vaccinated staff, PVR will continue to maintain stringent hygiene protocols, social distancing and food safety measures, along with minimal human contact across all touch points.

Chequered seating with only 50 per cent occupancy as per state government protocols, social distancing marked queuing, digital contactless transactions, operating 50 per cent of the restroom facilities, installation of fibre and glass shields and regular sanitisation of its premises are some of the safety initiatives that it follows.

Which of the following can be *inferred* from the passage above?

- a. The PVRs are contributing in speeding up the vaccination drive in the country
- b. The government has issued strict guidelines before opening the PVRs
- c. Vaccination of their entire staff has become a priority for the media operators in various states
- d. Both (a) and (c)
- e. All (a), (b) and (c)

19. Questions

Which of the following can be taken as the *probable cause* for the following effect: '*Chequered seating with only 50 per cent occupancy as per state government protocols?*'

- a. Maintaining an optimum income ratio
- b. Trying to sell more tickets for more shows

- c. Focusing on the social distancing norms
- d. Motivating staff to get vaccinated
- e. To showcase maximum content across screens

20. Questions

Which of the following can be *concluded* from the above paragraphs?

- a. One vaccinated guest can get another ticket free
- b. PVR is thankful that people are getting their jabs done
- c. PVR is taking all safety measures to utilize its 100% seating capacity
- d. PVR is ignorant towards the government protocols
- e. PVR has taken all the safety regulations by the government seriously

Explanations:

1. Questions

We have:

- Only five persons sit between W and G, who sits second to the left of Q.
- Only four persons sit between Q and Z.
- Z and W are not sitting adjacent to each other.

That means, in case (1) W sits sixth to the left of G, and Z sits fifth to the right of Q, in case (2) W sits sixth to the left of G, and Z sits third to the left of G, in case (3) W sits sixth to the right of G, and Z sits third to the left of G.

Based on the above-given information we have:

Case(1): W _ _ _ _ _ G _ Q _ _ _ _ _ Z

Case(2): W _ _ Z _ _ G _ Q

Case(3): Z _ _ G _ Q _ _ _ W

@QuizByMickey

Again, we have:

- The number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

That means, in case (1) W sits fifth from the left end, in case (3) Z sits fourth from the left end, case (2) is not valid.

- Only nine persons sit between Z and E, who sits to the left of the one who sits fifth to the right of W.

That means, in case (1) E sits third to the right of W, in case (3) E sits immediate right of W.

Based on the above-given information we have:

Case(1): _ _ _ _ W _ _ E _ _ G _ Q _ _ _ _ Z

~~Case(2): W _ _ Z _ _ G _ Q~~

Case(3): _ _ _ Z _ _ G _ Q _ _ _ W E _ _ _ _

Case (2) is not valid as the number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

Again, we have:

- The number of persons sitting between Y and T is the same as the number of persons sitting between T and F and is also the same as the number of persons sitting between F and E.
- At most three persons are sitting to the left of Y.

That means, in case (1) & case (3) Y sits second from the left end.

- The number of persons sitting to the right of E is thrice the number of persons sitting between G and F.
- A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

That means, in case (1) C sits fourth from the right end, case (3) is not valid.

Based on the above-given information we have:

Case(1): _ Y _ T W F _ E _ _ G _ Q _ _ _ C Z _ _

~~Case(3): _ Y _ Z _ T G _ Q F _ _ W E _ _ _ _~~

Case (3) is not valid as A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

Answer: A

2. Questions

We have:

- Only five persons sit between W and G, who sits second to the left of Q.
- Only four persons sit between Q and Z.
- Z and W are not sitting adjacent to each other.

That means, in case (1) W sits sixth to the left of G, and Z sits fifth to the right of Q, in case (2) W sits sixth to the left of G, and Z sits third to the left of G, in case (3) W sits sixth to the right of G, and Z sits third to the left of G.

Based on the above-given information we have:

@QuizByMickey

Case(1): W _ _ _ _ G _ Q _ _ _ Z

Case(2): W _ _ Z _ _ G _ Q

Case(3): Z _ _ G _ Q _ _ W

Again, we have:

- The number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

That means, in case (1) W sits fifth from the left end, in case (3) Z sits fourth from the left end, case (2) is not valid.

- Only nine persons sit between Z and E, who sits to the left of the one who sits fifth to the right of W.

That means, in case (1) E sits third to the right of W, in case (3) E sits immediate right of W.

Based on the above-given information we have:

Case(1): _ _ _ W _ E _ G _ Q _ _ _ Z

~~Case(2): W _ _ Z _ _ G _ Q~~

Case(3): _ _ _ Z _ _ G _ Q _ _ W E _ _ _

Case (2) is not valid as the number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

Again, we have:

- The number of persons sitting between Y and T is the same as the number of persons sitting between T and F and is also the same as the number of persons sitting between F and E.
- At most three persons are sitting to the left of Y.

That means, in case (1) & case (3) Y sits second from the left end.

- The number of persons sitting to the right of E is thrice the number of persons sitting between G and F.
- A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

That means, in case (1) C sits fourth from the right end, case (3) is not valid.

Based on the above-given information we have:

Case(1): _ Y _ T W F _ E _ _ G _ Q _ _ C Z _ _

~~Case(3): _ Y _ Z _ T G _ Q F _ _ W E _ _ _~~

Case (3) is not valid as A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

Answer: E

3. Questions

We have:

- Only five persons sit between W and G, who sits second to the left of Q.
- Only four persons sit between Q and Z.
- Z and W are not sitting adjacent to each other.

That means, in case (1) W sits sixth to the left of G, and Z sits fifth to the right of Q, in case (2) W sits sixth to the left of G, and Z sits third to the left of G, in case (3) W sits sixth to the right of G, and Z sits third to the left of G.

Based on the above-given information we have:

Case(1): W _ _ _ _ _ G _ Q _ _ _ _ _ Z

Case(2): W _ _ Z _ _ G _ Q

Case(3): Z _ _ G _ Q _ _ _ _ W

Again, we have:

- The number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

That means, in case (1) W sits fifth from the left end, in case (3) Z sits fourth from the left end, case (2) is not valid.

- Only nine persons sit between Z and E, who sits to the left of the one who sits fifth to the right of W.

That means, in case (1) E sits third to the right of W, in case (3) E sits immediate right of W.

Based on the above-given information we have:

Case(1): _ _ _ _ _ W _ _ E _ _ G _ Q _ _ _ Z

~~Case(2): W _ _ Z _ _ G _ Q~~

Case(3): _ _ _ Z _ _ G _ Q _ _ _ _ W E _ _ _ _

Case (2) is not valid as the number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

Again, we have:

- The number of persons sitting between Y and T is the same as the number of persons sitting

between T and F and is also the same as the number of persons sitting between F and E.

- At most three persons are sitting to the left of Y.

That means, in case (1) & case (3) Y sits second from the left end.

- The number of persons sitting to the right of E is thrice the number of persons sitting between G and F.
- A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

That means, in case (1) C sits fourth from the right end, case (3) is not valid.

Based on the above-given information we have:

Case(1): _ Y _ T W F _ E _ _ G _ Q _ _ _ C Z _ _

~~Case(3): _ Y _ Z _ T G _ Q F _ _ W E _ _ _ _ _~~

Case (3) is not valid as A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

Answer: C

4. Questions

We have:

- Only five persons sit between W and G, who sits second to the left of Q.
- Only four persons sit between Q and Z.
- Z and W are not sitting adjacent to each other.

That means, in case (1) W sits sixth to the left of G, and Z sits fifth to the right of Q, in case (2) W sits sixth to the left of G, and Z sits third to the left of G, in case (3) W sits sixth to the right of G, and Z sits third to the left of G.

Based on the above-given information we have:

Case(1): W _ _ _ _ _ G _ Q _ _ _ _ Z

Case(2): W _ _ Z _ _ G _ Q

Case(3): Z _ _ G _ Q _ _ _ W

Again, we have:

- The number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

That means, in case (1) W sits fifth from the left end, in case (3) Z sits fourth from the left end, case (2) is not valid.

- Only nine persons sit between Z and E, who sits to the left of the one who sits fifth to the right

of W.

That means, in case (1) E sits third to the right of W, in case (3) E sits immediate right of W.

Based on the above-given information we have:

Case(1): _ _ _ _ W _ _ E _ _ G _ Q _ _ _ _ Z

~~Case(2): W _ _ Z _ _ G _ Q~~

Case(3): _ _ _ Z _ _ G _ Q _ _ _ W E _ _ _ _

Case (2) is not valid as the number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

Again, we have:

- The number of persons sitting between Y and T is the same as the number of persons sitting between T and F and is also the same as the number of persons sitting between F and E.
- At most three persons are sitting to the left of Y.

That means, in case (1) & case (3) Y sits second from the left end.

- The number of persons sitting to the right of E is thrice the number of persons sitting between G and F.
- A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

That means, in case (1) C sits fourth from the right end, case (3) is not valid.

Based on the above-given information we have:

Case(1): _ Y _ T W F _ E _ _ G _ Q _ _ _ C Z _ _

~~Case(3): _ Y _ Z _ T G _ Q F _ _ W E _ _ _ _~~

Case (3) is not valid as A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

Answer: B

@QuizByMickey

5. Questions

We have:

- Only five persons sit between W and G, who sits second to the left of Q.
- Only four persons sit between Q and Z.
- Z and W are not sitting adjacent to each other.

That means, in case (1) W sits sixth to the left of G, and Z sits fifth to the right of Q, in case (2) W sits sixth to the left of G, and Z sits third to the left of G, in case (3) W sits sixth to the right of G, and Z sits third to the left of G.

Based on the above-given information we have:

Case(1): W _ _ _ _ G _ Q _ _ _ Z

Case(2): W _ _ Z _ _ G _ Q

Case(3): Z _ _ G _ Q _ _ W

Again, we have:

- The number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

That means, in case (1) W sits fifth from the left end, in case (3) Z sits fourth from the left end, case (2) is not valid.

- Only nine persons sit between Z and E, who sits to the left of the one who sits fifth to the right of W.

That means, in case (1) E sits third to the right of W, in case (3) E sits immediate right of W.

Based on the above-given information we have:

Case(1): _ _ _ W _ E _ G _ Q _ _ _ Z

~~Case(2): W _ _ Z _ _ G _ Q~~

Case(3): _ _ _ Z _ _ G _ Q _ _ W E _ _ _

Case (2) is not valid as the number of persons sitting between W and Z is the same as the number of persons sitting to the left of Q.

Again, we have:

- The number of persons sitting between Y and T is the same as the number of persons sitting between T and F and is also the same as the number of persons sitting between F and E.
- At most three persons are sitting to the left of Y.

That means, in case (1) & case (3) Y sits second from the left end.

- The number of persons sitting to the right of E is thrice the number of persons sitting between G and F.
- A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

That means, in case (1) C sits fourth from the right end, case (3) is not valid.

Based on the above-given information we have:

Case(1): _ Y _ T W F _ E _ _ G _ Q _ _ _ C Z _ _

~~Case(3): _ Y _ Z _ T G _ Q F _ _ W E _ _ _ _ _~~

Case (3) is not valid as A person sitting fourth to the right of F sits seven places away from C, who doesn't sit adjacent to Y.

Answer: A

6. Questions

Case (1a)		
Floor	Name	Number
7	Ravi	22
6	Purvi	35
5	Gauri	12
4	Hemant	7
3	Sonali	25
2	Madan	13
1	Kavya	27

We have:

- Only three persons live between Purvi and the one whose jersey number is 13 but none of them lives either on the topmost or bottommost floor.
- One person lives between Hemant and the one whose jersey number is 13.

From the above conditions, there are two possibilities ,

That means, in case (1) Purvi lives on floor number six, in case (2) Purvi lives on floor number two.

@QuizByMickey

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7			7		
6	Purvi		6		13
5			5		
4	Hemant		4	Hemant	
3			3		
2		13	2	Purvi	
1			1		

Again, we have:

- Gauri's jersey number is 12 and lives two floors below Ravi.
- Ravi lives on a prime numbered floor but above the floor on which Hemant lives.
- The number of persons living above Ravi is one less than the number of persons living below Madan.
- Madan lives immediately above the floor of the one whose jersey number is 27.

That means, in case (1) Ravi lives on floor number seven.

After applying above conditions case2 gets eliminated since Case (2) is not valid as the number of persons living above Ravi is one less than the same as the number of persons living below Madan.)

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7		
6	Purvi		6		13
5	Gauri	12	5		
4	Hemant		4	Hemant	
3			3		
2	Madan	13	2	Purvi	
1		27	1		

Again, we have:

- The number of persons living between Sonali and the one whose jersey number is 35 is one less than the number of persons living above the one whose jersey number is 7.
- Sonali doesn't wear a prime numbered jersey.

From the above conditions there will be a new possibility of case 1a

That means, in case (1) the one who wore jersey number 35 lives on floor number 4, in case (1a) the one who wore jersey number 35 lives on floor number 6.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali		3	Sonali	
2	Madan	13	2	Madan	13
1		27	1		27

Again, we have:

- Not more than two persons live between Kavya and the one whose jersey number is 25.

That means, in case (1a) jersey number of Sonali is 25

After applying the above conditions **Case (1) is not valid as persons with jersey numbers 35 and 25 can't live on the adjacent floor).**

Then case(1a) shows the final arrangement.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	22
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali	25	3	Sonali	25
2	Madan	13	2	Madan	13
1	Kavya	27	1	Kavya	27

Answer: C

7. Questions

Case (1a)		
Floor	Name	Number
7	Ravi	22
6	Purvi	35
5	Gauri	12
4	Hemant	7
3	Sonali	25
2	Madan	13
1	Kavya	27

We have:

- Only three persons live between Purvi and the one whose jersey number is 13 but none of them lives either on the topmost or bottommost floor.
- One person lives between Hemant and the one whose jersey number is 13.

From the above conditions, there are two possibilities ,

That means, in case (1) Purvi lives on floor number six, in case (2) Purvi lives on floor number two.

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7			7		
6	Purvi		6		13
5			5		
4	Hemant		4	Hemant	
3			3		
2		13	2	Purvi	
1			1		

Again, we have:

- Gauri's jersey number is 12 and lives two floors below Ravi.
- Ravi lives on a prime numbered floor but above the floor on which Hemant lives.
- The number of persons living above Ravi is one less than the number of persons living below Madan.
- Madan lives immediately above the floor of the one whose jersey number is 27.

That means, in case (1) Ravi lives on floor number seven.

After applying above conditions case2 gets eliminated since Case (2) is not valid as the number of persons living above Ravi is one less than the same as the number of persons living below Madan.)

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7		
6	Purvi		6		13
5	Gauri	12	5		
4	Hemant		4	Hemant	
3			3		
2	Madan	13	2	Purvi	
1		27	1		

Again, we have:

- The number of persons living between Sonali and the one whose jersey number is 35 is one less than the number of persons living above the one whose jersey number is 7.
- Sonali doesn't wear a prime numbered jersey.

From the above conditions there will be a new possibility of case1a

That means, in case (1) the one who wore jersey number 35 lives on floor number 4, in case (1a) the one who wore jersey number 35 lives on floor number 6.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali		3	Sonali	
2	Madan	13	2	Madan	13
1		27	1		27

Again, we have:

- Not more than two persons live between Kavya and the one whose jersey number is 25.

That means, in case (1a) jersey number of Sonali is 25

After applying the above conditions **Case (1) is not valid as persons with jersey numbers 35 and 25 can't live on the adjacent floor).**

Then case(1a) shows the final arrangement.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	22
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali	25	3	Sonali	25
2	Madan	13	2	Madan	13
1	Kavya	27	1	Kavya	27

Answer: A

8. Questions

Case (1a)		
Floor	Name	Number
7	Ravi	22
6	Purvi	35
5	Gauri	12
4	Hemant	7
3	Sonali	25
2	Madan	13
1	Kavya	27

@QuizByMickey

We have:

- Only three persons live between Purvi and the one whose jersey number is 13 but none of them lives either on the topmost or bottommost floor.
- One person lives between Hemant and the one whose jersey number is 13.

From the above conditions, there are two possibilities ,

That means, in case (1) Purvi lives on floor number six, in case (2) Purvi lives on floor number two.

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7			7		
6	Purvi		6		13
5			5		
4	Hemant		4	Hemant	
3			3		
2		13	2	Purvi	
1			1		

Again, we have:

- Gauri's jersey number is 12 and lives two floors below Ravi.
- Ravi lives on a prime numbered floor but above the floor on which Hemant lives.
- The number of persons living above Ravi is one less than the number of persons living below Madan.
- Madan lives immediately above the floor of the one whose jersey number is 27.

That means, in case (1) Ravi lives on floor number seven.

After applying above conditions case2 gets eliminated since Case (2) is not valid as the number of persons living above Ravi is one less than the same as the number of persons living below Madan.)

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7		
6	Purvi		6		13
5	Gauri	12	5		
4	Hemant		4	Hemant	
3			3		
2	Madan	13	2	Purvi	
1		27	1		

Again, we have:

- The number of persons living between Sonali and the one whose jersey number is 35 is one less than the number of persons living above the one whose jersey number is 7.
- Sonali doesn't wear a prime numbered jersey.

From the above conditions there will be a new possibility of case 1a

That means, in case (1) the one who wore jersey number 35 lives on floor number 4, in case (1a) the one who wore jersey number 35 lives on floor number 6.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali		3	Sonali	
2	Madan	13	2	Madan	13
1		27	1		27

Again, we have:

- Not more than two persons live between Kavya and the one whose jersey number is 25.

That means, in case (1a) jersey number of Sonali is 25

After applying the above conditions **Case (1) is not valid as persons with jersey numbers 35 and 25 can't live on the adjacent floor).**

Then case(1a) shows the final arrangement.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	22
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali	25	3	Sonali	25
2	Madan	13	2	Madan	13
1	Kavya	27	1	Kavya	27

Answer: B(Except for **option b**, all other persons are living on odd numbered floor)

9. Questions

Case (1a)		
Floor	Name	Number
7	Ravi	22
6	Purvi	35
5	Gauri	12
4	Hemant	7
3	Sonali	25
2	Madan	13
1	Kavya	27

We have:

- Only three persons live between Purvi and the one whose jersey number is 13 but none of them lives either on the topmost or bottommost floor.
- One person lives between Hemant and the one whose jersey number is 13.

From the above conditions, there are two possibilities ,

That means, in case (1) Purvi lives on floor number six, in case (2) Purvi lives on floor number two.

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7			7		
6	Purvi		6		13
5			5		
4	Hemant		4	Hemant	
3			3		
2		13	2	Purvi	
1			1		

Again, we have:

- Gauri's jersey number is 12 and lives two floors below Ravi.
- Ravi lives on a prime numbered floor but above the floor on which Hemant lives.
- The number of persons living above Ravi is one less than the number of persons living below Madan.
- Madan lives immediately above the floor of the one whose jersey number is 27.

That means, in case (1) Ravi lives on floor number seven.

After applying above conditions case2 gets eliminated since Case (2) is not valid as the number of persons living above Ravi is one less than the same as the number of persons living below Madan.)

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7		
6	Purvi		6		13
5	Gauri	12	5		
4	Hemant		4	Hemant	
3			3		
2	Madan	13	2	Purvi	
1		27	1		

Again, we have:

- The number of persons living between Sonali and the one whose jersey number is 35 is one less than the number of persons living above the one whose jersey number is 7.
- Sonali doesn't wear a prime numbered jersey.

From the above conditions there will be a new possibility of case1a

That means, in case (1) the one who wore jersey number 35 lives on floor number 4, in case (1a) the one who wore jersey number 35 lives on floor number 6.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali		3	Sonali	
2	Madan	13	2	Madan	13
1		27	1		27

Again, we have:

- Not more than two persons live between Kavya and the one whose jersey number is 25.

That means, in case (1a) jersey number of Sonali is 25

After applying the above conditions **Case (1) is not valid as persons with jersey numbers 35 and 25 can't live on the adjacent floor).**

Then case(1a) shows the final arrangement.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	22
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali	25	3	Sonali	25
2	Madan	13	2	Madan	13
1	Kavya	27	1	Kavya	27

Answer: D

10. Questions

Case (1a)		
Floor	Name	Number
7	Ravi	22
6	Purvi	35
5	Gauri	12
4	Hemant	7
3	Sonali	25
2	Madan	13
1	Kavya	27

@QuizByMickey

We have:

- Only three persons live between Purvi and the one whose jersey number is 13 but none of them lives either on the topmost or bottommost floor.
- One person lives between Hemant and the one whose jersey number is 13.

From the above conditions, there are two possibilities ,

That means, in case (1) Purvi lives on floor number six, in case (2) Purvi lives on floor number two.

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7			7		
6	Purvi		6		13
5			5		
4	Hemant		4	Hemant	
3			3		
2		13	2	Purvi	
1			1		

Again, we have:

- Gauri's jersey number is 12 and lives two floors below Ravi.
- Ravi lives on a prime numbered floor but above the floor on which Hemant lives.
- The number of persons living above Ravi is one less than the number of persons living below Madan.
- Madan lives immediately above the floor of the one whose jersey number is 27.

That means, in case (1) Ravi lives on floor number seven.

After applying above conditions case2 gets eliminated since Case (2) is not valid as the number of persons living above Ravi is one less than the same as the number of persons living below Madan.)

Case (1)			Case (2)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7		
6	Purvi		6		13
5	Gauri	12	5		
4	Hemant		4	Hemant	
3			3		
2	Madan	13	2	Purvi	
1		27	1		

Again, we have:

- The number of persons living between Sonali and the one whose jersey number is 35 is one less than the number of persons living above the one whose jersey number is 7.
- Sonali doesn't wear a prime numbered jersey.

From the above conditions there will be a new possibility of case 1a

That means, in case (1) the one who wore jersey number 35 lives on floor number 4, in case (1a) the one who wore jersey number 35 lives on floor number 6.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali		3	Sonali	
2	Madan	13	2	Madan	13
1		27	1		27

Again, we have:

- Not more than two persons live between Kavya and the one whose jersey number is 25.

That means, in case (1a) jersey number of Sonali is 25

After applying the above conditions **Case (1) is not valid as persons with jersey numbers 35 and 25 can't live on the adjacent floor).**

Then case(1a) shows the final arrangement.

Case (1)			Case (1a)		
Floor	Name	Number	Floor	Name	Number
7	Ravi		7	Ravi	22
6	Purvi	7	6	Purvi	35
5	Gauri	12	5	Gauri	12
4	Hemant	35	4	Hemant	7
3	Sonali	25	3	Sonali	25
2	Madan	13	2	Madan	13
1	Kavya	27	1	Kavya	27

Answer: C

11. Questions

We have:

2 5 3 6 8 4 2 6 8 3 5 7 2 8 3 5 3 8 5 2 6 4 7 5

For step I: In the above given number series, add '1' to all the digits at an odd position, and subtract '1' from all the digits at an even position from the left end.

Step I: 3 4 4 5 9 3 3 5 9 2 6 6 3 7 4 4 4 7 6 1 7 3 8 4

For step II: The first half of the digits are arranged in reverse order after the second half.

Step II: 3 7 4 4 4 7 6 1 7 3 8 4 6 6 2 9 5 3 3 9 5 4 4 3

For step III: Subtract and add the digits alternatively from its square value respectively from the left end.

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

Answer: D

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

After deleting all numbers divisible by a perfect square number (4, 9, 16, and so on we have)

Step III: 6 30 2 42 30 42 2 6

Thus, sixth number from the right end --> 2

12. Questions

We have:

2 5 3 6 8 4 2 6 8 3 5 7 2 8 3 5 3 8 5 2 6 4 7 5

For step I: In the above given number series, add '1' to all the digits at an odd position, and subtract '1' from all the digits at an even position from the left end.

Step I: 3 4 4 5 9 3 3 5 9 2 6 6 3 7 4 4 4 7 6 1 7 3 8 4

For step II: The first half of the digits are arranged in reverse order after the second half.

Step II: 3 7 4 4 4 7 6 1 7 3 8 4 6 6 2 9 5 3 3 9 5 4 4 3

For step III: Subtract and add the digits alternatively from its square value respectively from the left end.

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

Answer: A

Step III: 6 56 12 20 12 56 30 2 42 12 **56** 20 30 42 2 90 20 12 6 90 20 20 12 12

Eleventh element from the left end --> 56

13. Questions

We have:

2 5 3 6 8 4 2 6 8 3 5 7 2 8 3 5 3 8 5 2 6 4 7 5

For step I: In the above given number series, add '1' to all the digits at an odd position, and subtract '1' from all the digits at an even position from the left end.

Step I: 3 4 4 5 9 3 3 5 9 2 6 6 3 7 4 4 4 7 6 1 7 3 8 4

For step II: The first half of the digits are arranged in reverse order after the second half.

Step II: 3 7 4 4 4 7 6 1 7 3 8 4 6 6 2 9 5 3 3 9 5 4 4 3

For step III: Subtract and add the digits alternatively from its square value respectively from the left end.

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

Answer: A

Step III: 6 56 12 20 12 56 **30** 2 42 12 56 20 30 42 2 90 20 **12** 6 90 20 20 12 12

Sum of seventh element from both end = $(30 + 12) = 42$

14. Questions

We have:

2 5 3 6 8 4 2 6 8 3 5 7 2 8 3 5 3 8 5 2 6 4 7 5

For step I: In the above given number series, add '1' to all the digits at an odd position, and subtract '1' from all the digits at an even position from the left end.

Step I: 3 4 4 5 9 3 3 5 9 2 6 6 3 7 4 4 4 7 6 1 7 3 8 4

For step II: The first half of the digits are arranged in reverse order after the second half.

Step II: 3 7 4 4 4 7 6 1 7 3 8 4 6 6 2 9 5 3 3 9 5 4 4 3

For step III: Subtract and add the digits alternatively from its square value respectively from the left end.

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

Answer: D

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

After omitting multiples of 3, we have:

Step III: 56 20 56 2 56 **20** 2 20 20 20

Sixth element from the left end --> 20

15. Questions

We have:

2 5 3 6 8 4 2 6 8 3 5 7 2 8 3 5 3 8 5 2 6 4 7 5

For step I: In the above given number series, add '1' to all the digits at an odd position, and subtract '1' from all the digits at an even position from the left end.

Step I: 3 4 4 5 9 3 3 5 9 2 6 6 3 7 4 4 4 7 6 1 7 3 8 4

For step II: The first half of the digits are arranged in reverse order after the second half.

Step II: 3 7 4 4 4 7 6 1 7 3 8 4 6 6 2 9 5 3 3 9 5 4 4 3

For step III: Subtract and add the digits alternatively from its square value respectively from the left end.

@QuizByMickey

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

Answer: D

Step III: 6 56 12 20 12 56 30 2 42 12 56 20 30 42 2 90 20 12 6 90 20 20 12 12

The numbers which repeated more than twice= 56, 12, 20

16. Questions

Answer: A

If we closely look at the last line of the paragraph which talked about the challenges of the traditional banking like face-to-face interactions etc, we get a clear hint as to what is being said in (a) is the best to conclude the idea above. As, the above mentioned challenges have been met by few BSFI brands.

(c) is something that they always do so it doesn't act as a conclusion.

(b) talks about a wave of confidence which is a new paradigm for the paragraph so this can be ruled out in the presence of (a) which is a stronger answer.

17. Questions

Answer: B

The paragraph says that the overall digital transformation was a tedious exercise but still the changes were carried out. This clearly helps us understand that few brands have taken these times as an opportunity rather than an obstruction to transform themselves for better. So, (b) is apt.

We can eliminate (c) as it sounds like an assumption with no mention in the paragraph and (a) is too general.

18. Questions

Answer: B

As the paragraph gives various details about *the way PVRs are preparing before opening up, it can be inferred that the government has provided strict guidelines* and that's the reason, the company is following the same. Hence, (b) is the correct answer.

Option (a) says PVRs are speeding up the vaccination process which can be taken as an assumption but not an inference

Option (c) mentions the correct point of vaccination of the staff but not of the media operators as the option says so that's wrong as well.

19. Questions

Answer: C

A particular seating arrangement has been decided to be followed along with just half seating capacity which clearly *means they want to avoid crowds*. So, if we take following of *social distancing norms as the cause*, devising this seating arrangement comes out to be the effect. Hence option (c) is the correct answer.

20. Questions

Answer: E

A **conclusion** means an *interpretation or a logical judgment* that can be reached after knowing the facts.

After reading the whole passage, especially *the second paragraph we can deduce that PVR is taking care of the safety very seriously*. So option (e) is correct.

Option (d) is reverse of what is mentioned so that can be ruled out.

Option (a) is a fact mentioned so that can't be a conclusion

Option (c) is wrong as the passage says 50% capacity and not 100%

Option (b) is also not a conclusion so that can be ruled out as well.
