

1. Questions

Study the following information carefully and answer the given questions.

Fifteen persons I-W are sitting in the train such that the two seats are there in the left of the aisle and the one seat to the right of the aisle, totally three seats in each row such that 5 rows are available.

R sits in row III on the left side of the aisle and sits immediately in front of M. S sits in row II but not in the seat immediately in front of R. W sits in one of the seats to the right of S in the same row as S. As many persons sit to the right of M row as to the right of K. K sits in one of the rows in front of R but not in the same row as S. V sits in the same row as M, where O sits immediately behind V. Q sits to the left of O in the same row but not adjacent to the aisle. J sits immediately in front of T, where both U and J sit in the same row. P sits in one of the rows before U. Neither P nor U sits in the same row as W. P doesn't sit immediately in front of W. Neither I sits immediately next to the aisle nor L sits in the same row as P. As many persons sit to the left of N in the same row as to the left of L in the same row.

I.	_____	_____	_____
II.	_____	_____	_____
III.	_____	_____	_____
IV.	_____	_____	_____
V.	_____	_____	_____

Who among the following persons sit in the same row as T?

- The one who sits immediately behind I and U
- V and the one who sits immediately in front of Q
- L and the one who sits right side of the aisle in row II
- K and the one who sits immediately behind W
- The one who sits left of S and R

2. Questions

Four of the following five are alike in a certain way and hence form a group. Which one of the following does not belong to the group with respect to the final arrangement?

- P
- V
- O
- L
- S

3. Questions

How many persons are sitting in the seats in front of U?

- a. No one
- b. As many persons sit behind K
- c. As many persons sit in front of S
- d. As many persons sit behind P
- e. As many persons sit behind J

4. Questions

Who among the following persons sit in row V?

- a. K, O, L
- b. I, S, W
- c. Q, O, L
- d. M, V, T
- e. R, U, L

5. Questions

The number of persons sitting to the right of ____ in the row in which T is sitting is equal to the number of persons sitting to the left of ____ in the row in which S is sitting.

- a. M, W
- b. S, M
- c. I, V
- d. W, V
- e. I, M

6. Questions

Study the following information carefully and answer the given questions.

G & H (98m) - G is 76m south of H

G % H (65m) - G is 43m east of H

G @ H (113m) - G is 91m north of H

G # H (67m) - G is 45m west of H

Conditions: A @ B (25m), C#D (38m), B%C (42m), E%D (52m), G#F (64m), G&H (37m), I&E (28m), F@I (30m), W@F (39m)

In which of the following direction is point F with respect to point C?

- a. North
- b. North-east
- c. South-west
- d. North-west
- e. South-east

7. Questions

If point X % G (38m), then the distance between points F and X is equal to which of the following points based on the final arrangement?

- a. WF
- b. IE+EF
- c. GH
- d. DE-BD
- e. CE

8. Questions

The distance between point W and point E is ____ the distance between point ____ and point ____

- a. 7 less than, BE
- b. 6 more than, GH
- c. 5 more than, IF
- d. 1 more than, CB
- e. 4 less than, ED

9. Questions

Which of the following statement(s) is/are TRUE as per the final arrangement?

I). The distance between the point DE is twice that of the distance between the points GH

II). point A is south-west of point I

III). C, B, D and E are in straight line

- a. Only I and II
- b. Only I
- c. Only I and III
- d. Only III
- e. All I, II and III

10. Questions

What is the shortest distance between point A and point H?

- a. $\sqrt{481}$ m
- b. $\sqrt{450}$ m
- c. $\sqrt{425}$ m
- d. $\sqrt{394}$ m
- e. $\sqrt{452}$ m

11. Questions

Study the following information carefully and answer the given questions.

Ten students – A, B, C, D, E, F, G, H, I and J went to school on ten different days, from the first week of Monday to the second week of Wednesday. Only one student went to the school on each day. They like four different subjects viz., Maths, Physics, Chemistry and Biology. Not more than three students like the same subjects.

Only three students went between G and B, where both like the same subject. B went five students after E. B likes neither Maths nor Biology. As many students went before E as after F, who likes neither Biology nor Physics. The number of persons went between F and A is **two more than** the number of persons went before C. C doesn't go after A. Both A and F like the same subject. C likes neither Maths nor Physics. D went immediately after the one who went three students after H. Only D likes the same subject as C. H likes Biology. The number of persons went after J is more than the number of persons went before I. I does not go adjacent to C. Neither H nor G likes the same subject as J. Both E and I like the same subject.

Which of the following pair of students does not like the same subject?

- a. C and A
- b. E and H
- c. A and J
- d. F and J
- e. H and I

@QuizByMickey

12. Questions

Which of the following statement(s) is/are TRUE regarding the final arrangement?

- a. J went to school immediately before C
- b. G likes maths
- c. A likes the same subject as J
- d. C went to school two students before the one who likes Physics
- e. More than one of the above is true

13. Questions

Which of the following subject is liked by an even number of students?

- a. Biology
- b. Physics
- c. Maths
- d. Chemistry
- e. Both b and d

14. Questions

How many students went to school before J?

- a. More than three
- b. Three
- c. One
- d. None
- e. Two

15. Questions

What is the sum of the place value of students who went to school on Monday as per the alphabetical order?

- a. 18
- b. 20
- c. 19
- d. 23
- e. 26

16. Questions

In each of the following questions, two rows of numbers are given. The resultant number in each row is to be worked out separately based on the following rules and the questions below the rows of numbers are to be answered. The operation of numbers progresses from left to right. The given conditions are applicable only when the syllogism conclusions are definitely true.

Conditions:

I). If an odd number is followed by a prime number, then both numbers are to be added / All E can never be D.

II). If an even number is followed by another even number, then divide the first number by the second number / Some B is not D.

III). If a square number is followed by a prime number, then the difference of both numbers added to the first number (ignore the negative value) / Some A can be D.

IV). If an odd number is followed by an even number, then both numbers are multiplied / No C is A.

V). If a cube number is followed by an odd number, then the difference of both numbers is obtained (ignore the negative value) / Some C is B.

VI). If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility.

What is the square root of the sum of the resultant of both rows ?

35 17 4

42 3 16

Statement:

Only a few A is B.

Some B is E.

No E is D.

All C is D.

a. 3

b. 4

c. 2

d. 5

e. 6

17. Questions

What is the average of the resultant of the first row and second row?

36 7 2

96 24 7

Statements:

All A is B.

Only a few B is E.

No E is D.

Some C is A.

a. 35

b. 36

c. 32

@QuizByMickey

d. 37

e. 40

18. Questions

What is the difference between the resultant of the first row and the second row?

8 13 29

49 4 3

Statements:

All E is A.

No E is D.

Only a few D is B.

Only B is C.

a. 355

b. 350

c. 340

d. 365

e. 370

19. Questions

What is the multiplication of the resultant of the first row and the second row?

125 23 6

56 8 18

Statements:

All D is C.

Only a few B is D.

No C is F.

All A is F.

Some B is E.

a. 2100

b. 2142

c. 1250

d. 2242

@QuizByMickey

e. None of these

20. Questions

What is the sum of the resultant of the first row and the second row?

216 101 7

25 12 3

Statements:

Some E is A.

Only a few B is A.

No A is D.

All C is D.

a. 728

b. 740

c. 838

d. 755

e. 738

Explanations:

1. Questions

Final arrangement:

I.	<u>K</u>	<u>P</u>	<u>N</u>
II.	<u>I</u>	<u>S</u>	<u>W</u>
III.	<u>R</u>	<u>U</u>	<u>J</u>
IV.	<u>M</u>	<u>V</u>	<u>T</u>
V.	<u>Q</u>	<u>O</u>	<u>L</u>

@QuizByMickey

We have,

- R sits in row III on the left side of the aisle and sits immediately in front of M.
- S sits in row II but not in the seat immediately in front of R.
- W sits in one of the seats to the right of S in the same row as S.

From the above conditions, there are three possibilities.

Case 1				Case 2			
I.	_____	_____	_____	I.	_____	_____	_____
II.	_____	S	W	II.	S	W	_____
III.	R	_____	_____	III.	_____	R	_____
IV.	M	_____	_____	IV.	_____	M	_____
V.	_____	_____	_____	V.	_____	_____	_____

Case 3			
I.	_____	_____	_____
II.	S	_____	W
III.	_____	R	_____
IV.	_____	M	_____
V.	_____	_____	_____

Again we have,

- As many persons sit to the right of M as to the right of K.
- K sits in one of the rows in front of R but not in the same row as S.
- V sits in the same row as M, where O sits immediately behind V.
- Q sits to the left of O in the same row but not adjacent to the aisle.

From the above conditions case-1a is formed.

@QuizByMickey

Case 1				Case 2			
I.	K			I.		K	
II.		S	W	II.	S	W	
III.	R			III.		R	
IV.	M	V		IV.		M	V
V.	Q	O		V.	Q		O

Case 3				Case 1a			
I.		K		I.	K		
II.	S		W	II.		S	W
III.		R		III.	R		
IV.		M	V	IV.	M		V
V.	Q		O	V.	Q		O

Again we have,

- J sits immediately in front of T, where both U and J sit in the same row.
- P sits in one of the rows before U.
- Neither P nor U sits in the same row as W.
- P doesn't sit immediately in front of W.
- Neither I sits immediately next to the aisle nor L sits in the same row as P.
- As many persons sit to the left of N as to the left of L.

From the above conditions case-3 gets eliminated because Neither I sits immediately next to the aisle nor L sits in the same row as P, which is not satisfied

From the above conditions case-1a and case-2 get eliminated because as many persons sit to the left of N as to the left of L, which is not satisfied.

Hence, case-1 shows the final arrangement.

@QuizByMickey

Case 1

I.	<u>K</u>	<u>P</u>	<u>N</u>
II.	<u>I</u>	<u>S</u>	<u>W</u>
III.	<u>R</u>	<u>U</u>	<u>J</u>
IV.	<u>M</u>	<u>V</u>	<u>T</u>
V.	<u>Q</u>	<u>O</u>	<u>L</u>

~~Case 2~~

I.	<u>I</u>	<u>K</u>	<u>P</u>
II.	<u>S</u>	<u>W</u>	
III.	<u>J</u>	<u>R</u>	<u>U</u>
IV.	<u>T</u>	<u>M</u>	<u>V</u>
V.	<u>Q</u>		<u>O</u>

~~Case 3~~

I.	<u>P</u>	<u>K</u>	
II.	<u>S</u>		<u>W</u>
III.	<u>J</u>	<u>R</u>	<u>U</u>
IV.	<u>T</u>	<u>M</u>	<u>V</u>
V.	<u>Q</u>		<u>O</u>

~~Case 1a~~

I.	<u>K</u>	<u>P</u>	
II.	<u>I</u>	<u>S</u>	<u>W</u>
III.	<u>R</u>	<u>J</u>	<u>U</u>
IV.	<u>M</u>	<u>T</u>	<u>V</u>
V.	<u>Q</u>		<u>O</u>

Answer: B

2. Questions

Final arrangement:

I.	<u>K</u>	<u>P</u>	<u>N</u>
II.	<u>I</u>	<u>S</u>	<u>W</u>
III.	<u>R</u>	<u>U</u>	<u>J</u>
IV.	<u>M</u>	<u>V</u>	<u>T</u>
V.	<u>Q</u>	<u>O</u>	<u>L</u>

We have,

- R sits in row III on the left side of the aisle and sits immediately in front of M.
- S sits in row II but not in the seat immediately in front of R.
- W sits in one of the seats to the right of S in the same row as S.

From the above conditions, there are three possibilities.

Case 1				Case 2			
I.	_____	_____	_____	I.	_____	_____	_____
II.	_____	S	W	II.	S	W	_____
III.	R	_____	_____	III.	_____	R	_____
IV.	M	_____	_____	IV.	_____	M	_____
V.	_____	_____	_____	V.	_____	_____	_____

Case 3			
I.	_____	_____	_____
II.	S	_____	W
III.	_____	R	_____
IV.	_____	M	_____
V.	_____	_____	_____

Again we have,

- As many persons sit to the right of M as to the right of K.
- K sits in one of the rows in front of R but not in the same row as S.
- V sits in the same row as M, where O sits immediately behind V.
- Q sits to the left of O in the same row but not adjacent to the aisle.

From the above conditions case-1a is formed.

@QuizByMickey

Case 1				Case 2			
I.	K			I.		K	
II.		S	W	II.	S	W	
III.	R			III.		R	
IV.	M	V		IV.		M	V
V.	Q	O		V.	Q		O

Case 3				Case 1a			
I.		K		I.	K		
II.	S		W	II.		S	W
III.		R		III.	R		
IV.		M	V	IV.	M		V
V.	Q		O	V.	Q		O

Again we have,

- J sits immediately in front of T, where both U and J sit in the same row.
- P sits in one of the rows before U.
- Neither P nor U sits in the same row as W.
- P doesn't sit immediately in front of W.
- Neither I sits immediately next to the aisle nor L sits in the same row as P.
- As many persons sit to the left of N as to the left of L.

From the above conditions case-3 gets eliminated because Neither I sits immediately next to the aisle nor L sits in the same row as P, which is not satisfied

From the above conditions case-1a and case-2 get eliminated because as many persons sit to the left of N as to the left of L, which is not satisfied.

Hence, case-1 shows the final arrangement.

@QuizByMickey

Case 1

I.	<u>K</u>	<u>P</u>	<u>N</u>
II.	<u>I</u>	<u>S</u>	<u>W</u>
III.	<u>R</u>	<u>U</u>	<u>J</u>
IV.	<u>M</u>	<u>V</u>	<u>T</u>

Again we have,

- J sits immediately in front of T, where both U and J sit in the same row.
- P sits in one of the rows before U.
- Neither P nor U sits in the same row as W.
- P doesn't sit immediately in front of W.
- Neither I sits immediately next to the aisle nor L sits in the same row as P.
- As many persons sit to the left of N as to the left of L.

From the above conditions case-3 gets eliminated because Neither I sits immediately next to the aisle nor L sits in the same row as P, which is not satisfied

From the above conditions case-1a and case-2 get eliminated because as many persons sit to the left of N as to the left of L, which is not satisfied.

Hence, case-1 shows the final arrangement.

@QuizByMickey

Case 1

I.	<u>K</u>	<u>P</u>	<u>N</u>
II.	<u>I</u>	<u>S</u>	<u>W</u>
III.	<u>R</u>	<u>U</u>	<u>J</u>
IV.	<u>M</u>	<u>V</u>	<u>T</u>
V.	<u>Q</u>	<u>O</u>	<u>L</u>

~~Case 2~~

I.	<u>I</u>	<u>K</u>	<u>P</u>
II.	<u>S</u>	<u>W</u>	
III.	<u>J</u>	<u>R</u>	<u>U</u>
IV.	<u>T</u>	<u>M</u>	<u>V</u>
V.	<u>Q</u>		<u>O</u>

~~Case 3~~

I.	<u>P</u>	<u>K</u>	
II.	<u>S</u>		<u>W</u>
III.	<u>J</u>	<u>R</u>	<u>U</u>
IV.	<u>T</u>	<u>M</u>	<u>V</u>
V.	<u>Q</u>		<u>O</u>

~~Case 1a~~

I.	<u>K</u>	<u>P</u>	
II.	<u>I</u>	<u>S</u>	<u>W</u>
III.	<u>R</u>	<u>J</u>	<u>U</u>
IV.	<u>M</u>	<u>T</u>	<u>V</u>
V.	<u>Q</u>		<u>O</u>

Answer: A

6. Questions

Final arrangement:

@QuizByMickey

Answer: B

Point F is to the north east of point C.

7. Questions

Final arrangement:

Answer: D

@QuizByMickey

The Distance between FX is 26m

The distance between DE is 30m and the distance between DB is 4m

The difference between the point **DE-DB=26m**.

8. Questions

Final arrangement:

Answer: A

The distance between point W and point E = $WF + FE = 17m + 2m = 19m$

The distance between BE is **26 m**

The distance between WE is **7 less than** the distance between BE.

9. Questions

Final arrangement:

Answer: C

@QuizByMickey

The distance between the point DE is twice that of the distance between the points GH and C, B, D, E are in a straight line are true statements.

Thus, **Only I and III** are true

10. Questions

Final arrangement:

Answer: E

@QuizByMickey

The shortest distance between A and H = $\sqrt{16^2 + 14^2} = \sqrt{452} \text{m}$

11. Questions

Final arrangement:

Days	Persons	Subjects
Monday	J	Maths
Tuesday	C	Chemistry
Wednesday	A	Maths
Thursday	E	Biology
Friday	G	Physics
Saturday	H	Biology
Sunday	F	Maths
Monday	I	Biology
Tuesday	B	Physics
Wednesday	D	Chemistry

@QuizByMickey

We have,

- Only three students went between G and B, who went five students after E.
- As many students went before E as after F.

From the above conditions, there are three possibilities

Days	Case 1	Case 2	Case 3
	Persons	Persons	Persons
Monday		E	
Tuesday		G	E
Wednesday			G
Thursday	E		
Friday	G		
Saturday		B	
Sunday	F		B
Monday			
Tuesday	B		F
Wednesday		F	

Again, we have

- The number of persons went between F and A is **two more than** the number of persons went before C.
- C doesn't go after A.

From the above conditions, we get one more possibility i.e., case 1a

@QuizByMickey

Days	Case 1	Case 2	Case 3	Case-1a
	Persons	Persons	Persons	Persons
Monday		E	C	C
Tuesday	C	G	E	
Wednesday	A	C	G	
Thursday	E			E
Friday	G	A		G
Saturday		B	A	
Sunday	F		B	F
Monday				
Tuesday	B		F	B
Wednesday		F		A

Again, we have

- D went immediately after the one who went three students after H.
- The number of persons went after J is more than the number of persons went before I.
- I does not go adjacent to C.

From the above conditions, case 2, Case 3 and case 1a get eliminated, because The number of persons went after J is more than the number of persons went before I, which is not satisfied. Hence, case 1, shows the final arrangement.

@QuizByMickey

Days	Case 1	Case 2	Case 3	Case-1a
	Persons	Persons	Persons	Persons
Monday	J	E	C	C
Tuesday	C	G	E	H
Wednesday	A	C	G	
Thursday	E	H	H	E
Friday	G	A		G
Saturday	H	B	A	D
Sunday	F		B	F
Monday	I	D	D	
Tuesday	B		F	B
Wednesday	D	F		A

we have,

- Only D likes the same subject as C.
- C likes neither Maths nor Physics
- H likes Biology

Physics	Biology	Chemistry	maths
	H	C, D	

Again, we have

- Both B and G like the same subject.
- B likes neither Maths nor Biology.

Physics	Biology	Chemistry	maths
B, G	H,	C, D	

Again, we have

- F like neither Biology nor Physics.
- Both A and F like the same subject.

@QuizByMickey

Physics	Biology	Chemistry	maths
B, G	H,	C, D	F, A

Again, we have

- Neither H nor G likes the same subject as J.
- Both E and I like the same subject.

Physics	Biology	Chemistry	maths
B, G	H, E, I	C, D	F, A, J

Answer: A

12. Questions

Final arrangement:

Days	Persons	Subjects
Monday	J	Maths
Tuesday	C	Chemistry
Wednesday	A	Maths
Thursday	E	Biology
Friday	G	Physics
Saturday	H	Biology
Sunday	F	Maths
Monday	I	Biology
Tuesday	B	Physics
Wednesday	D	Chemistry

@QuizByMickey

We have,

- Only three students went between G and B, who went five students after E.

we have,

- Only D likes the same subject as C.
- C likes neither Maths nor Physics
- H likes Biology

Physics	Biology	Chemistry	maths
	H	C, D	

Again, we have

- Both B and G like the same subject.
- B likes neither Maths nor Biology.

Physics	Biology	Chemistry	maths
B, G	H,	C, D	

Again, we have

- F like neither Biology nor Physics.
- Both A and F like the same subject.

@QuizByMickey

Physics	Biology	Chemistry	maths
B, G	H,	C, D	F, A

Again, we have

- Neither H nor G likes the same subject as J.
- Both E and I like the same subject.

Physics	Biology	Chemistry	maths
B, G	H, E, I	C, D	F, A, J

Answer: C

16. Questions

Answer: B

For row 1: 35 17 4

35 17 (Condition I) -> If an odd number is followed by a prime number, then both numbers are to be added / All E can never be D (**Follows**)

$$35 + 17 = 52$$

52 4 (Condition II) -> If an even number is followed by another even number, then divide the first number by the second number / Some B is not D. (**Follows**)

$$52 / 4 = 13 \text{ (Resultant of the first row)}$$

For row 2: 42 3 16

42 3 (condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility (**Follows**)

$$42 + 3 = 45 \rightarrow 45 + 3 = 48$$

48 16 (Condition II) -> If an even number is followed by another even number, then divide the first number by the second number / Some B is not D. (**Follows**)

$$48 / 16 = 3 \text{ (Resultant of the second row)}$$

The sum of the resultant of both rows = 16

@QuizByMickey

The square root of the sum of the resultant of both rows is 4

17. Questions

Answer: D

For row 1: 36 7 2

36 7 (Condition III) -> If a square number is followed by a prime number, then the difference of both numbers added to the first number(ignore negative value) / Some A can be D. **(Follows)**

36 7 (Condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility. **(This conclusion does not follows so we can't apply this condition)**

$$36 + 29 = 65$$

65 2 (Condition I) -> If an odd number is followed by a prime number, then both numbers are to be added / All E can never be D **(Follows)**

65 2 (Condition IV) -> If an odd number is followed by an even number, then both numbers are multiplied / No C is A **(This conclusion does not follows so we can't apply this condition)**

$$65 + 2 = 67 \text{ (Resultant of the first row)}$$

For row 2: 96 24 7

96 24 (Condition II) -> If an even number is followed by another even number, then divide the first number by the second number / Some B is not D. **(Follows)**

$$96 / 24 = 4$$

4 7 (Condition III) -> If a square number is followed by a prime number, then the difference of both numbers added to the first number (ignore the negative value) / Some A can be D. **(Follows)**

4 7 (Condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility. **(This conclusion does not follows so we can't apply this condition)**

$$4 - 7 = 3 + 4 = 7 \text{ (Resultant of the second row)}$$

$$67 + 7 = 74 / 2 = 37$$

The average of the resultant of the first row and second row is 37

18. Questions

Answer: A

For row 1: 8 13 29

8 13 (Condition V) -> If a cube number is followed by an odd number, then the difference of both numbers is obtained / Some C is B. **(Follows)**

8 13 (Condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility. **(This conclusion does not follows so we can't apply this condition)**

$$8 - 13 = 5$$

5 29 (Condition I) -> If an odd number is followed by a prime number, then both numbers are to be added / All E can never be D **(Follows)**

$$5 + 29 = 34 \text{ (Resultant of the first row)}$$

For row 2: 49 4 3

49 4 (Condition IV) -> If an odd number is followed by an even number, then both numbers are multiplied / No C is A **(Follows)**

$$49 * 4 = 196$$

196 3 (Condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility. **(This conclusion does not follows so we can't apply this condition)**

196 3 (Condition III) -> If a square number is followed by a prime number, then the difference of both numbers added to the first number (ignore the negative value) / Some A can be D. **(Follows)**

$$196 + 193 = 389 \text{ (Resultant of the second row)}$$

$$389 - 34 = 355$$

The difference between the resultant of the first row and the second row is 355

19. Questions

Answer: B

@QuizByMickey

For row 1: 125 23 6

125 23 (Condition I) -> If an odd number is followed by a prime number, then both numbers are to be added / All E can never be D (**This conclusion does not follow so we can't apply this condition**)

125 23 (Condition V) -> If a cube number is followed by an odd number, then the difference of both numbers is obtained (ignore the negative value) / Some C is B. (**Follows**)

$$125 - 23 = 102$$

102 6 (Condition II) -> If an even number is followed by another even number, then divide the first number by the second number / Some B is not D. (**Follows**)

$$102 / 6 = 17 \text{ (Resultant of the first row)}$$

For row 2: 56 8 18

56 8 (Condition II) -> If an even number is followed by another even number, then divide the first number by the second number / Some B is not D. (**Follows**)

$$56 / 8 = 7$$

7 18 (Condition IV) -> If an odd number is followed by an even number, then both numbers are multiplied / No C is A (**Follows**)

$$7 * 18 = 126 \text{ (Resultant of the second row)}$$

$$17 * 126 = 2142$$

The multiplication of the resultant of the first row and the second row is 2142

20. Questions

Answer: E

@QuizByMickey

For row 1: 216 101 7

216 101 (Condition V) -> If a cube number is followed by an odd number, then the difference of both numbers is obtained (ignore the negative value) / Some C is B. **(This conclusion does not follow so we can't apply this condition)**

216 101 (condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility **(Follows)**

$$216 + 101 = 317$$

$$317 + 101 = 418$$

418 7 (condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility **(Follows)**

$$418 + 7 = 425$$

$$425 + 7 = 432 \text{ (Resultant of the first row)}$$

For row 2: 25 12 3

25 12 (Condition IV) -> If an odd number is followed by an even number, then both numbers are multiplied / No C is A **(Follows)**

$$25 * 12 = 300$$

300 3 (condition VI) -> If an even number is followed by the prime number, then the sum of both numbers is added to the second number / No B is C is a possibility **(Follows)**

$$300 + 3 = 303$$

$$303 + 3 = 306 \text{ (Resultant of the second row)}$$

$$432 + 306 = 738$$

The sum of the resultant of the first row and the second row is 738
