

1. Questions

Study the following information carefully and answer the below questions.

Eighteen persons sit around a rectangular table in such a way that four persons sit at each longer side, three persons sit at each shorter side and one person sits at each corner of the table. All persons face inside.

Note: Distance between two adjacent persons seated at the longer sides is 12m and the distance between two adjacent persons seated at the shorter sides is 6m. The total distance of each longer side is 60m and the total distance of each shorter side is 24m.

The distance between I and J is 12m and J sits at one of the corners. The distance between J and its immediate right neighbour is 12m. K sits 60m away from I. L sits opposite to M, who sits second to the right of K. The distance between L and N is 42m. Only two persons sit between N and O.

The distance between P and the one who sits immediately to the left of O is 66m. An equal number of persons sit between P and Q from both sides. Z sits opposite to the one who sits second to the right of Q. R sits fifth to the right of S. The distance between R and T is 30m. One person sits between T and U, who sits 18m away from V. W sits opposite to X, who sits two persons away from Y.

What is the least distance between Y and the one who sits second to the right of V?

- a. 72m
- b. 78m
- c. 60m
- d. 108m
- e. 48m

2. Questions

Which of the following pairs of persons has the maximum distance between them from the right of the 1st person as per the final arrangement?

- a. U-Z
- b. W-K
- c. Y-N
- d. T-V
- e. Q-L

@QuizByMickey

3. Questions

Which of the following statement(s) is/are FALSE with respect to the final arrangement?

- I). V sits opposite to R
- II). The least distance between M and T is 42m
- III). P and Z sit adjacent to each other

IV). S sits at the shorter side of the table

- a. Only I and IV
- b. Only II and III
- c. Only IV
- d. Only II and IV
- e. Only I and III

4. Questions

Who among the following person sits opposite to the one who sits third to the right of P?

- a. U
- b. W
- c. Y
- d. V
- e. Q

5. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which of the following does not belong to that group?

- a. V, I
- b. R, Y
- c. M, R
- d. W, V
- e. J, L

6. Questions

Study the following information carefully and answer the below questions.

Seventeen consecutive multiples of '9' are written from top to bottom, starting from 9. The letters of the word "OVERCOME" are written in the odd-numbered position in order of appearance in the word from bottom to top. Letters G, H, J, K, L, N, P, Q and V, however, not necessarily in the same order, are written against the remaining numbers.

Only four letters are between V and H. Only five letters are between H and G. L is written against the number, which is half of the number against which G is written. J is immediately below O. Q is written four letters below K. Only four letters are between P and A, which is not written adjacent to M. N is written below P.

Which among the following letter(s) is/are written against the number which is a multiple of 6?

I). R

II). M

III). V

- a. Only I
- b. Only II
- c. Only III
- d. Only II and III
- e. None of the above

7. Questions

How many letters are below P as per the final arrangement?

- a. As many letters are above E
- b. As many letters are between H and M
- c. As many letters are above H
- d. As many letters are above K
- e. As many letters are between G and E

8. Questions

What is the absolute difference of the numbers against the letter which is immediately above N and Q as per the final arrangement?

- a. 12
- b. 9
- c. 27
- d. 15
- e. 3

@QuizByMickey

9. Questions

Which of the following letter is written against the number 117 based on the final arrangement?

- a. R
- b. E
- c. O
- d. G
- e. C

10. Questions

How many vowels are written against the even numbers with respect to the final arrangement?

- a. None
- b. One
- c. Two
- d. Three
- e. Four

11. Questions

Study the following information carefully and answer the below questions.

Twelve persons were born on three different dates – 5, 10 or 15 – in four different months – May, June, July, and September. No two persons were born on the same date in the same month. Each of them visited different city – Jaipur, Udaipur, Agra, Delhi, Mumbai, Goa, Kochi, Chennai, Mysuru, Leh, Jodhpur and Kolkata. All the information is not necessarily in the same order.

A was born on an even-numbered date in the month having an even number of days. Only three persons were born between A and the one who visited Goa. The person who visited Jodhpur was born three persons after the one who visited Goa. B was born two persons after the one who visited Jodhpur. Only five persons were born between B and C, who visited Leh. D was born four persons before the one who visited Mysuru. D and C were not born on the same date. The one who visited Chennai was born immediately before the one who visited Mysuru but not visited by A. The one who visited Kochi was born two persons after the one who visited Mysuru. Only four persons were born between E and the one who visited Chennai. E was not born on an even numbered date. As many persons were born before E as after F. E and D do not visit Kolkata. G, who visited Agra, was born immediately after I, who visited Udaipur but was born before H, who visited Mumbai. J was born two months before the one who visited Kolkata on the same date. D and K do not visit both Delhi and Goa. L is also one of the persons.

On which of the following date and month does C was born based on the final arrangement?

- a. 15 June
- b. 5 June
- c. 10 May
- d. 10 July
- e. 15 September

@QuizByMickey

12. Questions

If E is related to Mumbai in a certain way, K is related to Mysore then who among the following person is related to Jaipur?

- a. D
- b. E

- c. F
- d. H
- e. G

13. Questions

The number of persons born after the one who visited Jodhpur is the same as the number of persons born between ____ and _____ respectively.

- a. B, K
- b. E, C
- c. H, J
- d. D, I
- e. C, K

14. Questions

Which among the following combination(s) is/are incorrect with respect to the final arrangement?

- a. B - Kolkata
- b. F - Jodhpur
- c. A - Chennai
- d. D - Jaipur
- e. E - Delhi

15. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which of the following does not belong to that group?

- a. B
- b. F
- c. A
- d. D
- e. E

@QuizByMickey

16. Questions

There are some blank spaces in step 1, step 2, Step 3 and Step 4. Fill in the blank carefully and answer the question given below:

Input Series: F U W S G Z Q R K N V M B N G

Step 1: __ U W S __ Z Q R __ N V M C N H

Step 2: G __ __ H H A __ __ L M E M C M H

Step 3: G F D __ H J A L I __ M E C M H

Step 4: G F D J A L I E C

Which of the following letters comes in place of the blank spaces in step 3?

- a. DJ
- b. HM
- c. AL
- d. CH
- e. ME

17. Questions

Which of the following letters are the 7th and 8th from the left and right end, respectively, in step 2?

- a. JD
- b. MH
- c. LA
- d. JI
- e. EM

18. Questions

Which of the following letters comes in the place of blank spaces in step 1 as per the final arrangement?

- a. GHK
- b. AKL
- c. JIA
- d. TUM
- e. GHL

@QuizByMickey

19. Questions

How many vowels are there in step-4 as per the final arrangement?

- a. Three
- b. None

- c. Two
- d. One
- e. Four

20. Questions

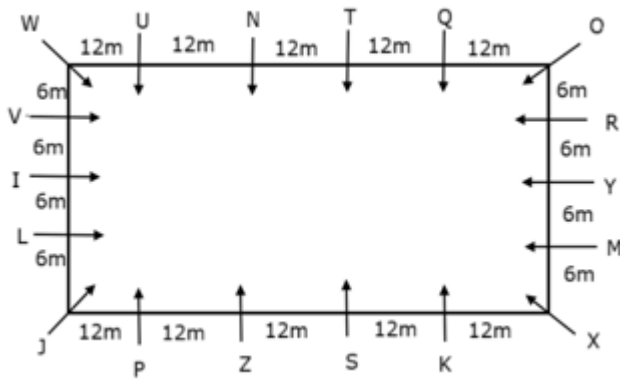

If all the vowels are dropped in step 3, then which of the following letter is the 10th from the left end of the series?

- a. G
- b. F
- c. C
- d. M
- e. H

Explanations:

1. Questions

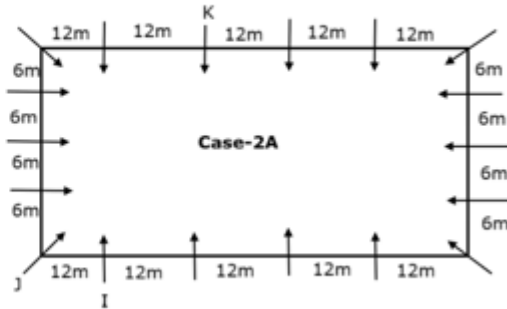

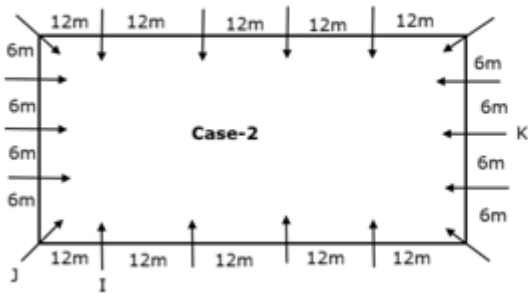

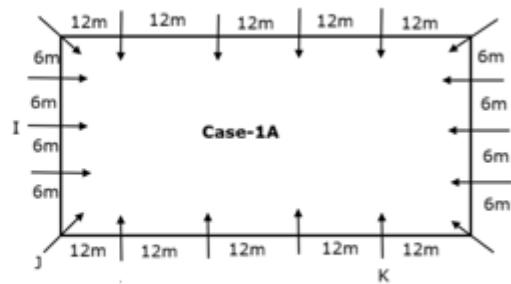

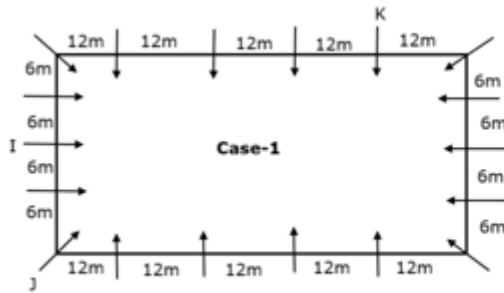

Final Arrangement:

We have:

- The distance between I and J is 12m and J sits at one of the corners.
- The distance between J and its immediate right neighbour is 12m.
- K sits 60m away from I.

From the above conditions, we have four possibilities:

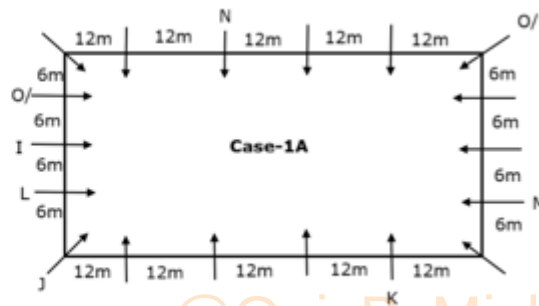

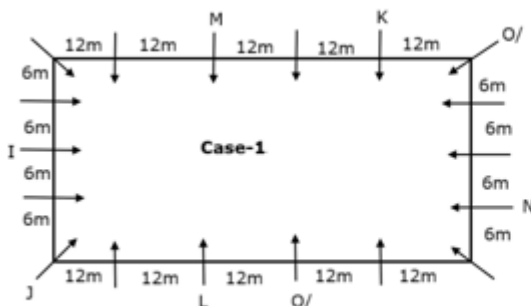

Again, we have:

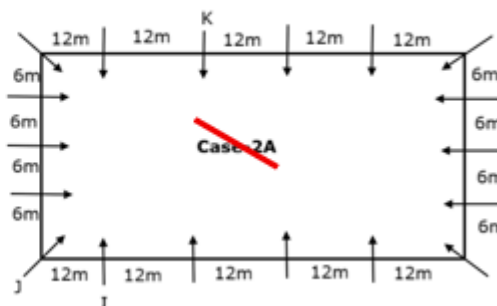

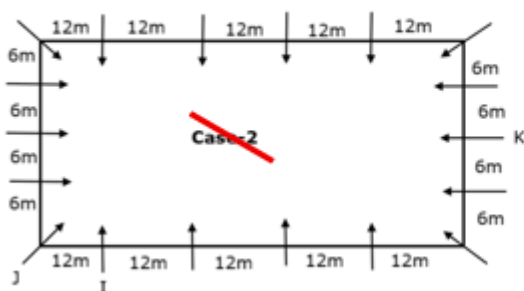

- L sits opposite to M, who sits second to the right of K.
- The distance between L and N is 42m.
- Only two persons sit between N and O.

From the above case-2 gets eliminated because L sits opposite to M, who sits second to the right of K, which is not satisfied.

Also, case-2A gets eliminated because the distance between L and N is 42m, which is not satisfied.

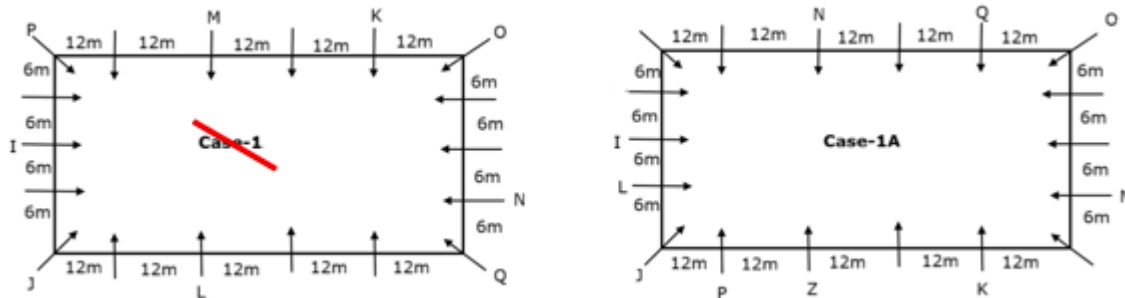

@QuizByMickey

Again, we have:

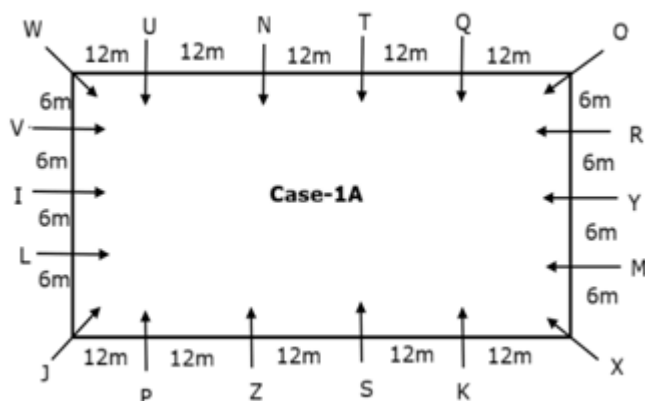

- The distance between P and the one who sits immediate to the left of O is 66m.
- An equal number of persons sit between P and Q from both sides.
- Z sits opposite to the one who sits second to the right of Q.

From the above conditions, case-1 gets eliminated because Z sits opposite to the one who sits second to the right of Q, which is not satisfied.

Again, we have:

- R sits fifth to the right of S.
- The distance between R and T is 30m.
- One person sits between T and U, who sits 18m away from V.
- W sits opposite to X, who sits two persons away from Y.

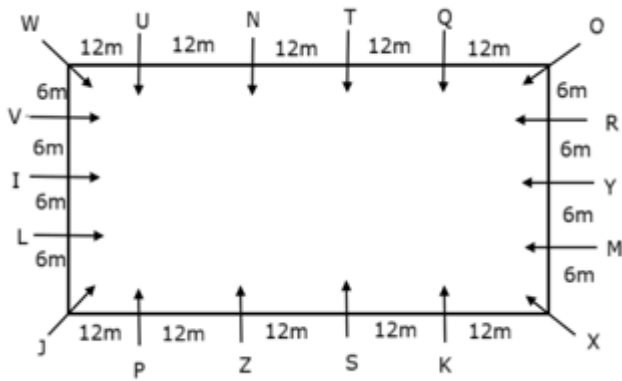

Hence, case-1A shows the final arrangement.

Answer: B

2. Questions

Final Arrangement:

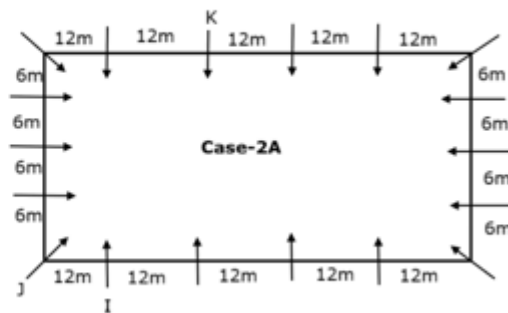

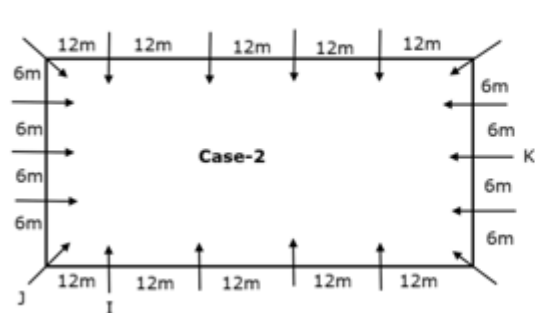

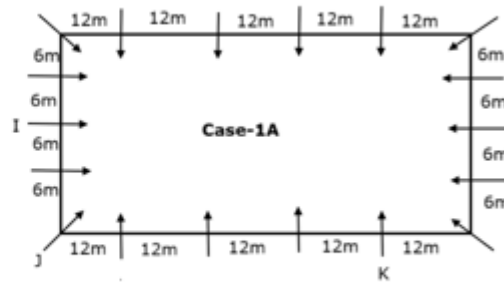

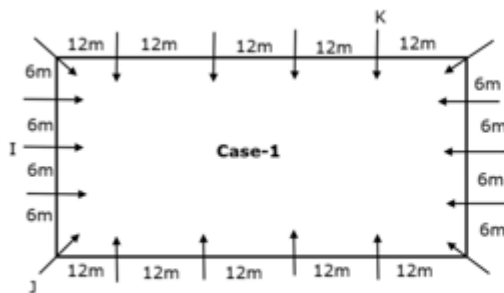

@QuizByMickey

We have:

- The distance between I and J is 12m and J sits at one of the corners.
- The distance between J and its immediate right neighbour is 12m.
- K sits 60m away from I.

From the above conditions, we have four possibilities:

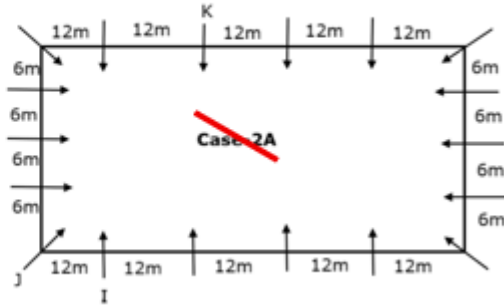

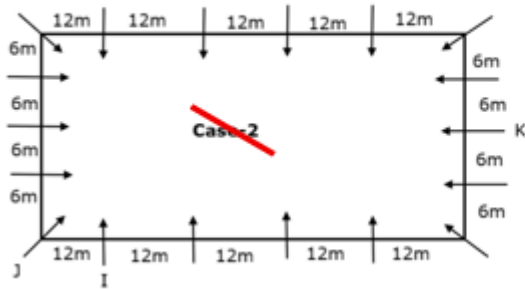

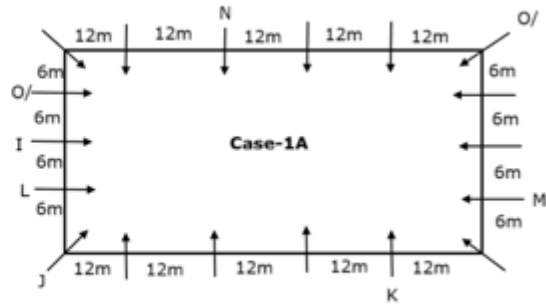

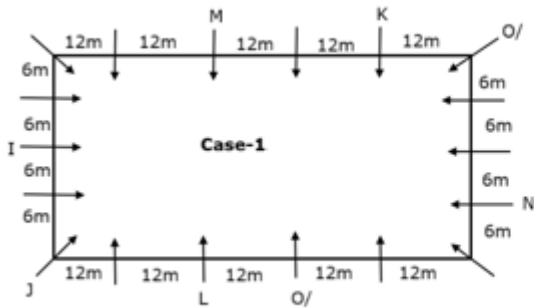

Again, we have:

- L sits opposite to M, who sits second to the right of K.
- The distance between L and N is 42m.
- Only two persons sit between N and O.

From the above case-2 gets eliminated because L sits opposite to M, who sits second to the right of K, which is not satisfied.

Also, case-2A gets eliminated because the distance between L and N is 42m, which is not satisfied.

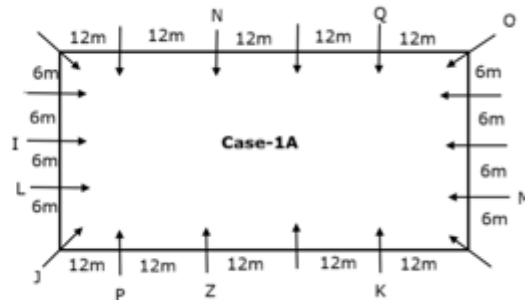

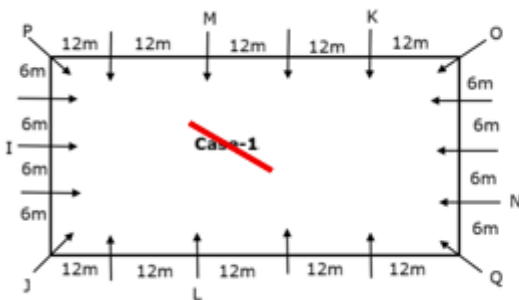

@QuizByMickey

Again, we have:

- The distance between P and the one who sits immediate to the left of O is 66m.
- An equal number of persons sit between P and Q from both sides.
- Z sits opposite to the one who sits second to the right of Q.

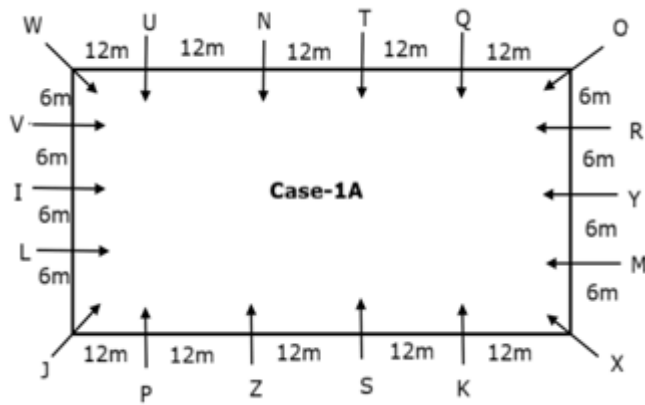

From the above conditions, case-1 gets eliminated because Z sits opposite to the one who sits second to the right of Q, which is not satisfied.

Again, we have:

- R sits fifth to the right of S.
- The distance between R and T is 30m.
- One person sits between T and U, who sits 18m away from V.
- W sits opposite to X, who sits two persons away from Y.

@QuizByMickey

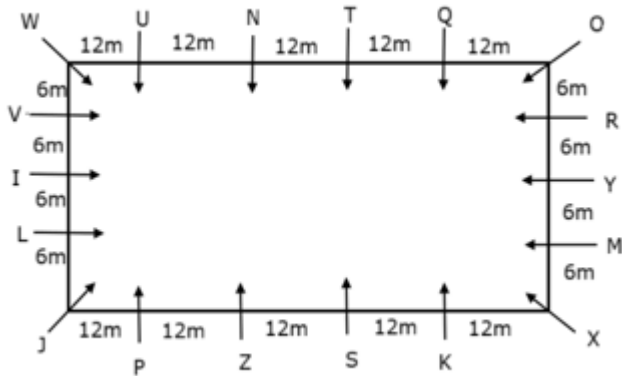

Hence, case-1A shows the final arrangement.

Answer: B

3. Questions

Final Arrangement:

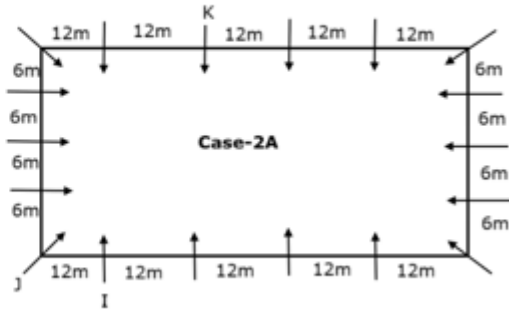

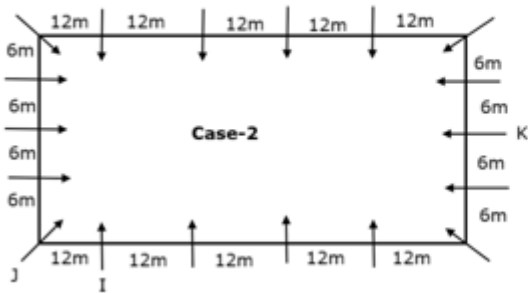

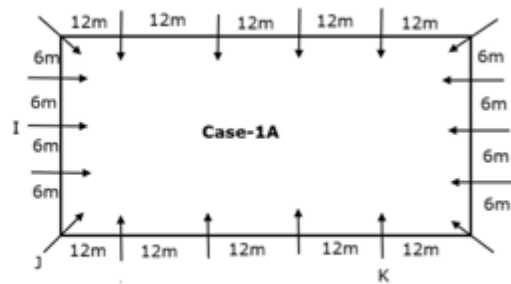

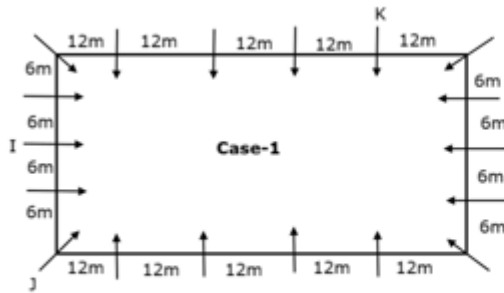

We have:

- The distance between I and J is 12m and J sits at one of the corners.
- The distance between J and its immediate right neighbour is 12m.
- K sits 60m away from I.

From the above conditions, we have four possibilities:

@QuizByMickey

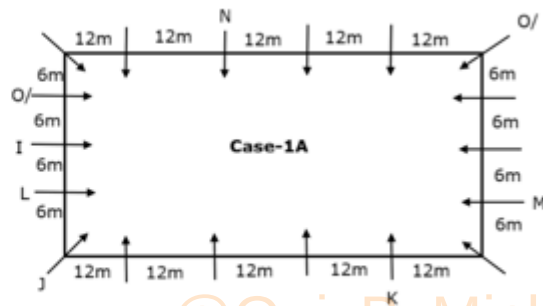

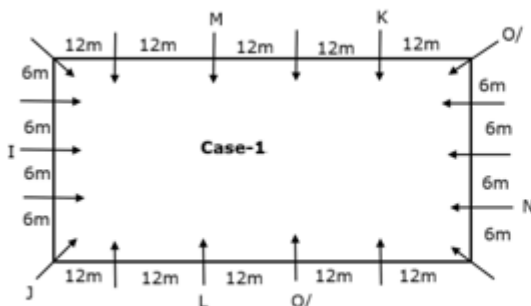

Again, we have:

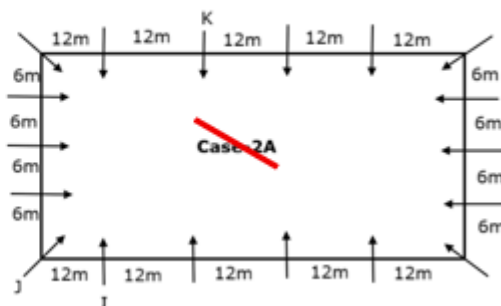

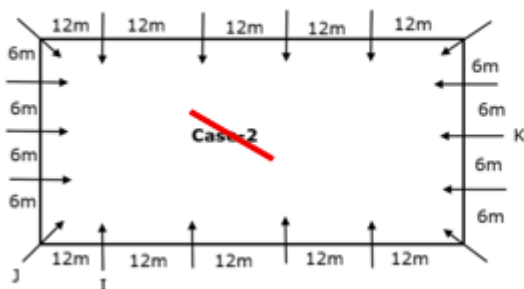

- L sits opposite to M, who sits second to the right of K.
- The distance between L and N is 42m.
- Only two persons sit between N and O.

From the above case-2 gets eliminated because L sits opposite to M, who sits second to the right of K, which is not satisfied.

Also, case-2A gets eliminated because the distance between L and N is 42m, which is not satisfied.

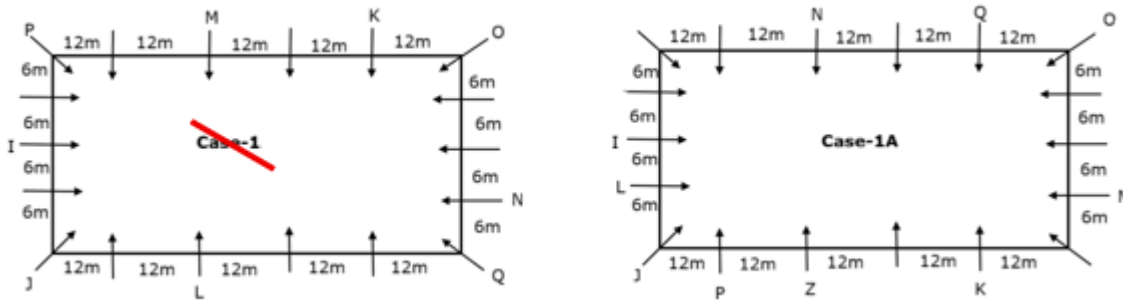

@QuizByMickey

Again, we have:

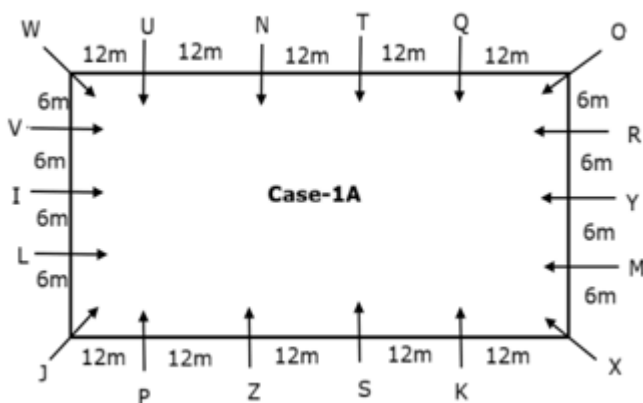

- The distance between P and the one who sits immediate to the left of O is 66m.
- An equal number of persons sit between P and Q from both sides.
- Z sits opposite to the one who sits second to the right of Q.

From the above conditions, case-1 gets eliminated because Z sits opposite to the one who sits second to the right of Q, which is not satisfied.

Again, we have:

- R sits fifth to the right of S.
- The distance between R and T is 30m.
- One person sits between T and U, who sits 18m away from V.
- W sits opposite to X, who sits two persons away from Y.

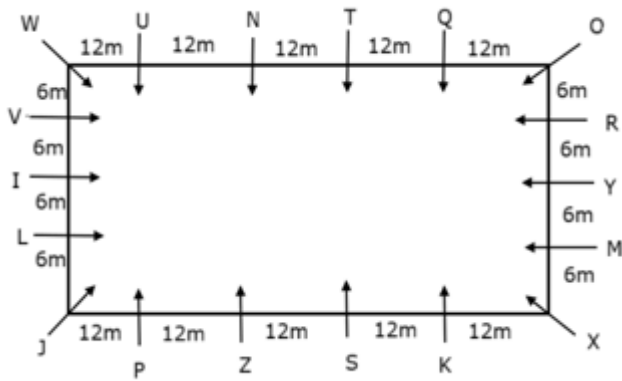

Hence, case-1A shows the final arrangement.

Answer: C

4. Questions

Final Arrangement:

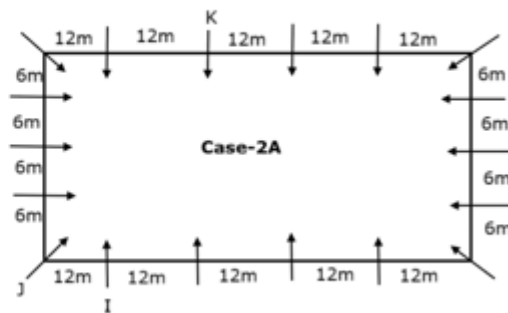

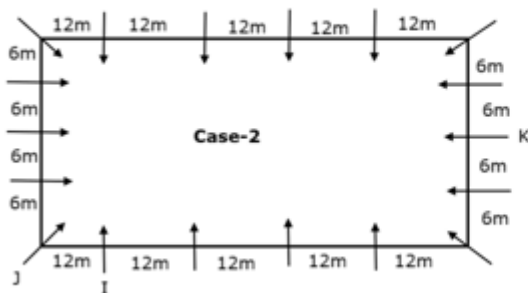

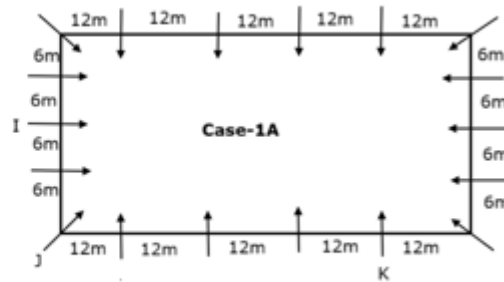

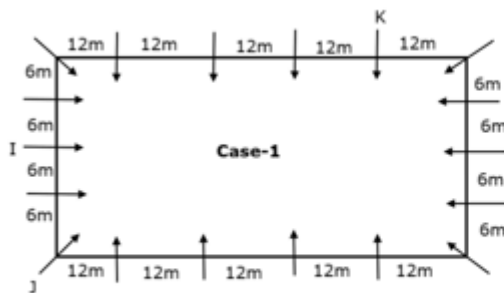

@QuizByMickey

We have:

- The distance between I and J is 12m and J sits at one of the corners.
- The distance between J and its immediate right neighbour is 12m.
- K sits 60m away from I.

From the above conditions, we have four possibilities:

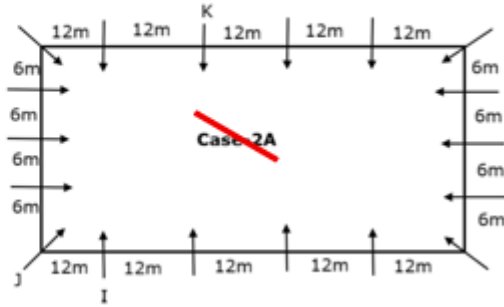

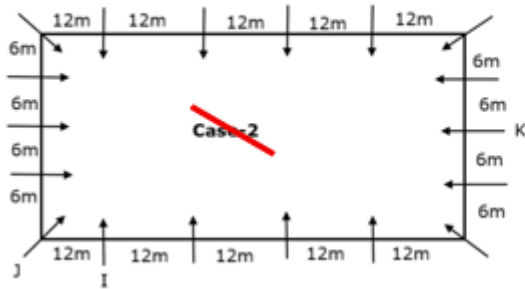

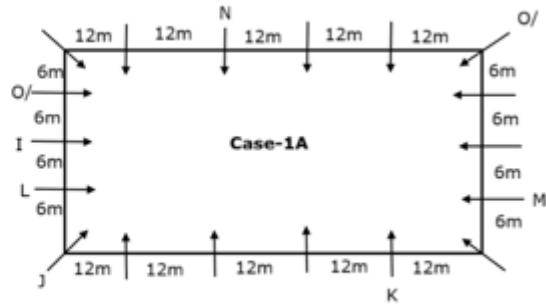

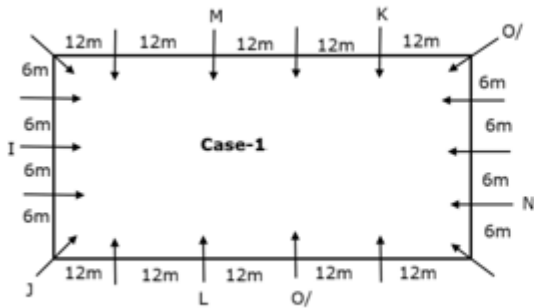

Again, we have:

- L sits opposite to M, who sits second to the right of K.
- The distance between L and N is 42m.
- Only two persons sit between N and O.

From the above case-2 gets eliminated because L sits opposite to M, who sits second to the right of K, which is not satisfied.

Also, case-2A gets eliminated because the distance between L and N is 42m, which is not satisfied.

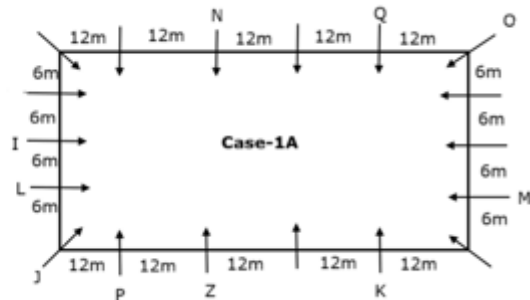

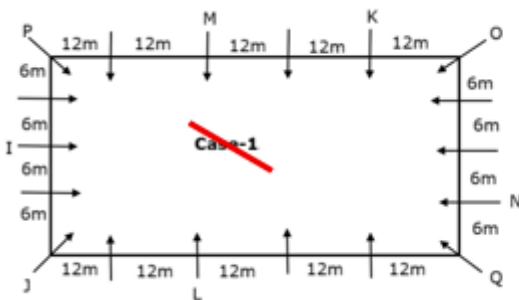

@QuizByMickey

Again, we have:

- The distance between P and the one who sits immediate to the left of O is 66m.
- An equal number of persons sit between P and Q from both sides.
- Z sits opposite to the one who sits second to the right of Q.

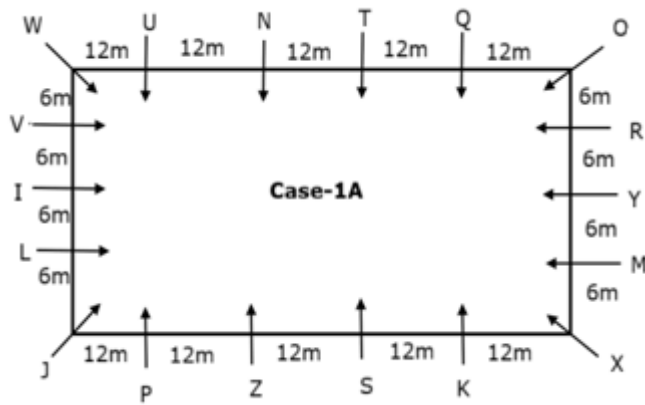

From the above conditions, case-1 gets eliminated because Z sits opposite to the one who sits second to the right of Q, which is not satisfied.

Again, we have:

- R sits fifth to the right of S.
- The distance between R and T is 30m.
- One person sits between T and U, who sits 18m away from V.
- W sits opposite to X, who sits two persons away from Y.

@QuizByMickey

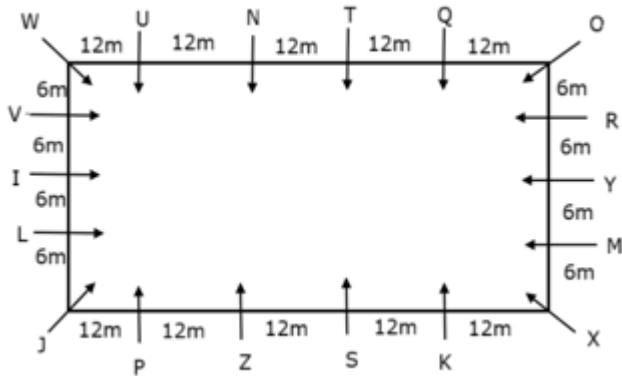

Hence, case-1A shows the final arrangement.

Answer: E

5. Questions

Final Arrangement:

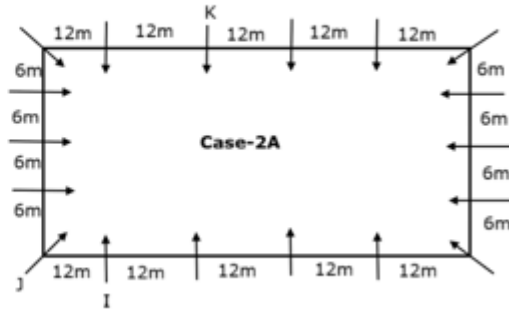

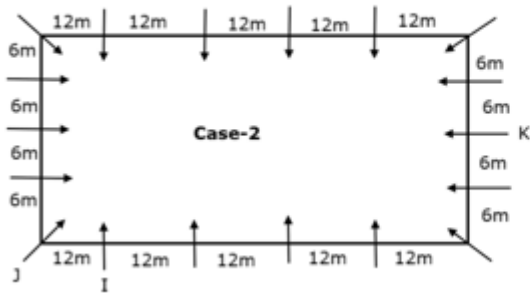

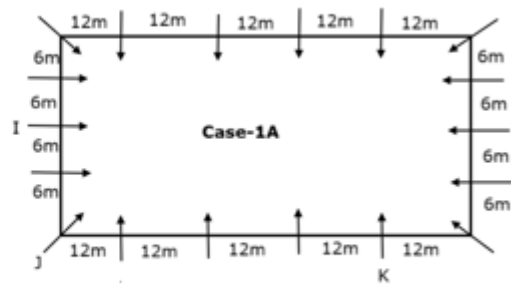

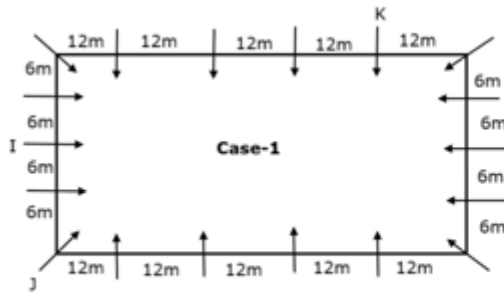

We have:

- The distance between I and J is 12m and J sits at one of the corners.
- The distance between J and its immediate right neighbour is 12m.
- K sits 60m away from I.

From the above conditions, we have four possibilities:

@QuizByMickey

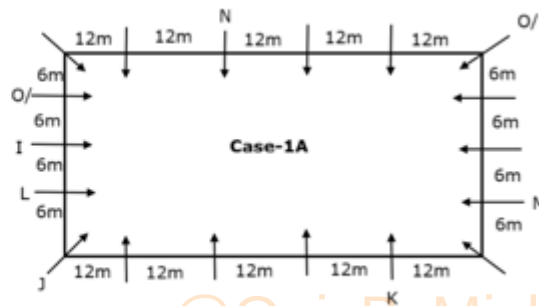

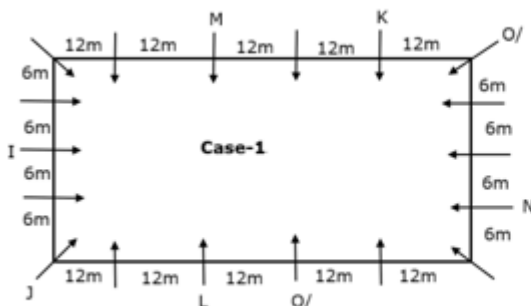

Again, we have:

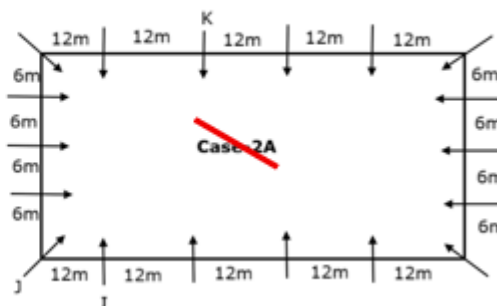

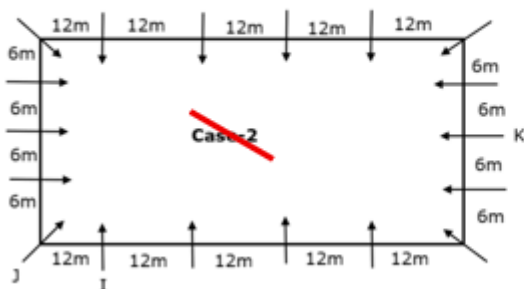

- L sits opposite to M, who sits second to the right of K.
- The distance between L and N is 42m.
- Only two persons sit between N and O.

From the above case-2 gets eliminated because L sits opposite to M, who sits second to the right of K, which is not satisfied.

Also, case-2A gets eliminated because the distance between L and N is 42m, which is not satisfied.

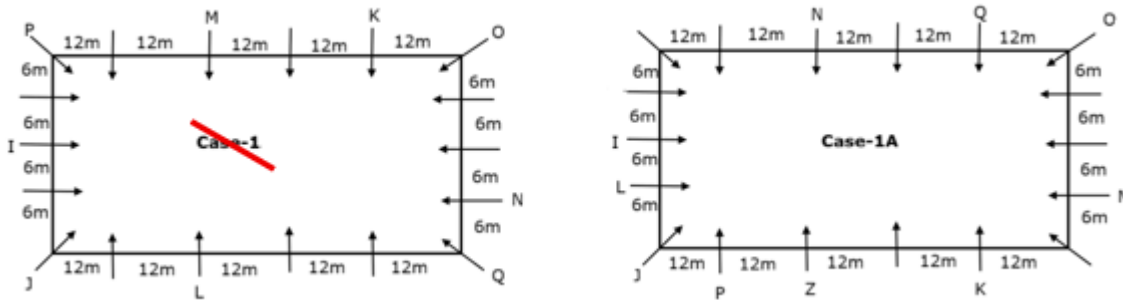

@QuizByMickey

Again, we have:

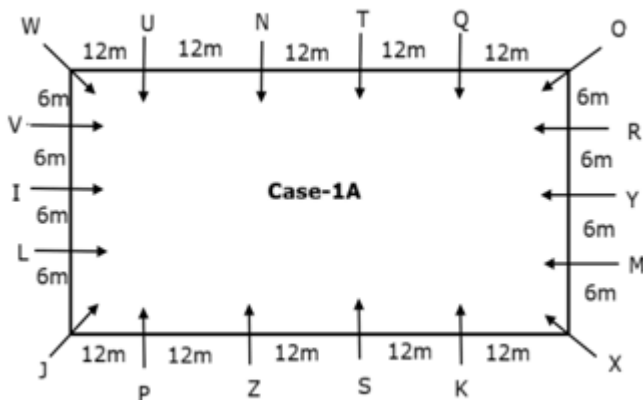

- The distance between P and the one who sits immediate to the left of O is 66m.
- An equal number of persons sit between P and Q from both sides.
- Z sits opposite to the one who sits second to the right of Q.

From the above conditions, case-1 gets eliminated because Z sits opposite to the one who sits second to the right of Q, which is not satisfied.

Again, we have:

- R sits fifth to the right of S.
- The distance between R and T is 30m.
- One person sits between T and U, who sits 18m away from V.
- W sits opposite to X, who sits two persons away from Y.

Hence, case-1A shows the final arrangement.

Answer: C (The distance between all the pairs is 6m except in option C)

6. Questions

Final Arrangement:

@QuizByMickey

Number	Letter
9	A
18	L
27	E
36	G
45	M

54	P
63	O
72	J
81	C
90	H
99	R
108	K
117	E
126	N
135	V
144	Q
153	O

@QuizByMickey

Hence, Case 2 shows the final arrangement.

Answer: B

10. Questions

Final Arrangement:

Number	Letter
9	A
18	L
27	E
36	G
45	M
54	P
63	O
72	J
81	C
90	H
99	R
108	K
117	E
126	N
135	V
144	Q
153	O

@QuizByMickey

We have:

Seventeen consecutive multiples of '9' are written from top to bottom starting from 9. The letters of the word "OVERCOME" are written in the odd-numbered position in their order of appearance in the word from bottom to top.

Number	Letter
9	
18	
27	E
36	
45	M
54	
63	O
72	
81	C
90	
99	R
108	
117	E
126	
135	V
144	
153	O

@QuizByMickey

Again, we have:

- Only four letters are between V and H.
- Only five letters are between H and G.

From the above conditions, there are two possibilities.

	Case-1	Case-2
Number	Letter	Letter
9		
18		
27	E	E
36		G
45	M	M
54		
63	O	O
72		
81	C	C
90	H	H
99	R	R
108		
117	E	E
126		
135	V	V
144	G	
153	O	O

@QuizByMickey

Again, we have,

- L is written against the number, which is half of the number against which G is written.
- J is immediately below O.

From the above conditions, case-1 gets eliminated because J is immediately below O, which is not satisfied.

	Case-1	Case-2
Number	Letter	Letter
9		
18		L
27	E	E
36		G
45	M	M
54		
63	O	O
72	L	J
81	C	C
90	H	H
99	R	R
108		
117	E	E
126		
135	V	V
144	G	
153	O	O

@QuizByMickey

Again, we have:

- Q is written four letters below K.
- Only four letters are between P and A ,which is not adjacent to M.
- N is written below P.

	Case-2
Number	Letter
9	A
18	L
27	E
36	G
45	M
54	P
63	O
72	J
81	C
90	H
99	R
108	K
117	E
126	N
135	V
144	Q
153	O

@QuizByMickey

Hence, Case 2 shows the final arrangement.

Answer: A

11. Questions

Final Arrangement:

Month	Date	Person	City
May	5	I	Udaipur
	10	G	Agra
	15	E	Delhi
June	5	H	Mumbai
	10	D	Jaipur
	15	C	Leh
July	5	L	Goa
	10	K	Chennai
	15	J	Mysuru
September	5	F	Jodhpur
	10	A	Kochi
	15	B	Kolkata

We have:

- A was born on an even-numbered date in the month having an even number of days.
- Only three persons were born between A and the one who visited Goa.
- The person who visited Jodhpur was born three persons after the one who visited Goa.

From the above conditions, there are three possibilities:

@QuizByMickey

		Case-1		Case-2		Case-3	
Month	Date	Person	City	Person	City	Person	City
May	5		Goa				
	10						
	15						
June	5		Jodhpur				
	10	A		A			
	15						
July	5						Goa
	10						
	15				Goa		
September	5						Jodhpur
	10					A	
	15				Jodhpur		

Again, we have,

- B was born two persons after the one who visited Jodhpur.
- Only five persons were born between B and C, who visited Leh.

From the above, case-2 gets eliminated because B was born two persons after the one who visited Jodhpur, which is not satisfied.

@QuizByMickey

		Case-1		Case-2		Case-3	
Month	Date	Person	City	Person	City	Person	City
May	5		Goa				
	10						
	15						
June	5		Jodhpur				
	10	A		A			
	15	B				C	Leh
July	5						Goa
	10						
	15				Goa		
September	5						Jodhpur
	10					A	
	15	C	Leh		Jodhpur	B	

Again, we have,

- D was born four persons before the one who visited Mysuru.
- D and C were not born on the same date.
- The one who visited Chennai was born immediately before the one who visited Mysuru but not visited by A.
- The one who visited Kochi was born two persons after the one who visited Mysuru.
- Only four persons were born between E and the one who visited Chennai.

		Case-1		Case-3	
Month	Date	Person	City	Person	City
May	5		Goa		
	10	E			
	15			E	
June	5	D	Jodhpur		
	10	A		D	
	15	B		C	Leh
July	5		Chennai		Goa
	10		Mysuru		Chennai
	15				Mysuru
September	5		Kochi		Jodhpur
	10			A	Kochi
	15	C	Leh	B	

Again, we have,

- E was not born on an even numbered date.
- As many persons were born before E as after F.
- E and D do not visit Kolkata.

From the above case-1 gets eliminated because E was not born on an even numbered date, which is not satisfied here.

@QuizByMickey

		Case-1	Case-3		
Month	Date	Person	City	Person	City
May	5		Goa		
	10	E			
	15			E	
June	5	D	Jodhpur		
	10	A		D	
	15	B		C	Leh
July	5		Chennai		Goa
	10		Mysuru		Chennai
	15				Mysuru
September	5		Kochi	F	Jodhpur
	10			A	Kochi
	15	C	Leh	B	

Again, we have,

- G, who visited Agra, was born immediately after I, who visited Udaipur but was born before H, who visited Mumbai.
- J was born two months before the one who visited Kolkata on the same date.
- D and K do not visit Delhi and Goa.
- L is also one of the persons.

@QuizByMickey

		Case-3	
Month	Date	Person	City
May	5	I	Udaipur
	10	G	Agra
	15	E	Delhi
June	5	H	Mumbai
	10	D	Jaipur
	15	C	Leh
July	5	L	Goa
	10	K	Chennai
	15	J	Mysuru
September	5	F	Jodhpur
	10	A	Kochi
	15	B	Kolkata

Hence, case-3 shows the final arrangement.

Answer: A

12. Questions

Final Arrangement:

@QuizByMickey

Month	Date	Person	City
May	5	I	Udaipur
	10	G	Agra
	15	E	Delhi
June	5	H	Mumbai
	10	D	Jaipur
	15	C	Leh
July	5	L	Goa
	10	K	Chennai
	15	J	Mysuru
September	5	F	Jodhpur
	10	A	Kochi
	15	B	Kolkata

We have:

- A was born on an even-numbered date in the month having an even number of days.
- Only three persons were born between A and the one who visited Goa.
- The person who visited Jodhpur was born three persons after the one who visited Goa.

From the above conditions, there are three possibilities:

@QuizByMickey

		Case-1		Case-2		Case-3	
Month	Date	Person	City	Person	City	Person	City
May	5		Goa				
	10						
	15						
June	5		Jodhpur				
	10	A		A			
	15						
July	5						Goa
	10						
	15				Goa		
September	5						Jodhpur
	10					A	
	15				Jodhpur		

Again, we have,

- B was born two persons after the one who visited Jodhpur.
- Only five persons were born between B and C, who visited Leh.

From the above, case-2 gets eliminated because B was born two persons after the one who visited Jodhpur, which is not satisfied.

@QuizByMickey

		Case-1		Case-2		Case-3
