

1. Questions

In the given questions, a group of letters is given followed by some combinations of numbers and symbols. You have to find out the correct combinations for the group of letters based on the conditions given below:

Note I: The letters are numbered as the single digit prime number from 2 to 7 except the vowels and the letters which come immediately after the vowel as per the alphabetical series. After numbering from 2 to 7, again the next four letters are numbered from 2 to 7 and so on.

Note II: Vowels are coded as !, \$, &, ^ and * from U to A respectively. The remaining letters are coded by their place value in the alphabetical series. If the place value is a two-digit number, then add the digits within the number to make it a single digit E.g., If the place value is 13 then, $13=1+3=4$ is coded).

Conditions:

- 1). If both the first and the last letters of the word are vowels, then the letters which are immediately after the vowel (within the word) are coded as the code of letter X and the other letters (Except vowels) are coded with their previous letter in the English alphabetical series. Vowels are coded as per the code.
- 2). If both the first and the last letters of the word are consonants, then except the first and last consonants remaining consonants are coded with the code of the next letter as per the English alphabetical series.(E.g:F-> coded with the code of G) and the vowels and the first and the last consonants are coded as per the given code.
- 3). If there are more than three vowels present in the word, then the vowels are coded as per the given code(vowels are considered present in the word only). And add 2 to the codes of the remaining letters.

Note: If none of the conditions is followed, then the letters are coded as per the given codes.

Find the code for the words “ENABLE” and “EDUCATION”.

- a. ^3*32^, ^5!4*9&\$9
- b. !5*55!, &8^6!5\$*5
- c. ^7*23^, !9\$8^4&*4
- d. %3*33%, &7!6\$5&^5
- e. ^3&35^, !7^6\$5@*5

@QuizByMickey

2. Questions

Find the code for “HAMBLED”.

- a. 7!756*3
- b. 7*523^3
- c. 7*725^3
- d. 3!523%7
- e. 3*725^7

3. Questions

Which of the following words are coded as “75&77^3”, “5&88^5^94^” respectively?

- a. Trumpet, Diffusible
- b. Trigger, Difference
- c. Temper, Difficulty
- d. Tripper, Defensible
- e. Harbour, Diseased

4. Questions

Which of the following words is coded as “\$49*&9^5”?

- a. Objected
- b. Obelised
- c. Obliqued
- d. Obtained
- e. Overused

5. Questions

Which of the following codes will fill in the blank “_77^3_\$3” as the codes of a word “INTERPOL”?

- a. !, 2
- b. &, 5
- c. *, 3
- d. &, 3
- e. &, 7

6. Questions

Study the following information carefully and answer the given questions.

Eight persons - P, Q, R, S, T, U, V and W are studying in three different universities-IIT, VIT and JNU. At Least two but not more than three persons are studying in the same universities. They all like different colours such as Green, Blue, Red, Pink, Violet, Black, White and Yellow.

S likes Green and studies in IIT. T likes either Red or Yellow and doesn't study in the same university as S. Q studies only with the one who likes Pink. Both W and V study in the same university but neither with Q nor T. The one who studies in IIT likes Violet. The one who likes White studies with T. Neither R nor W likes Yellow and White. The number of persons studying in VIT is **one less than** the number of persons studying in IIT. Equal number of persons study in IIT and JNU. U does not study in JNU but studies with

the one who likes Black. The one who likes Yellow doesn't study with R.

Which of the following colour are not liked by the persons studying in VIT and JNU?

- a. The colour which is liked by the one who studies along with the one who likes Pink
- b. Blue
- c. The colour which is liked by the one who studies along with the one who likes Green
- d. White
- e. The colour which is liked by the one who studies along with the one who likes Blue and T

7. Questions

Which among the following pair of persons are studying in VIT?

- a. The one who likes Violet, T
- b. S, the one who likes Blue
- c. The one who likes Pink, P
- d. The one who likes Black, U
- e. V, the one who likes Red

8. Questions

Who among the following persons likes White colour?

- a. The one who studies with T and R
- b. The one who studies only with U
- c. The one who studies in JNU along with V and R
- d. The one who studies in VIT with Q
- e. The one who studies with the one who likes Violet and Red

9. Questions

The number of persons studying in the university with _____ is _____ than the number of persons studying in the university with ____.

- a. The one who likes Green, One less, the one who likes Black
- b. The one who likes White, one more, the one who likes Pink
- c. The one who likes violet, one more, the one who likes Blue
- d. The one who likes Yellow, one less, the one who likes Red
- e. The one who likes Black, one more, the one who likes White

10. Questions

Which of the following statements is/are not false as per the given arrangement?

- I). R likes Blue and studies in JNU
- II). S and the one who likes Yellow studies in IIT
- III). The one who likes Black colour and the one who likes red colour are studying in the same university.
- a. Only I and III
 - b. Only I
 - c. Only II and III
 - d. Only III
 - e. Only I and II

11. Questions

Study the following information carefully and answer the given questions.

Eight persons of a family A, B, C, D, E, F, G and H are sitting in a linear row facing north. There are three married couples in a family.

E sits at one of the extreme ends. Only two persons sit between F and E. A, who is the mother of D, sits third to the left of her sister. A's sister doesn't sit adjacent to F. G is the aunt of D but not the sister-in-law of A. C is the grandfather of D but not the father of A. F sits exactly between A's father and G. E is younger than F, who is the spouse of B. B is not the female member of the family but has two children. F is not the mother-in-law of A. D is the grandchild of H and sits to the immediate right of A's mother. The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H.

How many persons sit between D and F's son-in-law?

- a. Three
- b. Four
- c. One
- d. Two
- e. No one

@QuizByMickey

12. Questions

Who among the following persons is the Father-in-law of E's spouse?

- a. G's Father
- b. D's Maternal grandfather
- c. G's Brother-in-law
- d. D's Paternal grandfather

e. None of these

13. Questions

If D is the grandson of B, then how is D related to E's sister-in-law?

- a. Son-in-law
- b. Nephew
- c. Son
- d. Father-in-law
- e. Uncle

14. Questions

What is the position of the Mother-in-law of E from the left end?

- a. Second
- b. Third
- c. Fourth
- d. Fifth
- e. Extreme left end

15. Questions

Which of the following statements is/are true as per the final arrangement?

I). D is the only child of E

II). H is the spouse of A's Father-in-law

III). Both C and E sit at the extreme ends

- a. Only II
- b. Only II and III
- c. Only III
- d. Only I and III
- e. All I, II and III

@QuizByMickey

16. Questions

Study the following statements and then decide which of the given conclusions logically follows from the given statements disregarding the commonly known facts.

Statements:

Some Black is not Green

All Green are Pink

No Pink is Orange

Only a few Orange is Violet

Conclusions

I). Some Pink being not Black is a possibility

II). At least some green being Orange is not a possibility

III). All Violet cannot be Green

- a. Only conclusion I follows
- b. Either conclusion I or II or III follows
- c. Only conclusion III follows
- d. All conclusions I, II and III follows
- e. Only conclusion II follows

17. Questions

Statements

Some books are novels

Only novels are poems

Only a few novels are stories

No books are movie

Conclusions:

I). No movies are stories

II). Some movies are stories

III). All novels can never be books

- a. Only conclusion III follows
- b. Either conclusions I or II and III follows
- c. Only conclusion I follow
- d. All conclusions I, II and III follow
- e. Only conclusion II follows

@QuizByMickey

18. Questions

Statements:

All flowers are fruits

No fruit is juice

Some juices are proteins

All proteins are vitamins

Conclusions:

I). Some vitamins being fruits is not a possibility

II). No proteins being flowers is a possibility

III). At least some flowers can never be Juice

- a. None of these conclusions follows
- b. Only conclusion II and III follows
- c. All I, II and III follows
- d. Only conclusions I and II follows
- e. Only conclusion II follows

19. Questions

Statements:

Only a few dogs are pets

A few pets are cats

Only a few rats are cats.

No cats are goat.

Conclusions:

I). Some pets being not goats is not a possibility

II). Some goats being pets is not a possibility

III). All dogs are definitely not cats

- a. Only conclusions I and II follows
- b. Only conclusions I and III follows
- c. Only conclusion I follows
- d. Only conclusion III follows
- e. All conclusions I, II and III follows

@QuizByMickey

20. Questions

Statements:

Only a few cards are files

Few files is inkpots

No pads are files

Few pens are pads

Conclusions:

I). Some pens can never be inkpots

II). At least some inkpots being not pads is a possibility

III). No cards being pads is a possibility

- Only conclusion II follows
- Only conclusions I and II follow
- Only conclusion I follows
- All conclusions I, II and III follows
- Only conclusion III follows

Explanations:

1. Questions

We have,

Note I: The letters are numbered as the single digit prime number 2 to 7 except the vowels and the letters which come after the vowel in the alphabetical series. After numbering from 2 to 7, again next four letters are numbered as 2 to 7 and so on

A	B	C	D	E	F	G	H	I	J	K	L	M
		2	3			5	7			2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7			2	3	5	7			2	3	5	7

@QuizByMickey

Note II: Vowels are coded as !, \$, &, ^ and * from U to A respectively. Remaining letters are coded as per the place value in the alphabetical series. If the place value is two digit number, then the add the digits within the number to make it a single digit E.g., If the place value is 13 then, $13=1+3=4$ is coded)

The place value of B=2

The place value of F=6

The place value of J=10=1+0=1

The place value of P=16=1+6=7

The place value of V=22=2+2=4

A	B	C	D	E	F	G	H	I	J	K	L	M
*	2	2	3	^	6	5	7	&	1	2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7	\$	7	2	3	5	7	!	4	2	3	5	7

Answer: A

The code for “ENABLE”

The first and last letter of the word is a vowel.

Applying condition 1

1). If both first and last letters of the word are vowels, then the letters which are immediately after the vowel (within the word) are coded as the code of letter X and the other letters (Except vowels) are coded with their previous letter as per the English alphabetical series. Vowels are coded as per the code.

ENABLE = ^3*32^

The code for “EDUCATION”

There are more than three vowels in the word

Applying condition 3

If there are more than three vowels present in the word, then the vowels are coded as per the code(vowels are considered present in the word only). And add 2 to the codes of the remaining letters.

EDUCATION = ^5!4*9&\$9

2. Questions

We have,

Note I: The letters are numbered as the single digit prime number 2 to 7 except the vowels and the letters which come after the vowel in the alphabetical series. After numbering from 2 to 7, again next four letters are numbered as 2 to 7 and so on

@QuizByMickey

A	B	C	D	E	F	G	H	I	J	K	L	M
		2	3			5	7			2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7			2	3	5	7			2	3	5	7

Note II: Vowels are coded as !, \$, &, ^ and * from U to A respectively. Remaining letters are coded as per

the place value in the alphabetical series. If the place value is two digit number, then the add the digits within the number to make it a single digit E.g., If the place value is 13 then, $1+3=4$ is coded)

The place value of B=2

The place value of F=6

The place value of J=10=1+0=1

The place value of P=16=1+6=7

The place value of V=22=2+2=4

A	B	C	D	E	F	G	H	I	J	K	L	M
*	2	2	3	^	6	5	7	&	1	2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7	\$	7	2	3	5	7	!	4	2	3	5	7

Answer: C

The code for “HAMBLED”

The first and last letter of the word is consonants.

Applying condition 2

2). If both first and last letters of the word are consonants, then except the first and last consonants remaining consonants are coded with the code of the next letter in the English alphabetical series.(E.g:F-> coded with the code of G) and the vowels and the first and last consonants are coded as per code.

HAMBLED = 7*725^3

3. Questions

We have,

Note I: The letters are numbered as the single digit prime number 2 to 7 except the vowels and the letters which come after the vowel in the alphabetical series. After numbering from 2 to 7, again next four letters are numbered as 2 to 7 and so on

A	B	C	D	E	F	G	H	I	J	K	L	M
		2	3			5	7			2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7			2	3	5	7			2	3	5	7

@QuizByMickey

Note II: Vowels are coded as !, \$, &, ^ and * from U to A respectively. Remaining letters are coded as per

the place value in the alphabetical series. If the place value is two digit number, then the add the digits within the number to make it a single digit E.g., If the place value is 13 then, $13=1+3=4$ is coded)

The place value of B=2

The place value of F=6

The place value of J=10=1+0=1

The place value of P=16=1+6=7

The place value of V=22=2+2=4

A	B	C	D	E	F	G	H	I	J	K	L	M
*	2	2	3	^	6	5	7	&	1	2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7	\$	7	2	3	5	7	!	4	2	3	5	7

Answer: B

The word for code “75&7^3”,

The first and last letter of the word is consonants.

Applying condition 2

2). If both first and last letters of the word are consonants, then except the first and last consonants remaining consonants are coded with the code of the next letter in the English alphabetical series.(E.g:F-> coded with the code of G) and the vowels and the first and last consonants are coded as per code.

75&77^3 = Trigger

Applying condition 3

If there are more than three vowels present in the word, then the vowels are coded as per the code(vowels are considered present in word only). And add 2 to the codes of the remaining letters.

5&88^5^94^= Difference.

4. Questions

We have,

Note I: The letters are numbered as the single digit prime number 2 to 7 except the vowels and the letters which come after the vowel in the alphabetical series. After numbering from 2 to 7, again next four letters are numbered as 2 to 7 and so on

@QuizByMickey

A	B	C	D	E	F	G	H	I	J	K	L	M
		2	3			5	7			2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7			2	3	5	7			2	3	5	7

Note II: Vowels are coded as !, \$, &, ^ and * from U to A respectively. Remaining letters are coded as per the place value in the alphabetical series. If the place value is two digit number, then the add the digits within the number to make it a single digit E.g., If the place value is 13 then, $13=1+3=4$ is coded)

The place value of B=2

The place value of F=6

The place value of J=10=1+0=1

The place value of P=16=1+6=7

The place value of V=22=2+2=4

A	B	C	D	E	F	G	H	I	J	K	L	M
*	2	2	3	^	6	5	7	&	1	2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7	\$	7	2	3	5	7	!	4	2	3	5	7

Answer: D

The word for code “\$49*&9”

By the given code we can find that there are more than three vowels in the word.

Applying condition 3

3). If there are more than three vowels present in the word, then the vowels are coded as per the code(vowels are considered present in word only). And add 2 to the codes of the remaining letters.

\$49*&9^5 = obtained

5. Questions

We have,

Note I: The letters are numbered as the single digit prime number 2 to 7 except the vowels and the letters which come after the vowel in the alphabetical series. After numbering from 2 to 7, again next four letters are numbered as 2 to 7 and so on

A	B	C	D	E	F	G	H	I	J	K	L	M
		2	3			5	7			2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7			2	3	5	7			2	3	5	7

Note II: Vowels are coded as !, \$, &, ^ and * from U to A respectively. Remaining letters are coded as per the place value in the alphabetical series. If the place value is two digit number, then the add the digits within the number to make it a single digit E.g., If the place value is 13 then, $13=1+3=4$ is coded)

The place value of B=2

The place value of F=6

The place value of J=10=1+0=1

The place value of P=16=1+6=7

The place value of V=22=2+2=4

A	B	C	D	E	F	G	H	I	J	K	L	M
*	2	2	3	^	6	5	7	&	1	2	3	5
N	O	P	Q	R	S	T	U	V	W	X	Y	Z
7	\$	7	2	3	5	7	!	4	2	3	5	7

Answer: E

77^3\$3 = INTERPOL

No condition is followed for the given word, so the letters are coded as per the given code.

&, 7 is the missing code for the word INTERPOL

6. Questions

Final arrangement:

@QuizByMickey

University	Persons/colours
VIT(2)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)
JNU(3)	T(Red),P(White),R(Blue)

We have,

- S likes Green and studies in IIT.
- T likes either Red or Yellow and doesn't study in the same university as S.
- Q studies only with the one who likes Pink.

From the above conditions, there are four possibilities

University	Case 1	Case 1a	Case 2	Case 2a
	Persons/ colours	Persons/ colours	Persons/ colours	Persons/ colours
VIT	T(Red)	T(Yellow)	Q, (Pink)	Q, (Pink)
IIT	S(Green)	S(Green)	S(Green)	S(Green)
JNU	Q,(Pink)	Q,(Pink)	T(Red)	T(Yellow)

Again we have,

- Both W and V study in the same university but neither with Q nor T.
- The one who studies in IIT likes Violet.
- The one who likes White studies with T.
- Neither R nor W likes Yellow and White.
- The number of persons studying in VIT is one less than the number of persons studying in IIT.
- Equal number of persons study in IIT and JNU.

From the above conditions case-1 and case-1a get eliminated because The number of persons studying in VIT is one less than the number of persons studying in IIT and JNU, which is not satisfied.

University	Case 1 Persons/ colours	Case 1a Persons/ colours	Case 2 Persons/ colours	Case 2a Persons/ colours
VIT (2)	T(Red),P(White)	T(Yellow),P(White)	Q,(Pink)	Q,(Pink)
IIT (3)	S(Green),W(Violet),V	S(Green),W(Violet),V	S(Green),W/V(Violet)	S(Green),V/W(Violet)
JNU (3)	Q,(Pink)	Q,(Pink)	T(Red),(White), _	T(Yellow),(White), _

Again we have,

- U does not study in JNU but studies with the one who likes Black.
- The one who likes Yellow doesn't study with R.

From the above conditions case-2a gets eliminated because the one who likes Yellow doesn't study with R, which is not satisfied.

Hence, case-2 shows the final arrangement.

University	Case 2	Case 2a
	Persons/colours	Persons/colours
VIT(2)	Q(Black),U(Pink)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)	S(Green),W(Violet),V
JNU(3)	T(Red),P(White),R(Blue)	T(Yellow),P(White),R(Blue)

Answer: C

7. Questions

Final arrangement:

University	Persons/colours
VIT(2)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)
JNU(3)	T(Red),P(White),R(Blue)

We have,

- S likes Green and studies in IIT.
- T likes either Red or Yellow and doesn't study in the same university as S.
- Q studies only with the one who likes Pink.

From the above conditions, there are four possibilities

University	Case 1	Case 1a	Case 2	Case 2a
	Persons/colours	Persons/colours	Persons/colours	Persons/colours
VIT	T(Red)	T(Yellow)	Q, (Pink)	Q, (Pink)
IIT	S(Green)	S(Green)	S(Green)	S(Green)
JNU	Q,(Pink)	Q,(Pink)	T(Red)	T(Yellow)

Again we have,

- Both W and V study in the same university but neither with Q nor T.
- The one who studies in IIT likes Violet.
- The one who likes White studies with T.

- Neither R nor W likes Yellow and White.
- The number of persons studying in VIT is one less than the number of persons studying in IIT.
- Equal number of persons study in IIT and JNU.

From the above conditions case-1 and case-1a get eliminated because The number of persons studying in VIT is one less than the number of persons studying in IIT and JNU, which is not satisfied.

University	Case 1	Case 1a	Case 2	Case 2a
	Persons/ colours	Persons/ colours	Persons/ colours	Persons/ colours
VIT (2)	T(Red),P(White)	T(Yellow),P(White)	Q,(Pink)	Q,(Pink)
IIT (3)	S(Green),W(Violet),V	S(Green),W(Violet),V	S(Green),W/V(Violet)	S(Green),V/W(Violet)
JNU (3)	Q,(Pink)	Q,(Pink)	T(Red),(White), __	T(Yellow),(White), __

Again we have,

- U does not study in JNU but studies with the one who likes Black.
- The one who likes Yellow doesn't study with R.

From the above conditions case-2a gets eliminated because the one who likes Yellow doesn't study with R, which is not satisfied.

Hence, case-2 shows the final arrangement.

University	Case 2	Case 2a
	Persons/colours	Persons/colours
VIT(2)	Q(Black),U(Pink)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)	S(Green),W(Violet),V
JNU(3)	T(Red),P(White),R(Blue)	T(Yellow),P(White),R(Blue)

Answer: D

8. Questions

Final arrangement:

@QuizByMickey

University	Persons/colours
VIT(2)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)
JNU(3)	T(Red),P(White),R(Blue)

We have,

- S likes Green and studies in IIT.
- T likes either Red or Yellow and doesn't study in the same university as S.
- Q studies only with the one who likes Pink.

From the above conditions, there are four possibilities

University	Case 1	Case 1a	Case 2	Case 2a
	Persons/ colours	Persons/ colours	Persons/ colours	Persons/ colours
VIT	T(Red)	T(Yellow)	Q, (Pink)	Q, (Pink)
IIT	S(Green)	S(Green)	S(Green)	S(Green)
JNU	Q,(Pink)	Q,(Pink)	T(Red)	T(Yellow)

Again we have,

- Both W and V study in the same university but neither with Q nor T.
- The one who studies in IIT likes Violet.
- The one who likes White studies with T.
- Neither R nor W likes Yellow and White.
- The number of persons studying in VIT is one less than the number of persons studying in IIT.
- Equal number of persons study in IIT and JNU.

From the above conditions case-1 and case-1a get eliminated because The number of persons studying in VIT is one less than the number of persons studying in IIT and JNU, which is not satisfied.

University	Case 1 Persons/ colours	Case 1a Persons/ colours	Case 2 Persons/ colours	Case 2a Persons/ colours
VIT (2)	T(Red),P(White)	T(Yellow),P(White)	Q,(Pink)	Q,(Pink)
IIT (3)	S(Green),W(Violet),V	S(Green),W(Violet),V	S(Green),W/V(Violet)	S(Green),V/W(Violet)
JNU (3)	Q,(Pink)	Q,(Pink)	T(Red),(White), __	T(Yellow),(White), __

Again we have,

- U does not study in JNU but studies with the one who likes Black.
- The one who likes Yellow doesn't study with R.

From the above conditions case-2a gets eliminated because the one who likes Yellow doesn't study with R, which is not satisfied.

Hence, case-2 shows the final arrangement.

@QuizByMickey

University	Case 2	Case 2a
	Persons/colours	Persons/colours
VIT(2)	Q(Black),U(Pink)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)	S(Green),W(Violet),V
JNU(3)	T(Red),P(White),R(Blue)	T(Yellow),P(White),R(Blue)

Answer: A

9. Questions

Final arrangement:

University	Persons/colours
VIT(2)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)
JNU(3)	T(Red),P(White),R(Blue)

We have,

- S likes Green and studies in IIT.
- T likes either Red or Yellow and doesn't study in the same university as S.
- Q studies only with the one who likes Pink.

From the above conditions, there are four possibilities

University	Case 1	Case 1a	Case 2	Case 2a
	Persons/colours	Persons/colours	Persons/colours	Persons/colours
VIT	T(Red)	T(Yellow)	Q, (Pink)	Q, (Pink)
IIT	S(Green)	S(Green)	S(Green)	S(Green)
JNU	Q,(Pink)	Q,(Pink)	T(Red)	T(Yellow)

Again we have,

- Both W and V study in the same university but neither with Q nor T.
- The one who studies in IIT likes Violet.
- The one who likes White studies with T.

- Neither R nor W likes Yellow and White.
- The number of persons studying in VIT is one less than the number of persons studying in IIT.
- Equal number of persons study in IIT and JNU.

From the above conditions case-1 and case-1a get eliminated because The number of persons studying in VIT is one less than the number of persons studying in IIT and JNU, which is not satisfied.

University	Case 1	Case 1a	Case 2	Case 2a
	Persons/ colours	Persons/ colours	Persons/ colours	Persons/ colours
VIT (2)	T(Red),P(White)	T(Yellow),P(White)	Q,(Pink)	Q,(Pink)
IIT (3)	S(Green),W(Violet),V	S(Green),W(Violet),V	S(Green),W/V(Violet)	S(Green),V/W(Violet)
JNU (3)	Q,(Pink)	Q,(Pink)	T(Red),(White), __	T(Yellow),(White), __

Again we have,

- U does not study in JNU but studies with the one who likes Black.
- The one who likes Yellow doesn't study with R.

From the above conditions case-2a gets eliminated because the one who likes Yellow doesn't study with R, which is not satisfied.

Hence, case-2 shows the final arrangement.

University	Case 2	Case 2a
	Persons/colours	Persons/colours
VIT(2)	Q(Black),U(Pink)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)	S(Green),W(Violet),V
JNU(3)	T(Red),P(White),R(Blue)	T(Yellow),P(White),R(Blue)

Answer: B

10. Questions

Final arrangement:

@QuizByMickey

University	Persons/colours
VIT(2)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)
JNU(3)	T(Red),P(White),R(Blue)

We have,

- S likes Green and studies in IIT.
- T likes either Red or Yellow and doesn't study in the same university as S.
- Q studies only with the one who likes Pink.

From the above conditions, there are four possibilities

University	Case 1	Case 1a	Case 2	Case 2a
	Persons/ colours	Persons/ colours	Persons/ colours	Persons/ colours
VIT	T(Red)	T(Yellow)	Q, (Pink)	Q, (Pink)
IIT	S(Green)	S(Green)	S(Green)	S(Green)
JNU	Q,(Pink)	Q,(Pink)	T(Red)	T(Yellow)

Again we have,

- Both W and V study in the same university but neither with Q nor T.
- The one who studies in IIT likes Violet.
- The one who likes White studies with T.
- Neither R nor W likes Yellow and White.
- The number of persons studying in VIT is one less than the number of persons studying in IIT.
- Equal number of persons study in IIT and JNU.

From the above conditions case-1 and case-1a get eliminated because The number of persons studying in VIT is one less than the number of persons studying in IIT and JNU, which is not satisfied.

University	Case 1 Persons/ colours	Case 1a Persons/ colours	Case 2 Persons/ colours	Case 2a Persons/ colours
VIT (2)	T(Red),P(White)	T(Yellow),P(White)	Q,(Pink)	Q,(Pink)
IIT (3)	S(Green),W(Violet),V	S(Green),W(Violet),V	S(Green),W/V(Violet)	S(Green),V/W(Violet)
JNU (3)	Q,(Pink)	Q,(Pink)	T(Red),(White), __	T(Yellow),(White), __

Again we have,

- U does not study in JNU but studies with the one who likes Black.
- The one who likes Yellow doesn't study with R.

From the above conditions case-2a gets eliminated because the one who likes Yellow doesn't study with R, which is not satisfied.

Hence, case-2 shows the final arrangement.

@QuizByMickey

University	Case 2	Case 2a
	Persons/colours	Persons/colours
VIT(2)	Q(Black),U(Pink)	Q(Black),U(Pink)
IIT(3)	S(Green),W(Violet),V(Yellow)	S(Green),W(Violet),V
JNU(3)	T(Red),P(White),R(Blue)	T(Yellow),P(White),R(Blue)

Answer: E

11. Questions

Final arrangement:

We have,

- E sits at one of the extreme ends.
- Only two persons sit between F and E.
- A, who is the mother of D, sits third to the left of her sister.
- A's sister doesn't sit adjacent to F.
- G is the aunt of D but not the sister-in-law of A.

From the above conditions, there are three possibilities

@QuizByMickey

Again we have,

- C is the grandfather of D but not the father of A.
- F sits exactly between A's father and G.
- E is younger than F, who is the spouse of B.
- B is not the female member of the family but has two children.
- F is not the mother-in-law of A.

From the above condition, case 1a gets eliminated because F sits exactly between A's father and G, which is not satisfied.

@QuizByMickey

Again we have,

- D is the grandchild of H and sits to the immediate right of A's mother.
- The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H.

From the above conditions, case-2 gets eliminated because The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: A

12. Questions

Final arrangement:

@QuizByMickey

We have,

- E sits at one of the extreme ends.
- Only two persons sit between F and E.
- A, who is the mother of D, sits third to the left of her sister.
- A's sister doesn't sit adjacent to F.
- G is the aunt of D but not the sister-in-law of A.

From the above conditions, there are three possibilities

@QuizByMickey

Again we have,

- C is the grandfather of D but not the father of A.
- F sits exactly between A's father and G.
- E is younger than F, who is the spouse of B.
- B is not the female member of the family but has two children.
- F is not the mother-in-law of A.

From the above condition, case 1a gets eliminated because F sits exactly between A's father and G, which is not satisfied.

Again we have,

- D is the grandchild of H and sits to the immediate right of A's mother.
- The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H.

From the above conditions, case-2 gets eliminated because The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: D

13. Questions

Final arrangement:

We have,

- E sits at one of the extreme ends.
- Only two persons sit between F and E.
- A, who is the mother of D, sits third to the left of her sister.
- A's sister doesn't sit adjacent to F.
- G is the aunt of D but not the sister-in-law of A.

From the above conditions, there are three possibilities

Again we have,

- C is the grandfather of D but not the father of A.

- F sits exactly between A's father and G.
- E is younger than F, who is the spouse of B.
- B is not the female member of the family but has two children.
- F is not the mother-in-law of A.

From the above condition, case 1a gets eliminated because F sits exactly between A's father and G, which is not satisfied.

Again we have,

- D is the grandchild of H and sits to the immediate right of A's mother.
- The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H.

From the above conditions, case-2 gets eliminated because The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H, which is not satisfied. Hence, case-1 shows the final arrangement.

@QuizByMickey

Answer: B

14. Questions

Final arrangement:

We have,

- E sits at one of the extreme ends.
- Only two persons sit between F and E.
- A, who is the mother of D, sits third to the left of her sister.
- A's sister doesn't sit adjacent to F.
- G is the aunt of D but not the sister-in-law of A.

From the above conditions, there are three possibilities

@QuizByMickey

Again we have,

- C is the grandfather of D but not the father of A.
- F sits exactly between A's father and G.
- E is younger than F, who is the spouse of B.
- B is not the female member of the family but has two children.
- F is not the mother-in-law of A.

From the above condition, case 1a gets eliminated because F sits exactly between A's father and G, which is not satisfied.

@QuizByMickey

Again we have,

- D is the grandchild of H and sits to the immediate right of A's mother.
- The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H.

From the above conditions, case-2 gets eliminated because The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: C

15. Questions

Final arrangement:

We have,

- E sits at one of the extreme ends.
- Only two persons sit between F and E.
- A, who is the mother of D, sits third to the left of her sister.
- A's sister doesn't sit adjacent to F.
- G is the aunt of D but not the sister-in-law of A.

@QuizByMickey

From the above conditions, there are three possibilities

Again we have,

- C is the grandfather of D but not the father of A.
- F sits exactly between A's father and G.
- E is younger than F, who is the spouse of B.
- B is not the female member of the family but has two children.
- F is not the mother-in-law of A.

From the above condition, case 1a gets eliminated because F sits exactly between A's father and G, which is not satisfied.

@QuizByMickey

Again we have,

- D is the grandchild of H and sits to the immediate right of A's mother.
- The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H.

From the above conditions, case-2 gets eliminated because The number of persons sitting between D and A's father-in-law is **two less than** the number of persons sitting between A's father and H, which is not satisfied. Hence, case-1 shows the final arrangement.

Answer: E

16. Questions

Answer: D

@QuizByMickey

D). Some Pink being not Black is a possibility - Here, there is no direct relation between Pink and Black. So, some pink are not Black is a possible conclusion. Hence, the conclusion follows.

II). At least some green being Orange is not a possibility - Here, all green are pink whereas no pink is orange in the given statement. So, at least some green being orange is not a possible conclusion. Hence, the conclusion follows.

III. All Violet cannot be Green- Here, all green is pink and no pink is orange so, the part of violet which is orange can't be green. So, all violet cannot be green follows.

17. Questions

Answer: B

I). No movies are stories- Here, there is no direct relation between movies and Stories. So, No movies are stories is the definite conclusion. Hence, the conclusion doesn't follow.

II). Some movies are stories- Here, there is no direct relation between movies and Stories. So, some poems are stories with a definite conclusion. Hence, the conclusion doesn't follow.

III). All novels can never be books- Here, some books are novels is the given statement. So, all novels can never be books is the possible conclusion. Hence, the conclusion follows.

18. Questions

Answer: B

I). Some vitamins being fruits is not a possibility - Here, fruits are only associated with flowers. So, some vitamins are fruits is not a direct conclusion but a possible relation between them exists. Hence, the conclusion doesn't follow.

II). No proteins being flowers is a possibility -. Here, there is no direct relation between flowers and proteins . So, a possible relation between them exists. Hence, the conclusion follows.

III). Atleast some flowers can never be Juice - Here,flowers are only associated with fruits where no fruit is juice. So, at least some flowers can never be juice is the definite conclusion. Hence, the conclusion follows.

19. Questions

Answer: C

I). Some pets being not goats is not a possibility- Here, there is no direct relation between Pet and Goat. So, some pets are not goats is the definite conclusion. We can't say a definite conclusion as a possible conclusion. Hence, the conclusion follows.

II). Some goats being pets is not a possibility- Here, goats are only associated with cats. So, some goats may be pets is the possible conclusion. Hence, the conclusion doesn't follow.

III). All dogs are definitely not cats- Here, there is no direct relation between dogs and cats. So, all the definite conclusions between them are not true. Hence, the conclusion doesn't follow.

20. Questions

Answer: E

I). Some pens can never be inkpots- Here, there is no direct relation between Pen and Inkpots. So, all the definite conclusions between them are not true. Hence, the conclusion doesn't follow.

II). At least some inkpots are not pads is a possibility- Here, few files are ink pots whereas no pads are files is the given statement. So, at least some inkpots are not pads is the definite conclusion which is not a possible conclusion. Hence, the conclusion doesn't follow.

III). No cards are pads is a possibility- Here, there is no direct relation between cards and pads. So, all the definite conclusions between them are not true but a possible conclusion. Hence, the conclusion follows.
