

1. Questions

Study the following information carefully and answer the questions given below:

Eight persons – P, Q, R, S, T, U, V, W are sitting in a linear row and facing the north. They all like different fruits: Apple, Banana, Guava, Fig, Kiwi, Mango, Litchi and Sapota. The consecutive alphabets are not adjacent to each other.

T sits third to the left of the one who likes Kiwi. Only three persons sit between the one who likes Mango and T. U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango. As many persons sit to the left of S as sit to the right to the one who likes guava. Only two persons sit between the one who likes V and Banana, who sits to the immediate right of Q. S doesn't sit to the right of T. The number of persons sitting between the one who likes Fig and V is **one more than** the number of persons sitting between P and the one who likes Litchi. R sits to the right of the one who likes Sapota, but not like Banana. W doesn't adjacent to the one who likes Apple.

Who among the following person is third to the right of the one who sits to the immediate left of the one who likes Guava?

- a. The one who likes Apple
- b. The one sits at left ends of the row
- c. The one who sits immediate left U
- d. The one likes Mango
- e. The one sits immediate right of U

2. Questions

Study the following information carefully and answer the questions given below:

Eight persons – P, Q, R, S, T, U, V, W are sitting in a linear row and facing the north. They all like different fruits: Apple, Banana, Guava, Fig, Kiwi, Mango, Litchi and Sapota. The consecutive alphabets are not adjacent to each other.

T sits third to the left of the one who likes Kiwi. Only three persons sit between the one who likes Mango and T. U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango. As many persons sit to the left of S as sit to the right to the one who likes guava. Only two persons sit between the one who likes V and Banana, who sits to the immediate right of Q. S doesn't sit to the right of T. The number of persons sitting between the one who likes Fig and V is **one more than** the number of persons sitting between P and the one who likes Litchi. R sits to the right of the one who likes Sapota, but not like Banana. W doesn't adjacent to the one who likes Apple.

How many persons are sitting between the one who sits immediate right of the one who likes Litchi and the one who sits second from the right end?

- a. As many persons sitting between the one who likes banana and R
- b. As many persons sitting between S and the one who likes Guava
- c. As many persons sitting between the one who likes Kiwi and V

- d. As many persons sitting between W and the one who likes litchi
- e. As many persons sitting between the one who likes Apple and Q

3. Questions

Study the following information carefully and answer the questions given below:

Eight persons – P, Q, R, S, T, U, V, W are sitting in a linear row and facing the north. They all like different fruits: Apple, Banana, Guava, Fig, Kiwi, Mango, Litchi and Sapota. The consecutive alphabets are not adjacent to each other.

T sits third to the left of the one who likes Kiwi. Only three persons sit between the one who likes Mango and T. U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango. As many persons sit to the left of S as sit to the right to the one who likes guava. Only two persons sit between the one who likes V and Banana, who sits to the immediate right of Q. S doesn't sit to the right of T. The number of persons sitting between the one who likes Fig and V is **one more than** the number of persons sitting between P and the one who likes Litchi. R sits to the right of the one who likes Sapota, but not like Banana. W doesn't adjacent to the one who likes Apple.

The number of persons sitting between W and the one who likes Apple is two more than the number of persons sitting between __ and __?

- a. S and the one who likes Banana
- b. The one who likes Sapota and R
- c. T and the one who likes Litchi
- d. The one who likes Fig and W
- e. Q and the one who likes Apple

4. Questions

Study the following information carefully and answer the questions given below:

Eight persons – P, Q, R, S, T, U, V, W are sitting in a linear row and facing the north. They all like different fruits: Apple, Banana, Guava, Fig, Kiwi, Mango, Litchi and Sapota. The consecutive alphabets are not adjacent to each other.

T sits third to the left of the one who likes Kiwi. Only three persons sit between the one who likes Mango and T. U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango. As many persons sit to the left of S as sit to the right to the one who likes guava. Only two persons sit between the one who likes V and Banana, who sits to the immediate right of Q. S doesn't sit to the right of T. The number of persons sitting between the one who likes Fig and V is **one more than** the number of persons sitting between P and the one who likes Litchi. R sits to the right of the one who likes Sapota, but not like Banana. W doesn't adjacent to the one who likes Apple.

If V is related to the one who likes banana and the one who likes fig is related to T, who among the following person is related to the one who likes Kiwi?

- a. T

- b. S
- c. Q
- d. P
- e. R

5. Questions

Which of the following combination(s) is / are true with respect to the final arrangement?

- a. R likes Mango
- b. P likes Sapota
- c. V likes Fig
- d. Q likes Guava
- e. T likes Kiwi

6. Questions

Study the following information carefully and answer the given questions.

A+B means A is the father of B

A*B means A is the wife of B

A=B means A is the son of B

A&B means A is the mother of B

A#B means B is the daughter-in-law of A

A\$B means B is the brother-in-law of A,

In a family of 10 persons, relationship mentioned in the coded form below;

F+O\$P; Q=K*C#T; P#L*N; C=R*O

If L\$X and L have no siblings, then which of the following statement is true?

- a. P&X
- b. P#X
- c. P+X
- d. P=X
- e. P@X

@QuizByMickey

7. Questions

Which of the following pairs are married as per the given arrangement?

- a. RK

- b. QC
- c. NO
- d. CK
- e. TL

8. Questions

Study the following information carefully and answer the given questions.

A+B means A is the father of B

A*B means A is the wife of B

A=B means A is the son of B

A&B means A is the mother of B

A#B means B is the daughter-in-law of A

A\$B means B is the brother-in-law of A

If $M\$K=G*I=F\&N\#L*O$; $I\#A$; K has no siblings, then how is G's mother-in-law related to A's Husband?

- a. Father-in-law
- b. Uncle
- c. Brother-in-law
- d. Grand mother
- e. Father

9. Questions

In which of the following statement can we say “C is the aunt of G”?

- a. $C\&V\$S\&T*W=G$
- b. $C*V+S\&T*W+G$
- c. $C\&V=S*T*W+G$
- d. $C*V*S\&T*W\$G$
- e. $C*V=S\&T*W+G$

@QuizByMickey

10. Questions

If “ $Z+X_Y=V*W\#U\&T$ ”, then which of the following symbols denote X is uncle of W's grandchild?

- a. \$

- b. =
- c. #
- d. +
- e. *

11. Questions

Study the following information carefully and answer the given questions.

A#B (9m)-->A is 9m north of B

A\$B (7m) -> B is 7m south of A

A@B (8m) —>A is 8m east of B

A&B (6m) —>B is 6m west of A

A\$@B --->A is Southeast of B;

A#&B--> A is Northwest of B;

A\$&B ---> A is Southwest of B; and

A#@B ---> A is Northeast of B;

J&Q(10m); R#S(8m); M@L(9m); K\$J(5m); P\$&J; K&M; P&O(11m); L\$T(15m); R@K(14m); M\$O(13m); Q\$P;

What is the direction of R with respect to O as per the final arrangement?

- a. \$&
- b. #&
- c. \$@
- d. #@
- e. #

12. Questions

If X@P(15) , what is the shortest distance between S and X(approximately)?

- a. 11m
- b. 10m
- c. 14m
- d. 13m
- e. 15m

13. Questions

What is the direction and shortest distance (approximately) between T with respect to Q?

- a. T\$@Q(23m)
- b. T\$&Q (22m)
- c. T\$&Q(24m)
- d. T\$@Q(22m)
- e. T#&Q(23m)

14. Questions

Four of the following five are alike in a certain way based on the given arrangement and thus form a group. Which one of the following does not belong to the group?

- a. RP
- b. MT
- c. KO
- d. SP
- e. LS

15. Questions

Which of the following statement(s) is/ are false with respect to the final arrangement?

- a. M\$@J
- b. R#@P
- c. T\$&O
- d. S\$@K
- e. R@L

16. Questions

The rise of e-commerce has changed consumer shopping habits, with many people now preferring to buy products online rather than visiting physical stores. Online shopping offers convenience, competitive prices, and a wide variety of products. However, some customers still prefer traditional shopping for the experience of physically inspecting products before purchasing. Retailers are now adopting a hybrid approach by integrating both online and offline shopping experiences to cater to all customer preferences.

Which of the following may be a probable assumption of the above statement?

- a. People only shop online for low-cost products
- b. Physical stores will disappear completely in the near future
- c. Customers do not trust online shopping at all

- d. Both online and offline shopping have advantages and disadvantages
- e. None of the above

17. Questions

Read the given passage carefully and answer the questions based on the same respectively

With modern lifestyles becoming increasingly stressful, people often struggle to maintain a healthy diet. Newly launched NutriBoost Gummies offer a convenient way to meet daily nutritional requirements. Packed with essential vitamins like Vitamin C, D, and Zinc, these gummies help boost immunity, improve energy levels, and enhance skin health. Regular consumption supports brain function and strengthens the body's natural defense system. These gummies are non-GMO, gluten-free, and made with natural fruit flavors, making them a great option for people who dislike swallowing pills. They also help combat fatigue, reduce oxidative stress, and promote overall well-being. These doctor-recommended gummies provide a safe, effective, and tasty way to maintain optimal health.

Which of the following can be inferred from the passage?

- a. Many people face difficulty in maintaining a balanced diet
- b. Vitamin deficiencies can lead to fatigue and weakened immunity
- c. People prefer supplements that are easy to consume
- d. Gummies are more effective than traditional vitamin pills
- e. All options except (d)

18. Questions

Which of the following assumptions is correct as per the passage?

- a. People prefer dietary supplements that taste good
- b. Taking vitamins regularly improves overall well-being
- c. Immunity boosters are necessary for everyone
- d. The gummies will work equally well for all individuals
- e. All the given statements are correct

@QuizByMickey

19. Questions

Choose the correct conclusion from the options below.

- a. People with nutrient deficiencies should consider supplements
- b. Gummies are a convenient way to boost nutrition
- c. Maintaining a healthy diet is crucial for well-being
- d. A combination of vitamins and minerals supports immunity
- e. All of the above

20. Questions

Effect:

Hospital emergency rooms are reporting an increase in heatstroke cases. Rising global temperatures and heatwaves have made summers more dangerous. Many people fail to take adequate precautions against extreme heat. Authorities issue warnings, but compliance remains low. Health experts advise staying hydrated and avoiding direct sunlight.

Probable Cause:

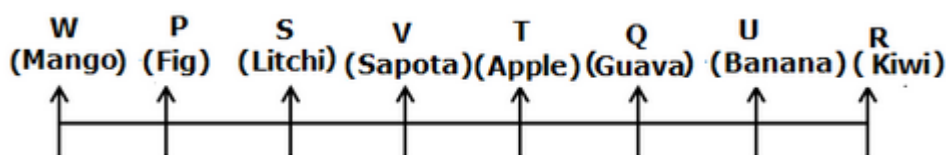

- A). Unusually high temperatures and prolonged heatwaves.
- B). Increased awareness about the dangers of heatstroke.
- C). People shifting to cooler regions to escape the heat.
- D). More availability of cooling devices and air conditioners.
- E). Strict regulations reducing environmental pollution.

- a. A
- b. B
- c. C
- d. D
- e. E

Explanations:

1. Questions

Final arrangement:

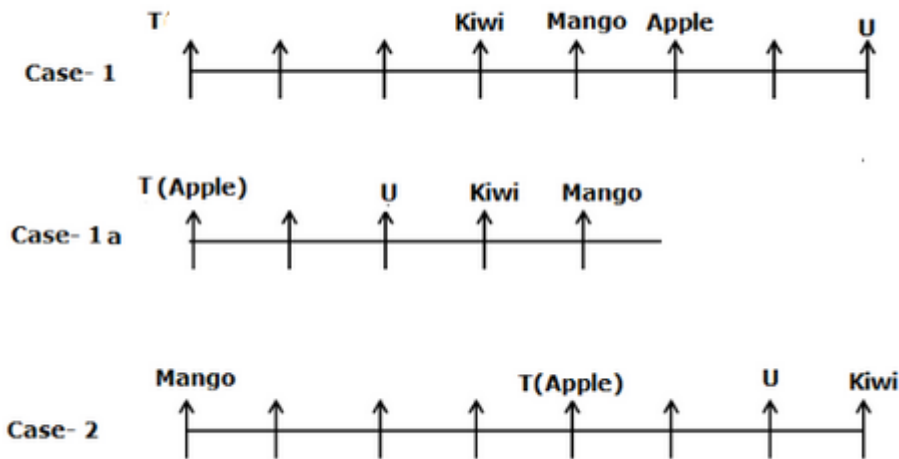

We have,

- T sits third to the left of the one who likes Kiwi.
- Only three persons sit between the one who likes Mango and T.
- U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango.

From the above conditions there are two possibilities.

@QuizByMickey

Again we have,

- As many persons sit to the left of S as sit to the right to the one who likes guava.
- Only two persons sit between the one who likes Banana and V.
- The one who likes Banana sits immediate right of Q.
- S doesn't sit to the right of T.

From the above conditions, Case-1 gets eliminated because S doesn't sit to the right of T, which is not satisfied. Here, Case-1a and Case-2 get splitted into other cases as Case-1b and Case-2a respectively.

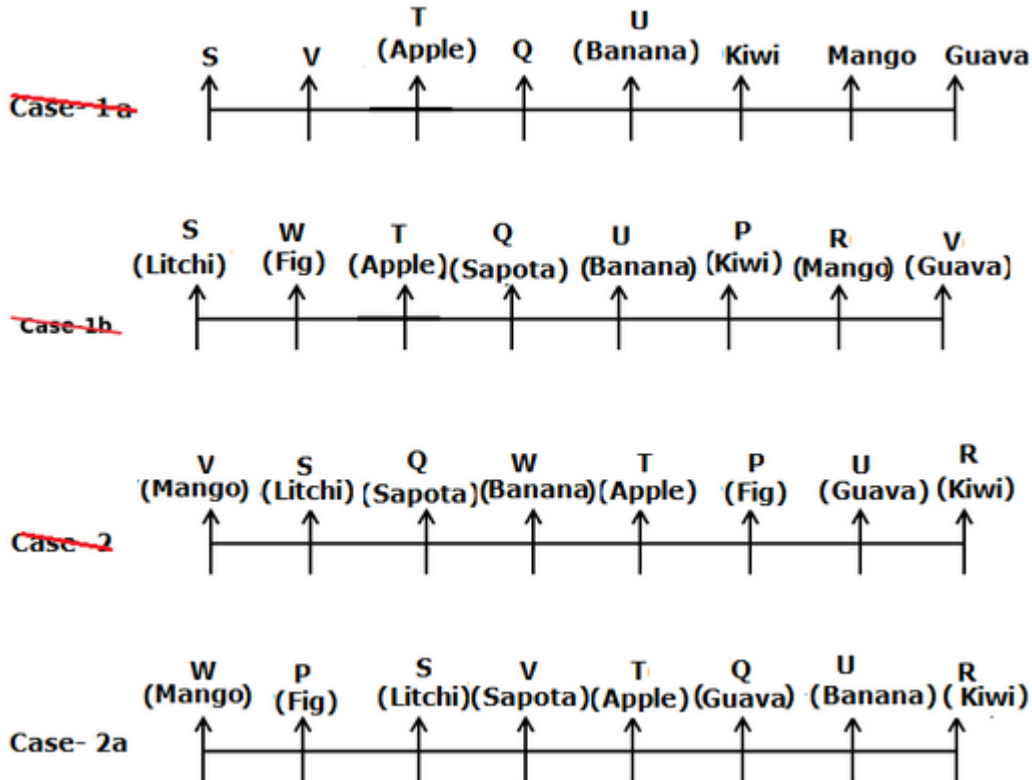

Again we have,

- The number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi.
- R sits to the right of the one who likes Sapota, but doesn't like Banana.
- W doesn't sit adjacent to the one who likes Apple.

From the above conditions case-1a gets eliminated because the number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi, which is not satisfied.

From the above conditions case-1b and case- 2 gets eliminated because W doesn't adjust to the one who likes Apple, which is not satisfied.

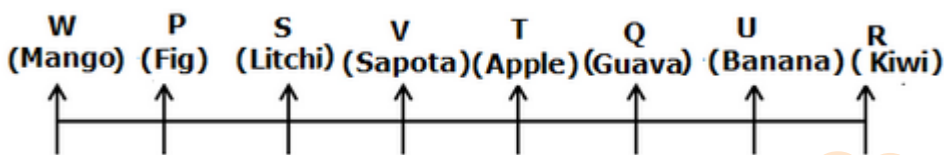

Hence case-2a shows the final arrangement

Answer: E

2. Questions

Final arrangement:

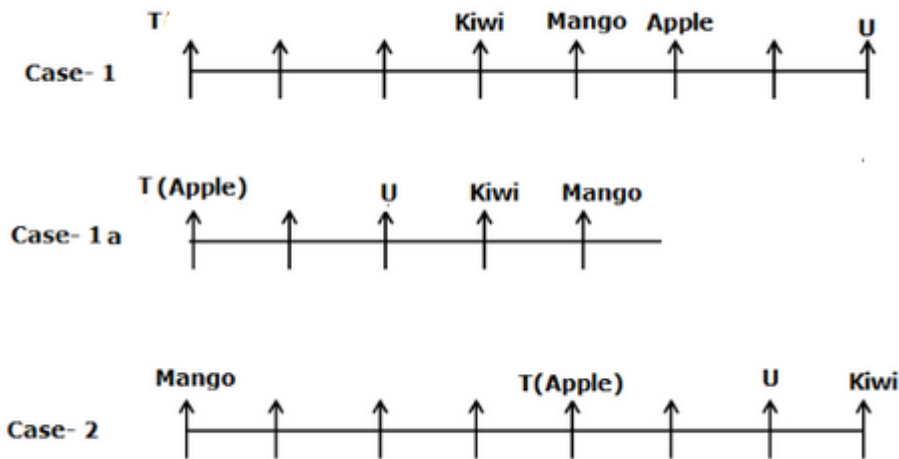

@QuizByMickey

We have,

- T sits third to the left of the one who likes Kiwi.
- Only three persons sit between the one who likes Mango and T.
- U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango.

From the above conditions there are two possibilities.

Again we have,

- As many persons sit to the left of S as sit to the right to the one who likes guava.
- Only two persons sit between the one who likes Banana and V.
- The one who likes Banana sits immediate right of Q.
- S doesn't sit to the right of T.

From the above conditions, Case-1 gets eliminated because S doesn't sit to the right of T, which is not satisfied. Here, Case-1a and Case-2 get splitted into other cases as Case-1b and Case-2a respectively.

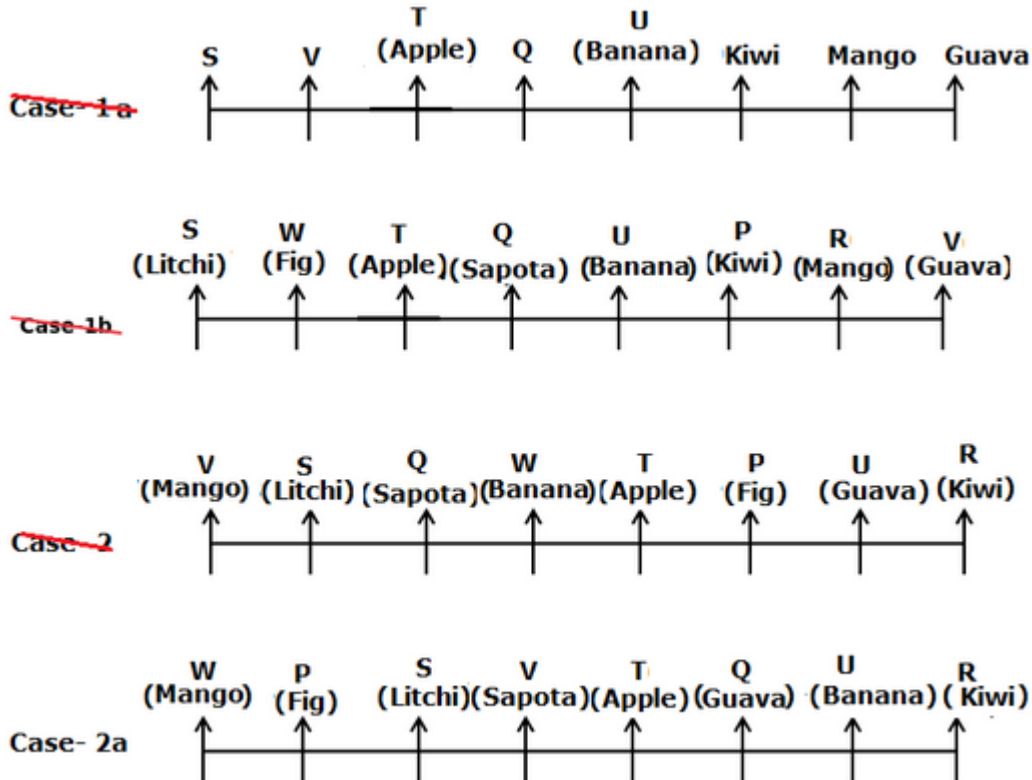

Again we have,

- The number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi.
- R sits to the right of the one who likes Sapota, but doesn't like Banana.
- W doesn't sit adjacent to the one who likes Apple.

From the above conditions case-1a gets eliminated because the number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi, which is not satisfied.

From the above conditions case-1b and case- 2 gets eliminated because W doesn't adjust to the one who likes Apple, which is not satisfied.

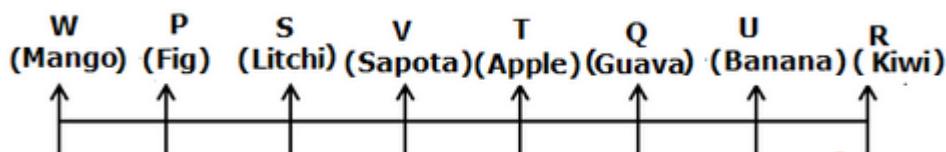

Hence case-2a shows the final arrangement

Answer: B

3. Questions

Final arrangement:

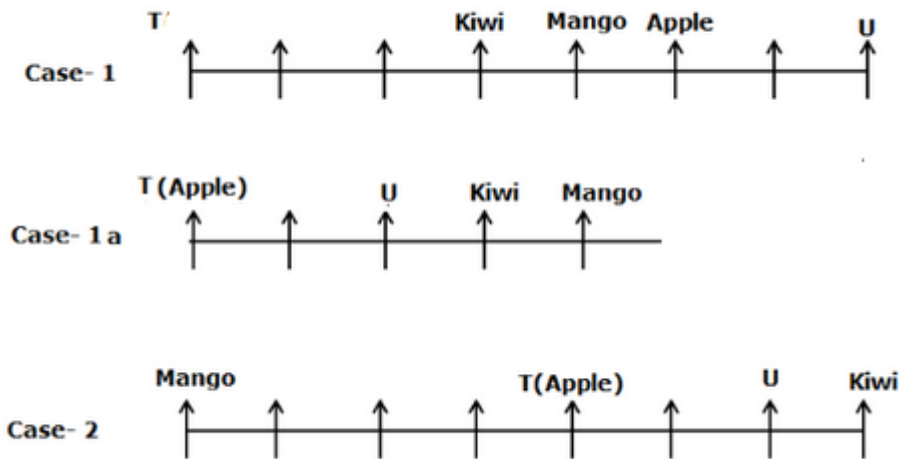

@QuizByMickey

We have,

- T sits third to the left of the one who likes Kiwi.
- Only three persons sit between the one who likes Mango and T.
- U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango.

From the above conditions there are two possibilities.

Again we have,

- As many persons sit to the left of S as sit to the right to the one who likes guava.
- Only two persons sit between the one who likes Banana and V.
- The one who likes Banana sits immediate right of Q.
- S doesn't sit to the right of T.

From the above conditions, Case-1 gets eliminated because S doesn't sit to the right of T, which is not satisfied. Here, Case-1a and Case-2 get splitted into other cases as Case-1b and Case-2a respectively.

@QuizByMickey

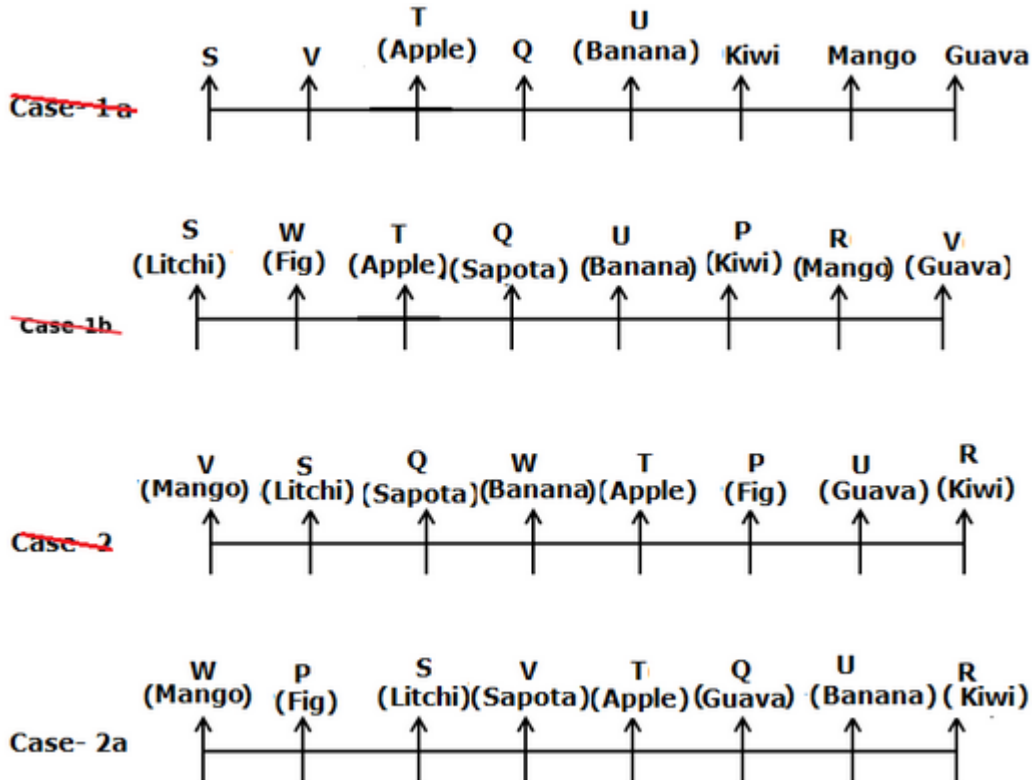

Again we have,

- The number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi.
- R sits to the right of the one who likes Sapota, but doesn't like Banana.
- W doesn't sit adjacent to the one who likes Apple.

From the above conditions case-1a gets eliminated because the number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi, which is not satisfied.

From the above conditions case-1b and case- 2 gets eliminated because W doesn't adjust to the one who likes Apple, which is not satisfied.

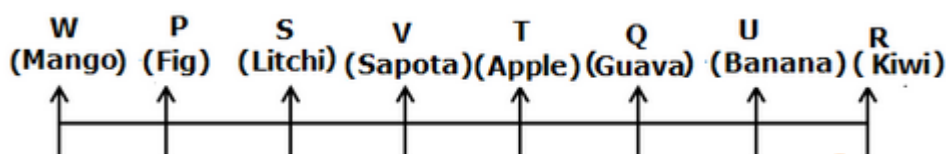

Hence case-2a shows the final arrangement

Answer: C

4. Questions

Final arrangement:

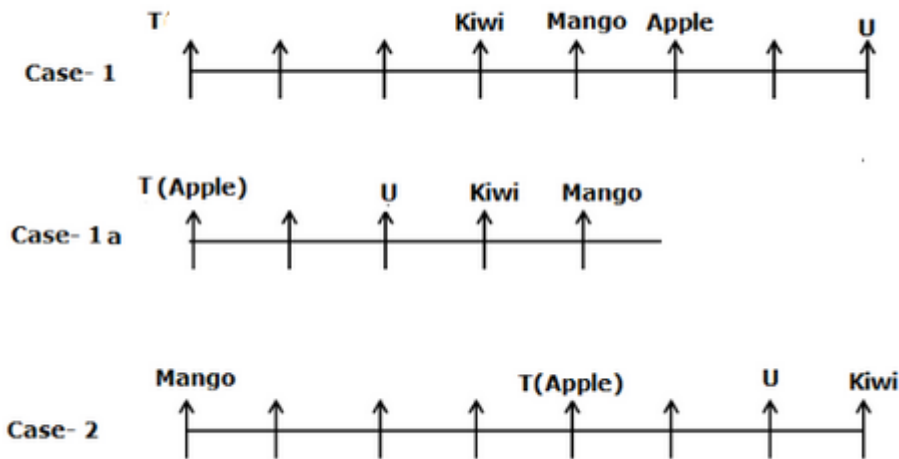

@QuizByMickey

We have,

- T sits third to the left of the one who likes Kiwi.
- Only three persons sit between the one who likes Mango and T.
- U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango.

From the above conditions there are two possibilities.

Again we have,

- As many persons sit to the left of S as sit to the right to the one who likes guava.
- Only two persons sit between the one who likes Banana and V.
- The one who likes Banana sits immediate right of Q.
- S doesn't sit to the right of T.

From the above conditions, Case-1 gets eliminated because S doesn't sit to the right of T, which is not satisfied. Here, Case-1a and Case-2 get splitted into other cases as Case-1b and Case-2a respectively.

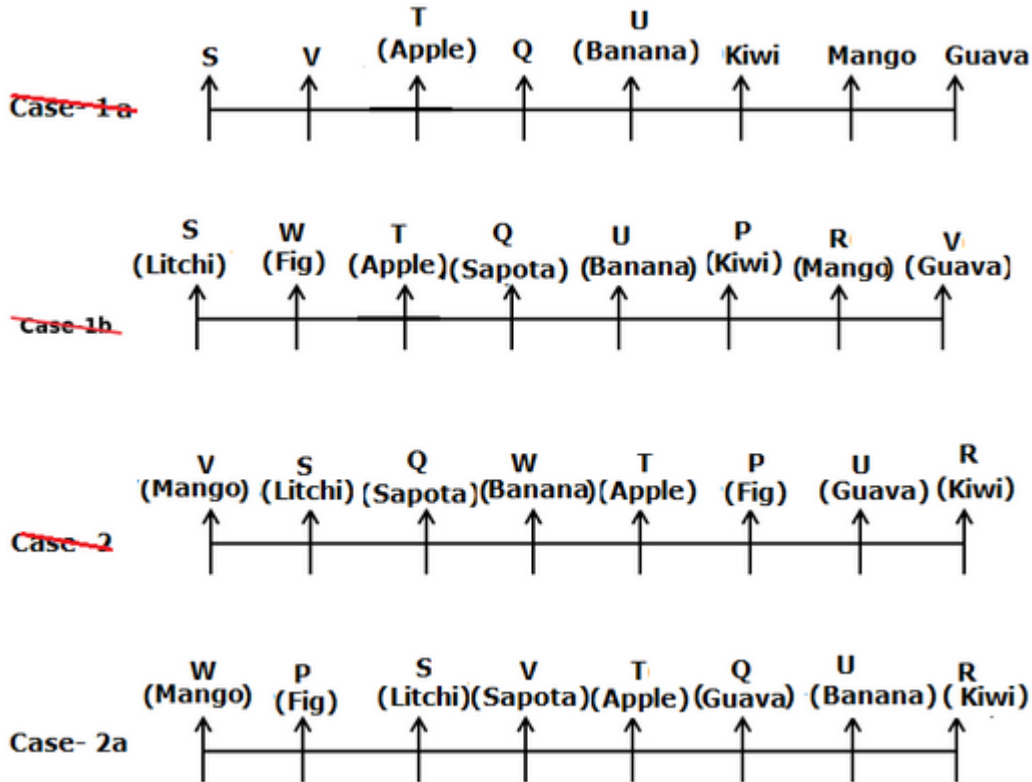

Again we have,

- The number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi.
- R sits to the right of the one who likes Sapota, but doesn't like Banana.
- W doesn't sit adjacent to the one who likes Apple.

From the above conditions case-1a gets eliminated because the number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi, which is not satisfied.

From the above conditions case-1b and case- 2 gets eliminated because W doesn't adjust to the one who likes Apple, which is not satisfied.

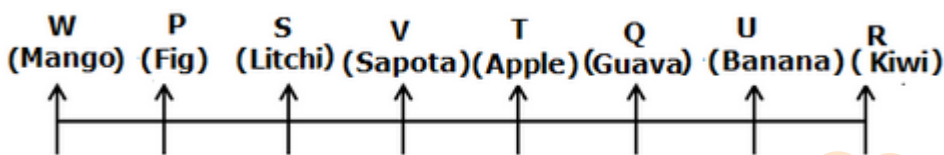

Hence case-2a shows the final arrangement

Answer: A

5. Questions

Final arrangement:

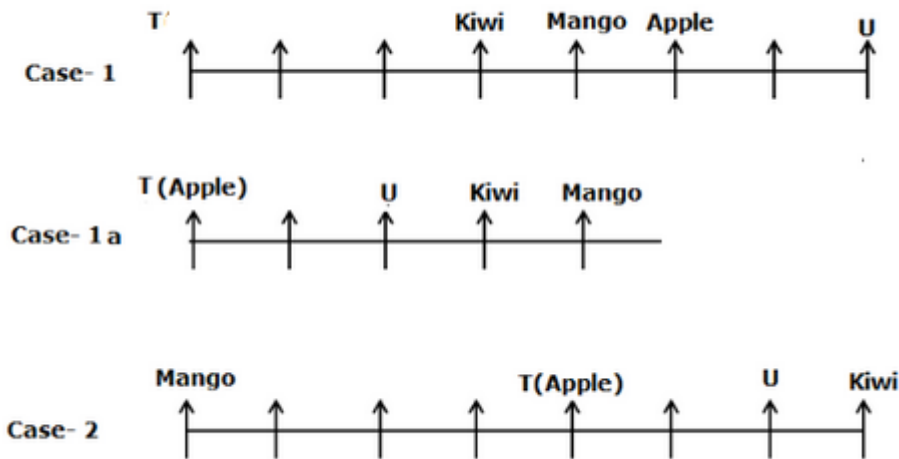

@QuizByMickey

We have,

- T sits third to the left of the one who likes Kiwi.
- Only three persons sit between the one who likes Mango and T.
- U sits second to the right of the one who likes Apple, but doesn't like Kiwi or Mango.

From the above conditions there are two possibilities.

Again we have,

- As many persons sit to the left of S as sit to the right to the one who likes guava.
- Only two persons sit between the one who likes Banana and V.
- The one who likes Banana sits immediate right of Q.
- S doesn't sit to the right of T.

From the above conditions, Case-1 gets eliminated because S doesn't sit to the right of T, which is not satisfied. Here, Case-1a and Case-2 get splitted into other cases as Case-1b and Case-2a respectively.

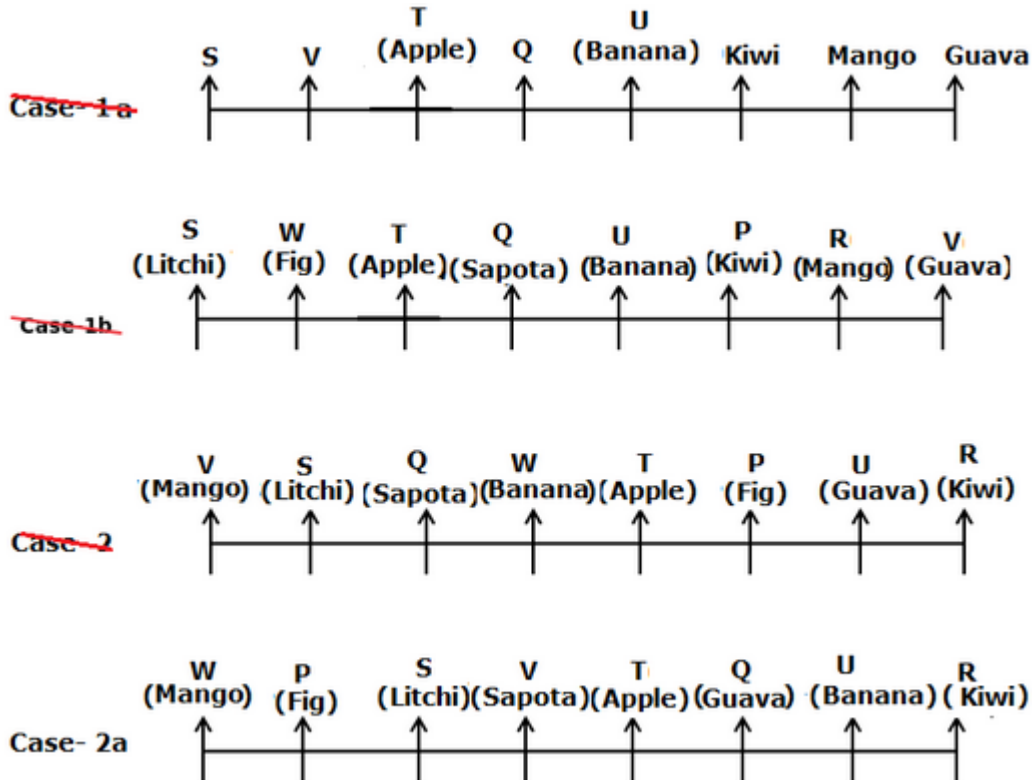

Again we have,

- The number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi.
- R sits to the right of the one who likes Sapota, but doesn't like Banana.
- W doesn't sit adjacent to the one who likes Apple.

From the above conditions case-1a gets eliminated because the number of persons sitting between the one who likes Fig and V is one more than the number of persons sitting between P and the one who likes Litchi, which is not satisfied.

From the above conditions case-1b and case- 2 gets eliminated because W doesn't adjust to the one who likes Apple, which is not satisfied.

Hence case-2a shows the final arrangement

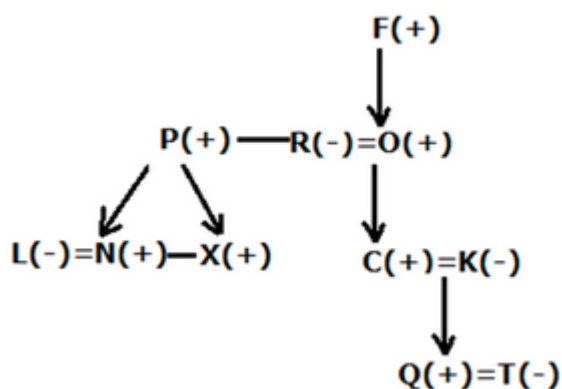

Answer: D

6. Questions

$F+O\$P$; $Q=K*C\#T$; $P\#L*N$; $C=R*O$

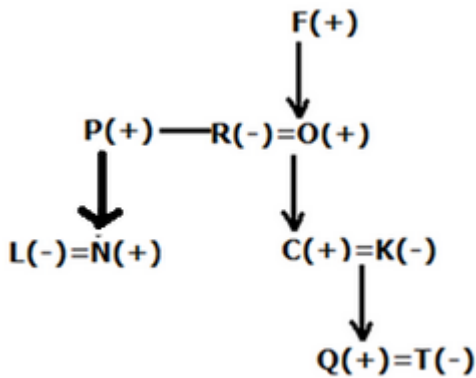

Answer: C

7. Questions

$F+O\$P$; $Q=K*C\#T$; $P\#L*N$; $C=R*O$

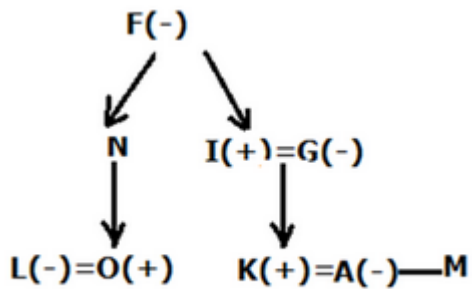

Answer: D

8. Questions

Answer: D

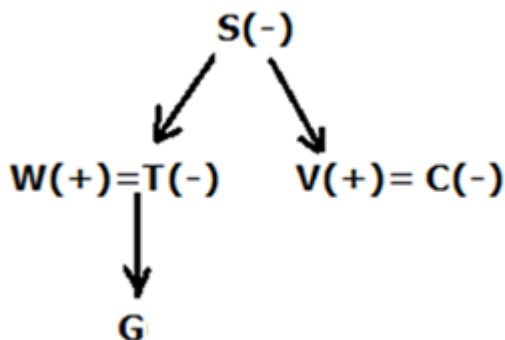

M\$K=G*I=F&N#L*O; I#A

9. Questions

Answer: E

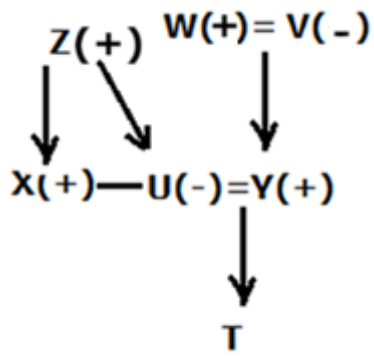

SNC*V=S&T*W+G

@QuizByMickey

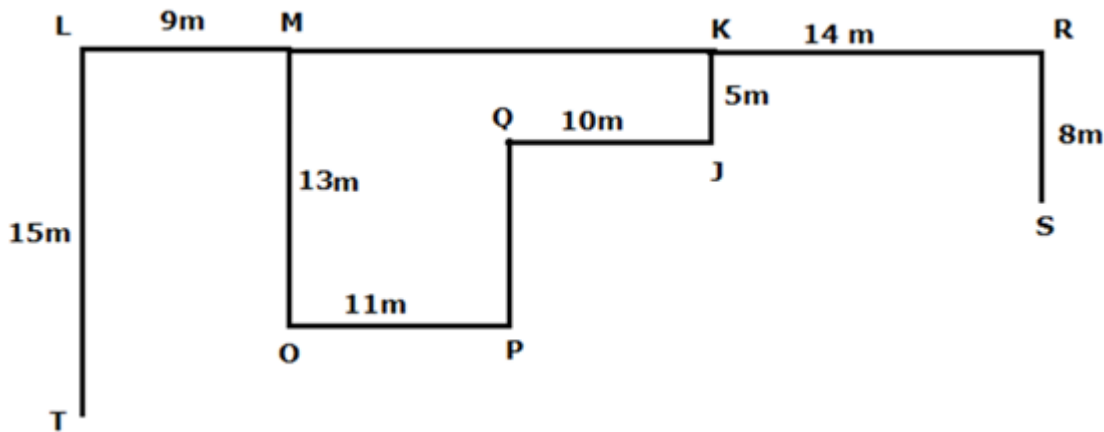

10. Questions

Answer: A

11. Questions

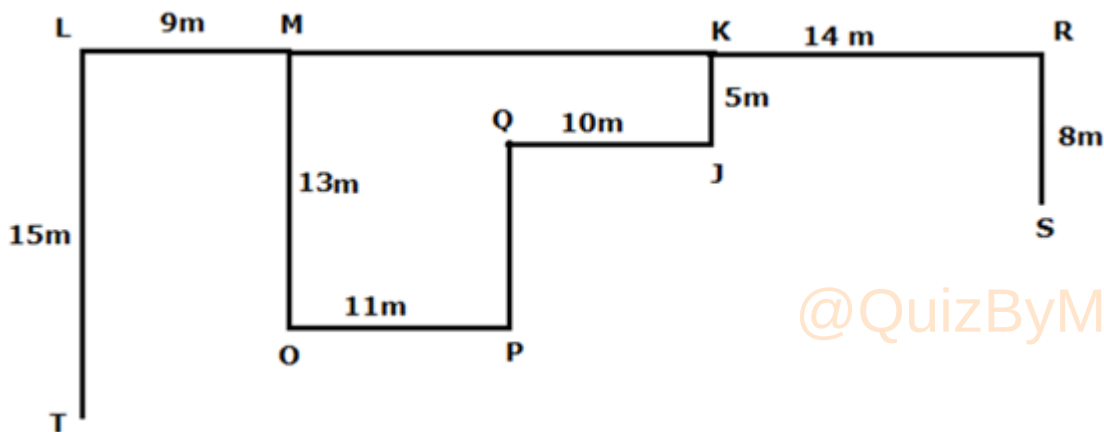

Final arrangement:

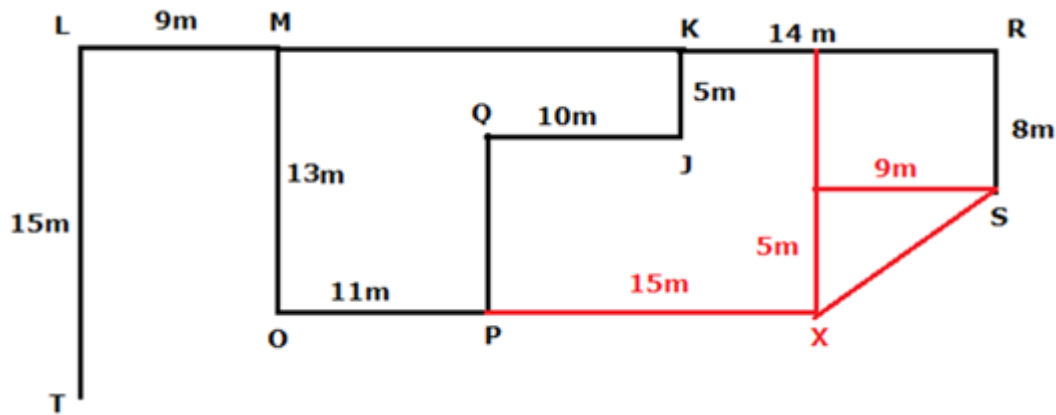

Answer: D

12. Questions

Final arrangement:

Answer: B

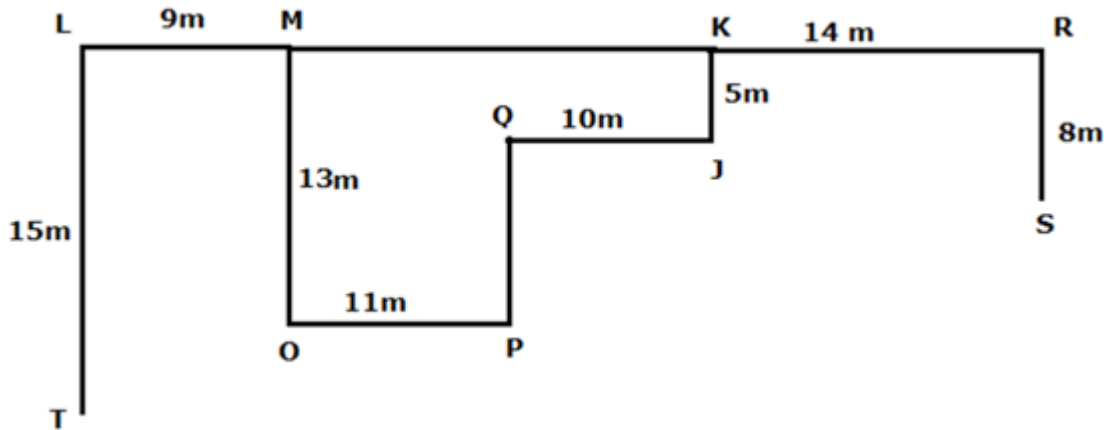

The shortest distance between X and S = $(5^2 + 9^2)^{1/2} = (25+81)^{1/2}$

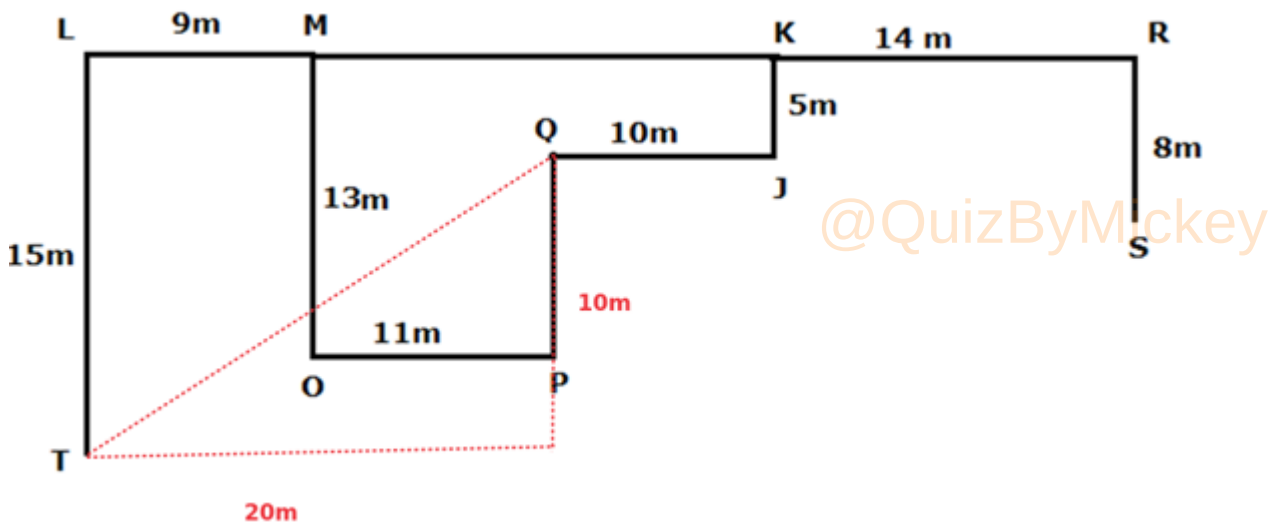

The approximate shortest distance between X and S = 10m;

13. Questions

Final arrangement:

Answer: B

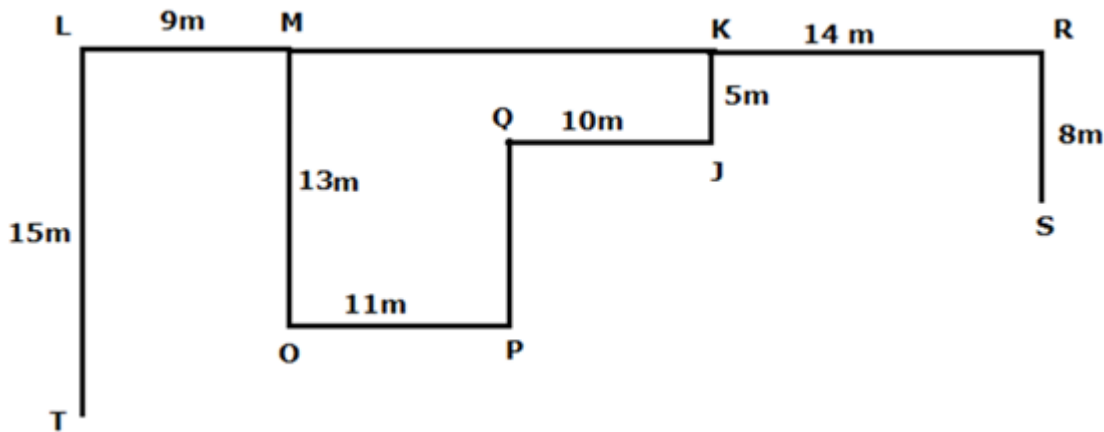

The shortest distance between T and Q = $(20^2 + 10^2)^{1/2} = (500)^{1/2} = 22.36\text{m} = \mathbf{22\text{m (approximately)}}.$

T is South west with respect to Q. Here south west means \$&

14. Questions

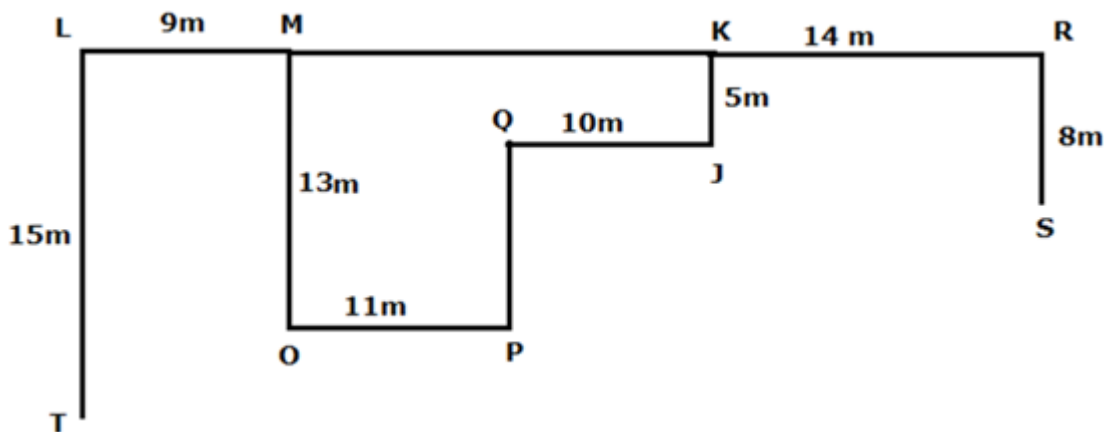

Final arrangement:

Answer: E

15. Questions

Final arrangement:

Answer: A (First person facing towards north east of second persons except option e)

16. Questions

Answer: D

The passage mentions that both online and offline shopping have their benefits, implying that both have pros and cons. This makes option (d) a valid assumption. The other options are either incorrect or too extreme.

17. Questions

Answer: E

The passage mentions that the gummies help meet nutritional requirements, implying that many struggle with a balanced diet (a). It also highlights that vitamins like C, D, and Zinc improve energy and immunity, indicating that deficiencies can cause fatigue (b). Since it states that gummies are a convenient option for those who dislike swallowing pills, it suggests a preference for easy consumption (c). However, (d) cannot be inferred as there is no direct comparison between gummies and pills. Thus, the correct answer is (e).

18. Questions

Answer: B

The passage suggests that regular consumption supports health, making (b) a valid assumption. (a) may be true but isn't explicitly assumed in the passage. (c) is a generalization; not everyone may need immunity boosters. (d) is incorrect because individual responses to supplements vary. The best assumption is (b).

19. Questions

Answer: E

The passage emphasizes the importance of nutrition and supplementation, supporting (a). It highlights that gummies are a convenient option, making (b) a valid conclusion. The importance of a balanced diet suggests (c). Since immunity-boosting vitamins are mentioned, (d) is also correct. Thus, the answer is (e).

20. Questions

Answer: A

Extreme heat conditions lead to more heatstroke cases. B, C, D, and E are incorrect as they either prevent heatstroke or are unrelated.

@QuizByMickey
