

1. Questions

Study the following information carefully and answer the given questions.

A certain number of persons are sitting in a linear row facing north. A family of nine members from three generations is sitting in the same linear row.

Only five persons sit between S and his father-in-law. S, who doesn't have a sibling, is the son-in-law of both Q and R, who is the father of Y. R, who has only two children, sits fifth to the left of R's granddaughter, who is not P. V's nephew sits to the immediate right of V's husband. Only two persons sit between V and her husband. V sits exactly between S and R. T, who sits fifth to the right of Y's sister, is the sister-in-law of V. Q sits second to the right of her son and second to the left of P's uncle. P is the only child of Y. U sits fourth to the left of W, who is the brother-in-law of R. Y and his maternal uncle sit at the extreme ends.

Who among the following person sits second to the left of Q's daughter?

- a. V's spouse
- b. R's daughter-in-law
- c. T's son
- d. S's spouse
- e. V's father

2. Questions

How many persons are sitting in a row as per the final arrangement?

- a. Nineteen
- b. Sixteen
- c. Twenty one
- d. Eighteen
- e. Twenty

3. Questions

Who among the following persons are the niece and nephew of W respectively?

- a. V and Y
- b. T and S
- c. P and U
- d. Q and R
- e. U and V

4. Questions

Four of the following five are alike in a certain way based on the given arrangement and hence form a group. Which of the following does not belong to the group?

- a. The child of S
- b. The sibling of Q
- c. The sibling of W
- d. The spouse of S
- e. The spouse of Y

5. Questions

What is the position of Y's wife with respect to V's uncle?

- a. Fourth to the left
- b. Third to the right
- c. Ninth to the left
- d. Seventh to the left
- e. Sixth to the right

6. Questions

Study the following information carefully and answer the given questions.

Eight persons- P, Q, R, S, T, U, V and W joined a company in nine different years viz., 1967, 1977, 1979, 1984, 1988, 1991, 1993, 1996 and 2000. One of the years is vacant. Their experiences are calculated with respect to the year 2022.

R joined five years before S. Only three persons joined between R and Q, no vacant year is between them. Only one person joined between Q and T. The difference between the experiences of T and S is the same as the difference between the experiences of V and U. The number of persons joined before P is **three more than** the number of persons joined after W. Neither V joined before U nor W joined before P. The sum of the experiences of P and W is a perfect cube number.

The difference between the experiences of Q and P is the same as the difference between the experiences of __ and ____.

@QuizByMickey

- a. S and the one who joined in 1979
- b. U and the one who joined in 1991
- c. The one who joined in 1996 and T
- d. R and the one who joined immediately after S
- e. V and the one who joined immediately before P

7. Questions

The number of persons joined between ____ and ____ is one more than the number of persons joined after the vacant year.

- a. Q and the one who joined in 1979
- b. The one who joined two persons after U and S
- c. The one who joined immediately before S and T
- d. The one who joined in 1996 and R
- e. The one who joined three persons after U and V

8. Questions

V joined _____ years before W, based on the final arrangement.

- a. 8 years
- b. 11 years
- c. 7 years
- d. 5 years
- e. 3 years

9. Questions

Which of the following statement(s) is/are TRUE with respect to the final arrangement?

- I). P has more experience than V
 - II). No one joined between Q and U.
 - III). S joined three years after the one who joined immediately before R
- a. Only III
 - b. Only I and II
 - c. Only I and III
 - d. All I, II and III
 - e. Only II

@QuizByMickey

10. Questions

How many persons joined between S and R as per the final arrangement?

- a. As many persons joined before P
- b. As many persons joined between the vacant year and P
- c. As many persons joined between U and R
- d. As many persons joined before V

- e. As many persons joined between V and W

11. Questions

Study the following information carefully and answer the questions below. The questions given below can be answered using one of the statements given in the options.

There are eight friends sitting around a circular table for a meeting and facing inside. Who is sitting exactly between X and Y?

I). Z is sitting third to the left of X. Y is sitting second to the right of A, who is sitting two persons away from Z.

II). B is sitting exactly between Y and Z. C is sitting second to the left of X. A is sitting to the immediate right of X.

- a. If the data in statement I alone is sufficient
- b. If the data in statement II alone is sufficient
- c. If the data in either statement I or statement II is sufficient
- d. If the data in both statement I and II are sufficient
- e. If the data in neither statement I nor statement II is sufficient

12. Questions

Seven persons are going to attend the music class on different days of the same week, starting from Tuesday. Who among the following persons attends music class on Wednesday?

I). Two persons attend the music class between X and A. A either attends the music class on Tuesday or on Friday. X doesn't attend class on Monday. One person attends between X and U.

II). B attends the class just before R. Two students attend the class between U and B. V attends class before M and after X.

- a. If the data in neither statement I nor statement II is sufficient
- b. If the data in statement I alone is sufficient
- c. If the data in either statement I or statement II is sufficient
- d. If the data in both statement I and II are sufficient
- e. If the data in statement II alone is sufficient

@QuizByMickey

13. Questions

Some persons are sitting in a row facing north. How many persons are sitting in a row?

I). A sits fourth to the left of G and second to the right of M. Both M and G doesn't sits at the extreme end of the row. B sits at the end of the row.

II). L sits fourth to the left of E and sits at the end of the row. B sits fourth to the right of K, who sits second to the right of A. E sits between M and A.

- a. If the data in statement I alone is sufficient
- b. If the data in statement II alone is sufficient
- c. If the data in either statement I or statement II is sufficient
- d. If the data in neither statement I nor statement II is sufficient
- e. If the data in both statement I and II are sufficient

14. Questions

Six students, M, N, R, V, S and T attend the lecture in different months- January, February, March, May, June and September. How many persons attend the lecture between M and V?

I). R attends the lecture in a month which has an odd number of days. Three persons attend between R and T. As many persons attend before N as after S.

II). V attends the lecture in a month which has a minimum number of days. As many persons attend before V as after T. S attends the lecture immediately before N. M attends the lecture after R.

- a. If the data in statement I alone is sufficient
- b. If the data in statement II alone is sufficient
- c. If the data in either statement I or statement II is sufficient
- d. If the data in neither statement I nor statement II is sufficient
- e. If the data in both statement I and II are sufficient

15. Questions

Seven students - P, Q, R, S, T, U and V get different marks, then the marks of how many students are less than the marks of S?

I). P's mark is more than Q. S's mark is more than Q. U's mark is less than R and P. T gets the lowest mark. V's marks is more than R.

II). Q's mark is more than U. P's mark is more than S. U's mark is less than V and R. R's mark is only less than one of the student and T gets the lowest mark.

- a. If the data in statement I alone is sufficient
- b. If the data in statement II alone is sufficient
- c. If the data in either statement I or statement II is sufficient
- d. If the data in both statement I and II are sufficient
- e. If the data in neither statement I nor statement II is sufficient

@QuizByMickey

16. Questions

Each of the questions below consists of some statements followed by a conclusion. You have to decide which of the options correctly fill the blanks such that the conclusion must be definitely true.

Statements:

Only a few calls are mails

No post is calls

Some letters are mails

All calls are message

Conclusions:

I). Some __(X)__ are __(Y)___

II). Some __(Y)___ are not __(Z)___

- a. X: calls, Y: Letters, Z: Post
- b. X: Post, Y: Message, Z: Letters
- c. X: Message, Y: Mails, Z: Post
- d. Either A or C
- e. Either B or C

17. Questions

Statements:

Only cups are jug

Some cups are Mugs

All mugs are Glass

No Glass is steel

Conclusions:

I). Some __(X)___ can never be __(Y)___

II). Some __(Y)___ not __(Z)___

- a. X: cups, Y: steel, Z: steel
- b. X: Cups, Y: Mugs, Z: Jug
- c. X: Glass, Y: Mugs, Z: Jug
- d. X: steel, Y: Mugs, Z: Cup
- e. X: Jug, Y: Glass, Z: Cup

@QuizByMickey

18. Questions

Statements:

Only a few apples are orange

No orange is bananas

Only a few bananas are grapes

Some bananas are dates

Conclusions:

I). No __(X)__ is __(Y)__ is a possibility

II). Some __(Y)__ are __(Z)__ is a possibility

- a. X: orange, Y: Grapes, Z: Apple
- b. X: Bananas, Y: Dates, Z: Orange
- c. X: Orange, Y: Bananas, Z: Grapes
- d. X: Grapes, Y: Dates, Z: Bananas
- e. X: Apple, Y: Bananas, Z: Dates

19. Questions

Statements:

Only a few red are green

All green is yellow

Few yellow is black

All black is blue

Conclusions:

I). Some __(X)__ being __(Y)__ is a possibility

II). All __(Y)__ are __(Z)__ is a possibility

- a. X: Blue, Y: Black, Z: Green
- b. X: Green, Y: Yellow, Z: Red
- c. X: Red, Y: Green, Z: Yellow
- d. X: Red, Y: Black, Z: Green
- e. X: Black, Y: Blue, Z: Green

@QuizByMickey

20. Questions

Statements:

Only a few bikes are Cruz

All Cruz are black

No car is black

Some Audi are cars.

Conclusions:

I). Some __(X)__ are definitely not __(Y)___

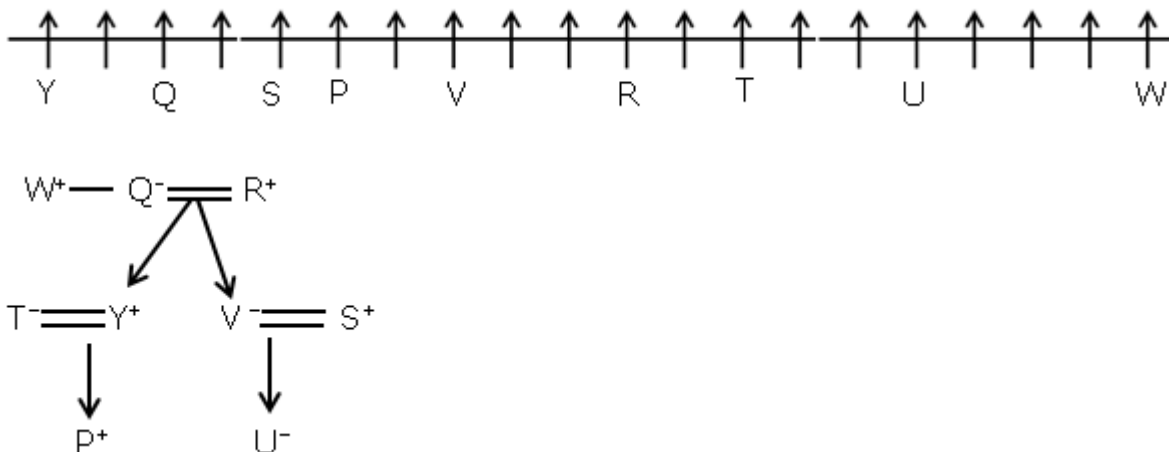

II). Some __(Y)___ are __(Z)___ is a possibility.

- a. X: Bikes, Y: Black, Z: Audi
- b. X: Audi, Y: car, Z: Cruz
- c. X: Black, Y: Cruz, Z: Car
- d. X: Cruz, Y: Bike, Z: Car
- e. X: Bikes, Y: Cars, Z: Bikes

Explanations:

1. Questions

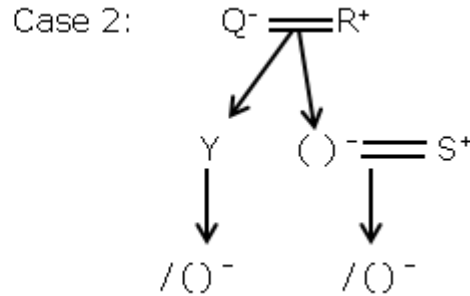

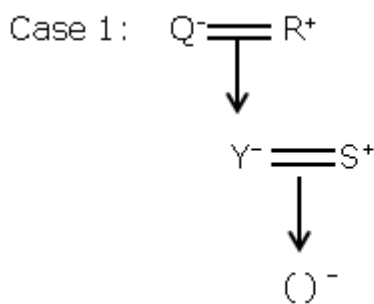

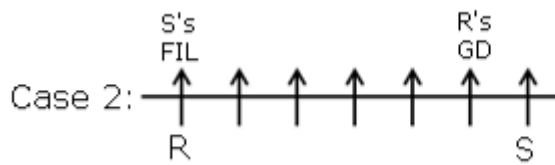

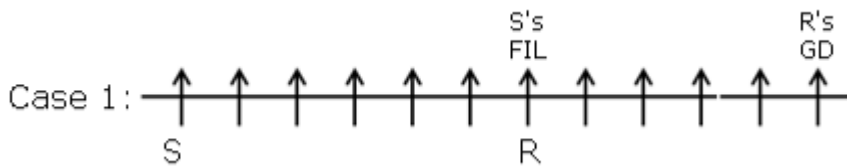

Final arrangement:

We have,

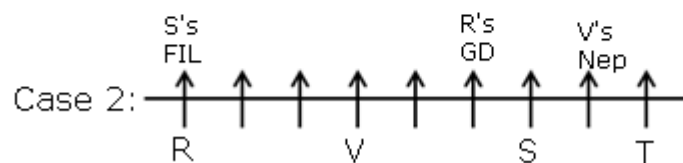

- Only five persons sit between S and his father-in-law.
- S, who doesn't have a sibling, is the son-in-law of both Q and R, who is the father of Y.
- R, who has only two children, sits fifth to the left of R's granddaughter, who is not P.

From the above conditions there are two possibilities

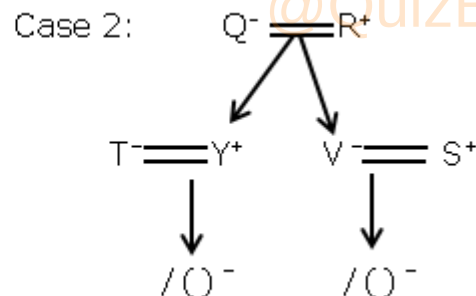

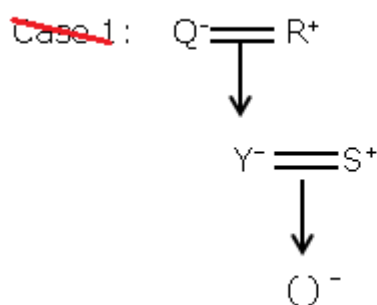

Again we have,

- V's nephew sits to the immediate right of V's husband.
- Only two persons sit between V and her husband.
- V sits exactly between S and R.
- T, who sits fifth to the right of Y's sister, is the sister-in-law of V.

From the above conditions, case-1 gets eliminated because S is V's husband, which is not satisfied.

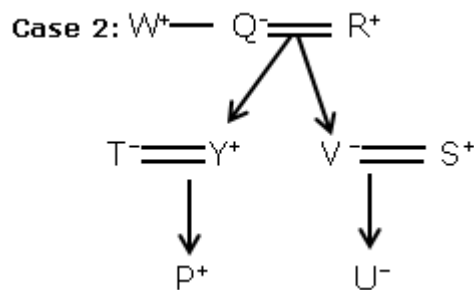

Again, we have,

- Q sits second to the right of her son and second to the left of P's uncle.

- P is the only child of Y.
- U sits fourth to the left of W, who is the brother-in-law of R.
- Y and his maternal uncle sit at the extreme ends.

From the above conditions case-2 gets eliminated because Y and his maternal uncle sit at the extreme ends, which is not satisfied.

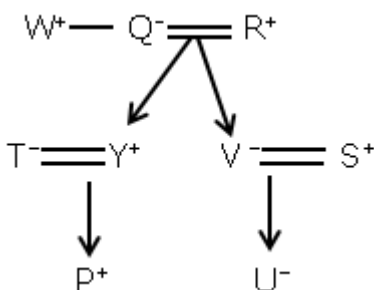

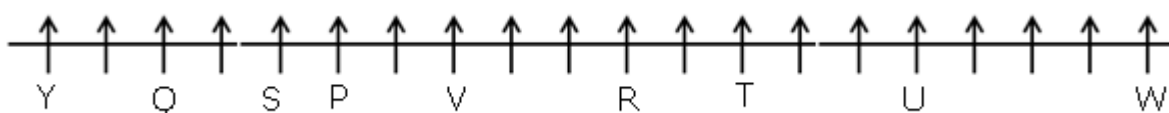

Hence, case-1 shows the final arrangement.

Answer: C

2. Questions

Final arrangement:

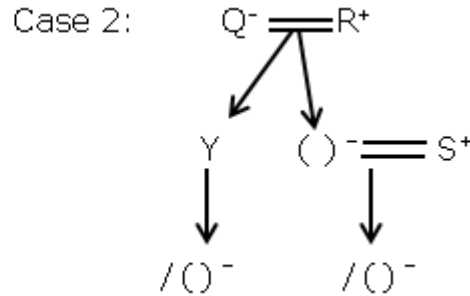

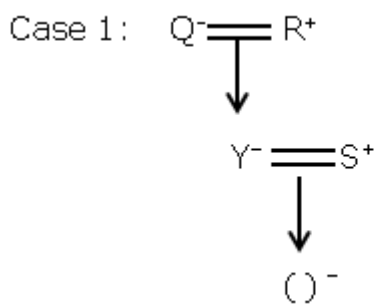

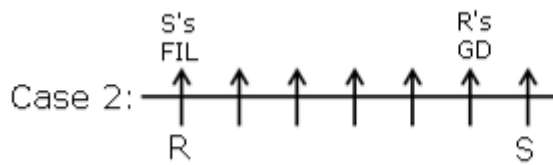

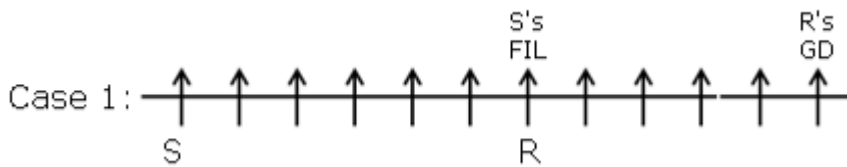

@QuizByMickey

We have,

- Only five persons sit between S and his father-in-law.
- S, who doesn't have a sibling, is the son-in-law of both Q and R, who is the father of Y.
- R, who has only two children, sits fifth to the left of R's granddaughter, who is not P.

From the above conditions there are two possibilities

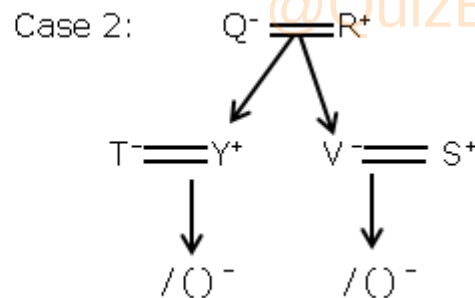

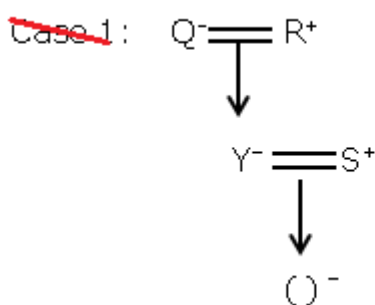

Again we have,

- V's nephew sits to the immediate right of V's husband.
- Only two persons sit between V and her husband.
- V sits exactly between S and R.
- T, who sits fifth to the right of Y's sister, is the sister-in-law of V.

From the above conditions, case-1 gets eliminated because S is V's husband, which is not satisfied.

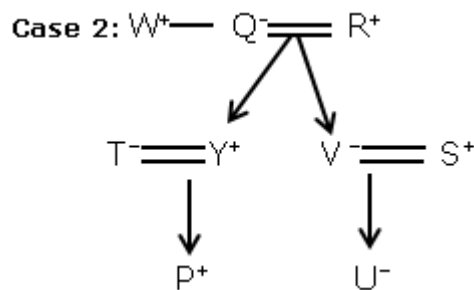

Again, we have,

- Q sits second to the right of her son and second to the left of P's uncle.

- P is the only child of Y.
- U sits fourth to the left of W, who is the brother-in-law of R.
- Y and his maternal uncle sit at the extreme ends.

From the above conditions case-2 gets eliminated because Y and his maternal uncle sit at the extreme ends, which is not satisfied.

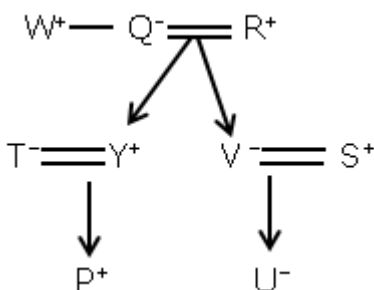

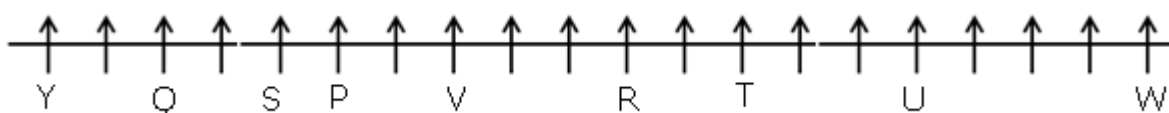

Hence, case-1 shows the final arrangement.

Answer: E

3. Questions

Final arrangement:

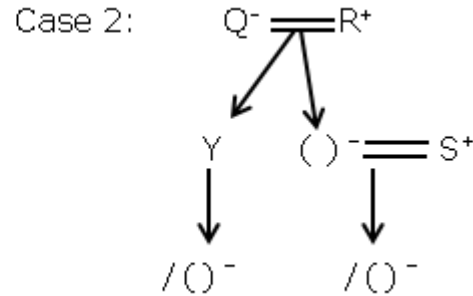

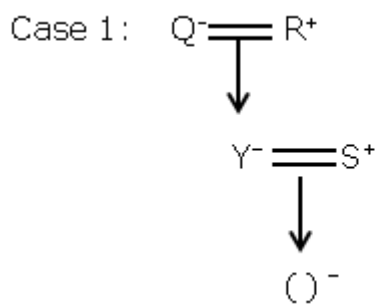

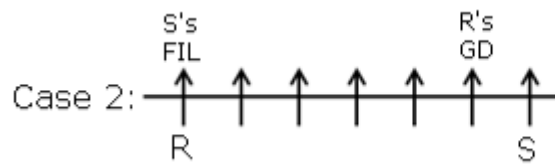

@QuizByMickey

We have,

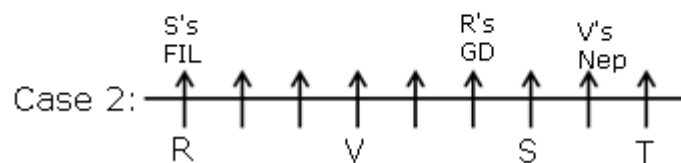

- Only five persons sit between S and his father-in-law.
- S, who doesn't have a sibling, is the son-in-law of both Q and R, who is the father of Y.
- R, who has only two children, sits fifth to the left of R's granddaughter, who is not P.

From the above conditions there are two possibilities

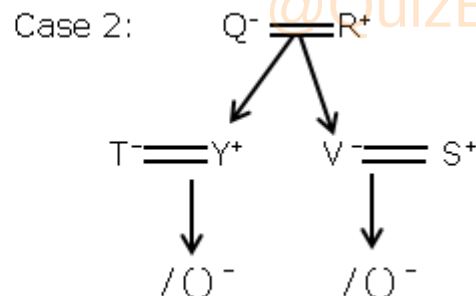

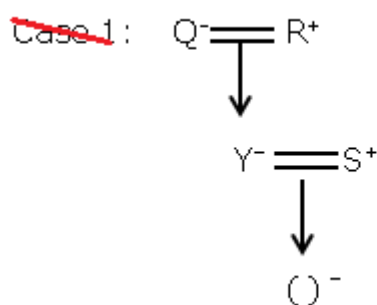

Again we have,

- V's nephew sits to the immediate right of V's husband.
- Only two persons sit between V and her husband.
- V sits exactly between S and R.
- T, who sits fifth to the right of Y's sister, is the sister-in-law of V.

From the above conditions, case-1 gets eliminated because S is V's husband, which is not satisfied.

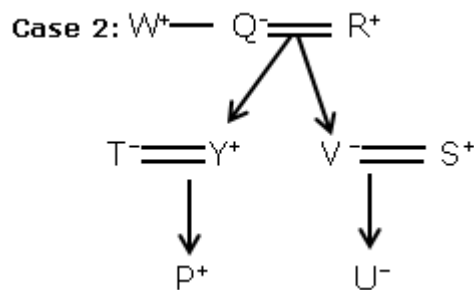

Again, we have,

- Q sits second to the right of her son and second to the left of P's uncle.

- P is the only child of Y.
- U sits fourth to the left of W, who is the brother-in-law of R.
- Y and his maternal uncle sit at the extreme ends.

From the above conditions case-2 gets eliminated because Y and his maternal uncle sit at the extreme ends, which is not satisfied.

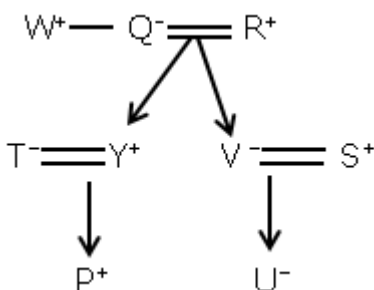

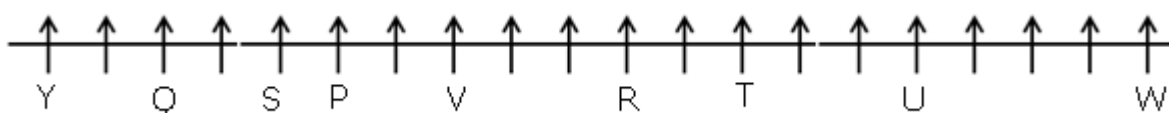

Hence, case-1 shows the final arrangement.

Answer: A

4. Questions

Final arrangement:

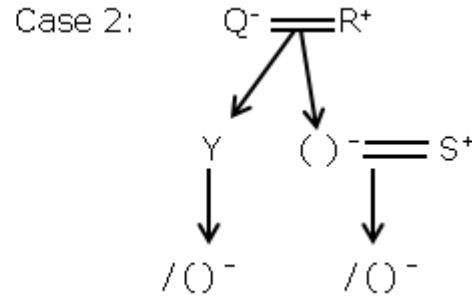

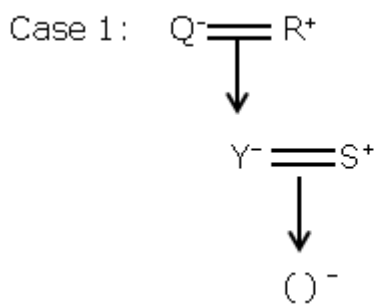

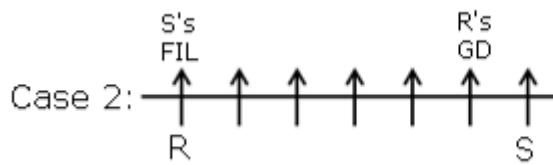

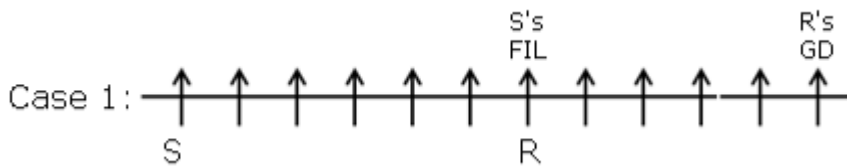

@QuizByMickey

We have,

- Only five persons sit between S and his father-in-law.
- S, who doesn't have a sibling, is the son-in-law of both Q and R, who is the father of Y.
- R, who has only two children, sits fifth to the left of R's granddaughter, who is not P.

From the above conditions there are two possibilities

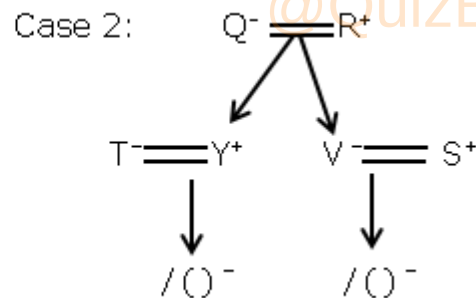

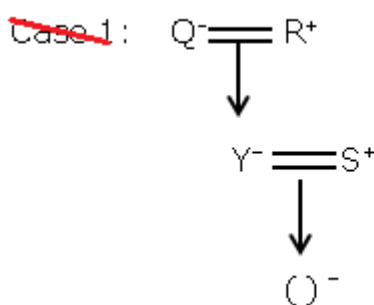

Again we have,

- V's nephew sits to the immediate right of V's husband.
- Only two persons sit between V and her husband.
- V sits exactly between S and R.
- T, who sits fifth to the right of Y's sister, is the sister-in-law of V.

From the above conditions, case-1 gets eliminated because S is V's husband, which is not satisfied.

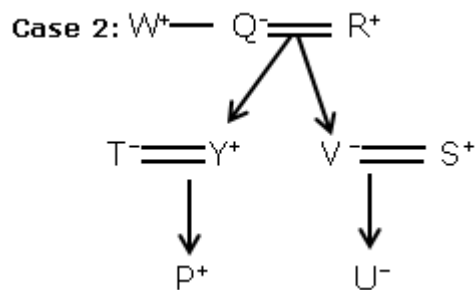

Again, we have,

- Q sits second to the right of her son and second to the left of P's uncle.

- P is the only child of Y.
- U sits fourth to the left of W, who is the brother-in-law of R.
- Y and his maternal uncle sit at the extreme ends.

From the above conditions case-2 gets eliminated because Y and his maternal uncle sit at the extreme ends, which is not satisfied.

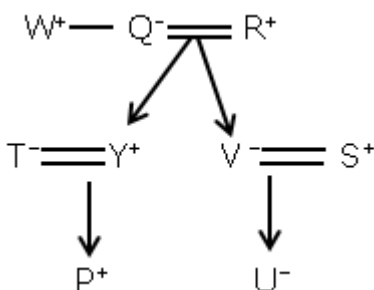

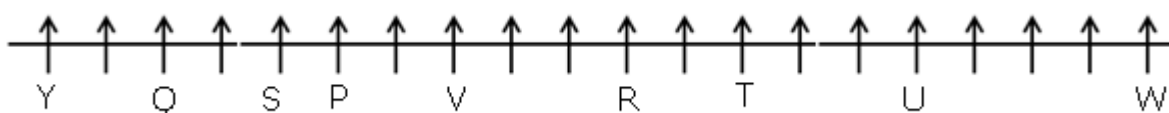

Hence, case-1 shows the final arrangement.

Answer: B (All other persons are female member of the family, except option B)

5. Questions

Final arrangement:

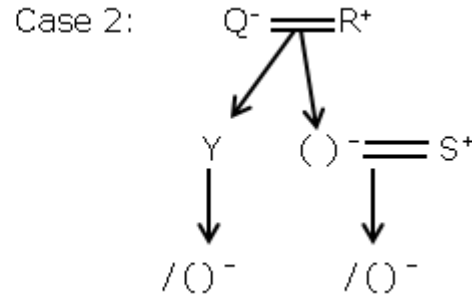

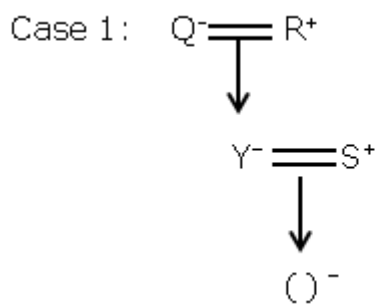

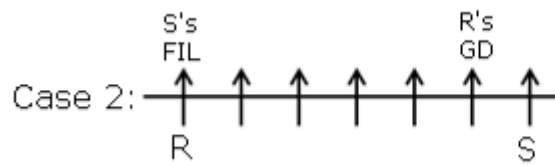

@QuizByMickey

We have,

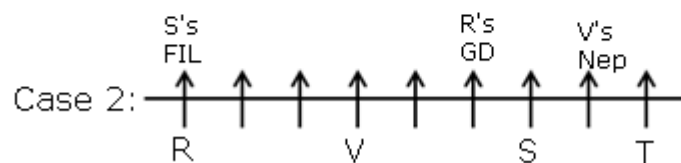

- Only five persons sit between S and his father-in-law.
- S, who doesn't have a sibling, is the son-in-law of both Q and R, who is the father of Y.
- R, who has only two children, sits fifth to the left of R's granddaughter, who is not P.

From the above conditions there are two possibilities

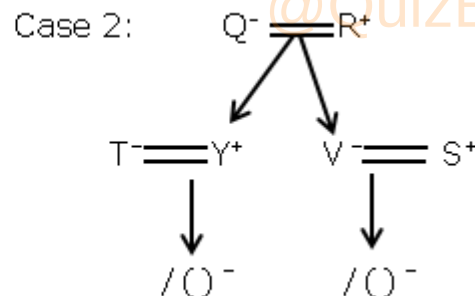

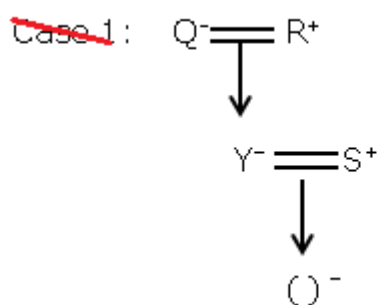

Again we have,

- V's nephew sits to the immediate right of V's husband.
- Only two persons sit between V and her husband.
- V sits exactly between S and R.
- T, who sits fifth to the right of Y's sister, is the sister-in-law of V.

From the above conditions, case-1 gets eliminated because S is V's husband, which is not satisfied.

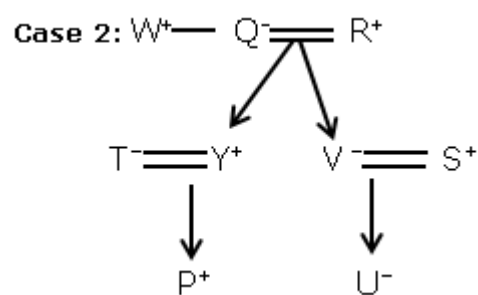

Again, we have,

- Q sits second to the right of her son and second to the left of P's uncle.

- P is the only child of Y.
- U sits fourth to the left of W, who is the brother-in-law of R.
- Y and his maternal uncle sit at the extreme ends.

From the above conditions case-2 gets eliminated because Y and his maternal uncle sit at the extreme ends, which is not satisfied.

Hence, case-1 shows the final arrangement.

Answer: D

6. Questions

Final arrangement:

Experience	Years	Persons
55	1967	Q
45	1977	U
43	1979	T
38	1984	P
34	1988	R
31	1991	V
29	1993	S
26	1996	W
22	2000	Vacant

We have,

- R joined five years before S.

@QuizByMickey

- Only three persons joined between R and Q, no vacant year is between them.

From the above conditions, there are four possibilities

Experience	Years	Case-1	Case-2	Case-3	Case-4
		Persons	Persons	Persons	Persons
55	1967	Vacant/	Q	Vacant/	Vacant/
45	1977	Q		Vacant/	Vacant/
43	1979			R	Vacant/
38	1984			S	Vacant/
34	1988		R		R
31	1991	R	Vacant/		
29	1993	Vacant/	S	Q	S
26	1996	S	Vacant/	Vacant/	
22	2000	Vacant/	Vacant/	Vacant/	Q

Again, we have,

- Only one person joined between Q and T.
- The difference between the experiences of T and S is the same as the difference between the experiences of V and U.

From the above conditions, case-4 gets eliminated because only one person joined between Q and T, which is not satisfied.

Experience	Years	Case-1	Case-2	Case-3	Case-4
		Persons	Persons	Persons	Persons
55	1967	U/V	Q	Vacant/	Vacant/
45	1977	Q	U/V	Vacant/	Vacant/
43	1979	V/U	T	R	Vacant/
38	1984	T		S	Vacant/
34	1988	U/V	R	T	R
31	1991	R	V/U		
29	1993	Vacant/	S	Q	S
26	1996	S	Vacant/	U/V	
22	2000	U/V	Vacant/	U/V	Q

Again we have,

- The number of persons joined before P is **three more than** the number of persons joined after W.

- Neither V joined before U nor W joined before P.
- The sum of the experiences of P and W is a perfect cube number.

From the above conditions, case-3 gets eliminated because the number of persons joined before P is **three more than** the number of persons joined after W, which is not satisfied.

From the above conditions case-1 gets eliminated because the sum of the experiences of P and W is a perfect cube number, which is not satisfied.

Hence, case-2 shows the final arrangement.

Experience	Years	Case-1	Case-2	Case-3
		Persons	Persons	Persons
55	1967	U	Q	Vacant/
45	1977	Q	U	Vacant/
43	1979	V	T	R
38	1984	T	P	S
34	1988	P	R	T
31	1991	R	V	
29	1993	W	S	Q
26	1996	S	W	U
22	2000	Vacant	Vacant	V

Answer: C

7. Questions

Final arrangement:

26	1996	S	Vacant/	Vacant/	
22	2000	Vacant/	Vacant/	Vacant/	Q

Again, we have,

- Only one person joined between Q and T.
- The difference between the experiences of T and S is the same as the difference between the experiences of V and U.

From the above conditions, case-4 gets eliminated because only one person joined between Q and T, which is not satisfied.

Experience	Years	Case-1	Case-2	Case-3	Case-4
		Persons	Persons	Persons	Persons
55	1967	U/V	Q	Vacant/	Vacant/
45	1977	Q	U/V	Vacant/	Vacant/
43	1979	V/U	T	R	Vacant/
38	1984	T		S	Vacant/
34	1988	U/V	R	T	R
31	1991	R	V/U		
29	1993	Vacant/	S	Q	S
26	1996	S	Vacant/	U/V	
22	2000	U/V	Vacant/	U/V	Q

Again we have,

- The number of persons joined before P is **three more than** the number of persons joined after W.

- Neither V joined before U nor W joined before P.
- The sum of the experiences of P and W is a perfect cube number.

From the above conditions, case-3 gets eliminated because the number of persons joined before P is **three more than** the number of persons joined after W, which is not satisfied.

From the above conditions case-1 gets eliminated because the sum of the experiences of P and W is a perfect cube number, which is not satisfied.

Hence, case-2 shows the final arrangement.

Experience	Years	Case-1	Case-2	Case-3
		Persons	Persons	Persons
55	1967	U	Q	Vacant/
45	1977	Q	U	Vacant/
43	1979	V	T	R
38	1984	T	P	S
34	1988	P	R	T
31	1991	R	V	
29	1993	W	S	Q
26	1996	S	W	U
22	2000	Vacant	Vacant	V

Answer: B

10. Questions

Final arrangement:

Experience	Years	Persons
55	1967	Q
45	1977	U
43	1979	T
38	1984	P
34	1988	R
31	1991	V
29	1993	S
26	1996	W
22	2000	Vacant

@QuizByMickey

We have,

- R joined five years before S.

- Only three persons joined between R and Q, no vacant year is between them.

From the above conditions, there are four possibilities

Experience	Years	Case-1	Case-2	Case-3	Case-4
		Persons	Persons	Persons	Persons
55	1967	Vacant/	Q	Vacant/	Vacant/
45	1977	Q		Vacant/	Vacant/
43	1979			R	Vacant/
38	1984			S	Vacant/
34	1988		R		R
31	1991	R	Vacant/		
29	1993	Vacant/	S	Q	S
26	1996	S	Vacant/	Vacant/	
22	2000	Vacant/	Vacant/	Vacant/	Q

Again, we have,

- Only one person joined between Q and T.
- The difference between the experiences of T and S is the same as the difference between the experiences of V and U.

From the above conditions, case-4 gets eliminated because only one person joined between Q and T, which is not satisfied.

Experience	Years	Case-1	Case-2	Case-3	Case-4
		Persons	Persons	Persons	Persons
55	1967	U/V	Q	Vacant/	Vacant/
45	1977	Q	U/V	Vacant/	Vacant/
43	1979	V/U	T	R	Vacant/
38	1984	T		S	Vacant/
34	1988	U/V	R	T	R
31	1991	R	V/U		
29	1993	Vacant/	S	Q	S
26	1996	S	Vacant/	U/V	
22	2000	U/V	Vacant/	U/V	Q

Again we have,

- The number of persons joined before P is **three more than** the number of persons joined after W.

- Neither V joined before U nor W joined before P.
- The sum of the experiences of P and W is a perfect cube number.

From the above conditions, case-3 gets eliminated because the number of persons joined before P is **three more than** the number of persons joined after W, which is not satisfied.

From the above conditions case-1 gets eliminated because the sum of the experiences of P and W is a perfect cube number, which is not satisfied.

Hence, case-2 shows the final arrangement.

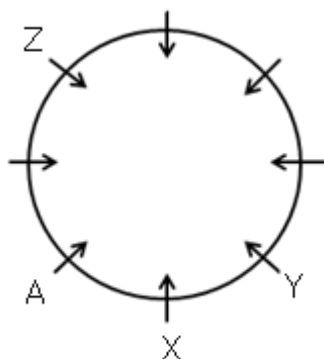

Experience	Years	Case-1	Case-2	Case-3
		Persons	Persons	Persons
55	1967	U	Q	Vacant/
45	1977	Q	U	Vacant/
43	1979	V	T	R
38	1984	T	P	S
34	1988	P	R	T
31	1991	R	V	
29	1993	W	S	Q
26	1996	S	W	U
22	2000	Vacant	Vacant	V

Answer: E

11. Questions

Answer: A

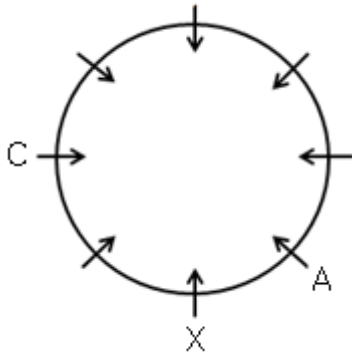

D). Z is sitting third to the left of X. Y is sitting second to the right of A, who is sitting two persons away from Z.

@QuizByMickey

From the statement I, none sits between X and Y. So, from the given data statement I is sufficient.

II). B is sitting exactly between Y and Z. C is sitting second to the left of X. A is sitting to the immediate right of X.

From the given information, we cannot place B, Y and Z. So, we cannot find the person who is sitting exactly between Y and Z. So, from the given data statement II is not sufficient.

12. Questions

Answer: D

I). Two persons attend the music class between X and A. A either attends the music class on Tuesday or on Friday. X doesn't attend class on Monday. One person attends between X and U.

Days	Case 1	Case 2
	Persons	Persons
Tuesday	A	X
Wednesday	U/	
Thursday		U
Friday	X	A
Saturday		
Sunday	U/	
Monday		

@QuizByMickey

From the data in the statement I alone we cannot find the answer.

II). B attends the class just before R. Two students attend the class between U and B. V attends class before M and after X.

By combining statement I and II, we have,

Days	Case 1	Case 2
	Persons	Persons
Tuesday	A	X
Wednesday	U	V
Thursday		U
Friday	X	A
Saturday	B	M
Sunday	R	B
Monday		R

After combining the data in statement I and statement II, V attends the music class on Wednesday.

13. Questions

Answer: E

By combining statement I and statement II, we can find the answer.

There are 12 persons sitting in the row.

14. Questions

Answer: C

D). R attends the lecture in a month which has an odd number of days. Three persons attend between R and T. As many persons attend before N as after S.

@QuizByMickey

Months	Persons
January	R
February	M/V
March	N/S
May	N/S
June	T
September	M/V

Three persons attended the lecture between M and V.

II). V attends the lecture in a month which has a minimum number of days. As many persons attend before V as after T. S attends the lecture immediately before N. M attends the lecture after R.

Months	Persons
January	R
February	V
March	S
May	N
June	T
September	M

Three persons attended the lecture between M and V.

So, either date in statement I or in statement II is sufficient.

@QuizByMickey

15. Questions

Answer: D

I). P's mark is more than Q. S's mark is more than Q. U's mark is less than R and P. T gets the lowest mark. V's marks is more than R.

$P > Q$, $S > Q$, $R/P > U$, $V > R$

The data in statement I is insufficient to answer.

II). Q's mark is more than U. P's mark is more than S. U's mark is less than V and R. R's mark is only less than one of the student and T gets the lowest mark.

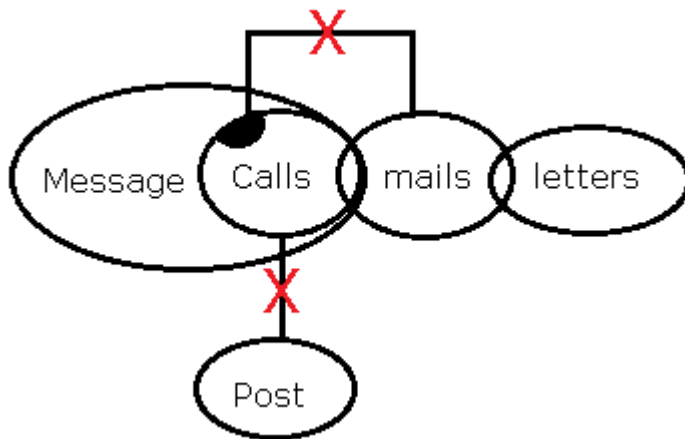

$V > R > P > S > Q > U > T$

Three student's marks are less than S.

So, the data in statement I and II are sufficient to answer.

16. Questions

Answer: C

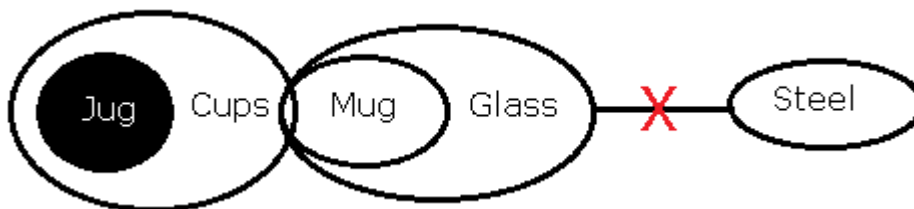

I). Some Messages are mails - Here, both messages and mails are associated with calls. So, some messages are mails is the definite conclusion. Hence, the conclusion I follows.

II). Some mails are not post - Here some mails are Call and No call is post, thus some mails which is also call are not post. Hence, the conclusion II follows.

17. Questions

Answer: B

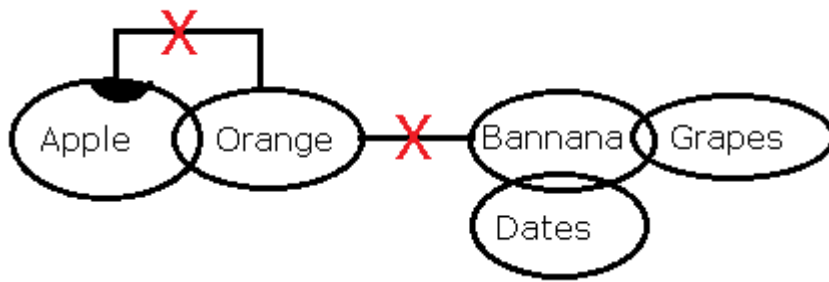

I). Some Cups can never be Mug - Here, some cups are mug is the given statement. So, other some cups can never be mug is the definite conclusion. Hence, the conclusion I follow.

II). Some Mug are not Jug - Here, only cups are jug is the given statement. So, some mugs are not jugs is the definite conclusion. Hence, conclusion II follows.

18. Questions

Answer: A

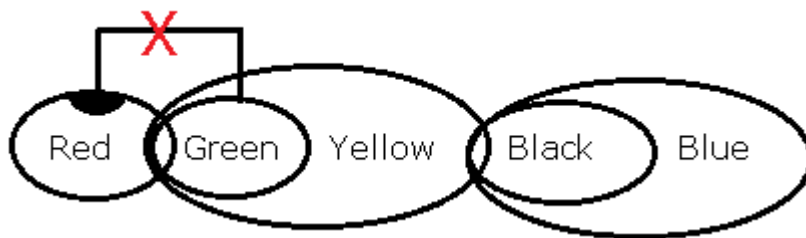

I). No Orange is Grapes is a possibility -Here, there is no direct relation between orange and grapes. So, all the possible conclusions between them are true. Hence, the conclusion I follow.

II). Some grapes are apples is a possibility - Here, there is no direct relation between apples and grapes. So, all the possible conclusions between them are true. Hence, the conclusion II follow.

19. Questions

Answer: D

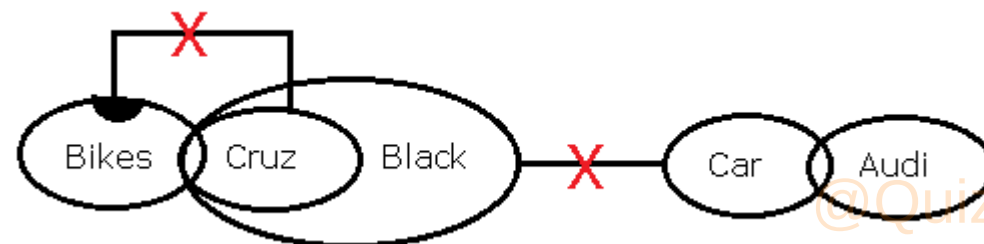

I). Some Red being Black is a possibility - Here, there is no direct relation between red and black. So, all the possible conclusions between them are true. Hence, the conclusion I follows.

II). All Black are Green is a possibility - Here, there is no direct relation between green and black. So, all the possible conclusions between them are true. Hence, the conclusion II follows.

20. Questions

Answer: E

I). Some Bikes are definitely not Cars - Here, only a few bikes can be black, whereas no car is black. So, some bikes are definitely not cars is the definite conclusion. Hence, the conclusion follows,

II).Some Cars are Bike is a possibility- Here, there is no direct relation between cars and bikes. So, all the possible conclusions between them are true. So, the conclusion II follows.
