

1. Questions

In the following passage, certain words have been omitted and replaced by blanks. Read the passage carefully and answer the questions that follow.

The importance of sleep is often **_(A)_** in today's busy world. Most people treat sleep as something that can be shortened or skipped whenever work or social commitments demand it. However, sleep is not a luxury - it is a basic need that the body and mind cannot **_(B)_** for long without suffering consequences. During sleep, the brain processes the information gathered throughout the day and the body repairs itself. People who regularly sleep for fewer than six hours tend to have weaker immunity and find it harder to **_(C)_** their attention on tasks the following day. The quality of sleep matters just as much as the number of hours. Sleeping in a noisy or brightly lit room can **_(D)_** the body's ability to reach deep, restful sleep, leaving a person feeling tired even after a full night in bed. Experts suggest keeping a fixed bedtime, avoiding screens before sleeping, and making the bedroom as quiet and dark as possible. These small changes, if followed regularly, can greatly **_(E)_** the quality of sleep and leave a person feeling refreshed and ready to face the day.

Which of the following words can fill in the blank labelled as (A)?

- a. celebrated
- b. discussed
- c. underestimated
- d. accepted
- e. recognised

2. Questions

Which of the following words can fill in the blank labelled as (B)?

@RankZenBanker

- a. perform
- b. function
- c. manage
- d. continue
- e. survive

3. Questions

Which of the following words can fill in the blank labelled as (C)?

- a. hold
- b. fix
- c. focus
- d. direct

e. keep

4. Questions

Which of the following words can fill in the blank labelled as (D)?

- a. weaken
- b. limit
- c. reduce
- d. infect
- e. harm

5. Questions

Which of the following words can fill in the blank labelled as (E)?

- a. raise
- b. boost
- c. improve
- d. increase
- e. develop

6. Questions

In the following questions, the sentence is split into five parts and named A, B, C, D and E. These five parts are not given in their proper order. Rearrange the parts of the sentence to make a grammatically correct and contextually meaningful statement.

- A). International environmental agencies continue to monitor
 - B). the impact of increasingly frequent extreme weather events
 - C). changing climate patterns and encourage governments to strengthen
 - D). disaster preparedness, improve climate resilience, and
 - E). promote sustainable resource management to reduce
- a. AEBCD
 - b. BEDAC
 - c. ADEBC
 - d. ACDEB
 - e. No rearrangement required

7. Questions

- A). High-frequency economic indicators
 - B). strengthen economic monitoring, and respond more effectively
 - C). and data-driven approaches to improve decision-making,
 - D). policymakers are increasingly adopting
 - E). to changing domestic and global market conditions
- a. AEBCD
 - b. DACBE
 - c. ABDCE
 - d. DEACB
 - e. No rearrangement required

8. Questions

- A). India continues to remain among the fastest-growing major economies,
 - B). persistent global uncertainties affecting growth
 - C). with strong domestic demand supporting its economic outlook
 - D). even as international financial institutions highlight
 - E). and inflation across several regions
- a. ACEDB
 - b. BDACE
 - c. ACDBE
 - d. BCDAE
 - e. No rearrangement required

@RankZenBanker

9. Questions

- A). Many countries are strengthening climate resilience by
 - B). the impact of increasingly frequent extreme weather events
 - C). improving disaster preparedness, investing
 - D). in sustainable infrastructure, and promoting
 - E). scientific forecasting systems to reduce
- a. EDABC
 - b. CADEB
 - c. BACDE

- d. ACDEB
- e. No rearrangement required

10. Questions

- A). While reducing emerging digital risks
- B). governments and international organizations are
- C). intensifying discussions on responsible artificial intelligence governance,
- D). emphasizing transparency, safety, and international cooperation
- E). to ensure that technological innovation benefits societies
- a. BCDEA
 - b. CBADE
 - c. AEDBC
 - d. CBDEA
 - e. No rearrangement required

11. Questions

In each of the following questions, a sentence is given with a blank. Below each sentence, five phrasal verbs are given as options (A), (B), (C), (D) and (E). Choose the phrasal verb that fits the blank most appropriately in terms of meaning and grammatical correctness and mark the correct option as your answer.

The bank manager asked his assistant to _____ all the pending loan applications before the end of the day.

- a. go through
- b. go against
- c. go off
- d. go over to
- e. go by

12. Questions

My younger brother always _____ his elder siblings in every task he attempts.

- a. looks up at
- b. looks up to
- c. looks down on
- d. looks forward to

e. looks out for

13. Questions

The price of vegetables has _____ sharply this week due to the unseasonal rains.

- a. gone up
- b. gone off
- c. gone out
- d. gone in
- e. gone along

14. Questions

The volunteers decided to _____ the cleanliness drive despite the heavy rain.

- a. carry off
- b. carry out
- c. carry on
- d. carry over
- e. carry away

15. Questions

The old man was trying to _____ to what had been said but could not recall the exact word.

@RankZenBanker

- a. think up
- b. think over
- c. think out
- d. think back
- e. think through

16. Questions

In each question below, three sentences are given. Each sentence may or may not be grammatically correct. Identify the sentence(s) that is/are grammatically correct and select the appropriate option. If none of the sentences is grammatically correct, choose Option (E) – All Incorrect as your answer.

(A). The government has launched a new scheme aimed at providing financial assistance to farmers who has been affected by the recent floods.

(B). According to the latest report, nearly half of the rural households still lacks access to formal banking channels.

(C). The central bank's decision to cut interest rates is expected to boost consumer spending in the coming months.

- a. Only A
- b. Only B
- c. Only C
- d. Both A and B
- e. All are incorrect

17. Questions

(A). Several public sector banks has reported a sharp decline in their non-performing assets over the last two quarters.

(B). It is the responsibility of every citizen to ensure that their personal information is not misused by fraudsters.

(C). The survey revealed that most of the small businesses were struggling to obtaining loans from nationalized banks.

- a. Only A
- b. Only B
- c. Only C
- d. Both B and C
- e. All are incorrect

18. Questions

(A). The new taxation policy, along with several other reforms, are likely to affect small traders the most.

(B). A significant proportion of the population continue to rely on cash transactions despite the push for digital payments.

(C). The panel of experts has recommended stricter norms for the approval of high-value loans.

- a. Only A
- b. Only B
- c. Only C
- d. Both A and C
- e. All are incorrect

19. Questions

(A). The bank clarified that the revised charges will not effect existing customers who hold savings accounts.

(B). Neither the branch manager nor the regional head were available to comment on the matter.

(C). The report suggests that digital literacy among senior citizens has improved considerably in the past year.

- a. Only A

- b. Only B
- c. Only C
- d. Both A and B
- e. All are incorrect

20. Questions

(A). The committee, comprising of representatives from five states, will submit its findings by next month.
(B). The report highlights that women entrepreneurs are increasingly turning to microfinance institutions for working capital.

(C). The data clearly indicate that the rural credit demand has risen sharply since last year.

- a. Only A
- b. Only B
- c. Only C
- d. Both B and C
- e. All are incorrect

21. Questions

Read the following passage carefully and answer the questions that follow:

For three summers running, India has broken its own temperature records, and three years running, its monsoon has refused to behave like a season at all. In 2026, nearly all of the world's hundred hottest cities were Indian; Balangir in Odisha touched 48°C, Banda in Uttar Pradesh crossed 47°C, and the power grid logged an all-time peak demand of close to 271 gigawatts as a nation reached for its air-conditioners and coolers. A year earlier, the country recorded extreme weather - heat, cloudbursts, floods, lightning - on 331 of 334 days, killing more than 4,400 people and damaging crops across 11 million hectares.

This year's monsoon, by contrast, arrived late and limped along, leaving three-quarters of the country short of normal rainfall even as last year's season ended in destructive excess, with the Ganga basin alone recording three dozen river breaches in a single month. The pattern is unmistakable: India no longer has a predictable climate, it has a **volatile** one, swinging between drought and deluge with little warning and even less margin for error. This is not a future risk to plan for at leisure; it is a present emergency being managed, at best, half-heartedly. Heatwaves, despite killing more people than almost any other natural hazard, are still not formally notified as disasters under the Disaster Management Act, even though the Finance Commission itself has recommended the change - a bureaucratic gap that slows emergency funding precisely when speed matters most.

Heat Action Plans now exist in twenty-three states, a genuine advance, but many remain underfunded, thinly staffed, and weakest exactly where vulnerability is highest - in slums and informal settlements with little shade and less cooling. More than seven in ten Indian cities still lack adequate stormwater drainage, which is why a single intense downpour can paralyse a metropolis built for a gentler climate. Agriculture, which employs nearly half the workforce and remains substantially rain-fed, is being asked to absorb shocks it was never designed for. What India needs now is not another plan but the political will to fund

and enforce the plans it already has.

Heatwaves must be formally recognised as disasters, unlocking dedicated relief funds rather than ad hoc compensation. Cities need drains, wetlands and green cover restored faster than concrete is poured, with cooling shelters and water points for outdoor workers built into municipal budgets, not added as afterthoughts. Early-warning systems for both heat and rainfall need finer, district-level **granularity**, reaching farmers and auto-rickshaw drivers as readily as they reach television anchors. Climate adaptation - glacier monitoring, cyclone shelters, drought-resistant crop varieties - deserves the same budgetary seriousness as the energy transition that dominates India's climate diplomacy. India's growth story has always rested on the assumption of a reasonably stable monsoon and a bearable summer. That assumption no longer holds. The cost of pretending otherwise will only compound with every record-breaking year. Preparation, not improvisation, must become the governing instinct.

According to the passage, what all-time record did India's power grid set during the 2026 heatwave?

- a. It generated a record 271 gigawatts of electricity from solar and wind sources.
- b. It suffered its longest-ever power outage lasting 271 hours due to extreme heat.
- c. It logged a peak demand of close to 271 gigawatts as the nation used air-conditioners and coolers.
- d. It connected 271 new cities to the national grid during the summer of 2026.
- e. It reduced power consumption to 271 gigawatts through demand-side management.

22. Questions

What bureaucratic gap does the author highlight regarding heatwaves in India?

- a. Heatwaves are classified as disasters under the Disaster Management Act but receive no dedicated relief funds.
- b. Heatwaves are not formally notified as disasters under the Disaster Management Act, which slows emergency funding even though the Finance Commission has recommended the change.
- c. The Finance Commission has refused to recommend heatwave notification as a disaster, blocking dedicated funding.
- d. Heatwaves are recognised as disasters in only five states, with the remaining states lacking the legal framework.
- e. The Disaster Management Act was amended in 2025 to include heatwaves but the states have not implemented it yet.

23. Questions

According to the passage, why can a single intense downpour paralyse a major Indian city?

- a. Indian cities experience more rainfall than any other country's cities due to climate change.
- b. India's power grid cannot handle the surge in electricity demand during heavy rainfall events.
- c. More than seven in ten Indian cities still lack adequate stormwater drainage systems.

- d. Indian cities were built on low-lying floodplains that are naturally prone to waterlogging.
- e. Municipal budgets in India do not allocate any funds for flood preparedness or disaster relief.

24. Questions

Which of the following does the passage NOT mention as a solution for India's climate crisis?

- a. Formally recognising heatwaves as disasters to unlock dedicated relief funds.
- b. Building cooling shelters and water points for outdoor workers into municipal budgets.
- c. Providing district-level early-warning systems for heat and rainfall.
- d. Negotiating a new international climate treaty to replace the Paris Agreement.
- e. Investing in glacier monitoring, cyclone shelters, and drought-resistant crop varieties.

25. Questions

What does the author mean by saying India's growth story 'rested on the assumption of a reasonably stable monsoon and a bearable summer'?

- a. India's economic planning was always based on the belief that the monsoon and temperature would remain within historically normal, manageable ranges.
- b. India's growth was entirely dependent on agricultural exports, which required perfect monsoon conditions every year.
- c. Indian economists had officially predicted that the monsoon would remain stable for the next fifty years.
- d. India's tourism industry, which drives economic growth, depends on a pleasant summer climate.
- e. India's growth story was built on false data that masked the true impact of climate instability.

26. Questions

Choose the word most similar in meaning to 'VOLATILE' as used in the passage?

- a. Stable and dependable
- b. Unpredictable and liable to change rapidly and dramatically
- c. Gradually warming over decades
- d. Affected only by human activity
- e. Seasonal and well-defined

27. Questions

Choose the word most similar in meaning to 'GRANULARITY' as used in the passage?

- a. Speed of transmission
- b. Financial cost

- c. Level of detail and precision
- d. Geographic coverage area
- e. Technical complexity

28. Questions

In the following questions, a word has been highlighted in the given sentence. Following the sentence are a few options which suggest the possible meaning of the given highlighted word. Identify the most appropriate option which suggests the correct meaning of the highlighted word.

India has **urged** the United States to address concerns over proposed tariffs linked to forced labour through the ongoing bilateral trade agreement (BTA) negotiations rather than unilateral action, while questioning inconsistencies in Washington's tariff framework during a public hearing before the US Trade Representative (USTR).

- a. Advised
- b. Requested
- c. Recommended
- d. Encouraged
- e. Persuaded

29. Questions

India's consumer inflation likely **breached** the central bank's target in June.

- a. Surpassed
- b. Influenced
- c. Approached
- d. Matched
- e. None of these

@RankZenBanker

30. Questions

US Vice President JD Vance announced that the US Department of Labour has launched investigations and issued **subpoenas** against alleged foreign fraudsters accused of misusing the H-1B visa programme, saying the Trump administration would ensure the scheme does not undermine American workers.

- a. Warrants
- b. Directives
- c. Summons
- d. Notices
- e. None of these

31. Questions

As Indian garment factories contend with soaring temperatures, worker efficiency and health have been **jeopardised**.

- a. Affected
- b. Threatened
- c. Reduced
- d. Disturbed
- e. None of these

32. Questions

UN Women notes that women risk bearing higher costs of AI adoption, as they face a bigger threat of losing jobs to automation and are more **vulnerable** to AI-enabled abuse.

- a. Exposed
- b. Dependent
- c. Sensitive
- d. Defenceless
- e. None of these

Explanations:

@RankZenBanker

1. Questions

Answer: C

The blank is in: "The importance of sleep is often _(A)_ in today's busy world." The sentence sets up the argument that people do not value sleep properly - treating it as optional. The blank must convey that sleep's importance is not given its due weight. All five options are past participles that can follow "is often," making them grammatically identical. The distinction is entirely in meaning.

Celebrated: widely praised and admired - does not fit; if sleep were celebrated, people would value it more, which contradicts the passage's argument.

Discussed: talked about - does not fit; the passage is not saying sleep is rarely talked about. It is saying people do not respect it sufficiently. Discussed is neutral and does not capture the idea of undervaluing.

Underestimated: not given enough value or credit - fits precisely; the entire passage argues that people fail to appreciate sleep's true importance, which is exactly what underestimated means.

Accepted: agreed to or received - does not fit; if sleep's importance is accepted, people would act accordingly, but the passage says they shorten it freely.

Recognised: acknowledged or identified - does not fit; if sleep's importance is recognised, there is no

problem to discuss. The passage argues the opposite - that people fail to acknowledge it.

The word that can fill is "**underestimated.**" The complete sentence: "The importance of sleep is often underestimated in today's busy world."

2. Questions

Answer: B

The blank is in: "sleep is a basic need that the body and mind cannot _(B)_ for long without suffering consequences." The blank requires a verb expressing the body and mind's inability to operate normally without sleep. All five are intransitive verbs that can follow "cannot" - the correct one must most naturally describe what the body and mind do in terms of normal operation.

Perform: to carry out a task or action - does not fit precisely; perform typically requires an object (perform a task, perform well) or refers to a specific activity. The body and mind do not merely "perform" - they function as systems.

Function: to work or operate normally - fits perfectly; "the body and mind cannot function" is the standard expression for describing the breakdown of normal biological and cognitive operation. Function captures the systemic, ongoing nature of what the body and mind do.

Manage: to succeed in doing something difficult - does not fit; "cannot manage for long" implies struggling to cope, which is weaker and more informal than what the passage requires.

Continue: to go on doing something - does not fit; "cannot continue for long" implies stopping an activity, whereas the passage is describing an inability to operate at a basic biological level.

Survive: to remain alive - does not fit well; while extreme sleep deprivation is dangerous, the passage says "suffering consequences," not death. Survive overstates the immediate effect being described.

The word that can fill is "**function.**" The complete sentence: "sleep is a basic need that the body and mind cannot function for long without suffering consequences."

3. Questions

Answer: C

The blank is in: "find it harder to _(C)_ their attention on tasks the following day." The blank requires a verb that collocates naturally and precisely with "attention on" to describe the act of concentrating. All five options are verbs that can relate to attention - candidates must identify which one forms the most natural and standard collocation.

Hold: to keep in place - "hold attention on" is used when something keeps another person's attention (the film held their attention), not when a person concentrates on something themselves.

Fix: to fasten or direct steadily - "fix attention on" is a valid but formal and somewhat literary expression; it is less standard in everyday written English than the correct answer.

Focus: to concentrate on - fits perfectly; "focus attention on" is the most natural, widely used collocation in both spoken and written English for the act of directing one's concentration toward a task.

Direct: to aim or guide - "direct attention on" is not the standard preposition; one directs attention to something, not on something. The preposition mismatch makes this unnatural.

Keep: to maintain - "keep attention on" is used informally but lacks the precision of "focus"; keeping attention suggests maintenance of existing focus, whereas the sentence implies the initial difficulty of concentrating at all.

The word that can fill is "**focus**." The complete sentence: "find it harder to focus their attention on tasks the following day."

4. Questions

Answer: A

The blank is in: "Sleeping in a noisy or brightly lit room can _(D)_ the body's ability to reach deep, restful sleep." The blank needs a verb that describes what poor sleeping conditions do to the body's capacity for deep sleep. All five options are verbs with broadly similar negative meanings - the correct one must most precisely describe a reduction in capacity or strength.

Weaken: to make less strong or effective - fits precisely; a noisy or bright environment weakens the body's ability to achieve deep sleep by degrading the conditions needed for it, making the capacity less effective.

Reduce: to make smaller in size or amount - does not fit precisely; "reduce the body's ability" suggests cutting it down quantitatively, but ability is not a quantity that is simply reduced - it is more naturally described as being weakened or impaired.

Limit: to restrict within bounds - does not fit; "limit the body's ability" implies setting an external boundary, whereas a noisy room does not set a boundary - it degrades the capacity itself.

Infect: Infect means to spread a disease or harmful microorganism into a living body. "Infect the body's ability" does not make sense because a room cannot spread a disease to the body's ability to sleep.

Harm: to cause injury or damage - does not fit; "harm the body's ability" implies damaging the ability itself as though it were an object, which is not natural. One harms a person or a thing, not an abstract capacity.

@RankZenBanker

The word that can fill is "**weaken**." The complete sentence: "Sleeping in a noisy or brightly lit room can weaken the body's ability to reach deep, restful sleep."

5. Questions

Answer: C

The blank is in: "These small changes, if followed regularly, can greatly _(E)_ the quality of sleep." The blank requires a verb that means to make the quality of sleep better. All five options suggest making something greater or better - candidates must identify which one most precisely and naturally collocates with "quality of sleep."

Raise: to move to a higher level - does not fit; "raise the quality" is used for standards in formal or technical contexts (raise standards, raise the bar), but is not the natural collocation with "quality of sleep" in everyday usage.

Boost: to increase or strengthen - does not fit precisely; "boost" collocates well with energy, confidence, or performance, but "boost the quality of sleep" sounds informal and slightly unnatural in a written passage.

Improve: to make better - fits perfectly; "improve the quality of sleep" is the standard, natural, and most widely used expression in both everyday and formal English for making sleep better.

Increase: to make greater in size or number - does not fit; "increase" applies to measurable quantities (increase speed, increase output), not to quality. Quality is improved, not increased.

Develop: to grow or cause to grow - does not fit; one develops a skill or a habit, not the quality of sleep. This collocation is unnatural in this context.

The word that can fill is "**improve.**" The complete sentence: "These small changes, if followed regularly, can greatly improve the quality of sleep and leave a person feeling refreshed and ready to face the day."

6. Questions

Answer: D

While going through the passage, only arrangement (d) makes a contextually meaningful sentence. The sentence thus formed is: International environmental agencies continue to monitor changing climate patterns and encourage governments to strengthen disaster preparedness, improve climate resilience, and promote sustainable resource management to reduce the impact of increasingly frequent extreme weather events.

Logic of arrangement:

A introduces the subject and verb.

C continues with the two actions: monitor and encourage governments to strengthen...

D and **E** complete the list of actions:

- strengthen disaster preparedness,
- improve climate resilience,
- and promote sustainable resource management.

B comes last because the infinitive phrase "**to reduce the impact of increasingly frequent extreme weather events**" expresses the **purpose** of all the preceding actions. @RankZenBanker

7. Questions

Answer: B

While going through the passage, only arrangement (b) makes a contextually meaningful sentence. The sentence thus formed is: Policymakers are increasingly adopting high-frequency economic indicators and data-driven approaches to improve decision-making, strengthen economic monitoring, and respond more effectively to changing domestic and global market conditions.

Logic of arrangement:

D - "Policymakers are increasingly adopting" - clear subject + verb, opens the sentence

A - "high-frequency economic indicators" - the direct object of "adopting"

C - "and data-driven approaches to improve decision-making," - extends the object with a second thing being adopted; comma signals a list continues

B - "strengthen economic monitoring, and respond more effectively" - continues the infinitive list (to improve... strengthen... respond...)

E - "to changing domestic and global market conditions" - closes the sentence, telling us what they are

responding to.

8. Questions

Answer: C

While going through the passage, only arrangement (c) makes a contextually meaningful sentence. The sentence thus formed is: India continues to remain among the fastest-growing major economies, with strong domestic demand supporting its economic outlook even as international financial institutions highlight persistent global uncertainties affecting growth and inflation across several regions.

Logic of arrangement:

A - "India continues to remain among the fastest-growing major economies" - main clause, introduces the subject

C - "with strong domestic demand supporting its economic outlook" - adds a supporting detail about why India is growing (participial phrase)

D - "even as international financial institutions highlight" - contrast conjunction introducing the counter-point

B - "persistent global uncertainties affecting growth" - the object of "highlight"; what institutions are pointing out

E - "and inflation across several regions" - extends B with a second concern being highlighted, completing the sentence.

9. Questions

Answer: D

While going through the passage, only arrangement (d) makes a contextually meaningful sentence. The sentence thus formed is: Many countries are strengthening climate resilience by improving disaster preparedness, investing in sustainable infrastructure, and promoting scientific forecasting systems to reduce the impact of increasingly frequent extreme weather events.

Logic of arrangement:

A introduces the subject and verb: Many countries are strengthening climate resilience by...

C begins the list after **by**: improving disaster preparedness, investing...

D continues the list: in sustainable infrastructure, and promoting...

E completes the object: scientific forecasting systems to reduce...

B finishes the infinitive phrase: the impact of increasingly frequent extreme weather events.

10. Questions

Answer: A

While going through the passage, only arrangement (a) makes a contextually meaningful sentence. The sentence thus formed is: Governments and international organizations are intensifying discussions on responsible artificial intelligence governance, emphasizing transparency, safety, and international

cooperation to ensure that technological innovation benefits societies while reducing emerging digital risks

Logic of arrangement:

B - "governments and international organizations are" - the main subject + auxiliary verb; sentence opener

C - "intensifying discussions on responsible artificial intelligence governance," - the main verb phrase continuing from B; the comma signals more to follow

D - "emphasizing transparency, safety, and international cooperation" - a participial phrase elaborating on how they are doing C

E - "to ensure that technological innovation benefits societies" - infinitive of purpose, explaining why they emphasize D

A - "while reducing emerging digital risks" - a subordinate adverbial clause that wraps up the sentence, contrasting/qualifying E.

11. Questions

Answer: A

A). go through - to examine or review something carefully.

'Go through the applications' = review them one by one.

The most natural and precise choice in a banking/official context.

B). go against - to oppose or contradict. ('The verdict went against him.') Cannot mean to review or process documents.

C). go off - to explode, to ring (alarm), or to go bad (food). ('The alarm went off at 6 a.m.') Completely unrelated to reviewing applications.

D). go over to - to move towards or switch allegiance. ('She went over to the other side.') Not suitable for reviewing documents.

E). go by - to pass (time), or to follow a rule. ('As time went by...') Cannot be used to mean reviewing or examining files.

12. Questions

Answer: B

A). looks up at - to physically direct one's gaze upward at something. ('She looked up at the stars.') A literal physical action; not used for admiration of people.

B). looks up to - to admire and respect someone, especially an older or more experienced person. 'Looks up to his elder siblings' fits perfectly - admiring them as role models.

C). looks down on - to regard someone with contempt or as inferior. ('He looks down on people who don't read.') This is the opposite of admiration.

D). looks forward to - to anticipate something with excitement. ('She looks forward to the holidays.') Used for future events, not for admiring people.

E). looks out for - to watch out for danger, or to take care of someone. ('He looks out for his teammates.')

Means to protect, not to admire.

13. Questions

Answer: A

A). gone up - to increase or rise. 'The price has gone up' is the standard and most common expression for a rise in price. The adverb 'sharply' further confirms a sudden increase.

B). gone off - to explode, to ring, or (of food) to become rotten. ('The milk has gone off.') Cannot mean a rise in price.

C). gone out - to leave a place, or for a light/fire to be extinguished. ('The lights went out suddenly.') Cannot describe a price increase.

D). gone in - not a standard phrasal verb in this context. Has no established meaning related to prices or quantities.

E). gone along - to accompany or to agree with. ('She went along with the plan.') Entirely unrelated to price movement.

14. Questions

Answer: C

A). carry off - to win a prize, or to succeed at something difficult. ('She carried off the gold medal.') Does not mean to continue an activity in the face of difficulty.

B). carry out - to perform or execute a task. ('The team carried out the survey.') While close, it suggests completing a task, not continuing despite obstacles - the key idea here.

C). carry on - to continue doing something, especially despite difficulty or opposition. 'Carry on despite the heavy rain' is the most natural and idiomatic fit for this context.

@RankZenBanker

D). carry over - to transfer something to a later time or period. ('The meeting was carried over to Thursday.') Means postponement, not continuation.

E). carry away - to lose control of one's emotions or enthusiasm. ('Don't get carried away.') Does not mean to continue an activity.

15. Questions

Answer: D

A). think up – to invent or create something new. ('She thought up a clever plan.') Refers to creating a new idea or solution, not recalling something that was said earlier.

B). think over – to consider something carefully before making a decision. ('Let me think it over before I answer.') Relates to careful deliberation or evaluation, not remembering a past conversation.

C). think out – to plan or work something out thoroughly. ('He thought out every detail of the project.') Means carefully planning or developing an idea, not recalling information from memory.

D). think back – to try to remember or recall something from the past. ('She thought back to the conversation they had last week.') 'Trying to think back to what had been said' means trying to remember an earlier conversation in order to recall the exact word. This is the most natural and precise phrasal verb

for the context.

E). think through – to consider all aspects of something carefully before taking action. ('We need to think this through before making a final decision.') Refers to analysing a situation thoroughly, not remembering something from the past.

16. Questions

Answer: C

(A) Incorrect: "farmers who has been" - who refers to farmers (plural), so the verb must agree with the plural antecedent - should be "who **have** been affected."

(B) Incorrect: "nearly half of the rural households still lacks" - "households" is plural, so it needs a plural verb - should be "still **lack** access."

(C) Correct: Subject "the central bank's decision" is singular, correctly paired with "is expected." Tense and structure are both accurate.

17. Questions

Answer: B

(A) Incorrect: "Several public sector banks has reported" - "banks" is plural, needs "**have** reported."

(B) Correct: "It is the responsibility of every citizen to ensure that their..." - this is grammatically sound; "their" here is accepted as a gender-neutral singular pronoun in modern usage, and the sentence structure is intact.

(C) Incorrect: "struggling to obtaining loans" - after "to" (infinitive), the base verb form is needed - should be "struggling to **obtain** loans."

18. Questions

@RankZenBanker

Answer: C

(A) Incorrect: "The new taxation policy...are likely" - the subject is "the new taxation policy" (singular); "along with several other reforms" is a parenthetical phrase and doesn't make the verb plural - should be "**is** likely."

(B) Incorrect: "A significant proportion of the population continue" - "proportion" is singular (governed by "of the population," a mass noun) - should be "**continues** to rely."

(C) Correct: "The panel of experts has recommended" - "panel" is a collective singular noun, correctly paired with "has."

19. Questions

Answer: C

(A) Incorrect: Confusion between "effect" (noun, meaning result) and "affect" (verb, meaning to influence) - should be "will not **affect** existing customers."

(B) Incorrect: "Neither...nor" agreement rule: the verb agrees with the noun closer to it - "regional head" is singular, so it should be "**was** available," not "were."

(C) **Correct:** Subject-verb agreement, tense, and structure are all correct - "the report suggests" (singular) and "has improved" (present perfect) are properly used.

20. Questions

Answer: D

(A) **Incorrect:** "comprising of representatives" - "comprising" already means "consisting of," so adding "of" is redundant - should be "comprising representatives" (no "of").

(B) **Correct:** "The report highlights that women entrepreneurs are increasingly turning..." - subject-verb agreement is correct ("entrepreneurs are turning"), and the present continuous tense correctly conveys an ongoing trend.

(C) **Correct:** "The data clearly indicate" - "data" is technically plural (though often used as singular in casual speech, exams treat it as plural) - "indicate" is the right verb form here, and it correctly pairs with "has risen" for the singular noun "credit demand."

21. Questions

Answer: C

a). Incorrect. The 271 gigawatts refers to peak demand, not to power generated from renewable sources. The passage does not mention solar or wind generation in this context.

b). Incorrect. A 271-hour outage is not mentioned. The 271 gigawatts figure refers to peak electricity demand - how much the grid had to supply, not how long it failed.

c). Correct. The passage directly states: 'the power grid logged an all-time peak demand of close to 271 gigawatts as a nation reached for its air-conditioners and coolers.'

d). Incorrect. Connecting 271 new cities to the grid is not mentioned anywhere in the passage.

e). Incorrect. The 271 gigawatts represents maximum demand, not reduced consumption. No demand-side management programme is described in this context.

22. Questions

Answer: B

a). Incorrect. This reverses the situation. Heatwaves are NOT classified as disasters - that is the very gap the author identifies.

b). Correct. The passage directly states: 'Heatwaves...are still not formally notified as disasters under the Disaster Management Act, even though the Finance Commission itself has recommended the change - a bureaucratic gap that slows emergency funding precisely when speed matters most.'

c). Incorrect. The Finance Commission has recommended the change - meaning it supports classifying heatwaves as disasters. The gap is that the Act has not been amended, not that the Commission blocked it.

d). Incorrect. The passage does not say heatwaves are recognised as disasters in five states. Heat Action Plans exist in twenty-three states - but that is a different thing from formal disaster notification under the Act.

e). Incorrect. No 2025 amendment to the Disaster Management Act is mentioned in the passage.

23. Questions

Answer: C

- a). Incorrect. India receiving more rainfall than other countries is not claimed. The issue is poor drainage infrastructure, not the amount of rainfall relative to other nations.
- b). Incorrect. Power grid capacity during rainfall is not mentioned as the reason cities get paralysed by downpours. The passage attributes it directly to drainage failures.
- c). Correct. The passage directly states: 'More than seven in ten Indian cities still lack adequate stormwater drainage, which is why a single intense downpour can paralyse a metropolis built for a gentler climate.'
- d). Incorrect. Floodplain geography is not cited as the reason for urban flooding in the passage. The passage attributes it to inadequate drainage infrastructure, not natural landform.
- e). Incorrect. The passage does not say municipal budgets allocate zero funds for flood preparedness. It says cooling shelters and water points are added 'as afterthoughts' - a criticism of priorities, not a claim of zero spending.

24. Questions

Answer: D

- a). Incorrect as a 'NOT mentioned' choice. Formally recognising heatwaves as disasters is directly recommended: 'Heatwaves must be formally recognised as disasters, unlocking dedicated relief funds.'
- b). Incorrect as a 'NOT mentioned' choice. The passage explicitly says: 'cooling shelters and water points for outdoor workers built into municipal budgets, not added as afterthoughts.'
- c). Incorrect as a 'NOT mentioned' choice. The passage calls for 'Early-warning systems for both heat and rainfall...finer, district-level granularity.'
- d). Correct - this is NOT mentioned. A new international climate treaty replacing the Paris Agreement is never discussed. The passage focuses on domestic policy action, not international diplomacy or treaty negotiations.
- e). Incorrect as a 'NOT mentioned' choice. The passage directly mentions: 'Climate adaptation - glacier monitoring, cyclone shelters, drought-resistant crop varieties - deserves the same budgetary seriousness as the energy transition.'

25. Questions

Answer: A

- a). Correct. The passage argues that India's economic planning assumed a 'reasonably stable monsoon and a bearable summer' - meaning the entire model of growth (agriculture, infrastructure design, urban planning) was built on an expectation of climate predictability that no longer exists. The sentence that follows - 'That assumption no longer holds' - confirms that this stable climate baseline has collapsed.
- b). Incorrect. The passage does not say India's growth depended entirely on agricultural exports or perfect monsoon conditions. It refers broadly to the assumption of climate normalcy underpinning all planning.
- c). Incorrect. No official fifty-year prediction by Indian economists is mentioned. The passage describes an implicit planning assumption, not a formal forecast.

d). Incorrect. Tourism is not mentioned in the passage. The argument is about the broader economic and agricultural foundation of growth planning.

e). Incorrect. False data or deliberate masking of climate instability is not the author's argument. The point is that an assumption that once seemed reasonable has now been broken by new climate realities.

26. Questions

Answer: B

a). Stable and dependable Incorrect. 'Stable and dependable' is the direct antonym of 'volatile'. The passage uses 'volatile' as the opposite of 'predictable' - contrasting what India used to have with what it now faces.

b). Unpredictable and liable to change rapidly and dramatically Correct. 'Volatile' means subject to rapid, extreme, and unpredictable change. The passage uses it precisely in this sense - India's climate swings sharply between drought and deluge with little warning, making it volatile rather than predictable.

c). Gradually warming over decades Incorrect. 'Gradually warming over decades' describes a slow, directional trend - the opposite of volatile, which implies sudden and dramatic swings in either direction.

d). Affected only by human activity Incorrect. 'Volatile' says nothing about the cause of change. It describes the nature of change - rapid and unpredictable - regardless of what drives it.

e). Seasonal and well-defined Incorrect. 'Seasonal and well-defined' describes the kind of climate India used to have - predictable. Volatile is the opposite: no longer following seasonal patterns, swinging erratically.

27. Questions

Answer: C

a). Speed of transmission Incorrect. 'Granularity' does not refer to how fast information travels. The passage is asking for finer detail at the district level - not faster delivery. @RankZenBanker

b). Financial cost Incorrect. 'Granularity' has nothing to do with cost. It is a term describing the scale and precision of data or information - finer granularity means more detailed, localised information.

c). Level of detail and precision Correct. 'Granularity' refers to the degree of detail in a system or dataset. 'Finer, district-level granularity' means early-warning systems must provide more detailed, localised information - broken down to the district level rather than being broad or generalised. This is the precise meaning in context.

d). Geographic coverage area Incorrect. 'Geographic coverage' refers to how wide an area a system reaches. Granularity refers to how detailed the information is within that area - not how large the area is.

e). Technical complexity Incorrect. 'Technical complexity' refers to how complicated a system is to build or operate. 'Granularity' describes the resolution or detail of the data produced - not the engineering difficulty involved.

28. Questions

Answer: B

In the given sentence, the word "urged" means **to strongly request or earnestly press someone to do something**. Here, India is **strongly requesting** the United States to resolve tariff-related concerns through

bilateral negotiations instead of taking unilateral action.

- a). **Advised** – *Incorrect*. "Advised" means **to offer guidance or suggestions**. It lacks the sense of strong insistence conveyed by **urged**.
- b). **Requested** – **Correct**. Although **request** is generally less forceful than **urge**, it is the closest meaning among the given options. In diplomatic contexts, **urge** often means **to make a strong request**.
- c). **Recommended** – *Incorrect*. "Recommended" means **to suggest something as suitable or beneficial**, but it does not imply a strong appeal or insistence.
- d). **Encouraged** – *Incorrect*. "Encouraged" means **to give confidence, support, or motivation**. It does not mean making a formal or strong request.
- e). **Persuaded** – *Incorrect*. "Persuaded" means **to successfully convince someone to do something**. It refers to the result of convincing, whereas **urged** refers to the act of strongly requesting.

Therefore, the correct answer is (b) Requested.

29. Questions

Answer: A

In the given sentence, the word "**breached**" means **to go beyond, exceed, or cross a limit**. Here, it indicates that consumer inflation **went above** the target set by the central bank.

a). **Surpassed** - (Correct)

Surpassed means **exceeded or went beyond**, which perfectly matches the meaning of **breached** in this context.

b). **Influenced** – *Incorrect*: Influenced means **affected or had an impact on**. Inflation may influence economic policies, but it does not mean **breached**.

c). **Approached** -*Incorrect*: Approached means **came close to**. Inflation can approach a target without actually crossing it, whereas **breached** clearly means it **crossed** the target.

d). **Matched** – *Incorrect*: Matched means **equalled exactly**. If inflation matched the target, it would not have **breached** it.

e). **None of these**: Since "**Surpassed**" is the correct meaning, this option is incorrect.

30. Questions

Answer: C

In the given sentence, the word "**subpoenas**" refers to **official legal orders requiring a person to appear before a court or provide documents/evidence** during an investigation. It is a legal command issued by a court or an authorized authority.

a). **Warrants** – A warrant is an official authorization, usually for an arrest or a search. Although it is a legal document, it is **not the same as a subpoena**. A subpoena compels appearance or production of evidence, whereas a warrant authorizes law enforcement action.

b). **Directives** – Directives are official instructions or orders. They may guide actions but **do not carry the specific legal meaning** of a subpoena.

c). **Summons – Correct Answer.** A summons is an official order requiring a person to appear before a court or legal authority. Although a subpoena is more specific (often requiring testimony or documents), **"summons" is the closest meaning among the given options.**

d). **Notices** – A notice is simply an official communication or information. It **does not legally compel** someone to appear or produce evidence.

e). **None of these** – Incorrect, because **"summons"** is the closest meaning.

31. Questions

Answer: B

In the given sentence, the word **"jeopardised"** means **put at risk, endangered, or threatened**. The sentence indicates that rising temperatures have put workers' efficiency and health in danger.

a). **Affected** – This means influenced or changed. Although worker efficiency and health are certainly affected, this word is broader and does not specifically convey the idea of being **at risk**.

b). **Threatened – Correct Answer.** "Threatened" means placed in danger or at risk, which is the closest meaning of **jeopardised** in this context.

c). **Reduced** – This means decreased in quantity or level. Efficiency may be reduced, but health is not necessarily "reduced." More importantly, **jeopardised** refers to **risk**, not simply reduction.

d). **Disturbed** – This means interrupted, upset, or troubled. While high temperatures may disturb working conditions, it does not capture the idea of **being endangered**.

e). **None of these** – Incorrect, because **"Threatened"** is the most appropriate meaning.

Therefore, the correct answer is option (b) – Threatened.

32. Questions

@RankZenBanker

Answer: A

In the given sentence, the word **"vulnerable"** means **likely to be harmed, attacked, or negatively affected**. Here, it indicates that women are **more exposed to the risk** of AI-enabled abuse.

a). **Exposed - (Correct)** – Exposed means open to danger, harm, or risk. It best matches the meaning of **vulnerable** in this context.

b). **Dependent** – Dependent means relying on someone or something for support. It has no connection with being at risk of abuse.

c). **Sensitive** – Sensitive means easily affected emotionally or physically. Although a sensitive person may sometimes be vulnerable, the two words are not synonymous in this context.

d). **Defenceless** – Defenceless means unable to protect oneself. It is related to vulnerability but is a stronger and narrower meaning. A person can be vulnerable even if they are not completely defenceless.

e). **None of these** – Incorrect, as **"Exposed"** is the most appropriate meaning.

Therefore, the correct answer is (a) Exposed.
